
tivement raisonnables, comparativement à ce qu'ils sont pour les autres produits, c'est attribuable aux négociations acharnées que nous avons menées spécialement avec les transporteurs pour cette catégorie de produits.

7. Un problème de plus grande envergure se pose avec la fixation des prix sur le marché de Montréal, étant donné la présence des fabricants locaux de cette catégorie de produits qui, en fait, ont établi un prix franco à bord à Montréal, ce qui nous oblige à suivre la même politique et à acquitter ainsi la totalité des frais de transport.

8. Ce qu'il s'agit de déterminer ici, c'est que si nous avons besoin d'aide pour nous maintenir sur le marché et assurer une certaine stabilité économique à la région, quelle sera la portée de cette aide et comment sera-t-elle appliquée? Dans ce qui suit, nous vous proposons un moyen de procéder.

9. Étant donné que l'acier semi-ouvré représente le plus grand pourcentage de notre production à acheminer et que nous estimons qu'il nous faut une subvention de 45c. la tonne, il conviendrait de traduire cette aide par une subvention plus élevée sous le régime de la Loi sur les taux de transport dans les Maritimes. Selon nos évaluations que nous joignons en annexe (*annexe I*), il faudrait à cette fin que la Loi soit modifiée et stipule une aide s'appliquant au parcours à l'est de Lévis et de Diamond (P.Q.) dans une proportion de 62.96 p. 100 au lieu des 30 p. 100 en vigueur. Si l'on accédait à notre requête, nous arriverions à la parité avec notre principal concurrent, pour ce qui est des livraisons à Contrecœur, celui de Hamilton.

10. Étant donné que nous ne retirons rien du transport des rails qui engloutit en plus des montants considérables, compte tenu de la différence qui intervient dans les prix de livraison, nous estimons que la modification à la Loi devrait s'appliquer à cette catégorie de notre production. Vu qu'on détermine ce prix sur la base d'un taux de transport théorique, la *Sydney Steel Corporation* se voit privée des avantages que confère la Loi sur les taux de transport des marchandises dans les Maritimes. On devrait redresser cette situation en autorisant les chemins de fer à faire une récupération raisonnable des fonds disponibles en vertu de la Loi, de sorte que notre société puisse profiter des avantages conférés par cette loi sans avoir à obliger les chemins de fer à appliquer les taux publiés. C'est d'autant plus souhaitable que les rails en général ne sont pas livrés à des points précis, mais acheminés à diverses bornes milliaires où ils seront installés.

11. In Appendix 2 there is shown the aver-ge freight allowance made in connection ith orders received from the C.N.R. alone ver the period 1958 to 1968. The increasing evel of freight allowance is the result of eliveries taking place in the Central and Vestern provinces. As a result of this west-ard direction of business our freight absorp-on on this portion of our production has ncreased 86.9 per cent in this 10 year period.

12. With respect to the smaller portion of ur production namely reinforcing steel and ails it is felt that these products should eceive the same assistance as is requested r our primary products as we must absorb 0 per cent of the freight on these products delivering them to Central Canadian ustomers.

13. It may be the view of this committee at several industries should have varying tes of MFRA assistance. The Sydney Steel orporation take the position that we would ot object to this approach provided the eeds of this firm are recognized per this bmission. In addition the Sydney Steel Cor-oration believes that the application of the FRA should be made viable to changing nditions and not a static piece of legislation.

14. The trucking service within the Mari-mes while developing over the years has en faced with relatively long hauls with tes generally constructed under the umbrel-of the rail rates reduced by the MFRA. It felt that this has held back the develop-ent of trucking services in the area to a uch greater degree than would otherwise ve been the case. In view of this it is the eling of the Sydney Steel Corporation that e MFRA should be extended to the trucking dustry in the belief that a healthier eco-mic basis of operation will indeed improve e trucking services of the area.

15. this, we feel would not at all be in nflict with the purpose and intent of the ational Transportation Policy set out as Sec-on 1 of the National Transportation Act 14-5-16 ELIZABETH Chapter 69 assented to on eb. 9, 1967 with the preamble statement cou-ed with Subsection (d) (ii) which in para-hrasing would read

ection 1

It is hereby declared that an economic, efficient and adequate transportation system making the best use of all available modes of transportation at the lowest total cost *is essential to protect the interests of the users of transportation and to maintain the eco-*

11. Dans l'annexe 2, nous indiquons l'escompte moyen que nous avons accordé au CN pour les commandes passées entre 1958 et 1968. Comme les livraisons ont été faites dans les provinces du Centre et de l'Ouest, on note une augmentation de cet escompte. Cette nouvelle orientation de notre marché pour cette catégorie de produits nous a coûté une augmentation de 86.9 p. 100 des frais de transport durant ces dix années.

12. Sur le plan de notre production d'acier d'armature et de clous, nous devrions, à notre avis, recevoir une aide au même titre que pour nos produits primaires, puisque nous devons acquitter totalement les frais de transport de ces produits pour les livrer à nos clients des provinces centrales.

13. Le Comité rétorquera peut-être que dans ce cas, plusieurs secteurs de l'industrie devraient bénéficier à divers degrés de l'aide conférée par la Loi sur les taux de transport des marchandises dans les Maritimes. La *Sydney Steel Corporation*, certes, n'y voit pas d'objection, à condition qu'on reconnaisse le bien-fondé de ses besoins exposés dans le présent mémoire. En outre, la société estime que le champ d'application de la Loi devrait être flexible, pour tenir compte de l'évolution des conditions économiques, et non pas immuable.

14. Bien qu'il ait pris une certaine expansion au fil des ans, le camionnage interprovincial dans les Maritimes a dû acheminer des produits sur des parcours relativement longs à des taux qui, en général, étaient établis en fonction des taux des chemins de fer en vigueur et réduits par la Loi. Nous sommes d'avis que cet état de choses a contribué bien plus que tout autre facteur à retarder le développement du camionnage dans la région. La société estime donc que la Loi sur les taux de transport dans les Maritimes devrait s'étendre au camionnage, étant donné qu'une base économique plus saine dans ce secteur améliorerait grandement les services fournis.

15. A notre avis, cette mesure n'irait nullement à l'encontre de l'esprit et du but de la politique nationale en matière de transport stipulée à l'article 1er de la Loi nationale sur les transports, 14-15-16 Elizabeth II, chap. 69, sanctionnée le 9 février 1967. Le préambule et l'alinéa *d*) (ii) se lisent ainsi qu'il suit:

Article 1er:

«Il est par les présentes déclaré qu'un système économique, efficace et adéquat de transport utilisant au mieux tous les moyens de transport disponibles au prix de revient global le plus bas est essentiel à la protection des intérêts des usagers des

nomic well-being and growth of Canada, and that these objectives are most likely to be achieved when all modes of transport are able to compete under conditions ensuring that having due regard to national policy and to legal and constitutional requirements

Subsection (d)
each mode of transport, so far as practicable, carries traffic to or from any point in Canada under tolls and conditions that *do not constitute*

Subsection (ii)
an undue obstacle to the interchange of commodities between points in Canada or unreasonable discouragement to the development of primary or secondary industries or to export trade in or from any region of Canada or to the movement of commodities through Canadian ports;

and this Act is enacted in accordance with and for the attainment of so much of these objectives as fall within the purview of subject matters under the jurisdiction of Parliament relating to transportation.

16. It is maintained that Parliament in the National interest of maintaining the economic well-being and growth of Canada can interpret this as being the economic growth and well-being of the Atlantic Provinces and Nova Scotia in particular. In addition the request for further assistance under the Maritime Freight Rates Act falls under the authority of the Parliament of Canada and would be a further statement of the intention of the Parliament of Canada to encourage rather than discourage the development of primary or secondary industries in this region. Indeed this might even be construed as being the maintenance of a primary and secondary industry endeavouring to remain in business for the economic well-being of the community in which it exists.

Appendix 1

Determination of amount of additional MFRA assistance needed to get freight rate of 514 NT on basic steel from Sydney, N.S. to Contrecoeur.

moyens de transport et au maintien de l prospérité et du développement économiqu du Canada, et que la façon la plus sûre d parvenir à ces objectifs est vraisemblable ment de rendre tous les moyens de trans port capables de soutenir la concurrenc dans les conditions qui assureront, compt tenu de la politique nationale et des exiger ces juridiques et constitutionnelles...

Alinéa d)
que chaque moyen de transport ache mine, autant que possible, le trafic à des tination ou en provenance de tout poin au Canada à des prix et à des condition qui *ne constituent pas...*»

Sous-alinéa (ii)
un obstacle excessif à l'échange des den rées entre des points au Canada ou u découragement déraisonnable du déve loppement des industries primaires secondaires ou du commerce d'exporta tion dans toute région du Canada ou e provenant ou du mouvement des denrée passant par des ports canadiens.»

et la présente loi est édictée en conformit et pour la réalisation de ces objectifs dan toute la mesure où ils sont du domaine de questions relevant de la compétence d Parlement en matière de transport.

16. Il est évident qu'en parlant de la pro périté et du développement économique d Canada, le Parlement peut très bien penser l'expansion économique et à la prospérité de provinces de l'Atlantique, et en particulier d la Nouvelle-Écosse. En outre, la requêt d'aide additionnelle en vertu de la Loi sur l taux de transport des marchandises dans l Maritimes est du ressort du Parlement qui, e acquiesçant, manifesterait son intention d favoriser et non pas de décourager le dévelo pement des industries primaires et secondair dans cette région du pays. On pourrait pre que dire qu'il s'agirait de soutenir une indu trie primaire et secondaire s'efforçant de su vivre pour la prospérité économique de région où elle est établie.

Development of MFRA Factor Through Rates on

(a) Present Rates

As billed rate 559 N.T.

Normal rate exclusive of MFRA assistance 747

MFRA Factor on Through Movement 74.8327%

(b) Requested Rates

As billed Per C.F.A. (AC) 2232 Agreed Charge 514 N.T.

Normal rate exclusive of MFRA assistance to remain per (a) Per C.F.A. (AC) 1957 Agreed Charge 747 N.T.

MFRA Factor on Through Movement 68.8086%

Milles de parcours et subdivision par tranches de 50 milles

De	A	Distance réelle	Distance arrondie en milles de voie	Pourcentage du transport à l'est et à l'ouest de Diamond
Sydney (N.-É.)	Diamond (P.Q.)	744.9	800	84.2105
Diamond (P.Q.)	Contrecœur (P.Q.)	133.5	150	15.7895
Total		908.4	950	100.0000

Calcul du facteur LTTMM pour le transport direct, en fonction:

a) Tarif en vigueur

Taux facturé 559 t.n.

Taux normal, exclusion faite de l'aide fournie en vertu de la LTTMM 747

Facteur LTTMM pour le transport direct 74.8327%

b) Tarif requis

Facturé Selon la taxe convenue de la C.F.A. (TC) 2232 514 t.n.

Taux normal, exclusion faite de l'aide fournie (LTTMM) pour se maintenir au niveau de *a*) Selon la taxe convenue de la C.F.A. (AC) 1957 747 t.n.

Facteur LTTMM pour le transport direct 68.8086%

Explanation of operation of present MFRA factor

Normal rate of 747 x 84.2105% represents portion of normal rate attributable to lines east of Levis .....=629

Mode d'application du facteur LTTMM en vigueur

1. Taux normal de 747 × 84.2105% donne la tranche du taux normal applicable aux lignes à l'est de Lévis ..... = 629

2. Normal rate of 747 x 15.7895% represents portion of normal rate attributable to lines west of Levis .....=118
3. Eastern portion of rate (629) reduced by 30% per MFRA (440) plus non reduceable portion of rate (118) .....=558

Determination of rate of MFRA assistance necessary to obtain freight rate of 514 from Sydney to Contrecœur

1. New MFRA factor on through movement .....=68.8086%
2. This factor includes a non reduceable factor of 15.7895% therefore eastern portion of factor is 68.8086%—15.7895% .....=53.019%
3. Rate of MFRA assistance is determined by dividing the eastern portion of through movement into reduced eastern factor 53.0191÷84.2105 .....=62.9602%

Application of requested MFRA rate of assistance

1. Normal rate of 747 x 84.2105% represents portion of normal rate attributable to lines east of Levis .....=629
2. Normal rate of 747 x 15.7895% represents portion of normal rate attributable to lines west of Levis .....=118
3. Eastern portion of rate 629 reduced by 62.9602% as requested (396) plus non reduceable portion of rate (118) .....=514

2. Taux normal de 747 × 15.7895% donne tranche du taux normal applicable a lignes à l'ouest de Lévis ..... = 1
3. Tranche du taux sur le parcours de l'e (629), déduction faite des 30% accordés vertu de la Loi sur les taux de transpo dans les Maritimes (440) et augmenté de tranche non réductible de ce taux (11 ..... = 5

Détermination du taux d'aide requise vertu de la Loi sur le transport des marcha dises dans les Maritimes pour établir le co de transport de 514 t.n. de Sydney à Contr cœur

1. Nouveau facteur LTTMM pour le tran port direct ..... = 68.8086
2. Ce facteur implique un facteur de no réduction de 15.7895% de sorte que, po le parcours de l'est, le taux est de 68.8086 — 15.7895% ..... = 53.0191
3. Le taux d'aide requis dans le cadre de Loi susmentionnée en divisant le pource tage du mouvement direct sur le parcou de l'est par le facteur réduit sur ce pa cours: 53.0191 ÷ 84.2105 ... = 62.9602

Application du taux d'aide requise en ver de la Loi sur le transport des marchandis dans les Maritimes

1. Taux normal de 747 × 84.2105% donne tranche du taux normal applicable a lignes à l'est de Lévis ..... = 6
2. Taux normal de 747 × 15.7895% donne tranche du taux normal applicable a lignes à l'ouest de Lévis ..... = 1
3. Tranche du taux sur le parcours de l'e (629) déduction faite des 62.9602% dema dés (396) et augmenté de la tranche n réductible de ce taux (118) ..... = 5

APPENDIX "J"

MOIRS LIMITED

BRIEF TO THE STANDING COMMITTEE ON TRANSPORT AND COMMUNICATIONS

Moirs Limited is an established confectionery business operating from its base in Halifax, Nova Scotia since 1830. During this period of time the Company has been able to build a reputation for quality products and establish a distribution for these products from Coast to Coast.

At the present time approximately two-thirds of the Company's volume is shipped out of the Atlantic Provinces. The Company is one of the few Nova Scotian industries which has been able to maintain in the area in which it is located steady employment and now but continued expansion. The acceptance of the Company's products in the Atlantic region is above average and consequently the most likely areas for future sales growth lie in the Central and Western Canadian regions. These are the areas with the large urban populations and at the same time the areas wherein are located the major competitive plants. Consequently freight rates and any proposed changes in the existing structure are very significant and important to us.

Our present freight costs are in excess of one-half a million dollars and recent changes in the carload rates and the L.C.L. rates have made a significant addition to these costs.

So far we have been able to negotiate satisfactory rates to Western Canada. Our position is a very uncertain one in that we are completely in the hands of the railways who are free to increase their rates at will and there is no real protection by virtue of competitive modes of transportation or by any regulatory powers held by the Canadian Transport Commission.

Rather than take away any of the existing advantages under the Maritime Freight Rates Act, which might seriously affect industries in Nova Scotia, extension of the existing area to which the Act applies and the possible inclusion of motor carriers under it would be more

APPENDICE «J»

MOIRS LIMITED

MÉMOIRE PRÉSENTÉ AU COMITÉ PERMANENT DES TRANSPORTS ET DES COMMUNICATIONS

Moirs Limited est une confiserie bien en place dont le siège social est à Halifax (N.-É.), qui est en activité depuis 1830. Cette compagnie a établi sa réputation sur la qualité de ses produits, dont elle fait commerce d'un océan à l'autre.

Actuellement, la Compagnie expédie environ les deux tiers de sa production totale en dehors des provinces de l'Atlantique. Elle compte parmi les quelques industries de la Nouvelle-Écosse qui ont pu maintenir un niveau d'emploi stable dans la région où elles sont situées et connaître une progression lente, mais continue. La vente des produits de la compagnie dans la région de l'Atlantique est au-dessus de la moyenne. Il s'ensuit donc que les régions les plus propices où elle cherchera à étendre son commerce se situent dans le Centre et l'Ouest du Canada. Ces régions renferment d'importantes populations urbaines et c'est là que se trouvent en même temps les grandes maisons rivales. Dès lors, les taux de transport des marchandises et toute modification que l'on pourrait apporter à leur structure présente auront des conséquences pour nous et revêtent à nos yeux une grande importance.

Nous déboursons présentement plus de $500,000 pour le transport de nos produits et les modifications apportées récemment au taux de wagons complet et de détail ont singulièrement ajouté à ces coûts.

Jusqu'ici, nous n'avons pas pu négocier des taux satisfaisants pour le transport de nos produits dans l'Ouest du pays. Nous sommes dans une situation de plus précaire, parce que notre sort repose entre les mains des compagnies de chemin de fer qui sont à même de hausser leurs taux quand elles le veulent. De plus, nous ne pouvons pas nous protéger effectivement en empruntant d'autres modes de transport ou en faisant appel à quelque pouvoir de réglementation détenu par la Commission canadienne des transports.

Au lieu de se départir des avantages présents qu'offre la loi sur les taux de transport des marchandises dans les provinces maritimes, ce qui pourrait nuire beaucoup aux industries de la Nouvelle-Écosse, il vaudrait mieux étendre le champ d'application de la

desirable. While this may be difficult, consideration should be given to it.

This area cannot afford to have additional freight rate problems. It needs additional freight rate assistance rather than further freight rate additions which in effect act as a tariff to this area in trying to send its goods across the country.

In conclusion, we wish to state that apart altogether from undertakings given to this region at the time of Confederation, the maintenance and, if anything, the improvement of the present considerations with respect to the costs of transportation to the larger Canadian markets is a matter of absolute economic necessity for maintaining our competitive position and in providing us with an opportunity to reduce the regional disparities now in existence in Canada.

Respectfully submitted,

Moirs Limited

Loi et y faire insérer une disposition sur transports motorisés. La chose peut s'avé difficile, mais il vaut la peine qu'on l'étudie.

Cette région ne peut se permettre de fa face aux problèmes que comporteraient taux additionnels de transport. Elle a plu besoin d'aide dans ce domaine que d'aut majorations de taux qui font figure de b rières tarifaires dans cette région, où l cherche à expédier des produits dans tout pays.

En guise de conclusion, nous désir déclarer que, nonobstant les promesses fai à notre région au moment de la Confédé tion, le maintien et, s'il y a lieu, l'amélio tion des considérations présentes concern les coûts du transport des marchandises a grands marchés canadiens est une quest d'absolue nécessité économique, si l'on v conserver notre position face à la concurre et avoir la chance de réduire les dispari régionales qui existent présentement Canada.

MOIRS LIMITE

APPENDIX "K"

ANNAPOLIS VALLEY AFFILIATED BOARDS OF TRADE

Mr. Chairman and Gentlemen:

The Annapolis Valley Affiliated Boards of Trade submitted a brief to this committee twelve months ago—now recorded at Appendix A54 Minutes and Proceedings No. 15 of this committee. That brief was mainly directed at the Digby-Saint John Ferry Service. It also outlined our stand on the LCL Freight rates and the tragic state of the ferry service at Petite Passage.

We were informed that this committee would appreciate it if any of the items discussed in last year's brief were still current and unchanged, you would appreciate not having them resubmitted. This is the case as far as LCL Freight rates and Petite Passage crossing are concerned.

The AVABT is an affiliation of sixteen boards of Trade from the four counties of Digby, Annapolis, Kings and Hants. We are supported by Provincial grants and municipal grants from the counties, towns and villages in the area. In total, about 250 miles long and containing 115,000 citizens. Our whole purpose in life is the promotion of this area. Attached is a map of Nova Scotia upon which we have marked our area and the various locations discussed in our brief.

This area, known generally as the Annapolis Valley, is basically an agricultural, fishing and lumbering area. The major industry being agriculture with its associated industries. The area's growth has been retarded because of poor, inadequate and antiquated transportation. We have one very old and winding main arterial road, Highway 1, with four one-way bridges still in existence. The Dominion Atlantic Railway runs parallel to Highway 1 but does not offer services sufficient to encourage growth in the area. Most of the industrial development since World War II has been from Kings County east, and this very limited, with only two major industries being opened in the western end of the area. Some of the fishing and lumbering businesses in the Western end have expanded, but not to the extent they would have, if transportation facilities had been better.

APPENDICE «K»

ANNAPOLIS VALLEY AFFILIATED BOARDS OF TRADE

Monsieur le président, messieurs,

Il y a douze mois, l'*Annapolis Valley Affiliated Boards of Trade* présentait un mémoire à votre Comité, mémoire enregistré comme Appendice A54, fascicule n° 15 du compte rendu de vos délibérations. Ce mémoire portait surtout sur le service de traversier Digby-Saint-Jean. Il exposait également nos vues sur les taux de détail et la situation pénible où se trouve le service de traversier de Petit-Passage.

Votre Comité, nous a-t-on informés, aimerait que tout point étudié dans le mémoire de l'an dernier, encore d'actualité et dans le même état, ne soit pas soumis de nouveau. C'est bien le cas en ce qui a trait aux taux de transport de détail et au traversier de Petit-Passage.

L'*AVABT* est une affiliation de seize Chambres de commerce qui ont leur siège dans les quatre comtés de Digby, d'Annapolis, de Kings et de Hants. Nous bénéficions de subventions provinciales et municipales qui nous sont octroyées par les comtés, les villes et villages de cette région, laquelle mesure au total 250 milles de longueur et a une population de 115,000 personnes. Nous ne visons qu'une chose, le progrès de notre région. Nous annexons à notre mémoire une carte de la Nouvelle-Écosse et nous avons indiqué notre région et les divers endroits sur lesquels porte notre mémoire.

Cette région, connue un peu partout comme la Vallée d'Annapolis, repose économiquement sur l'agriculture, la pêche et l'exploitation forestière. L'industrie la plus importante est l'agriculture et les activités connexes. Il faut attribuer à des moyens de transport pauvres, insuffisants et désuets la croissance lente qu'a connue la région. La principale artère routière que nous avons est un vieux chemin tortueux. Il s'agit de la route n° 1, qui franchit quatre ponts à simple voie encore utilisés. Le *Dominion Atlantic Railway* emprunte une voie parallèle à la route n° 1, mais l'insuffisance de ses services ne favorise pas l'expansion de la région. Le plus gros du progrès industriel enregistré depuis la Seconde Guerre mondiale a pris place dans l'est du comté de Kings et, à un degré bien limité, dans l'ouest de la région, avec l'ouverture de deux industries importantes. Certaines industries de pêche et d'exploitation forestière de l'ouest ont grandi, mais le progrès aurait été plus marqué si les services de transport avaient été plus au point.

There is no commercial air service in the Valley other than by chartering light aircraft from private air fields.

We have an excellent deep water port at Digby but the port facilities are negligible and at the moment inadequate for the fishing fleet and larger vessels that are using it. We must, therefore, use the Port of Halifax for sea shipments. However, to use Halifax we must ship our products over the tortuous Highway 1 or by Dominion Atlantic Railway.

We need not tell you how elated our organization is about the announcement made on February 4, 1969, by the C. P. Rail. Our records indicate that 21 years ago the AVABT first started working for a new ferry. Even before the announcement, we have been pressing for an improved road system, one which can handle a heavy volume of traffic. With the new ferry at Digby and an improved all-weather highway to Halifax, we foresee the Annapolis Valley as being a vital and fast link in the land bridge when Halifax starts operating as the container port. The opening of such a highway, with a fast link to Halifax for sea shipments, and opening a faster link with our natural markets in New Brunswick, Quebec, Ontario and the New England States, will encourage expansion of our present producers and entice other industries to open up in our area.

The Nova Scotia Government submitted a brief last year to your committee, which we supported then and now. To take full advantage of the new ferry service, the AVABT has for some time been asking that certain items contained in the Province of Nova Scotia's brief be given top priority. The order of priority in our estimation is—Minutes and Proceedings and Evidence No. 15. (Appendix A27 Page 575)

(1) No. 17—Bear River Bridge and Diversion from Trunk 1 east at Bear River to Joggins Bridge—4.0 miles.

(2) No. 16—Annapolis Royal to east end of Bear River Diversion—11.0 miles.

(3) No. 19—Weymouth North to Trunk 1 near St. Bernard—4.0 miles.

Il n'y a pas de service aérien commercia dans la Vallée autre que celui qu'on peut se procurer en nolisant des avions légers de compagnies privées.

Nous disposons d'un excellent port à eau profonde à Digby, mais les installations portuaires ne valent que peu et ne répondent pas présentement aux exigences de la flottille de pêche et des grands bateaux qui utilisent le port. Nous devons donc nous servir du port d'Halifax pour les messageries maritimes. En ce qui a trait à ce dernier port cependant nous devons expédier nos produits par la tortueuse route n° 1, ou utiliser les services du *Dominion Atlantic Railway*.

Point n'est besoin de vous dire notre joie à l'annonce faite le 4 février 1969 par le Canadien-Pacifique. Les régistres révèlent qu'il y a 21 ans, l'*AVABT* faisait les premiers pas concernant la mise en service d'un nouveau traversier. Même avant que l'annonce en ait été faite, nous avions travaillé ardument pour obtenir une amélioration du système routier qui permît de répondre aux exigences de la grande circulation. Avec la mise en service d'un nouveau traversier à Digby et l'utilisation d'une route améliorée et ouverte à l'année longue jusqu'à Halifax, nous entrevoyons la Vallée d'Annapolis comme le lien vital et rapide servant de pont terrestre, dès que Halifax commencera ses opérations comme port pouvant accueillir les navires conteneurisés. L'ouverture de cette route, constituant un lien rapide jusqu'à Halifax pour les messageries maritimes et offrant un lien plus rapide avec nos marchés naturels au Nouveau-Brunswick, au Québec, en Ontario et dans les États de la Nouvelle-Angleterre, sera de nature à favoriser l'expansion de notre commerce actuel et encouragera d'autres industries à s'installer dans notre région.

L'an dernier, le gouvernement de la Nouvelle-Écosse a présenté un mémoire à votre Comité. Nous étions d'accord avec les données qu'il contenait et nous le sommes encore. Afin de tirer plein profit du nouveau service de traversier, l'*AVABT* a demandé depuis quelque temps qu'on accorde la priorité à certains points contenus dans le mémoire de la province de la Nouvelle-Écosse. L'ordre de priorité, à notre sens, serait celui dont fait état le fascicule n° 15 (appendice A27, page 575):

(1) N° 17—Pont sur la rivière Bear et déviation de l'artère 1 est à la rivière Bear jusqu'au pont Joggins—4.0 milles

(2) N° 16—Annapolis Royal à l'est de la déviation à la rivière Bear—11.0 milles.

(3) N° 19—Weymouth North jusqu'à l'artère 1 près de Saint-Bernard—4.0 milles.

From the figures quoted in the Provincial rief, it is obvious that the Province will not ave the funds available to meet the deadline 1970; in fact, under their five-year plan ey will be hard pressed to meet their comitments by then.

We, the people of Western Nova Scotia, ave been hamstrung for years because of oor, inadequate and expensive transportaon. Now, with the starting of a new era, we el that we may be further hampered if the ottlenecks listed above are not eliminated by e summer of 1970.

The lack of funds very often forces governents to take the least expensive method of mpleting a project. This is the case at Bear iver. At the moment we believe the plan is bridge the mouth of the river. The citizens Bear River Valley and surrounding area etitioned for a causeway rather than a ridge. This has been supported by the VABT and the 115,000 citizens in our area. hy? Because it will give us a controlled ater level of fresh water which will open up completely new and different tourist area. uch an area will attract tourists for twelve onths a year, because it has skiing facilities ith greater possibilities for winter and in e summer, with controlled water level, the ver can be restocked with salmon and offer quatic sports of all types. The Provincial overnment have been most sincere in their forts to do this for us but it would raise the rice of Item 17 by another $2,000,000. Our ntention is that by investing the extra $2,-00,000 we will develop a new tourist and ecreational area, create employment and ncourage development of hospitality facilies which will, in time, more than pay for e additional investment.

We therefore ask that the Federal Governent and the Provincial Government of Nova cotia work out a cost sharing programme at will enable the Provincial Government to omplete Items 17, 16 and 19 of their brief by 970, and that a causeway rather than a ridge, gap the mouth of the Bear River.

When the Prime Minister announced the ew ferry service last spring, the AVABT ntered into negotiations with the CPR to ncrease the number of trips per day of the rincess of Acadia to two in 1969. The reasning behind this was, by so doing, the comercial operators, of tourist facilities, would

Si l'on s'appuie sur les données du mémoire provincial, il va de soi que la Province ne disposera pas suffisamment de fonds pour satisfaire aux exigences fixées pour 1970. En fait, dans le cadre du plan quinquennal, elle devra redoubler d'effort pour faire honneur à ses engagements.

Nous de l'ouest de la Nouvelle-Écosse, sommes tenus à l'écart depuis des années à cause de moyens de transport pauvres, insuffisants et onéreux. Maintenant, à l'aurore de la nouvelle ère, il semble que nous serons encore étouffés davantage si l'on ne règle pas les problèmes précités avant l'été de 1970.

La pénurie de fonds oblige souvent les gouvernements à adopter la méthode la moins dispendieuse pour mener un projet à bonne fin. C'est le cas de la rivière Bear. Nous croyons qu'actuellement il s'agit, dans le cadre du projet, de jeter un pont à l'embouchure de la rivière. Les citoyens de Bear River Valley et de la région environnante ont demandé la construction d'une chaussée de préférence à celle d'un pont. Cette pétition a reçu l'appui de l'*AVABT* et des 115,000 citoyens de la région. La raison? Parce que nous aurons ainsi une nappe d'eau fraîche dont le niveau sera contrôlé et ceci ouvrira une région touristique tout à fait nouvelle et différente. Les touristes y afflueront douze mois par année. L'hiver, les amateurs de ski y seront beaucoup mieux servis et l'été, avec une nappe d'eau fraîche contrôlée, il sera possible d'approvisionner la rivière de saumons et d'offrir toute une variété de sports aquatiques. Le gouvernement provincial s'est montré bien sincère dans ses efforts pour nous octroyer ces choses, mais à l'article 17, il faudrait hausser les déboursés d'encore 2 millions de dollars. Nous alléguons que l'investissement de ces 2 millions supplémentaires permettrait l'ouverture d'une nouvelle région touristique, propice aux activités récréatives, créerait de l'emploi et stimulerait la mise sur pied de services d'accueil qui en temps et lieu rapporteraient plus que la mise de fonds additionnelle.

Nous demandons donc que le gouvernement fédéral et le gouvernement provincial de la Nouvelle-Écosse élaborent un programme à frais partagés qui permettra au gouvernement provincial de réaliser les projets 17, 16 et 19 du mémoire d'ici 1970 et de construire une chaussée au lieu d'un pont à l'embouchure de la rivière Bear.

Quand le premier ministre a annoncé, le printemps dernier, qu'on mettrait en service un nouveau traversier, l'AVABT a commencé à négocier avec le Canadien Pacifique l'augmentation à deux par jour, en 1969, du nombre de voyages quotidiens du *Princess of Acadia*. On invoquait à l'appui de cette

be encouraged to open new or improve their existing facilities in preparation for 1970. Unfortunately, CPR were not prepared to do this because of the costs involved.

A resolution was passed at our Anual Meeting requesting the Federal Government to enter into negotiations with CPR to underwrite this extra trip during the tourist season. The resolution was passed to The Minister of Transport in November, 1968. The Minister's office rejected our recommendation on the grounds that the ferry was operated by CPR; therefore, any decision to extend the present service would be the sole responsibility of the operator based on conditions known to them.

It is our recommendation that your committee consider this resolution and our recommendation to that resolution, with view of helping the development of the area immediately and not wait until after the new ferry is in operation.

Commercial Air Service

In 1962 a brief was prepared and presented by the AVABT to the Department of Transport and the Air Transport Board, requesting Air Canada to make scheduled stops at (then) RCAF Station Greenwood. This request was unsuccessful because (TCA) Air Canada did not think it profitable. The heavy concentration of population in the central counties of Kings and Annapolis and Lunenburg County on the South Shore are forced to travel over 100 miles to either Halifax or Yarmouth airports. This situation has deteriorated as the businessmen and the public as a whole became more and more air conscious.

The AVABT therefore undertook once again to seek commercial air from a central location in the Annapolis Valley. A survey was conducted by the AVABT asking for the opinions of municipal governments, businessmen, farmers and fishermen, both in our area and on the South Shore. The result of this survey is unanimous support of the project. Our survey indicates that air cargo and a feeder passenger service could be operated profitably from the Valley.

Our hope is to obtain permission to use CFB Greenwood as the airfield. We are aware that access to Greenwood will have to be separate from the DND installations and that

demande que les exploitants commerciau des centres touristiques seraient encouragés en ouvrir de nouveaux ou à améliorer l services actuels pour 1970. Malheureusemer le Canadien Pacifique n'était pas prêt à lancer dans un tel projet à cause des dépens qu'il comporte.

Lors de notre réunion annuelle, l'assembl a adopté une résolution selon laquelle demandait au gouvernement fédéral de con mencer les négociations avec le Canadie Pacifique pour appuyer financièrement voyage additionnel durant la saison tourist que. La résolution a été transmise au minist des Transports en novembre 1968. Not recommandation a été rejetée par le cabin du ministre qui a invoqué que le Canadie Pacifique était l'organisme de qui releva l'exploitation du traversier et que toute déc sion relative à l'amélioration de ce servi relevait exclusivement de l'exploitant, comp tenu des conditions énoncées.

Nous recommandons que votre Comité ét die cette résolution et notre recommandati connexe, en vue d'aider immédiatement développement de la région sans attendre mise en service du nouveau traversier.

Service aérien commercial

En 1962, l'AVABT avait préparé et présen un mémoire au ministre des Transports et la Commission du transport aérien. Il y éta demandé qu'Air Canada prévoit des arrêts la station de l'ARC à Greenwood. On n'a p fait droit à cette demande, parce qu'A Canada n'estimait pas la chose rentable. En qui a trait aux grandes agglomérations d comtés centraux de King et d'Annapolis, ain que du comté de Lunenberg sur la rive su les gens sont obligés de voyager plus de 1 milles pour se rendre aux aéroports d'Halifa ou de Yarmouth. Cette situation s'est détéri rée au fur et à mesure que les hommes d'affa res et le public en général se sont faits au déplacements par la voie des airs.

L'*AVABT* s'est donc lancé de nouveau dar la lutte en vue d'obtenir un service comme cial aérien à partir d'un point central de Vallée d'Annapolis. On a procédé à une étud de la chose et on a demandé les opinions d gouvernements municipaux, des homm d'affaires, des cultivateurs et des pêcheurs notre région et de ceux de la rive sud. L gens ont accordé un appui total au proje L'étude que nous avons conduite indique qu le transport aérien des marchandises et d passagers à partir de la Vallée serait rentabl

Nous espérons obtenir la permission d'ut liser la base de Greenwood comme terra d'aviation. Nous n'ignorons pas que l'accès Greenwood devra être distinct des install

ne operation of such a commercial facility an in no way interfere with the operational ole of the Base.

Our reason for bringing this to this Committee's attention is to point out the lack bf ir service in the area and to request that, hen our completed survey and brief is subitted to the involved Federal Departments, iat your committee add its support to our ndeavour.

In summary, we would ask that the Committee consider and support the following ecommendations contained in this brief as ollows:

1. That the Federal Government and the Provincial Government of Nova Scotia work out a cost sharing programme that will enable the Government of Nova Scotia to complete by 1970.

(a) Bear River Causeway and Diversion from Trunk 1 east at Bear River to Joggins Bridge. (Item 17 of Appendix A24)

(b) Annapolis Royal to east end of Bear River Diversion. (Item 16 of Appendix A24)

(c) Weymouth North to Trunk 1 near St. Bernard. (Item 19 of Appendix A24)

2. That our resolution asking for a second daily run of the Princess of Acadia be reconsidered and that negotiations with CPR be successfully completed.

3. That when our survey and brief is completed on commercial air service from CFB Greenwood, you lend your support to this endeavor.

Edwin W. Elliott,
President,
Annapolis Valley Affiliated
Boards of Trade.

tions du ministère de la Défense nationale et que l'exploitation de ce service commercial ne devra en rien gêner les opérations de la base.

La raison pour laquelle nous avons porté cette question à l'attention du Comité était de souligner la pénurie de service aérien dans la région et de demander que, une fois notre étude terminée et le mémoire soumis aux ministères fédéraux en cause, votre Comité ajoute son appui à notre effort.

En bref, nous demandons que le Comité étudie et appuie les recommandations contenues dans le présent mémoire à savoir:

1. Que le gouvernement fédéral et le gouvernement provincial de la Nouvelle-Écosse élaborent un programme à frais partagés qui permettra au gouvernement de la Nouvelle-Écosse de le mener à bien pour 1970.

a) La chaussée de la rivière Bear et déviation de l'artère 1 est à la rivière Bear jusqu'au pont Joggins. (proposition 17 de l'Appendice A24)

b) Annapolis Royal à l'est de la déviation à la rivière Bear (proposition 16 de l'appendice A24)

c) Weymouth North jusqu'à l'article 1 près de Saint-Bernard.

Proposition 19 de l'Appendice A24)

2. Que notre résolution visant un deuxième voyage quotidien du *Princess of Acadia* soit remise à l'étude et que les négociations avec le Canadien Pacifique soient menées à bonne fin.

3. Que, une fois terminés notre étude et notre mémoire sur le service commercial aérien à partir de la base de Greenwood, vous accordiez votre appui à notre initiative.

Le président,
Annapolis Valley Affiliated Boards of Trade,
Edwin W. Elliott.

APPENDIX L

INDUSTRIAL ESTATES LIMITED

We wish to make observations in a general way on the relationship of Nova Scotian manufacturers to the principal Canadian markets, and the penalty they suffer by comparison with producers in the principal market areas insofar as freight rates are concerned. Because this is a geographic reality we predicate our comments on the following declaration in a speech made by the Honourable Jean Marchand, Minister of Forestry and Rural Development, "But there is much more to our objectives...I am aiming at a fundamental change, a change of the greatest significance for the Atlantic region especially..."

"There is no doubt where the driving force for large economic growth in the Atlantic region has to be found. We have to develop industries that can sell a lot more to the rest of Canada or to the world outside. If we can do that, growth for the local market will follow. But the push has to come through selling outside."

It follows that we, an industrial development arm of the Province of Nova Scotia, should emphasize distance to the principal Canadian markets and resultant freight costs as disincentive to existing industry in Canada or potential new industry from foreign countries, to locate in Nova Scotia or indeed in any of the Atlantic Provinces. Therefore, the recent increase in LCL rates tends to compound further the serious difficulty existing industry faces in Nova Scotia, not to mention the already existing substantial barrier of high freight costs to the principal markets as far as potential new industry is concerned.

We do not believe that an examination of individual cases of hardship resulting from increased freight rates will disclose the whole picture. Rather we suggest an examination of the entire freight rate structure in light of the decidely apparent need and the remarks of the Honourable Jean Marchand as mentioned in the foregoing. To the extent that our views might add weight and support to Mr. Marchand's projected plans we respectfully request the Committee to recognize the need for an overall permanent solution to the high cost of moving goods to the principal markets of Canada, thereby making possible the greater industrialization which is so necessary to Nova Scotia and the Atlantic Provinces as a

APPENDICE «L»

INDUSTRIAL ESTATES LIMITED

Nous avons des observations à faire à pro pos des rapports entre les fabricants de l Nouvelle-Écosse et les principaux marchés d pays, et des désavantages dont ces fabricant souffrent en matière de tarif-marchandises e comparaison des fabricants situés à proximit de ces marchés. Le désavantage étant surtou de caractère géographique, nous fondons no observations sur le passage suivant du dis cours prononcé par l'honorable Jean Mar chand, ministre des Forêts et du Développe ment rural: «Nos objectifs sont toutefois bie plus vastes... Je veux un changement com plet, de la plus haute importance pour l région Atlantique en particulier...»

«On sait parfaitement où trouver le moyens qui assureront le développement éco nomique de la région Atlantique: il faut éta blir des industries capables de vendre beau coup plus au reste du Canada ou dans les pay étrangers. Une fois cela accompli, le march de la région ne manquera pas de prospérer. I s'agit avant tout de pousser les ventes à l'extérieur.»

Ainsi, notre société, élément important d l'expansion industrielle de la Nouvelle Écosse, devrait s'occuper surtout de l'éloigne ment des principaux marchés intérieurs e des tarifs-marchandises désavantageux pou les industries canadiennes existantes ou le industries étrangères qui pourraient venir s'é tablir en Nouvelle-Écosse ou dans n'importe quelle province de l'Atlantique. Ainsi, l récente majoration du tarif tend à complique davantage les graves difficultés qui assaillen les industries établies en Nouvelle-Écosse, en plus des obstacles que constitue déjà le coût élevé des transports vers les principaux débouchés, pour les industries qui voudraien venir s'établir.

A notre avis, l'examen des cas particuliers de détresse dus à l'augmentation du tarif-marchandises ne révélerait pas tout. Il faudrait plutôt étudier toute la structure des tarifs-marchandises à la lumière des besoins apparents et des réflexions de l'honorable Jean Marchand, ce-dessus mentionnées. Dans la mesure où nos observations pourraient donner plus de poids et d'appui aux projets de M. Marchand, nous proposons au Comité de reconnaître la nécessité de trouver une solution permanente au problème des frais de transport excessifs pour l'écoulement sur les principaux marchés du pays, afin d'être en mesure d'industrialiser la Nouvelle-Écosse et les autres provinces de l'Atlantique et de sup-

whole if existing disparities between this egion and the more affluent regions of Cana-a are to be removed.

We contend that the industrial environment f Nova Scotia is such that if freight costs ere to represent a percentage of value of utput not in excess of the costs enjoyed by ndustries in more direct proximity to the rincipal markets of Canada a vigorous ndustrialization process would take place esulting from combined effort of all govern-ents involved not to mention the ready ecognition by industry of the then total alue of the industrial climate of Nova Scotia nd its sister Atlantic Provinces.

Such an equalization of freight rates would, s indicated earlier, result in a more vigor-us industrialization of Atlantic Canada with esultant increases in freight traffic moving to ie principal markets. Assuming these equal-ed rates provided the CNR its costs, then ny subsidy paid by the Treasury would educe by a like amount the deficit which the reasury would otherwise have to absorb. ince in any case the Treasury absorbs the NR's annual deficit then insofar as the ational accounts are concerned this would onstitute a "wash" transaction.

We urge that your Committee examine the roblems before it in light of the general onditions prevailing as well as examining ie specific briefs and recommendations.

espectfully submitted,

rank H. Sobey
resident
ndustrial Estates Limited.

primer les inégalités qui existent entre cette région et les provinces prospères du Canada.

Nous prétendons que le secteur industriel de la Nouvelle-Écosse devrait pouvoir, si le tarif-marchandises était calculé en fonction des frais de production et au pro rata des frais des industries situées plus près des principaux marchés du pays, prendre une grande expansion pourvu que les gouvernements en cause allient leurs efforts et que les industries reconnaissent la valeur qu'acquérerait ainsi le climat industriel de la Nouvelle-Écosse et de ses voisines de la région Atlantique.

La mise à parité du tarif-marchandises favoriserait grandement l'industrialisation vigoureuse des provinces de l'Atlantique, et accroîtrait du même fait le traffic des marchandises destinées aux principaux marchés. si la parité permettait au Canadien National de faire ses frais, toute subvention que verserait le Trésor réduirait d'autant le déficit que le Trésor aurait à combler. Puisque c'est forcément le Trésor qui doit combler le déficit annuel du Canadien National sur son bilan national, il s'agirait tout simplement d'une opération «fictive».

Nous exhortons le Comité à étudier la question dont il est saisi à la lumière des conditions existantes, ainsi que les mémoires et propositions qu'on lui a présentés.

Le président,
Industrial Estates Limited,
Frank H. Sobey.

APPENDIX "M"

COMMONS STANDING COMMITTEE ON TRANSPORTATION AND COMMUNICAIONS

Canadian Keyes Fibre Company is pleased that the Commons Standing Committee on Transportation and Communications had given us the opportunity of expressing some of our views on transportation problems.

COMPANY BACKGROUND

Our Company, located in Hantsport, Nova Scotia, manufactures molded wood pulp products such as egg cartons, berry boxes, trays for packing eggs, meats, produce, etc., pie plates for bakeries, disposable tableware and a variety of other items. We employ approximately 300 employees.

Most of our products are made from raw materials produced in Nova Scotia utilizing the natural wood resources of our province. These finished goods are sold in all the major markets across Canada. We are, therefore, a "resource" industry that makes a major contribution to the real wealth of our province. A very minor portion of our production is exported outside of Canada.

Canadian Keyes Fibre has been operating continuously since 1935 and has grown since then to become the leading manufacturer of molded pulp products in Canada. This has been accomplished by making large investments in expensive machinery and buildings, by having aggressive sales policies and through being able to sell our products *competitively* across Canada.

CURRENT EXPANSION

We are currently undergoing an expansion program for which we are receiving an areas development grant from the Area Development Grant Agency of the Federal Government. The extent of our expansion was greatly influenced by this incentive program and had there been a substantial increase in freight rates at the time our plans were being formulated, this could have very easily more than offset any advantage derived from this program and we would have had to restrict our plans.

OUTBOUND RATES

Our transportation costs are high in relation to our sales dollar. Transportation costs are now 11.48% of our gross sales. While we may not be captive in the strict sense of the word, we are surely economically captive to railways. While we are marketing our goods

APPENDICE «M»

COMITÉ PERMANENT DES TRANSPORTS ET DES COMMUNICATIONS

La *Canadian Keyes Fibre Company* es reconnaissante au Comité permanent de transports et des communications de lui avoi donné l'occasion d'exprimer ses vues au suje des problèmes en matière de transports.

HISTORIQUE DE LA COMPAGNIE

La compagnie, dont le siège social se trouv à Hantsport (Nouvelle-Écosse) fabrique de articles en carton moulé, notamment des boî tes à œufs et à fruits, des plateaux d'embal lage d'œufs, de viandes, de légumes, etc., de plateaux à tartes pour les pâtisseries, de l vaisselle à jeter et toute une gamme d'autre articles. Elle emploie quelque 300 personnes.

La plupart des articles sont fabriqués l'aide de matières premières provenant de forêts de la province de Nouvelle-Écosse. Ce articles finis se vendent dans tout le pays, l compagnie met en valeur les ressources de l province, contribuant ainsi à sa prospérité Elle n'exporte qu'une infime partie de se produits.

La *Canadian Keyes Fibre Company* a ét fondée en 1935 et n'a cessé de prendre d l'expansion depuis, au point de devenir l plus grande fabrique d'articles en carto moulé du Canada. Pour y arriver, elle immobilisé de gros capitaux en bâtiments e en machines, elle a adopté une politiqu dynamique de ventes afin de faire la concur rence sur tout le marché canadien.

EXPANSION EN COURS

Nous mettons actuellement en œuvre u programme d'expansion pour lequel nou recevons une subvention du gouvernemen fédéral, aux termes de la loi stimulant l développement de certaines régions. L'am pleur de notre expansion a été fortement in fluencée par ce programme de subvention e si le tarif-marchandises avait été majoré d façon marquante quand nous élaborions nc projets, cela aurait annulé tout l'avantage qu nous procurait ce programme, et nous aurion été contraints de restreindre nos projets.

TARIFS D'EXPÉDITION

Nos frais de transport sont élevés par rap port à nos prix de vente, puisqu'ils atteignen 11.48 p. 100 de nos recettes brutes. Bien qu nous ayons plus ou moins les coudées fran ches, nous dépendons d'un moyen de trans port unique. Nous écoulons nos produits dan

l across Canada, 83% of the market is outde the Atlantic region. During 1968 we ipped 904 carloads. Approximately 98% of ir rail traffic moves to points outside the lantic region.

If rail carriers see fit to increase their tes, we cannot, as can a competitor in ntario, negotiate with the trucking industry r lower rates. On occasion, we have terested highway carriers in moving our oducts to the Toronto area. However, this rvice only lasted until truckers were able to rvice producers of higher density items. hen truckers found this business, they were longer interested in ours.

We are selling a competitive product mainly markets many hundreds of miles from our nt and for the most part, paying *class tes*. Class rates are the highest scale of rates arged by the rail carriers. Unless there is a ange in railway policy or unless there is mpetition generated by the trucking indus-, we will continue to pay the highest level rates in the country.

We do not expect that the present rate eze can be maintained forever but we ongly urge that the Federal Government t allow rate increases at this time which uld be a deterrent to increased sales and uld jeopardize our position in the market.

BSIDIZATION

We urge that some form of subsidization be intained if the Federal Government sees fit cancel or change the Maritime Freight tes Act. We agree with some advocates o say that Government and industry uld work toward the day when subsidies e no longer required. *That day is not yet re* and if we are to maintain our place in e Canadian market, some form of subsidy st be maintained, *at least* on traffic moving m our area to markets beyond the soled preferred territory. If the 30% subly is reduced and at the same time, a rate crease applied, we will find ourselves in a ry serious situation.

RIDGE SUBSIDY

As you are no doubt aware, freight from stern Canada to Western Canada, moving rough Franz on the C.P.R., also Oba and rst on the C.N.R., is being subsidized under e Provision of C.F.A. tariff 76-D CTC (F) 88. This tariff reduces a rate of 3.5% plus c per hundredweight. This subsidy is being moved in stages under the provision of apter 69, Bill C-231, assented to February 1969. So far, we have continued to receive e benefit of this subsidy because of the

tout le Canada, mais 83 p. 100 de nos débouchés sont en dehors de la région de l'Atlantique. Nous avons expédié 904 wagonnées en 1968, dont 98 p. 100 à l'extérieur de la région de l'Atlantique.

Si les chemins de fer augmentaient leurs tarifs, nous ne pourrions négocier avec les transports routiers pour un tarif réduit, alors que nos concurrents de l'Ontario le peuvent. A plusieurs reprises, nous avons eu recours à des sociétés de camionnage pour transporter nos marchandises dans la région de Toronto. Ils ont cessé de nous assurer ce service dès qu'ils ont reçu des offres de fabricants de produits moins encombrants. Dès qu'ils ont trouvé ces clients-là, nous ont délaissés.

Nous vendons des produits concurrenciels à des centaines de milles de notre usine, et nous payons le *tarif-classé* dans la majorité des cas; or, ce tarif est le plus élevé des chemins de fer. Si la politique ferroviaire ne change pas, ou si les transports routiers ne leur font pas la concurrence, nous continuerons à payer les plus hauts tarifs du pays.

Nous ne comptons pas que le blocage actuel des tarifs puisse durer, mais nous exhortons le gouvernement à ne pas permettre de majoration des tarifs en ce moment, car cela ralentirait nos ventes et mettrait notre position marchande en péril.

SUBVENTIONS

Nous insistons pour que le gouvernement maintienne ses subventions tant que la loi sur les taux de transport des marchandises dans les provinces Maritimes n'aura pas été modifiée. Nous appuyons la proposition de faire travailler de concert le gouvernement et l'industrie de façon à rendre les subventions inutiles. *Or, elles ne le sont pas encore* et, pour garder notre place sur le marché canadien, nous avons besoin de subventions, *tout au moins* pour le transport de nos marchandises vers nos débouchés, au-delà des territoires dits à tarif préférentiel. Si la subvention de 30 p. 100 était supprimée et si le tarif était en même temps majoré, nous serions dans une situation précaire.

SUBVENTION TEMPORAIRE

On sait que les marchandises expédiées de l'Est vers l'Ouest via Franz sur le Canadien Pacifique et Oba et Herst sur le Canadien National bénéficient d'une subvention aux termes du tarif C.F.A. 76-D CTC (F) 1688, qui réduit le taux de 3.5 p. 100 et de 9.5c. le cwt. Cette subvention est graduellement supprimée aux termes du chapitre 69 du bill n° C-231, adopté le 9 février 1969. Jusqu'à présent, nous jouissons encore de cette subvention, grâce au «blocage». Si on y met fin, nos taux augmen-

"freeze". With the removal of the "freeze", our rates will also increase by the amount of the subsidy. With total removal, in the case of the rate to Calgary, it will mean an increase of 26c per hundredweight and to Winnipeg, an increase of 20c per hundredweight. These are but two examples. The present rate to Winnipeg is $2.85; this would increase to $3.05. The present rate to Calgary is $4.46. This rate would become $4.72 with the removal of the "bridge subsidy". These two examples are rates applicable via D.A.R. Truro and Connections.

TWO LINE HAUL

Our industry in Hantsport is at a disadvantage in that the basis for rates is higher on traffic moving via two rail lines than on a single line; that is, we have to route D.A.R. to Truro, thence C.N.R. The alternative to shipping via this route is to ship via Digby, a "breakbulk" route. This has, in the past, proven entirely unsatisfactory for several reasons. It has resulted in complaints from customers because of damage, mixing of goods, shortages and different cars arriving at the destination than are shown on the shipping confirmation. It does not appear that the proposed new ferry service across the Bay of Fundy will help us because it is to be a "roll on, roll off" operation. We, of course, have no idea what the cost of this service will be. However, from the information at our disposal due to the "bulky" nature of our products, we do not foresee any great benefits.

We are, therefore, forced to ship via Truro at higher rates. Examples of higher freight rates via two lines for equal miles hauled are illustrated on the attached statement.

We feel that the rates from Hantsport (D.A.R.) should be reduced either by arrangement with the C.P.R. or by the Government allowing the difference. If the Hantsport rates were reduced to the Halifax level, we estimate that this would mean a saving of approximately $17,000.00 annually under present conditions. It is reasonable to assume that if the C.N.R. were serving Hantsport, these differentials would not exist.

IN-BOUND RATES

We feel that the Government should take a close look at the possibility of providing transportation assistance for goods brought into the Atlantic provinces to be used in the manufacture of our products.

In order to turn the natural resources of the province into a finished product, certain ingredients must be brought in at considera-

teront du montant de la subvention. Sans sul vention, le taux jusqu'à Calgary augmentera de 26c. le cwt, et celui de Winnipeg de 20c. cwt, pour ne citer que deux exemple Actuellement le taux pour Winnipeg est d $2.85, qui monterait à $3.05. Pour Calgary, taux de $4.46 deviendrait $4.72 si la subve tion temporaire était supprimée. Ces deu exemples sont les taux applicables via la ga de Truro et ses embranchements.

TRANSPORT SUR DEUX LIGNES

Notre usine de Hantsport est désavantagé du fait que les taux sont plus élevés quand faut passer par deux lignes de chemins d fer; or, nous devons expédier via Truro (C.F et de là par le Canadien National. Nous pou vons néanmoins expédier via Digby, qui e une gare de triage, ce qui s'est révélé dés vantageux pour plusieurs raisons. Cela donné lieu à des plaintes de nos clients, e raison des dégâts aux marchandises, d erreurs de livraison, des pertes et à l'arrive à destination de wagons différents de ceu qui figurent au connaissement. Il ne semb pas que le traversier proposé pour la baie d Fundy nous aiderait, car il ne fonctionne que par intermittences. Évidemment, nou ignorons totalement ce que ce service coûter Toutefois, d'après nos renseignements, nou ne comptons pas qu'il puisse nous être pr fitable, en raison de l'encombrement de n marchandises.

Nous sommes donc contraints d'expédi via Truro, au taux plus élevé. A titre d'exem ple de la cherté du tarif-marchandises su deux lignes et à distance égale, voir l'annex ci-jointe.

Nous croyons que nos taux à partir d Hantsport (D.A.R.) devraient être réduits so par une entente avec le Canadien Pacifiqu soit par l'aide d'une subvention du gouve nement. Si les taux de Hantsport étaien égaux à ceux d'Halifax, cela nous vaudra une économie annuelle de quelque $17,000.0 aux conditions actuelles. Nous croyons aus que si le Canadien National desservait Hant port, ces différences de tarifs n'existeraien pas.

TAUX D'ENTRÉE

Selon nous, le gouvernement devrait étu dier de près la possibilité de verser de l'aid pour les transports de marchandises à desti nation des provinces de l'Atlantique devan servir à nos fabrications.

La transformation de nos matières premiè res en produits finis exige certaines ingré dients qu'il faut amener ici à gros prix.

le cost. We feel that assistance in this respect would be very beneficial to industries uch as ours that are trying to compete in reas where not only local markets are available to manufacturers but also raw materials. his *would not* be intended to work to the etriment of the suppliers in the Atlantic rea.

notre sens, cette aide serait très profitable aux industries qui, comme la nôtre, s'efforcent de concurrencer les régions où les fabricants vendent sur place et y trouvent aussi leurs matières premières. Pareille mesure ne *devrait pas* être appliquée au détriment des fournisseurs de la région Atlantique.

RUCKING

We feel there are two ways to help rengthen and make the trucking industry ore competitive, thereby helping industry: i) Continued Federal assistance for the conruction of all-weather trunk highways. This akes trucking more economical and would ake it possible for us to get our products to arket more quickly. (b) any subsidy applicale to the railways also be extended to truckg. This is a most important factor in proiding competition to the rail carrier.

CAMIONNAGE

Nous voyons deux moyens de rendre les transports routiers plus forts et plus concurrentiels et, partant d'aider l'industrie: a) Maintien de l'aide fédérale pour la construction de grandes routes carrossables à l'année longue, ce qui rendrait le camionnage plus économique et nous permettrait de livrer nos marchandises à plus bref délai. b) L'extension aux camionneurs des subventions accordées aux chemins de fer. C'est là l'élément essentiel qui permettrait de concurrencer les chemins de fer.

RECOMMENDATIONS

1. Government action to see that rate increases are held to a level which will not jeopardize existing markets or prevent reaching new markets by some form of assistance on transportation being maintained, especially on finished goods being sold outside the Atlantic region. This action to be taken prior to lifting of the rate freeze.

2. Rates from Hantsport be reduced to the Halifax level.

3. Subsidization be extended to raw materials for manufacturing purposes which must be purchased outside the region.

4. Continued Federal Government assistance to Nova Scotia for building of all-weather trunk highways.

5. Any assistance given to rail also be extended to trucking.

RECOMMANDATIONS:

1. Que le gouvernement veille à garder l majorations de tarifs à un niveau qui ne me trait pas les débouchés en péril ou n'empêch rait pas l'acquisition de nouveaux marchés, l'aide d'assistance au transport, surtout d produits finis vendus en dehors de la régio de l'Atlantique.

2. Réduction des taux de Hantsport à parit de ceux d'Halifax.

3. Extension des subventions aux matière premières destinées à la fabrication, en pr venance de l'extérieur de la région.

4. Maintien de l'aide du gouvernemer fédéral à la Nouvelle-Écosse pour la construc tion de grandes routes carrossables à l'anné longue.

5. Extension aux camionneurs de toute sub vention accordée aux chemins de fer.

APPENDIX "N"

BRIEF PRESENTED TO THE STANDING COMMITTEE ON TRANSPORT AND COMMUNICATIONS BY ANIL CANADA LIMITED CHESTER, NOVA SCOTIA

entlemen:

We respectfully request the privilege of resenting the following brief to your Com-ittee for consideration. We shall be pleased provide any necessary further information nd sincerely trust that some means can be ound to alleviate our problem.

UMMARY

Anil Canada Limited is at a serious disad-ntage as compared to other Canadian anufacturers because of its distance from ajor markets and subsequent high transpor-tion costs.

Our freight costs are greater than the bour cost per unit and equivalent to all raw aterial expenses. As a percent of sales, our ansportation costs averages 19 to 20 per nt. Similar American producers with the me product mix average 7½ per cent.

We wish to recommend the following for ur consideration.

1. Reduction of rail rates to at least the uivalent of other Canadian manufacturers the major Canadian Market Areas, i.e. ntario and Quebec.

2. With respect to American or Export ipments the provision of a government sub-dy to cover cost of transportation to Border ossing Points.

3. A revision of the Canadian rail rate ructure to provide a more realistic incentive r larger car load shipments.

ACKGROUND

Anil Canada Limited is a new modern plant cated in Chester, Nova Scotia engaged in e manufacture of hardboard products. ese products are made using native raw aterial resources, namely; rough mixed rdwoods; which would otherwise be wast-. Chemicals and other raw materials are most entirely of Canadian origin.

Our production totals approximately 150,-0,000 sq. ft. per year or 50,000 tons with a

APPENDICE «N»

DOSSIER SOUMIS AU COMITÉ DES TRANSPORTS ET COMMUNICATIONS PAR ANIL CANADA LIMITÉE CHESTER, NOUVELLE-ÉCOSSE

Messieurs,

Nous soumettons respectueusement à votre Comité ce dossier que nous vous prions de bien vouloir analyser et prendre en considération. Nous pourrions, éventuellement, vous fournir tout autre renseignement nécessaire et espérons que vous serez à même de trouver les moyens d'alléger notre problème.

SOMMAIRE.

Anil Canada Limitée a de sérieux désavantages en comparaison des autres fabricants canadiens, à cause de la distance de ses principaux marchés; il en résulte des frais de transport élevés.

Par unité, ceux-ci dépassent ses frais de main-d'œuvre et sont équivalents à ses frais de matière première. Nos frais de transport représentent 19 à 20 p. 100 de nos ventes. Certains fabricants américains concurrents ont une moyenne de 7.5 p. 100.

Nous vous demandons de bien vouloir prendre en considération les observations suivantes.

1. Une diminution des tarifs ferroviaires qui puisse nous permettre, pour le moins, d'avoir des tarifs équivalents à ceux des autres fabricants canadiens qui expédient de la marchandise vers les principaux marchés, c'est à dire l'Ontario et le Québec.

2. En ce qui concerne nos expéditions vers les États-Unis ou nos exportations, nous aimerions avoir de la part du Gouvernement une subvention qui couvrirait nos frais de transport jusqu'aux postes frontières.

3. Une révision du mode d'application des tarifs ferroviaires canadiens en vue d'encourager de plus gros chargements.

RENSEIGNEMENTS GÉNÉRAUX.

Anil Canada Limitée est une usine nouvelle et moderne située à Chester, Nouvelle-Écosse, qui est spécialisée dans la fabrication des bois agglomérés. Ces produits sont fabriqués à base de matières premières régionales, à savoir, pulpes diverses non travaillées, qui seraient en cas contraire gaspillées. Les produits chimiques et les autres matières premières sont presque entièrement d'origine canadienne.

Notre production se monte à environ 150,-000,000 de pieds carrés par an ou 50,000 ton-

Gross Sales Value of nearly $6,000,000. This Sales Value will increase with further product diversification and specialization.

Our product is used for a wide variety of end uses from industrial to home construction. For example, we supply doorskins for the manufacture of residential and commercial doors; automotive board for the automobile industry; specialized panels for the furniture and toy industries, as well as a wide range of products for the home construction market. We are currently engaged in an intensive product development programme as well as plans for a major plant expansion.

Our markets are largely in the dense population areas of the United States and in the Ontario and Quebec industrial regions. Our market in the Atlantic Provinces is relatively small due to low population density. We are currently shipping as far south as Georgia and Texas in the United States and as far west as Alberta, Canada. About 6½ per cent of our product is exported to the United States so we are, therefore, a major American Dollar earner.

PROBLEM

Our major problem and one holding up our expansion programme is the question of transportation costs.

1. *Freight as a Percent of Sales*

Our freight as a percent of sales averages 19 to 20 per cent. We have no comparison with Canadian manufacturers but we have compared notes with a similar American plant. Their freight costs averages 7½ per cent of sales and these are a cause for grave concern when they go above 8 per cent.

2. *Freight Versus Other cash costs.*

Transportation represents a higher cost than labour and is close to our full raw material expenses. Omitting financial and other costs, this may be expressed as follows:

Freight 35 units
Raw Material 35 units
Labour 30 units
Total 100 units

3. *Economics of Volume Deliveries*

In addition to the higher basic unit freight costs we must deliver to our major markets

nes approchant une valeur de vente brute d $6,000,000. Cette valeur de vente augmente avec la diversité et la spécialisation future de nos produits.

On emploie notre matériau dans une grand variété de sous-produits utilisés depuis l'in dustrie jusqu'à la construction artisanale. Pa exemple, nous fournissons des panneaux pou la fabrication de portes commerciales et rés dentielles; des panneaux spécialement conçu pour l'industrie automobile; des panneau pour l'industrie du meuble et du jouet, ain qu'une grande variété de produits destinés la construction artisanale. Nous nous somm engagés dans un programme de développ ment intensif de production et avons d plans pour l'expansion d'une usine plu grande.

Nos marchés se trouvent en grande part dans les zones de population dense des État Unis et dans les régions industrielles d Québec et de l'Ontario. Notre marché dans l Provinces Atlantiques est relativement pe élevé dû à la faible densité de la populatio Nous envoyons de manière générale des pr duits dans le sud des États-Unis, comme e Géorgie et au Texas et dans l'ouest d Canada, comme en Alberta. Environ 60 p. 1 de notre production est exportée aux État Unis et nous sommes donc une compagnie q rapporte beaucoup de dollars américains.

PROBLÈME.

Notre retard dans le programme d'expa sion, qui est notre principal problème, est e fonction des prix de transport.

1. *Pourcentage que représente le coût du fr par rapport aux ventes.*

Ce pourcentage, en ce qui nous concern varie de 19 à 20 p. 100. Si nous n'avons p d'éléments de comparaison avec les fabrican canadiens, nous en avons obtenu d'une usi américaine. Le coût de leur fret correspond 7.5 p. 100 de leurs ventes et quand il atteint p. 100, ils considèrent la situation comm grave.

2. *Coût du fret par rapport aux autr dépenses.*

Le transport représente un coût plus éle que notre main-d'œuvre et atteint presque prix de notre matière première. Sans tard du financement et autres frais, nous pourrio résumer ces constatations comme suit:

Coût du fret	35 unités
Coût de la matière première	35 unités
Main-d'œuvre	30 unités
Total	100 unités

3. *Avantages de gros chargements.*

En plus du coût du fret plus élevé par uni de base, nous devons livrer nos marchandis

large car loads with relatively long delivy periods. Many of our competitiors can ilize road transport and ship much smaller iantities direct to the retailer or small dustrial user with much faster delivery. We ust, therefore, offer substantial discounts to courage distributors to handle our product ne.

4. *Foreign Imports*

Imports of hardboard into this country om foreign countries such as Scandinavia, ssia and Poland amounts to about 72,000,000 . ft. per year. Even with our modern icient plant we cannot compete effectively th these countries, particularly Russia and land, Foreign countries, anxious to earn llars, can and do subsidize exports so we d our best markets are away from the sea-rt areas. It is noteworthy that foreign hard-ards are sold at a considerably lower price the Canadian market than they are in the ited States. Hence again the economic ssure of trying to promote our product rther afield.

5. *Tariff Reductions*

With the decrease in tariffs from the Ken-dy Round we are developing a market for re specialized product lines in the United tes. To do this we must surmount a 21 per nt tariff barrier but because of our superior hnical and marketing know how, we hope overcome overseas competition. We must, course, continue to deal with Domestic and erican producers on the same footing. re we immediately run into the transporta-n cost problem as previously outlined.

neral

We have active plans for further expansion olving doubling our present plant size. We ve the raw material resources, the labour ce is available, and the market can be veloped. We can provide much needed year und employment to an underdeveloped a; we can earn up to 9 million a year in erican currency and we can provide a ady cargo to fill rail cars now returning pty to Upper Canada and the United tes.

Our product is a high density low bulk mmodity which can best be handled in ge double door rail cars in 100,000 pound ds. As such we cannot look for relief in the posed containerization or unit train pro-

par grosses expéditions vers nos principaux marchés, en des périodes de livraison assez longues. La plupart de nos concurrents peuvent utiliser le transport routier et expédier de plus petites expéditions directement au détaillant ou au petit industriel avec plus de rapidité. Nous devons, donc, offrir de substantiels rabais aux distributeurs afin de les encourager à utiliser nos produits.

4. *Importations.*

Les importations de bois agglomérés au Canada en provenance de pays étrangers, tels que la Scandinavie, la Russie et la Pologne représentent environ 72,000,000 de pieds carrés par an. Même avec notre usine moderne et rationnelle, nous ne pouvons pas concurrencer efficacement ces pays, particulièrement la Russie et la Pologne. Des pays étrangers, désireux d'obtenir des dollars américains et canadiens subventionnent leurs exportations, de telle sorte qu'il en résulte que nous trouvons nos meilleurs marchés en dehors des zones maritimes. Il est bon de noter que les bois agglomérés importés se vendent sur le marché canadien à un prix bien plus bas que sur celui des États-Unis. Et la pression économique est encore accrue du fait que nous devions essayer de promouvoir encore plus nos ventes sur les marchés.

5. *Réductions des tarifs.*

Avec la diminution des tarifs sur le marché américain, due au «Kennedy Round», nous sommes à même de développer une production plus spécialisée. Pour cela, nous devons surmonter une barrière de tarifs de 21 p. 100, mais grâce à notre technique et à notre distribution supérieures, nous espérons concurrencer la production d'outre-mer. Nous devons, bien sûr, continuer à concurrencer les fabricants nord-américains dans les mêmes conditions. A ce stade, nous nous heurtons au problème du coût du transport, déjà mentionné.

GÉNÉRALITÉS.

Nous avons effectivement des plans en vue de doubler la taille de notre usine actuelle. Nous avons le potentiel de matière première, la disponibilité de main-d'œuvre, et la possibilité de développer un marché. Nous pouvons fournir de l'emploi permanent très demandé dans une région sous-développée; nous pouvons gagner jusqu'à 9,000,000 de dollars américains et nous pouvons fournir des chargements réguliers pour remplir les wagons, qui à l'heure actuelle, retournent à vide vers le centre du Canada et vers les États-Unis. Notre produit est très commode car de haute densité et de petit volume, pouvant très facilement être chargé dans de grands wagons à doubles portes, en charge-

grammes. Granted these may be of interest but we submit that our problems cannot wait for these solutions.

Recommendations

Specifically we request a programme that would place us in an equivalent position with Ontario and Quebec producers with respect to the major markets in Canada and the United States.

We respectfully submit the following for your consideration:

1. Reduction of rail rates to the equivalent of other Canadian Producers to the major Canadian Markets in Ontario, and Quebec.

2. With respect to American shipments, payment of a Government subsidy to cover costs of transportation to Border Crossing Points.

3. A revision of the incentive rail rates to provide a more realistic rate reduction for larger shipments. For example, our American rail rates offer a reduction of 22% for 100,000 pound loads from the 50,000 pound rate. Our Canadian rates offer only an 8% reduction in the corresponding range.

4. We would be very pleased to consider alternative suggestions or recommendations which the Committee has to offer.

L. H. Coffin, P. 9ng.
General Manager
Anil Canada Limited
Chester, Nova Scotia.

ments de 100,000 livres. Dans ce cas-là, l programmes qui ont été proposés pour chargement en containers et en train unité, résolvent pas notre problème. Nous admett que ces programmes sont intéressants, m nous pensons que nos problèmes ne peuv pas attendre ces solutions.

RECOMMANDATIONS.

Précisément, nous demandons un pr gramme qui pourrait nous placer dans u position équivalente à celle des fabrica d'Ontario et du Québec, quant aux marc du Canada et des États-Unis.

Nous vous demandons respectueusement prendre en considération ce qui suit:

1. Pour atteindre les principaux marchés l'Ontario et du Québec, nous aimerions u diminution des tarifs ferroviaires équivale à celle dont bénéficient les autres fabrica canadiens.

2. Vis-à-vis des chargements à destinati des États-Unis, nous aimerions obtenir de part du Gouvernement une subvention q couvrirait les frais de transport jusqu'a postes frontières.

3. Une révision du mode d'application d tarifs ferroviaires canadiens en vue d'enco rager de plus gros chargements. Par exemp les Chemins de Fer américains offrent u diminution de tarifs de 22 p. 100 pour d chargements de 100,000 livres par rapport ceux de 50,000 livres. Dans les mêmes con tions, les Chemins de Fer canadiens ne no offrent une diminution que de 8 p. 100.

4. Nous serions très heureux de considé toutes autres suggestions et recommandatio que le Comité voudrait bien nous proposer.

L. H. Coffin, P. Eng.
Directeur Général
Anil Canada Limitée
Chester, Nouvelle-Écosse.

APPENDIX "O"

he Shubenacadie River Crossing Committee
Subject: A Crossing of the Shubenacadie River at or near its mouth.

SHUBENACADIE RIVER CROSSING

Your consideration and support is respectlly requested for the immediate implemenion of a multi-purpose type of highway ossing of the Shubenacadie River at or near mouth, with suitable connections to existg highways.

Numerous requests have been made to rious levels of Federal and Provincial govnments for such a crossing, and in the past e years several surveys, both from an engiering and economic feasibility standpoint ve been conducted. Each has shown that ch a crossing is not only feasible, but would of great economic benefit to all the people no live in the immediate area as well as otorists travelling throughout Nova Scotia pursuit of business activities or for creation.

The surveys referred to show many reasons ay a crossing is not only feasible but a cessity for the continued growth of Nova otia, as what affects the economy of any ea in the province, affects the whole picture economic growth, development, and fiscal anding of Nova Scotia.

AGRICULTURE

Some of the finest producing soil in Nova otia is situated in the Shubenacadie ewiacke watershed area and in North Hants, d much greater production could result om the farms and forests of these areas if a ossing of the Shubenacadie River was nstructed.

The report of ARDA No. 12 "Study of a ubenacadie River Causeway," made public January 1967, shows that a multi-purpose useway-type crossing would protect 2537 res of marshland and interval soil in the ver basin area.

SOCIO-ECONOMIC STUDY

A Socio-Economic Study of the watershed ea conducted by the Acadia University

APPENDICE «O»

Le Comité du passage routier
sur la rivière
Shubenacadie.

Objet: Construction d'un passage routier
à l'embouchure de la rivière
Shubenacadie ou à proximité

PASSAGE ROUTIER SUR LA RIVIÈRE SHUBÉNACADIE

Nous vous prions respectueusement de nous appuyer et d'étudier la mise en œuvre immédiate d'un passage routier à toutes fins sur la rivière Shunebacadie à son embouchure ou à proximité de celle-ci, avec les raccordements voulus aux grandes routes existantes.

De nombreuses demandes ont été présentées aux divers niveaux des gouvernements fédéral et provincial pour un tel passage et, au cours des cinq dernières années, plusieurs études techniques et économiques ont été faites. Toutes ces études ont démontré non seulement que ce passage est réalisable, mais encore qu'il offrirait d'importants avantages économiques à toute la population des environs immédiats et aux automobilistes qui parcourent la Nouvelle-Écosse aussi bien pour leurs activités professionnelles que pour leur agrément.

Les études donnent plusieurs raisons pour lesquelles cette construction est non seulement possible, mais aussi nécessaire pour que la Nouvelle-Écosse continue de progresser, puisque les facteurs qui influent sur l'économie d'une région de la province touchent l'ensemble du développement et de la croissance économiques, de même que la situation fiscale de la Nouvelle-Écosse.

L'AGRICULTURE

Certains sols les plus productifs de la Nouvelle-Écosse se trouvent dans la région arrosée par les rivières Shubenacadie et Stewiacke et dans celle de Hants-Nord. Les productions agricoles et forestières de cette région pourraient être beaucoup plus considérables si un passage routier était construit sur la rivière Shubenacadie.

Le rapport ARDA nº 12, qui s'intitule *Study of a Shubenacadie River Causeway*, publié en janvier 1967, démontre qu'un passage d'usage général en forme de digue assécherait 2,537 acres de terrain marécageux et de zones intermédiaires dans le bassin de la rivière.

ÉTUDE SOCIO-ÉCONOMIQUE

Dans une étude socio-économique de la région de la ligne de partage des eaux, réali-

Institute, and made public in October 1966, shows that a crossing, in addition to effecting reclamation of present unusable land will open the East Hants coastal areas and the Shubenacadie River Valley areas for development and consequently raise land values.

It would promote easier access to Truro for Hants North people, which would, in effect, cut the cost of farm equipment, repairs, veterinary services, and general retail produce, increase profits from animals at livestock auctions, make medical and educational facilities more accessible, and increase employment opportunities.

TRANSPORTATION

ARDA Report No. 12 shows that the construction of a causeway-type highway crossing in the Princeport area, including connecting roads, would cost an estimated $5,100,000 and in the Black Rock area $5,200,000.

The "Shubenacadie River Bridge Study", completed in 1964 by A. D. Margison and Associates, showed the total savings to motorists who would use the proposed crossing for a 20-year period would be 24,450,000 miles and 546,600 hours. The report added that "when related to operating costs of vehicles of an assumed 10 cents per mile, and the time cost of $1.00 per hour, the resultant savings to the motorists using the new facility over the 20-year period would be approximately $2,-291,000". Based on these figures, the firm concluded that the benefit to be derived, in relation to the estimated cost of a bridge-type crossing would be 75 per cent of the bridge cost.

The cost of 10 cents per mile per automobile and the time cost of $1.00 per hour, outlined in the Margison Report are unrealistic. The average cost of operation of all types of motor vehicles, including cars, trucks, school buses, etc., is in the nature of twenty-five cents per mile.

Based on these realistic costs we submit that the saving to all operators of motorized equipment over a 20-year period, if a crossing were to be provided, would be $6,112,500 in mileage costs and time costs of $2.00 per hour would mean an added saving of $1,093,200 for a total saving of $7,205,700.

Added to this is the estimation of the saving which Mr. J. Albert Ettinger, M.L.A. for

sée par l'Institut de l'Université Acadia publiée en octobre 1966, il est démontré qu'i passage, en plus de mettre en valeur des te res inutilisables à l'heure actuelle, permettra à la région côtière de Hants-Est et à la vall de la rivière Shubenacadie de s'ouvrir à développement et de faire progresser valeur des terres.

Les populations de Hants-Nord commun queraient plus facilement avec la ville Truro, ce qui, en fait, réduirait les prix d'a chat des machines agricoles, des réparation des services de vétérinaires, des divers pr duits vendus au détail, augmenterait les bén fices réalisés sur les ventes d'animaux au enchères, faciliterait l'accès aux servic médicaux et éducatifs et augmenterait l possibilités d'emploi.

LES TRANSPORTS

Le rapport ARDA nº 12 précise que la ré lisation d'un passage routier en forme d digue dans la région de Princeport, avec s routes de liaison, coûterait environ $5,100,00 si ce passage était construit dans la région d Black Rock, il coûterait $5,200,000.

L'étude intitulée *Shubenacadie Riv Bridge Study*, réalisée en 1964 par la socié *A. D. Margison and Associates*, démontre qu les automobilistes utilisant le passage proje durant 20 ans feraient 24,450,000 milles d moins et économiseraient 546,600 heures. L rapport déclare que «si l'on établit les frais d mise en service d'un véhicule à environ 10 le mille, et le temps à $1 l'heure, les écon mies réalisables par les automobilistes util sant la nouvelle route se monteraient en 2 ans à $2,991,000». En se fondant sur ces chi res, la société susmentionnée a conclu qu les avantages à retirer, en pourcentage d coût estimatif d'un passage en forme de pon se chiffreraient à 75 p. 100 du coût du pont, ne serait pas, par conséquent, à réaliser d point de vue financier en se fondant sur rapport du prix de la route à ses avantages.

Le prix de 10c. le mille par automobile et montant de $1 l'heure employés dans le ra port Margison traduisent mal la réalité. L coût moyen de mise en service de tous le types de véhicule à moteur, automobil camions, autobus scolaire, etc., serait d'env ron 25c. le mille.

En nous fondant sur ces coûts plus réel nous soutenons que les économies réalisable par les propriétaires de véhicules automobil en vingt ans, advenant la construction d passage seraient de $6,112,500 en frais de mis en service et le temps gagné, calculé à $ l'heure, permettrait de réaliser d'autres éco nomies de $1,193,200, soit en tout $7,205,700.

Il faut ajouter à ce montant, l'estimatio des économies dont le député du comté d

ast Hants pointed to in an address in the ova Scotia Legislature on February 23, 1967, which he said, in reference to the proposed ossing; "Based on agriculture alone we nderstand this would justify an expenditure $800,000."

PUBLIC SERVICES

Millions of dollars are spent annually on search to determine causes and cures of seases and to provide training facilities for ctors and dentists, and yet many people siding in the rural areas of Nova Scotia, cause of distances from necessary services doctors, dentists, and hospitals, are doing ithout these services except in cases of dire ed, while at the same time paying hospital x in the same proportion as those in the ban centers. In the North Hants area e doctor serves an area of a radius of 25 les from his office where there are over 00 people. He finds it nearly impossible to ake house calls. In the same area there is e of the highest infant mortality rates in va Scotia chiefly because more easily cessible medical and hospital services are t available. The proposed crossing would t these people closer to medical, dental nical, ambulance and hospital services, and uld save more than sixty miles on a round p. Furthermore, a crossing would improve e efficiency of the North Hants area of yal Canadian Mounted Polpce, postal, and e various other Provincial and Federal gov- nment services emanating from Truro.

EDUCATION

The trend in education today is to establish cational, technical, high school, and other stitutions of learning in growth areas. A ossing of the Shubenacadie River would rmit students from the entire area to avail emselves of comprehensive educational ilities in Truro; i.e. Vocational-technical; oposed Educational Studies Centre; Nova otia Teachers College and Nova Scotia gricultural College. Many students from the rth Hants area could be boarded in Truro, t many do not want this and would drop t of school rather than do so. On the other nd if they could be conveniently taken to uro by school bus they would be couraged to further their education and ere would also be a resultant saving to the

Hants-Est à l'Assemblée législative de la Nouvelle-Écosse, M. J. Albert Ettinger, a parlé dans son discours du 23 février 1967 à propos du passage projeté: «Si nous nous fondons sur l'agriculture seulement, nous croyons savoir qu'une dépense de $800,000 serait justifiée.»

SERVICES PUBLICS

Il se dépense des millions de dollars à tous les ans tant pour la recherche sur les causes des maladies et les moyens de les guérir que pour réaliser de meilleurs installations destinées à la formation des docteurs et des dentistes. Pourtant un grand nombre de résidents de la campagne en Nouvelle-Écosse, en raison des distances qui les séparent des cabinets de dentistes et de médecins et des hôpitaux est privé de ces services sauf dans les cas des grands besoins, même s'il verse la taxe d'hôpital sur la même base que les résidents des localités urbaines. Dans la région de Hants-Nord, un seul médecin dessert un secteur d'un rayon de 25 milles, calculé à partir de son bureau, qui compte 5,000 personnes. Il lui est à peu près impossible de faire des visites à domicile. Dans le même secteur, le taux de la mortalité infantile est l'un des plus élevés de la Nouvelle-Écosse, surtout parce que les services des médecins et des hôpitaux ne sont pas facilement accessibles. La construction du passage projeté permettrait à ces gens d'avoir accès aux services des médecins, des dentistes, des cliniques, des ambulances et des hôpitaux et raccourcirait de soixante milles tout voyage aller et retour. De plus, l'existence d'un passage améliorerait l'efficacité des services de la Gendarmerie royale, des postes, des divers services provinciaux et fédéraux de Truro dans la région de Hants-Nord.

INSTRUCTION PUBLIQUE

Dans les régions en croissance, la tendance actuelle est de construire des écoles techniques et professionnelles, des écoles secondaires et d'autres maisons d'enseignement. L'existence d'un passage enjambant la rivière Shubenacadie permettrait à la population scolaire de l'ensemble de la région d'avoir accès à toutes les maisons d'enseignement de Truro, soit les écoles professionnelles et techniques, le centre d'études pédagogiques en projet, l'école normale de la Nouvelle-Écosse et le collège d'agriculture de la Nouvelle-Écosse. De nombreux étudiants de la région de Hants-Nord peuvent demeurer en pension à Truro, mais plusieurs refusent et préfèrent abandonner leurs études. D'autre part, s'il était possible pour eux de voyageur sans inconvénients

government in the difference between the cost of bording students and conveying them by bus.

Because of the shorter distance between the schools of North Hants and Truro if a crossing were to be provided, it could solve some of the difficulty the East Hants Municipal School Board has been experiencing in staffing schools, for many teachers do not want to live in a rural area where public services, entertainment, stores and educational facilities are limited, but do not mind commuting from urban centers to rural classrooms.

TOURISM

Tourism has become the biggest industry in Canada and increased attractions will bring needed dollars from out of the province into Nova Scotia. The large body of fresh water resulting from a causeway-type crossing would offer unlimited possibilities as far as development of the tourist industry in the area is concerned, and the creation of this large fresh water lake in the center of the province would be of benefit to the whole province. It would provide a storage reservoir for hundreds of millions of gallons of critically needed fresh water for industry, domestic, and recreational use, which is now being wasted to the sea.

Facts show that the proposed crossing is financially feasible from a benefit cost ratio, and when the value of the saving in dollars and cents resulting from the provision of more efficient public services is considered then the benefit to be derived far exceeds the estimated cost of the structure.

The proposed crossing of the Shubenacadie River has the unqualified support of the following groups and organizations:

Municipalities of East Hants, West Hants and Colchester

Towns of Truro and Stewiacke

Tourist Council of Central Nova Scotia

Affiliated Boards of Trade of the Annapolis Valley

Nova Scotia Federation of Agriculture

East Noel Farmers Association

Federations of Agriculture of Colchester and Halifax-East Hants

par autobus scolaires, on pourrait les encou rager à poursuivre leurs études et il e découlerait des économies qui, pour le gou vernement, équivaudraient à la différenc entre le coût de la pension et les frais d transport par autobus.

En raison de la distance plus courte qu séparerait les écoles de Hants-Nord et d Truro advenant la construction d'un passag il serait peut-être possible de résoudre certai nes difficultés que rencontre la Commissio scolaire municipale de Hants-Est à pourvoi ses écoles en personnel, parce que bon nom bre d'enseignants refusent d'aller vivre dan une région rurale où les services publics, le lieux de distraction, les magasins et les éta blissements d'enseignement sont limités e nombre, mais acceptent les migrations quoti diennes entre les localités urbaines et les éco les rurales.

TOURISME

Le tourisme est maintenant l'industrie l plus importante au Canada et l'augmentatio du nombre des attractions rapportera à l Nouvelle-Écosse des dollars de l'extérieur. L grande étendue d'eau douce qui se créera avec la construction d'un passage en forme d digue offrirait des possibilités sans limite dans le secteur des activités touristiques de l région. La création de ce lac d'eau douc bénéficierait à l'ensemble de la province. constituerait une réserve de centaines de mi lions de gallons d'eau douce pour satisfair aux besoins pressants de l'industrie, de ménages et des lieux touristiques et qui vor se perdre dans l'océan à l'heure actuelle.

Les faits démontrent que le passage projet est réalisable sur le plan financier en se fon dant sur le rapport du coût aux avantages e lorsque la valeur des économies en dollars qu résultent de la fourniture de services public plus efficaces est considérée, la valeur de avantages à retirer dépasse de beaucoup l coût estimatif de la construction.

Les groupes et les organismes suivant appuient sans réserve le projet de passag enjambant la rivière Shubenacadie:

Les municipalités de Hants-Est, Hants Ouest et de Colchester

Les villes de Truro et de Stewiacke

Le Conseil du tourisme du Centre de l Nouvelle-Écosse

Les Chambres de commerce unies de l vallée de l'Annapolis

La fédération des agriculteurs de l Nouvelle-Écosse

L'Association des agriculteurs de Noël-Est

East Hants Progressive Conservative Association
East Hants Liberal Association
Truro Area Industrial Commission

Boards of Trade of Truro and Stewiacke & District
Fundy Vacation Trail Committee of N.S. and N.B.

SURRETTE BATTERY COMPANY
LIMITED
SPRINGHILL, N.S.

Mr. Chairman, Gentlemen:

Surrette Battery Co. Ltd. was established at Springhill, N.S. in 1959, with the assistance of Industrial Estates Ltd. An all Canadian Company was formed with the Salem, Mass. U.S.A. plant, Surrette Storage Battery Company Inc. becoming a subsidiary.

Surrette Storage Battery Co. Inc. of Salem has been operating successfully since 1930, manufacturing lead acid batteries for the industrial, marine, railway, trucking and automotive trade.

Since our operation commenced in 1969 in Springhill, N.S. we have developed our automotive lead acid battery business and manufacture for a number of national private brand accounts for resale through their retail outlets. We also manufacture for Volvo automobiles, batteries for cars assembled at Halifax. Continual development has been carried out at our Springhill plant for the demands of Maritime Marine Fishing Fleet, and with the growing electric (battery operated) lift vehicles, Surrette Battery Co. Ltd. also markets, through an Automotive Distributor organization, our own brand of lead acid automotive and commercial batteries.

It has been our pleasure to assist considerably in the economy of Springhill with approximately 55 persons on our payroll. This payroll alone contributes approximately $200,000.00 to Springhill, plus materials and services we are able to purchase in the local area. All shipping containers and packaging used in our operation are purchased from Nova Scotia manufacturers.

Surrette Battery Co. Ltd. market their own brand and private brands throughout the four Atlantic Provinces and these shipments would account for approximately 80% of our overall production, balance of approximately 20% marketed in the Quebec-Ontario area. In the past year we have been assessing the Bermuda and West Indian markets in order

APPENDICE «P»

Mémoire présenté
par

la *Surrette Battery Company Limited*,
Springhill (N.-É.)

La *Surrette Battery Co. Ltd.* a été établie Springhill (N.-É.) en 1959, grâce à l'appui d la société *Industrial Estates Ltd.* C'était ur société entièrement canadienne, avec filial la *Surrette Storage Battery Company Inc.*, Salem, au Massachusetts (É.-U.).

L'exploitation de la *Surrette Storage Bat tery Co. Inc.*, de Salem, est fructueuse depu 1930. On y fabrique des accumulateurs a plomb pour l'industrie en général, le com merce maritime, les sociétés ferroviaires, le entreprises de camionnage et l'industri automobile.

Depuis le début de notre exploitation Springhill (N.-É.), en 1960, nous avons mi sur pied une usine d'accumulateurs au plom que nous vendons à un certain nombre d'en treprises privées d'envergure nationale qui, leur tour, les revendent par l'intermédiaire d leurs détaillants. Nous fabriquons aussi de accumulateurs d'automobiles pour les automo biles Volvo montées à Halifax. Nos établisse ments de Springhill n'ont cessé de se dévelop per en proportion des besoins des pêcheur des Maritimes; de plus, devant le nombr croissant de chariots élévateurs électriques en circulation (mus par batterie), la *Surrett Battery Co. Ltd.* met aussi sur le marché, vi ses concessionnaires d'automobiles, ses pro pres marques d'accumulateurs au plomb pou l'industrie automobile et le commerce en général.

Notre apport à l'économie de Springhill es considérable, et nous nous en réjouissons nous comptons, à notre service, environ 5 employés. Nous versons environ $200,000 en salaires à l'économie de Springhill, sans compter les équipements que nous pouvons acheter dans la localité, et les services que nous y utilisons. Tous nos récipients d'expédition et tout notre matériel d'emballage proviennent de fabricants de la Nouvelle-Écosse.

La société *Surrette Battery Co. Ltd.* distribue ses propres marques, ainsi que d'autres marques privées, dans les quatre provinces de l'Atlantique, soit environ 80 p. 100 de sa production globale, les derniers 20 p. 100 étant acheminés vers le Québec et l'Ontario. Nous évaluons depuis un an les marchés des Bermudes et des Antilles, afin de mieux pou-

assist with volume and further justification our Springhill plant.

Our four Atlantic Provinces of 2,001,000 ersons offer total vehicle registration of 9,111 (DBS 1966 figure). This gives us an timated annual potential of approximately 0,000 battery units as replacement for these ur provinces. To date we have been able to mpete for approximately 30% of the above otential. Generally it is the feeling that our cation (being in the centre of these four ovinces) we should be able to compete for to 70% of this market. However, there are any things that contribute to our inability obtain a larger piece of this market. We e competing with suppliers in Quebec (Sherooke, Drummondville and St. John's), ntario (Metro Toronto). Those competitors, th large volume annual potential of approximately 1,400,000 units per year plus iginal equipment (auto and equipment anufacturers building and assemblying in e immediate area), can sell in their large arket area with volume production and all transportation costs.

When Quebec and Ontario competitors ip to the Atlantic Provinces, they have ight one way on a finished product only. ese competitors can absorb freight and sell stributor's and private brand (national accunts), within the Atlantic Provinces, at ntral Canada prices. To meet this competn, Surrette Battery Co. in some cases, has absorb inter-province freight on shipments finished product and also absorb freight on w material inward.

A very large expense in manufacturing d acid batteries is plate oxide—our nearest de manuracturer is in Ontario. Our operan in Springhill produces many types of d acid batteries, Industrial, Commercial, rine and Automotive. To stock and freight the many different densities of oxide has ven to be costly. To overcome this costly n, it was necessary for Surrette Battery Ltd. to build an Oxide Mill in Springhill this item could be blended in quantities d densities as required. To supply this eration, it is necessary to bring in nonroding pure lead from Trail, B.C. (40 to 50 lots) each shipment. Expander which is nded with this lead is brought in from the ebec area. 8—Lead shipments per year (50

voir déterminer les quantités à produire et d'apporter de nouvelles raisons d'être à notre usine de Springhill.

La population des quatre provinces atlantiques s'élève à 2,001,000, dont 549,111 ont fait immatriculer un véhicule, d'après les statistiques de 1966 du Bureau fédéral de la statistique. Donc, pour satisfaire à la demande de ces quatre provinces, il faut, en moyenne, 150,000 accumulateurs de rechange. Nous avons pu, jusqu'ici, occuper 30 p. 100 de ce marché. Situés à l'épicentre des quatre provinces, nous croyons pouvoir, de façon générale, accaparer 60 ou 70 p. 100 du marché. Bien des facteurs viennent contrecarrer nos efforts dans ce sens. Nous devons faire face à la concurrence des fournisseurs du Québec (Sherbrooke, Drummondville et Saint-Jean) et de l'Ontario (Toronto métropolitain). Ces concurrents, qui peuvent vendre chaque année environ 1,400,000 unités, sans compter le matériel original (fabricants d'automobiles et d'accessoires qui font la fabrication et le montage dans leur voisinage immédiat) peuvent donc écouler sur leur vaste marché une forte production et versent des frais de transport minimes.

Les concurrents québécois et ontariens qui expédient leurs produits vers les provinces atlantiques ne paient qu'une fois les frais de transport sur le produit fini. Ces concurrents peuvent absorber les frais de transport et peuvent vendre les marques de distributeurs et les marques privées (commerces nationaux) à l'intérieur des provinces de l'Atlantique aux prix en cours dans le centre du pays. Pour combattre cette concurrence, la *Surrette Battery Co.* doit, dans certains cas, absorber les frais de transport interprovinciaux pour l'expédition des produits complets et assumer aussi les frais des matières brutes qu'elle doit commander à l'extérieur.

L'un des éléments qui contribuent à faire hausser le prix de revient des accumulateurs au plomb, c'est l'oxyde-puce—les producteurs les plus proches de nous sont en Ontario. Nos établissements de Springhill produisent différents modèles d'accumulateurs au plomb, industriels, commerciaux, maritimes et automobiles. Entreproser et faire venir les différentes densités d'oxyde s'est révélé un procédé coûteux. Pour y obvier, la *Surrette Battery Co. Ltd.* a dû construire un établissement pour la production de l'oxyde, à Springhill; on pouvait alors obtenir, par mélange, les quantités et les densités d'oxyde voulues. Cette opération nécessite du plomb pur non corrosif que l'on commande de Trail (C.-B.) par contingent de 40 ou de 50 tonnes. Le

to 55 tons per shipment). 8—Expander shipments per year (2000 to 2400 lbs. per shipment).

Cases, covers and vent caps (for Automotive and Commercial batteries) are purchased in Welland and Toronto area F.O.B. suppliers Ontario plants. When possible we purchase in piggybackloads to cut freight costs, however fill in stock (Which is considerable) comes in L.C.L.

diluant, qui doit être mélangé au plomb, nou provient de la région de Québec.
8 envois de plomb par année (chacun de 50 55 tonnes).
8 envois de diluant par année (chacun d 2,000 à 2,400 lbs.).

On achète étuis, housses, couvercles d'éver (pour les accumulateurs d'automobiles et le accumulateurs commerciaux) à Welland et Toronto f. à b. usine du fournisseur de l'Onta rio. Pour réduire les frais de transport, nou utilisons pour nos commandes, si possible, l mode de transport rail-route, mais les com mandes de réapprovisionnement (qui son considérables) nous parviennent en charg ments incomplets

Sample rate Welland to Springhill minimum wt. 20,000 lbs. $2.37 per C

	"	"	7,500 lbs.	2.83 "

"	"	"	"	1,000 lb., 4.30 "

Les séparateurs viennent de Montréal, f.à b. usine du fournisseur:
300 lb. $3.40 le charg.
500 lb. 3.35 "

It is necessary to purchase electrolyte from Montreal (required at 1800 S. G. for plate pasting) in 30 ton car lots. This creates heavy stock conditions, but tank trucks (smaller lots) cost an additional 50%. It is necessary for Surrette to maintain their own equipment to unload Tank cars and transport in acid truck from nearest rail point Springhill Jct., to the plant in Springhill. Due to our location all of the above items have to be purchased in larger lots than would be the case if located in Central Canada and nearer supplies, hence the cost of maintaining inventories is an additional cost factor. Each additional cost above plus additional freight costs on finished product generally has to be absorbed on our competitive lines as it is necessary to meet out-of-Atlantic producers selling price.

Il faut acheter à Montréal, par chargemen de 30 tonnes, l'électrolyte nécessaire à l'empâ tage des plaques (à 1800 g.s.). Ces envo encombrent notre entrepôt mais les expéd tions par camions-citernes, donc en plus pet tes quantités, coûtent 50 p. 100 de plus. I *Surrette* doit entretenir son propre matéri pour décharger les camions-citernes et faire transport par camion à acide depuis la ga de chemins de fer la plus rapprochée, so Springhill Jonction, jusqu'à l'usine de Sprin hill. Vu notre emplacement, nous devo acheter tous ces produits en quantités plu grandes que si nous étions établis dans centre du Canada plus près des fournisseur le coût de renouvellement du stock est u élément supplémentaire qui s'ajoute au pri de revient. Il faut donc absorber chaque él ment du coût cité plus haut, plus les frais d transport pour les produits finis où il y concurrence, car il faut concurrencer le pri de vente des producteurs hors Atlantique.

Listed below are C.N.R. published L.C.L. ates per 100 lbs. in minimums of 300, 500, 50 and 2000 lbs. shipments, Springhill to 13 oints within the Atlantic Provinces, also fol- owing the C.N.R. rates are truck rates that we nd necessary to ship by to overcome, where ossible, freight costs. Our breakdown of ship- ients from the plant on the average run pproximately 50% of shipments that go in ie 300 lb. classification; approximately 25% i the 500 lb. classification and the balance of 5% would be 1000 to 2000 lbs. and over. iggyback shipments within the Atlantic rovinces are not used.

Le tableau ci-dessous donne les tarifs du Canadien National pour le trafic de détail, pour des envois minimaux de 300, 500, 750 et 2000 lb., de Springhill jusqu'à 13 points des provinces atlantiques. Après les tarifs du C.N., on donne les tarifs par camion, là où c'est nécessaire d'utiliser ce mode de transport pour réduire les frais de transport quand c'est possible. Nos envois de l'usine se décomposent comme suit en moyenne: 50 p. 100 dans la classe de 300 lb., 25 p. 100 dans celle de 500 lb. et 25 p. 100 de 1000 à 2000 lb. et même plus. On ne se sert pas du transport rail-route à l'intérieur des provinces de l'Atlantique.

Average additional cost per unit May 1966 Feb. 1968 would be 35¢ per unit. Taking all nts into consideration against all prepaid pments within the 4 Provinces have cost us proximately $11,550.00 from September 67 to September 1968. This is a net result of freight increase to this firm. This will ther increase as volume escalates. This ra cost cuts directly into potential net ome, creates less reserve for expansion of ilities and certainly discourages wage reases, which drive us further from the npetitive market.

We have been requested by distributors to ote batteries for the Churchill Falls project. quotations must be landed St. John's, d. (dockside) or Montreal, Que. (dockside). compete in this market we have to absorb ight to either point against our competitors

Les frais supplémentaires, de mai 1966 à février 1968, seraient en moyenne de 35c. l'unité. Le paiement d'avance des envois expédiés sur tous les points d'expédition des quatre provinces nous a coûté environ $11,550 de septembre 1967 à septembre 1968. C'est la hausse nette des frais de transport que la firme doit assumer. Et ils continueront d'augmenter en proportion du volume. Ces frais supplémentaires grugent directement notre revenu net éventuel, diminuent les réserves qui pourraient être affectées à l'expansion de nos établissements et nous dissuade évidemment d'augmenter les salaires, ce qui nous écarte davantage du marché compétitif.

Des distributeurs nous ont demandé de soumettre des prix pour accumulateurs pour le projet des chutes Churchill. Pour toute soumission, il faut tenir compte du transport jusqu'au port de Saint-Jean (T.-N.) ou de Montréal (P.Q.). Pour soutenir la concurrence, il

absorbing freight from Toronto (Metro) or Drummondville or Sherbrooke to Montreal. This is a direct loss of potential profit.

C.N.R. rail has advantages over trucks at many points as they have direct handling in areas within the Atlantic Provinces. There are quite a few points to which we have not been able to obtain trucking as an alternative, Newfoundland being one area, Northern New Brunswick also is very difficult to obtain any trucking services. C.N.R. service has improved considerably to Newfoundland points in the past 12 months, although to other points such as Northern New Brunswick, we have not noticed any appreciable cut in time lag on shipments.

To points such as Moncton, Saint John, Fredericton, Truro and Halifax we have found it much to our advantage to ship via truck. Generally to all these points the truckers pick up in the late afternoon and delivery is prior to noon the next day. Also our comparison sheet shows a price advantage via truck so we have a cost factor plus time saving, to our customers.

Any consideration to stabalize the freight rates at the 1966 or mid-point 1966 to 1976 rate for shipments within the Atlantic Provinces would certainly assist small businesses in competing for our local Atlantic market.

Respectfully submitted by:
SURRETTE BATTERY CO. LTD.

Feb. 18, 1969.

faut ici absorber les frais de transport jusqu'à l'un ou l'autre point contre nos concurrents de Toronto (et banlieue), Drummondville ou Sherbrooke à Montréal.

Le Canadien-National l'emporte sur les camions à bien des endroits puisqu'il peut manutentionner directement les marchandises à certains points des provinces atlantiques. A plusieurs endroits, nous n'avons pu nous rabattre sur le camionnage comme solution de rechange, à Terre-Neuve, notamment. Le transport par camion est également difficile à obtenir dans le nord du Nouveau-Brunswick. La Canadien-National a amélioré considérablement son service qui dessert certaines localités de Terre-Neuve, au cours des douze derniers mois, bien que pour le transport à certains autres points, comme dans le nord du Nouveau-Brunswick, nous n'avons relevé aucune réduction sensible des délais d'expédition.

Pour Moncton, Saint-Jean, Fredericton, Truro et Halifax, par exemple, nous avions avantage, avons-nous constaté, à expédier par camion. Pour toutes ces villes, en général, les camionneurs prennent leur chargement à la fin de l'après-midi et la livraison se fait avant midi le lendemain. Nos tableaux comparatifs dénotent aussi un meilleur prix par camion; il y a donc économie de prix et économie de temps pour nos clients.

Toutes mesures visant à stabiliser le tarif des frais de transport au taux de 1966 ou à ce qu'il était entre 1966 et 1967 sur les envois faits à l'intérieur des provinces de l'Atlantique aideraient certainement les petits commerces à supporter la concurrence pour le marché local de l'Atlantique.

Témoins: Représentant le Newfoundland Board of Trade: M. James W. McLoughlan, président, M. Anthony G. Ayre, directeur général, M. Burford Ploughman, président du comité des transports; *Représentant Lundrigans Limited, D.B.L. Trasnport, Atlantic Gypsum Limited et North Star Cement Limited:* MM. H. W. Lundrigan, Peter Cook, Ronald Newhook, William Shildes; *Représentant la Central Newfoundland Chamber of Commerce:* MM. M. Arnold, K. Mercer; M. Max Thornhill, *comparaissant à titre privé. Représentant le Railway Unions Labour Council:* M. F. A. F. Lush, secrétaire, M. A. H. Penney, chef de train, M. F. G. Chancey, président.

Le président présente les témoins et leur demande de résumer leurs mémoires.

M. McGrath dépose des statistiques relatives à l'exploitation de l'aéroport de Saint-Jean. Il est convenu que ces statistiques figurent en appendice au compte rendu d'aujourd'hui. (*Voir l'appendice «S»*) (*Voir l'appendice «T»* pour le mémoire du Railway Unions Labour Council).

Il est convenu que le jougement rendu par la Commission canadienne des transports figure en appendice aux Procès-verabux et témoignages d'aujourd'hui. (*Voir l'appendice «U»* pour le jugement de la Commission canadienne des transports concernant le service-voyageurs de Terre-Neuve).

A midi 45, le Comité s'ajourne pour se réunir de nouveau à 14 heures.

AFTERNOON SITTING
(27)

The Standing Committee on Transport d Communications met in St. John's, wfoundland at 2:30 p.m., the Chairman . H.-Pit Lessard, presiding.

Members present: Messrs. Allmand, eau, Carter, Corbin, Godin, Horner, Les- d (*LaSalle*), McGrath, Mahoney, Nes-

SÉANCE DE L'APRÈS-MIDI
(27)

Le Comité permanent des transports et des communications se réunit à St-John's (T.-N.) à 14 h. 30, sous la présidence de M. H.-Pit Lessard.

Présents: MM. Allmand, Breau, Carter, Corbin, Godin, Horner, Lessard (*LaSalle*), McGrath, Mahoney, Nesbitt, Perrault,

bitt, Perrault, Portelance, Pringle, Rock, Rose, Skoberg, Thomas (*Moncton*), Trudel, Turner (*London East*).—(19)

Also present: Hon. James Richardson, Minister without portfolio, and Mr. Peddle, M.P.

Witnesses: From the Corner Brook Chamber of Commerce: Mr. J. Merrill Belanger, Past President, Mr. Alan Noseworthy, Chairman, Transportation Committee; *Representing the Brotherhood of Railway, Airline and Steamship Clerks, Freight Handlers, Express and Station Employees:* Mr. Esau Thoms, General Chairman, Mr. L. K. Abbott, Vice-President, Mr. W. H. Butt, General Chairman; *From the City of Cornerbrook:* Mayor N. F. Murphy, M.D.; Harvey Keats, *Private Citizen.*

The Chairman introduced the Honourable James Richardson to the Committee and spectators and stated that the Minister was attending this meeting as an observer only.

The Chairman introduced the witnesses and invited them to summarize their briefs.

The witnesses were interrogated. (*See Appendix "V" for brief of Brotherhood of Railway Employees*). (*See Appendix "W" for City of Cornerbrook brief.*) (*See Appendix "X" for Harvey Keat's brief*).

At 5:00 p.m., there being no further questions the Chairman thanked the witnesses and the Committee adjourned to the call of the Chair.

Portelance, Pringle, Rock, Rose, Skobe Thomas (*Moncton*), Trudel, Turner (*Lo don-Est*)—(19).

Aussi présents: L'hon. James Richa son, ministre l'État et M. Peddle, dépu

Témoins: Représentant la Chambre commerce de Corner Brook: M. J. Mer Bélanger, président sortant, M. Alan Nos worthy, président du comité des tra ports; *Représentant la Fraternité des co mis de chemins de fer, de compagn aériennes et de navires à vapeur, de m nutenteurs de marchandises et d'emplo de messageries et de gares:* M. Es Thoms, président général, M. L. K. Abbo vice-président, M. W. H. Butt, préside général; *Représentant la ville de Corne brook:* Son Honneur le maire N. F. Mu phy, M.D.; M. Harvey Keats, comparai sant à titre privé.

Le président présente au Comité et a spectateurs l'honorable James Richards et précise que le ministre assiste à séance uniquement à titre d'observateu

Le président présente les témoins et l invite à résumer leurs mémoires.

Les témoins sont interrogés. (*Voir l'a pendice «V» pour le mémoire de la Fr ternité des employés de chemins de fer (Voir l'appendice «W» pour le mémoire la ville de Cornerbrook.*) (*Voir l'appe dice «X» pour le mémoire de M. Harv Keats*).

A 17 heures, l'interrogatoire des t moins étant terminé, le président les r mercie et le Comité s'ajourne jusqu'à nou velle convocation du président.

Le secrétaire du Comité,
Robert Normand,
Clerk of the Committee.

EVIDENCE

(*Recorded by Electronic Apparatus*)

Friday, February 21, 1969

0935

The Chairman: Ladies and gentlemen, just word or two to welcome you all to this aring this morning. I would like to espe-ılly welcome those who will have briefs to esent to us this morning. As you know, this the third province we have visited in our ır, and this is our fifth day of hearings. We ard quite a few briefs so far in New Bruns-ck and Nova Scotia and we intend to hear much as we can here in Newfoundland.

I hate to do this but every time we start a w session I have to ask those appearing to as brief as possible because we want to ar as many briefs as we can and allow the embers of the Committee to ask as many iestions as they can, because this will help in making our final report.

The order of procedure on this Committee the same as that in the House of Commons. rticle 65(10) of the Standing Orders of the ouse of Commons.

We have five briefs for this morning's ses-on, and I was asked by a couple of charm-g ladies if they could present a short brief hich I hope we will hear also. So without laying our proceedings, I would call upon r. Stephen A. Neary to come forward to esent his brief on behalf of the Government Newfoundland and Labrador. You will id this on page 507.

On my immediate right is the hon. Stephen . Neary, then the hon. Eric S. Jones, and en Mr. O. L. Vardy, Deputy Minister of conomic Development.

The Hon. Stephen A. Neary (Minister of ransportation, Government of Newfound-nd): Mr. Chairman and members of the ouse of Commons Standing Committee on ransport and Communications, it is with reat pleasure and a sense of privilege that I, ie Minister of the Province of Newfoundland

TÉMOIGNAGES

(*Enregistrement électronique*)

Le vendredi 21 février 1969

Le président: Mesdames et messieurs quelque mots pour vous accueillir ce matin à cette réunion du Comité. Je désire tout particulièrement souhaiter la bienvenue à ceux d'entre vous qui nous présenterez des mémoires ce matin. Comme vous le savez, nous en sommes à notre troisième province dans notre tournée et c'est notre cinquième journée de séances. Nous avons entendu plusieurs présentations jusqu'ici au Nouveau-Brunswick et en Nouvelle-Écosse et nous avons l'intention d'en recevoir le plus grand nombre possible ici à Terre-Neuve.

Je n'aime pas faire cela, mais chaque fois que nous commençons une nouvelle séance, je dois vous demander d'être le plus brefs possible parce que nous voulons entendre le plus grand nombre de mémoires possible et permettre aux membres du Comité de poser le plus grand nombre de questions possible, parce qu'ainsi nous pouvons mieux être en mesure de préparer le rapport final. Le Règlement et la procédure que nous utilisons ici sont les mêmes qu'à la Chambre des communes; il s'agit de l'article 65(10) du Règlement de la Chambre des communes.

Nous avons cinq mémoires pour la séance de ce matin, et deux jeunes filles très charmantes m'ont demandé si elles pouvaient présenter un court mémoire et j'espère que nous pourrons les entendre ce matin. Alors, sans plus de délai, je demanderais à M. Stephen A. Neary de bien vouloir nous présenter son mémoire au nom du gouvernement de Terre-Neuve et du Labrador. Vous le trouverez à la page 507.

A ma droite, on voit l'honorable Stephen A. Neary; ensuite l'honorable Eric S. Jones et M. O. L. Vardy, sous-ministre du ministère de l'Expansion économique.

L'hon. Stephen A. Neary (ministre des transports, gouvernement de Terre-Neuve): Monsieur le président, membres du Comité permanent des transports et des communications de la Chambre des communes, c'est avec un grand plaisir et même un privilège pour moi, ministre de la province de Terre-Neuve

[*Text*]

and Labrador, responsible for transportation, welcome all of you to Canada's youngest province and North America's oldest city. I bring you greetings from the Government and from the people of Newfoundland.

This brief deals with a basic Newfoundland problem. It has been recognized overtly and implicitly by the Government of Canada many, many times that increased productivity is the only firm basis for equalization of living standards in Newfoundland and Labrador with those of the other provinces of Canada.

Productivity today is inescapably tied in with economic development. Economic development, whether the products be those of primary or secondary industries, can be strangled without free movement of materials and workers between markets and production centres.

There has been a tremendous federal-provincial investment over the past 20 years in Newfoundland and Labrador to establish the climate essential to increased productivity. To protect this investment, Newfoundland and Labrador now require a complementary investment for the future with concentration in those areas that are covered in this brief—transport and communications—the brief which I understand, gentlemen, you have in your hands.

The Government's brief outlines in fairly general terms with, I might say, some specific references, a program which we believe will provide the essential minimum of road construction, harbour improvement, airport updating, extension of subsidies and necessary additional terminal and warehousing facilities.

May I, gentlemen, on behalf of Canada's youngest province solicit your kind attention and sympathetic study of our provincial brief.

I might say, Mr. Chairman, that Mr. Jones is here in his capacity of Minister of Highways; Mr. Vardy is the Deputy Minister of Economic Development and as most of the matters in the brief are related to these things, they will be willing to answer any questions that arise on these particular matters.

The Chairman: Thank you very much, Mr. Minister. Mr. Horner.

[*Interpretation*]

et du Labrador, responsable de la question d transports, de vous souhaiter tous la bienv nue à la plus jeune province du Canada et plus ancienne ville de l'Amérique du Nord.

Je vous fais part des meilleurs vœux d gouvernement et de la population d Terre-Neuve.

Ce mémoire traite essentiellement d'un pr blème de Terre-Neuve. Il a été reconnu impl citement et explicitement par le gouverne ment du Canada plus d'une fois qu'un productivité accrue est le seul fondemer véritable de l'égalisation des normes de vie Terre-Neuve et au Labrador avec celles de autres provinces canadiennes.

La productivité aujourd'hui est inévitable ment rattachée au développement économi que. Le développement économique, que le produits soient du secteur primaire ou secon daire, peut être étouffé s'il n'y a pas un libr déplacement de produits et des travailleur entre les marchés et les centres d production.

Le gouvernement fédéral et le gouverne ment provincial ont, au cours de ces dernière années, investi beaucoup d'argent à Terre Neuve et au Labrador pour établir le clima essentiel à cette expansion de la productivité Pour protéger cet investissement, Terre Neuve et le Labrador ont maintenant besoi d'investissements additionnels pour l'aveni en se concentrant essentiellement dans ce régions visées par ce mémoire, soit les trans ports et les communications, le mémoire qu vous avez en main, messieurs, si je com prends bien.

Ce mémoire du gouvernement vous pré sente dans l'ensemble, avec certaines référen ces plus précises, un programme qui, à notre avis, nous donnera le minimum essentiel de construction de routes, d'amélioration des services portuaires, de modernisation des aéroports, d'extension des subventions et aussi d'installations additionnelles de tête de ligne et d'entreposage.

Permettez-moi, messieurs, au nom de la plus jeune province du Canada, de demander votre attention pour faire une étude de notre présentation provinciale.

Je pourrais dire, monsieur le président, que M. Jones est ici en tant que ministre de la Voirie et M. Vardy, le sous-ministre de l'Expansion économique, et comme la plupart des questions de ce mémoire sont rattachées à ces deux rubriques, ils sont prêts à répondre aux questions que vous aurez à poser sur ces deux sujets.

Le président: Merci beaucoup, monsieur le ministre. Monsieur Horner.

[*Texte*]

Mr. Horner: Mr. Neary, I was interested in ur brief because, while it laid down what e Newfoundland Government believed was right under the Confederation agreement, e brief in itself deals mostly with road con-uction and highways. In fact, at the top of ge 511 you deal at length with the road oblem and I wonder if your main concern not for the improving of the Trans-Canada ghway or other roads? Do you feel, in wfoundland, in any way the federal gov-ment should make major contributions to ghway construction in light of the poor rail-d conditions in the province?

Mr. Neary: Could I aks Mr. Jones if he uld answer that?

The hon. Eric S. Jones (Minister of Highways, Government of Newfoundland): Mr. airman, I would like to refer, with your mission, to a brief that was submitted by Government of Newfoundland in Febru-of 1968, which is just about a year ago ay. As you will recall this Committee was oute to Newfoundland, but the Committee not reach here. At that time we had eady presented to this Standing Committee rief which outlined the problem for the onstruction and construction of a trunk d system in Newfoundland.

t the present time the federal government s share with the government of New-ndland in the upgrading of our trunk ds through the Atlantic Development ard. The premise of our brief does not er to any great extent to Trans-Canada hway which has already been upgraded ler an agreement with the federal govern-nt, which agreement expires in 1970.

Mr. Horner: I realize that, Mr. Jones. That s the brief I was referring to, the brief ch you submitted in February, 1968, but mention is made, even in the tables at the k, as to the desirability of your Govern-nt upgrading the railroad trackage in the vince of Newfoundland—straightening it . I have read reports and am looking for-d to travelling on it as I am told the ves and the hills are something to see. y does your brief not suggest that the eral government should be making, ough the CNR an honest contribution to ightening it out and perhaps improving grades on it, if not widening it to stand-gauge?

[*Interprétation*]

M. Horner: Monsieur Neary, je me suis intéressé à votre mémoire parce qu'il établit ce que le gouvernement de Terre-Neuve croyait être son droit en vertu de l'accord de la Confédération, le mémoire lui-même traite essentiellement de la construction des routes. De fait, à la page 511 en haut, vous parlez longuement de problèmes routiers et je me demande si votre principale préoccupation n'est pas essentiellement à l'égard de la route transcanadienne ou des autres routes. Croyez-vous qu'à Terre-Neuve, de toute façon, le gouvernement fédéral devrait apporter des contributions importantes pour l'aménagement de routes vue le mauvais état du service ferroviaire?

M. Neary: Est-ce que je peux demander à M. Jones de répondre?

L'hon. Eric S. Jones (ministre de la Voirie, gouvernement de Terre-Neuve): Monsieur le président, je voudrais me reporter avec votre autorisation à un mémoire présenté par le gouvernement de Terre-Neuve au mois de février 1968, il y a environ un an aujourd'hui. Vous vous souviendrez que le présent Comité en 1968 était en route vers Terre-Neuve, mais il n'a pu s'y rendre; à ce moment-là, nous avions déjà présenté un mémoire au Comité permanent où l'on vous donnait l'ensemble des problèmes pour la construction et l'aménagement d'un réseau de routes d'accès à Terre-Neuve.

Le gouvernement fédéral partage présentement avec le gouvernement de la province les frais d'amélioration de nos routes d'accès par l'entremise de l'Office de l'expansion économique de la région atlantique. La prémisse de notre mémoire ne parle pas vraiment en grande partie de la route transcanadienne qui a été remise à jour à la suite d'une entente avec le gouvernement fédéral qui prend fin en 1970.

M. Horner: Je réalise cela, monsieur Jones, c'est exactement là le mémoire dont je voulais parler, le mémoire présenté au mois de février 1968, mais on ne parle pas, même dans les tableaux à l'arrière, des avantages de l'amélioration des voies ferrées dans la province de Terre-Neuve par votre gouvernement, de les redresser. J'ai lu des rapports et j'attends avec impatience la possibilité de voyager à bord de chemin de fer parce que les courbes et les pentes sont vraiment quelque chose à voir. Je me demande pourquoi votre mémoire n'a pas proposé que le gouvernement fédéral, par l'entremise du National-Canadien, puisse alors essayer vraiment d'améliorer, sinon d'avoir un plus large écartement.

[*Text*]

Mr. Jones: We feel that the matter is up to the CNR.

Mr. Horner: You feel that is a matter for the CNR?

Mr. Jones: Yes.

Mr. Horner: In feeling that is a matter for the CNR, do you not feel that the maintaining of a trackage on Newfoundland is part of Confederation, part of your agreement under Confederation?

Mr. Jones: Yes.

Mr. Horner: You do believe it is? Well, you have the Transport and Communications Committee before you. I would have thought that you would have made recommendations to the Committee with regard to the improving of the trackage, at least, if not standard gauging it because, to me, this Committee—and it may be different in Newfoundland—is more concerned with railroads rather than highway construction. It may be different in Newfoundland, and I would like you to tell me if it is, but highway construction has been basically a responsibility, outside of the Trans-Canada Highway, of the provincial government.

Mr. Neary: May I say to the hon. gentleman, Mr. Chairman, that rail service at the present time in Newfoundland is restricted to a 550 mile arc reaching from St. John's through central Newfoundland and down the southern part of the West Coast to Port aux Basques. There is no railway serving the entire south coast and the great northern peninsula of the Island, nor the huge land mass of Labrador except for the spur line from Sept Iles to Labrador City. So we feel that roads, particularly the trunk road system that we have outlined, is of tremendous importance to Newfoundland.

Mr. Horner: Yes, but as a western taxpayer, let me put it that way, I have always felt that provincial governments in the Maritime could well build their highways under the equalization branch rather than a direct contribution.

If the federal government immediately begins contributing to the cost of building highways in one province, there is a tendency for other provinces to ask for like provisions, while in the railway field, the federal government has a responsibility, and I think it is living up fairly well to its responsibilities in

[*Interpretation*]

M. Jones: Nous croyons que c'est l'affai du National-Canadien.

M. Horner: Vous croyez que c'est une que tion pour le National-Canadien?

M. Jones: Oui.

M. Horner: Ne croyez-vous pas que si c maintient les voies ferroviaires, que cela fa partie de votre entente au sein de Confédération?

M. Jones: Oui.

M. Horner: Vous le croyez vraiment? E bien, vous êtes devant le Comité des tran ports et des communications. J'aurais pens que vous auriez formulé des recommandatio au Comité pour ce qui est de l'améliorati des voies, sinon de mettre des voies à écart ment normal, parce que, à mon avis, Comité, et ça devrait être différent à Terr Neuve, mais enfin ce comité est plutôt occu de l'aménagement des voies ferroviaires q de la construction des routes. C'est peut-êt différent à Terre-Neuve et je voudrais q vous me le disiez si ça l'est, mais la constru tion des grandes routes est essentiellemer une responsabilité en dehors de la rou transcanadienne, donc la responsabilité d gouvernement provincial.

M. Neary: Permettez-moi de dire à l'hon rable député, monsieur le président, que service ferroviaire en ce moment à Terr Neuve ne se fait que dans un arc de 55 milles à partir de Saint-Jean, passant pa Terre-Neuve central et le long du littoral su à Port-aux-Basques. Il n'y a pas de servic ferroviaire pour desservir tout le littoral su ou la grande péninsule nord ou encore l grandes masses terrestres du Labrador, sa une voie qui vient de Sept-Îles à *Labrad City*. Donc, nous sommes d'avis que le sy tème des routes principales est de toute pr mière importance pour Terre-Neuve.

M. Horner: Oui, mais en tant que contr buable de l'Ouest, permettez-moi de vous pr senter ma suggestion ici, j'ai toujours été d'a vis que les gouvernements provinciaux dar les Maritimes pourraient très bien aménag leurs routes en vertu des subventions c péréquations plutôt qu'en vertu d'une contr bution directe.

Si le gouvernement fédéral commença immédiatement à contribuer à la constructio des routes dans une province, alors les autr provinces auront tendance à demander d services analogues, alors que, pour ce qui e des services ferroviaires, le gouvernemer fédéral a une responsabilité et je pense qu'il

[Texte]

e west and I would like to see it live up to s responsibilities in the east. In the Province Newfoundland, do you think that a rail-ad across the southern coastline could be of y service in that area?

Mr. Neary: No, I do not think it could. I ould say that the whole future of New-undland in the field of social and economic velopment is in our roads.

Mr. Horner: In other words, you are not o worried if the railroad completely, inside 10 or 20 years, becomes a useless relic or a useum piece?

Mr. Neary: That is rather a hypothetical estion, you know.

Mr. Horner: No, but let us look at the ture.

Mr. Neary: Things are changing so fast liv-g in the days of the Jumbo jets and so rth, that we do not know what is happening w or going to happen from year to year. t the railroad right across Canada may come obsolete; I do not know.

Mr. Horner: I doubt it, but with your road nstruction, you suggest in your brief that e maximum road carriage now is something e 30,000 pounds, which I thought was rath-light. Surely a good railroad, in regard to e pulp industry particularly, could carry avier loads and cheaper than a road that is ly going to carry 30,000 pounds.

Mr. Neary: Perhaps Mr. Jones could answer t question because I am not familiar with s.

Mr. Jones: Could I have the page you are erring to?

Mr. Horner: The reference to 30,000 pounds on page 510.

Mr. Jones: I think that reference, sir, is to ne of the structures that we have on our nk road system, that our bridges were ilt some 20 to 30 years ago and are not dated. We have to restrict travel over the dges to 30,000 pounds, where on the Trans-nada Highway our maximum gross weight up to 74,000 pounds, and I think a little ther on I said that under special permit we permit loads up to 100,000 pounds.

Mr. Horner: Is that right across the vince?

Mr. Jones: That is on Trans-Canada High-y with the same engineering standard

[*Interprétation*]

assez bien assumer ses responsabilités dans l'Ouest et j'aimerais le voir faire la même chose dans l'Est. A Terre-Neuve, croyez-vous qu'un service ferroviaire le long du littoral sud pourrait vraiment desservir cette région?

M. Neary: Non. Je ne le crois pas. Je dirais que tout l'avenir de Terre-Neuve dans le domaine de l'expansion sociale et économique se situe dans nos routes.

M. Horner: En d'autres mots, que vous importe si le chemin de fer d'ici 10 ou 20 ans devient une inutilité ou une relique désuète ou une pièce de musée?

M. Neary: C'est une question plutôt hypothétique.

M. Horner: Non, mais tournons-nous vers l'avenir.

M. Neary: Mais tout change tellement vite, nous sommes à l'heure des réactés géants, on ne sait pas maintenant ce qui se produit d'une année à l'autre. Mais même le service ferroviaire à travers le pays devriendra désuet.

M. Horner: J'en doute, mais avec votre construction routière, dans ce mémoire vous suggérez que le trafic routier est maintenant d'environ 30,000 livres, ce qui, à mon avis, n'est pas beaucoup. Sûrement, un bon service ferroviaire, surtout pour l'industrie de la pâte, pourrait transporter des charges plus lourdes et plus économiques qu'une route pouvant transporter 30,000 livres.

M. Neary: M. Jones pourrait peut-être y répondre parce que je ne connais le sujet.

M. Jones: Pourrais-je avoir la page en question?

M. Horner: J'ai pris cela à la page 510.

M. Jones: Il s'agit des structures que nous avons pour le réseau principal, il y a des ponts construits il y a 20 ou 30 ans et qui sont maintenant désuets. Il nous faut donc nous en tenir à 30,000 livres à cause de ces ponts, alors que sur la route transcanadienne cela est porté à 74,000 livres et même un peu plus loin, je pense avoir dit qu'en vertu des permis spéciaux, nous avons des routes jusqu'à 100,000 livres.

M. Horner: Et cela à travers la province?

M. Jones: Sur la route transcanadienne. Ce sont les mêmes normes qui valent pour l'en-

[*Text*]

as the Trans-Canada Highway in other parts of Canada—at least it will be when we have finished our upgrading program. But our trunk road system, which serves at least two-thirds of the people in the province who live around our shores, is lagging far behind in standards. We can move traffic on Trans-Canada Highway today, for example, which we cannot get out to Grand Bank or Marystown on the Burin Peninsula because of our low standard road.

Mr. Horner: Just one more short question, Mr. Chairman. Mr. Jones, as minister of Highways, you naturally would perhaps be more optimistic of the highway's future. Do you believe that 20 years from now the transportation system in Newfoundland can be best served by comprehensive network of highways rather than remodeling the railway?

Mr. Jones: I would say, Mr. Chairman, that for the next 20 years Newfoundland will need three types of transportation; roads—and I put roads first, naturally, being Minister of Highways, and I would refer specifically to upgrading of the trunk road program—we would still need our CNR services, and we would also need an up-to-date air freight.

The Chairman: Mr. Allmand?

Mr. Allmand: Gentlemen, with respect to the railway, do you have any information as to whether or not the amount of freight hauled on the railway has been increasing over the last few years, or is that going down? Do you have information on that?

Mr. Neary: No, we do not have any information on that.

Mr. Allmand: Now has your trucking industry in Newfoundland been increasing; do you have a licensing board for trucks; and has there been an increase in applications by trucking companies to serve on the Trans-Canada Highway and the trunk roads leading off that Highway?

Mr. Jones: Yes, Mr. Chairman, I would say within the past four or five years there has been a marked increase in the trucking industry in Newfoundland. This again brings up the point that truckers who move into Newfoundland from the mainland with maximum loads are restricted when they try to leave the Trans-Canada Highway and use our trunk road system to get out to the outlying peninsula. Much of industry, especially the fishing industry, in Newfoundland is located

[*Interpretation*]

semble du Canada ou qui le seront lorsqu nous aurons terminé ce programme d'amélio ration, mais le service du réseau routier prin cipal qui dessert au moins les $\frac{2}{3}$ de la popu lation de Terre-Neuve qui vit le long du litto ral, se trouve à être assujéti à des norme bien inférieures. Ainsi sur la transcanadienn nous pouvons transporter des marchandise aujourd'hui, par exemple, mais nous ne pou vons aller à Grand Bank ou Marystown dan le péninsule Burin à cause de nos route inférieures.

M. Horner: Une autre question brève, mon sieur le président. Monsieur Jones, en tan que ministre de la Voirie, vous seriez san doute plus optimiste quant à l'avenir des rou tes. Croyez-vous que d'ici 20 ans, le réseau d transport à Terre-Neuve sera mieux desserv par un réseau d'ensemble de routes plutô que par le réaménagement du servic ferroviaire?

M. Jones: Je dirais, monsieur le président que pour les 20 prochaines années, nou aurons besoin de deux ou trois modes d transport: les routes d'abord, et là je suis, e tant que ministre des Transports, en faveu de l'amélioration du réseau principal de rou tes, et nous aurons toujours besoin des servi ces du National-Canadien, ainsi que d'u service moderne de cargos aériens.

Le président: Monsieur Allmand?

M. Allmand: Messieurs, pour ce qui est de chemins de fer, est-ce que vous avez des ren seignements quant à savoir si ce que l'or transporte augmente ou diminue? Est-ce qu vous avez ces renseignements?

M. Neary: Non, nous n'avons pas ce renseignements.

M. Allmand: Est-ce que l'industrie du ca mionnage à Terre-Neuve s'est étendue? Est-c que vous avez un bureau pour l'octroi d permis pour les camions? Est-ce qu'il y a eu une augmentation des demandes des société de camionnage pour desservir le réseau prin cipal et la route transcanadienne?

M. Jones: Oui, monsieur le président. Je dirais qu'au cours des 4 ou 5 dernière années, il y a eu une expansion considérable dans l'industrie du camionnage à Terre-Neuve une fois de plus, les camionneurs qui son venus du continent à Terre-Neuve, avec ur chargement maximum, sont limités en quit tant la route transcanadienne pour pouvoi prendre le réseau secondaire pour se rendre aux périphéries. Surtout l'industrie de la pêche à Terre-Neuve se trouve au bout de

[Texte]

n the heads of our peninsulas. Naturally, the sh strike the head lands first. On the Burin eninsula, on the Bonavista Peninsula and on e Great Northern Peninsula we have fresh nd salt fish processing plants and it is here here the economy of the province is being npeded, where we cannot get the same flow commercial traffic out to our fishing com-exes as we can on the Trans-Canda ighway.

There is a huge gap between the Trans-anada Highway and our trunk roads. We ve something over 4,000 miles of main ghway in Newfoundland and apart from the ans-Canada Highway, which is something er 500 miles, we have only about 500 miles paving.

An indication today of the condition of our unk roads, Mr. Chairman, is that about 75 r cent of them are gravel roads in New-undland today and are under half-load lim-s. I would say at the present time too that obably 25 per cent of our gravel trunk ads are impassable. They close themselves e to this mild weather. We are very happy have this lovely weather to greet you gen-men here today but, believe you me, it is aying havoc with our gravel roads. There is tremendous gap.

Mr. Neary: We do have a licensing board?

Mr. Jones: Yes, we do, the Public Utilities mmission.

Mr. Neary: We have a motor carrier licence ard which we brought in about a year o, and they are in the process now of licen-g all truck operators in the province.

Mr. Allmand: It would seem to me that if u have a policy of providing a new system trunk roads and you are doing that to rvice the communities in the isolated areas d in the fishing communities you would o want those roads to be used by trucks. you have a government trucking policy to ke use of those roads if and when they are mpleted?

Mr. Jones: Mr. Chairman, I would like to y here that we are not asking for a new stem of trunk roads or new trunk roads. r brief is for the upgrading and paving of isting trunk roads. We have these trunk ads.

Mr. Allmand: I understood that. How are pplies brought in and out now if some of se roads are so much below standard? w do you get the product out to the Trans-

[Interprétation]

péninsules. Sur la péninsule de Burin et de Bonavista ainsi que de Great Northern il y a des entreprises de transformation de poisson frais et salé, et c'est là où l'économie de la province se trouve défavorable, parce qu'on ne peut y acheminer le même trafic commercial vers ces usines comme on peut le faire sur la route transcanadienne.

Il y a un grand écart entre la route transcanadienne et les routes pour les camions. Nous avons plus de 4,000 milles de routes principales à Terre-Neuve, en plus de la route transcanadienne qui est de quelque 500 milles, nous n'avons que 500 milles de routes bitumées, ce qui nous indique aujourd'hui l'état de ces routes, soit 75 p. 100 de nos routes sont des routes de gravier à Terre-Neuve et au-dessous de la limite de demi-chargement. Je dirais qu'en ce moment, environ 25 p. 100 de ces routes sont impassables. Elles le deviennent avec un temps si doux. Nous sommes très heureux qu'il fasse si beau temps pour vous accueillir ici aujourd'hui, messieurs, mais cela fait de grands dégâts à nos routes de gravier.

M. Neary: Oui, nous avons un bureau d'octroi de permis.

M. Jones: Oui, c'est vrai, je m'excuse. C'est la Commission des utilités publiques.

M. Neary: Nous avons un bureau d'octroi de permis pour les transporteurs, qui a été créé il y a environ un an et ils sont en voie d'émettre des permis à tous les exploitants de camions de la province.

M. Allmand: Il me semble que si vous aviez une politique prévoyant un nouveau système de routes de camions afin de desservir les collectivités dans les régions isolées et dans les collectivités de pêche, vous voudriez aussi que ces routes soient utilisées par les camions. Est-ce qu'il y a une politique officielle du gouvernement pour utiliser ces routes lorsquelles seront terminées?

M. Jones: Monsieur le président, je voudrais dire ici qu'on ne demande pas un nouveau système de routes principales ou de nouvelles routes principales. Notre mémoire demande l'amélioration de ces routes et le bitumage. Nous avons ces routes.

M. Allmand: C'est ce que je croyais avoir compris. Comment les approvisionnements sont-ils acheminés maintenant si bon nombre de ces routes ne sont pas conformes aux nor-

[*Text*]

Canada Highway or to the railroads for freighting now? Do you do it with very small trucks?

Mr. Jones: With maximum gross weights of 74,000 pounds but, as I said earlier, on some of these roads we have to restrict weights because of the bridges. These roads are being used. We would like to call them all-weather roads but I am afraid they are not. But normally we can keep our road network functioning 12 months of the year.

Mr. Neary: Of course, along the southwest coast C.N. operates a coastal boat service for people who do not have contact by roads.

Mr. Rose: Mr. Chairman, I have a supplementary. Although you did not mention it, sir, I believe that one of the big problems of your trunk and feeder roads is not so much that they impede transport, though that plays an important part, but the fact that so many people in Newfoundland are casually employed and move from job to job and at this time of year this seriously inhibits their mobility. Would you say this is so?

Mr. Jones: That is so.

Mr. Allmand: It prevents them from moving to employment in production centres.

Mr. Jones: That is definitely a fact, Mr. Chairman.

Mr. Rose: Mr. Chairman, I would like to speak again.

The Chairman: Are you through, Mr. Rose?

Mr. Rose: I am through with the supplementary.

The Chairman: I will put you back on the list.

Mr. Allmand: Some people have suggested that we include trucking under the Maritime Freight Rates Act subsidy to stimulate and help the trucking industry. Have you any ideas on that?

Mr. Neary: Yes. As a matter of fact, that is one of our recommendations in the second brief. I will read you the section, if you like. I presumed that copies of the brief had been distributed to the members of the Committee.

[*Interpretation*]

mes? Comment faites-vous pour transporte les produits à partir de la route transcana dienne jusqu'aux voies ferroviaires? Ce son de petits camions?

M. Jones: Avec un chargement maximur de 74,000 livres, mais comme je le disais au paravant, il nous faut imposer des limites cause des ponts. Ces routes sont utilisées e nous voudrions les appeler des routes d toute saison, mais j'ai l'impression qu'elles n le sont pas. Normalement, on peut mainteni ces routes et les utiliser douze mois pa année.

M. Neary: Oui, bien sûr, le long du littora sud-ouest, il y a le service de cabotage d National-Canadien pour les personnes qui n sont pas desservies par les routes.

M. Rose: M. le président, je voudrais pose une question complémentaire. Je crois, quoi que vous ne l'ayez pas mentionné, qu'un de grands problèmes qui se présentent pou votre route principale et les routes d'alimenta tion, ce n'est pas tellement qu'elles handica pent le transport bien que cela soit impor tant—mais, seulement, vu qu'un bon nombr de gens à Terre-Neuve n'ont qu'un emplo temporaire et vont d'un emploi à un autre c qui à cette période de l'année nuit à leu mobilité: N'est-ce pas exact?

M. Jones: Oui, c'est juste.

M. Allmand: Et, cela les empêche de se ren dre aux emplois qui se trouvent dans le différentes régions productrices.

M. Jones: C'est en effet le cas, M. l président.

M. Rose: M. le président, je voudrai encore dire quelque chose.

Le président: Avez-vous fini?

M. Rose: J'ai terminé ma questio complémentaire.

Le président: Je vais ajouter votre nom à la liste.

M. Allmand: Certaines personnes ont pro posé de comprendre le camionnage pour le subventions en vertu de la Loi sur les taux de transport de marchandises dans les provin ces Maritimes, pour encourager et aider l'in dustrie. Avez-vous des idées à ce sujet?

M. Neary: En fait, il s'agit d'une de no recommandations dans le deuxième mémoire Je vais vous lire cette section, si vous le voulez.

Non, mais j'avais présumé que des copies du mémoire ont été distribuées aux membres du comité.

Texte]

Mr. Allmand: But you do recommend that ucking be included under MFRA.

Mr. Neary: What we said was that it is commended that for the Province of New-ndland no provision be made for the intro-ction of an extra-regional subsidy but that e present intra-regional subsidy be retained t only on railway shipments but extended shipments made by all other modes of nsportation.

Mr. Allmand: Very good. Thank you very ich.

The Chairman: Mr. Nesbitt.

Mr. Nesbitt: Mr. Jones, I was looking at the ap of Labrador in front of me and I see at e present time there is a road from the rail ad at Eskert into Churchill Falls. Is there y highway being planned from the rail ad to Churchill Falls?

Mr. Jones: There is a road, as you say, m Eskert to Churchill Falls at the moment. nderstand that is a privately owned rail-y. We have started a road from Churchill lls back towards Goose Airport and from ose Airport in towards Churchill Falls. We ve constructed a tote road there but there still a gap of about 50 or 60 miles in the ntre that has not been completed.

Mr. Nesbitt: I understand, though, it is der way. Will this be a paved road or a rd-surfaced road of some sort?

Mr. Jones: We would hope that eventually would be a hard surfaced road or paved, t at the moment it is only in the tote road ge.

Mr. Nesbitt: Is that road from Churchill lls to the rail head at Eskert in good shape does it need some additional work?

Mr. Jones: That road is owned by Brinco.

Mr. Nesbitt: Will that eventually become rt of the Government of Newfoundland's id system or will it remain as a private id?

Mr. Jones: I am afraid, sir, I cannot answer at question at this point because I really do t know.

The Chairman: A supplementary question, r. Thomas.

[*Interprétation*]

M. Allmand: Vous recommandez que les services de camionnage soient compris dans le MFRA?

M. Neary: Ce que nous avons dit, c'est qu'il est recommandé que pour Terre-Neuve aucune disposition ne soit prise pour accorder une autre subvention extra-régionale, mais que la présente subvention intra-régionale soit maintenue non seulement pour les expéditions par chemins de fer mais que cela s'applique aussi à tous les autres modes de transport.

M. Allmand: Très bien, merci beaucoup.

Le président: Monsieur Nesbitt?

M. Nesbitt: Monsieur Jones, je regardais la carte du Labrador devant moi et je vois qu'il y a actuellement une ligne de chemin de fer qui commence à Eskert et va jusqu'aux Chutes Churchill. Y a-t-il un projet d'autoroute de là jusqu'aux Chutes Churchill?

M. Jones: Il y a une route à l'heure actuelle de chemin de fer, entre Eskert et les Chutes Churchill. Si j'ai bien compris il s'agit d'un chemin de fer privé. Nous avons construit une route de transport mais il y a encore un écart de 50 à 60 milles au milieu qui n'a pas encore été terminée.

M. Nesbitt: Mais c'est en marche à l'heure actuelle, si j'ai bien compris? Mais, est-ce que ce sera une route bitumée ou une route revêche?

M. Jones: Nous avions cru qu'à la longue, ce serait pavé, mais, pour le moment, comme je l'ai dit, c'est une route de service.

M. Nesbitt: La route de Churchill Falls jusqu'à Eskert, est-elle bonne ou est-ce qu'elle aura besoin d'un entretien supplémentaire?

M. Jones: La route est la propriété de Brinco.

M. Nesbitt: Est-ce qu'à la longue cela deviendra partie du réseau routier du gouvernement de Terre-Neuve ou est-ce qu'elle restera une route privée.

M. Jones: Je regrette, je ne puis répondre à cette question pour le moment, je ne le sais vraiment pas.

Le président: Question supplémentaire, monsieur Thomas?

[*Text*]

Mr. Thomas (Moncton): Yes, Mr. Chairman. I would like to pursue Mr. Nesbitt's line of questioning but mine would be in connection with a highway link between Sept Iles and Wabush or Labrador City. I spent some time in that area and to the best of my knowledge the only way for a passenger getting into Sept Iles at present is by air. Am I correct in that?

Mr. Jones: There is a railway.

Mr. Thomas (Moncton): But is not the passenger service on the rail line very limited and very restricted because of it being mainly an ore-carrying train?

Mr. Jones: That is right, for moving freight.

Mr. Thomas (Moncton): It is not a daily passenger service, is it?

Mr. Vardy: Mr. Chairman, it is an accepted passenger service. It is limited but they do provide passenger service back and forth on the line.

Mr. Thomas (Moncton): My point is that it is limited. How limited is it? Is it a daily service or is there passenger service twice a week or three times a week?

Mr. Vardy: Frankly, I am not able to answer, but I think on each of the trains there are one or two passenger coaches depending upon the number of passengers.

Mr. Thomas (Moncton): I wonder, Mr. Chairman, if some of these gentlemen could supply the Committee with that information later. I would like to find out what the passenger service is between Sept Iles and Wabush. Also, have you given any thought to the necessity of a highway link? Would it help the development of that area if there were a road link between Sept Iles and Labrador City? I realize this would be an interprovincial matter and, therefore, of federal concern. To put in a highway link from Sept Iles to Wabush and Labrador City would be a matter of co-operation between Quebec, Newfoundland and the Government of Canada.

Mr. Vardy: Mr. Chairman, I am afraid I would have to answer that question simply by saying that any roads that we build in Newfoundland or in the Labrador section of Newfoundland and Labrador is bound to help the economy.

Mr. Thomas (Moncton): I was trying to get at the priority. Is there any particular priority or are there other roads that are possibly more urgent?

[*Interpretation*]

M. Thomas (Moncton): Oui, monsieur président. J'aimerais poursuivre un peu pensée de M. Nesbitt, mais je pense à un nouvelle route qui relie Sept-Îles et Wabus ou la ville de Labrador. J'ai passé un certai temps là-bas et, au mieux de ma connais sance, la seule façon de se rendre à Sept-Île à l'heure actuelle, est la voie aérienne. Ai-j raison?

M. Jones: Il y a un chemin de fer.

M. Thomas (Moncton): Mais la capacité de passagers, n'est-elle pas limitée parce qu' s'agit surtout d'un service pour le transpo pour le minerai?

M. Jones: C'est juste, pour le transport.

M. Thomas (Moncton): Ce n'est pas un ser vice du voyageurs quotidien?

M. Vardy: Monsieur le président, c'est u service de voyageurs régulier, d'une capacit limitée mais qui transporte des voyageur entre ces deux points.

M. Thomas (Moncton): Je pense que c'es limité. Jusqu'à quel point? Une fois par jou ou deux ou trois fois par semaine?

M. Vardy: Je ne saurais vous répondre mais je crois que sur chacun des trains, il y un ou deux wagons de passagers selon l nombre de voyageurs.

M. Thomas (Moncton): Je me demande monsieur le président, si ces messieurs pour raient fournir ces renseignements au Comit un peu plus tard? J'aimerais savoir quel es le service des voyageurs entre Sept-Îles e Wabush. Et, aussi, est-ce que vous avez song à la nécessité d'un lien routier? Est-ce qu cela serait utile au développement de l région, s'il y avait entre Sept-Îles et Wa bush et Labrador City une route? Je com prends qu'il s'agit d'une affaire interpro vinciale, car il s'agirait d'une collaboratio entre le Québec, Terre-Neuve et le Gouverne ment du Canada, afin d'assurer un lien rou tier entre Wabush, Sept-Îles et Labrador City.

M. Vardy: Monsieur le président, je devrai répondre à cette question simplement en disant que toutes routes que nous construi sons à Terre-Neuve ou dans le Labrador aide raient nécessairement l'économie.

M. Thomas (Moncton): J'essayais d'établi la priorité. Y a-t-il une priorité ou est-ce qu'i y a d'autres routes qui sont éventuellemen plus prioritaires?

'exte]

Mr. Vardy: In my personal opinion—and I n giving my personal opinion—I think that e highest priority in respect of roads in wfoundland is the upgrading of our trunk ad system.

The Chairman: Mr. Nesbitt.

Mr. Nesbitt: Yes, I have one or two more ief questions. How long is the road present- owned by Brinco which goes from Eskert the Churchill falls development—about 150 les or 140 miles perhaps?

Mr. Vardy: We show here it from Labrador y and Labrador City to Eskert is...

Mr. Nesbitt: I was referring to the route wn on the map here from Eskert to Chur- ll Falls which, as Mr. Jones mentioned, s owned by Brinco. How long would that d be?

Mr. Vardy: I believe it is somewhere in the inity of 125 miles approximately.

Mr. Nesbitt: And there are no plans to mediately take that road over by the gov- ment nor to give it a hard surface at the ment?

Mr. Jones: Not that I am aware of, Mr. airman.

Mr. Nesbitt: I have one other question. at mining resources have been found to e or are believed to be present in the tral part of Newfoundland proper? Are re any large potential resources of iron , for instance, or any other bulky ore in tral Newfoundland?

Mr. Vardy: Mr. Chairman, a number of estigations are going on at the present e and a number of concessions have been nted for ore exploration because of anom- s that have been discovered in the areas, whether there are substantial ore bodies ich will justify a major mine is uncertain the present time although the prospects very encouraging at this point.

Mr. Nesbitt: I am very glad to hear that. In event that commercially-operable mines e found in the main part of Newfound- l, which we all hope will be the case, t means will be used to remove the ore presumably, to transport it to the smel- in coastal areas? Do you plan to build ls or do you think railways might be of e value?

[Interprétation]

M. Vardy: A mon avis personnel, et c'est mon avis personnel que je donne, je crois que la plus grande priorité pour les routes à Terre-Neuve consiste dans l'amélioration de nos routes principales.

Le président: Monsieur Nesbitt?

M. Nesbitt: J'ai encore une ou deux autres questions très brèves. La route que vous avez mentionnée et qui est la propriété de Brinco à l'heure actuelle de Eshert à Churchill Falls, quelle distance y aurait-elle environ? 150 milles, 140 milles, peut-être?

M. Vardy: On montre ici qu'elle va de Labrador City à Eshert.

M. Nesbitt: Je parlais de la route sur la carte d'Eskert aux chutes Churchill qui, comme on l'avait dit est la propriété de Brinco; quelle serait la longueur de cette route?

M. Vardy: Environ 125 milles, je crois.

M. Nesbitt: On n'a pas l'intention que le gouvernement assume la responsabilité pour cette route, ni de la paver, n'est-ce pas?

M. Jones: Pas à ma connaissance, monsieur le président.

M. Nesbitt: J'ai une autre question. Est-ce que l'un des ministres pourrait nous donner une idée des ressources minières que l'on a trouvées jusqu'à date ou que l'on estime être présentes dans la partie centrale de Terre-Neuve? Est-ce qu'il y a possibilité de trouver de vastes ressources minières comme le fer, par exemple, le minerai dans la partie centrale de Terre-Neuve?

M. Vardy: Monsieur le président, il y a un certain nombre d'études qui se poursuivent à l'heure actuelle; un certain nombre de concessions ont été accordées pour le minerai de fer à cause des anomalies qui ont été découvertes dans ces régions. Mais ce n'est pas certain qu'on trouve suffisamment de minerai pour justifier la présence de plusieurs mines? Les perspectives sont très encourageantes à l'heure actuelle.

M. Nesbitt: Je suis heureux d'entendre dire cela. Mais au cas où l'on trouverait des mines que l'on pourrait exploiter commercialement dans cette partie centrale de Terre-Neuve, que nous espérons tous sera le cas, quels moyens est-ce qu'on employerait pour enlever le minerai pour le transporter vers les fonderies de la Côte. Est-ce que ce serait la grande route ou le chemin de fer? Avez-vous l'intention de construire des routes ou pensez-vous que les chemins de fer seraient plus indiqués?

[*Text*]

Mr. Neary: I worked for a mining company for 21 years, Mr. Nesbitt, on Bell Island, until the mine closed down, and we shipped our ore. So it would depend on where the mine is geographically located.

Mr. Nesbitt: Obviously, if it was very close to the coast it would be a very simple answer. But if these mines were located perhaps 40 or 60 miles inland what type of transport would be contemplated, roads or railway? I suppose it would depend on the terrain somewhat.

Mr. Neary: And the type of ore, I might add.

Mr. Nesbitt: Thank you, Mr. Chairman.

The Chairman: Mr. Breau. Mr. Trudel.

Mr. Trudel: Mr. Chairman, I would like to ask the Minister if it would be fair to say that the overall cost would be in the neighbourhood of $500 million?

Mr. Neary: Yes.

Mr. Trudel: How many years do you feel would be required to bring your secondary roads system to the standards that you require?

Mr. Neary: Without presuming what the Minister of Highways is thinking I would say the number one priority should be on trunk roads. We would expect from about three to five years, Mr. Jones, as a reasonable period to complete the trunk roads?

Mr. Jones: Well, Mr. Chairman, I think we would be quite happy if we could get our trunk roads upgraded and paved in 10 years.

Mr. Trudel: Therefore, you would have to add to this sum another $200 million for upkeep other than for the building costs during that same period of time?

Mr. Jones: That is so.

Mr. Trudel: Could you tell me, Mr. Minister...

Mr. Neary: I beg your pardon, sir, but I will give you a long-range answer to your question. We would like to see the whole program completed in 15 to 20 years.

Mr. Trudel: In other words, it would be physically possible providing you had the means to do it within five years but you feel that 10 years would be a realistic outlook.

Mr. Neary: Phase two—the road from Eastern Labrador to Western Labrador with a

[*Interpretation*]

M. Neary: J'ai travaillé pour une compa gnie minière pendant 21 ans, M. Nesbitt, nous avions l'habitude d'expédier nos propre minerais. Mais cela dépend tout d'abord de l situation géographique de la mine.

M. Nesbitt: Si elles se trouvaient près de l Côte la réponse serait facile. Mais si les mine sont à 40 ou 60 milles à l'intérieur, je m demande quel mode de transport on envisage rait: la route ou les chemins de fer? Tou dépend du terrain, j'imagine.

M. Neary: Et le genre de minerai que l'o trouve, je dirais.

M. Nesbitt: Je vous remercie, monsieur l président.

Le président: Monsieur Breau? Monsieu Trudel?

M. Trudel: Monsieur le président, je vou drais demander s'il est juste de dire que l coût d'ensemble serait de 500 millions d dollars?

M. Neary: Oui.

M. Trudel: Combien d'années seraien nécessaires pour que les routes secondaire soient au niveau exigé?

M. Neary: Sans présumer de ce que pens le ministre de la Voirie, je dirais que la plu grande priorité devrait être donnée aux ligne principales. Cela devrait prendre de trois cinq ans pour terminer les routes principales?

M. Jones: Je crois que nous serions peut être heureux si nous pouvons améliorer e paver nos routes principales dans l'espace d dix ans.

M. Trudel: Il faudrait alors ajouter l somme de 200 millions de dollars pour l'en tretien à part la construction au cours d cette même période de temps.

M. Jones: C'est exact.

M. Trudel: Pourriez-vous me dire, mon sieur le ministre...

M. Neary: Je m'excuse, mais pour vou donner une réponse à long terme, nous vou drions que le programme complet soit ter miné dans 15 ou 20 ans.

M. Trudel: Par conséquent, ce serait possi ble physiquement, à condition d'avoir le moyens de le faire dans 5 ans, mais vou estimez que 10 ans seraient préférables.

M. Neary: La Phase II—la route qui va d l'est à l'ouest du Labrador avec un tunne

[*Texte*]

nnel across the Straits of Belle Isle—in 15 20 years. That would be the second phase.

Mr. Trudel: Of the over-all plan. In the last e-or ten-year period, possibly, could you l us how much money has been spent on ghways in the province in any one year—st to give us an idea of comparable figures, ease.

Mr. Jones: Mr. Chairman, I had hoped to ve that figure contained in one of the tab-. I cannot give you that figure off the top my head but I can certainly have the formation available for your Committee.

Mr. Trudel: Mr. Chairman, would it be ssible then to have this sent to the Commit- to be included in our *Minutes of oceedings*?

The Chairman: Is it agreed?

Some hon. Members: Agreed.

Mr. Rock: Mr. Minister, you mentioned fore, which I think is of great interest to Committee, the tunnel between Labrador d Newfoundland. Have you made a feasi-ity study of building the tunnel there? at would be the cost? I would like to get cost.

Mr. Neary: We do not have a detailed cost alysis at this particular time.

Mr. Rock: But you are thinking of a tunnel her than a causeway?

Mr. Neary: Yes.

Mr. Rock: You have looked into this, possi- not very thoroughly, but you have looked o it?

Mr. Neary: Yes.

Mr. Rock: Thank you.

Mr. McGrath: A supplementary, Mr. Chair-n. Has the government commissioned a dy of the tunnel? I was of the opinion that re was a very comprehensive study in stence.

Mr. Jones: No, Mr. Chairman, I am afraid . It is a little outside the ambit of the partment of Highways but it is my under-nding that any study that was made was a mparative study as to the difference tween the cost of building a tunnel which uld carry a power cable under the Straits Belle Isle and the extension of this tunnel make it large enough to carry the cable

[*Interprétation*]

sous le détroit de Belle Isle, 15 ou 20 ans, ensuite. Ce serait la seconde phase.

M. Trudel: Du plan d'ensemble. Depuis 5 ans ou dix ans, pourriez-vous nous dire combien d'argent a été dépensé pour les grandes routes dans la province dans une année, afin de nous donner des chiffres comparatifs?

M. Jones: Monsieur le président, j'espérais que ce chiffre serait compris dans l'un des tableaux. Malheureusement, je ne puis vous donner ce chiffre immédiatement, de mémoire, mais je pourrais certainement obtenir le renseignement pour votre Comité.

M. Trudel: Serait-il possible alors que ces chiffres soient envoyés au Comité pour que nous puissions les inclure dans notre compte rendu?

Le président: D'accord?

Des voix: D'accord.

M. Rock: Monsieur le ministre, vous avez mentionné tout à l'heure, ce qui intéresse beaucoup le Comité, le tunnel entre le Labrador et Terre-Neuve. Avez-vous fait une étude sur la possibilité de construire le tunnel à cet endroit, et quel en serait le coût?

M. Neary: Non, nous n'avons pas une analyse détaillée du coût ou des frais de construction du tunnel à l'heure actuelle.

M. Rock: Mais vous songez à un tunnel plutôt qu'a une chaussée?

M. Neary: Oui.

M. Rock: Vous avez étudié cette possibilité, peut-être pas en détail, mais vous l'avez étudiée?

M. Neary: Oui.

M. Rock: Je vous remercie.

M. McGrath: Question supplémentaire. Est-ce que le gouvernement n'a pas demandé qu'on fasse une étude supplémentaire du tunnel? J'avais l'impression qu'on avait fait une étude détaillée à ce sujet.

M. Jones: Je regrette, mais si j'ai bien compris, toute étude qui a été faite était une étude comparative entre le coût de construction d'un tunnel ayant un câble pour le pouvoir hydro-électrique sous le détroit de Belle Isle et l'extension de ce tunnel pour y faire passer le câble et le trafic. Si c'est l'étude dont vous voulez parler, nous en avons une.

[*Text*]

plus traffic. If that is the study you are talking about, the answer is yes, we have one.

The Chairman: Mr. Rose.

Mr. Rose: Mr. Chairman, I was interested in the brief as much for what it did not say as for what it did say.

To give a brief preamble, in B..C, which is my province, the government is very much interested in increasing the railroads to remote areas and it comes to me as somewhat of a shock that the Government of Newfoundland as represented by your brief this morning is not more vigorous in pursuing this matter here. Could you comment on that, please?

Mr. Neary: The only comment that I can make is that our brief deals mainly with new items of transportation in Newfoundland. We feel that the old will take care of themselves and will be successful through the patronage that they get from passengers and from movement of freight.

Mr. Rose: I see. You are looking towards highway development as a form of unsubsidized transportaton. Is that so? You are suggesting—at least it came through to me that you were suggesting—that the railroad was an archaic form of transportation and that it was costing a good deal more than it perhaps brought in and that therefore it was a subsidized form of transportation. I took from that that you meant you felt highway development for various reasons would add more greatly to productivity or would be a form of unsubsidized transportation, except, of course, for the roadbeds.

An hon. Member: You are putting words in the Minister's mouth.

Mr. Jones: Mr. Chairman, in reply to an earlier question as to what I hoped Newfoundland would have in the next 20 years, I said I thought that what we would require would be a better trunk roads system, plus railways, plus an improved air transport service—all three.

Mr. Rose: I noticed also, sir, that you did not mention coastal shipping. Did you do this by design or is this not a big factor in Newfoundland?

Mr. Jones: Mr. Chairman, it is a big factor, especially on the southwest coast of Newfoundland from the Burin peninsula west; except for the bottom of Bay d'Espoir there is no road connection. During the past 10 years, for both the movement of passengers and for

[*Interpretation*]

Le président: Monsieur Rose.

M. Rose: J'étais intéressé à votre mémoir autant pour ce qu'il dit que pour ce qu'il n dit pas. En guise de préambule, en Colombie Britannique, ma province, le gouvernemer est très intéressé à développer les chemins d fer vers les régions éloignées, et je suis plutô surpris de voir que le gouvernement d Terre-Neuve ne fasse pas preuve de plus d vigueur à cet égard. Est-ce que vous pourrie commenter à ce sujet s'il vous plaît?

M. Neary: Notre mémoire traite surtout d nouveaux moyens de transport à Terre Neuve. Nous estimons que les anciens pour ront se débrouiller et ne réussiront que dan la mesure où ils seront employés par le voyageurs et pour le transport de marchandises.

M. Rose: En d'autres termes, vous considé rez le développement des routes comme étan un transport non subventionné. Est-ce cela En d'autres termes, si j'ai bien compris, vou avez suggéré que le chemin de fer étai archaïque comme mode de transport, que cel coûtait beaucoup plus cher que ce qu'on e retire et que, par conséquent, c'est un mod de transport subventionné. J'en ai donc con clu que vous estimiez que le développemen des grandes routes, pour diverses raisons ajouterait peut-être plus à la productivité e serait une forme de transport non subven tionné sauf naturellement les assises de l route.

Une voix: Vous mettez les mots dans l bouche du ministre.

M. Jones: Monsieur le président, en répons à une question qui a été posée tout à l'heur quant à ce que je pensais des perspectives de 20 ans à venir, j'ai dit que je pensais qu'i nous faudrait un meilleur réseau routier, fer roviaire et aérien.

M. Rose: J'ai remarqué que vous n'avez pa mentionné la navigation côtière. Est-ce qu vous l'avez fait exprès ou est-ce que cela n'es pas un facteur important à Terre-Neuve?

M. Jones: C'est un facteur important, sur tout sur la côte sud-ouest de Terre-Neuve, à partir de la péninsule de Burin en allant ver l'ouest. Sauf à partir du fond de la Baie d'Es poir, il n'y a vraiment pas de lien routier à cet endroit. Depuis dix ans, on a insisté sur

[Texte]

eight on the northwest and the northeast asts of Newfoundland, the emphasis has en going on road transport and coming off astal shipping. I think you will find, Mr. airman, that the figures from the CNR on e movement of coastal boats will bear me t on this point.

Mr. Neary: Mr. Chairman, if I may quote rectly from the brief regarding our recommendations on rail:

> It would appear to us that the extension of highways throughout the province will eliminate any need for services or additions to existing Canadian National Railway lines. Concentration here should be on extension of the movement already begun to provide improved warehousing and containerization facilities in the effort to lower the cost of the transportation of goods by this traditional and dependable means; (b) Following a careful survey of prime users of rail transportation facilities and the bearing on their business survival of the present Maritime freight rate subsidy, it is recommended that for the Province of Newfoundland no provision be made for the introduction of an extraregional subsidy but that the present intraregional subsidy be retained, not only on railway shipments but extended to shipments made by all other modes of transportation.

Mr. Rose: I see. You would like the MFRA apply to trucks within the region.

Mr. Neary: To water, air and highways.

Mr. Rose: And highways. Sir, does the vernment of Newfoundland have any poli- and any views on the passenger service? s seemed to be a big issue as we arrived— "Newfie Bullet", as it is described. Could comment on that, please?

Mr. Neary: Mr. Chairman, I understand particular matter is in the experimental ge at the moment. I personally have no ment to make on it except to say that ronage by the general public will decide issue.

[*Interprétation*]

tout sur le mouvement des voyageurs et des marchandises sur la côte nord-est et nord-ouest de Terre-Neuve. On insiste maintenant beaucoup plus sur le transport routier que sur la navigation côtière. Je crois que les chiffres du CN sur la navigation côtière confirmeront mes dires.

M. Neary: Monsieur le président, si vous me permettez de citer directement le mémoire au sujet de nos recommandations sur le service ferroviaire:

> Il nous semble que l'extension des routes à travers la province éliminera tout besoin de services ou d'additions aux lignes actuelles des Chemins de fer nationaux du Canada. Il nous faudrait avant tout nous concentrer sur le mouvement déjà commencé afin de fournir des services améliorés d'entreposage et de transport par cadres en vue d'abaisser les frais de transport des marchandises au moyen de ce moyen traditionnel et sûr;
> (b) A la suite d'un relevé détaillé des principaux usagers des services de transport ferroviaire et de l'effet sur la survie de leur entreprise des subsides actuels pour les taux de transport dans les provinces maritimes, il est recommandé que, pour la province de Terre-Neuve, on ne prenne pas de dispositions en vue de l'introduction d'une subvention extra-régionale, mais que la subvention intrarégionale actuelle demeure, non seulement pour le transport ferroviaire, mais qu'elle soit étendue à tous les autres moyens de transport.

M. Rose: Je vois. Vous aimeriez par conséquent que la Loi sur les taux de transport des marchandises dans les provinces Maritimes s'applique aussi aux camions à l'intérieur de la région.

M. Neary: Oui, au transport maritime, routier et aérien.

M. Rose: Est-ce que le gouvernement de la province de Terre-Neuve a une politique en ce qui concerne le service voyageurs? Cela semblait être une question très importante lors de notre arrivée—le «Newfie Bullet» comme on l'appelle. Pourriez-vous commenter un peu?

M. Neary: Si j'ai bien compris, monsieur le président, cette question particulière fait l'objet d'une expérience à l'heure actuelle. Personnellement, je n'ai pas de commentaire à formuler sauf que je puis dire que le grand public décidera de la question par son usage du service.

[*Text*]

Mr. McGrath: Mr. Chairman, may I ask a supplementary?

Mr. Chairman: Mr. McGrath.

Mr. McGrath: Does the Government of Newfoundland still maintain the position it took when it opposed the CN brief—at least made representations to the Canadian Transport Commission at the time the CN were appealing to abandon the rail passenger service? At that time the province felt that there should be an experimental period of three or four years. Is that still the position of the Government of Newfoundland?

Mr. Neary: Oh, I do not know. You would have to ask the government that.

Mr. McGrath: You represent the Government of Newfoundland.

Mr. Neary: Only in matters included in the brief.

Mr. Rose: I take it then, sir, that you feel that this matter is really still under review and that you have no particular views on the upgrading to attract more passengers or anything like that?

Mr. Neary: Well, I think I probably answered your questions as well as I can by stating that the people of Newfoundland will decide this issue by patronizing either the trains or the buses. It is just as simple as that.

Mr. Rose: Well, it would depend upon the quality of the service. I think you would have to agree with me there.

I would like to return in my final question to Mr. Horner's question because I really did not feel, sir, that you completely clarified your position on this. It is the matter of Confederation. Does the Newfoundland Government feel that the federal government has an obligation under the terms of Confederation to maintain the present transportation facilities, particularly as related to rail transportation?

Mr. Neary: A moral or legal obligation?

Mr. Rose: A legal obligation, and moral too if you like.

Mr. McGrath: According to the Government of Newfoundland that is a legal responsibility.

Mr. Rose: Let them answer.

Mr. McGrath: I am sorry. I am really supplementing.

[*Interpretation*]

M. McGrath: Est-ce que je pourrais pose une question supplémentaire?

Le président: Monsieur McGrath?

M. McGrath: Est-ce que le gouvernemer de Terre-Neuve garde toujours l'attitude qu'i avait lorsqu'il s'est opposé au mémoire d CN, ou du moins lorsqu'il a fait des représen tations auprès de la Commission canadienn des Transports lorsque le National-Canadien demandé la permission d'abandonner le ser vice voyageurs? Le gouvernement de Terre Neuve estimait qu'il devrait y avoir un période expérimentale de trois ou quatre ans Est-ce toujours l'attitude du gouvernement d Terre-Neuve?

M. Neary: Je ne sais pas, il faudrait qu vous demandiez au gouvernement.

M. McGrath: Est-ce que vous ne représen tez pas le gouvernement de Terre-Neuve?

M. Neary: En ce qui concerne les question posées dans le mémoire seulement.

M. Rose: En d'autres termes, vous ave l'impression que la question est à l'étude l'heure actuelle et que vous n'avez pas d'opi nion précise sur l'amélioration afin d'attire une plus grande clientèle, n'est-ce pas?

M. Neary: Je crois que j'ai probablemen répondu à votre question au mieux en disan que les gens de Terre-Neuve décideront d cette question, soit en employant les chemin de fer, soit employant l'autobus. C'est auss simple que cela.

M. Rose: Tout dépendra de la qualité d service. J'ai l'impression que vous êtes d'ac cord, n'est-ce pas?

J'aimerais maintenant revenir à une ques tion posée par M. Horner pour ma dernièr question. Je ne crois pas que vous ayez vrai ment éclairci la situation sur la question de l Confédération. Est-ce que le gouvernement d Terre-Neuve estime que le gouvernemen fédéral doit, en vertu de la constitution, doi maintenir les services actuels de transport, d transport ferroviaire en particulier?

M. Neary: Obligation morale ou légale?

M. Rose: Obligation légale et morale si vou le voulez.

M. McGrath: Selon le gouvernement d Terre-Neuve, c'est une obligation légale.

M. Rose: Laissez-les répondre eux-mêmes.

M. McGrath: Je m'excuse, c'était vraimen une question supplémentaire.

Texte]

Mr. Neary: I am afraid I do not have the erms of Union before me, but I can get em if you wish.

Mr. Horner: I was interested, Mr. Jones, in ur brief of February 1968 in which, at the ck in Table 1, you outlined the total cost of ading and construction of roads and the deral government's share. I wonder if you uld say whether there was any agreement at the federal government would contribute other than the Trans-Canada Highway on a ting basis towards the construction of aux- ary roads, or whatever you want to call em—feeder roads—to the Trans-Canada ghway.

Mr. Jones: Mr. Chairman, we use the term nk roads as all inclusive.

Mr. Horner: Trunk roads—that is the term as looking for.

Mr. Jones: It is outlined in our brief, Mr. airman, that there have been three agree- nts signed with the federal government ough the Atlantic Development Board. I nk in the body of the brief I have outlined work undertaken under these various eements.

Mr. Horner: In making those agreements h the federal government through the B, was there any recognition or any angement that if you got this assistance on nk road construction you would not be te so concerned with the maintenance of a lway line in the province?

Mr. Jones: To the best of my knowledge, . Chairman, the point never came up.

Mr. Horner: It never came up.

Mr. Jones: It was never discussed.

Mr. Horner: I was interested, Mr. Neary, in ir statement that patronage will decide ich is best—bus, I guess it is, or the pas- ger train on the railroad. Is the Newfound- d Government aware of what has hap- ed in other parts of Canada with regard to senger and CNR service? For years and rs it was deliberately downgraded by m to discourage its use.

The Chairman: Order, order, please.

Mr. Horner: What is your trouble, Mr. airman?

[*Interprétation*]

M. Neary: Je regrette, mais je n'ai pas les conditions de l'union devant moi, mais je pourrai toutefois les obtenir si vous le voulez.

M. Horner: Monsieur Jones, j'ai été intéressé par votre mémoire de février 1968 dans lequel, au verso du tableau premier, vous donnez le coût total du nivelage et de la construction des routes ainsi que la part du gouvernement fédéral. Pourriez-vous me dire s'il y a un accord pour que le gouvernement fédéral apporte une contribution permanente à la construction de routes autres que la route transcanadienne, routes auxiliaires ou secondaires jusqu'à la route transcanadienne.

M. Jones: Nous employons l'expression «routes principales» ce qui comprend toutes les routes.

M. Horner: Voilà le terme que je cherchais.

M. Jones Dans notre mémoire, nous mentionnons qu'il y a eu trois accords avec le gouvernement fédéral grâce à l'Office d'expansion économique de la région Atlantique, et je crois que, dans le mémoire, j'ai souligné le travail qui a été entrepris en vertu de ces trois accords.

M. Horner: En concluant les accords avec le gouvernement fédéral grâce à l'OEERA, est-ce qu'il y a eu reconnaissance ou arrangement pour que, si vous obteniez cette assistance pour la construction des routes principales, alors vous ne vous préoccuperiez pas tellement de l'entretien des lignes de chemin de fer dans la province?

M. Jones: Au meilleur de ma connaissance, la question n'a pas été discutée.

M. Horner: Jamais?

M. Jones: La question n'a jamais été soulevée.

M. Horner: J'ai été très intéressé par votre déclaration à l'effet que c'est la clientèle qui décidera si ce sera les autobus ou les chemins de fer qui seront employés. Est-ce que le gouvernement de Terre-Neuve est conscient de ce qui s'est passé ailleurs au Canada en ce qui concerne les services voyageurs? Pendant des années et des années, le service a été détérioré délibérément par le CN pour décourager les usagers.

Le président: A l'ordre, s'il vous plaît.

M. Horner: Qu'est-ce qu'il y a, monsieur le pésident?

[*Text*]

The Chairman: I was just calling for silence, Mr. Horner.

Mr. Horner: I said that in my opinion it had been deliberately downgraded by the operation.

An hon. Member: Right.

Mr. Horner: And certainly the CPR or CNR or NAR in Alberta or any other railroad can defend itself. They have all kinds of ability to do that and they can produce all kinds of figures to do that, Mr. Chairman.

I just ask the Newfoundland Government if they are aware—to please the hearts of those who are tender—that it could well be that this could be taking place, that a degrading of services could happen—unintentionally, of course—which would allow, with the implementation of brand-new buses in comparison to old rail coaches, that the buses might be more successful.

Mr. Neary: I do not know how to answer that question, Mr. Chairman. I do not think it requires an answer except to say that I hope the hon. gentleman, while he is in Newfoundland, will have the courage and the daring to include travel on the "Newfie Bullet" on his agenda, so perhaps he can draw his own conclusions.

Mr. Horner: Then you have no fear of one competitive service being neglected and the other polished spic and span in order to entice passengers—one way or the other? You have no fear that this could be handled in that manner?

Mr. Neary: I cannot speak for the CNR.

Mr. Horner: No, no, I want you to speak for yourself and the government, if possible. The government has no fear that this could even happen.

Mr. Neary: No fear that...

Mr. Horner: That one service, it does not matter which one it is, could be neglected and the other could be run as a spic and span affair. In other words, the government has no intention of deciding which is the best.

The Chairman: Order, gentlemen, please.

Mr. Neary: Mr. Chairman, the only way I can answer that question is to say that while we have honourable gentlemen like Mr. Carter and Mr. McGrath in Ottawa, and the CN comes under federal jurisdiction, I am sure these two honourable gentlemen will look after and protect our interests.

[*Interpretation*]

Le président: Je voulais tout simplement u peu de silence, monsieur Horner.

M. Horner: J'ai dit qu'à mon avis, on ava détérioré le service délibérément.

Une voix: C'est vrai.

M. Horner: Et que certainement le CN ou l CP ou le NAR en Alberta pourraient s défendre. Ils ont toutes les capacités voulue pour se défendre. Ils peuvent aussi fourni toutes sortes de chiffres à cette fin.

Mais j'ai simplement demandé si le gouver nement de Terre-Neuve est conscient—pou plaire à ceux qui ont le cœur tendre—que cel pourrait fort bien se produire, qu'une détério ration pourrait se produire sans que ce soi fait par exprès, évidemment, qui permettrai que les autobus aient plus de succès en rem plaçant les vieux wagons.

M. Neary: Je ne sais pas comment répondr à cette question, monsieur le président. Je n crois pas d'abord qu'elle exige une réponse sauf pour dire que, si j'ai bien compris, l'ho norable député, pendant qu'il est à Terre Neuve, aura le courage de voyager par l «Newfie Bullet». Il pourra alors peut-êtr tirer ses propres conclusions.

M. Horner: Et alors? Vous n'avez aucun crainte qu'un service concurrentiel soi négligé au profit d'un autre qui sera amélior pour justement attirer la clientèle. Vous n'ave aucun doute ou aucune crainte que cela s passe de cette façon?

M. Neary: Je ne peux pas parler au nom d CNR.

M. Horner: Non, non, mais je voudrais qu vous parliez en votre propre nom et au nom du gouvernement, si c'est possible, le gouver nement ne craint pas cela du tout.

M. Neary: Ne craint pas...?

M. Horner: Qu'un service, n'importe lequel soit négligé, et que l'autre ait un rendemen vraiment efficace. En d'autres termes, le gouvernement n'a aucunement l'intention de déci der lequel est le meilleur.

Le président: A l'ordre, s'il vous plaît.

M. Neary: Monsieur le président, la seule façon de répondre à cette question c'est que aussi longtemps que nous aurons d'honorables députés comme Messieurs McGrath et Carter à Ottawa, et que le CN relèvera de la compétence fédérale, je suis sûr que ces deux messieurs verront à protéger nos intérêts.

exte]

Mr. Horner: You are a very trusting pro-ncial government.

The Chairman: Order, please. Mr. Trudel a supplementary question.

Mr. Horner: His confidence is well placed.

The Chairman: Order, please.

Mr. Trudel: Mr. Chairman, I would certain-like to compliment the ministers on the nprehensive brief we have before us. wever, I would like to ask them a supple-ntary question with regard to this posed system of roads. Have you at any ne—and I think this should be particularly ected to the Minister of Highways—been touch with the Province of Quebec regard-a joining link to your system that we ve before us, because I think this is part l parcel of a second, if I may call it such, ns-Canada highway system.

Mr. Jones: Mr. Chairman, if the honourable ntleman was asking me if I, as Minister of ghways, have been in touch with Dr. otte, who is Minister of Transportation d Communications, between Newfoundland, brador and Quebec, the answer is no.

Mr. Trudel: Because there is exactly the ne kind of pressure on the other side in ing to join into your system. This is why I ed the question. Thank you, Mr. airman.

The Chairman: Mr. Skoberg.

Mr. Skoberg: Mr. Chairman and gentlemen, h respect to the network of highways that have particularly referred to in your ef, does your highway serve the various mmunities that are now serviced by the rail ilities?

Mr. Jones: Mr. Chairman, there are literal-hundreds of settlements in Newfoundland t are now served by highways that never the railway train. If you would refer to r map, the railway line goes across the vince of Newfoundland from St. John's to t aux Basques through the centre of the nd. There is a branch line which goes to Bonavista Peninsula, there is branch line the Argentia Peninsula and there is a fur-r branch line from Notre Dame Junction to Lewisporte in Green Bay. The great jority of our people live on the Avalon-insula but the balance of our population scattered over a very, very long coastline,

[*Interprétation*]

M. Horner: Vous avez beaucoup confiance au gouvernement provincial.

Le président: A l'ordre, s'il vous plaît. M. Trudel, une autre question.

M. Horner: Sa confiance est bien placée.

Le président: A l'ordre, je vous prie.

M. Trudel: Monsieur le président, je désire féliciter le ministre pour le mémoire qu'il nous a présenté. Je voudrais toutefois poser une autre question aux rédacteurs, relativement au réseau routier envisagé. Est-ce que, à un moment donné, et je vais poser la question directement au ministre de la Voirie, vous avez été en contact avec le gouvernement de la province de Québec pour relier le réseau routier au réseau que vous venez de nous présenter, parce que cela fait partie, disons, d'une deuxième route transcanadienne.

M. Jones: Monsieur le président, si un député me demandait si, en tant que ministre de la Voirie, j'ai été en rapport avec le docteur Lizotte qui est le ministre des Transports et des Communications de la province de Québec au sujet de la route entre le Québec, le Labrador, et Terre-Neuve, à cela, je répondrais non.

M. Trudel: Parce qu'il y a, monsieur le président, les mêmes pressions qui s'exercent de l'autre côté, pour nous relier à votre réseau routier. C'est la raison pour laquelle j'ai posé la question. Merci beaucoup, monsieur le président.

Le président: Monsieur Skoberg.

M. Skoberg: Monsieur le président, messieurs, en ce qui concerne le réseau routier dont vous parlez en particulier dans votre mémoire, est-ce que vos routes desservent les différentes collectivités desservies actuellement par les services ferroviaires?

M. Jones: Monsieur le président, il y a environ des centaines de lotissements à Terre-Neuve qui sont desservis par des routes et qui n'ont jamais connu de services ferroviaires. Si vous vous reportez à votre carte, vous remarquez que la ligne des chemins de fer traverse Terre-Neuve de Saint-Jean à Port aux Basques par le centre de l'île. Il y a une ligne d'embranchement vers la péninsule de Bonavista, une autre vers la péninsule d'Argentia et une autre de la jonction Notre-Dame à Lewisporte dans la Baie Verte. La majorité des gens habitent la péninsule d'Avalon, mais le reste de la population est éparpillé le long de la côte, sur une grande dis-

[*Text*]

and heretofore they depended on the coastal boats for transport.

We in Newfoundland are very proud of our record over the past twenty years of breaking down the isolation at these outports, as they are called, and today there are very few people living in Newfoundland who do not have a road connection of sorts.

Mr. Skoberg: Sir, I believe you will find that many communities are built up along the rail line link and what bothers me, with the proposed elimination of the passenger service, is that these communities will not be serviced.

Mr. Jones: Perhaps I should go back into the history of the railway and the roads in Newfoundland, Mr. Chairman. There are several trunk roads in Newfoundland that were originally built to act as feeder roads from the railway which runs across Newfoundland to these various communities and on the peninsulas. At the present time we have three or four large centres of population on our railway. We have Gander, the crossroads of the world, and we have Deer Lake, which is the centre of power development for Corner Brook and Port aux Basques, as well as Grand Falls. Apart from these places there has been no large scale development of population along our railway track mainly because, I would say, the greater part of its route goes through wilderness and very barren country, and down through the years our people have been basically fishermen and there was no inducement for them to leave in order to settle along the railway. They made their living off the sea.

Mr. Skoberg: Did the government make official representation before the Board of Transport Commissioners of Canada at the time the application for abandonment was before the Board?

Mr. Neary: Not to my knowledge.

Mr. Skoberg: They made no official representation?

Mr. Neary: I do not know.

Mr. Skoberg: Could you obtain the answer to that? I would appreciate knowing.

The Chairman: Order, please. He asked the gentleman a question and I think it is up to him to answer it. Mr. Skoberg, are you finished?

Mr. Skoberg: That is fine. Thank you.

[*Interpretation*]

tance. Autrefois, ils devaient compter pour transport sur le système de cabotage.

Nous sommes fiers des réalisations accor plies à Terre-Neuve au cours des vingt de nières années. C'est que nous avons pu mett fin à l'isolement de ces ports de partanc comme on les appelle. Et, à l'heure actuelle, y a très peu de personnes qui ne sont p reliées par la route.

M. Skoberg: Vous remarquerez, je cro que la plupart des collectivités sont agglom rées le long des voies ferroviaires. Mais, qui m'inquiète, c'est qu'avec le projet de fai disparaître le service voyageurs, ces collect vités ne seront plus desservies par ce servic

M. Jones: Je pourrais peut-être faire u retour en arrière historique des chemins d fer et des routes à Terre-Neuve, monsieur président. Bon nombre des routes principal de Terre-Neuve furent tout d'abord aménagé comme embranchements des chemins de f qui traversent la province, jusqu'à ces diff rentes collectivités, et sur les péninsules. E ce moment, nous avons trois ou quatre grand centres de population sur le parcours du ch min de fer. Il y a Gander, le faubourg d monde, Deer Lake, qui est le centre de dév loppement de Corner Brook, Port aux Ba ques et aussi Grand Falls.

En plus de ces centres, la population n s'est pas développée sur une grande échell le long des voies ferrées. Principalement, e raison du fait qu'une grande partie du pa cours traverse des régions sauvages et l brousse. Notre population a fondamentale ment toujours été une population de pêcheur et elle n'était pas vraiment portée à quitter l mer pour s'établir le long de la voie ferrée.

M. Skoberg: Est-ce que le gouvernement déjà fait des instances à la Commission de transports du Canada, alors que la Commis sion était saisie de la question?

M. Neary: Pas à ma connaissance.

M. Skoberg: Ils n'ont pas fait d'instance qui soient officielles?

M. Neary: Je n'en sais rien.

M. Skoberg: Pourriez-vous en obtenir l réponse? Je l'apprécierais beaucoup.

Le président: A l'ordre, s'il vous plaît. On a posé une question au témoin, et je pense que c'est au témoin à répondre. Monsieur Sko berg, avez-vous terminé?

M. Skoberg: J'ai terminé. Merci.

exte]

The Chairman: Any other questions, gentlen? Mr. Portelance.

Mr. Portelance: According to this map, Mr. ary, there are three main airports in Newndland, St. John's, Gander and Stephenle. Is that right? There is also one at Goose y. Did you consider service between these ports? Would that be of any help to...

Mr. Neary: Yes. I am glad the hon. gentlen raised that point, Mr. Chairman, because e of our recommendations is for additional ding strips in Newfoundland. I think if u refer to Appendix B you will see the ation of new landing strips at Winterland, rbour Breton, Burgeo, Port aux Basques, ringdale, Baie Verte and Flower's Cove. we agree there may be a need in the ure for intercommunity travel by air.

Mr. Portelance: Has any company proached you on that basis? We heard this ek in New Brunswick, for example, that a mmuter or feeder service was offered that ght solve the problem there.

Mr. Neary: Since I became Minister of nsportation for the province I have eived one or two inquiries. I do not know at happened before that, perhaps Mr. rdy could tell us, but I did have one or o inquiries from people who wanted to rate an intercommunity air service on a cemeal basis.

The Chairman: Mr. Nesbitt.

Mr. Nesbitt: My questions are much the ne as those of Mr. Portelance. I just have additional question. Are there any regionarriers, other than Eastern Provincial Airys, (1963) Limited that presently provide r services in either Newfoundland or rador?

Mr. Neary: From the mainland side there is ebecair and one or two others. I do not member their names. There are none from wfoundland or Labrador.

Mr. Nesbitt: Are there any carriers other n Eastern Provincial that operate within principal part of Newfoundland—in other rds, the island.

Mr. Neary: Just air carriers for the purpose carrying mail, and that sort of thing.

[*Interprétation*]

Le président: Messieurs, avez-vous d'autres questions à poser? Monsieur Portelance.

M. Portelance: Monsieur le président, suivant cette carte, il y a trois aéroports principaux à Terre-Neuve, Saint-Jean, Gander et Stephenville. Est-ce juste? Et aussi un autre à Goose Bay. Avez-vous songé à inaugurer un service entre ces aéroports? Est-ce que cela pourrait aider ..

M. Neary: Oui. Je suis heureux que l'honorable député soulève cette question, monsieur le président, parce que dans les recommandations que nous avons formulées, nous demandons d'autres pistes d'atterrissage à Terre-Neuve. Et, je pense que si vous voulez vous reporter à l'Appendice B vous verrez l'emplacement des nouvelles pistes d'atterrissage: Winterland, Harbour Breton, Burgeo, Port-aux-Basques, Springdale, Baie Verte, et Flower's Cove. Donc, il se peut que le besoin se fasse sentir à l'avenir de voyager d'une ville à l'autre par avion.

M. Portelance: Y a-t-il des sociétés qui ont déjà fait des instances à cet égard? Cette semaine, au Nouveau-Brunswick, par exemple, nous avons entendu dire qu'on a offert un service d'abonné ou d'embranchement qui pourrait résoudre le problème.

M. Neary: Depuis que je suis ministre des Transports de la province, j'ai reçu une ou deux demandes. Je ne sais pas au juste, ce qui s'est passé avant mais monsieur Vardy pourrait peut-être nous le dire, mais j'ai reçu une ou deux demandes de personnes qui désiraient exploiter un service aérien interurbain suivant la demande.

Le président: Monsieur Nesbitt.

M. Nesbitt: Ma question est à peu près analogue à celle de monsieur Portelance. J'aurais une autre question à poser. Est-ce qu'il y a des transporteurs régionaux autres que «Eastern Provincial Airways» (1963) Limited qui, en ce moment, assurent des services, soit à Terre-Neuve soit au Labrador?

M. Neary: Du continent, il y a Quebecair et un ou deux autres dont j'oublie les noms. Ils ne viennent pas de Terre-Neuve, ni du Labrador.

M. Nesbitt: Est-ce qu'il y a d'autres transporteurs à part *«Eastern Provincial»* qui exploitent un service dans la partie principale de Terre-Neuve? En d'autres mots, l'île.

M. Neary: Simplement des transporteurs qui transportent du courrier et ce genre de choses.

[*Text*]

Mr. Nesbitt: They are called third-line carriers.

Mr. Neary: That is right.

Mr. Nesbitt: But there is no other regional one like Eastern Provincial.

Mr. Neary: No, there is not. That is correct.

Mr. Nesbitt: You perhaps look forward to the expansion of this service, as you indicated to Mr. Portelance.

Mr. Neary: Yes.

The Chairman: Mr. Nowlan.

Mr. Nowlan: Mr. Chairman, I have a question to ask Mr. Neary which is along the lines of Mr. Skoberg's questions about the abandonment of the railway in favour of the Trans-Canada Highway. I appreciate, as I think Mr. Jones mentioned, that the major centres of population were on the railway line but is it not correct that there are settlements that are based along the railway that with the elimination of the railway now have no access to the Trans-Canada Highway?

Mr. Neary: I guess it would be fair to say that there are probably some.

Mr. Nowlan: Without going into all the pros and cons of roads versus rail, I agree with what Mr. Rose said, that your brief is as interesting for what it left out as for what it included, but since roads were mentioned I am surprised, because this was a national undertaking and the Canadian National Railways were involved, that regardless of what the government feels about rail versus bus travel and patronage by the public, which Mr. Neary referred to, that some effort has not been made to try to get federal assistance for those settlements that depend on rail for access to join with the Trans-Canada Highway which almost parallels a good part of the railway, as the map shows.

Mr. Neary: I think you will find that we are doing that very thing and probably the Minister of Highways can verify this.

Mr. Nowlan: But as a priority?

Mr. Jones: Mr. Chairman, I am trying to think of any community in Newfoundland at

[*Interpretation*]

M. Nesbitt: On les appelle transporteurs troisième ligne?

M. Neary: C'est juste.

M. Nesbitt: Mais il n'y a pas d'autres tran porteurs régionaux qui soient semblables à «Eastern Provincial».

M. Neary: Non, c'est juste.

M. Nesbitt: J'imagine que vous attend peut-être avec impatience l'expansion de service, comme vous l'avez indiqué à mo sieur Portelance?

M. Neary: Oui.

Le président: Monsieur Nowlan.

M. Nowlan: Monsieur le président, je vou drais poser une question à M. Neary dans l ligne de pensée de la question de M. Skober au sujet de l'abandon du service ferroviair en faveur de la route transcanadienne. Je m rends compte, et je pense que M. Jones l mentionné, que les principaux centres d population existaient le long de la voie ferré mais n'est-il pas juste de dire qu'il y a de établissements le long de la voie ferrée qu avec la disparition de ce service, n'ont plu accès à la route transcanadienne?

M. Neary: Oui, ce serait juste de dire qu' y en a probablement quelques-uns.

M. Nowlan: Sans tenir compte du pour e du contre des routes à comparer au rail, j me joins aux propos de M. Rose voulan que votre mémoire est intéressant autan pour ce qui n'est pas dit que pour ce qu y est présenté. Mais, étant donné que l'o a mentionné les routes, je suis étonné du fai qu'il s'agissait d'une entreprise d'envergur nationale et que les chemins de fer Nationau du Canada y étaient impliqués et qu'en dépi de ce que le gouvernement pensait du pro blème qui oppose les voyages par chemin d fer et par autobus, et du fait qu'il soi patronné par le public auquel M. Neary nou a référé, des efforts n'aient pas été faits pou obtenir l'aide fédérale pour ces établisse ments qui dépendaient du service ferroviair pour avoir accès et pour être reliés à la rout transcanadienne qui est en grande partie pa rallèle à la voie ferrée, comme l'indique l carte.

M. Neary: Je crois que vous trouverez que nous le faisons, et le ministre de la Voirie pourra le vérifier.

M. Nowlan: En tant que priorité?

M. Jones: Monsieur le président, j'essaie de penser à une collectivité de Terre-Neuve qui

xte]

present time that is connected with the way that cannot be connected with the hway and, quite frankly, there are two t come readily to mind. One is Winterton ction, where we completed a road a little r a year ago. Another is Howley, where have a road and bridge under struction.

Ir. Nowlan: To my mind the Minister has wered part of the question, that two comnities that were not connected...

Ir. Jones: These are two, Mr. Chairman, come readily to mind. There may be er isolated cases that I just cannot think of he moment.

Ir. Nowlan: But obviously there is not a concentration of people that they come ily to mind. Is it fair to say that?

Ir. Jones: These are two relatively small munities.

Ir. Nowlan: But other than that, any conration of people does have a connection the Trans-Canada Highway. That anrs that part of...

Ir. Jones: From Cape Norman to Cape e.

Ir. Nowlan: That answers that part of my stion. I was interested in what the Minishad to say about plans involving roads, rail air. In regard to the latter, Mr. Chairn, I wonder if any consideration has been n by the government to a study on the ibility of helicopter service in Newfoundl in order to get speedy pick-up and deliv of freight and/or people. Has there been study of the feasibility of this? Good ious, if they can fight a war in Viet Nam move whole divisions in hours, I think are way behind the boat in the Atlantic in not at least trying to study the feasiy of our isolated areas being covered by a copter service. Has any thought been n to that?

r. Neary: There has not been a feasibility y as such, but we do use helicopters nsively in Newfoundland for the move t of freight and people, particularly in rgencies.

r. Nowlan: I only caught the tail end of ut this morning on the radio—evidently er one of the ferry services or the coastal ices are being phased out—some gentle was protesting the abruptness of the e. Perhaps in some ways outports are like settlements in Viet Nam, and there has not

[*Interprétation*]

est présentement à la voie ferrée qui ne peut pas être rattachée à la route transcanadienne, et, à vrai dire, deux me sont aussitôt venues à l'esprit, soit Winterton Junction, où il y a à peine un peu plus d'un an nous avons terminé une route. L'autre, c'est Howley où il y a une route et un pont en construction.

M. Nowlan: D'après moi, le ministre n'a répondu qu'à une partie de ma question. Les deux collectivités qui n'étaient pas reliées...

M. Jones: Ce sont les deux qui me viennent à l'esprit. Il se peut qu'il y ait d'autres cas isolés auxquels je ne puis songer en ce moment.

M. Nowlan: Mais il n'y a évidemment pas une telle concentration de gens qui viennent tout de suite à l'esprit.

M. Jones: Ce sont deux collectivités assez petites.

M. Nowlan: Et, en plus de cela, toute concentration démographique est rattachée à la route transcanadienne. Ceci répond à cette partie..

M. Jones: De Cape Norman à Cape Race.

M. Nowlan: Ceci répond à cette partie de ma question. Je suis intéressé à ce que le ministre voulait dire tantôt au sujet des projets relatifs aux routes, aux chemins de fer et l'air. Pour ce qui est de ce dernier service, monsieur le président, est-ce que le gouvernement a songé à faire une étude sur la possibilité d'offrir un service hélicoptère à Terre-Neuve, capable d'assurer le transport rapide des personnes et des marchandises? Est-ce qu'on a étudié cette possibilité? Bonté divine! Quand on pense qu'ils peuvent, pendant la guerre au Vietnam, déplacer des divisions entières en quelques heures, je crois que nous, dans la région Atlantique, nous sommes loin derrière en n'essayant pas d'étudier la possibilité doffrir un service hélicoptère dans ces coins isolés. Y a-t-on songé?

M. Neary: On n'a pas fait une telle étude, mais nous utilisons beaucoup les services hélicoptères pour le transport des personnes et des marchandises, surtout en cas d'urgence.

M. Nowlan: Ce matin, à la radio, je n'ai entendu que la fin du bulletin de nouvelles, mais il semble bien qu'un des services de transbordeurs ou des services côtiers disparaîtraient peu à peu. Quelqu'un protestait à la radio contre la rapidité de ce changement. D'une certaine manière, les ports de partance

[*Text*]

been a feasibility study made to try to give freight and passenger service to replace the declining coastal service. The coastal service is declining, is it not?

Mr. Jones: Is the hon. gentleman suggesting we study the feasibility of helicopters in preference to an upgrading of our truck road system, Mr. Chairman?

Mr. Nowlan: I am not suggesting it in preference, I am suggesting as a beginning a study on the feasibility of using helicopters. I suggest that the expenditure of $500 million in Newfoundland and $850 million in Nova Scotia, two of the Atlantic provinces that had come forward at this Committee with a brief primarily on railroads, involves over a billion dollars. Is that feasible to a federal taxpayer when we do not even start to explore other modes of transportation? Frankly, I feel that perhaps the Atlantic premiers and the Atlantic governments have been a little slow in co-ordinating efforts in transportation and in exploring different modes of transportation. Perhaps the rail is going. Perhaps the steamship is going. What is the alternative? Someone mentioned the jumbo jet. That is too sophisticated. I do not suppose Newfoundland jumbo jets would be too well patronized by the public, but perhaps a helicopter service run by the government might be the answer.

Mr. Jones: Mr. Chairman, if I may again quote from the brief to answer the hon. gentleman's question. We agree that we must get the best value for the tax dollar, and this is what we say in the brief:

> The present trend towards resettlement in Newfoundland will continue with the movement of population to growth areas in response to the economic and social attractions of such. Concentration must be on the provision of firm links—road, rail, water and air—between these centres.
>
> This will mean the most economical use of the tax dollar in meeting the principal needs of both the businessman and the individual citizen throughout the province.

So I think you are thinking along the same lines as we were when we wrote this in the brief.

[*Interpretation*]

sont comme des établissements du Vietna mais il n'y a pas eu d'étude faite pour essay d'offrir un service-voyageurs ou de messag ries pour remplacer le service côtier qui din nue, n'est-ce pas?

M. Jones: Est-ce que vous proposez q nous étudiions la possibilité d'utiliser les hé coptères plutôt que de promouvoir le systèn de routes principales, monsieur le président?

M. Nowlan: Je ne parle pas de préférenc Mais je propose tout d'abord, que l'on fas une étude sur la possibilité d'utiliser des hé coptères. Disons que 500 millions de dollars Terre-Neuve et 850 millions de dollars à Nouvelle-Écosse, deux des provinces de l'A lantique qui sont venues devant ce Comit dont le mémoire basé principalement sur l chemins de fer implique plus d'un milliard dollars. Est-ce possible pour le contribuab canadien quand on ne commence pas p chercher à connaître les autres modes transport? Mais, je suis d'avis que les gouve nements de l'Atlantique, de même que leu premier ministre, n'ont peut-être pas a assez rapidement pour coordonner leu efforts dans le domaine du service du tran port, pour voir les possibilités des différen modes de transport. Le rail disparaît peu être, de même que le navire à vapeur! Quel en est la solution?

Quelqu'un a parlé de jet jumbo. C'est u peu trop exagéré mais je ne crois pas que public de Terre-Neuve approuvera ces je jumbo mais un service hélicoptère assuré p le gouvernement serait peut-être la réponse nos problèmes.

M. Jones: Eh bien, monsieur le présiden permettez-moi encore une fois de citer l mémoire pour répondre à la question d l'honorable député. Nous convenons qu'il nou faut donner le plus de valeur au dollar d contribuable. Nous disons, dans le mémoir que:

> La tendance actuelle vers le re-lotisse ment de Terre-Neuve se poursuivra ave le déplacement de la population vers le centres de croissance à la suite de attraits économiques et sociaux comm tels. La concentration doit se faire e vertu d'un lien ferme entre le sol, la terre l'eau et l'air, entre ces différents centres Ce qui entraîne l'utilisation la plus écono mique du dollar des contribuables et ré pond mieux aux besoins de l'homm d'affaires et des citoyens de la province.

Donc, je pense que votre ligne de pensée est à peu près la même que la nôtre qui a rég la rédaction de ce mémoire.

exte]

Mr. Nowlan: Your comment, Mr. Neary, m your definition of government policy to defined by patronage by the public, which really do not think is what you really ant, but you stated it, that certainly in the d program of $500 millions of dollars you not be following any great patronage by public in the development of that system, t the government has taken some leader- o and is developing the roads. I do not nk the government can always rely on ronage by the public to define its policy, t is all. Can you show us any interest by public to back up the road program pre- ted by the Minister?

Mr. Neary: Well, we do, Mr. Chairman. We bably are following in Mr. Trudeau's foot- os because we are setting the patterns of ticipatory democracy right across Canada l we...

Mr. Nowlan: What participatory democracy e you had in the 500 millions of dollars oads built in the exterior?

Mr. Neary: We do a tremendous amount of earch and polling of industries in com- nities to find out the movement of people so forth. As the Minister, Mr. Jones, nted out, priority should be given our th roads program because we already have e roads but they have to be brought up to ndards.

he Chairman: A supplementary question, Horner.

Mr. Horner: Mr. Neary, I wonder if you e got before you your brief of March 7, 3. On page 511, at the right-hand corner say,

> ...There is no doubt that over the years the Canadian National Railway has followed a policy of gradually withdrawing services when and where a road link was provided.

u go on to suggest that this has been a t saving to the federal government and dded burden to the provinces. You do not gest there in any way that there has been participatory democracy on behalf of the ple. You acknowledge the fact that the adian railroad has followed a policy of dually withdrawing its services.

his Committee has just toured the Mari- es, and we have found that the people e believe that the Maritime Freight Rates

[*Interprétation*]

M. Nowlan: Monsieur Neary, d'après la définition que vous donnez de la ligne de conduite du gouvernement, qui devrait être définie par le patronage du public, qui, je ne crois pas vraiment que ce soit ce que vous vouliez dire, mais, vous avez dit, qu'avec un programme de routes de 500 millions de dollars, vous ne pouvez pas compter sur un grand encouragement du public, et le gouvernement a pris certaines initiatives et est en train d'aménager des routes. Je ne crois pas que le gouvernement puisse toujours compter sur l'encouragement du public pour définir sa politique, c'est tout. Est-ce que vous pouvez nous montrer que le public est intéressé à appuyer le programme présenté par le ministre.

M. Neary: C'est ce que nous faisons, monsieur le président. Nous suivons sans doute les traces de monsieur Trudeau, car nous instaurons les modèles d'une démocratie de participation à travers le pays et nous . . .

M. Nowlan: Alors, quelle démocratie de participation aviez-vous eue dans ce programme de 500 millions de dollars destiné à l'aménagement de routes à l'extérieur?

M. Neary: Nous faisons beaucoup de recherches auprès des industries dans les collectivités pour étudier le mouvement de la population et ainsi de suite. Et comme monsieur Jones l'a signalé, on devrait accorder la priorité au programme de routes principales du sud: les routes sont déjà là, mais elles doivent être améliorées pour répondre à la norme.

Le président: Question complémentaire? Monsieur Horner?

M. Horner: Une question complémentaire. Monsieur Neary, est-ce que vous avez devant vous votre mémoire daté du 7 mars 1968? A la page 511, à droite, vous dites:

> Il ne fait pas de doute qu'avec le temps, le National-Canadien a suivi une politique consistant graduellement à retirer les services lorsqu'un tronçon routier était aménagé.

Ensuite, vous dites que cela a entraîné des épargnes considérables au gouvernement fédéral, mais un fardeau financier supplémentaire pour les provinces. Vous ne dites pas du tout en aucune manière qu'il y a démocratie de participation au nom de la population. Vous reconnaissez le fait que les chemins de fer canadiens ont suivi une ligne de conduite visant à retirer à peu ces services.

Ce comité vient de visiter les Maritimes et nous avons trouvé que les gens croient que la Loi sur le taux de transport des marchan-

[*Text*]

Act is part of their agreement in Confederation. I think that this Committee should really know, and I do not want to put you on the spot, or Mr. Jones, the Minister of Highways, in any way, but I think the Committee should really know if the Newfoundland Government believes that it is part of their agreement into Confederation that the rail lines or service on the rail lines should be maintained in Newfoundland. I say this, Mr. Neary, and perhaps I should say that I am from the Prairie Provinces, and we have a lot to say in many ways because we have the distances, and we believe out there that the Crows Nest Pass rates—maybe you have never heard of them—are part of our agreement into Confederation. I think this is a very important point for the Committee to know.

Mr. Neary: I presume that the CNR knows what it is doing, they probably have the best legal advice in Canada.

Mr. Horner: I have read the briefs, and one of them states categorically that the cost of living in Newfoundland is 35 per cent higher than anywhere else in Canada, and it goes on to suggest that transportation plays a part in increasing that cost. I have read what Mr. Hickman, your Minister of Justice, had to say on this question on page 10 of a ruling by the Board of Transport Commissioners, and I would really like to know the Newfoundland Government's position. Do they believe that this is part of their Confederation agreement?

Mr. Neary: I doubt it very much. But remember that neither the Newfoundland Government or anybody else in this world can obstruct progress.

Mr. Horner: Oh, we agree.

Mr. Neary: We have stated in our brief to this Committee, for instance, that the extension of the arterial highway system as recommended in our Appendix "A" will eliminate the need for much of the present coastal shipping service operated at a loss by the Canadian National Railways, but it will not eliminate the need for ferry facilities in areas not reached by the trunk road system. Therefore, a provision must be made for such service on at least a temporary basis until such communities have been taken out of isolation by the provision of future road tributaries.

[*Interpretation*]

dises dans les provinces Maritimes est ur partie intégrante de la Constitution. Je pens que le Comité devrait vraiment le savoir, je ne veux pas disons vous mettre dans difficulté, vous ou monsieur Jones, ministr de la Voirie, mais je pense que le Comi devrait vraiment savoir si le gouvernemer de Terre-Neuve croit d'une façon ou d'un autre que cela faisait partie de l'entente cor clue pour se joindre à la Confédération, so que les lignes ferroviaires ou que les service ferroviaires soient maintenus à Terre-Neuve Je fais ces observations, monsieur Neary, peut-être devrais-je ajouter que je viens de provinces des Prairies, et nous pouvons dir beaucoup de choses parce que nous avons l distance et nous croyons que les taux du pas sage du Nid-de-Corbeau, peut-être n'en a vez-vous jamais entendu parler, cela consti tuait une condition de notre entrée dans l Confédération. Je crois qu'il est très importar que le Comité sache ce qu'il en est.

M. Neary: Je présume que la compagnie de chemins de fer Nationaux du Canada sait c qu'elle fait; ils ont sans doute recours au meilleurs conseillers juridiques au Canada.

M. Horner: J'ai lu les mémoires et l'u d'eux souligne énergiquement que le coût d la vie à Terre-Neuve est 35 p. 100 plus élev que nulle part ailleurs au Canada, et plu loin, il laisse entendre que le transport contri bue à augmenter ce coût. J'ai lu ce que mon sieur Hickman, votre ministre de la Justice dit à la page 10, au sujet d'une décision de l Commission des transports du Canada, et j voudrais donc connaître la position du gou vernement de Terre-Neuve. Croient-ils vrai ment que cela faisait partie de leur entent pour se joindre à la Confédération?

M. Neary: J'en doute fort. Mais, n'oublie pas que ni le gouvernement de Terre-Neuv ni personne d'autre ne peut faire obstacle au progrès dans le monde.

M. Horner: Je suis d'accord.

M. Neary: Nous avons déclaré dans notre mémoire présenté à ce Comité, par exemple que le prolongement du réseau artériel de routes, telle que recommandé dans l'appendice «A» éliminera la nécessité du service actuel de cabotage, exploité à perte par le CN en ce moment, mais cela n'enlèvera pas la nécessité d'avoir un service de transbordeurs dans les centres qui ne sont pas reliés par le réseau de routes principales. Il faut donc voir à ce qu'un tel service au moins temporairement jusqu'à ce que ces collectivités ne soient plus isolées par la construction de routes tributaires.

[Texte]

Mr. Horner: Yes, but you acknowledge at e top of page 11 that it is a transfer of oney that the federal government is saving ith the discontinuance of railway services, d it is costing the province. All I am saying that perhaps you could assist progress by orking towards a standardization of your affic in order to haul your vast timber sources to pulp mills, and so on.

Mr. Neary: We do have a section in here aling with rail, Mr. Chairman. I thought I ad it for the benefit of the Committee.

Mr. Horner: Yes, I have got that right fore me.

The Chairman: Mr. Allmand.

Mr. Allmand: Mr. Neary, there seems to ve been in the questioning some confusion th respect to railways, in that people are tting into one group both passenger and eight services. Have you had any complaints out downgrading of freight service, or do u know of any movement by the CNR to thdraw any freight services.

Mr. Neary: No. In all fairness to the CNR, I nk the freight service to Newfoundland has mendously improved in the last year or o and this has been the result of recomndations by the Provincial Government, by e Boards of Trade and Chambers of Comrce, and business people generally, and I nk the service has been upgraded, if ything.

Mr. Allmand: Do you think the railway eight service in Newfoundland is essential the economy of Newfoundland?

Mr. Neary: Yes, it is.

Mr. Nowlan: What is the position of Newndland on the freeze on the LCL rates ich expire on March 23, 1969?

Mr. Neary: Our official position is that—d I think probably the Premier of New unswick made that clear recently—the sition of the four Atlantic Provinces is that freight rates freeze continue.

The Chairman: Mr. Thomas.

Mr. Thomas (Moncton): Mr. Chairman, in ding the judgment on the application of

[*Interprétation*]

M. Horner: Vous reconnaissez, en haut de la page 11, qu'il s'agit là d'un transfert d'argent en réalité, que le gouvernement fédéral fait des épargnes en discontinuant les services ferroviaires pendant que la province débourse de l'argent. Tout ce que je dis, c'est que peut-être vous pourriez aider au progrès en travaillant à une normalisation de notre trafic, de façon à transporter tout votre bois vers les fabriques de pâte à papier, et ainsi de suite.

M. Neary: Il y a une partie de notre mémoire qui traite du rail, monsieur le président. J'ai cru que je le lisais pour le bénéfice du comité.

M. Horner: Oui, je l'ai devant moi.

Le président: Monsieur Allmand.

M. Allmand: Monsieur Neary, il semble y avoir eu, au cours de la période de questions, une certaine confusion en ce qui concerne les chemins de fer, je pense qu'on met dans un même bloc le service voyageurs et le service de transport des marchandises. Est-ce que vous avez eu des griefs quant au déclassement du service de marchandises ou savez-vous si le CN manifeste l'intention de supprimer les services de marchandises?

M. Neary: Non, en toute justice pour le CN, je pense que le service de transport des marchandises vers Terre-Neuve s'est amélioré considérablement au cours de la dernière ou des deux dernières années, à la suite des recommandations formulées par le gouvernement provincial, par le ministère du Commerce, les chambres de commerce et les hommes d'affaires; dans l'ensemble, je pense que le service a été au moins amélioré.

M. Allmand: Croyez-vous que le service-marchandises par chemins de fer à Terre-Neuve est essentiel pour l'économie de Terre-Neuve?

M. Neary: Oui, c'est essentiel.

M. Nowlan: Quelle est la position de Terre-Neuve sur le gel du tarif par chargements incomplets qui doit prendre fin le 23 mars de cette année?

M. Neary: Notre ligne de conduite officielle est la suivante et je crois que le premier ministre du Nouveau-Brunswick l'a clairement établi récemment, que les quatre provinces de l'Atlantique ont décidé de maintenir le gel du tarif marchandises.

Le président: Monsieur Thomas?

M. Thomas (Moncton): Monsieur le président, à la lecture du jugement rendu sur la

[*Text*]

the Canadian National Railways for permission to discontinue passenger train service between St. John's and Port-aux-Basques, I note that the Hon. T. A. Hickman, Minister of Justice, appeared on behalf of the Government of Newfoundland, and at that time he stated:

> . .that a trial period should be considered to prove that a bus service could be, not only equal, but superior to the present train service.

At that time he suggested that this trial period should extend until the fall of 1970. He said this would afford us the proper time to gain knowledge of whether the alternative service would be as good as the rail service. I would like to ask either of these gentlemen, is this still the considered opinion of the Newfoundland Government that in order to get a proper assessment of this, the service should run until 1970? Or are they satisfied now that there has been sufficient trial bus service that they are prepared to accept this as an alternative service to the passenger service?

Mr. Neary: To my knowledge, the Government of Newfoundland has not altered its position from that brief that Mr. Hickman presented.

Mr. Thomas (Moncton): As you know, there is provision for application if the parties are not satisfied that the alternative service is satisfactory. If they apply before the expiry date of April 15, the Commission will reconsider their decision. Is it then the intention of the Government of Newfoundland to apply for a further extension of passenger services until the fall of 1970? As you say, your position has not changed.

Mr. Neary: I am afraid I cannot answer that question.

Mr. Thomas (Moncton): Do you mean that the Province of Newfoundland—you do not know whether they intend to appeal or not?

Mr. Neary: Do you mean if the recommendations of this decision by Mr. Hickman are not followed to the letter, will we appeal?

Mr. Thomas (Moncton): As you know, the judgment states that the CNR may discontinue service on April 15, but there is provision for an appeal. Both parties can appeal if the alternative service is not satisfactory. You state that the Government of Newfoundland still feels that a satisfactory trial could not be

[*Interpretation*]

demande des chemins de fer Nationaux Canada en vue d'obtenir l'autorisation de d continuer le service voyageurs entre Sai Jean et Port-aux-Basques, je remarque q l'honorable T. A. Hickman, ministre de Justice, témoigna au nom du gouverneme de Terre-Neuve, et qu'il a alors, déclaré:

> On devrait songer à un service d'ess pour montrer que le service par autob peut être égal et même supérieur au s vice ferroviaire actuel.

Il a alors proposé que la période d'essai prolonge jusqu'à l'automne de 1970. Il a que cela nous donnerait suffisamment temps pour savoir si l'autre service ser aussi bon que le service ferroviaire. Je vo drais demander à l'un ou l'autre des témoi si le gouvernement de Terre-Neuve est t jours d'avis que pour avoir une excelle évaluation, le service devrait être en vigue jusqu'en 1970. Ou est-ce qu'ils sont conva cus maintenant, qu'il y a eu suffisamme d'essais de service d'autobus qu'ils sont pr de l'accepter comme service alternatif ou s vice voyageurs?

M. Neary: A mon avis, le gouvernement Terre-Neuve n'a pas modifié sa ligne de co duite à la suite du mémoire présenté p monsieur Hickman.

M. Thomas (Moncton): Comme vous savez, on prévoit la possibilité de faire u demande si les parties en cause ne sont p convaincues que l'autre service était satisfa sant. Avant la date d'expiration, soit le avril, la Commission étudiera à nouveau le décision. Est-ce que le gouvernement Terre-Neuve a l'intention de demander autre prolongement du service voyage jusqu'à l'automne 1970? Comme vous dit votre ligne de conduite n'a pas changé.

M. Neary: Je crains fort de ne pouv répondre à cette question.

M. Thomas (Moncton): Voulez-vous di que la province de Terre-Neuve... vous savez pas s'ils ont l'intention de présenter appel ou non?

M. Neary: Voulez-vous dire que si l recommandations de la décision de monsie Hickman ne sont pas suivies à la lettre, vo présenterez un appel?

M. Thomas (Moncton): Vous savez que p le jugement, la compagnie des chemins de f Nationaux du Canada peut discontinuer service le 15 avril, mais il y a une dispositi prévoyant un appel. Les deux parties peuve déposer un appel si le service proposé n'e pas satisfaisant. Vous déclarez que le gouve

exte]

npleted until the fall of 1970. You say this still the position of the Government of wfoundland. In view of this, has the gov-ment considered application to request the ension of services until the fall of 1970?

Mr. Neary: I cannot answer that.

Mr. Thomas (Moncton): Who would this peal go to?

Mr. Neary: Are you asking me the estion?

Mr. Thomas (Moncton): As I understand it, parties are not satisfied with this alterna-e service there is provision made that they appeal to the CTC to reconsider their igement. I am just asking if the Province Newfoundland is making an appeal.

Mr. Neary: I cannot answer your question.

Mr. Turner (London-East): If the rail sys-n was updated, what would your cost of hway construction be?

Mr. Neary: It would be exactly the same as lined in the brief.

Mr. Turner (London-East): Five hundred llion?

Mr. Neary: I do not know if it is that much. s roughly a little less than $400 million.

Mr. Turner (London-East): And what would cost to update the road, or have you ever ard of a figure of the cost involved?

Mr. Neary: To update it to standard gauge lway? The figure is absolutely fantastic. I ve heard it, but I do not remember exactly at it is. It is outrageous.

Mr. Turner (London-East): What would the gth of the Belle Isle tunnel be?

Mr. Jones: It would depend on where it s built. The Strait of Belle Isle varies in dth, I would say, from 9 miles up to about Probably with landings on either side it uld be about a 20-mile tunnel.

Mr. Turner (London-East): What would it t?

Mr. Jones: I have no idea.

[*Interprétation*]

nement de Terre-Neuve est toujours d'avis qu'une période d'essai satisfaisante ne pourrait être terminée avant l'automne 1970, et que c'est toujours la position adoptée par le gouvernement de Terre-Neuve. Vu cet état de choses, est-ce que le gouvernement a songé à demander le prolongement du service jusqu'à l'automne 1970?

M. Neary: Je ne peux répondre à votre question.

M. Thomas (Moncton): A qui serait présenté cet appel?

M. Neary: Est-ce que vous me posez la question?

M. Thomas (Moncton): Si je comprends bien, si les parties en cause ne sont pas satisfaites de cet autre service, elles peuvent présenter une demande à la CCT pour revenir sur leur décision. Je demande simplement si la province de Terre-Neuve a présenté un appel.

M. Neary: Je ne puis répondre à votre question.

M. Turner (London-Est): Monsieur le ministre, si le service ferroviaire était modernisé, quel serait le coût d'aménagement des routes?

M. Neary: Ce serait exactement le même que celui qui a été présenté dans le mémoire.

M. Turner (London-Est): 500 millions de dollars?

M. Neary: Je ne sais pas si c'est autant. Environ, un peu moins de 400 millions de dollars.

M. Turner (London-Est): Qu'est-ce qu'il vous en coûterait pour améliorer les routes? Vous en a-t-on déjà parlé?

M. Neary: Pour avoir un écartement normal de la voie ferrée? Le chiffre est absolument fantastique. Je l'ai déjà entendu, mais je ne m'en souviens pas exactement. C'est un chiffre énorme.

M. Turner (London-Est): Quel serait la longueur du tunnel Belle Isle?

M. Jones: Tout dépendrait de son emplacement. Disons que le détroit de Belle Isle varie en largeur; entre 9 et 14 milles. Peut-être qu'avec les voies d'accès des deux côtés, de part et d'autre, le tunnel mesurerait environ 20 milles.

M. Turner (London-Est): Qu'est-ce qu'il en coûterait?

M. Jones: Je n'en ai pas la moindre idée.

[*Text*]

The Chairman: Mr. Perrault.

Mr. Perrault: Mr. Chairman, there have been a number of statements made today, and I would like to clarify my thinking on one or two points. I was pleased to hear that the CN freight service is improving on the Island. I think we are all encouraged by that announcement.

Mr. Neary: I am sure the CN will be encouraged too because it is not every day they get a pat on the back, you know.

Mr. Perrault: Yes, that is right. First, I would like to ask the Minister, have you had any complaints about the present quality of passenger service on, first of all, the CN buses, and secondly, the CN trains? And if so, what is the nature of the complaints? And second, has there been any marked deterioration in the train passenger service? Does there seem to be any downgrading in that service?

Mr. Neary: First of all, I doubt very much if the complaints regarding the CNR would come to the provincial government. But to answer your question more specifically, in my capacity as Minister of Transportation I have not received any complaints about either the bus service or the passenger service on the trains, and I have no knowledge of the passenger train service being downgraded. It might very well be, but I have no knowledge of it.

Mr. Perrault: That was my question, whether you had direct knowledge of it. So that is a fair answer.

Is it the view of the Minister that he envisages transportation development in Newfoundland in three ways over the years to come: continuation of CN train service primarily perhaps in the area of transporting freight rather than passenger service? But I understand the citizens are going to determine which service they like the best. Is that correct?

Mr. Neary: That is correct.

Mr. Perrault: And second, the development of roads to assist economic development, and in this you would like to see more federal assistance, which seems to make sense. And third, the development of air services.

Mr. Chairman, we have had very little reference to trucking today, and I wonder if trucking is a very large factor in the transportation picture in Newfoundland? Not a great deal of time has been spent this morning on the subject.

[*Interpretation*]

Le président: Monsieur Perrault?

M. Perrault: Monsieur le président, on a fait aujourd'hui un certain nombre de déclarations et je voudrais simplement préciser ma ligne de pensée sur un point ou deux.

J'ai été heureux de voir que le service de transport des marchandises du CN s'améliore sur l'île, et je crois que nous sommes tous encouragés par cette nouvelle.

M. Neary: Je suis certain que le CN sera encouragé également parce que ce n'est pas tous les jours qu'ils sont félicités.

M. Perrault: C'est juste. Je voudrais tout d'abord demander au ministre s'il a entendu des plaintes contre la qualité du service voyageurs premièrement à bord des autobus du CN et, deuxièmement, à bord des trains du CN? Dans le cas de l'affirmative, quelles sont ces plaintes? Ensuite, y a-t-il eu une diminution sensible de la qualité du service voyageurs par trains? Est-ce qu'il semble vraiment y avoir un déclassement de ce service?

M. Neary: Je doute fort que les plaintes relatives au CN seraient adressées au gouvernement provincial. Mais, pour répondre à votre question de façon plus précise, en tant que ministre des Transports, je n'ai pas reçu de telles plaintes formulées contre le service voyageurs à bord des autobus ou des trains et, je ne sais pas si le service voyageurs du train a diminué de qualité. Il se peut que cela se soit produit, mais je n'en ai pas été saisi.

M. Perrault: C'est exactement ce que je voulais savoir: si vous en aviez été saisi.

Le ministre envisage-t-il une amélioration future des transports à Terre-Neuve, de trois manières: par le maintien du service ferroviaire du CN, peut-être en premier lieu celui du transport des marchandises que celui du service voyageurs? Mais si je comprends bien, ce sont les citoyens qui vont déterminer le service qu'ils préfèrent. Est-ce juste?

M. Neary: C'est juste.

M. Perrault: Deuxièmement, l'aménagement de routes pour aider au développement économique et à ce propos, vous aimeriez bénéficer un peu plus de l'aide fédérale. Et troisièmement; l'expansion des services aériens. Monsieur le président, on a très peu parlé du service de camionnage aujourd'hui et je me demande si le camionnage occupe une place importante dans le domaine du transport à Terre-Neuve. On en a très peu parlé ce matin.

Texte]

Mr. Neary: I guess you could blame that on ıe, but when we are talking about roads, bviously...

Mr. Perrault: Yes, I understand. You can- ot put everything in a brief.

Mr. Neary: It is not necessary to spell it ut, but that is one of the prime reasons why 'e are building these roads.

Mr. Perrault: Would you like to see federal ubsidies paid to assist air services, the truck- rs and, of course, road development? Would ou like to see additional assistance to the ruckers?

Mr. Neary: That is included in our brief, y the way. We have asked to have the intra- egional subsidies under MFRA extended to ll modes of transportation.

Mr. Perrault: Yes. That was my under- tanding from your brief, but so much has een said this morning that I would just like o clarify it for my own thinking.

Mr. Neary: We have also asked to have the ntra-regional subsidy retained, because in ıy opinion the extra-regional subsidy, that is n freight. Leaving Newfoundland and going utside the Atlantic Provinces as far as Levis, Quebec, the maritime freight rate in that egard has never really been beneficial to Newfoundland, and incidentally it applies nly to rail. What we really needed most of ll in Newfoundland was a subsidy on freight oming into Newfoundland, because we are ıot manufacturing the type of material. What we do ship out is raw material, and it goes ut mostly by boat.

Therefore, the extra regional subsidy has eally been of no advantage to Newfound- and; and even if it were extended geograph- cally to include all modes of transportation it till would not be of very much benefit to Newfoundland. It is the intra-regional subsidy hat has been beneficial to Newfoundland.

Mr. Perrault: Yes; and I am glad to have your opinion on that. My final question is his: We are all tremendously delighted with the announcement of increased aid to the ground fish industry in Newfoundland. I think all Committee members feel that way about it. It leads me to this question: Are there certain government aid programs which

[*Interprétation*]

M. Neary: J'imagine que vous pourriez me jeter le blâme, mais, lorsque nous parlons de routes, évidemment...

M. Perrault: Oui, je comprends. On ne peut pas tout inclure dans un mémoire.

M. Neary: C'est inutile de préciser tout cela mais c'est une des raisons pour lesquelles nous construisons ces routes.

M. Perrault: Est-ce que vous aimeriez que le gouvernement paie des subventions pour aider à l'expansion des services aériens, des services de camionnage et naturellement, des routes? Une aide supplémentaire pour les camionneurs peut-être?

M. Neary: Cela figure dans notre mémoire. Nous avons demandé s'il ne pourrait pas y avoir une subvention inter-régionale, en vertu de la Loi sur les taux de transport des marchandises dans les provinces Maritimes, élargie à tous les modes de transport.

M. Perrault: Oui. C'est ce que j'ai compris à la lecture de votre mémoire. On en a tellement dit de choses ce matin que je voudrais simplement que l'on m'apporte certaines précisions.

M. Neary: Oui, nous avons demandé que l'on retienne la subvention inter-régionale, parce qu'à mon avis la subvention extra-régionale pour le transport des marchandises en provenance de Terre-Neuve vers le continent, aussi loin que Lévis (Québec), le tarif de transport maritime des marchandises n'a jamais bénéficié à Terre-Neuve, et incidemment cela ne s'applique qu'au rail. Ce dont nous avons vraiment besoin à Terre-Neuve, c'est une subvention pour le trafic qui arrive à Terre-Neuve parce que nous ne fabriquons pas le genre de matériaux. Ce que nous expédions ce sont des matières premières qui sont expédiées la plupart du temps par navire.

Et par conséquent, cette subvention extra-régionale n'a pas vraiment été avantageuse pour Terre-Neuve; même si elle était augmentée sur le plan géographique pour inclure tous les modes de transports, ça ne profiterait pas tellement à Terre-Neuve. C'est la subvention régionale qui a été en somme bénéfique pour Terre-Neuve.

M. Perrault: Oui, et je suis heureux de connaître votre opinion. Je voudrais vous demander une dernière question: nous sommes tous très heureux d'apprendre que l'on va donner une aide accrue à l'industrie de la pêche aux poissons de fond à Terre-Neuve. Et je crois que tous les membres du Comité sont de cet avis. C'est pourquoi j'en arrive à poser

[*Text*]

could be extended to Newfoundland would be more beneficial than merely transportation subsidies, or perhaps could be extended in lieu of transportation subsidies? Would you like to see a broad program of action by the federal government in some direction to assist economic development so that it would not be necessary to pay so much for transportation?

Mr. Neary: Yes; and I am reasonably sure that you will see this under the new department of regional economic expansion.

Mr. Perrault: Yes.

Mr. Neary: And I think this would be good for the Atlantic region. It would be good for Newfoundland; and relative to your remarks on fishery assistance, it is obvious that the federal government is doing everything possible in this field to help the fishery. I think it is now up to the plant operators, the fishermen and the fish trades associations to try to do something to help themselves that is, to improve the quality of the fish, and so forth. They certainly now have the means to do this.

Mr. Perrault: It is very heartening to hear you say that, Mr. Neary.

The Chairman: Mr. Nowlan?

Mr. Nowlan: I have a supplementary to what Mr. Perrault asked, and it has to do with direct knowledge, Mr. Neary. Have you taken an actual ride on this bus yet?

Mr. Neary: No, Mr. Chairman, I have not been on the bus; but I have been on buses. As a matter of fact, in my younger days I rode from Sydney to New York twice on a bus; I rode from Sydney to Montreal and Sydney to Toronto; and I have ridden on trains, buses and airplanes all over the world.

Mr. Nowlan: When did you last ride on the socalled "Newfoundland Bullet?"

Mr. Neary: Mr. Chairman, unfortunately I have not been on the "Newfoundland Bullet" for years and even if I did ride on it there would be no revenue to the CN, because I would use my pass, as all hon. members do; and I am sure that the CN will not derive any funds from the gentlemen who will take the ride tonight on the "Newfoundland Bullet."

[*Interpretation*]

ma question. Est-ce qu'il y a des programme d'aide du gouvernement qui pourraient êtr étendus à Terre-Neuve et qui lui profiteraien plus que de simples subventions aux trans ports, ou qui, peut-être, pourraient être appli qués en remplacement des subventions a transport. Préféreriez-vous voir un vaste pro gramme d'action du gouvernement fédéra dans une certaine voie pour aider au dévelop pement économique de façon qu'il ne sera pas nécessaire de tant payer pour l transport?

M. Neary: Oui, et je suis à peu près certai que vous le verrez au nouveau ministère d l'Expansion économique régionale.

M. Perrault: Oui.

M. Neary: Et ce serait bien pour la régio de l'Atlantique. Ce serait bien pour Terre Neuve, et pour ce qui est de vos remarque sur l'aide à la pêche il est évident que l gouvernement fédéral fait tout en son possi ble dans ce domaine pour aider l'industrie d la pêche. Je pense que c'est au xexploitant d'usines, aux pêcheurs et aux associations d pêches commerciales de s'aider eux-même maintenant, c'est-à-dire d'améliorer la qualit du poisson, etc. de leur production. Ils on certainement maintenant les moyens pour l faire.

M. Perrault: Ce sont des paroles encoura geantes, monsieur Neary?

Le président: Monsieur Nowlan?

M. Nowlan: J'ai quelque chose à ajouter ce qu'a demandé M. Perrault, qui a tra directement à l'expérience. Est-ce que vou avez pris l'autobus jusqu'ici?

M. Neary: Monsieur le président, je n'a pas pris l'autobus mais j'ai déjà pris l'autc bus quand j'étais jeune. En fait, je suis all de Sydney à New York deux fois par autc bus; j'ai voyagé de Sydney à Montréal et d Sydney à Toronto; et j'ai pris des trains, de autobus et des avions partout dans le mond

M. Nowlan: Quand avez-vous pris le «New foundland Bullet» pour la dernière fois?

M. Neary: Malheureusement, je n'ai pa pris le «Newfoundland Bullet» depuis de années. Même si je prenais le «Bullet» mon sieur le président, il n'y aurait pas de revenu pour le National-Canadien, parce que je m servirais de mon laissez-passer, comme for tous les députés et je suis certain que l National-Canadien n'aura aucun revenu addi tionnel de ceux qui prendront le «Bullet» c soir.

[*Texte*]

Mr. Nowlan: This was to be my last question. Does the Minister plan to be with us tonight on this nocturnal ride?

Mr. Neary: Mr. Chairman, I would be happy to be, if I were invited.

Mr. Nowlan: That way you get two in one—you get the train and the bus.

Mr. Neary: Thank you very much.

The Chairman: Order, please.

Mr. McGrath: Mr. Chairman, would you, on behalf of the Committee, extend an invitation to the hon. gentleman to join us on our ride?

The Chairman: With pleasure.

Mr. Neary: I would be very happy to, Mr. Chairman.

Mr. McGrath: Most of my questions have been dealt with, Mr. Chairman, but I have one brief one I wish to put to Mr. Neary.

I gather from your evidence that the position of the Newfoundland government vis-à-vis rail transportation has substantially changed since 1966. I refer now to the report of the Royal Commission on Transportation which was headed by a minister of the government of Newfoundland. I will quote very briefly from it, Mr. Chairman. The Commission said this:

> The fact remains that the railway is an essential means of transportation to the travelling public in Newfoundland. It is a social service rather than an economic one. The same can be said about the railway system as a whole. The service provides a much needed social need and it is by the yardstick of social requirement rather than the economic justification that this suggestion must be judged.

This report was made in 1966, after the completion of the Trans-Canada Highway. My question to you is. Is this now still the view of the Government of Newfoundland?

Mr. Neary: No; this was not the view of the Government of Newfoundland. This was the view of the Royal Commission on Transportation.

Mr. McGrath: I put it to you, Mr. Neary, with great respect, that the fact that this Royal Commission was headed by a minister without portfolio would give it more weight than an ordinary Royal Commission.

Let me put my question another way. As the Minister responsible for transportation,

[*Interprétation*]

M. Nowlan: Ce sera ma dernière question. Est-ce que le Ministre a l'intention d'être avec nous ce soir dans cette randonnée nocturne.

M. Neary: Il me ferait plaisir d'y être si j'étais invité monsieur le président.

M. Nowlan: Ainsi vous avez le train et l'autobus, deux dans un!

M. Neary: Merci beaucoup.

Le président: A l'ordre, s'il vous plaît.

M. McGrath: Monsieur le président, au nom du Comité pourriez-vous inviter l'honorable délégué à nous accompagner ce soir.

Le président: Avec plaisir.

M. Neary: J'en serais très heureux, monsieur le président.

M. McGrath: La plupart de mes questions ont déjà reçu des réponses, monsieur le président, mais j'ai une question très brève pour M. Neary.

J'ai cru comprendre que l'attitude du gouvernement de Terre-Neuve vis-à-vis du transport par chemins de fer a réellement changé depuis 1966, à la suite de la Commission royale d'enquête sur les transports dirigée par un ministre du gouvernement de Terre-Neuve. Je vais le citer très brièvement. Voici ce que la Commission a dit:

> Le chemin de fer est un moyen essentiel de transport pour le public voyageur de Terre-Neuve. C'est un service social plutôt qu'un service rentable. On peut dire la même chose du service voyageur dans son ensemble. Ce service répond encore à un besoin vraiment social et c'est par ce barème d'exigence sociale plutôt que par une justification économique que cette suggestion doit être jugée.

Le rapport a été présenté en 1966 après la fin de la construction de la route transcanadienne. Ce que je voudrais vous demander, c'est: est-ce toujours l'avis du gouvernement de Terre-Neuve?

M. Neary: Ce n'était pas l'avis du gouvernement de Terre-Neuve, mais plutôt l'opinion de la Commission royale d'enquête sur les transports.

M. McGrath: Sauf votre respect, monsieur Neary, le fait que cette Commission royale d'enquête était dirigée par un ministre sans porte-feuille, ce qui veut dire que la Commission lui donnait plus de poids qu'une commission ordinaire. Permettez-moi de reformuler ma question. A titre de ministre des

[*Text*]

do you subscribe to that view, or does your government subscribe to that view?

Mr. Neary: We have outlined our position in the brief that we submitted to the Committee. Should I read it again, Mr. Chairman, it is very short.

The Chairman: Yes, proceed.

Mr. Neary: It states:

> It would appear...

...and I am sure it appeared at that time to the Royal Commission on Transportation. .

> ...that the extension of highways throughout the province will eliminate any need for services or additions to existing Canadian National Railways lines. Concentration here should be on extension of the movement already begun to provide improved warehousing and containerization facilities in the effort to lower the cost of transportation of goods by this traditional and dependable means.

Therefore, it does have serious social and economic implications, because freight rates affect the daily lives of every citizen of Newfoundland. So our position has not changed.

Mr. McGrath: Mr. Chairman, may I just put one more quote from this on the record? It deals with the downgrading of service, and it is very brief. I think the Committee will be interested in hearing it. This is from the report of the Royal Commission and I quote in part from page 9:

> One is forced to the conclusion in view of the disparity and the facilities offered that the travelling public in Newfoundland are classed in an inferior role to their mainland neighbours when comparing rail transportation facilities.

Mr. Chairman, I submit to the Minister that the view of the Newfoundland government is certainly at variance with the recommendations of this Royal Commission; and this view seems to have changed very drastically in the last two years. That is all I have to say, Mr. Chairman.

The Chairman: There is a point of clarification, from Mr. Nesbitt.

Mr. Nesbitt: Thank you very much, Mr. Chairman. I would be happy to wait until the questions are finished.

Mr. Nowlan: I have a supplementary to Mr. Neary on something that Mr. Perrault raised

[*Interpretation*]

Transports, est-ce que vous-même ou votre gouvernement appuyez cette thèse?

M. Neary: Nous avons exposé notre position dans le mémoire que nous avons présenté au Comité en disant (est-ce que je devrais le lire encore une fois, monsieur le président?)— c'est très court.

Le président: Oui, poursuivez.

M. Neary: Il dit:

> Il semblerait...

et je suis certain que cela a paru dans le temps de la Commission royale d'enquête

> ...que l'extension du service routier partout dans notre province supprimera tout besoin de services ou d'additions aux chemins de fer du National-Canadien. Nous devrions donc essayer d'améliorer les aménagements d'entreposage et de containers afin de réduire les coûts du transport des marchandises par ces moyens de transport traditionnels et sûrs.

Par conséquent, il y a une portée économique et sociale car les taux de marchandises affectent la vie quotidienne de chaque citoyen de Terre-Neuve. Notre position n'a donc pas changé.

M. McGrath: Monsieur le président est-ce que je pourrais rapporter une autre courte citation? Elle a trait à la détérioration du service. Je pense qu'elle intéressera le Comité. Elle est tirée du rapport de la Commission royale d'enquête—et je cite en partie—à la page 9

> Nous sommes forcés de conclure que vu la disparité et les aménagements mis à la disposition du public, les voyageurs de Terre-Neuve sont nettement dans une situation inférieure à leurs voisins si l'on compare les services de transport.

Monsieur le président, je souligne au ministre que l'opinion du gouvernement de Terre-Neuve est en désaccord avec les recommandations de la Commission royale d'enquête sur les transports et cette opinion semble avoir changé très sérieusement depuis deux ans. C'est tout ce que voulais dire, monsieur le président.

Le président: M. Nesbitt veut obtenir un éclaircissement.

M. Nesbitt: Merci beaucoup, monsieur le président. Mais je pourrais attendre la fin des questions.

M. Nowlan: Question complémentaire au sujet de la question posée par M. Perrault et

Texte]

nd Mr. Neary answered about the impor-ance of having assistance on incoming freight Newfoundland. I can appreciate that in rinciple, but again there is the question that as been raised in this Committee in the past wo or three days of how should that assis-ance to the shipper or the carrier be passed own to the consumer.

We ate in Newfoundland this morning in a ice restaurant and it was a very enjoyable eal, but some members were charged $1 an gg. Relative to transportation policy and hat assistance there maybe—and it may not e the assistance you would like to see—have ny surveys been made by the government to y to investigate, in effect, not the cost of ving but whether the charges for these roducts coming into Newfoundland in the ewfoundland stores do in fact reflect the eal costs?

Mr. Neary: There are two answers to that uestion. First, you are probably aware that a sk force on transportation is presently orking in the Atlantic region, and when ey have completed their work the four remiers of the four Atlantic Provinces will resent a brief to Mr. Hellyer, the Minister of ransport. This, I think, will be one of the ighlights of that report.

Second, the province is presently making a rovincial transportation study of its own to nd out the movement of freight and so forth Newfoundland. We have just set this epartment up and we do not have any statis-cs. Therefore, we are doing tremendous esearch at the moment.

One thing I can say in answer to your mments is that I do agree that it is difficult say whether the benefits of moving materi-l and freight will be passed on to the con-mer, because—and I say this with all indness to the business people of Newfound-nd—I find that business people are rather mplacent when it comes to the movement f freight. They prefer to sit back, not inves-gate the new ways and move it by the tradi-onal means because they know they can ass the cost on to the consumer. I think this wrong. This is what you were getting at?

Mr. Nowlan: That is right.

The Chairman: Mr. Portelance?

Mr. Portelance: Mr. Neary, you mentioned reviously that you would like to see a sub-dy on freight coming into Newfoundland.

[*Interprétation*]

à laquelle a répondu M. Neary au sujet de l'importance d'obtenir de l'aide pour l'arrivée des marchandises à Terre-Neuve.

Je le réalise en principe, mais encore une fois on a soulevé la question en Comité depuis deux ou trois jours, comment cette aide à l'expéditeur ou au transporteur sera-t-elle transmise au consommateuur?

Nous avons mangé à Terre-Neuve ce matin—dans un beau restaurant, ce fut un repas agréable—mais certains députés ont dû payer $1.00 par œuf! En ce qui concerne la politique sur les transports et l'aide qui peut exister—ce ne sera peut-être pas l'aide que vous souhaitez—est-ce que le gouvernement a fait des enquêtes en fait, non pas sur le coût de la vie, mais pour savoir si les coûts de ces produits qui arrivent à Terre-Neuve, dans les magasins de Terre-Neuve, sont en fait les frais réels?

M. Neary: Il y a deux réponses à cette question. Tout d'abord, vous savez probablement qu'il y a un groupe de travail sur les transports qui à l'heure actuelle travaillent dans la région de l'Atlantique. Lorsque ce groupe aura terminé son travail, les quatre premiers ministres des quatre provinces de l'Atlantique présenteront un mémoire à M. Hellyer, le ministre fédéral des Transports. Je crois que ce sera un des facteurs importants du rapport.

En second lieu, la province à l'heure actuelle fait une étude provinciale sur les transports pour être au courant du mouvement des marchandises, etc...à Terre-Neuve. Nous venons de créer ce ministère et nous n'avons pas de statistiques. Nous faisons donc énormément de recherches pour l'instant. Mais il y a une chose que je pourrais dire en réponse à vos commentaires c'est que je crois bien qu'il est très difficile de dire si les bénéfices du transport du matériel et des marchandises seront vraiment transmis aux consommateurs (et je dis cela en toute charité envers les commerçants de Terre-Neuve). Je trouve que les commerçants sont plutôt satisfaits du transport des marchandises. Ils préfèrent ne rien faire, ne pas investiguer les nouvelles méthodes et employer les moyens traditionnels car ils savent qu'ils peuvent transmettre le coût au consommateur. Je trouve qu'ils ont tort. C'est à cela que vous vouliez en venir.

M. Nowlan: Vous avez raison.

Le président: Monsieur Portelance?

M. Portelance: Monsieur Neary, vous avez mentionné précédemment que vous voudriez voir une subvention accordée pour les mar-

[*Text*]

Would you include all freight coming in, or only raw materials?

Mr. Neary: I have not really given much thought to that question. Personally, I would like to see subsidies on food stuffs and clothing, and so forth, coming into Newfoundland. I think this would be of tremendous benefit to the people of Newfoundland. It is the only way that I can see that we could lower the cost of living in this province, even to bring it in line with the other three Maritime provinces.

Mr. Portelance: Thank you.

The Chairman: Mr. Rose, do you have a supplementary question?

Mr. Rose: No, it was not supplementary, sir. May I proceed?

The Chairman: Yes.

Mr. Rose: Mr. Neary, I believe that one of the justifications of the transportation subsidy is the improvement of the economy in Newfoundland?

Mr. Neary: Yes.

Mr. Rose: And I believe you are the Minister in charge of resettlement programs, are you not?

Mr. Neary: No.

Mr. Rose: I was hoping we would have an opportunity to talk about this during these hearings, because it seems to me that your priority of highways is designed to link these larger communities. Would you agree with that?

Mr. Neary: Yes; we make reference to that.

Mr. Rose: I was particularly interested in how this resettlement program is working out relative to employment. It has been my concern in many places that when you resettle people, often without very much skills, you just disrupt their traditional practices.

I was thinking particularly of those engaged in fishing, these independent people living on islands, who look after themselves in some sort of way in the inshore fishing industry. When you move them to these larger communities—some of them not much larger than the one they left—the unskilled

[*Interpretation*]

chandises qui arrivent à Terre-Neuve. Est-ce que cela comprendrait toutes les marchandises qui arrivent ou seulement les matières premières?

M. Neary: Je n'ai vraiment pas songé à cette question. Personnellement, j'aimerais voir une subvention accordée pour les produits alimentaires, les vêtements, etc. .... qui arrivent à Terre-Neuve. Je crois que cela aiderait beaucoup les gens de Terre-Neuve et c'est la seule façon, d'après moi, par laquelle nous pourrions réduire le coût de la vie dans cette province, pour qu'elle soit au moins au diapason avec le coût de la vie dans les trois autres provinces maritimes.

M. Portelance: Merci.

Le président: Est-ce que vous avez une question additionnelle, monsieur Rose?

M. Rose: Non, monsieur le président, ce n'est pas une question additionnelle. Puis-je poursuivre quand même?

Le président: Oui.

M. Rose: Monsieur le ministre, je crois qu'une des justifications pour la subvention au transport est l'amélioration de l'économie de Terre-Neuve.

M. Neary: Oui.

M. Rose: Et je crois que vous êtes le ministre chargé du programme de transplantation. C'est ça?

M. Neary: Non.

M. Rose: J'espérais avoir l'occasion d'en parler au cours de nos audiences. Car il me semble que la priorité de vos grand'routes est conçue de façon à relier ces plus grandes agglomérations. C'est ça?

M. Neary: Oui, nous en avons parlé dans notre mémoire.

M. Rose: Ce qui m'intéressait plus particulièrement ce sont les effets du programme de transplantation du point de vue de l'emploi. Ça été une de mes préoccupations pour plusieurs endroits, car lorsque vous transplantez des personnes, qui souvent n'ont pas beaucoup de compétence, vous brisez simplement leurs habitudes traditionnelles.

Je pensais particulièrement à la pêche côtière, ces gens indépendants qui vivent dans les îles et suffisent quand même à leurs propres besoins, grâce à la pêche côtière. Mais lorsque vous les déplacez à des agglomérations plus grandes, certaines pas beaucoup plus grandes que celles qu'ils ont quittées, l

[*Texte*]

rural poor become the urban poor. I would like to have your views on how this is working out.

Mr. Neary: I am afraid I do not have too much information on the resettlement program. Incidentally, I was hoping that the minister responsible for resettlement would be here because, as you point out, it is dealt with in the brief, but he is in Ottawa at the moment attending a housing conference. They are meeting with Mr. Hellyer, I believe.

Let me quote you two short paragraphs from the brief itself which may answer the question satisfactorily:

> Despite progress on the resettlement program there are still hundreds of Newfoundland communities depending either solely on water transport or on third-rate roads for transportation of people and supplies.

I think this is probably what you are thinking about.

> Living in these communities...

—that I just referred to—

> ...is daily becoming less socially tolerable and less inviting for the establishment of even small industries because of the lack of acceptable roads linking with the Trans-Canada Highway.

In view of this statement I think that people would be glad to move out of these...

Mr. Rose: Sir, there is a strong parallel between what you are doing here, in relation to the resettlement of people, and what is occurring naturally in the agricultural regions of Canada. This is occurring naturally because farms are becoming larger, but there is a tremendous problem in the resettlement of people, because they do not have the skills to operate efficiently in an urban centre. What happens is that they become a pool of cheap labour—in fact, subsidizing the industries because of their low wages—in the cities, where formerly they had been independent.

Mr. Neary: May I point out to the hon. gentleman, Mr. Chairman, that the government does not move people, as such. The people themselves come to the government, and if 90 per cent of them—is that right, Mr. Jones?

Mr. Jones: It varies.

[*Interprétation*]

pauvres ruraux non spécialisés deviennent de pauvres urbains non spécialisés. J'aimerais donc savoir ce que vous pensez de ce programme et de la réussite du programme?

M. Neary: Je n'ai pas beaucoup de renseignements à vous donner sur le programme de transplantation. J'espérais, incidemment, que le ministre responsable soit ici car, comme vous l'avez mentionné, cela est expliqué dans le mémoire, mais le Ministre se trouve à Ottawa à l'heure actuelle—il doit rencontrer M. Hellyer, je crois. Permettez-moi de vous citer deux courts paragraphes du mémoire lui-même qui ,apporteront peut-être une réponse à votre question.

> Malgré les progrès que connaît le programme de transplantation, il existe encore des centaines d'agglomérations terreneuviennes où le transport des habitants et approvisionnements ne s'effectue que par voie maritime ou par des chemins de troisième ordre.

Je crois que c'est probablement à cela que vous pensiez

> vivant dans ces agglomérations...

dont je viens de faire mention.

> Chaque jour, la vie dans ces agglomérations devient de plus en plus intolérable pour les habitants et moins intéressante pour l'établissement d'industries, même petites, par suite de la pénurie de routes de raccordement de norme acceptable à la route Transcanadienne.

Je croirais donc que, vu cette déclaration, les gens seraient heureux de quitter ces agglomérations.

M. Rose: Monsieur, il y a un parallèle entre ce que vous faites ici pour la transplantation des gens et le phénomène naturel qui survient dans les régions agricoles du Canada. C'est un phénomène naturel parce que les fermes deviennent plus importantes, mais il y a un énorme problème de transplantation des gens, parce que ceux-ci n'ont pas les compétences pour travailler avec efficacité dans un centre urbain. Il arrive qu'ils deviennent alors un «pool» de main-d'œuvre mal payée primant par le fait même les industries dans les villes alors qu'auparavant ils avaient été indépendants.

M. Neary: Est-ce que je pourrais signaler au député que le gouvernement ne déplace pas de gens comme tel. Ce sont les gens eux-mêmes qui s'adressent au gouvernement, et si 90 p. 100 d'entre eux—est-ce 90 p. 100, monsieur Jones?

M. Jones: Cela varie.

[*Text*]

Mr. Neary: There are two or three programs going on, but the people themselves take the initiative. They come to the government and if a certain percentage—I think it is 90 per cent—of the people in that particular community decide that they want to move, then the government will assist them in moving to growth areas in the province. So, it is the people themselves who are taking the initiative.

Mr. Rose: There is no encouragement given by the government, either in PR or incentives?

Mr. Neary: None whatsoever. Just financial: we will financially assist these people to relocate or resettle.

Mr. Rose: Sir, your concern about highway subsidies and various freight subsidies being of ultimate benefit to the consumer—and you mention the traditional way in which the businessmen had been handling their transport,—was that perhaps these subsidies might not be of great benefit to those people who are living in this province.

I think all of us are very pleased with the announcement the federal government has made about the new fishing deal for frozen fish. This is a step in the right direction, and what concerns me, sir, is that these purchases are going to be made from the fishing companies and what concerns me is how will this assistance trickle down to the fishermen, in your view?

Mr. Neary: I have not seen the details of the program but I understand—and perhaps some of you gentlemen here know this better than myself—that there are built-in protective measures designed to ensure this. One of the big problems we have had in Newfoundland in the past is that the stop-gap measures, the hand-outs and the assistance to the fishery, did not filter through to the fishermen. I understand, however, that there are protective measures in this new program to see that the fishermen benefit and not the plant operators or the fish trades associations.

Mr. Rose: Would you say that this assistance, because of these stop-gap measures, was inhibited by the actions of the fishing companies, since they seem to be the intermediaries.

Mr. Neary: I do not understand your question but...

[*Interpretation*]

M. Neary: Il y a deux ou trois programmes en cours, mais ce sont les gens eux-mêmes qui prennent l'initiative. Ils s'adressent au gouvernement et si un certain pourcentage —je crois que c'est 90 p. 100—des gens d'une agglomération particulière décident de se déplacer, le gouvernement les aidera à se déplacer vers un centre de croissance. Ce sont donc les gens eux-mêmes qui prennent cette initiative.

M. Rose: Il n'y a aucun encouragement de la part du gouvernement, que ce soit sous forme de relations publiques ou de stimulants.

M. Neary: Aucun. Seulement du point de vue financier, nous les aiderons à se déplacer ou à s'établir de nouveau.

M. Rose: Votre préoccupation au sujet des subventions pour les routes et des diverses subventions pour le transport des marchandises qui pourraient être d'un grand avantage pour le consommateur, et vous avez mentionné la façon traditionnelle selon laquelle les commerçants s'étaient occupés des transports, votre souci était que peut-être les subventions ne seraient pas d'un grand avantage pour les gens qui vivent dans cette province.

Je crois que nous sommes tous très heureux de la nouvelle entente au sujet du poisson gelé qui vient d'être annoncée par le gouvernement fédéral. C'est un pas dans la bonne voie, et ce qui me préoccupe, monsieur, c'est que ces achats vont se faire des sociétés de pêche, et comment cette aide parviendra-t-elle aux pêcheurs?

M. Neary: Je n'ai pas vu les détails du programme, mais je crois comprendre, et peut-être que vous êtes plus au courant de cela que moi, mais je crois comprendre qu'il y a des mesures de protection dans la Loi même conçues à cette fin. Un des gros problèmes que nous avons eus à Terre-Neuve jusque-là, c'est que les mesures temporaires, les dons, l'aide financière donnée aux pêcheries, ne parvenaient pas au pêcheur lui-même. Toutefois, je comprends qu'il y a des mesures de protection dans le nouveau programme pour assurer que ce soit le pêcheur qui en bénéficie et non pas l'exploitant de l'usine ou les associations de commerce du poisson.

M. Rose: Diriez-vous que l'action des sociétés de pêche, puisqu'elles semblent être les intermédiaires, a nui à cette aide à cause des mesures temporaires?

M. Neary: Je ne crois pas comprendre votre question.

[*Texte*]

Mr. Rose: Quite obviously, if the money is not getting to the fishermen it must be stopping somewhere and I suggest to you that it may be with the fish companies.

Mr. Neary: Of course.

Mr. Rose: And this is what you are saying?

Mr. Neary: Right.

Mr. Rose: We just had legislation for fresh water fish in which all the fresh water fish are going to be marketed through one supported agency. Would you favour that sort of a system for the salt water fisheries?

Mr. Neary: Oh, of course. I think, myself, that the fishery in Newfoundland now has the facilities to get back into a healthy economic condition, and if the plant operators, the fish trades associations, the fishermen themselves, cannot improve their marketing or the quality of the fish, then I think the government should step in and handle it for them through a board, sir, because these have been the two chief problems we have had in the fishery in Newfoundland in the past.

The Chairman: Mr. Perrault.

Mr. Perrault: As it relates more to economic development rather than to transportation, Mr. Chairman...

Mr. Rose: I am sorry, Mr. Chairman, I have only one more question, but I believe...

The Chairman: Mr. Rose, I would hate to be unfair with you but, as you know, we are running away behind in our schedule time. There are others who wish to speak and I would not want to ask some of these people who are here this morning to come back this afternoon or tomorrow. So, I would ask you, if you would, to bear with me and make your questions a little shorter.

Mr. Rose: All right, I have a last question. What are your views on deficiency payments direct to fishermen, sir?

The Chairman: This has nothing to do with the problem.

Mr. Rose: I am sorry. I did not bring the matter up.

The Chairman: Mr. Carter.

Mr. Carter: Mr. Chairman, could the Minister say whether he is satisfied that the

[*Interprétation*]

M. Rose: Évidemment, si l'argent ne parvient pas aux pêcheurs, il doit s'arrêter quelque part, et je vous demande s'il est chez les sociétés de pêche.

M. Neary: Oui, évidemment.

M. Rose: C'est à peu près ce que vous dites.

M. Neary: C'est juste.

M. Rose: Nous venons d'adopter une mesure législative pour le poisson d'eau douce selon laquelle tout ce poisson serait mis en marché par une seule agence subventionnée? Est-ce que vous seriez en faveur d'un tel système pour le poisson d'eau salée aussi?

M. Neary: Certainement. Je crois qu'à l'heure actuelle à Terre-Neuve, l'industrie de la pêche a les moyens de revenir à une situation économique saine, et si les exploitants d'usines, les associations de commerce du poisson, les pêcheurs eux-mêmes ne peuvent améliorer leur mise en marché ou la qualité du poisson alors, le gouvernement pourrait intervenir et s'en occuper par l'intermédiaire d'une commission, car ce sont les deux principaux problèmes que nous avons eus quant à la pêche de Terre-Neuve dans le passé.

Le président: Monsieur Perrault.

M. Perrault: Puisque ça touche davantage le développement économique que les transports, monsieur le président,...

M. Rose: Je m'excuse, monsieur le président, je n'ai plus qu'une seule question maintenant, mais je crois...

Le président: Je ne voudrais pas être injuste à votre égard, mais comme vous le savez, nous sommes très en retard et il y en a d'autres qui ont demandé la parole. Et je n'aimerais pas demander à ceux qui sont ici ce matin pour présenter des mémoires de revenir cet après-midi ou demain. Je vous demanderais donc d'abréger votre question.

M. Rose: Très bien, c'est ma dernière question. Que pensez-vous des paiements d'appoint versés directement aux pêcheurs, monsieur?

Le président: Cela n'a rien à voir avec le problème.

M. Rose: Je regrette. Je n'ai pas soulevé la question.

Le président: Monsieur Carter.

M. Carter: Est-ce que le ministre pourrait dire s'il est satisfait des taux qui sont chargés

[*Text*]

rates being charged on the Argentia-North Sydney ferry and the Port-aux-Basques-North Sydney ferry, both from a freight point of view and a passenger point of view, are in line with Term 32 of the Terms of Union whereby the cost of transporting goods or people on that 90 miles of water is not supposed to cost more than that charged for the same distance on any Canadian National Railway?

Mr. Neary: Mr. Chairman, I think probably Mr. Carter does not clearly understand the term of union that he is referring to because it only covers transportation on the gulf and not between North Sydney and Argentia. However, I do agree, Mr. Chairman, that the rates are high, but this is an internal matter that must be handled by the CN and it is our thinking Mr. Chairman that on this level we not deal with local problems, but that with new things.

Mr. Carter: Surely if the rates are high and are contravening the terms of union, would not the Newfoundland Government make representation to the CTC or Mr. Hanley over there or the Canadian National to get this rate adjusted, in line with the terms of union?

Mr. Neary: I cannot answer for the government, Mr. Chairman, but I can say that I am sure Mr. Carter will do everything he can in Ottawa because again, this is a federal responsibility.

Mr. Carter: Yes, we would like a little help, though.

Mr. Neary: Do Mr. Carter and Mr. McGrath always want the provincial government to help them try to fulfil some of the things they should be doing in Ottawa?

Mr. Carter: Oh come now, Mr. Chairman, how unfair can the Minister be?

The Chairman: Order please. Let us proceed, Mr. Carter; you have been waiting for so long.

Mr. Carter: I think the Newfoundland Government has an obligation, sir, to make sure that the Terms of Union are being upheld. If, as the Minister suggests, they are not being upheld by this high cost of transportation on the gulf, well then I certainly think it is up to...

[*Interpretation*]

pour le traversier d'Argentia-North-Sydney celui de Port-aux-Basques-North-Sydney, du point de vue des marchandises et du poi de vue des passagers, sont conformes à la co dition 33 des conditions de l'Union, où il e dit que le coût de transport des gens ou d marchandises sur un trajet de 90 milles doit pas coûter plus que pour la même di tance sur la ligne des chemins de f Nationaux.

M. Neary: Je crois, monsieur le présider que M. Carter ne comprend pas très clair ment la condition de l'Union dont il fait me tion, car cela couvre les transports dans golfe, et non pas entre North Sydney Argentia. Toutefois, je conviens, monsieur président, que les taux sont élevés. Il s'ag d'une question de régie interne qui doit êt réglée par le CN. Nous pensons qu'à niveau-ci, nous n'allions pas traiter de probl mes locaux, mais de questions nouvelles.

M. Carter: Il est sûr que les prix sont él vés, et s'ils sont en contradiction avec l conditions de l'Union, est-ce que le gouvern ment de Terre-Neuve ne fait pas des repr sentations auprès de la Commission can dienne des transports, ou M. Hanley, ou Canadien-National, pour que les taux soie ajustés en conformité avec les conditions l'Union?

M. Neary: Je ne saurais répondre au no du gouvernement, monsieur le présider mais je puis dire que je suis sûr que l Carter fera tout en son pouvoir à Ottaw car, encore une fois, il s'agit d'une respons bilité fédérale.

M. Carter: Nous aimerions un peu d'ai cependant.

M. Neary: Est-ce que M. Carter et l McGrath voudraient toujours que le gouve nement provincial les aide pour essayer faire le travail qu'ils devraient effectuer Ottawa?

M. Carter: Tout de même, monsieur le pr sident, le ministre est très injuste!

Le président: A l'ordre s'il vous plaît. Lai sons parler M. Carter. Il attend depu longtemps.

M. Carter: En fait, le gouvernement Terre-Neuve se doit de voir que les conditio de l'Union soient maintenues. Si, comme ministre prétend, elles ne sont pas maint nues par le coût élevé du transport dans golfe, alors je pense que c'est au...

[*Texte*]

Mr. Neary: Is the honourable gentleman referring to the gulf or the Argentia ferry?

Mr. Carter: Well, it could be either one.

Mr. Neary: But you will agree that the Argentia ferry is not covered under the Terms of Union.

Mr. Carter: I will agree to that, yes, but I am referring now to the Port-aux-Basques-north Sydney one. Surely if the Terms of Union are not being upheld the Newfoundland Government should take the responsibility for this.

Mr. Neary: I have made some private inquiries and I have discovered that the Terms of Union regarding rates for passenger movement, for movement of freight, for movement of vehicles on the gulf are pretty well in line with rail rates across Canada.

Mr. Carter: We had a witness, Mr. Chairman, in either Halifax or Fredericton who, in replying to this same question, stated that it is much more costly to transport goods and services on that run than it would be on a comparable stretch of highway, and I think one of the big factors was of course, the time factor involved and the delay in the eight to ten hour boat run. I would certainly suggest, Mr. Chairman, that the Minister of Transportation should look into this problem because it is a very serious one.

Mr. Neary: Well, we are. As a matter of fact, this is one of the things that we are taking a very, very careful look at but early forecasts indicate that the rates on the gulf are pretty well in line with CN rates as they apply to rail right across Canada.

In the meantime, perhaps this might be of interest to the members of the Committee: there is one matter that concerns me on the gulf and that relates to the bringing of buses and trucks into Newfoundland.

Before the Trans-Canada Highway was completed, new trucks and buses from Oakville and Windsor and these places that came into Newfoundland, into Corner Brook and into St. John's, came by rail. But after we completed the Trans-Canada Highway, the automobile people here in Newfoundland worked out a cheaper method of getting the trucks—this only applies to trucks and buses—into Newfoundland by taking the truck or bus off the railway at North Sydney and driving it the rest of the way with an "in transit" sign. When the CN saw this happening, they immediately imposed a surcharge on

[*Interprétation*]

M. Neary: Est-ce qu'il s'agit du traversier d'Argentia ou du golfe?

Mr. Carter: L'un ou l'autre.

M. Neary: Vous conviendrez que le traversier d'Argentia n'est pas couvert par les conditions de l'Union.

M. Carter: Je suis d'accord, mais je parle maintenant du traversier Port-aux-Basques-North-Sydney. Certainement si les conditions de l'Union ne sont pas maintenues, le gouvernement de Terre-Neuve devrait en être responsable.

M. Neary: J'ai fait enquête personnellement, et j'ai découvert que les conditions de l'Union, quant aux taux pour le transport des passagers, des marchandises, des véhicules dans le golfe, sont passablement les mêmes que les taux de chemins de fer à travers le Canada.

M. Carter: Nous avons eu un témoin, monsieur le président, à Fredericton ou à Halifax, qui, en réponse à la même question, nous a dit que c'était beaucoup plus coûteux de transporter des marchandises sur ce parcours que ce ne le serait sur une grande route comparable, et un des facteurs essentiels est évidemment le facteur temps, et le retard de 8 à 10 heures causé par la traversée en bateau. Je propose donc que le ministre des Transports examine ce problème, car il est très grave.

M. Neary: C'est une des choses que nous étudions très attentivement, mais les premières prévisions ont indiqué que les taux du golfe sont passablement conformes aux taux du CN pour le chemin de fer à travers le Canada.

En attendant, ceci pourrait peut-être intéresser les membres du Comité: il y a une question qui me préoccupe en ce qui concerne le golfe, et elle a trait à l'importation d'autobus et de camions à Terre-Neuve.

Avant la fin de la construction de la route transcanadienne, les autobus neufs qui venaient d'Oakville, de Windsor et tous ces autres endroits, qui étaient importés à Terre-Neuve, à Corner Brook, et à Saint-Jean, nous arrivaient par chemin de fer. Mais après la construction de la route transcanadienne, les gens de l'automobile, ici à Terre-Neuve, ont trouvé un moyen moins dispendieux de faire venir les camions, il ne s'agit que des camions et des autobus, en les débarquant du traversier à North Sydney et en les conduisant le reste du trajet, avec une affiche «de passage». Lorsque le CN a vu que cela se passait, il a

[*Text*]

the people who were having it delivered.

I think this is quite unfair. I think this should be eliminated, because, as I pointed out earlier, to get back to what the honourable gentleman over here said, it is the duty of the automobile dealers to try to get these vehicles into Newfoundland at the cheapest possible delivery rate. Here, through their own initiative, they figured out a way to get these buses and trucks to the purchaser in Newfoundland at a probable saving of $100 or $150 and the CN threw a hurdle in their way by putting on a surcharge of something over $100. I would like to know under what authority they did this. Perhaps, Mr. Chairman, your Committee could investigate this because I have already had a request from the automobile association.

Mr. Nowlan: This, Mr. Chairman, is my supplementary question but I do not know if the Minister is finished.

Mr. Neary: You can go ahead and ask your question but I only want to say...

Mr. Nowlan: It only arose because of your exchange with Mr. Carter and about federal-provincial responsibilities and where you sometimes divide the line. You sort of anticipated by mental telepathy my question. Have you, as Minister of Transport, considered this discrimination between the Canadian National trucking service and the private trucking service and taken the initiative on behalf of the government to apply to the CTC for some redress?

Mr. Neary: I might say, Mr. Chairman, in answer to that question that the honourable gentleman is perfectly right that we are very much concerned with certain aspects of CN policy. It may not be quite correct to say this, but it appears CN are implementing a trucking service in Newfoundland only on paved roads and are staying away from the dirt roads and leaving the service on the dirt roads and the gravel roads to the private operator, so that he can go out and wreck his equipment and so forth, and then, when the road is paved, CN will make an application to provide a service in that particular area. We think this is very, very unfair.

May I point out that on Monday there is to be a hearing before the Board of Commissioners of Public Utilities on this very matter, and it would not be fair for me to anticipate their decision.

[*Interpretation*]

immédiatement imposé une surtaxe, une sur charge pour les gens qui les faisaient livrer.

Je trouve que cela est très injuste et qu cela devrait être éliminé, parce que, comm je l'ai dit auparavant, pour revenir à ce qu disait l'autre député tout à l'heure, c'est l'o bligation des vendeurs d'automobiles de ten ter d'obtenir les automobiles au moindre coû possible. Et voici que de leur propre initia tive, ils avaient réussi à trouver moyen d'ob tenir les autobus et les camions pour l'ache teur à Terre-Neuve en épargnant peut-êtr $100 ou $150. Et le CN les en a empê ché en imposant une surtaxe de plus d $100. J'aimerais savoir en vertu de quell autorité le CN l'a fait. Monsieur le présiden peut-être votre Comité pourrait-il fair enquête à ce sujet, car j'ai déjà reçu un demande de la part de l'Association de automobilistes.

M. Nowlan: Voici ma question supplémen taire, monsieur le président, mais je ne sai pas si le ministre a terminé.

M. Neary: Posez votre question, mais j veux seulement ajouter que ...

M. Nowlan: Je la pose seulement à cause d l'échange que vous avez eu avec M. Carter a sujet des responsabilités fédérales-provincia les, et où se situe la ligne de démarcatior Vous avez anticipé un peu ma question pa télépathie. A titre de ministre des Transports aviez-vous songé à cette distinction injust qui existe entre le service de camionnage d CN, et le service de camionnage privé et a nom du gouvernement, avez-vous pris l'initia tive de demander à la Commission cana dienne des Transports de corriger la situation

M. Neary: Je pourrais dire que l'honorabl député a parfaitement raison. Nous nou préoccupons vraiment de certains aspects d la politique du CN. Ce n'est peut-être pas tou à fait juste de dire ceci, mais il semble que l CN met en vigueur un service de camionnag exclusivement sur les routes pavées, qu n'emprunte pas du tout les chemins de terre les laissant à l'exploitant particulier pour qu celui-ci puisse justement ruiner son matérie Et lorsque la route sera pavée, le CN fera un demande pour desservir cette région. Nou trouvons que c'est très injuste de la part d CN.

Et permettez-moi d'ajouter que lundi, il aura à ce sujet une audience devant le *Boar of Commissioners of Public Utilities*. Alors c ne serait pas approprié de ma part d'anticipe ce que sera leur décision à cet égard.

[exte]

Mr. Nowlan: Perhaps this cannot be an-ered because it means part of the Task Force at the Minister mentioned earlier, but on is very point of discriminatory rates tween a railway-trucking combination and e private for-hire trucker, is the Minister in vour of, is it any part of the Task Force port to have uniform rates on CP ferries—d there is only one of those in the Atlantic ea—whether it be a CP carrier through ith Transport, of any other for-hire carri- or in the Canadian National situation, plying to Newfoundland and Prince Ed-rd Island?

Mr. Neary: The answer to your question is s, but may I point out, Mr. Chairman, in swering that question that I do not think at the extension of the Maritime freight es subsidies to all modes of transportation going to be of very much benefit to the ckers or the shippers or the airlines.

Mr. Nowlan: No, no. I appreciate that but I s not talking about extension of subsidies all forms of transportation, but specifically at there be uniformity in the rates that her the CN or the CP ferry services arge, whether they charge them to their n carriers, Smith or Eastern, or to a for-e carrier; in other words, so that they minate the hurdle at Port aux Basques that u mentioned?

Mr. Neary: Yes, I would say yes to that estion.

Mr. Nowlan: I hope that that was consid-d by the Task Force and as part of the commendation of the Premiers. Can you tell that much?

Mr. Neary: I do not have the report. I ould have it tonight. If you were to ask me at question tomorrow...

Mr. Nowlan: Well, we will see you tonight.

An hon. Member: We may not be here norrow.

Mr. Neary: Besides, it would not be fair for to divulge the contents of the report fore the Premiers do so.

Mr. Nowlan: No, no I was not asking you at position you took. I was asking, Mr. airman, was this specific point covered by

[*Interprétation*]

M. Nowlan: Vous ne pouvez peut-être pas répondre car cela fait partie peut-être du groupe spécial qui a été mentionné par le ministre plus tôt. Mais sur ce point des taux discriminatoires entre une entreprise mixte de chemin de fer et de camionnage en conjonction, et le camionneur privé, est-ce que le ministre est en faveur ou est-ce que cela relève du rapport du groupe spécial d'obtenir des taux uniformes sur les traversiers du Pacifique-Canadien, il n'y en a qu'un dans la région de l'Atlantique, que ce soit un transporteur du Pacifique-Canadien, grâce à la *Smith Transport* ou de tout autre camionneur de louage, ou dans la situation du Canadien-National, concernant Terre-Neuve ou l'Île-du-Prince-Édouard.

M. Neary: Ma réponse est oui, mais je ne crois pas que l'extension des subventions en vertu de la Loi sur les taux de transport des marchandises à tous les modes de transport, sera un avantage pour les camionneurs, les expéditeurs ou les compagnies aériennes.

M. Nowlan: Oui, je comprends cela. Mais je ne parlais pas d'étendre les subsides à tous les modes de transport, mais précisément, qu'il y ait uniformité dans les taux que les traversiers soit du CN, soit du CP, chargent, que ce soit à leurs propres transporteurs, Smith ou Eastern, soit aux sociétés de transport de camions de louage. En d'autres termes, de sorte qu'ils éliminent l'obstacle à Port-aux-Basques que vous avez mentionné.

M. Neary: Je dirais oui à cela.

M. Nowlan: J'espère que ce groupe spécial a étudié cet aspect comme faisant partie des recommandations formulées par les premiers ministres. Pourriez-vous nous le dire?

M. Neary: Je n'ai pas le rapport à l'heure actuelle. Je l'aurai probablement ce soir. Est-ce que vous pourriez me poser la question demain?

M. Nowlan: Nous nous verrons justement ce soir.

Une voix: Nous ne serons peut-être pas ici demain.

M. Neary: D'aure part, il ne serait pas juste que je révèle le contenu du rapport avant que les premiers ministres ne le fassent.

M. Nowlan: Non. Je ne vous demandais pas quelle était votre position, mais plutôt, est-ce que ce point spécifique était visé par le

[*Text*]

the Task Force and as part of the recommendation of the four Premiers?

Mr. Neary: Let me answer the honourable gentleman this way Mr. Chairman: there is nothing pertaining to transportation in the Atlantic region that we have not covered in our Task Force meeting.

The Chairman: Gentlemen, a last question from Mr. Nesbitt for qualification.

Mr. Rock: Mr. Chairman, if possible, I have a very short question.

The Chairman: Yes. Go ahead.

Mr. Rock: Mr. Minister, has your government ever studied jointly with the Government of Quebec a highway system that would connect Newfoundland with the rest of Canada from the Strait of Belle Isle's proposed tunnel?

Mr. Neary: Mr. Chairman, I cannot answer that question for the government. However, I can say that in our brief, which reflects government policy, we say that we plan in phase 2 to construct a tunnel and a road from eastern Labrador to Labrador City. The other part of your question I cannot answer.

Mr. Jones: Mr. Chairman, I honestly think that I answered the same question for another hon. gentleman a few moments ago in the negative.

Mr. Nesbitt: Mr. Chairman, on a point of order.

The Chairman: It is just a point of clarification.

Mr. Nesbitt: Well, I will raise it as a point of order because I do not know whether we have a procedure for a point of clarification—which it really is.

It would seem, Mr. Chairman, from the rather lengthy questioning of the witnesses this morning—they have been very patient and very helpful...

Mr. Neary: Thank you.

Mr. Nesbitt: ..that a great deal of additional time is going to be expended on questions concerning passenger service, railway versus bus. It is apparently quite a serious local issue here and a number of members of

[*Interpretation*]

groupe de travail et est-ce que cela faisa partie des recommandations formulées par l quatre premiers ministres?

M. Neary: Pour répondre à votre questio il n'y a aucun aspect touchant le transpo dans la région atlantique qui n'a pas été cou vert à la réunion de notre groupe de travail.

Le président: Une dernière question de l part de M. Nesbitt sur un point d'éclai cissement.

M. Rock: J'aimerais poser une question trè courte aussi.

Le président: C'est bien. Allez-y.

M. Rock: Monsieur le ministre, votre gou vernement a-t-il jamais étudié, conjointemen avec le gouvernement de la province de Qué bec, la possibilité d'avoir un réseau routie qui relierait Terre-Neuve au reste du Canad à partir du tunnel proposé pour le détroit d Belle Isle?

M. Neary: Monsieur le président, je n peux répondre à cette question au nom d gouvernement, mais je puis vous dire que dans notre mémoire, qui reflète la politiqu du gouvernement, nous précisons qu'à l'étap numéro 2, nous nous proposons de construir une route et un tunnel de l'est du Labrado jusqu'à Labrador City. Pour ce qui est d l'autre partie de votre question, je ne peux répondre.

M. Jones: Monsieur le président, il me sem ble, honnêtement, avoir répondu par la néga tive à la même question posée tout à l'heur par un autre membre du Comité.

M. Nesbitt: Monsieur le président, j'invo que le Règlement.

Le président: Il ne s'agit que d'u éclaircissement.

M. Nesbitt: Mais je vais invoquer le Règle ment, car je ne sais pas s'il existe une procé dure à suivre pour obtenir un éclaircisse ment—ce que c'est en fait. Il me semble monsieur le président, que, vu le long inter rogatoire auquel nous avons soumis le témoins ce matin—et ils ont été très patient et nous ont beaucoup aidé...

M. Neary: Merci.

M. Nesbitt: ... que l'on va consacrer encore beaucoup de temps aux questions relatives au service-voyageurs, en pesant le pour et le contre du chemin de fer et de l'autobus. I semble que ce soit une question locale très

[*Texte*]

e Committee from other parts of Canada ho have not been aware of that would per- ps like to get as much information as they n in the shortest possible time.

Now I understand Mr. Neary has just cently acquired his Transport portfolio and do not think that he can be expected to swer too many of the questions because he ould not yet have all the necessary back- ound. I do not think it would be fair to m.

Mr. Neary: I am not a walking ency- pedia yet.

Mr. Nesbitt: That is what I meant, Mr. ary. Then, Mr. Chairman, we have Order . R-2673 of the Canadian Transport Com- ssion which is really part of the evidence at we have before us. It is the order refer- g to what is popularly known I believe as e Newfie Bullet. Section 5 of that order ads:

If, prior to April 15,...

d I think that is a very important date, Mr. airman,

...1969, the Applicants fail or are unable to perform any of the conditions enumerated above, or if at any time before that date the Committee...

d that refers to the Committee of the nadian Transport Commission

...is not satisfied that the bus service is at least as good as the present passenger train service, it may upon notice to the Applicants...

d so on,

..reconvene the hearing...

w I think we must more succinctly clarify ne of the background information on this tter and also this order, because it is very gue. It says, "if the Committee—meaning e CTC or branch thereof—is not satisfied." do not know how they are going to know ether they are satisfied or not unless some- dy complains.

Now we have with us, Mr. Chairman, Mr. nley who, by agreement, is not to appear fore us as a witness—and I think we are all reed on that. Mr. Hanley is here as an server. The reason I bring this up is that s passenger service on the railway, rightly wrongly, is going to be suspended on April and by the time this Committee gets back

[*Interprétation*]

importante ici, et les membres du Comité qui viennent d'autres régions du Canada, et qui ne sont peut-être pas au courant de la question, voudraient sans doute obtenir autant de renseignements que possible en aussi peu de temps que possible. Je crois comprendre que M. Neary vient de recevoir tout récemment le portefeuille des Transports, et l'on ne peut pas s'attendre à ce qu'il soit en mesure de répondre à beaucoup de questions, car il n'a sans doute pas encore tous les renseignements nécessaires. Je ne pense pas que ce serait juste à son égard.

M. Neary: Non, je ne suis pas encore une encyclopédie ambulante.

M. Nesbitt: C'est justement ce que je vous-lais dire, monsieur Neary. De plus, monsieur le président, il y a l'ordonnance n° R-2673 de la Commission canadienne des transports, qui en fait est inclue dans les témoignages que l'on nous présente. Il s'agit de l'ordonnance relative à ce qu'on appelle communément, je crois, le *Newfie Bullet*. On dit à l'article 5:

Si, avant le 15 avril ...

et je pense que cette date est très importante, monsieur le président.

... 1969, les demandeurs n'exécutent pas, ou ne sont pas en mesure d'exécuter, l'une ou l'autre des conditions énumérées ci-dessus, ou si à un moment donné avant cette date, le Comité ...

... et l'on veut parler ici du comité de la Commission canadienne des transports.

...n'est pas convaincu que le service d'autobus est au moins aussi bon que le service de trains de voyageurs actuel, il pourra, après en avoir notifié les demandeurs ..

etc.

...se réunir à nouveau en audience...

Je pense qu'il nous faut clarifier de façon plus succincte certains des renseignements de base à ce sujet, ainsi que cette ordonnance, qui est plutôt vague. On dit: «si... le Comité»...c'est-à-dire la Commission canadienne des transports, ou l'une de ses sections— «.. n'est pas convaincu». Comment va-t-il savoir s'il est convaincu ou non, si personne ne se plaint?

Monsieur le président, nous avons ici M. Hanley qui n'est pas censé comparaître devant nous à titre de témoin je pense que nous sommes tous d'accord là-dessus. Il est ici à titre d'observateur. Si je soulève cette question, c'est que, à tort ou à raison, ce service-voyageurs des chemins de fer va être annulé le 15 avril, or, d'ici que le Comité retourne à

[*Text*]

to Ottawa, draws up its report, has our proceedings all translated and recorded, it may well be that that date will be reached or passed. Also, before we are able to have the Chairman of the Canadian Transport Commission and his officials before us there may be a further lapse of time. I believe in trying to make helpful suggestions in this regard.

I suggest that perhaps we might reconsider whether or not Mr. Hanley should give evidence. Of course, appropriate enquiries would have to be made in Ottawa. Mr. Hanley might be able to clarify some of these terms, particularly this order that I refer to—because it is very vague and very unclear. If that is not agreeable and if perhaps Mr. Hanley is not given authority by the Chairman of the Commission, then perhaps Mr. Pickersgill, the Chairman of the Commission, might be invited to come here and clarify a number of these things for us. As it would save us a great deal of time I think this is something that we might give very serious consideration to.

The Committee, meaning the CTC, has to be satisfied that the bus service is at least as good. Mr. Hanley no doubt will report when he goes back and give some helpful suggestions. Perhaps someone more senior to Mr. Hanley might come. I think we might seriously consider inviting Mr. Pickersgill to come down here because he could certainly clarify a lot of these matters for us and save us a great deal of time. I think that he himself would be interested in comparing the rail and bus service.

The Chairman: To save time, Mr. Nesbitt, would you agree to leave this to the steering committee to decide when they have a meeting after the noon adjournment.

Mr. Nesbitt: Yes.

The Chairman: Is it agreed.

Some hon. Members: Agreed.

Some hon. Members: No.

The Chairman: Gentlemen, this is the end of the question period. I would like to thank the two ministers and the other witnesses. I hope you will be with us on the train tonight.

[*Interpretation*]

Ottawa et rédige son rapport, et que compte rendu des délibérations soit entière ment traduit et imprimé, il se peut fort bie que cette date soit déjà là, ou même dépassé De plus, il peut s'écouler encore plus d temps avant que nous ne puissions convoque le président et les représentants de la Com mission canadienne des transports. A mo avis, il faudrait quelques propositions utiles cet égard.

Peut-être pourrions-nous remettre en ques tion la possibilité de laisser M. Hanley témoi gner. Evidemment, il faudrait s'informe auprès d'Ottawa. M. Hanley pourrait peut être clarifier certaines des expression employées, en particulier, dans l'ordonnanc qui est très vague et fort peut claire. Si cel ne convient pas, et si le président de la Com mission n'autorise pas M. Hanley à témoigne peut-être pourrait-on inviter M. Pickersgill, l président de la Commission, à venir ici pou éclaircir certains points. Je crois que nou devrions y songer très sérieusement, car cel pourrait nous faire gagner beaucoup d temps.

Le comité, soit la Commission canadienn des transports, doit être certain que le servic d'autobus est au moins aussi bon que le ser vice de chemin de fer actuel. A son retour, M Hanley, sans aucun doute, fera rapport e formulera quelques recommandations utile Peut-être pourrait-on faire venir quelqu'u qui ait plus d'ancienneté que M. Hanley. l me semble que nous pourrions envisage sérieusement d'inviter M. Pickersgill à veni ici, car il pourrait certainement éclairci beaucoup de ces points et nous faire gagne beaucoup de temps. Je pense que lui-mêm serait heureux de pouvoir comparer le servic ferroviaire et le service d'autobus.

Le président: Afin de gagner du temps monsieur Nesbitt, seriez-vous d'accord pou laisser le Comité de direction trancher cett question lorsqu'il se réunira après la suspen sion de la séance à midi?

M. Nesbitt: Oui.

Le président: Cela vous convient-il?

Des voix: D'accord.

D'autres voix: Non.

Le président: Messieurs, c'est la fin d notre période de questions. J'aimerais remer cier les deux ministres et les autres témoins J'espère que nous vous reverrons ce soir bord du train.

Texte]

Mr. Rock: Mr. Chairman, will you give the ress information concerning the system that as been inaugurated for our Committee hile we are travelling?

The Chairman: Mr. Rock, it is not working well this morning so we will wait. Our ext brief will be from Bowaters Newfound- nd Limited, Corner Brook. I would ask the eople who have that brief to come forward, lease. On my right is Mr. Downey and I will sk him to give us a short briefing.

Mr. Cyril J. Downey (Sales and Distribu- on Manager, Bowaters Newfoundland Limit- d, Corner Brook, Newfoundland): Thank ou, Mr. Chairman. Like Mr. Neary, I am ew to my job. This brief, gentlemen and adies, is something new that conflicts a little it with what just went before. To bring it nto perspective let me put it this way: we in ne paper business in Canada, as you are well ware, at the moment are going through a ttle bit of an economic survival battle.

At Corner Brook we are no different than a t of people, and we have been trying to iversity a little bit and get into what are nown as ground wood specialty papers. ow, for this trade we have to depend quite bit on train loads and car loads rather than nip loads. This brings a little different item nto perspective that needs some clarification n the light of the questions that were asked st recently.

We have, along with CNR people, carried ut some very successful trials in transporting aper from the Corner Brook mill by rail. We ave transported some 6,000 tons in this man- er over the last few months and, with the ery great co-operation of CN people nvolved, now think we are going to get a eduction in rates for this activity where we ut paper into Chicago, Detroit and other laces that far away. We were working under uite a handicap with the published rates as ney exist and the need for some revision ecame apparent in our trials and in our ctivity.

[*Interprétation*]

M. Rock: Monsieur le président, voulez-vous expliquer aux journalistes le nouveau système inauguré ici maintenant?

Le président: Il ne fonctionne pas tellement bien ce matin, alors, nous devrons attendre avant de l'annoncer.

Maintenant, nous entendrons la *Bowaters Newfoundland Limited* de Corner Brook. Je demanderais donc à ses représentants de venir se présenter. Sont-ils ici?

J'ai à ma droite, M. Downey. Je demanderais à M. Downey de nous donner une brève présentation de leur soumission.

M. Cyril J. Downey (gérant des ventes et de la distribution, Bowaters Newfoundland Limited, Corner Brook, Terre-Neuve): Merci beaucoup, monsieur le président. Tout comme M. Neary, je suis nouveau dans le métier. Ce mémoire, mesdames, messieurs, est quelque chose de nouveau qui entre quelque peu en conflit avec ce qui s'est déroulé auparavant, ici. Et pour vous présenter la perspective, permettez-moi de l'énoncer de la façon suivante: Comme vous le savez très bien, nous autres, dans l'entreprise du papier au Canada, sommes engagés dans une sorte de bataille de survivance économique.

A Corner Brook la situation n'est pas différente de celle qui prévaut dans les autres centres. Nous avons essayé de diversifier quelque peu notre industrie et de nous introduire dans ce qu'on appelle «papier spécial sans pâte mécanique». Pour ce genre de fabrication, il nous faut dépendre en grande mesure sur des chargements de trains ou de wagons plutôt que sur des chargements de navires, ce qui met en évidence un aspect quelque peu différent qui nécessite quelques précisions étant donné les questions qui nous ont été posées tout récemment.

Nous avons entrepris avec le National-Canadien quelques essais très réussis pour le transport du papier à partir de Corner Brook, par chemin de fer. Nous avons transporté quelque 6,000 tonnes avec ce mode de transport au cours des derniers mois et, grâce à l'excellente collaboration que nous avons eue des représentants du National-Canadien, nous sommes maintenant en mesure, ou du moins, songeons obtenir une baisse des tarifs pour ces expéditions qui nous permettent d'acheminer du papier aussi loin que Chicago, Détroit et d'autres endroits éloignés. Nous étions fort désavantagés par rapport aux tarifs publiés tels qu'ils se présentaient, et à la suite des essais entrepris et de notre activité, nous avons constaté qu'une certaine révision s'imposait.

[*Text*]

We now wish to provide for the Committee's consideration a few suggestions that may influence attention and effort in relieving further some of the problems that we have in this connection. The present ingenious method of overcoming the narrow gauge rail problem in regard to freight cars results in a very fine job of transplanting cars from the mainland over onto our narrow gauge and putting them right into the door for paper loading, but we find that we have problems that must be considered and overcome. The CNR people appear to have reached their limit in this regard from the conversations and discussions we have had.

The reason for this is that the little trucks the mainland cars are put on have insufficient bearing support to carry the big loads, the small gauge rail itself has a load limit, trestles and bridges have limitations for the heavier loads and the road bed curves, and so on. Thus, while we have cars now capable of taking 120,000 pounds—I heard the figure 30 tons here a while ago, but it is up to 100,000 pound at the moment—we are not able to take advantage of this further 20,000 pounds and thereby become more competitive because of these items I mentioned.

Another feature of paper traffic today which is very desirable is the use of cushion-underframe cars. These are available to our competitors all over Ontario and Quebec and I think CNR will be able to provide those to us in time. However, unless something is done about this rail problem, the bearings of trucks and so on, we will not be able to load them anyway, so here we are caught in this bind.

Finally, at the moment paper offers the most likely means on the island today of creating some kind of balance of trade for the return of rail cars coming into the country, so we should be able to fill that in and help the economy out a little bit if we do this.

Mr. Chairman, that is a summary of my brief.

The Chairman: Thank you, very much. Mr. Rose?

Mr. Rose: Mr. Chairman, I will be brief just as I always am. Sir, is overproduction

[*Interpretation*]

Nous désirons à présent présenter comité, quelques suggestions qui pourraie nous aider à alléger certains des problèm que nous éprouvons à cet égard. La métho ingénieuse que nous utilisons en ce momer pour surmonter le problème que présente les rails à voie d'écartement étroit pour ce q est des wagons marchandises, permet transfert des wagons à partir du contine jusqu'à nos voies d'écartement étroit, les me tant ainsi pratiquement devant nos port pour le chargement du papier, mais no trouvons que nous éprouvons encore des pr blèmes qu'il nous faut étudier et surmonte Les représentants du National-Canadien sen blent avoir atteint la limite à cet égard; c'e ce qui ressort des entretiens et des convers tions que nous avons eus.

La raison en est que les petits châssis-tru sur lesquels les wagons du continent so chargés, n'ont pas un point d'appui suffisa pour supporter ces chargements lourds, l rails à écartement étroit ne peuvent supporte que des chargements limités, les chevalets d ponton et les ponts comportent des limit quant aux chargements lourds, et l'on do tenir compte des lits de voies courbées. Ain donc, bien que nous ayons maintenant d wagons qui peuvent prendre 120,000 livres- j'ai entendu le chiffre trente tonnes—il y quelque temps, mais cela peut aller jusqu 100,000 livres de tolérance, c'est pourquoi no ne sommes pas en mesure de tirer profit d ces 20,000 livres supplémentaires et deven ainsi plus compétitifs.

Une autre caractéristique du transport d papier aujourd'hui, est l'utilisation de wagor comportant des châssis à coussinets. Tous n compétiteurs de l'Ontario et du Québec e disposent et je pense que le National-Can dien pourra nous en fournir éventuellemen Cependant, à moins qu'on ne règle ce pr blème ferroviaire, la tolérance des wagon etc .. nous ne serons pas en mesure de l charger, de toute façon; ainsi donc nous son mes coincés.

Pour terminer le papier offre en ce momer le moyen le plus probable sur l'île aujou d'hui de créer une certaine balance comme ciale pour le chemin du retour des wagor vers le continent; et par conséquent nou devrions être en mesure de combler l'espac libre et aider quelque peu l'économie. Voil donc, le résumé de mon mémoire, monsieu le président.

Le président: Merci beaucoup.

M. Rose: Monsieur le président, je sera bref, comme je l'ai toujours été. La surpro

[*Texte*]

ne of the problems of the pulp and paper dustry?

Mr. Downey: I do not think that is relevant, but I will try to answer it.

Mr. Rose: You mentioned it in your opening statement, sir.

Mr. Downey: It is a problem of Canada day. In our particular case the domestic arket in the United States, which is our big ature for trade, has been declining because the increasing production in that area and other closer areas.

Mr. Rose: Leaving that for a moment, sir, I otice you would not agree with government olicy that the money should be invested in ghways. I see from your table that although ur production and your use of rail has gone considerably, it is costing you more and ore all the time, so you do not agree with e Government of Newfoundland's brief esented here earlier that the priority should on highways.

Mr. Downey: This is a small activity. As I id, we are economically diversifying here d this could help us in that move.

Mr. Rose: From your company's point of ew then...

Mr. Downey: Also paper in general; there Price and also a new company coming in in few years.

Mr. Rose: Then you are anxious to see the grading of the railroad?

Mr. Downey: Most anxious. Not only that, it being done but there are certain features at are stymied at the moment.

Mr. Rose: Have you negotiated agreed rates ith the CNR for your product?

Mr. Downey: We have.

Mr. Rose: Has your volume been helpful to u?

Mr. Downey: Yes.

Mr. Rose: Are you looking forward to any rther reduction as your volume increases?

Mr. Downey: We are.

[*Interprétation*]

duction est-elle un des problèmes de l'industrie de la pâte et du papier?

M. Downey: Je ne crois pas que ce soit important, mais j'essayerai d'y répondre.

M. Rose: Vous venez de le dire dans votre présentation.

M. Downey: C'est un problème au Canada, aujourd'hui. Dans notre cas particulier, le marché local américain qui est un de nos plus importants débouchés, a connu une baisse à cause de l'augmentation de la production dans cette région-là et dans d'autres localités environnantes.

M. Rose: Cela mis à part, je remarque que vous ne seriez pas d'accord avec la politique du gouvernement pour investir dans la construction de routes. Je vois d'après le tableau que, malgré l'augmentation sensible de votre production et votre utilisation accrue du service ferroviaire, le transport vous coûte de plus en plus, et vous n'en convenez pas avec le mémoire du gouvernement de Terre-Neuve, que nous avons entendu plus tôt à l'effet que les priorités devraient être portées du côté des routes.

M. Downey: C'est une petite activité. Comme je le disais, sur le plan économique nous sommes en train de diversifier la production ce qui pourrait nous être bénéfique.

M. Rose: Donc, du point de vue de votre compagnie...

M. Downey: Ainsi que le papier en général; il y a la «Price» et il y en a une autre qui viendra s'y établir d'ici quelques années.

M. Rose: Par conséquent vous aimeriez voir une amélioration de ces services ferroviaires?

M. Downey: Avec impatience. Non seulement ça se fait, mais certains aspects sont bloqués en ce moment.

M. Rose: Vous avez négocié des tarifs convenus avec le National-Canadien pour vos produits?

M. Downey: Oui, nous l'avons fait.

M. Rose: Votre volume vous a-t-il servi?

M. Downey: Oui.

M. Rose: Vous attendez-vous à voir d'autres diminutions au fur et à mesure que votre volume augmentera?

M. Downey: Oui.

[*Text*]

Mr. Rose: Are your labour costs here lower than they are in the rest of the country, the United States and British Columbia?

Mr. Downey: They compare very well with Eastern Canada as a whole, but labour costs I think are a little higher than in certain other areas.

Mr. Rose: Than in New Brunswick, for instance?

Mr. Downey: I think you might find that they are, yes.

Mr. Rose: Are your plants organized in any way?

Mr. Downey: Our which?

Mr. Rose: Are your plants organized?

Mr. Downey: Organized by labour?

Mr. Rose: Yes.

Mr. Downey: Yes, they are.

Mr. Rose: You have a labour union?

Mr. Downey: Right.

Mr. Rose: Could you tell me what union, please?

Mr. Downey: It is a matter of record, is it not?

Mr. Rose: I will leave that, sir. Another point that I wanted to ask about is whether you find the fine paper tariff of $27 to $35 is keeping your company from diversifying and taking its rightful share of the U.S. market.

Mr. Downey: I do not think it is.

Mr. Rose: This is not the problem?

Mr. Downey: This is not the problem.

Mr. Rose: You mentioned your interest in diversification and going into other kinds of paper products. So where do you look for your market then, or can you meet the U.S. price even with their tariff of up to $35?

Mr. Downey: We have been in the water-borne rate field and this puts us in a fairly competitive position. It is on the basis of our water-borne rates that the CNR people are interested in trying to help us; they are trying to match as closely as they can the

[*Interpretation*]

M. Rose: Le coût de la main-d'œuvre est-moins élevé ici que pour le reste du pays, d États-Unis et de la Colombie-Britannique?

M. Downey: Cela peut fort bien se compa rer avec l'Est du Canada dans son ensembl mais je pense que le coût de la main-d'œuvr est un peu plus élevé dans certaines autre régions.

M. Rose: Qu'au Nouveau-Brunswick pa exemple?

M. Downey: Je crois que c'est le cas, oui.

M. Rose: Est-ce que vos usines son syndiquées?

M. Downey: Plaît-il?

M. Rose: Est-ce que vos usines son syndiquées?

M. Downey: Par le monde ouvrier?

M. Rose: Oui.

M. Downey: Oui.

M. Rose: Vous avez un syndicat?

M. Downey: Oui.

M. Rose: Pourriez-vous me dire le nom d syndicat?

M. Downey: C'est pour le compte rendu?

M. Rose: Je laisse tomber celle-ci. Un autre question. Je voudrais savoir si vou trouvez que le tarif de 27 à 35 dollars pour l papier fin empêche votre société de s'engage dans la diversification et de prendre sa just part du marché américain?

M. Downey: Non, je ne le crois pas.

M. Rose: Ce n'est pas le problème?

M. Downey: Non.

M. Rose: Vous avez parlé de la diversifica tion qui vous intéresse et de vous engage dans la production d'autres genres de papier Alors, de quel côté vous tournez-vous pou vos marchés, ou pouvez-vous faire face a tarif américain, même avec leur tarif de 3 dollars?

M. Downey: Nous sommes engagés dans l domaine des tarifs du transport maritime e cela nous met dans une situation assez compé titive. C'est en se basant sur nos tarifs d transport maritime que le National-Canadie est vraiment désireux de nous aider; il

[*Texte*]

competition that is given by water-borne activity.

Mr. Rose: This is my final question, sir: Has your company ever considered establishing its own fleet of water carriers? This was done by someone in New Brunswick, I believe.

Mr. Downey: We have it now, but it does not suit. As I said, in this kind of trade it is train loads and carload lots that we are interested in.

Mr. Rose: I see. Thank you.

The Chairman: Mr. Horner?

Mr. Horner: I wonder if you could give the Committee some general information. Would you say that the pulp and paper industry is Newfoundland's biggest, or is it the fishing industry? Could you give us some comparison just so we will know what effect transportation really has on the Province of Newfoundland?

M. Downey: So far we have transported only 6,000 tons in the manner I am talking about. I think you would find the fish go over the roads and the railroads at a higher tonnage rate than that, but we do look forward to a growth that could be of the order of 40,000 or 50,000 tons a year.

Mr. Horner: In looking over your brief, you outline the Terms of Union. I wonder, in light of the importance of the pulp and paper industry, if you would give us your opinion concerning Term 32 as you have listed it here. Would you say that in living up to its commitments of Confederation it is necessary for the federal government to make sure the railway service is provided in Newfoundland?

I do not want to put you on the spot, but you dealt with the Terms of Union in your brief and you outlined Term 32. Term 32 deals with rail traffic and the rates on rail traffic. You do not really want to commit yourself on that?

Mr. Downey: I do, but I am not quite clear on your question.

Mr. Horner: Well, the Newfoundland Government said—and I want to be fair to them—that they really did not think it was in the Terms of Union with the mainland that a

[*Interprétation*]

essayent autant que possible de soutenir la concurrence qui leur est livrée par le transport maritime.

M. Rose: Une dernière question. Votre société a-t-elle jamais songé à établir sa propre flottille de transporteurs maritimes? Ceci fut fait au Nouveau-Brunswick, je pense.

M. Downey: Nous l'avons présentement, mais ça ne convient pas. Comme je l'ai dit, dans ce genre de commerce, ce qui nous intéresse, ce sont les chargements par trains et par wagons.

M. Rose: Je vois. Merci beaucoup.

Le président: Monsieur Horner?

M. Horner: Pourriez-vous nous donner quelques renseignements d'ordre général? Laquelle de ces deux industries est la plus importante, celle de la pâte et du papier ou de la pêche? Pourriez-vous nous donner certaines comparaisons qui nous permettront de connaître les effets que peut avoir l'industrie du transport sur la province de Terre-Neuve?

M. Downey: Jusqu'ici nous n'avons transporté que 6,000 tonnes, de la façon dont je viens de le faire. Vous pouvez trouver, je pense, que le poisson est transporté par routes et par chemin de fer à des tarifs de tonnage plus considérable, mais nous nous attendons à ce que nous ayons de ce côté une croissance qui pourrait être de l'ordre de 40,000 ou 50,000 tonnes par année.

M. Horner: En étudiant votre mémoire, vous présentez les conditions de l'Union. Je me demande si, à la lumière de l'importance de l'industrie de la pâte et du papier, si vous pourriez nous donner votre opinion concernant l'article 32 tel que vous l'avez inscrit ici. Diriez-vous que, pour respecter les engagements qu'il a pris lors de la Confédération le gouvernement fédéral devrait s'assurer qu'un service ferroviaire soit fourni à Terre-Neuve?

Je ne veux pas vous rendre la vie difficile, mais dans votre mémoire vous parlez des conditions de l'Union, et vous avez insisté sur l'article 32. En ce qui me concerne, l'article 32 traite du trafic ferroviaire et de ses tarifs. Vous ne voulez pas vraiment, dire quoi que ce soit qui pourrait vous engager?

M. Downey: Oui, je veux bien, mais je ne comprends pas tout à fait votre question.

M. Horner: Le gouvernement de Terre-Neuve a dit—et je veux être juste à leur égard—qu'il ne croyait pas vraiment qu'une des conditions de l'Union avec le continent

[*Text*]

rail service should be maintained in Newfoundland.

Mr. Downey: This is your earlier question?

Mr. Horner: Yes, this was my earlier question to the Newfoundland Government. Now, do you agree with them?

Mr. Downey: I do not.

M. Horner: You do not agree with them?

Mr. Downey: No.

Mr. Horner: That is the one question I wanted you to answer. Now, would you agree that there should be a greater improvement on rail lines in Newfoundland?

Mr. Downey: Definitely, and I think somebody made it quite clear here a little while ago. There was a lot of discussion about freight versus express and it was pulled into focus by a gentleman on my left. I think one of the most important things done here this morning was clarifying the fact that freight is not a part of this controversy at all. We are still all interested in freight; I think everybody is.

Mr. Horner: That is true I agree, but do you think the railroad can maintain its position with the hauling of freight, pulpwood and paper without greater expenditures on improving the rail line?

Mr. Downey: I am not prepared to say, but I know from the efforts at the CN people and their dedication and activity that it has got to go. It is doing beautifully. What we see looks good for all of us.

The Vice-Chairman: Mr. Trudel?

Mr. Trudel: I have one short question, Mr. Chairman. I think in introducing your brief you mentioned the deteriorating conditions in the paper industry. Would you not say that this year's outlook is far different from what we had in 1968?

Mr. Downey: There are two answers to it. There is more trade but less profit.

[*Interpretation*]

serait le maintien d'un service ferroviaire Terre-Neuve.

M. Downey: Est-ce la question que vou avez posée plus tôt?

M. Horner: Oui, c'est la question que j'a posée au gouvernement de Terre-Neuv Êtes-vous d'accord?

M. Downey: Non, je ne suis pas d'accord.

M. Horner: Vous n'êtes pas d'accord?

M. Downey: Non.

M. Horner: C'est la question que je voulai que vous répondiez. Conviendriez-vous alors qu'il devrait y avoir une plus grande amélioration des voies ferrées à Terre-Neuve?

M. Downey: Définitivement, et je crois qu quelqu'un ici a bien tiré cette question a clair, il n'y a pas longtemps. On a longuemen discuté au sujet des marchandises par rappor aux messageries express, et cette question fait l'objet d'une mise au point par un membre, à ma gauche. Je pense que l'une de choses les plus importantes qui a été réalisé ici depuis ce matin etait celle de préciser l fait, que les marchandises ne sont pas l'obje principal de cette controverse. On s'y inté resse tous, c'est le cas pour chacun de nous je pense.

M. Horner: C'est juste, j'en conviens. Mai est-ce que vous croyez que les chemins d fer, peuvent maintenir leur situation dans l transport des marchandises, de pâte de boi et du papier, sans investir de plus grande sommes pour améliorer les service ferroviaires?

M. Downey: Je ne suis pas prêt à le dire mais je vois d'après les efforts déployés pa les gens du National-Canadien ainsi que leu dévouement et leur travail que, cela va donner des résultats. Ça marche à merveille e les affaires semblent être bonnes pour nous tous.

Le vice-président: Monsieur Trudel?

M. Trudel: Une question très brève, monsieur le président. Je pense qu'en présentant votre mémoire vous avez parlé des conditions qui se détériorent dans l'industrie du papier Est-ce que vous diriez que les perspectives pour cette année sont bien différentes de la situation de 1968?

M. Downey: Il y a deux réponses à votre question. Le commerce est plus considérable mais il y a moins de bénéfices.

[*Texte*]

Mr. Trudel: Well, we could also project this to several other industries. This is not unique to the paper industry but I think the outlook in 1969, generally speaking, will be far better regardless of where you are situated in Canada than it has been in 1968.

Mr. Downey: I hope you are right.

Mr. Trudel: Thank you.

The Vice-Chairman: Mr. McGrath.

Mr. McGrath: Mr. Chairman, I wonder if the witness could clarify or perhaps enlarge upon a remark that he made which was certainly of great interest to me but which I am very much afraid members of the Committee would find some difficulty in understanding. At least I do.

You spoke about the difficulties involved in transferring mainland cars on Newfoundland trucks—Newfoundland wheels—and there was a technical problem here regarding bearings. Do you mean by this that even though substantial money has been spent on this to provide this transfer system at Port aux Basques, notwithstanding these substantial expenditures it is not working? Is that correct?

Mr. Downey: No, sir. Do not put words.

Mr. McGrath: I am not putting words. I am trying to clarify a point which I do not understand.

Mr. Downey: What I said was this and let us put it back in context. The ingenious method of transporting the mainland cars to our little trucks over here so that these big cars can come to us is working beautifully.

Mr. Perrault: On a point of information, Mr. Chairman, could you explain just how that is done? It is of interest to us.

Mr. Downey: They have these large new ferries down there that bring the cars, the full trains, from the mainland right to Port aux Basques, and at that point they have a dual system of rails whereby they lift these large cars by a huge crane over from their own little trucks on the large wide gauge to the smaller trucks on the narrow gauge and just place them down there and bolt them up. And away they go. They can come right across the island.

Mr. Horner: A piggyback.

Mr. Downey: Yes. It is not quite a piggyback.

[*Interprétation*]

M. Trudel: Alors, nous pourrions aussi en faire l'extrapolation pour d'autres industries. Ce n'est pas une particularité de l'industrie du papier, mais je pense qu'en général, les perspectives de 1969 seront bien meilleures pour toutes les parties du Canada.

M. Downey: J'espère que vous avez raison.

M. Trudel: Merci.

Le vice-président: Monsieur McGrath.

M. McGrath: Monsieur le président, le témoin pourrait-il préciser ou peut-être élaborer un peu plus sur une remarque qu'il a faite et qui m'intéresse vraiment particulièrement. Je crains fort, toutefois, que les membres du Comité éprouveront quelques difficultés à comprendre, du moins c'est mon cas.

Vous avez parlé des difficultés qui se présentent pour le transfert des wagons en provenance du continent sur les camions de Terre-Neuve, et d'un problème concernant les charges autorisées. Est-ce que vous entendez par là que même si beaucoup d'argent a été dépensé à cet égard pour assurer ce système de transfert à Port-aux-Basques, que malgré ces dépenses considérables, le système ne fonctionne pas? Est-ce exact?

M. Downey: Non, ne me faites pas dire des choses.

M. McGrath: Je n'essaie pas de vous faire dire des choses. J'essaie simplement de clarifier un point que je ne comprends pas.

M. Downey: Pour le replacer dans le contexte, j'ai dit que la méthode vraiment ingénieuse de transporter les wagons du continent à nos petits boggies pour nous apporter ces wagons, donne d'excellents résultats.

M. Perrault: A titre de renseignements, pourriez-vous nous dire comment cela est fait. Cela nous intéresserait.

M. Downey: Ils ont ces nouveaux transbordeurs sur lesquels ils transportent les wagons, tout le train en fait, du continent à Port aux Basques où, grâce à un double système de rails, ils lèvent les grands wagons à l'aide d'une grue de leurs propres boggies sur les voies à grand écartement et les placent sur les boggies plus petits sur les voies de faible écartement et fixés en place. Eh hop! Ils traversent l'île au complet.

M. Horner: C'est un système rail-route.

M. Downey: Oui, pas tout à fait.

[*Text*]

Mr. Horner: How long does that take from one car to another?

Mr. Downey: Oh, it is simple. Within an hour they change the train, practically.

Now just one clarification on the bearings. The bearings are the bearings of our little trucks. It has nothing at all to do with the transfer or the expenditures that were done. This is quite complete unto itself.

Mr. McGrath: You say "our trucks". You are referring to the CN trucks?

Mr. Downey: Yes. I am a Newfoundlander.

Mr. McGrath: I still do not know what is the difficulty.

Mr. Downey: All right. We cannot load to capacity the large cars that come to us and thereby attain the optimum rate out of this activity because we can only load 50 tons in these cars that can take 60 tons. And the reason we are limited in loading is the bearings of the little trucks and the bearings of the little rails, the curbs and so on.

Mr. McGrath: How much can our cars take? The Newfoundland cars.

Mr. Downey: We can take 40.

Mr. McGrath: Forty. It is hard to suggest, then, that this system is not working out. Let me ask you another question. You would not be expected to have knowledge of this but does this apply to other shippers as well? Are they experiencing the same difficulty?

Mr. Downey: Price are experimenting with it to a lesser extent than we are and so they must have the same difficulty.

Mr. McGrath: I see. Have you had discussions with Canadian National Railways to see what can be done to correct this, and what have they told you?

Mr. Downey: Oh indeed. They have said that the expense is tremendous. It can be done but the expense is too much.

Mr. McGrath: Well, it would appear to me that the CN has goofed again here as it has done so often in the past.

Mr. Downey: No, sir. No, sir. They have given us a good service here. We are now

[*Interpretation*]

M. Horner: Combien de temps faut-il pou faire ce transfert?

M. Downey: C'est très simple à faire. Moin d'une heure pour tout un train. Une précisio pour ce qui est des charges autorisées de ce petits boggies. Cela n'a rien à voir avec l transfert ou les dépenses qui ont été faites. C système est complet en soi.

M. McGrath: Vous parlez de «nos boggies» Vous parlez des boggies du National-Cana dien, n'est-ce pas?

M. Downey: Oui. C'est que je suis d Terre-Neuve.

M. McGrath: Je ne sais toujours pas quell est la difficulté qui se présente?

M. Downey: Oui, j'y arrive. Nous ne pou vons pas charger à pleine capacité les wagon qui nous parviennent ainsi et par conséquen on ne peut pas tirer un rendement maxima de cette opération parce qu'on ne peut mettr que 50 tonnes de marchandises dans ce wagons qui peuvent en contenir 60. La raiso pour laquelle nous sommes restreints c'es simplement que les charges autorisées sur le petits boggies, les voies, et les courbes son restreintes.

M. McGrath: Quelle est la charge autorisé de nos wagons, ceux de Terre-Neuve?

M. Downey: 40.

M. McGrath: Alors il est difficile de dir que ce système ne donne pas de résultat satisfaisants. Permettez-moi de vous pose une autre question. On ne s'attend pas à c que vous le sachiez, mais est-ce que cela s'ap plique aussi à d'autres expéditeurs? Est-c qu'ils éprouvent de telles difficultés?

M. Downey: Price fait des essais, pas dan une aussi grande mesure, mais j'imagin qu'ils ont les mêmes difficultés.

M. McGrath: Je vois. Est-ce que vous ave eu des entretiens avec le National-Canadie afin de voir ce que l'on peut faire pour rec tifier cette situation? Que vous ont-il répondu?

M. Downey: Sûrement. Ils ont dit que le dépenses étaient très grandes. Il est possibl de le faire mais c'est très coûteux.

M. McGrath: Il me semble que le CN s'es fourvoyé une fois de plus, comme ils l'ont fai si souvent par le passé.

M. Downey: Non, ils nous ont fourni u excellent service. Nous avons maintenant 1

[*Texte*]

aking advantage of 10 tons more a car than ve could have.

Mr. McGrath: Ten tons more.

Mr. Downey: Exactly.

Mr. McGrath: But you still cannot enjoy ne best rate which the facility and the xpenditure on it was designed to do. Is that orrect? That is the substance of it.

Mr. Downey: That is not fair either because ney can take many loads out of here that ulk more than ours. Therefore they would ll those cars at the 40 tons or 50 tons that ney can carry. So it is not quite fair to put it n that way.

Mr. McGrath: We are not going to have the N as a witness so this question is certainly a roper one to you.

The Vice-Chairman: Mr. McGrath, we will ave the CN as a witness back in Ottawa, not ere. They will be appearing before us.

Mr. McGrath: Oh, I see. Well, let me just sk you this question, sir. They told you there as a substantial amount of money involved o correct this deficiency. Did they tell you ow much?

Mr. Downey: No. No. But any engineer nows it is a fair amount.

Mr. McGrath: What would you call a fair mount?

Mr. Downey: Let me say it another way. hey said that to put cushion underframes on heir cars would cost $4,000 per car. So this is ne item that I do know the figure for.

Mr. McGrath: How much was the facility at ort-aux-Basques, generally speaking?

Mr. Downey: I have no idea.

Mr. McGrath: Aproximately...

Mr. Downey: I have no idea.

Mr. McGrath: I have no further questions, Ir. Chairman.

The Chairman: Mr. Rock.

Mr. Rock: Could the witness tell me first of ll if he lives in Corner Brook?

Mr. Downey: Right.

Mr. Rock: And did you come here by car, y rail, by air?

[*Interprétation*]

tonnes de plus par wagon que ce que nous avions auparavant.

M. McGrath: Dix tonnes de plus.

M. Downey: Exactement.

M. McGrath: Mais vous ne pouvez toujours pas bénéficier du meilleur tarif que le service et les dépenses encourues devaient assurer. Est-ce exact?

M. Downey: Non, ce n'est pas tout à fait juste non plus parce qu'ils pourraient prendre bon nombre de chargements d'ici dont le volume est plus considérable que le nôtre. Ils rempliraient alors les wagons à leur charge autorisée de 40 ou 50 tonnes. Donc, ce n'est pas tout à fait juste de le présenter comme cela.

M. McGrath: Comme le National-Canadien ne comparaîtra pas, c'est à vous que nous devons poser cette question.

Le vice-président: Le National-Canadien viendra témoigner à Ottawa, monsieur McGrath.

M. McGrath: Je vois. Mais permettez-moi de poser la question suivante. Ils vous ont dit qu'il faudrait beaucoup d'argent pour rectifier cette carence, mais vous ont-ils dit de quelle somme il s'agissait?

M. Downey: Non, mais un ingénieur peut très bien voir que ce serait fort coûteux.

M. McGrath: Quelle somme estimeriez-vous élevée?

M. Downey: Permettez-moi de le dire autrement. On nous a dit que pour mettre des châssis à coussinets sur les wagons coûterait $4,000 par wagon. C'est donc un facteur dont je connais le coût.

M. McGrath: Combien les installations de Port-aux-Basques, en général?

M. Downey: Je n'en ai pas la moindre idée.

M. McGrath: Approximativement...

M. Downey: Je n'en ai pas la moindre idée.

M. McGrath: Je n'ai pas d'autre question à poser, monsieur le président.

Le président: Monsieur Rock.

M. Rock: Le témoin pourrait-il me dire tout d'abord s'il habite à Corner Brook?

M. Downey: Oui.

M. Rock: Êtes-vous venu ici par auto, par train, ou par avion?

[*Text*]

Mr. Downey: I came by Expedito.

Some hon. Members: What is that?

Mr. Downey: That is the new truck you are all talking about. The new passenger system.

Mr. Rock: You mean the bus rather than the train?

Mr. Downey: Right. Because I was coming to a transport meeting I wanted to know about it.

Mr. Rock: What is the total amount of your production in tonnage per year?

Mr. Downey: Ours from our plant?

Mr. Rock: Yes.

Mr. Downey: Of the order of 350,000 to 380,000 tons.

Mr. Rock: I see. There is no possibility to ship by ship from...

An hon. Member: No.

Mr. Rock: Excuse me, I am asking the questions—to Detroit and Chicago, your main customers. I understood that your main customers were in Chicago and Detroit.

Mr. Downey: Some are, yes.

Mr. Rock: For newsprint?

Mr. Downey: Right. And this new developing field.

Mr. Rock: Is there no possibility of shipping by ship directly from your port through the seaway to these two points?

Mr. Downey: We do it but you see, it is in this new field of diversification with the way less-than-shipload lots that we are talking about.

Mr. Rock: I see. You are concerned simply on these small shipments, then.

Mr. Downey: True, but there is another little feature to this that I should fill in. We would like, if we had the right structure, to carry on this activity throughout the winter, which is not possible during the summer, when ships often can do it.

Mr. Rock: A final question, then. Do you prefer the bus service to the "Bullet"? You do not have to answer if you do not want to.

Mr. Downey: I will wait until you guys have your trip on the "Bullet".

[*Interpretation*]

M. Downey: Je suis venu par l'Expedito.

Une voix: Qu'est-ce que c'est?

M. Downey: Le nouveau camion dont vou parlez. Le nouveau service passagers.

M. Rock: Vous voulez dire l'autobus au lie du train?

M. Downey: D'accord. Comme je venais une réunion concernant les transports, je vou lais simplement savoir.

M. Rock: Quelle est votre production e tonnes par année?

M. Downey: De notre usine?

M. Rock: Oui.

M. Downey: De l'ordre de 350,000 à 380,00 tonnes.

M. Rock: Je vois. Il n'y a pas possibilit d'expédier par navire à partir des ports de...

Une voix: Non.

M. Rock: Je m'excuse, laissez-moi poser m question... à Détroit et à Chicago, vos prin cipaux clients. Je pense que vos principau clients sont à Chicago et à Détroit.

M. Downey: Certains d'entre eux, oui.

M. Rock: Pour le papier journal?

M. Downey: Oui. Et notre nouveau cham d'expansion.

M. Rock: Est-ce qu'il n'y a pas moyen d'ex pédier directement par navire en empruntan la voie maritime jusqu'à ces deux points?

M. Downey: Nous le faisons, mais c'est dans ce nouveau domaine d'activité avec des chargements de beaucoup moins d'une wagon née dont nous parlons.

M. Rock: Je vois. Ce qui vous préoccupe c sont simplement les petites expéditions.

M. Downey: Oui, il y a un autre aspect dont il faut tenir compte, c'est que nous aime rions, si nous avions la structure voulue, poursuivre ces activités durant tout l'hiver, ce qui n'est pas possible en été lorsque les navi res peuvent le faire bien souvent.

M. Rock: Une dernière question. Est-ce que vous préférez le service autobus au «Bullet»? Vous n'êtes pas obligé de répondre si vous ne voulez pas.

M. Downey: J'attendrai que vous ayez fait un voyage sur le «Bullet».

[Texte]

Mr. Rock: You travel on both so you would know better than us.

The Chairman: No further questions, Mr. Rock?

Mr. Rock: No.

The Chairman: Mr. Nowlan.

Mr. Nowlan: Mr. Rock started to get in on the question I wanted to ask to help perhaps clarify some of the evidence. The real problem in the corrections that you mentioned has to deal with a very small segment of your export part of your product. Is that not correct? How much percentagewise goes by ship out of Corner Brook?

Mr. Downey: The bulk of it, but this could grow.

Mr. Nowlan: Well, then, your main, real, interest at the moment is in getting the cordwood to Corner Brook.

Mr. Downey: That is absolutely right. I was not talking to that one so much today as our interest in the . .

Mr. Nowlan: This is what I was trying to get—the proper perspective between your brief and your talk today as far as the problem of the small-gauge railway and updating is concerned. Obviously you cannot put as much weight on the small gauge but does it inhibit bringing that cordwood to Corner Brook?

Mr. Downey: We do not have too much problem there.

Mr. Nowlan: So any updating is in relation to the export industry?

Mr. Downey: Right.

Mr. Nowlan: And you mention the figure, I think, of 6,000 tons. That is all you really experimented with.

Mr. Downey: Correct.

Mr. Nowlan: And that 6,000 tons is in a production of—what did you say—350,000 to 380,000 tons?

Mr. Downey: This is true but do not lean on that too much. This has just started. We have only been four months doing this 6,000 tons, and with the co-operation of the CNR and our forward look this is going to grow. We should not put it in that context, I do not think.

Mr. Nowlan: Do not get me wrong, that I am pro or con this expansion of the rail service and updating of the rail service.

[*Interprétation*]

M. Rock: Vous avez pris les deux, donc vous êtes mieux renseigné que nous.

Le président: Aucune autre question, monsieur Rock?

M. Rock: Non.

Le président: Monsieur Nowlan.

M. Nowlan: M. Rock a abordé la question que je voulais poser en vue d'éclairer davantage une partie des témoignages. Le véritable problème des corrections dont vous parlez a trait à une très petite partie de produit d'exportations. Est-ce exact? Quel pourcentage de vos produits est expédié par navire via Corner Brook?

M. Downey: Le très grande partie, qui pourrait s'accroître davantage.

M. Nowlan: Alors votre principal intérêt en ce moment c'est d'amener votre bois de corde à Corner Brook.

M. Downey: Oui, c'est juste. Je m'excuse, mais je ne parlais pas tellement de cela aujourd'hui que de notre intérêt. . .

M. Nowlan: C'est ce que je voudrais savoir, la bonne perspective entre votre mémoire et ce que vous avez dit aujourd'hui pour ce qui est des chemins de fer à écartement étroit ou à son amélioration. De toute évidence, on ne peut pas charger autant les chemins de fer à faible écartement, mais est-ce que cela vous empêche d'acheminer le bois de corde à Corner Brook?

M. Downey: Nous n'avons pas tellement de problèmes à ce sujet.

M. Nowlan: Donc, toute amélioration désirée à trait aux exportations.

M. Downey: Oui.

M. Nowlan: Vous parlez de 6,000 tonnes. Est-ce le seul chiffre que vous avez mis à l'essai?

M. Downey: C'est exact.

M. Nowlan: Et ces 6,000 tonnes sont tirées d'une production de 350,000 à 380,000 livres?

M. Downey: C'est juste, mais nous n'y comptons pas trop. Ce n'est qu'un début parce que nous le faisons que depuis quatre mois et avec la collaboration du National-Canadien et ce secteur est appelé à croître. On ne devrait pas le mettre ainsi dans un tel contexte.

M. Nowlan: Ne pensez pas que je suis pour ou contre l'accroissement ou l'amélioration des services de chemin de fer.

[*Text*]

Mr. Downey: No, but somebody just heard your remarks there...

Mr. Nowlan: Well, I put it that way to get the proper perspective—a perspective.

I presume that in the 6,000, since it was done in co-operation with the CN, you had enough cars to do this experimentation.

Mr. Downey: Perfectly right.

Mr. Nowlan: Even if you did expand this rail service, just the very fact that you lie there right in Corner Brook and the harbour, the bulk of your product would still go by sea, would it not?

Mr. Downey: This is very, very much in jeopardy at the moment. Our trade in many things is to some extent in the States; there is no question about this. We could be developing this diversified type of product I am talking about at the expense of newsprint and ore going into the far East or export field generally for our newsprint sales outlet and devoting more time to this and railing it to the mainland.

Mr. Nowlan: This would give you a more flexible operation.

Mr. Downey: Exactly.

Mr. Nowlan: That is all.

The Chairman: Mr. Portelance.

Mr. Portelance: Mr. Chairman, Mr. Downey, would you say that so far you have been dealing quite a bit with CN representatives? And would you say that the help that they give you has been satisfactory? Or do you have any complaints?

Mr. Downey: No, I have no complaints to lodge there at all. It has been exemplary. They have been very anxious to develop this trade too and...

Mr. Portelance: Co-ordination has been good.

Mr. Downey: It has been tremendous.

Mr. Portelance: Thank you.

Mr. Thomas (Moncton): Mr. Chairman, I refer to your brief, sir, on page 534 under the caption "Trucks". I think it is fair to say that what you are saying there in effect is that any increase in truck rates or freight rates would have very serious effects on your business. In other words, you are implying that you do not want to see freight rates increased. The

[*Interpretation*]

M. Downey: Non, mais quelqu'un vien d'entendre vos remarques à ce sujet...

M. Nowlan: Je me suis exprimé pour avoi la bonne perspective.

Je présume que puisque cela était fait e collaboration avec le National-Canadien, vou aviez suffisamment de wagons pour tente l'expérience.

M. Downey: Oui.

M. Nowlan: Même si vous deviez étendre c service ferroviaire, le seul fait que vous vou trouvez à Corner Brook et près du port, l plus grande partie de votre production ser transportée par navire, n'est-ce pas?

M. Downey: A l'heure actuelle tout cela es menacé. Notre commerce, pour son nombr de marchandises, se fait jusqu'à un certai point avec les États-Unis. Il n'y a aucun dout à ce sujet. Nous pourrions mettre au point c produit diversifié dont j'ai parlé, aux dépen du papier journal et du minerai de fer ver l'Extrême-Orient ou le marché étranger en gé néral pour le papier journal, et consacrer plu de temps à expédier par chemin de fer a continent.

M. Nowlan: Ce qui vous donnerait plus d souplesse dans vos opérations.

M. Downey: Exactement.

M. Nowlan: C'est tout.

Le président: Monsieur Portelance.

M. Portelance: Monsieur le président, mon sieur Downey, est-ce que vous diriez qu vous avez traité passablement avec les autori tés du National-Canadien jusqu'ici? Et est-c que vous diriez que la collaboration que vou avez obtenue a été satisfaisante ou est-ce qu vous avez des plaintes à formuler?

M. Downey: Je n'ai pas de plaintes à for muler. Nos rapports sont exemplaires. Il étaient également soucieux d'accroître c commerce et ...

M. Portelance: Il y a eu de la coordination.

M. Downey: Oui, formidable.

M. Portelance: Merci.

M. Thomas (Moncton): Monsieur le prési dent, je voudrais me référer brièvement votre mémoire, à la page 534, sous la rubri que «camions». Je crois que ce que vou essayiez de dire au sujet du camionnage, c'es que toute augmentation des taux du transpor des marchandises par camion ou chemin d fer aura une influence considérable sur votr

'exte]

ing that strikes me is that earlier the Gov-nment of Newfoundland stated firmly and tegorically that their chief concern was ith better highway construction and now ou make an interesting statement here. You y:

> The importance of rail freight rates must therefore be stressed with more than usual emphasis—whether or not more and better roads are developed.

re you saying that your first immediate con-rn is to get relief from freight rates regard-ss of highway construction? Is that what at sentence says?

Mr. Downey: Not regardless, because we e involved in both sides of it. We have this tivity of moving our product out of the untry; we have our raw materials supplied the mill which come by truck and by rail—ainly by rail.

Mr. Thomas (Moncton): Yes, but is it not ear, is it not what that sentence says, that ou are more concerned with rail transporta-on than you are with highway transportation you say in effect that regardless of what appens . .

Mr. Downey: We are more involved with

Mr. Thomas (Moncton): Yes, regardless of hat happens to the roads you have to get elief from freight rates.

Mr. Downey: Yes.

Mr. Thomas (Moncton): This is interesting ecause to me, you know, it is in conflict with ie opinion expressed earlier.

Mr. Downey: Actually the bulk of our trade that way.

Mr. Thomas (Moncton): Thank you.

Mr. Nowlan: As a matter of historical nterest and for my own edification—and also will show my own ignorance—was the nar-ow-gauge railway in operation within some f these company boundaries and then xtended to the transisland route? How did ie narrow gauge ever get here?

Mr. Downey: I do not know. Ask Mr. Reid. have no idea, Mr. Nowlan.

[Interprétation]

chiffre d'affaires. En d'autres termes, vous laissez entendre que vous ne voudriez pas qu'on augmente les taux de transport des marchandises. Ce qui m'étonne, c'est que un peu plus tôt le gouvernement de la province de Terre-Neuve disait catégoriquement que leur première préoccupation était la construction de meilleures grandes-routes et votre déclaration est intéressante lorsque vous dites:

> Il faut donc insister encore davantage sur l'importance des tarifs marchandises des chemins de fer—peu importe qu'on construise de meilleures routes ou non.

En d'autres termes, vous voulez dire qu'il importe davantage d'avoir de meilleurs tarifs que de construire des grandes-routes. Est-ce que c'est ce que vous voulez dire?

M. Downey: Pas l'un aux dépens de l'autre, car nous travaillons sur les deux côtés. Nous exportons nos produits; les matières premières sont transportées à l'usine par route et par rail, mais surtout par rail.

M. Thomas (Moncton): Oui, mais ce n'est pas clair, ce n'est pas ce que dit cette phrase, que vous êtes davantage préoccupés par le transport ferroviaire que par le transport routier si vous dites que peu importe ce qui adviendra . . .

M. Downey: Nous sommes plus engagés.

M. Thomas (Moncton): Oui, peu importe ce qui advient aux grandes-routes, il vous faut absolument obtenir un meilleur tarif marchandises.

M. Downey: Oui.

M. Thomas (Moncton): Ce qui m'intéresse énormément car c'est en contradiction avec ce qui a été dit plus tôt.

M. Downey: La plus grande partie de notre commerce se fait dans ce sens en ce moment.

M. Thomas (Moncton): Merci.

M. Nowlan: Dans un intérêt historique, et pour ma propre édification, ce qui dénote mon ignorance, est-ce que la voie à écartement étroit était exploitée à l'intérieur des concessions de ces sociétés et ensuite étendue à la route qui traverse l'île. Comment se fait-il que vous ayez une voie à écartement étroit?

M. Downey: Je n'ai pas la moindre idée, monsieur Nowlan. Demandez à monsieur Reid.

[*Text*]

Mr. Nowlan: But it is not a case of a company—either your company or Grand Falls—having the narrow gauge and extending it to the provincial gauge?

Mr. Downey: I think we came after. I know at Corner Brook we got...

Mr. Nowlan: You came after it.

Mr. Downey: Yes.

Mr. Nowlan: Thank you.

The Vice-Chairman: Thank you, sir.

Mr. Downey: Thank you very much, Mr. Chairman.

The Vice-Chairman: Steve Neary, a personal brief?

The Bell Island Delegation?

We have Mr. Jack Nolan representing the Bell Island constituency. Please refer to Brief A-20 which you will find on page 531.

Would you like briefly to summarize the presentation, sir?

Mr. Nolan: Mr. Chairman, and gentlemen, I have been directed by a public meeting of Bell Island citizens to present to you on their behalf a request to eliminate ferry rates for Bell Islanders using this service.

It is generally agreed that all levels of government have co-operated successfully in transplanting the majority of our citizens to job opportunities elsewhere, but it is contended that the remaining 6,000 people are being prevented from commuting to the local mainland regularly because of the high ferry rates, which also increase the cost of life's necessities to people who can least afford the extra burden.

It is also apparent that all property will depreciate abnormally and that the cost of maintaining this ferry service by the federal government, as well as welfare expenditures, will increase because the residents cannot afford to use the service regularly.

As our government would benefit from taxes paid through the increased employment opportunities if ferry rates were eliminated, it is our fervent prayer that you will give our suggestion your urgent consideration.

Mr. Horner: Could Mr. Nolan give the Committee some idea of the amount of money we are talking about here? Is it a very large

[*Interpretation*]

M. Nowlan: Mais est-ce que ce n'est p que votre société ou une autre avait introd ce système qui a ensuite été étendu à province?

M. Downey: Je crois que nous somm venus plus tard. Je sais qu'à Corner Bro nous avons ...

M. Nowlan: Vous êtes venus ensuite.

M. Downey: Oui.

M. Nowlan: Merci.

Le vice-président: Je vous remerc monsieur.

M. Downey: Merci beaucoup, monsieur président.

Le vice-président: Monsieur Steve Nea vous avez un mémoire personnel?

La délégation de Bell Island?

Nous avons ici M. Jack Nolan, qui repr sente la circonscription de Bell Island. Veu lez vous référer au mémoire A-20 que vo trouverez à la page 531. Pourriez-vous rés mer brièvement ce que vous avez à nous di monsieur?

M. Nolan: Monsieur le président, messieu Les citoyens de l'Île Bell m'ont demandé vous demander en leur nom qu'il puisse utiliser gratuitement les services traversier.

Tous sont d'accord pour dire que tous l gouvernements ont collaboré au déplaceme de la majorité des habitants de l'Île en l aidant à trouver de nouveaux emplois a leurs. Mais les 6,000 personnes qui reste prétendent qu'elles ne peuvent se rendre à terre ferme de façon régulière en raison d taux élevés du traversier. Il en résulte égal ment une augmentation du prix des biens consommation pour des personnes qui sont moins bien placées pour subir un tel farde supplémentaire.

Le coût d'entretien du service de trave sier par le gouvernement fédéral et les serv ces de bien-être seront aussi accrus en raiso du fait que les résidents ne pourraient p emprunter le traversier de façon régulière.

Puisque le gouvernement en retirerait ce tains avantages du point de vue taxation si service de traversier était gratuit, nous esp rons que vous étudierez notre demand attentivement.

M. Horner: Je me demande, M. Nolan, vous pourriez nous donner une idée du mon tant d'argent dont il est question? Est-ce qu

Texte]

mount or a small amount? And in asking the uestion I do not want to appear nsympathetic.

Mr. Nolan: At the present time, sir, I think ie federal government subsidizes this ferry ervice, to the extent of $268,000 a year.

Mr. Horner: The federal government?

Mr. Nolan: The federal government subsi-izes this ferry service to the amount of 268,000, I believe. We use the figure of $300,-00 approximately.

Mr. Horner: What revenue is taken in from ie toll on the passengers, or their cars?

Mr. Nolan: It is understood generally, lthough we find some difficulty in obtaining xact information on this, that it is subsidized) more than 50 per cent.

Mr. Horner: Could not a larger or more iodern ferry be put on, which would get the assengers across for the same amount of ibsidy as is now paid out?

Mr. Nolan: I do not think that is feasible. he ferry was originally built to service pproximately 14,000 people. Because of the ict that the mines have closed down com-letely and, as a result, we have no other ource of employment on Bell Island, approx-nately 8,000 people have been moved; but ie remaining 6,000 consisting of pensioners nd recipients of welfare, and so on, have ieir homes over there, and because of the ict that on moving elsewhere the govern-ient pays only $1,500, no matter the size or ondition of their homes, these people are etermined to stay; and, as a result, they are ntitled to that service.

Mr. Horner: I know somewhat of what you peak, coming from an area on the Prairies om which many people were shipped out me years ago.

Would a hovercraft, or something of that ort, be of any assistance, or be an improve-ient over what you already have?

Mr. Nolan: You are now asking a technical uestion which I do not know that I am mpetent to answer, but in my own humble pinion I think it would be more expensive.

Mr. Horner: I do not know. I have never een to Bell Island. I am merely trying to elp you in any way I can.

[*Interprétation*]

c'est une grosse somme d'argent ou une petite somme?

N'allez pas croire que je pose la question parce que je ne suis pas d'accord avec votre projet.

M. Nolan: A l'heure actuelle, monsieur, je crois que le gouvernement fédéral subventionne le service à raison de $268,000 par année.

M. Horner: Le gouvernement fédéral?

M. Nolan: Le gouvernement fédéral donne $268,000 par année, je crois. D'habitude, nous disons environ $300,000.

M. Horner: Quelle somme les taux de péage permettent-ils d'amasser?

M. Nolan: Nous croyons, bien qu'il nous soit difficile d'obtenir les renseignements précis à cet égard, que la subvention équivaut à plus de 50 p. 100.

M. Horner: Ne serait-il pas possible qu'un plus grand traversier ou un traversier plus moderne soit mis en service et que la subvention demeure à peu près la même?

M. Nolan: Je ne crois pas que ce soit possible. Au tout début, ce traversier devait desservir environ 14,000 personnes. En raison du fait que les mines ont été fermées complètement et qu'en conséquence il y a plus d'emplois de disponibles dans l'île, environ 8,000 personnes ont été déménagées; mais les 6,000 personnes qui restent, il s'agit de retraités et d'assistés sociaux, ont leur propre propriété là-bas. Et en raison du fait que lors du déménagement le gouvernement ne paie que $1,-500, peu importe la maison, ces gens ont décidé de demeurer sur les lieux; il en découle qu'ils ont droit à ce service.

M. Horner: Je suis un peu au courant de la situation dont vous parlez puisque je viens d'une région des Prairies d'où plusieurs personnes ont été déplacées, il y a quelques années.

Est-ce qu'un hydroglisseur ou autre appareil du genre serait utile?

M. Nolan: Je ne suis pas compétent pour répondre mais, à mon humble avis, je crois que ce serait plus dispendieux.

M. Horner: Je l'ignore également. Je ne me suis jamais rendu à l'île Bell, mais j'essaie tout simplement de vous aider.

[*Text*]

Mr. Nowlan: I have a supplementary on the figure that Mr. Nolan used. Did you say the subsidy was $268,000 a year.

Mr. Nolan: That is correct, sir.

Mr. Nowlan: Your brief says $3 million.

Mr. Nolan: It should not have said so, sir. Approximately $300,000, it should be.

Mr. Nowlan: Then the brief is wrong?

Mr. Nolan: I have a copy of the original brief right here. It says $300,000.

Mr. Nowlan: I have a copy, too. It reads...

Mr. Nolan: Yours is a copy of mine. If it says $3 million; sir that is incorrect.

Mr. Corbin: Mr. Chairman, perhaps I did not read this correctly, but there is some information that I cannot find in the brief. To what point of land is Bell Island connected by the ferry?

Mr. Nolan: Portugal Cove, which is 9 miles from here.

Mr. Corbin: How many islanders have cars?

Mr. Nolan: Are you speaking of cars on the island at the present moment?

Mr. Corbin: In a percentage.

Hr. Nolan: I would say $400.

Mr. Corbin: Out of a population of...?

Mr. Nolan: Apparently 6,300 is the recent figure.

Mr. Corbin: Does the ferry at this time carry cars from the island to the mainland?

Mr. Nolan: That is right, sir.

Mr. Corbin: How many can it transport?

Mr. Nolan: Depending on the size of the car, usually about 22 or 23.

Mr. Corbin: Does that satisfy the demand?

Mr. Nolan: Yes and no; under normal conditions I would say that it is reasonably satisfactory, but because of the fact tht possibly 300 to 400 people commute on week-ends to homes they maintain on Bell Island, and who are working within a couple of hundred miles

[*Interpretation*]

M. Nowlan: Une question supplémentair Avez-vous dit, monsieur Nolan, que la su vention était de $268,000 par année?

M. Nolan: Oui.

M. Nowlan: Votre mémoire dit tro millions.

M. Nolan: Le mémoire aurait dû dire env ron $300,000.

M. Nowlan: Donc, le mémoire est erroné?

M. Nolan: J'ai ici une copie du mémoi original. Le texte dit $300,000.

M. Nowlan: J'en ai également une cop et...

M. Nolan: Si l'on dit trois millions, mo sieur, c'est une erreur.

M. Corbin: Je n'ai peut-être pas lu comm il le faut, mais il y a des renseignements qu je ne trouve pas dans le mémoire. A qu point sur la terre ferme est reliée l'île Bell?

M. Nolan: Portugal Cove, qui est à 9 mill d'ici.

M. Corbin: Combien de résidants de l'î ont des automobiles?

M. Nolan: Vous parlez du nombre d'aut mobiles, en ce moment, dans l'île?

M. Corbin: En pourcentage, par exemple.

M. Nolan: Je dirais environ 400.

M. Corbin: Pour une population de ... ?

M. Nolan: 6,300 est le chiffre le plus récent.

M. Corbin: Le traversier transporte-t-il pr sentement les automobiles de l'île jusqu'à l terre ferme?

M. Nolan: Exactement.

M. Corbin: Combien le traversier peut-il e transporter à la fois?

M. Nolan: Cela dépend des dimensio des automobiles mais je dirais environ 22 o 23.

M. Corbin: Est-ce que cela répond à l demande?

M. Nolan: Oui et non. Dans des circonstan ces normales, je dirais que c'est plutôt satis faisant. Mais parce qu'il y a peut-être trois o quatre cents personnes qui voyagent réguliè rement en fin de semaine jusqu'à l'île Bell o elles possèdent une maison et qui travaille

[Texte]

f Portugal Cove—in other words, on the Avalon peninsula—it happens invariably that here is a continual waiting line at the cove efore this traffic is cleared up. I have seen it n many, many occasions, and I personally ave had to wait as many as five or six hours efore my turn came to get on the ferry.

Mr. Corbin: Do you use the reservation system to get your car across?

Mr. Nolan: No, sir.

Mr. Corbin: Thank you, sir.

Mr. Nolan: There is priority for the movement of certain types of goods such as oil.

Mr. McGrath: I was absent for a few moments when this brief was first presented nd perhaps my question has been dealt with. f it has, the witness can inform me.

How much money is being expended per nnum for relief at the present time on Bell sland. Do you have that figure?

Mr. Nolan: I have tried in many ways to et it.

Mr. McGrath: That makes two of us.

Mr. Nolan: You do appreciate, sir, that hese figures would have to come from the overnment and you gentlemen have far nore experience than I in trying to get facts ut of the government. I suggest you try ourself.

Mr. McGrath: Can you give an approximaion?

Mr. Nolan: I would say that approximately ,000 of the 6,000 people over there are eceiving welfare.

Mr. McGrath: What would be the average nonthly welfare cheque?

Mr. Nolan: I have never received one in my fe, sir. I am afraid I could not answer that.

Mr. McGrath: I appreciate that. I am trying o establish something here for the benefit of he Committee. I am supporting your brief, nd I want others to support it, as well. I vant to bring out these facts.

Mr. Nolan: As on everything else, sir, we lo hear ridiculous statements made. Whether r not they can be supported by evidence, I lo not know. I have heard of families, and ery large families—we have prolific people n Bell Island—of as many as 12, or 14 children, who receive possibly in the vicinity of 400 to $500 in welfare.

[*Interprétation*]

à 100 ou 200 milles environ de Portugal Cove, dans la péninsule d'Avalon, il y a invariablement une ligne d'attente à Portugal Cove. Personnellement, j'ai déja à attendre 5 ou 6 heures.

M. Corbin: Est-ce que vous utilisez le système de réservation?

M. Nolan: Non, monsieur.

M. Corbin: Merci, monsieur.

M. Nolan: Il y a toutefois priorité pour le transport de certains produits, tels le pétrole.

M. McGrath: Monsieur le président, j'étais absent pendant quelques minutes, alors la question que je désire poser l'a peut-être déjà été. Si tel est le cas, je suis sûr que le témoin me le dira. Combien d'argent dépensons-nous à l'heure actuelle pour les services de bien-être social?

M. Nolan: J'ai tenté par maintes fois d'obtenir ce détail.

M. McGrath: Nous sommes donc deux parce que moi aussi j'ai essayé.

M. Nolan: Vous savez fort bien que ces chiffres nous viennent du gouvernement et vous autres, vous avez beaucoup plus d'expérience que moi lorsqu'il s'agit de soutirer les renseignements du gouvernement. Peut-être pourriez-vous essayer.

M. McGrath: Auriez-vous une idée ou pourriez-vous deviner par exemple?

M. Nolan: Je dirais qu'il y a approximativement 4,000 personnes qui touchent les pensions du bien-être social sur les 6,000 résidants de l'Île.

M. McGrath: En moyenne, à combien peut s'élever le chèque du bien-être social?

M. Nolan: Non, je n'en ai jamais reçu de ma vie, je ne saurais donc pas vous répondre.

M. McGrath: Je le sais mais j'essaie de déterminer quelque chose à l'avantage du Comité. J'appuie votre mémoire et je voudrais que les autres l'appuient aussi. J'essaie donc d'obtenir ces renseignements.

M. Nolan: Évidemment, comme pour bien d'autres choses, nous entendons toutes sortes de déclarations ridicules. J'ignore s'il est possible de prouver de tels avancés. J'ai déjà entendu parler de familles nombreuses, car ils sont très prolifiques dans l'île, des familles qui ont 12, 13, 14 enfants, qui recevraient 400 ou 500 dollars par mois du bien-être social.

[*Text*]

Mr. McGrath: My point is that it would be a very substantial amount per year. To my mind this is the most important argument in support of your brief. You have 4,000 out of 6,000 on relief, unemployed, and the rates on the ferry almost imprison them, if you like, and force them to remain on welfare because they are unable to get to the mainland.

Mr. Nolan: That is right, sir.

Mr. McGrath: Mr. Chairman, I have one further question of the witness. Do you feel that a causeway to Bell Island is feasible.

Mr. Nolan: I do not.

Mr. McGrath: Why?

Mr. Nolan: I think it would be too expensive in comparison to the benefits that would be derived from it. To begin with there are extreme tides in Conception Bay. I am not a fisherman, but there are tremendous depths of water out there. I have heard it said, by men who should know, that it is over 100 fathoms in many places in the bay; that is 600 feet.

You would have to build a causeway to withstand in this bay some of the roughest waters in the world. I have travelled and I have experienced it. You can have a perfectly calm day crossing from Portugal Cove to Bell Island and within an hour the boat is unable to run because of tremendous tides and circumstances.

Mr. McGrath: Mr. Chairman, I think you will find a great deal of sympathy for this brief because of the extraordinary circumstances of this particular situation, which is perhaps unparallelled in the country.

I have one final question, Mr. Nolan. This brief is signed by Stephen A. Neary, M.H.A., who is now a minister in the government of Newfoundland, and who appeared before us this morning on behalf of that government. I was rather disappointed that he did not refer to this situation in his brief. Has the government of Newfoundland made representations to the government of Canada about it?

Mr. Nolan: There have been discussions, but exactly what the discussions concerned I am afraid I could not answer. However, on your specific question, I am not aware of it.

Mr. McGrath: Perhaps you might try to find out and let the Committee know through the Chairman. It is important.

Mr. Nowlan: Could I have your question again, please.

[*Interpretation*]

M. McGrath: Ce que je veux prouver, c'e qu'il s'agit d'une somme considérable vers chaque année. Et, à mon sens, c'est l'argume le plus fort à l'appui de votre mémoire. D 6,000 personnes, 4,000 vivent aux frais d bien-être social et sont en chômage. Les tau du traversier les emprisonnent presque et l forcent à demeurer justement sur la liste d bien-être social, car ils sont incapables de s rendre sur la terre ferme.

M. Nolan: Vous avez raison.

M. McGrath: Une autre question, monsieu le président. Croyez-vous qu'il serait possibl d'aménager une chaussée jusqu'à l'île Bell?

M. Nolan: Je ne le crois pas.

M. McGrath: Pourquoi?

M. Nolan: Je crois que ce serait trop coû teux comparativement aux avantages qui e découleraient. Tout d'abord, il y a des marée extrêmes dans la baie de la Conception. Je n suis pas un pêcheur, remarquez bien, mai l'eau est également très profonde à ce endroit. J'ai déjà entendu dire de la part d ceux qui devraient le savoir, qu'il y a plus d 600 pieds de profondeur.

Il faut donc une chaussée qui résisterait ces eaux, les plus traîtresses au monde. J'e ai fait l'expérience moi-même. La journé peut être tout à fait calme, et en moins d'un heure, il est impossible à un navire de traver ser en raison de la marée et d'autres facteurs.

M. McGrath: Je crois, monsieur le prési dent, que ce mémoire sera vu d'un très bo œil en raison des circonstances extraordinai res qui n'ont peut-être de parallèle ailleurs a pays. J'aurais une dernière question à vou poser, M. Nolan. Le mémoire est signé pa Stephen A. Neary, qui fait maintenant parti du cabinet du gouvernement de Terre-Neuv et qui a témoigné, ce matin, au nom du gou vernement. Je suis déçu de ce qu'il n'ait pa abordé cet aspect. Est-ce que le gouvernemen de Terre-Neuve a formulé des représentation auprès du gouvernement du Canada à ce égard?

M. Nolan: Il y a eu des discussions, mai à quel sujet exactement, je ne pourrais vou le dire. En ce qui concerne votre questio précise, je l'ignore.

M. McGrath: Vous pourriez peut-être vou informer et renseigner le comité par l'inter médiaire du président, car c'est important.

M. Nolan: Voudriez-vous répéter votr question?

[Texte]

Mr. McGrath: Has the government of Newfoundland officially made representations to the government of Canada to have the rates eliminated on the ferry service because of the serious economic situation?

Mr. Nolan: Now I understand you a little bit better. As I said previously, I was not aware of it, and I do not believe that they have. I think that would make it even clearer.

Mr. Trudel: Mr. Chairman, I would like to ask the witness how many people are involved, or how many crossings are made yearly? How many passengers are carried on the ferry in a year; or, if it is easier, in a week or in a month. Could you give us an idea?

Mr. Nolan: I would say possibly 5,000 a month would be a fair average figure.

Mr. Trudel: Five thousand a month.

Mr. Nolan: That, again, depends on the season, sir. As you are well aware, during the winter months there would not be as many people travelling; whereas in good weather during the summer there is an excess that could not be handled by the existing ferry.

Mr. Trudel: The next question, Mr. Nolan, through you, Mr. Chairman is: Would $500,000 be a fair estimate if the entire cost were borne by the federal government?

Mr. Nolan: I think it would be; but I am no authority.

Mr. Trudel: No; I am saying as an estimate.

Mr. Nolan: I think so, sir.

Mr. Trudel: Thank you, Mr. Chairman.

The Chairman: Mr. Pringle?

Mr. Pringle: Thank you, Mr. Chairman, Mr. Nolan, if free ferry service were implemented to your island do you think that the existing ferry equipment would be adequate to handle the traffic in view of the fact that it was free and available to anyone who might want to make use of it? Would increased facilities be required to accommodate the traffic?

Mr. Nolan: I personally think that except for the first month or so, when everybody would be having a little ride for free, as they do with everything the government supports, it might be adequate except, as I say, during peak periods such as weekends. However, if it were not adequate and we are able to prove that contention, I do not think it would be a very hard job to supplement with another ferry, if it were proved to be necessary.

[*Interprétation*]

M. McGrath: Est-ce que le gouvernement de Terre-Neuve a fait des représentations officielles auprès du gouvernement du Canada pour éliminer le tarif de traversier en raison de la situation économique très sérieuse?

M. Nolan: Maintenant, je vous comprends un peu mieux. J'ignore si de telles représentations ont été faites mais je ne le crois pas.

M. Trudel: Je voudrais demander à M. Nolan combien de traversées sont effectuées dans une année? Combien de passagers utilisent le traversier dans une année ou, si c'est plus facile, au cours d'une semaine ou d'un mois?

M. Nolan: Je dirais environ 5,000 par mois.

M. Trudel: 5,000 par mois.

M. Nolan: Cela dépend de la saison, encore une fois. Comme vous le savez, au cours de l'hiver, il n'y en a pas tellement de personnes qui voyagent, mais pendant la belle saison, en été, il y en a plus, et le traversier actuel ne suffit pas.

M. Trudel: Si le gouvernement fédéral devait défrayer le tout, croyez-vous que $500,000 suffiraient?

M. Nolan: Je le crois, mais je ne suis pas un expert en la matière.

M. Trudel: Je parle de chiffre approximatif.

M. Nolan: Je le crois.

M. Trudel: Merci.

Le président: M. Pringle?

M. Pringle: Merci, monsieur le président. Si le service de traversier jusqu'à l'ile était gratuit croyez-vous que le traversier pourrait répondre à la demande vu que le service serait gratuit et à la disposition de quiconque voudrait faire le voyage ou est-ce que cela nécessiterait une augmentation de l'équipement pour subvenir aux besoins de tous ces voyageurs?

M. Nolan: Personnellement, je crois que sauf pendant le premier mois, alors que tous voudraient profiter du service gratuit, ce serait suffisant, sauf, peut-être, pendant les périodes de pointe, comme les fins de semaine. Toutefois, si ce n'était pas suffisant, et nous pouvons le prouver, je ne crois pas que ce serait bien difficile d'ajouter un autre traversier, si c'était nécessaire.

[*Text*]

Mr. Pringle: This would be, of course, another additional federal expense and it would be an additional operating expense, an it could very well increase the cost more than double at the present time. Would that be a fair statement?

Mr. Nolan: May I point out, sir, that we are asking for only half a loaf now. If it appears necessary that we should get the full loaf, then I am sure you would give it every consideration.

Mr. Pringle: Do you feel that there is work available on the mainland for the people who would be able to take advantage of this and find employment on the mainland if they were able to take advantage of a free ferry service?

Mr. Nolan: In the great majority of cases, yes, sir.

The Chairman: Mr. Rose.

Mr. Rose: Mr. Nolan, in your comments on the prolific nature of the people on Bell Island, you have already given us an indication of how they spend their time. Is this perhaps because they are located right in the middle of Conception Bay? But I would like to ask...

Mr. Nolan: Our climate is cool, sir, if that is what you meant.

Mr. Rose: But I would like to ask you to enlarge on something you said about employment opportunities. There are here 4,000 out of 6,000 unemployed. Is there any fishing industry on the island now?

Mr. Nolan: There is one man who, I believe, employs three men and who is actively engaged in fishing.

Mr. Rose: Does your island have any tourist potential?

Mr. Nolan: Potential? We could go on all day to answer that question. It has potential.

Mr. Rose: Do you have a hospital on the island?

Mr. Nolan: We do, sir.

Mr. Rose: I would imagine that because of the large number of pensioners you have there—although this does not quite square with your earlier statements. I will not go back to that. Do you feel that they are well looked after? Do you feel that the facilities are adequate there?

[*Interpretation*]

M. Pringle: Il s'agirait, encore une fo d'une autre dépense du gouvernement féd ral, et d'une autre dépense d'exploitation cela pourrait plus que doubler le coût actu Est-ce que ce serait juste?

M. Nolan: Puis-je vous dire que nous demandons que la moitié du pain, à l'heu actuelle. Si, évidemment, ça devient néce saire de nous donner le pain entier, vous ét dierez cette possibilité, j'en suis sûr.

M. Pringle: Croyez-vous qu'il y a d emplois sur le continent pour les gens q pourraient en profiter pour y trouver emploi, s'il y avait un service de traversie gratuit?

M. Nolan: Dans la grande majorité des c oui, monsieur.

Le président: Monsieur Rose.

M. Rose: Monsieur Nolan, en commenta le fait que les gens de l'île Bell sont pro fiques, vous nous avez déjà dit comment passent leur temps. Peut-être est-ce par qu'ils se trouvent au beau milieu de la ba Conception? Mais j'aimerais demander ...

M. Nolan: Le climat est très frais, mo sieur, si c'est ce que vous voulez dire.

M. Rose: Oui, mais en ce qui concerne l occasions d'emploi, vous nous avez dit q 4,000 personnes sur 6,000 sont en chômag Est-ce qu'il y a de la pêche qui se fait da l'île, à l'heure actuelle?

M. Nolan: Il y a un seul homme, je cro qui emploie trois hommes pour la pêche.

M. Rose: Est-ce que vous avez des possibi tés pour le tourisme dans votre île?

M. Nolan: Des possibilités? Je pourrais pa ser toute la journée à vous répondre là-de sus. Il y a toujours des possibilités.

M. Rose: Avez-vous un hôpital sur l'île?

M. Nolan: Oui.

M. Rose: J'imagine qu'en raison du gra nombre de pensionnés—quoique cela n'a rien à voir avec vos déclarations, je n reviendrai pas—croyez-vous qu'on prend bi soin d'eux? Croyez-vous que les installatio sont suffisantes à cet égard?

[*Texte*]

Mr. Nolan: I have been in the hospital myself. I just recently came out about two weeks ago. I have been in hospitals all over the world, and I feel that Bell Island hospital is as good as any.

Mr. Rose: You have suggested that there should be a free ferry service to the island. Do you think that a ferry service is really an extension of the highway system?

Mr. Nolan: That is correct.

Mr. Rose: It should be for all the people, and it should not be paid for because it happens to be a water obstacle any more than a mountain obstacle or a river obstacle?

Mr. Nolan: I quite agree with that. Under the present circumstances we are really being discriminated against by having to pay for an extension of the high system.

Mr. Rose: But the federal government is already assisting this way. Do you not feel that this should be up to your provincial government?

Mr. Nolan: I do not think I should express a view on that because our provincial government seems to have some needs itself in the way of wanting money.

Mr. Rose: I only mentioned it because highways have traditionally been a provincial responsibility.

Mr. Horner: This is a principle established all across Canada, that the provincial government accepts most of the responsibilities for maintaining roads.

Mr. Nolan: Could we not consider this as a continuation of the Trans-Canada system?

Mr. Horner: I do not know that the Trans-Canada even comes near there. I could not tell you.

Mr. Nolan: You have got the Trans-Canada right to this building, and we are only 12 miles away.

The Chairman: Gentlemen, does the Committee feel that we could receive another brief this morning? Or would you rather adjourn until this afternoon? We have two more to go. We can resume here at 2.00 o'clock. I think Mr. Nesbitt has a report to make.

[*Interprétation*]

M. Nolan: J'ai déjà été hospitalisé moi-même. Je suis sorti de l'hôpital depuis deux semaines. J'ai visité des hôpitaux un peu partout dans le monde, et je trouve que l'hôpital de l'île Bell est aussi bon que n'importe quel autre hôpital.

M. Rose: Vous avez dit qu'on devrait avoir un service gratuit de traversiers. Croyez-vous qu'un service de traversiers est une véritable extension du réseau routier?

M. Nolan: Oui.

M. Rose: Tout le monde devrait en profiter et on ne devrait pas être obligé de le payer, en raison du fait qu'il s'agit d'un obstacle naturel, tout comme s'il s'agissait d'une montagne ou d'un fleuve.

M. Nolan: Je suis d'accord avec vous. En fait, dans les circonstances actuelles, il y a une distinction injuste, parce que nous devons payer pour cette extension de la route.

M. Rose: Mais le gouvernement fédéral aide déjà. A cet égard, ne croyez-vous pas que le gouvernement provincial devrait faire sa part aussi?

M. Nolan: Je ne crois pas que je devrais exprimer une opinion à ce sujet en raison du fait que le gouvernement provincial semble avoir ses propres besoins en ce qui concerne les finances.

M. Rose: Je ne l'ai mentionné que parce que les routes ont toujours été la responsabilité du gouvernement provincial.

M. Horner: C'est un principe en vigueur partout au Canada que le gouvernement provincial accepte la plus grande part des responsabilités pour l'entretien des routes.

M. Nolan: Est-ce que nous ne pourrions pas considérer cela comme une extension de la route Transcanadienne?

M. Horner: Je n'ai jamais entendu dire que la route Transcanadienne vient tout près d'ici. Je ne pourrais vous dire.

M. Nolan: La route Transcanadienne vient jusqu'à cet immeuble-ci, et nous ne sommes qu'à douze milles.

Le président: Messieurs, le Comité croit-il que nous pourrions entendre un autre mémoire ce matin, ou préférez-vous qu'on lève la séance jusqu'à cet après-midi. Il nous en reste deux encore. Nous pouvons revenir à quatorze heures. Je crois que M. Nesbitt a un rapport à nous donner.

[*Text*]

Mr. Nesbitt: Mr. Chairman, I would like to take this opportunity of thanking you very much indeed for your very generous co-operation, very helpful co-operation in dealing with a matter of order that I brought up a little earlier. It is my understanding, Mr. Chairman, that Mr. Pickersgill would not be able to come here today. Time would hardly permit, I agree. But I understand he has agreed to meet with the Committee as soon as convenient after we return to Ottawa. I am sure that would be quite satisfactory, and it would be very helpful and perhaps might obviate a great many questions that might otherwise have been raised and perhaps save time. It is also my understanding that the officials of the CNR will also be meeting with us as soon as we return, so that appropriate representations and decisions can be made prior to April 15.

The Chairman: You can rest assured that Mr. Pickersgill sill answer questions to the Committee as soon as we arrive back in Ottawa. We will also have the CNR people the same day or the day after. Do you want the CPR too? The arrangements are going to be made this afternoon, so as soon as we arrive in Ottawa we will have a meeting. Mr. McGrath.

Mr. McGrath: Mr. Chairman, before we adjourn I want to make a suggestion to the Committee that we might try and find time our schedule today and tomorrow to visit the CN station, look at the facilities in daylight, and perhaps have a quick look at the water front. I would suggest, Mr. Chairman, that we make provisions in our time to do that.

The Chairman: Would you arrange that and let me know so that I could notify the members? It is agreed.

The meeting is adjourned.

[*Interpretation*]

M. Nesbitt: Monsieur le président, je vou drais vous remercier de la grande générosit et de la grande collaboration que vous m'ave données pour la question du rappel au Règle ment, que j'ai soulevée plus tôt. J'ai cru com prendre, monsieur le président, que M. Pic kersgill serait incapable de venir ic aujourd'hui. Il manquerait un peu de temps j'en conviens, mais toutefois il a accepté d rencontrer le Comité le plus tôt possible dè notre retour à Ottawa. Je suis sûr que cel sera satisfaisant, et ce serait très utile e pourrait peut-être empêcher qu'on soulèv plusieurs questions et peut-être épargner ur peu de temps aussi. Je crois comprendre auss que les fonctionnaires du CNR nous rencontreront eux aussi dès notre retour à Ottawa Par conséquent, nous pourrons formuler des représentations et prendre des décisions avant le 15 avril.

Le président: Vous pouvez être sûr que M Pickersgill répondra aux questions du Comité, dès notre retour à Ottawa. Nous recevrons aussi les fonctionnaires du CN le même jour, ou le lendemain. Vous voulez recevoir des représentants du CP aussi? Alors, nous prendrons les dispositions voulues cet après-midi, et dès que nous arriverons à Ottawa, nous tiendrons une séance. Monsieur McGrath.

M. McGrath: Monsieur le président, avant de lever la séance, je voudrais formuler une suggestion aux membres du Comité. Nous pourrions peut-être essayer de trouver le temps, aujourd'hui ou demain, de visiter la gare du National-Canadien, d'examiner les installations pendant le jour, et peut-être aussi examiner le quai. Je crois que nous devrions essayer de trouver le temps voulu pour le faire.

Le président: Pourriez-vous prendre les dispositions voulues et m'en avertir, afin que je puisse prévenir les membres? Entendu.

La séance est levée.

AFTERNOON SITTING

The Chairman: Gentlemen our next brief will be H. B. Dawe Limited and I would ask Mr. John Hillyard, Manager, to make the presentation. Mr. Hillyard?

Mr. Hillyard: Thank you Mr. Chairman, ladies and gentlemen.

H. B. Dawe Limited are private operators in transportation with a service between Halifax, Nova Scotia and Cupids, Newfoundland

SÉANCE DE L'APRÈS-MIDI

Le président: Messieurs, notre mémoire suivant sera celui de la *H. B. Dawe Limited*, et je vais demander à M. John Hillyard, le directeur, de nous le présenter. Monsieur Hillyard?

M. John Hillyard: Merci, monsieur le président, mesdames, messieurs.

La *H. B. Dawe Limited* est une société d'exploitants privés qui assure un service entre Halifax, en Nouvelle-Écosse, et Cupids

[*Texte*]

listributing to almost all parts of the Avalon Peninsula. Our brief deals with our loss of ,000 tons of cargo to CNR yearly due to its lecrease of 40 per cent in rates on flour from Lakehead to Eastern Newfoundland and the ubsequent increase in right-of-way subsidies lue to heavy claims by consignees. This com- any has had no rate increases since 1958 vhile, in fact, costs have spiralled. We feel ve have been discriminated against by CNR nd we objected to their through rates for the nilling companies at the inception in 1965, hey are hauling traffic to our area at rates 10 o 20 per cent less than they do to Corner Brook or Stephenville on the West coast some 00 to 500 miles west of our present position.

In conclusion, we have the capacity and the acilities in vessels, warehousing and trucks o further expand and give additional service o the salt fish exporters in Newfoundland nd the general shippers in Eastern mainland, Canada, and we propose that shippers should e subsidized and permitted to use whichever ransportation system they choose and not be orced by heavy subsidies to use the National arrier. Small private operators are being iscriminated against while the freeze on reight rates is in effect in the Atlantic area, nd revenues are kept at one level while op- rating costs and labour costs are mounting ach year. We hope that this Committee will ake recommendations which will assist pri- ate operators, in this area, to successfully ompete for traffic in an open and unpre- udiced market.

The Chairman: Mr. Horner?

Mr. Horner: Mr. Dawe, are you familiar vith the new National Transportation Act at ll? If you are, I will ask some questions on , and if you are not, I will not ask you.

Mr. Hillyard: No, I am not.

Mr. Horner: All right, I will skip that part, ut in the new National Transportation Act it ays that all rates must be compensatory and y that they mean that all rates must cover he actual costs of delivery. At least, this is vhat I gathered during the debate. Here in a ense you are suggesting that the CNR rate is ot compensatory particularly on flour. You od your head to that, and while that it is

[*Interprétation*]

à Terre-Neuve, qui distribue à presque toutes les parties de la péninsule d'Avalon. Notre mémoire traite de notre perte de 7,000 tonnes de cargaison qui vont chaque année au National-Canadien, en raison de la diminution de 40 p. 100 de son tarif de transport de la farine de la tête des Grands Lacs à l'est de Terre-Neuve, et de l'augmentation des subventions au transport ferroviaire qui a découlé des nombreuses réclamations des consignataires. La société n'a pas augmenté son tarif depuis 1958, alors qu'en fait, les coûts sont montés en spirale. Nous estimons que le National-Canadien nous a traités de façon injuste, et nous nous sommes opposés dès le début, en 1965, à ses tarifs à l'égard des sociétés de mouture de grains, car il transporte les produits vers notre région à 10 ou 20 p. 100 de moins que vers Corner Brook ou Stephenville, sur la côte ouest, à 400 ou 500 milles à l'ouest de notre position actuelle.

En conclusion, nous avons tout le nécessaire pour l'entreposage, ainsi que les camions, pour prendre de l'expansion et assurer un meilleur service aux exportateurs de poisson salé de Terre-Neuve et aux expéditeurs en général de l'est du continent canadien. Nous proposons donc que les expéditeurs soient subventionnés et qu'ils puissent employer le mode de transport de leur choix au lieu d'être forcés, en raison des subventions élevées, à utiliser le National-Canadien. Les petits exploitants privés reçoivent un traitement injuste, car le gel des taux de transport des marchandises est en vigueur dans la région Atlantique, et les revenus sont maintenus au même niveau alors que les frais d'exploitation et le coût de la main-d'œuvre augmentent chaque année. Nous espérons que le Comité fera des recommandations qui aideront les exploitants privés de cette région à soutenir la concurrence sur un marché ouvert et juste.

Le président: Monsieur Horner?

M. Horner: Monsieur Dawe, est-ce que vous connaissez la nouvelle loi nationale sur les transports? Si vous la connaissez, je vais poser des questions à ce sujet; sinon, je m'en abstiendrai.

M. Hillyard: Non, je ne la connais pas.

M. Horner: Bon, je laisserai cette partie de côté. Mais dans la nouvelle loi nationale sur les transports, on dit que tous les tarifs doivent être compensatoires, et l'on veut dire par là que tous les tarifs doivent couvrir les frais de livraison réels. Du moins c'est ce que j'ai cru comprendre au cours du débat. Ici, en un sens, vous laissez entendre que le tarif du National-Canadien n'est pas compensa-

[*Text*]

quite visible to me it is not to the recording system.

You are in the business of shipping in the maritimes from Halifax to Newfoundland. Would you agree with the suggestion we heard in Halifax that the freight costs from the Atlantic Provinces to Newfoundland should be no higher than the water rate and the CNR rate across the strait really, from Montreal? Would you agree with that general principle?

Mr. Hillyard: Oh yes, I would agree with that.

Mr. Horner: If that were so, would you be able to offer serious competition to the CNR movement?

Mr. Hillyard: I think so.

Mr. Horner: Fine. I have no further questions. This is one suggestion we heard in Halifax and I wanted to ask you about it.

The Chairman: Mr. Skoberg?

Mr. Skoberg: Mr. Chairman, Mr. Hillyard, I understand that your company deals entirely in salt fish?

Mr. Hillyard: No, we are a shipping company and also fish exporters. We deal in salted cod.

Mr. Skoberg: Salted cod?

Mr. Hillyard: Salted cod, yes.

Mr. Skoberg: Do you own any trucks at all?

Mr. Hillyard: Yes, we have eight vehicles.

Mr. Skoberg: Eight trucks?

Mr. Hillyard: Yes.

Mr. Skoberg: Are you in favor of extending the MFRA rates to trucking transportation?

Mr. Hillyard: Yes, if the Maritime Freight Rates Act should apply to one carrier, it should apply to all carriers.

Mr. Skoberg: And you would expect, naturally, that your transportation system will qualify under those particular rates.

[*Interpretation*]

toire, en particulier pour la farine. Vous fa tes signe que oui de la tête; c'est très visib pour moi, mais pas pour le systèn d'enregistrement.

Vous vous occupez de l'expédition dans l Maritimes, d'Halifax à Terre-Neuve. Serie vous d'accord avec ce qu'on nous a dit Halifax, à savoir, que le tarif de transpo des marchandises des provinces de l'Atlant que jusqu'à Terre-Neuve ne devrait pas êt plus élevé que le tarif de transport par vo d'eau et le taux du National-Canadien pour traversée du détroit, en fait, à partir de Mor tréal? Êtes-vous d'accord avec ce princi général?

M. Hillyard: Oui, entièrement.

M. Horner: S'il en était ainsi, vous pourri représenter une sérieuse concurrence pour National-Canadien?

M. Hillyard: Oui, je pense.

M. Horner: Très bien. Je n'ai pas d'autre questions. C'est une proposition que nou avons entendue à Halifax, et je voulais vou demander ce que vous en pensiez.

Le président: Monsieur Skoberg?

M. Skoberg: Monsieur le président, mon sieur Hillyard, si j'ai bien compris, votr société s'occupe uniquement du transport d poisson salé?

M. Hillyard: Non, nous sommes une sociét d'expédition, et nous sommes aussi des expor tateurs de poisson. Nous nous occupons de l morue salée.

M. Skoberg: De la morue salée?

M. Hillyard: Oui.

M. Skoberg: Avez-vous des camions?

M. Hillyard: Oui, nous avons hu véhicules.

M. Skoberg: Huit camions?

M. Hillyard: Oui.

M. Skoberg: Êtes-vous en faveur d'un extension des tarifs de la Loi sur les taux d transport des marchandises dans les province Maritimes au transport par camion?

M. Hillyard: Oui, si la Loi sur les taux d transport des marchandises dans les province Maritimes s'applique à un mode de transpor elle doit s'appliquer à tous.

M. Skoberg: Et, naturellement, vous vou attendez à ce que votre mode de transpor soit admissible à ces tarifs spéciaux?

[*Texte*]

Mr. Hillyard: Exactly.

Mr. Skoberg: How much use do you make of the rail facilities right now?

Mr. Hillyard: In regard to rail facilities we transport goods from Halifax that are brought to Halifax from Montreal and western points by the CNR. So, in effect, as we said in our brief, the railways were feeling they were going to lose the transportation of so many thousand tons of cargo to Newfoundland, while in effect they were still transporting it to Halifax. They were not going to lose it; they were transporting it to Halifax and we were carrying it on to here.

Mr. Skoberg: How many people does your company employ at this particular time?

Mr. Hillyard: It varies between 60 and 90 people.

Mr. Skoberg: Are they organized at this point?

Mr. Hillyard: No.

Mr. Skoberg: What would you actually serve at LCL rates and how much of your shipments are actually LCL shipments?

Mr. Hillyard: Approximately 20 per cent, I would say.

Mr. Skoberg: What was that?

Mr. Hillyard: About 20 per cent.

Mr. Skoberg: About 20 per cent. Do you have any problem obtaining refrigerated cars, and are your trucks refrigerated?

Mr. Hillyard: No, we do not have any refrigeration service.

Mr. Skoberg: What if your traffic were to be shipped across the line to United States ports?

Mr. Hillyard: What do you mean, from Newfoundland or...

Mr. Skoberg: Yes.

Mr. Hillyard: The traffic that we bring to Halifax is usually transported to the Caribbean; most of the salted cod that we bring to Halifax is transported to the Caribbean.

Mr. Skoberg: Could you give me any indication of the number of hours that your peo-

[*Interprétation*]

M. Hillyard: C'est cela.

M. Skoberg: Quel usage faites-vous des installations ferroviaires, à l'heure actuelle?

M. Hillyard: Pour ce qui est des installations ferroviaires, nous transportons, de Halifax, les marchandises qui y arrivent, par le National-Canadien, en provenance de Montréal ou des régions de l'Ouest. Donc, en fait, comme nous l'avons dit dans notre mémoire, les chemins de fer estimaient qu'ils allaient perdre le transport de milliers de tonnes de marchandises en direction des Maritimes, alors qu'en fait ils continuaient le transport vers Halifax. Ils n'allaient pas le perdre: ils faisaient le transport jusqu'à Halifax, et nous acheminions ensuite les marchandises jusqu'ici.

M. Skoberg: Combien de personnes votre compagnie emploie-t-elle à l'heure actuelle?

M. Hillyard: Cela varie entre 60 et 90 personnes.

M. Skoberg: Sont-elles syndiquées, pour le moment?

M. Hillyard: Non.

M. Skoberg: Qu'est-ce que vous transporteriez au tarif de changement incomplet, et quelle proportion de vos expéditions faites-vous en fait par wagonnée incomplète?

M. Hillyard: Je dirais environ 20 p. 100.

M. Skoberg: Pardon?

M. Hillyard: Environ 20 p. 100.

M. Skoberg: Environ 20 p. 100. Avez-vous de la difficulté à obtenir des wagons réfrigérés, et vos camions sont-ils réfrigérés?

M. Hillyard: Non, nous n'avons pas de service réfrigéré.

M. Skoberg: Et s'il fallait expédier vos produits de l'autre côté de la frontière, vers les ports des États-Unis?

M. Hillyard: Qu'est-ce que vous voulez dire? A partir de Terre-Neuve ou...?

M. Skoberg: Oui.

M. Hillyard: Les marchandises que nous transportons vers Halifax sont généralement envoyées vers les Caraïbes; la plus grande partie de la morue salée que nous transportons jusqu'à Halifax est expédiée vers les Caraïbes.

M. Skoberg: Pourriez-vous me donner une idée du nombre d'heures de travail par jour

[*Text*]

ple now are working per day in the transportation field? I am thinking of the legislation that possibly could come in in regard to a 40 hour week.

Mr. Hillyard: Yes, they are working 8 hours a day.

Mr. Skoberg: Eight hours a day?

Mr. Hillyard: Yes.

The Chairman: Any other question gentlemen? Mr. Trudel?

Mr. Trudel: Mr. Chairman, from what I gather from this brief, the company claims that they have lost the entire flour trans-shipment business.

Mr. Hillyard: Not entirely.

Mr. Trudel: But the bulk of it?

Mr. Hillyard: The bulk of it, yes.

Mr. Trudel: This originated from Montreal?

Mr. Hillyard: Yes, Montreal and the lakehead.

Mr. Trudel: Montreal and the Lakehead. Could this not be a question of choice by the shippers themselves, as to the way they are going to ship their products?

Mr. Hillyard: No, sir, It is not a choice. I have correspondence in 1965 to show the Maple Leaf Mills Limited made representations to the CNR for a reduced all rail through rate on flour to Newfoundland, because their competitors had an unfair advantage through and all-water rate. Since that time, there is no all-water movement of flour into Newfoundland at all. So, there is no justification for this through rate to make one miller competitive with another.

Mr. Trudel: If there is no all-water movement, then, I would assume that one of your competitors obtained that business?

Mr. Hillyard: I do not understand that, Mr. Chairman.

Mr. Trudel: All-water rates to St. John's are available at the present time from the Lakehead or from Montreal.

[*Interpretation*]

que font vos gens à l'heure actuelle, dan l'industrie des transports? Je pense à mesure législative qui pourrait être adopt pour imposer la semaine de travail de heures.

M. Hillyard: Oui, ils travaillent 8 heur par jour.

M. Skoberg: Huit heures par jour?

M. Hillyard: Oui.

Le président: Y a-t-il d'autres question messieurs? Monsieur Trudel?

M. Trudel: Monsieur le président, d'aprè ce que j'ai pu comprendre de ce mémoire, l compagnie prétend qu'elle a perdu toutes s expéditions de farine.

M. Hillyard: Pas tout à fait.

M. Trudel: Mais la plus grande partie?

M. Hillyard: La plus grande partie, oui.

M. Trudel: Est-ce qu'elles venaient d Montréal?

M. Hillyard: Oui, de Montréal et de la têt des Grands Lacs?.

M. Trudel: C'est cela. Est-ce que ce n serait pas laissé au choix des expéditeur eux-mêmes, d'expédier leurs produits par te ou tel moyen?

M. Hillyard: Non, monsieur. Ce n'est pa une question de choix. J'ai de la correspon dance datant de 1965 qui montre que l *Maple Leaf Mills Limited* a présenté des ins tances au National-Canadien pour obtenir u tarif réduit pour le transport ferroviaire de l farine jusqu'à Terre-Neuve, car ses concur rents avaient un avantage injuste grâce à u taux maritime d'ensemble. Depuis c temps-là, toutefois, il n'y a pas de transpor de farine entièrement par voie d'eau jusqu'à Terre-Neuve. Et, alors, il n'y a pas de justi fication à l'heure actuelle pour avoir ce tau de passage pour qu'un meunier puisse faire l concurrence à un autre.

M. Trudel: S'il n'y a pas de transport pa voie d'eau, alors, il y a un de vos concurrent qui a obtenu ce commerce?

M. Hillyard: Je ne comprends pas très bien monsieur le président.

M. Trudel: Il est possible, à l'heure actuelle, d'obtenir de Lakehead, ou de Mont réal, des taux entièrement par voie d'eau jusqu'à Saint-Jean.

[*Texte*]

Mr. Hillyard: Yes, but there is no movement of flour by the all-water route, right now.

Mr. Trudel: Well then, assuming that it is coming by rail to Halifax what I want to establish...

Mr. Hillyard: You are right, yes.

Mr. Trudel: ...is that there is somebody else involved at the present time.

Mr. Hillyard: No, no. It is not coming to Halifax, it is going through North Sydney at a through rate.

Mr. Trudel: Oh, I see.

Mr. Hillyard: And it is coming into my area at less than it does to Stephenville and Corner Brook which are 500 miles West. I am claiming that on a mile ton basis, we are being discriminated against in our area because it is a cheaper rate from Western Ontario to Eastern Newfoundland than it is to Western Newfoundland.

Mr. Trudel: This is a point that I wanted to establish. Thank you, Mr. Chairman.

The Chairman: Mr. Horner, on a supplementary?

Mr. Horner: Thank you, Mr. Chairman. Has this any connection with where, under the Terms of Union, the rate from Sydney Harbour to Port aux Basques had to be considered as a 90 mile limit? Has this got any connection as to why they are doing it cheaper, do you think?

Mr. Hillyard: I do not think so.

Mr. Horner: You do not think so.

Mr. Hillyard: I do not think so. The point I was making just now is that the rate to Western Newfoundland is cheaper than the rate to Eastern Newfoundland.

Mr. Horner: I heard that point, yes. In presenting your argument later, I wanted to know.

Mr. Hillyard: Yes, that is fine.

The Chairman: Gentlemen, this completes the questioning on this brief and I want to thank you very much for coming.

The next brief is Newfoundland Hardwoods Limited and Newfoundland Fibrply Limited, Associated Companies of St. John's Newfoundland. Are they here? The brief will stand.

[*Interprétation*]

M. Hillyard: Oui, mais il n'y a pas de mouvement de farine entièrement par voie d'eau à l'heure actuelle.

M. Trudel: Et alors, si on présume que cela se fait par chemins de fer jusqu'à Halifax, ce que je veux établir ...

M. Hillyard: Vous avez raison.

M. Trudel: ... c'est que d'autres sont en cause à l'heure actuelle.

M. Hillyard: Non, non. Cela ne vient pas à Halifax. Cela passe par North Sydney grâce à un taux de passage.

M. Trudel: Je vois.

M. Hillyard: Et cela arrive dans ma région à un prix moins coûteux pour arriver à Stephenville et à Corner Brook, à 500 milles plus à l'Ouest. Et alors, je trouve qu'en fonction du nombre de tonnes par mille, il y a une distinction injuste dans notre région car cela coûte moins cher de l'ouest de l'Ontario jusqu'à l'est de Terre-Neuve que jusqu'à l'ouest de Terre-Neuve.

M. Trudel: C'est un point que je voulais justement éclaircir. Merci, monsieur le président.

Le président: Monsieur Horner, une question complémentaire?

M. Horner: Merci, monsieur le président. Cela a-t-il rapport avec le moment, en vertu des conditions de l'union, où le taux de Sydney Harbour jusqu'à Port-aux-Basques doit être considéré comme étant une limite de 90 milles? Cela a-t-il rapport à la raison pour laquelle on le fait à meilleur marché?

M. Hillyard: Je ne crois pas.

M. Horner: Vous ne le croyez pas?

M. Hillyard: Je ne le crois pas. Le point que je viens de soulever est que le taux pour l'ouest de Terre-Neuve est moins cher que celui jusqu'à l'est de Terre-Neuve.

M. Horner: Oui, je l'avais entendu. En présentant votre argument un peu plus tard, je voulais savoir ce qu'il en était.

M. Hillyard: Oui, c'est bien.

Le président: Messieurs, cela termine la période des questions pour ce mémoire, et je veux vous remercier d'être venu.

Notre prochain mémoire nous viendra de *Newfoundland Hardwoods Limited* et *Newfoundland Fibreply Limited Associated Companies*, de Saint-Jean, Terre-Neuve. Sont-ils ici? Ce mémoire sera réservé.

[*Text*]

Newfoundland Associated Fish Exporters Limited. I have on my right here, Mr. James Laws, Manager, who will make a short statement.

Mr. Laws: Mr. Chairman and gentlemen, thank you for the opportunity to expound a little on the very short brief which we put in last year. This brief points out to you that we feel we need some special assistance to offset the extra costs involved in the salt codfish export trade in nowadays having to ship all of our exports into the Caribbean and South America with trans-shipment mostly at Halifax.

Our business is a 100 per cent export business and you can appreciate, with the very stiff competition in the markets abroad in the fish business which exists not only today but has done for many years, the additional cost of transporting from Newfoundland ports to such a port as Halifax, where mostly the goods are trans-shipped, is a very vital factor in the economics of the whole business. We find ourselves at a disadvantage against the position of our competitors in the Maritimes. In Halifax, for instance, an exporter can ship all of his goods to the Caribbean at his doorstep. We cannot.

Virtually 100 per cent of our goods nowadays have to be transported mostly to Halifax for shipment to the Caribbean. We feel that some form of equalization should be applied to the Newfoundland salt cod fish industry.

I should point out, perhaps that many years ago, when the Canadian National was operatnig, they did carry our exports to the Caribbean at the same rate as they did from the Maritime Provinces. When Canadian National boats stopped operating then we found that the shipping companies operating from the mainland required us to pay the full cost from the Maritimes to the Caribbean, plus of course the cost of transporting from Newfoundland to Halifax. We have from time to time struggled with this problem and tried to find other methods, such as direct shipping from Newfoundland ports to the Caribbean, but nothing of lasting success has been achieved. We do feel there is need, Mr. Chairman, for some special consideration in this respect. I think it is a matter of equalization of rates in some way.

[*Interpretation*]

Newfoundland Associated Fish Exporter Limited. J'ai ici, à ma droite, M. James Law qui va vous faire un bref exposé.

M. James Laws: Monsieur le présiden messieurs, merci beaucoup, de m'avoir donn l'occasion de vous donner plus de détails su le mémoire très court que nous vous avon présenté l'an dernier. Le mémoire vou signale que nous avons besoin d'une aide par ticulière pour contrebalancer les frais sup plémentaires engagés dans le commerce d l'exportation de la morue salée, étant donn que, à l'heure actuelle, il nous faut exporte tous nos produits aux Antilles et en Amériqu du Sud, transférant nos expéditions surtout Halifax.

Notre production est entièrement destinée l'exportation. Vous comprendrez donc, qu'e vertu de la concurrence très ferme que nou rencontrons sur les marchés étrangers dans l commerce du poisson, situation qui n'est pa d'aujourd'hui, mais qui existe depuis bien de années, le coût de transport des ports d Terre-Neuve jusqu'à un port comme Halifax par exemple, où la plupart des produits n sont que réexpédiés, cela est un facteu essentiel dans l'économie de tout le com merce. Nous nous trouvons à un désavantag devant la situation de nos concurrents dan les Maritimes. A Halifax, par exemple, u exportateur pourrait expédier sa productio entière aux Antilles à partir presque de s porte. Nous, nous ne le pouvons pas.

Presque tous nos produits aujourd'hui doi vent être transportés jusqu'à Halifax e ensuite, réexpédiés aux Antilles. Nou croyons donc qu'une certaine forme de péré quation devrait s'appliquer à l'industrie de l morue salée de Terre-Neuve.

Je devrais peut-être dire que le Canadien National, il y a quelques années, transportai nos exportations jusqu'aux Caraïbes au mêm taux qu'il le faisait pour les provinces de Maritimes. Lorsque les navires du National Canadien ont cessé de les exporter, nou avons alors réalisé que les compagnies d navigation et d'expédition qui étaient exploi tées à partir de la terre ferme, nous obli geaient à payer tous les frais à partir de Maritimes jusqu'aux Caraïbes en plus de frais de transport de Terre-Neuve jusqu' Halifax.

De temps à autre, nous étions aux prise avec ce problème et avons tenté de trouve un moyen pour expédier la marchandis directement aux Caraïbes mais nous n'avon jamais réussi à trouver de solution perma nente. Nous trouvons, donc, monsieur le pré sident, qu'il faut accorder une attention spé ciale à ce problème. Il s'agit en fait, à mo avis, d'un problème d'égalisation des taux.

[*Texte*]

The Chairman: Mr. McGrath.

Mr. McGrath: You did not specify what orm of assistance or how much assistance ou required. Can you give us some idea of hat you think this would cost?

Mr. Laws: Well, to put it simply, the cost transporting from Newfoundland ports to alifax and other ports, for general purposes, e can say is one cent a pound or $20.00 for a ort ton. The amount of cargo carried from ewfoundland in the way of dried saltfish in 968 would have been the equivalent of about 5,000 tons. Now this one cent a pound obvisly will reflect itself back right away to the rice of fish to the fisherman, and you will nderstand what a cent a pound to a fisherian means.

Mr. McGrath: Have you made any epresentations to the Government of Canada ther than this brief to this committee?

Mr. Laws: I am not sure, but I could say ecifically that we have made representaons directly on this point. We have from me to time made representations to Ottawa ointing out some of the disadvantages we ad and still have in competition with our ompetitors from Europe. This has been most our line with Ottawa. I might emphasize e point that Newfoundland's major competirs in the Caribbean and South America, part of course from those exporters in the aritimes, are the European, Spanish and rench industries.

Mr. McGrath: And it is subsidized competion from these countries.

Mr. Laws: There are very heavily subsized and supported in one form and another. a general way I can say that France and pain can export into the Caribbean and their st of freight is only about one-half of what costs us from here. This has been pointed ut many times to the appropriate epartments in Ottawa.

Mr. McGrath: What effect would the prosed or talked about salt cod marketing oard have on this submission?

Mr. Laws: Well, I cannot say of course recisely what would happen under a form of alt cod marketing board but it depends how would operate. I presume that if by this is eant a form of marketing which would conol all marketing and in effect group it into ne heading, it would have some effect on the ossibility of consolidating the shipping and

[*Interprétation*]

Le président: Monsieur McGrath.

M. McGrath: Monsieur Laws, vous n'avez pas précisé quelle forme d'assistance ou la somme de l'assistance nécessaire. Avez-vous une idée de ce qu'il pourrait en coûter?

M. Laws: Le coût du transport entre Terre-Neuve et Halifax est de un cent la livre ou $20 la tonne. Il s'est transporté en 1968 environ 15,000 tonnes de poisson séché. Ce prix de un cent la livre se reflétera dans le prix de revient du poisson pour le pêcheur et vous savez ce que peut signifier ce cent-la-livre pour le pêcheur.

M. McGrath: Avez-vous fait des représentations au gouvernement du Canada, en plus de nous avoir soumis ce mémoire?

M. Laws: Je n'en suis pas certain mais je puis vous dire que nous avons fait certaines représentations directes à cet égard. De temps à autre, nous avons fait des représentations à Ottawa signalant certains des désavantages que nous avons eus et que nous avons toujours à soutenir vis-à-vis nos concurrents européens.

Voici ce que nous avons dit principalement à Ottawa. Je pourrais peut-être souligner toutefois, que les principaux concurrents de Terre-Neuve aux Antilles et en Amérique du Sud, en plus évidemment des exportateurs des Maritimes, sont les industries européennes, espagnoles et françaises.

M. McGrath:: Ces industries sont subventionnées.

M. Laws: Oui. Fortement subventionnées et appuyées sous une forme ou sous une autre.

De toute façon, je pourrais dire que l'Espagne et la France exportent à partir de leur pays jusqu'aux Antilles et que leurs frais sont inférieurs aux nôtres dans une proportion de 50 p. 100. Nous l'avons signalé à plusieurs reprises aux ministères appropriés à Ottawa.

M. McGrath: Une dernière qustion, monsieur le président. Quel effet l'office de commercialisation de la morue salée pourrait-il avoir sur ce mémoire?

M. Laws: Je ne saurais dire précisément ce qui se passerait s'il y avait un office de commercialisation pour la morue salée, puisque tout dépendrait du fonctionnement de cet office. Si l'on songe à une mise en marché unifiée, il pourrait en découler une certaine consolidation des expéditions ce qui entraînerait peut-être une forme d'expédition directe.

[*Text*]

therefore perhaps tend towards a certain amount of direct shipping. But I do not think tht this would necessarily occur with all of our business. I am not sure of this. It would depend very greatly on competitive conditions, but I think we would still be forced to a certain degree at any rate to utilize transshipment at Halifax.

Mr. McGrath: I would just end, Mr. Chairman, by noting for the record that the Minister of Fisheries said yesterday that he was expecting to make a statement on the salt fish marketing board within a few weeks.

The Chairman: Mr. Allmand.

Mr. Allmand: Sir, if I understood you correctly, you would rather have a shipping service direct from Newfoundland to the Caribbean. Is that correct?

Mr. Laws: I am not sure whether I would prefer that. Something needs to be done one way or the other. One way would be a direct service from the appropriate ports of Newfoundland—not necessarily St. John's because you have to bear in mind that a lot of this production is at several major ports outside the City of St. John's. What really could be done is a direct service from these ports to the Caribbean. Either that or some form of equalization where we have to transport to Halifax.

Mr. Allmand: In your letter that we have before us you say that none of the ships that go down to the Caribbean and South America work out of Newfoundland but, rather, work out of either Halifax or Saint John.

Mr. Laws: Yes. Saguenay Shipping Ltd. is really the only constant line operating in that area from Canada.

Mr. Allmand: Are your shipments from Newfoundland big enough to justify one of these large vessels that go out of Halifax? Would the cargo be big enough from Newfoundland to justify picking up here, or do they have other reasons for not picking up here?

Mr. Laws: Well, we have talked with a firm like Saguenay Shipping Ltd. on this point—not in the last year or two but prior to this—and there were efforts to bring ships in here, but generally speaking it all ends up with them saying: "No, the diversion is too costly, the time involved is too great and we must run a regular fast service down, it just is not a practical proposition because the volume is not sufficient to justify it."

[*Interpretation*]

Mais je n'en suis pas sûr. Tout dépendrait la concurrence et des conditions de la conc rence. Toutefois, je crois qu'il serait néc saire de transborder la marchandise à H fax.

M. McGrath: Aux fins du dossier, monsi le président, j'aimerais dire que le minis des Pêcheries a déclaré hier, qu'il fera u déclaration, au sujet d'un tel office d'ici qu ques semaines.

Le président: M. Allmand.

M. Allmand: Si j'ai bien compris, vous p férez avoir un service direct de Terre-Neu aux Caraïbes. Est-ce exact?

M. Laws: Je ne suis pas sûr si c'est là préférence mais il faut faire quelque chose pourrait s'agir d'un service direct à partir ports appropriés de Terre-Neuve, pas néc sairement Saint-Jean, parce qu'il faut te compte du fait qu'une bonne partie de la p duction se trouve dans divers ports d'imp tance, à l'extérieur de la ville de Saint-Je Il serait possible d'établir un service direct ces ports aux Caraïbes, ou une formule d'é lisation des taux lorsqu'il s'agit de transpor la marchandise jusqu'à Halifax.

M. Allmand: Dans votre lettre, lettre d nous sommes saisis maintenant, vous di qu'aucun des navires qui vont dans les Car bes et en Amérique du Sud ne commence s voyage à partir de Terre-Neuve, mais qu partent plutôt d'Halifax ou de Saint-Jean.

M. Laws: La Saguenay Shipping Ltd. est seule ligne régulière dans cette région Canada.

M. Allmand: Est-ce que vos expéditions partir de Terre-Neuve sont assez considé bles pour justifier l'utilisation d'un de grands navires qui partent de Halifax? Est qu'il y aurait assez de cargaisons à partir Terre-Neuve pour justifier qu'ils procèd ainsi ou y a-t-il d'autres raisons pour ne l le faire.

M. Laws: Nous avons discuté de cela avec Saguenay Shipping Ltd. non pas il y a un deux ans, mais bien avant. On a essayé d'at rer des navires ici, mais règle générale, refusent presque toujours en disant que détour est trop grand, et trop coûteux, q cela prend trop de temps, qu'ils doivent fou nir un service régulier et rapide, et que n'est pas une suggestion pratique parce q le volume est insuffisant.

[Texte]

I point out here that there is a difference. ou will notice that I am talking about our xport business with the Caribbean and outh America. I am not referring to our usiness with Europe. Actually with Europe e do a much more efficient and effective b, we carry more cheaply to the European arket than we do to the Caribbean, and this because we generally do ship our goods rectly from Newfoundland to Europe.

Mr. Allmand: Are the ships that carry your oducts from Newfoundland to Europe the me line that...

Mr. Laws: No, this is quite different. Some- mes these are liners running between, say, ontreal and the Mediterranean and we have em call in at St. John's when we have suffi- ent cargo to warrant it, and on many other casions we charter our own small ships in e open market and they load directly at the rts here and carry to the European stination.

Mr. Allmand: Therefore, if I understand ou correctly, you cannot have that same peration to the Caribbean and South Ameri- a because the volume is not that large.

Mr. Laws: Well, it is not that it is not that rge, as we stand under present conditions. I ink partly it is due to the weekly and two eekly services which are being run out of alifax to the Caribbean ports and, conse- uently, buyers in the Caribbean only buy ally from week to week. It is difficult to sell em a block of fish which can be carried in a artered ship, such as we do in the case of urope. You will appreciate the buyer's point f view here. He persists, he says that there a weekly ship and you will put so much on very ship. This is the problem.

Mr. Allmand: Have you ever investigated e possibilities of air cargo out of ewfoundland?

Mr. Laws: I think that would be too costly r this business.

Mr. Allmand: That is all, thank you very uch.

The Chairman: Mr. Mahoney, on a supple- entary question.

Mr. Mahoney: Do you have any advantage ver the people in Halifax in shipping to urope?

[*Interprétation*]

Je vous signalerai ici qu'il y a une distinction à faire. Vous verrez que je vous parle de nos exportations aux Caraïbes et en Amérique du Sud. Je ne vous parle pas de notre commerce avec l'Europe. Avec l'Europe, notre commerce est beaucoup plus efficace parce que le transport est plus économique vers l'Europe que vers les Caraïbes. Cela est dû au fait que, règle générale, nos marchandises sont expédiées directement de Terre-Neuve vers l'Europe.

M. Allmand: Ces navires qui transportent ainsi vos produits de Terre-Neuve à l'Europe, appartiennent-ils à la mème compagnie de navigation...

M. Laws: Non, non. C'est une toute autre chose. Parfois il s'agit de navires qui vont de Montréal à la Méditerranée et qui arrêtent à Saint-Jean lorsque nous avons une cargaison suffisante et bien souvent nous affrétons nos propres petits navires sur le marché libre qui chargent directement aux ports ici et se rendent jusqu'aux destinations européennes.

M. Allmand: Je vois. Mais si j'ai bien compris, vous ne pouvez avoir ces mêmes opérations vers les Caraïbes et l'Amérique du Sud parce que le volume nest pas aussi considérable.

M. Laws: Ce n'est pas parce que le volume n'est pas assez considérable dans les conditions actuelles, je crois que cela est dû en partie aux services hebdomadaires et bihebdomadaires qui vont de Halifax aux ports des Caraïbes et par conséquent les acheteurs des Caraïbes n'achètent que de semaine en semaine. C'est difficile de leur vendre une quantité de poisson qu'on peut transporter au moyen de navires affrétés comme dans le cas de l'Europe. Il faut tenir compte du point de vue de l'acheteur. Comme il y a un navire à toutes les semaines, il insiste pour qu'on y mette une certaine quantité de poisson. Voilà le problème.

M. Allmand: Est-ce que vous avez songé à la possibilité d'un transport aérien, à partir de Terre-Neuve.

M. Laws: Ca serait trop coûteux pour ce genre d'entreprise.

M. Allmand: C'est tout, je vous remercie.

Le président: Monsieur Mahoney, question supplémentaire.

M. Mahoney: Par rapport aux gens d'Halifax, avez-vous certains avantages en matière de transport vers l'Europe?

[*Text*]

Mr. Laws: No, there is no advantage because they would have the same rates from Halifax as we could get from Newfoundland.

Mr. Mahoney: What tonnage do you ship on a weekly, monthly, or annual basis to the Caribbean?

Mr. Laws: I said that last year Newfoundland shipped into that area about 15,000 short tons, so this is something over 1,000 to 1,250 tons a month average.

The Chairman: Mr. Perrault, on a supplementary question.

Mr. Perrault: In considering assitance for transportation of this kind, could you tell the committee whether the market for dry salted cod is increasing or decreasing? Do you have other lines in addition to the salted cod?

Mr. Laws: No. My own company are dealing exclusively in this item.

Mr. Perrault: Is there a general increase in world demand, or a decrease?

Mr. Laws: Now are you speaking of world demand or of the Caribbean? I am not sure of your question.

Mr. Perrault: In the Caribbean, in the first instance.

Mr. Laws: I think figures would probably show today that there has been some reduction in total in the Caribbean area. That does not apply to every destination or every country in the Caribbean, but in certain spots there has been a reduction. Now there are many reasons for this which I will not attempt to elaborate on now.

Mr. Perrault: Is this because of transportation difficulties in getting the product to market or personal taste?

Mr. Laws: I do not think it is personal taste so much. It is due partly to competition from cheap food stuffs such as poultry, which is much cheaper than fish products today in the Caribbean, and also the cost of transport. If I were at the end where my competitors are in Europe I would have a tremendous advantage right away. They have cut right into our market because of their price advantage.

Mr. Perrault: The reason for my question, Mr. Chairman, is simply to ascertain whether or not providing transportation assistance to

[*Interpretation*]

M. Laws: Non, pas véritablement pa qu'ils auraient exactement le même tau partir de Halifax qu'à partir de Terre-Neuv

M. Mahoney: Que serait le tonnage heb madaire, mensuel ou annuel que v expédiez?

M. Laws: J'ai dit que l'année dernièr Terre-Neuve a expédié dans cette région quivalent disons d'environ 15,000 tonnes, s 1,250 tonnes par mois en moyenne.

Le président: Monsieur Perrault, une qu tion complémentaire.

M. Perrault: Si l'on songe à fournir l'aide pour ce genre de transport, pourri vous dire au comité si le marché pour morue salée augmente ou diminue. Est-ce q vous avez d'autres produits à part cela?

M. Laws: Non. Ma propre compagnie ve ce produit exclusivement.

M. Perrault: Est-ce qu'il y a une augmen tion, ou une diminution de la demande mo diale?

M. Laws: Dans la demande mondiale celle des Caraïbes?

M. Perrault: Dans les Caraïbes.

M. Laws: Je pense que les chiffres no montreront sans doute aujourd'hui qu'il y eu une certaine baisse, dans l'ensemble, da la région des Caraïbes. Cela ne s'applique p à chacune des destinations et chacun des pa mais à certains endroits. Il y a différent raisons, et je n'essaierai pas d'en élaborer l motifs.

M. Perrault: Est-ce dû à des difficultés matière de transport vers les marchés ou à u goût purement personnel?

M. Laws: Je ne crois pas que ça soit dû un goût personnel tellement. C'est dû en pa tie à la concurrence nous venant d'autres de rées alimentaires, telles la volaille, qui so moins coûteuses que les produits du poiss aujourd'hui dans les Caraïbes et aussi a coût du transport. Si, disons j'étais au mêm endroit que mes concurrents en Europe, alo j'aurais un très grand avantage immédiat ment. Ils se sont taillé une place dans n marchés à cause de leurs prix.

M. Perrault: La raison pour laquelle je pos la question, c'est de savoir si le fait de fou nir des subventions au transport ne résou

Texte]

is industry may meet the basic problem cing the industry—that is, consumer reference.

Mr. Laws: I am quite sure that part of this the price problem—the competitive advan-ge which our European competitors have ver us. The difference between $25.00 and 50.00 a ton is $25.00 a ton; it is just as simple that. This is an industry where there is a ery very low profit margin.

Mr. Perrault: Has your industry been fected by devaluation of currency?

Mr. Laws: Yes indeed, 15 per cent. As you now, a great deal of our major markets in e Caribbean and elsewhere has been tied to erling and this immediately affected us to at extent.

Mr. Perrault: Do you think that merely oviding transportation subsidies can meet e basic problem of devaluation of currency?

Mr. Laws: No, I think there are two sepa-te problems here.

The Chairman: Mr. Trudel.

Mr. Trudel: Mr. Chairman, I believe the itness, Mr. Laws, in his statement men-oned that the rates for the Spanish and the rench companies are one-half the rates that e have here. Could you tell us, sir, is the ain reason the size of the ship or the way at they ship it? There must be a reason if ere is a difference of $25.00 a ton in their ipping structure?

Mr. Laws: Of course part of the reason is e very thing we are complaining about, the ditional costs we have to meet in transport-g from Newfoundland to Halifax.

Mr. Trudel: Would your cost then, sir, be the range of $25.00 a ton from here?

Mr. Laws: Well no, roughly $20.00 a ton.

Mr. Trudel: $20.00 a ton?

Mr. Laws: Approximately $20.00 a ton.

Mr. Trudel: Their shipments cover a great-distance.

Mr. Laws: Yes, but my note says that the st of transporting from here is $19.00 to 3.00 a ton.

Mr. Trudel: To Halifax?

Mr. Laws: To Halifax.

The Chairman: Mr. Skoberg.

[*Interprétation*]

drait pas le problème de base de l'industrie de la pêche, la préférence du consommateur.

M. Laws: Une partie de ce problème réside dans le prix, l'avantage concurrentiel que possèdent nos concurrents européens par rapport à nous. La différence qui existe entre $25 et $50 la tonne, c'est $25 dollars la tonne tout de même. C'est aussi simple que cela. C'est une industrie où la marge de profit est mince.

M. Perrault: Est-ce que votre industrie a été affectée par la dévaluation des devises?

M. Laws: Oui. 15 p. 100. Comme vous le savez, nos principaux marchés sont rattachés à la livre sterling. Cela nous a affectés jusqu'à un certain point.

M. Perrault: Croyez-vous que, si on vous fournissait seulement des subventions en matière de transport, cela pourrait résoudre le problème de base de la dévaluation.

M. Laws: Non. Ce sont là deux problèmes distincts.

Le président: Monsieur Trudel.

M. Trudel: Je pense que le témoin, monsieur Laws, a dit dans sa déclaration que les taux des sociétés européennes et espagnoles sont la moitié de ceux que nous avons ici. Pourriez-vous nous dire alors quelle en est la raison principale, la dimension des navires, ou la façon dont se fait l'expédition. J'imagine qu'il y a un motif vu qu'il y a une différence de 25 dollars la tonne de différence.

M. Laws: Une des raisons, dont nous nous plaignons, c'est le coût additionnel qu'il nous faut assumer en faisant le transport de Terre-Neuve à Halifax.

M. Trudel: Vos coûts alors seraient de l'ordre de $25 dollars la tonne à partir d'ici?

M. Laws: Non, environ $20 la tonne.

M. Trudel: $20 dollars la tonne?

M. Laws: Oui, $20 dollars la tonne.

M. Trudel: Les expéditions de ces chargements se font sur un plus long parcours.

M. Laws: Oui, mais le coût du transport à partir d'ici se situe entre 19 et $23 dollars la tonne.

M. Trudel: D'ici à Halifax?

M. Laws: C'est exact.

Le président: Monsieur Skoberg.

[*Text*]

Mr. Skoberg: How much use do you make of the rail service at this particular time.

Mr. Laws: For the purpose of exporting we use it very very little indeed. I think the rail cost is higher than it is at present by sea. Ours is an all sea movement.

Mr. Skoberg: What about truck service?

Mr. Laws: We use them sometimes. In the last six months trucks have been used to a certain degree but they could never possibly carry the total cargo that we have. Last year we put out about 15,000 tons of cargo. Trucks could never carry any quantity, and the cost at the present time by truck is a little higher than it is by sea.

Mr. Skoberg: Are you satisfied with the availability of rail and truck service?

Mr. Laws: I did not quite get your question.

Mr. Skoberg: Are you satisfied now with the availability of cars and trucks in so far as your use is indicated.

Mr. Laws: When you say cars, do you mean rail cars?

Mr. Skoberg: Yes.

Mr. Laws: Well, as I say, we have not used them a great deal because sea transport is most effective and more efficient, costwise, from our point of view, and because the plants producing the dry products are not always alongside the railway.

Mr. Skoberg: I have a supplementary to Mr. McGrath's questions a while ago about the marketing board. I understand that a salt cod marketing board has been proposed. I do not know, coming from Saskatchewan, whether or not it has been set up. Do you think this marketing board should include more species than the salt cod?

Mr. Laws: Well, I think the government's interest is to study the salt cod industry. I do not know of course what the government may have in mind but I should think that their study is directed solely and confined in this case to the salt cod industry.

Mr. Skoberg: Well is it your Association's opinion that it should include more than salt cod?

[*Interpretation*]

M. Skoberg: Quel usage faites-vous des s vices ferroviaires à l'heure actuelle?

M. Laws: Aux fins de l'exportation n l'utilisons très peu. Je pense que le coût transport par rail est plus élevé que ne l' en ce moment le transport maritime. No mode de transport est exclusivement ma time.

M. Skoberg: Que dire des camions?

M. Laws: Nous les utilisons parfois. cours des six derniers mois les camions été utilisés dans une certaine mesure mais ne pourraient vraiment transporter toute cargaison que nous avons. L'année dernièr nous avions 15,000 tonnes de cargaison. L camions ne pouvaient jamais en transport une telle quantité. En ce moment le coût transport par camion est un peu plus éle que celui du transport par mer.

M. Skoberg: Est-ce que vous êtes satisf du service ferroviaire et routier?

M. Laws: Je n'ai pas tout à fait compris.

M. Skoberg: Est-ce que vous êtes satisf de la disponibilité des wagons de chemin fer et des camions.

M. Laws: Lorsque vous parlez de wagon oui. Parlez-vous des wagons de chemin fer?

M. Skoberg: Oui.

M. Laws: Nous ne les avons pas telleme utilisés parce que le transport maritime e des plus efficace et beaucoup plus efficace notre avis et vu que les usines qui produise le produit séché ne sont pas toujours amén gées près de la voie ferrée.

M. Skoberg: J'ai une question complémen taire à celle de M. McGrath au sujet l'office de commercialisation. Si je compren bien, on envisage la constitution d'un office commercialisation de la morue séchée salé Comme je viens de Saskatchewan, je ne sa pas si c'est déjà fait. Croyez-vous que c office devrait inclure un plus grand nomb d'espèces que simplement la morue salée?

M. Laws: Non, je pense que l'intérêt d gouvernement est d'étudier l'industrie de morue salée. Je ne sais pas à quoi songe gouvernement mais j'oserais croire que leu études se feraient exclusivement dans ce ca ci à l'industrie de la morue salée.

M. Skoberg: Selon votre association, est-c qu'on devrait inclure d'autres espèces poisson?

[*Texte*]

Mr. Laws: No, I think the salt codfish ndustry has to be studied on its own. I have ot thought about whether it could be com- ined with anything else. It might be possible ut I doubt it.

Mr. Skoberg: Coming from the West, natu- ally we are quite interested in a two-price ystem for grain and I am wondering down ere whether or not your Association con- der that there should be a floor price stablished.

Mr. Laws: Of course, the grain system is a otally different system to understand, but I ink when you refer to a floor price some- mes there is a lot of misunderstanding as to hat exactly that is. In a general way, an- wering your question, I think down here a oor price would be generally approved. I ink that is correct.

Mr. Skoberg: It would which?

Mr. Laws: I think it would be approved.

Mr. Skoberg: It would be approved?

Mr. Laws: I think so. That is to say, inter- reting the general understanding of the ords "floor price." I think so.

Mr. Skoberg: I have a last question, Mr. hairman. Do you consider that there is suffi- ient coastguard protection right now for the ndustry?

Mr. Laws: Coastguard protection? I do not ink we have anything here referred to xactly as coastguard, but I know there is a ery strong view down here that a great deal ore protection is necessary for the fishing ndustry.

Mr. Skoberg: That is for the small fisher- an as well as the larger corporations?

Mr. Laws: Particularly from the point of iew of the small, inshore fishermen who are cattered around this coastline.

The Chairman: Thank you. Mr. Pringle?

Mr. Pringle: With regard to a transporta- ion subsidy do you feel that it is possible to rovide sufficient subsidy to take care of the ifferential in competitive prices throughout he world so far as salt cod is concerned? I an recall that not too many years ago poul- ry sold for a considerably higher price than sh and through many efficiency measures, nd so on, they were able to reduce the cost f production to a point where the price now s considerably less than fish.

[*Interprétation*]

M. Laws: Non, je pense que l'industrie de la morue salée seule doive être étudiée. Je n'ai pas pensé du tout si on pouvait l'unir à un autre élément. C'est peut-être possible mais j'en doute.

M. Skoberg: Vu que nous venons de l'ouest nous sommes intéressés à un système à deux prix pour les céréales et je me demande si votre association considère l'établissement d'un prix minimum.

M. Laws: Je pense, parce que le système pour le grain est tout à fait différent, je ne le comprends pas, mais je crois que lorsque vous parlez d'un prix minimum, on ne comprend pas toujours exactement ce que cela signifie. En général, pour répondre à votre question, je pense qu'un prix minimum aurait l'approbation générale ici. Je pense que c'est juste.

M. Skoberg: Il serait quoi?

M. Laws: Il serait approuvé.

M. Skoberg: Il serait approuvé?

M. Laws: Oui, selon l'interprétation générale de l'expression «prix minimum». Je crois que oui.

M. Skoberg: Une dernière question. Trouvez-vous que, en ce moment, la protection offerte par la garde côtière pour cette industrie est suffisante.

M. Laws: La protection de la garde côtière? Je ne crois pas que nous ayions quelque chose qu'on puisse appeler une garde côtière, mais les gens d'ici sont nettement d'avis qu'il faudrait protéger davantage l'industrie de la pêche.

M. Skoberg: Pour le petit pêcheur aussi bien que pour les grandes entreprises?

M. Laws: Surtout pour les petits pêcheurs le long de la côte.

Le président: Merci. Monsieur Pringle?

M. Pringle: Pour ce qui est des subventions en matière de transport, croyez-vous que ce soit possible de subventionner suffisamment pour parer à l'écart entre les prix concurrentiels sur les marchés mondiaux de la morue? Il n'y a pas tellement d'années, lorsque la volaille se vendait plus chère que le poisson, grâce à des mesures d'efficacité et ainsi de suite, on en est arrivé à faire baisser le coût de production au point que le prix de la volaille est beaucoup moins élevé maintenant que celui du poisson.

[*Text*]

I am wondering whether your industry is doing all it can, or perhaps you have something in the mill, to reduce your costs, so that with the subsidy now you will be able to improve your cost picture and compete in world market for salt cod?

Mr. Laws: Undoubtedly every industry needs a certain amount of improvement. I dare say there is always room for some improvement in efficiency, and I certainly think that applies to the salt codfish industry. I believe that the present study by the federal government in connection with the industry obviously must be taking into account how the industry can be improved, both production and the marketing of the product. This is surely the government's present study.

Mr. Pringle: Do you feel that a subsidy at the present time would make it possible for you to compete in world markets, taking today's prices into consideration?

Mr. Laws: Do I feel that a subsidy would help us?

Mr. Pringle: Would it provide the necessary difference to do the job in view of the market picture?

The fact still remains that it is costing today on every pound of fish that goes out of this province into the Caribbean a cent a pound higher than any other exporter, even our own competitors in Nova Scotia. Therefore, if assistance could be obtained in some form by assistance to ships, freighting costs to be assisted or directly to exporters—I do not know. Obviously it must improve the net return and thereby benefit the fishermen of this island.

The Chairman: Mr. Nowlan?

Mr. Nowlan: Mr. Chairman, the witness mentioned earlier the subsidized competition in the Caribbean from, I gather, Italy and France.

Mr. Laws: From Spain.

Mr. Nowlan: Spain?

Mr. Laws: Spain and France.

Mr. Nowlan: I wonder if he could just elaborate a little on that. Recently there has been a general allegation, either in the fishing industry or the agricultural industry competing in European and Caribbean markets, of subsidized competition from state farms, apple farms in France and different types of subsidies. To your knowledge is this a sub-

[*Interpretation*]

Est-ce que votre industrie fait tout son po sible ou est-ce que vous avez quelque chose l'usine pour abaisser vos frais de façon q ces subventions vous permettent d'amélior le facteur coût et concurrencer sur le marc mondial de la morue salée?

M. Laws: Il ne fait aucun doute que tou industrie a besoin d'une certaine améliorati Je dirais qu'il y a toujours possibilité d'am liorer l'efficacité et cela vaut aussi certain ment pour l'industrie de la morue salée. crois que l'étude faite en ce moment par gouvernement fédéral de concert avec l'indu trie doit tenir compte des moyens d'amélior cette industrie, tant du point de vue de production que de la commercialisation d produit. C'est sûrement l'étude en cours d gouvernement.

M. Pringle: Croyez-vous qu'une subventi en ce moment vous permettrait de concurre cer sur le marché mondial, compte tenu d prix actuels?

M. Laws: Vous désirez savoir si je su d'avis qu'une subvention nous aiderait?

M. Pringle: Enfin est-ce qu'elles seraie suffisantes pour faire le travail vu l'état d marchés.

Mais le fait demeure qu'il nous en coûte u cent la livre pour chaque livre de poisso expédiée de ces provinces dans les Caraïbe un cent la livre de plus que pour tout autr exportateur et même nos propres concurrent de la Nouvelle-Écosse. Par conséquent, si o pouvait obtenir de l'aide d'une façon ou d'un autre, soit de l'aide aux navires, des tari marchandises subventionnés, ou directemer aux exportateurs, qui sait. Il faut évidem ment améliorer le bénéfice net si c'est à l'a vantage des pêcheurs de cette île.

Le président: Monsieur Nowlan.

M. Nowlan: Monsieur le président, l témoin nous a parlé de la concurrence sub ventionnée dans les Caraïbes qui vient de l'I talie et de la France.

M. Laws: De l'Espagne.

M. Nowlan: De l'Espagne?

M. Laws: De l'Espagne et de la France.

M. Nowlan: Pourrais-je élaborer un pe plus. Il y a, depuis quelque temps, une allé gation qui a été faite, de la part de l'industri de la pêche ou de l'industrie de l'agricultur qui concurrence sur le marché européen o dans les Caraïbes, de cette concurrence sub ventionnée de part des fermes étatisées, de vergers de la France et différents genres d

[*Texte*]

sidy in transportation cost to the Caribbean, or is it a subsidy in actually growing the product or back where the fish is caught? How concrete is your allegation of a subsidized competition?

Mr. Laws: I will be specific so far as Spain is concerned. There is a direct subsidy paid to Spanish exporters of dried codfish-codfish which you might see today on a Spanish trawler in this harbour. It is taken to Spain in its wet form and processed. When it is exported the exporter is paid a direct subsidy which has fluctuated a bit in the last two or three years, but I believe at the moment it is at the rate of seven per cent on the f.o.b. value. That is paid on all exported dried fish from Spain. In addition, that Spanish exporter...

Mr. Nowlan: Excuse me; is that paid to the carrier or to the shipper?

Mr. Laws: That is paid to the shipper. I have before me a note which was sent to the Minister of Trade and Commerce in Ottawa a year or so ago on the last occasion we were dealing with this, pointing this out to Ottawa. At that time the rate of freight paid by a Spanish exporter to Puerto Rico varied between $21 and $26 a ton, whereas from Newfoundland to Puerto Rico the rate was approximately $50 a ton. So there is in the freight rate itself something like $25 a ton, and the direct subsidy paid on export at seven per cent represents another cent and a half a pound. There is another $25 a ton.

Mr. Nowlan: Is Spain your main competitor in the Caribbean?

Mr. Laws: Did you say the largest competitor?

Mr. Nowlan: Where does Spain rank?

Mr. Laws: In the case of Puerto Rico it is a very important competitor. About eight or nine years ago they started in that market and I would say they have reached as much as 50 per cent of it. I think they have lost a little ground in the last twelve months under our pressure but they are very vital there.

Mr. Nowlan: How much is the Puerto Rico market in relation to the Caribbean market?

Mr. Laws: It is one of the vital markets for Canada.

[*Interprétation*]

subventions. A votre avis, est-ce que ce sera une subvention du coût de transport vers les Caraïbes ou est-ce une subvention à la production du produit ou aux pêcheurs mêmes? Enfin, cette allégation de concurrence subventionnée est fondée?

M. Laws: En ce qui concerne l'Espagne, je puis préciser des faits. Une subvention directe est versée aux exportateurs espagnols de la morue séchée, la même morue que vous pourriez voir dans le port à bord d'un chalutier espagnol. On l'emporte en Espagne sous sa forme naturelle et on l'apprête. A l'exportation, on verse une subvention directe qui a varié un peu depuis deux ou trois ans, mais je crois qu'à l'heure actuelle il s'agit de 7 p. 100 fret sur la valeur F.A.B. Cette subvention est payée pour tout le poisson séché exporté d'Espagne. De plus, l'exportateur espagnol...

M. Nowlan: Pardon. Est-ce qu'elle est payée au transporteur ou à l'expéditeur?

M. Laws: A l'expéditeur. J'ai devant moi une note qui a été envoyée au Ministre du Commerce à Ottawa, il y a environ un an, la dernière fois que nous avons discuté de cette question, dans laquelle on signale la chose à Ottawa. A ce moment-là, le taux du transport des marchandises de cet exportateur jusqu'à Porto Rico variait de $21.00 à $26.00 la tonne, alors que de Terre-Neuve à Porto Rico le taux est d'environ $50.00 la tonne. Il y a donc, dans les tarifs des marchandises, une différence de l'ordre de $25.00 la tonne, et la subvention directe payée à l'exportation à raison de 7 p. 100 représente encore un cent et demi la livre ou $25.00 la tonne.

M. Nowlan: Est-ce que l'Espagne est votre principal concurrent dans les Antilles?

M. Laws: Avez-vous parlé du concurrent le plus important?

M. Nowlan: Quelle est l'importance de l'Espagne?

M. Laws: Dans le cas de Porto Rico, c'est un concurrent très important. Il y a huit ou neuf ans, ils ont pénétré dans ce marché et je dirais qu'ils ont capturé jusqu'à 50 p. 100 du marché. Je crois qu'ils ont peut-être perdu un peu de terrain depuis douze mois par suite de nos efforts, mais leur contribution est vitale.

M. Nowlan: Mais que vaut le marché de Porto Rico par rapport au marché des Caraïbes?

M. Laws: C'est un des marchés vitaux pour le Canada.

[*Text*]

Mr. Nowlan: But in percentage terms; is it 50 per cent of the Caribbean market potential or is it 25 per cent?

Mr. Laws: No; it is not 50 per cent but it is probably more than 25 per cent. It is probably somewhere between 30 and 40 per cent.

Mr. Horner: I have a supplementary. It concerns shipping to the Caribbean. Newfoundland now is considered in the Atlantic region for purposes of the Maritime Freight Rates Act by which you do receive a subsidy, but if you are shipping to a foreign country or a place other than Canada generally you do not receive that subsidy. If the Maritime Freight Rates Act was made available to you when shipping to the United States or to the Caribbean would this be enough of a subsidy to allow you to compete and hold your share of that market?

Mr. Laws: I am not sure of the extent of assistance that would mean, but does not the Maritime Freight Rates Act rather apply only to the railways?

Mr. Horner: Well, if we made it apply to all modes of transportation and if we made it apply on all areas within this select area—I have a recommendation written down and I hope the Committee will accept it later on that we will make it apply to the border, say, of the United States but not within the border, and only in what is now called the select area under the Maritime Freight Rates Act. In other words, this would not be all the way to the Caribbean but it may be half way, and 20 per cent of the freight rate would then be covered under the subsidy.

Mr. Laws: Is 20 per cent the effect of the Freight Rates Act?

Mr. Horner: 20 per cent under the Maritime Freight Rates Act.

Mr. Laws: It would be some part of the one cent a pound I referred to, but it would still be only 20 per cent of it, presumably. Everything helps but that still is only one-fifth. You see, this is where we feel a certain amount of handicap.

We know that within Canada through the various forms of assistance in various acts there is assistance granted to, for instance, the movement of grain to the export point. We know there is assistance, presumably under the Maritime Freight Rates Act, in the shipment of potatoes from P.E.I., say, to Hali-

[*Interpretation*]

M. Nowlan: Mais en pourcentages, est-c que c'est 50 p. 100 du marché potentiel ou 2 p. 100?

M. Laws: Non, pas 50 p. 100, mais probablement plus de 25 p. 100. Probablemer entre 30 et 40 p. 100.

M. Horner: Oui, j'aurais une question supplémentaire. Il s'agit des expéditions vers le Antilles. A l'heure actuelle, Terre-Neuve e considéré comme une partie de la région d l'Atlantique aux fins de la *Loi sur les taux d transport des marchandises dans les provinces Maritimes* en vertu de laquelle vous recevez une subvention, mais si vous expédiez ver un pays étranger ou en dehors du Canada e général, vous ne recevez pas cette subvention Si la *Loi sur le taux de transport des marchandises dans les provinces Maritimes* éta étendue à vos expéditions vers les Caraïbe ou vers les États-Unis, est-ce que cela suffira pour soutenir la concurrence et conserve votre part de ce marché?

M. Laws: Je ne sais pas exactement ce qu serait le volume de cette aide, car je ne con nais pas trop la loi mais est-ce que cette Lo ne s'applique pas uniquement aux chemins d fer?

M. Horner: Si nous l'étendions à tous le modes de transport et à toutes les parties d la région désignée. . . J'ai préparé une recommandation écrite à cet effet et j'espère que l Comité l'acceptera un peu plus tard, pour qu la loi s'applique à la frontière des États-Unis mais non à l'intérieur des États-Unis, et dan la région désignée aux termes de la Loi Autrement dit, on ne subventionnerait pas l transport jusqu'aux Antilles mais peut-être à mi-chemin, de sorte que 20 p. 100 des frais d transport seraient couverts par la subvention.

M. Laws: Est-ce que l'effet de la Loi sur le taux de transport est de 20 p. 100?

M. Horner: 20 p. 100 en vertu de la Loi.

M. Laws: Alors ce serait une partie d'un cent la livre que j'ai mentionné, mais seulement 20 p. 100 j'imagine. C'est déjà cela, mais il ne s'agit que du cinquième du coût total C'est là que nous ressentons un certain handicap.

Nous savons qu'à l'intérieur du Canada grâce à diverses formes de subventions accordées par diverses mesures législatives, par exemple, au mouvement des céréales vers les ports d'exportation. Nous savons qu'il y a aussi, en vertu de la Loi sur le taux des marchandises une certaine aide au transport

[*Texte*]

fax when they are exported, but this is because they use the rail service; this is all they can do. In our case we have to use sea and we just have not the opportunity of any assistance.

Mr. Horner: This is the government's decision, but if the Committee recommended that it apply to all modes of transportation, and you can hardly expect the Committee to make a particular or special case for dry salt fish, would this be enough if we made it apply to boats in the select area? I think perhaps the Committee, being generous and in favour of trying to help Newfoundland particularly would be prepared to go along with that if it would help you.

Mr. Laws: Well, I must say thank you for the suggestion. It does help although it does not go as far as I am suggesting to you by any means.

Mr. Horner: I would like to go as far as I can; if the committee is more generous I will vouch it.

The Chairman: Mr. Nesbitt, on a supplementary.

Mr. Nesbitt: Referring to your complaints about the Spanish government's paying a direct subsidy to their exporters of dried fish, has any objection been made to the Canadian government by you on the grounds that it is a violation of the General Agreement on Tariffs and Trade.

Mr. Laws: Yes; it has been pointed out by us, of course, on numerous occasions to the authority in Ottawa and I know that their negotiating teams have had this pointed out to them in their various negotiations under GATT and I have been in touch with those particular officials myself. So far apparently they have not been able to find any way to deal effectively with it.

Just to emphasize it to you—and I must, Mr. Chairman, take a few seconds to say this—it is not only the export subsidy that Spanish exporters receive, but we produce a similar quality of fish here in this island which we find we cannot sell into Spain because of the high tariff that they have against imports, so we are in this kind of bind.

Mr. Nesbitt: Coming and going, as you might say.

Mr. Laws: Absolutely.

[*Interprétation*]

des pommes de terre dans les provinces Maritimes, de l'Île du Prince-Édouard à Halifax lorsqu'elles sont exportées. Mais c'est parce qu'ils empruntent le chemin de fer; il n'y a pas d'autre moyen. Dans notre cas, il faut absolument transporter par navire et nous ne sommes pas admissibles aux subventions.

M. Horner: Il s'agit d'une décision du gouvernement, mais si le Comité devrait recommander qu'on l'applique aux divers modes de transport, et vous ne pouvez certainement pas vous attendre à ce que le Comité fasse un cas particulier pour la morue séchée et salée, mais est-ce que ce serait suffisant si le Comité l'étende aux navires dans la région désignée? Je crois que le Comité est généreux et désire venir en aide à Terre-Neuve en particulier, et il serait prêt à appuyer cette mesure si vous le jugez utile.

M. Laws: Je dois vous remercier de la proposition, mais elle ne va pas aussi loin que je le souhaitais.

M. Horner: Je voudrais aller aussi loin que je le puis, mais à condition que le Comité soit d'accord.

Le président: M. Nesbitt a une question supplémentaire.

M. Nesbitt: Pour revenir à vos plaintes relatives au fait que le gouvernement de l'Espagne verse une subvention directe à leurs exportateurs de poisson séché, est-ce que vous avez protesté auprès du gouvernement fédéral qu'il s'agissait d'une infraction du GATT?

M. Laws: Je dois vous remercier de la prosieurs reprises aux autorités à Ottawa et je sais que d'autres l'ont signalé aux équipes de négociateurs aux cours des négociations de la GATT, et j'ai communiqué avec ces fonctionnaires moi-même. Jusqu'à présent, ils n'ont apparement pas trouvé moyen de régler le problème.

Je dois prendre juste quelques secondes, monsieur le président, pour expliquer que ce n'est pas simplement la subvention à l'exportation que les exportateurs espagnols reçoivent, mais nous produisons une qualité semblable de poisson, ici dans notre île, que nous ne pouvons pas vendre en Espagne en raison du tarif très élevé imposé sur les importations, de sorte que nous nous trouvons très mal pris.

M. Nesbitt: On pourrait dire dans les deux sens.

M. Laws: Oui.

[*Text*]

Mr. Nowlan: You mentioned Spain and covered that fairly well. Have you any specifics on France and how it subsidizes the sale of its fish to the Caribbean? We will not take the time of the Committee but if you have it at your fingertips I certainly would appreciate your sending those particulars to the Clerk or the Chairman of the Committee, because this whole problem of subsidized competition, both in the fishing industry and in the agricultural industry, is certainly one that I think involves federal interests.

Mr. Laws: I could give some additional information in connection with France, and I will be only too happy to provide it to the Chairman of the Committee.

Mr. Nowlan: I appreciate it. Some other member has already touched on this, but is another one of your problems, frankly, the fact of a change in taste resulting in salt cod going down and frozen fish products coming up in the Caribbean?

Mr. Laws: No, I do not agree with anybody who says that salt fish is being replaced by frozen fish. I do not think that is so; I think the consumption being attained—whatever there is and it is not a great quantity—in the Caribbean of frozen fish is additional consumption.

Mr. Nowlan: It is what?

Mr. Laws: I think it is additional fish consumption. I do not think it is just a question of replacing.

Mr. Nowlan: You mentioned the CN boats. These were the boats that were on before the war.

Mr. Laws: Yes.

Mr. Nowlan: The war ended their fishing service and they went into wartime service.

Mr. Laws: Yes.

Mr. Nowlan: Do you think it would be an advantageous, positive move if some type of shipping interest, perhaps even the CN, could get back into that business?

Mr. Laws: Yes, I think so.

Mr. Nowlan: Well, my last question is...

Mr. Laws: Indeed, let me say there are some criticisms in the Caribbean about the service from Canada. Some of the smaller islands—I am not speaking of the larger ones such as Trinidad or Barbados; they have a

[*Interpretation*]

M. Nowlan: Vous avez très bien exposé situation de l'Espagne. Avez-vous des préc sions au sujet de la France et de la façon do elle subventionne ses ventes de poisson au Antilles? Je ne voudrais pas faire perdre temps au Comité, mais si vous les avez portée de la main, je vous saurais gré communiquer ces chiffres au secrétaire ou président du Comité car toute cette questi de concurrence subventionnée tant dans l'i dustrie de la pêche que dans l'industrie agr cole, intéresse grandement le gouverneme fédéral.

M. Laws: Je pourrais peut-être vous donn des renseignements supplémentaires au suj de la France et je serais très heureux de l communiquer au président du Comité.

M. Nowlan: Merci. Un autre député mentionné, au sujet d'une autre question, fait que la popularité de la morue salée dim nue et que celle des poissons congelés au mente aux Antilles?

M. Laws: Non, je ne suis pas du tout d'ac cord qu'on remplace la morue salée par poisson congelé. Je ne crois pas que ce soit cas. Je trouve que la consommation de pois son congelé aux Caraïbes, en elle n'est pas forte que cela, est une consommatio supplémentaire.

M. Nowlan: C'est quoi?

M. Laws: Une consommation supplémen taire de poisson. Ce n'est pas du tout un question de remplacement.

M. Nowlan: Vous avez parlé des navires d CN. Ce sont ceux qui étaient exploités avan la guerre.

M. Laws: Oui.

M. Nowlan: La guerre, évidemment, a mi fin à leur exploitation pour la pêche et il sont allés faire la guerre.

M. Laws: Oui.

M. Nowlan: Alors est-ce que ce serait avan tageux si une entreprise de transport, peut être même le CN, pouvait reprendre ce genr de service?

M. Laws: Oui, je crois que oui.

M. Nowlan: Ma dernière question...

M. Laws: Permettez-moi d'ajouter que cer tains, aux Antilles, critiquent le service offer par le Canada. Certaines petites îles, je n parle pas des plus grandes comme Trinidad e les Barbades qui ont un service plus rapide

[*Texte*]

very fast service—are very critical of what they consider to be a poor service from Canada because of the long time that it takes en voyage to those points.

Mr. Nowlan: My last question concerns your brief in the form of a letter. I may be way off base here, but is not one of the factors in your industry the fact that St. Pierre and Miquelon are becoming a loading or trading area and that Spanish boats, French boats and others are coming in there and upsetting the balance? There is no mention of it in your brief.

Mr. Laws: No; I do not think that affects our salt codfish industry here.

Mr. Nowlan: It is not the salt cod industry?

Mr. Laws: No.

The Chairman: Mr. Mahoney?

Mr. Mahoney: Do I take from your answer to Mr. Nowlan's question regarding the possible change in taste that the per capita consumption of fish is increasing, in your opinion?

Mr. Laws: Of fish in total?

Mr. Mahoney: In total, yes.

Mr. Laws: Well, the governments of practically all countries, certainly many countries that I know of, are very active in trying to promote an increased consumption of fish in one form or the other. I think sometimes they are meeting with some success, but a great deal of course depends upon the availability of the resource in their local waters. Some of them have a certain amount of success in that others do not.

Mr. Mahoney: It would follow from your answer that at least in your market area you feel the per capita consumption of fish is on the increase?

Mr. Laws: I am not sure whether it is correct to say it is on the increase. Let me say there is certainly a desire on the part of their respective governments to see an increase and I think if they can find the resources within reasonable range of their own countries they will increase their production and their consumption. I believe there is certainly also the opportunity for maintaining, if not increasing, and in some places we may increase our export of fish. After we have overcome cer-

[*Interprétation*]

critiquent assez amèrement le service qu'elles considèrent plutôt piètre en raison du temps qu'on met à livrer.

M. Nowlan: Pour revenir à votre mémoire très bref, sous forme de lettre. J'ai peut-être tort ici, mais est-ce que l'un des facteurs de votre industrie ne serait pas le fait que St-Pierre et Miquelon deviennent un endroit de chargement ou un lieu de commerce où les bateaux espagnols, français et autres viennent et créent un déséquilibre. Ce n'est pas mentionné dans votre mémoire.

M. Laws: Non. Je ne crois pas que cela touche pas de tout l'industrie de la morue salée.

M. Nowlan: Il ne s'agit pas de l'industrie de la morue salée?

M. Laws: Non.

Le président: Monsieur Mahoney?

M. Mahoney: Est-ce que je dois comprendre, d'après la réponse que vous avez donnée à M. Nowlan au sujet du changement de goût que la consommation de poisson par habitant augmente d'après vous?

M. Laws: La consommation du poisson dans son ensemble?

M. Mahoney: Oui, c'est cela.

M. Laws: Les gouvernements de presque tous les pays, au moins de plusieurs pays que je connais, sont intéressés à promouvoir une plus grande consommation du poisson, sous une forme ou sous une autre. Je crois parfois qu'ils y réussissent dans une certaine mesure, mais tout dépend évidemment de la disponibilité des ressources en poisson dans leurs propres eaux. Il y en a qui réussissent assez bien à cet égard et d'autres qui ne réussissent pas.

M. Mahoney: Et, par conséquent, dans votre marché la consommation du poisson augmente.

M. Laws: Ce n'est pas nécessairement une augmentation mais disons qu'ils veulent augmenter la consommation ou les gouvernements veulent voir une augmentation de la consommation du poisson. Si on peut leur trouver les ressources, dans un rayon adéquat de leur propre pays, ils augmenteront certainement leur consommation du poisson. Je crois qu'on a, certainement, aussi l'occasion de maintenir, sinon d'augmenter et à certains endroits, nous pourrions peut-être augmenter

[*Text*]

tain other problems such as quality, competition, competitive prices, and so on, we can look forward to some increase.

The Chairman: Thank you, Mr. Laws.

Our next brief is from the Springdale Chamber of Commerce, and I will call upon Mr. Harold W. Parsons to present his views.

Mr. Harold W. Parsons (Springdale Chamber of Commerce): Mr. Chairman, members of the Standing Committee, ladies and gentlemen, the brief submitted in February of 1968 by the Springdale Chamber of Commerce was clearly in support of the brief submitted by the Newfoundland Board of Trade and it supported the recommendations of the Central Newfoundland Chamber of Commerce.

The transportation problem in the Springdale area is unique because it is not on a rail line service of the CNR and it is being serviced by Clarke Traffic Services into Botwood.

We recommend that suitable facilities be established by the CNR at Springdale to provide CNR truck services into Springdale from Badger, Newfoundland, as all freight for the Springdale area and for the mining companies which are adjacent to Springdale terminate at Badger, and that a portion of the current CNR coastal and branch line operations, which are now being phased out, be reallocated for the purpose of providing truck freight services. We recommend better control by the CNR of the disparity in freight rates as well as control of storage and handling. We suggest that the CNR should rapidly convert to containerized freight, which would be hauled by rail, ship or truck.

Since our brief was submitted we have been experiencing longer delays in delivery by CNR because of our L.C.L. freight now terminating at Grand Falls instead of Badger. The CNR trucks haul it to Badger station, where it is left for pick-up by local trucks. Apparently other central Newfoundland towns are getting a trucking service from Grand Falls by the CNR for L.C.L. freight. We request this service because our area is principally being penalized because of the assumption that we are being serviced by CNR coastal boats, but this is now more of a

[*Interpretation*]

la consommation et notre propre exportatio du poisson. Après avoir réglé certains autre problèmes, comme la qualité, la concurrenc les prix concurrentiels, etc., nous pourrion alors nous attendre à une certain augmentation.

Le président: Merci, monsieur Laws.

Notre prochain mémoire est celui de l Chambre de commerce de Springdale. J demanderai donc M. Harold W. Parsons d bien vouloir se présenter.

M. Harold W. Parsons (Chambre de com merce de Springdale): Monsieur le présiden membres du Comité permanent, mesdames e messieurs, le mémoire présenté au mois d février 1968 par la Chambre de commerce d Springdale appuie entièrement le mémoir présenté par la Chambre de Commerce d Terre-Neuve et appuie les recommandation de la Chambre de Commerce de Terre-Neuv centrale.

Mais les problèmes de transport, dans l région de Springdale, est unique du fait qu nous n'avons pas de service ferroviaire d National-Canadien et est desservie par l *Clarke Traffic Services* à partir de Botwood.

Nous recommandons que des services adé quats soient aménagés par le National-Cana dien à Springdale pour nous assurer le ser vice de camionnage à partir de Badge Terre-Neuve, étant donné que toutes les mar chandises destinées à la région de Springdal et aux entreprises minières de la région s'ar rêtent à Badger et qu'une partie des subven tions assurées aux opérations côtières et de embranchements du National-Canadien qu disparaissent maintenant peu à peu, soien réparties de nouveau pour assurer le servic de transport routier des marchandises. Nou recommandons un meilleur contrôle par l National-Canadien de l'écart entre les tarif marchandises, et aussi pour la manutentio faite par le National-Canadien. Nous suggé rons que le National-Canadien utilise de plu en plus le système de cadres qui seraien transportés par chemins de fer, camions o navires.

Depuis la présentation de notre mémoire nous avons connu de plus en plus de retar des livraisons par le National-Canadien, cause des chargements incomplets qui s'arrê tent à Grand Falls au lieu d'à Badger. Le camions du National-Canadien les transpor tent à Badger d'où ils sont livrés par u camion local. Apparemment, d'autres villes d Newfoundland ont un service de camions d Grand Falls pour les chargements incomplets Nous demandons ce service parce que notr région est pénalisée en grande partie du fai que l'on suppose que nous sommes desservi

[*Texte*]

uisance than a service and freight delivery o Springdale by boat is practically nil. At est it only operates about seven months out f the year. Any freight bypassing Badger tation and terminating at Lewisporte for fur- herance by CNR boats arrives approximately wo weeks later with at least 50 per cent nore damages.

We have been cramped and penalized by a ubsidized service which only operates about even months of the year and we feel we hould be serviced by the CNR by the trunk oads system.

The businesses in the Springdale area can- ot hope to be competitive with other central Newfoundland towns because of excessive osts of transportation and the Springdale usinessmen and the Chamber of Commerce ver the years have investigated different nodes of transportation, including shipping irect, and nothing seems to be much better han the CNR. We think the time has come or us to get a break and get some action on he trunk roads system into our area.

The Chairman: Are there any questions, entlemen?

Mr. Skoberg: Where is Springdale? I am ying to find it on the map.

Mr. Parsons: Springdale is in central New- oundland at the head of Little Falls Bay. It s about 60 miles west of Grand Falls.

The Chairman: Mr. Perrault.

Mr. Perrault: What kind of economic activi- y is principally carried on there? What kind f potential does the area have?

Mr. Parsons: Chiefly mining and pulpwood perations.

Mr. Perrault: Mining. Are they doing any xploration work there at the present time?

Mr. Parsons: There is some, yes. Some ines are in operation.

Mr. Perrault: So it could open up a new rea?

Mr. Parsons: It is quite possible that more ining will open up there.

Mr. Perrault: Thank you, Mr. Chairman.

[*Interprétation*]

par le navire côtier du National-Canadien, mais cela est plutôt un embarras qu'un service et la livraison des marchandises par navire à Springdale est à peu près nulle. Au meilleur, elle ne fonctionne que sept mois sur douze. Toutes les marchandises qui vont de Badger à Lewisporte à bord de navires du National-Canadien arrivent environ au moins deux semaines plus tard et même plus, avec 50 p. 100 de plus de dommages.

Nous avons été gênés et pénalisés par un service subventionné qui ne fonctionne que sept mois par année et nous sommes d'avis que nous devrions avoir un service par route principale assurée par le National-Canadien.

Les entreprises de la région de Springdale ne peuvent pas espérer être concurrentielles avec les autres villes du centre de Terre-Neuve vu le coût excessif des transports et les hommes d'affaires et la Chambre de commerce de Springdale ont étudié, au cours des années, les différents modes de transport, y compris l'expédition directe, et rien ne semble être mieux que ce que pourrait offrir le National-Canadien. Nous sommes d'avis que peut-être nous devrions maintenant avoir aussi notre chance et pouvoir avoir une partie de réseaux de routes principales dans notre région.

Le président: Y a-t-il d'autres questions, messieurs?

M. Skoberg: Où est situé Springdale? Je voudrais voir exactement sur la carte.

M. Parsons: Springdale est situé au centre de Terre-Neuve au bout de la baie Little Falls, à environ 60 milles à l'ouest de Grand Falls.

Le président: Monsieur Perrault.

M. Perrault: Quel genre d'activités économiques avez-vous dans cette région? Et quelles sont les possibilités de cette région?

M. Parsons: Ce sont essentiellement des exploitations de mines et de bois à pâte.

M. Perrault: Des mines. Est-ce qu'on fait du travail d'exploration en ce moment?

M. Parsons: Oui. Il y en a qui sont exploitées présentement.

M. Perrault: On pourrait alors ouvrir une nouvelle région?

M. Parsons: Il est fort possible que d'autres entreprises minières soient ouvertes à cet endroit.

M. Perrault: Merci beaucoup monsieur le président.

[*Text*]

The Chairman: Are there say other questions?

Mr. Peddle: Apart from what comes in by boat, there is no CNR service into Springdale?

Mr. Parsons: No, that is right, there is not, apart from the CNR boat, which only operates about seven months during the year.

Mr. Peddle: And all merchandise which comes in by rail comes to Badger, which is about what, 40 miles?

Mr. Parsons: It is about 45 miles.

Mr. Peddle: It is about 45 miles east, and the CNR makes no attempt to deliver merchandise. The consignees have to call at Badger to pick up their merchandise. Is this correct?

Mr. Parsons: That is correct.

Mr. Peddle: Springdale is a town with a population of what, 2,500?

Mr. Parsons: About 3,000.

Mr. Peddle: About 3,000, and there is no attempt at all by the CNR to deliver merchandise from Badger?

Mr. Parsons: Not as yet.

The Chairman: Mr. Skoberg.

Mr. Skoberg: I just have one question, Mr. Chairman. Sir, has your Chamber made representations to the Canadian Transport Commission in regard to this brief?

Mr. Parsons: Have we made representations to what?

Mr. Skoberg: Have you made official representation in regard to your complaint to the CTC in Ottawa?

Mr. Parsons: I do not think so.

The Chairman: Are there any other questions, gentlemen? Mr. Allmand.

Mr. Allmand: Sir, what are these Clarke Traffic Services? As a Montrealer I am not familiar with them.

Mr. Parsons: Clarke traffic services is a shipping service which operates out of Montreal down to. .

Mr. Allmand: You mean Clarke Steamship Lines?

[*Interpretation*]

Le président: Avez-vous d'autres questions

M. Peddle: Il n'y a pas de service du Nati nal-Canadien allant à Springdale, sauf le se vice par navires?

M. Parsons: Non, c'est exact, il n'y a pas d service du National-Canadien, sauf les nav res qui ne sont exploités que sept mois pa année.

M. Peddle: Et, toutes les marchandise transportées par rail arrivent à Badger, so à 40 milles?

M. Parsons: C'est à environ 45 milles.

M. Peddle: C'est à environ 45 milles à l'e et le National-Canadien ne fait aucun effo pour délivrer ces marchandises. Alors, on do aller les chercher à Badger, n'est-ce pas?

M. Parsons: C'est exact.

M. Peddle: Springdale a une population d combien, 2,500?

M. Parsons: Environ 3,000.

M. Peddle: Environ 3,000 et le National Canadien n'essaie pas du tout de délivrer le marchandises à partir de Badger?

M. Parsons: Non, pas encore.

Le président: Monsieur Skoberg.

M. Skoberg: J'aurais une question à pose monsieur le président. Monsieur, est-ce qu votre Chambre de commerce a fait des ins tances à la Commission canadienne des trans ports à l'égard de ce mémoire?

M. Parsons: Avons-nous fait des instance à quel propos?

M. Skoberg: Avez-vous fait des instance officielles au sujet de votre plainte auprès d la Commission canadienne des transports Ottawa?

M. Parsons: Je ne pense pas.

Le président: Messieurs, avez-vous d'autre questions? Monsieur Allmand.

M. Allmand: Monsieur, qu'est-ce que c'es ce service *Clarke Traffic Services*? Étan Montréalais, je ne suis pas au courant de cel

M. Parsons: C'est un service qui fonctionn à partir de Montréal.

M. Allmand: Vous voulez dire *Clark Steamship Lines*, n'est-ce pas?

[Texte]

Mr. Parsons: Clarke Steamship Lines, yes.

Mr. Allmand: Oh, I see.

Mr. Parsons: They come into Botwood, St. ohn's and Corner Brook, but they only come to Botwood during the summer months.

Mr. Allmand: Are there any general trucking lines which operate into Springdale?

Mr. Parsons: There are some trucking lines ut the rates are usually a bit higher than the NR rates. In some cases and on some commodities they are a lot higher. So far there as been no regular service.

Mr. Allmand: Thank you.

Mr. Corbin: A supplementary question to r. Peddle's inquiry. You said that the Town Springdale has a population of approximately 3,000 people and it is located about 45 50 miles from Badger. Are there other wns along the route from Badger to Springale that could also be serviced by the CNR ucks?

Mr. Parsons: There is a mining company wn and another smaller town, but Springale services a group of small towns which e scattered all around us.

Mr. Corbin: You mean along the coast?

Mr. Parsons: Along the coast.

Mr. Corbin: Springdale would be the centre r some coastal villages?

Mr. Parsons: Springdale is the centre for e Green Bay area.

Mr. Corbin: What is the approximate popution of that whole area, including pringdale?

Mr. Parsons: I would think about 8,000.

Mr. Corbin: Thank you.

The Chairman: I wish to thank you, sir for our brief.

This morning I arranged for the Committee hear two charming ladies, and they are ere this afternoon. They are not on our genda but I promised that we would hear em this afternoon. I will now call upon iss Freeda Berry.

Mr. Perrault: Mr. Chairman, what organiation do they represent, please?

The Chairman: The Canadian Association Social Workers.

[*Interprétation*]

M. Parsons: Oui, *Clarke Steamship Lines.*

M. Allmand: Oh, je vois.

M. Parsons: Ils viennent à Botwood, Saint-Jean et Corner Brook; mais à Botwood c'est seulement pendant l'été.

M. Allmand: Est-ce qu'il y a des lignes de camionnage allant à Springdale?

M. Parsons: Oui, mais les taux, habituellement sont un peu plus élevés que le taux du National-Canadien. Dans d'autres cas pour certaines denrées, ils étaient beaucoup plus élevés. Jusqu'ici il n'y a pas eu de service régulier.

M. Allmand: Merci.

M. Corbin: Je voudrais poser une question supplémentaire à la demande de M. Peddle. Vous dites que la ville de Springdale a une population d'environ 3,000 personnes et est située à environ 45 ou 50 milles de Badger. Est-ce qu'il y a d'autres villes le long de cette route de Badger à Springdale qui pourraient être aussi desservies par les camions du National-Canadien?

M. Parsons: Il y a la ville d'une société minière et un autre plus petit village, mais Springdale dessert un ensemble de petits villages disséminés ici et là.

M. Corbin: Le long du littoral?

M. Parsons: Le long du littoral.

M. Corbin: Springdale est le centre pour un nombre de villages côtiers?

M. Parsons: Springdale est le centre de la région de Green Bay.

M. Corbin: Quelle est la population approximative de cette région y compris Springdale?

M. Parsons: Je dirais environ 8,000.

M. Corbin: Merci beaucoup.

Le président: Je désire vous remercier, monsieur, pour la présentation de cette soumission.

Ce matin, j'ai engagé le Comité à entendre deux charmantes dames et elles sont ici cet après-midi. Elles ne figurent pas à l'ordre du jour, mais je leur ai promis de les entendre cet après-midi, donc je cède la parole à M[lle] Freeda Berry.

M. Perrault: Monsieur le président, quel organisme représentent-elles, s'il vous plaît?

Le président: L'Association canadienne des travailleurs sociaux.

[*Text*]

Miss Freeda Berry (Canadian Association of Social Workers): Mr. Chairman and members of the Committee, the members of the Canadian Association of Social Workers, the Newfoundland branch, part of whose competence lies in the social implications of change, would like to submit a short brief on the problems which they feel would be presented if and when it comes to the point that the only trans-island means of transportation would be by bus.

The groups of people for whom we show concern are the aged and infirm, the sick and the physically and mentally handicapped, both adults and children. Our desire is to put the point on record that unless an alternate and specialized type of transportation is provided, should the train service cease, we envision that very severe problems will result and certainly there will be suffering on the part of the groups enumerated above.

Members of this professional association who are engaged in the health, child welfare or aging fields often in the course of duty, and at other times, have to meet the incoming train. On many occasions they see sick people and handicapped children and adults in wheel chairs or with braces and crutches, and quite often stretcher cases, being helped off the train. Bus travel for such people is well-nigh impossible. When aircraft are unable to land, which can happen for a period of up to three days or more, the only reliable form of public transportation from the west coast and the central areas of Newfoundland is the train service.

Many of these incoming patients, who come to St. John's for specialist treatment, surgery or attendance at clinics of a specialized nature, are required to be at their respective hospitals or rehabilitation centres at a certain time on a certain date, and they must have reliable public transportation. Many of them must lie flat for quite a period of the journey, and this refers particularly to children as well as to those who have to be carried on and off on stretchers, and many old people who cannot sit up for long periods. For this reason the train is a very useful method of transportation.

It should be pointed out with particular reference to children that when parents have two or three children who are receiving some form of specialized treatment in St. John's or other large centre they attempt, and quite rightly so, to have the appointment set during the same period to save journeys and costs. A

[*Interpretation*]

Mlle Freeda Berry (Association canadienne des travailleurs sociaux): Monsieur le président et membres du Comité, les membres de l'Association canadienne des travailleurs sociaux, section de Terre-Neuve, dont une partie de leur mandat porte sur les répercussions sociales d'un changement, désirent présenter ces commentaires dans un mémoire, voulant que le seul moyen de transport à travers l'île est celui des autobus.

Le groupe de personnes qui nous préoccupent sont les personnes âgées, les invalides, les malades, les handicapés sur le plan physique et mental, les adultes et les enfants. Nous voulons donc consigner au compte rendu le fait qu'à moins que d'autres possibilités de modes de transport ne leur soit assurées si le service de train prend fin, nous prévoyons des problèmes très grands dont seront l'objet ces groupes de personnes à bord de l'autobus.

Les membres de notre association professionnelle qui s'occupent de la santé et du bien-être des enfants ou des personnes plus âgées, bien souvent au cours de leur travail et à d'autres périodes doivent accueillir le train en gare. Plus d'une fois, on y voit des gens malades, des enfants handicapés, des adultes en chaises roulantes ou, avec des béquilles et bien souvent des gens sur civière qu'on doit descendre du train. Alors, l'autobus, pour ces personnes, est pratiquement impossible. Lorsque les avions ne peuvent pas atterrir, ce qui peut se produire pour une période allant jusqu'à trois jours ou plus, le seul autre mode de transport public pour les régions centrales et du littoral ouest de Terre-Neuve, c'est le service ferroviaire.

Bon nombre de ces patients, qui viennent à Saint-Jean pour avoir un traitement spécialisé, de la chirurgie ou pour se rendre à des cliniques de nature spécialisée, doivent être dans les hôpitaux, aux centres de réhabilitation, à un certain moment, à une certaine date et doivent donc pouvoir compter sur des modes de transport public fiables. Un bon nombre d'entre eux doivent se coucher pour une bonne partie du trajet, surtout pour ce qui est des enfants et aussi ces personnes que bien souvent on doit transporter sur civière et bon nombre de vieilles personnes qui ne peuvent rester assises pendant de longues périodes. Donc, pour cette raison, le train est un excellent mode de transport.

Maintenant, pour ce qui est des enfants, il nous faut signaler que lorsque les parents ont deux ou trois enfants qui reçoivent un traitement spécialisé à Saint-Jean ou dans d'autres centres spécialisés, ils ont tout à fait raison de prévoir un rendez-vous pendant cette même période pour épargner du temps et les coûts

'exte]

pe of situation that can be found is that a family who has one child with a heart ndition, another who is physically hand- ıpped and wearing bracing and a third who mentally retarded. Having had the experi- ce of travelling on the bus it has been ongly brought to our minds that one moth- trying to look after two or three such ildren travelling on the bus has a much ore difficult task than she has on the train.

The opportunity to communicate with other ssengers is greater on the train and they n be asked to lend a hand. The problem of eding is lessened on the train because the ning room is readily accessible and does not quire getting up and down steps. There is ore freedom for a child's activity on the ain and children find it hard to sit still in e position for very long.

Toilet facilities are not too different but the ep up makes it much more difficult for the ysically handicapped and the elderly. There e children as well as adults who are essen- ılly always sick in motor vehicles. This ould also create a problem of cleaning up d would be unpleasant for passengers in ch a confined area.

It has come to our attention that parents e already stating that they will be unwilling travel on the bus with their children and erefore will be unable to keep their appoint- ents. This in itself is serious as we are ncerned for our sick children and desire at they should have the best attention ssible.

Our concern for the elderly is the discom- rt of sitting in one position or possibly ternating between an upright and a reclin- g position for many hours, which is not sily borne even by the physically healthy ople. It would also appear that there are no cilities for stretcher cases. For those who me from intermediary points—for example, om Deer Lake—it is essential to travel on a ıs which stops very frequently. Due to the ed to keep on schedule it is seldom possible get off the bus, and this makes it extreme- tiring.

The door has to be opened at every railway ossing and in cold weather this also adds to e discomfort as the cold blast of air comes rough the bus. Due to the constant stopping ıd starting and opening and closing of the ors it is virtually impossible to sleep for a oment at night. If an elderly person drops sleep the head is liable to fall sideways and ere is no side wing to protect it. Whilst knowledging that the bus seats are comfort-

[*Interprétation*]

On peut souvent trouver une situation où il y a un enfant avec une situation cardiaque, un autre handicapé et l'autre qui est arriéré. Ayant voyagé par autobus, nous nous rendons compte qu'une mère qui essaie de s'occuper de deux ou trois de ses enfants à bord d'un autobus aurait beaucoup plus de difficultés à le faire que si elle était à bord du train.

L'occasion de communiquer avec d'autres passagers est plus grande sur le train et on peut leur demander de prêter service. Il est moins difficile de se nourrir sur le train parce que pour aller au wagon-restaurant on n'a pas à monter et à descendre d'escaliers. Il y a plus de liberté d'action pour un enfant à bord du train. Et pour les enfants qui éprouvent de la difficulté à toujours rester assis bien tranquilles, c'est plus avantageux.

Les salles de toilette ne sont pas tellement différentes, mais il est beaucoup plus difficile d'y aller dans les autobus pour les personnes âgées et les handicapés. Il y a aussi d'autres enfants et des adultes qui sont toujours malades dans les véhicules moteurs. Ceci crée aussi un problème de nettoyage qui serait désagréable pour les passagers dans un tel milieu fermé.

Les parents, semble-t-il, disent qu'ils ne sont pas prêts à voyager à bord de l'autobus avec leurs enfants, donc, ils ne seront pas en mesure d'être à leur rendez-vous. C'est donc une situation grave qui nous préoccupe et nous voulons que ces enfants aient la meilleure attention voulue.

Notre préoccupation pour les personnes âgées, c'est que lorsqu'elles se trouvent dans une position donnée, elles sont renvoyées par en arrière et cela devient très difficile pour elles. Il n'y a pas aussi de service pour les civières. Pour ceux qui viennent de points intermédiaires par exemple, de Deer Lake, il est essentiel de voyager à bord d'un autobus qui arrête très souvent. Vu le besoin de conserver l'horaire, il est très souvent difficile de descendre de l'autobus ce qui rend la chose beaucoup plus difficile.

Il faut ouvrir la porte à chaque passage à niveau et le temps froid ajoute au manque de confort vu les courants d'air. Vu qu'il faut reprendre, arrêter et repartir, il est assez difficile souvent de pouvoir dormir le soir. Si une personne âgée s'endort, bien souvent sa tête tombe sur le côté et il n'y a pas de bras protecteur. Il faut donc reconnaître, tout de même, que le siège de l'autobus, pour une personne moyenne en bon état de santé, est

[*Text*]

able for the average person on an average journey, the points made above show that the actual comfort of the seats is not the entire answer for the groups in whom we are interested.

It is therefore recommended that the train service be retained, if possible. If the present schedule cannot be maintained it is recommended that at least one train per week be run for the convenience of the groups named in this brief. It is felt that this matter warrants special consideration and should not be ignored for it will create further social problems and ultimately increased expenditure.

The Chairman: This charming lady asked me if she laid out her point. She thinks she laid out her point clearly enough, and she does not think that any questions should be asked at this time. I have another charming lady who has a brief similar to this one. If you would agree, we will hear the other lady and the members of the Committee can question both of them.

Mr. McGrath: May I be permitted to make one comment, Mr. Chairman? I would like to compliment this lady on this brief because it opens up a whole new aspect of this problem which has not been sufficiently dealt with, and I thank her for that.

The Chairman: Could I call on the other lady to come forward please? This is Mrs. Doreen Murray.

Mrs. Doreen Murray: Mr. Chairman, I am submitting this brief as a private citizen.

My object is to ask for consideration of the retention, even if only on a partial basis, of the Newfoundland passenger train service on the grounds of its tourist potential.

My views are based on the experience of a journey from Montreal to St. John's by train which I undertook last May.

I found the ride from Montreal to North Sydney comfortable but unremarkable in that the amenities it offers are standard across Canada. But the "Newfie Bullet" was a unique experience in every respect.

Taking the bad side first, the train is uniquely neglected, run down and dirty, but not irremediably so. It is also slow, and a businessman in a hurry would probably do better to travel some other way. But to a person with leisure who is looking for the unusual, a ride on the "Bullet" is unique because the whole atmosphere of the train is

[*Interpretation*]

assez confortable, mais le confort du siè n'est pas la réponse pour ces personnes q nous intéressent.

Par conséquent, nous recommandons que service du train soit maintenu. Si le prése horaire ne peut être maintenu, qu'il y ait a moins un train par semaine pour ces groupe de personnes ainsi désignées par ce mémoir Cette question mérite une attention plus pa ticulière et il faut en tenir compte, autremer cela entraînera d'autres problèmes sociau et, en dernière ligne de compte, des dépens accrues.

Le président: Cette dame bien charmant me dit qu'elle a fait part de son point de vu elle croit que c'est assez clair et elle ne cro pas que l'on doive lui poser des question maintenant. Il y en a une autre qui a u mémoire semblable à celui-ci. Si cela vou convient on pourra permettre à l'autre dam de présenter son mémoire et les membres d comité pourront poser des questions au deux.

M. McGrath: Est-ce que vous me permette de faire un commentaire, monsieur le prési dent. Je désire féliciter cette dame pour so mémoire parce que cela nous ouvre tout u nouvel aspect de ce problème dont on n'ava pas suffisamment parlé.

Le président: Je demanderais à l'autr dame de bien vouloir se présenter. Je vou présente Mme Doreen Murray.

Mme Doreen Murray: Monsieur le prési dent, je présente ce mémoire en tant qu simple citoyen. Monsieur le président, je vou drais vous demander d'envisager le maintie même à temps partiel, du service-voyageu de Terre-Neuve vu l'attraction touristique. J me fonde sur l'expérience d'un voyage allan de Montréal à Saint-Jean en train, voyage qu j'ai fait au mois de mai dernier. J'ai trouv que le voyage de Montréal à North Sydne était confortable, mais sans caractéristique remarquables, parce que vue les agrément qu'il offre sont tout à fait normaux partout a Canada. Mais le «Newfie Bullet» est un expérience tout à fait unique à tout point d vue.

Tout d'abord le côté défavorable. Le trai est très négligé, abimé et sale, mais on peut remédier. Il est lent et un homme d'affaire pressé devrait plutôt choisir un autre mode d transport. Mais une personne qui s'y rend pa plaisir, et cherche l'exceptionnel se ren compte que ce voyage est bien unique parc qu'il règne une ambiance bien différent

exte]

fferent', combining a turn-of-the-century ra of the Reid era when the railway was ilt with a rich local flavour.

This is felt directly one steps on board. ost of the passengers are Newfoundland es from stops along the way, and many of m look, speak and act so differently from ssengers on the mainland train that they ght be another race.

The food is different also. I had fresh fish lowed by an English style cabinet pudding th lemon sauce which compared more than vourably with the standardized North erican fare on the mainland train.

The "Bullet" is friendly and informal. Last ng at night all hands adjourn to the dining for a "mug up" of cocoa and toast, and to this was one of the highlights of the trip, th the train jogging madly and everyone ting around with elbows on the table tching their cups and enjoying the local k and jokes and good humour.

mention these details because the mem-s of the Committee will I think not experi-ce them on the short ride they will be ing while in St. John's. All they are likely observe on that journey are the train's advantages.

Based on this personal experience, my lief is that with a little fixing-up and the per publicity the "Bullet" could be a great rist asset to Newfoundland.

My main reason for presenting this brief is at I am convinced Newfoundland has a eat and unrealized potential for tourism. is is based on its geographical position as island just off the huge, highly industrial-d and urbanized North American land iss. This factor, which is a liability as gards industrial development and means at possible development has to be highly bsidized and operates even then at a disad-ntage, is for tourism an asset which I think e Tourist Development Office has not taken o account to the extent that it might have.

Most of Newfoundland's tourist thinking pears to be directed towards the wealthy rtsman, with emphasis on tuna fishing, nting for moose, caribou and bear and so . But these diversions appeal to relatively w, and can be afforded by even fewer.

This brings me back to the "Bullet". On my rney last year I met a Montreal girl, a ysiotherapist on vacation, who instead of ing both ways had given up two days of r holiday to ride on Newfoundland's nar-w gauge railway. I understand this is not at uncommon, despite the fact that the train

[Interprétation]

l'aura de la fin du siècle de l'époque Reid à la construction des chemins de fer. On le sent tout de suite en montant à bord. La plupart des voyageurs sont des terre-neuviens qui peuvent monter et descendre là où bon leur semble. Beaucoup entre eux ont l'air, parlent et agissent si différemment des voyageurs du continent qu'ils pouraient être d'une autre race.

La nourriture est différente aussi. J'ai mangé du poisson frais suivi d'un flan à l'anglais avec une sauce au citron qui peut se comparer plus que favorablement avec le menu connu américain du train continental. Ce train offre une ambiance amicale et inconventionnelle. Le soir on se rend au wagon-restaurant pour une tasse de cocoa et des rôties et pour moi cela a été un des sommets de ce voyage, le train secoue et les gens sont là avec leurs coudes sur la table, leurs verres et ils racontent les histoires et les potins. Je mentionne ces détails parce que les membres du Comité ne pourront pas s'en rendre compte au cours de cette petite tournée qu'ils feront à partir de Saint-Jean. Tout ce qu'ils pourront observer au cours de ce voyage ce sont les désavantages du train. En se fondant sur cette expérience personnelle, je crois qu'avec un peu de travail et de la publicité appropriée le «Bullet» pourrait vraiment devenir un attrait touristique à Terre-Neuve.

La principale raison pour laquelle je présente ce mémoire est que je suis convaincu que Terre-Neuve offre de très grandes possibilités de tourisme vu son emplacement géographique comme île, tout à côté de ce continent géant, extrêmement industrialisé et urbanisé qui est l'Amérique du Nord. Ce facteur qui est une responsabilité pour le développement industriel et signifie qu'une expansion éventuelle doit être subventionnée et fonctionne même en ce moment-là avec un certain déficit, ce facteur est un élément positif pour le tourisme dont le Bureau touristique n'a pas tenu compte dans la mesure où ils auraient pu le faire. Une grande partie de la pensée touristique de Terre-Neuve s'oriente essentiellement vers le côté sportif, insistant sur la pêche au thon, la chasse à l'élan, au caribou et aux ours. Mais ces attractions n'intéressent que peu de personnes et très peu peuvent se les permettre.

J'en reviens donc au *Bullett*. Au cours de mon voyage, l'année dernière, j'ai rencontré une jeune fille de Montréal, une physiothérapeute en vacances, qui, au lieu de prendre l'avion, aller-retour, a consacré deux jours de ses vacances pour prendre ce *Bullett*. Ce n'est pas du tout une chose rare malgré le fait que

[*Text*]

has never been publicized officially as a tourist attraction. Holidaymakers everywhere nowadays are looking for somewhere different to go, and I believe there are great numbers of middle-income people, particularly the young who are adventurous and free to get around, to whom the "Bullet", cleaned up and welcoming, could have tremendous appeal.

Apart from the train itself, the country through which it passes is spellbinding, empty and wild for great stretches, with settlements that seem isolated and remote, and in other parts of the run softer, with birch stands and streams. Imaginative publicity could bring people to ride through such country from all over North America. To dwellers in big cities, names like Topsail would be alluring in themselves.

Before the passenger train goes irrevocably, I should like to ask the Committee to give consideration to the points of view I have put forward. In support of it, I might mention that in Great Britain there are two small trains, one in Kent and one in South Wales, both great tourist attractions, and the Newfoundland narrow-gauge ride could surpass these. With regard to cost, Canadian National says it has no intention of discontinuing the freight service. Therefore since it still has to keep up the track and retain many of its employees some of the expense of running the passenger service would be incurred in any case.

Newfoundlanders are accustomed to their train and I believe do not fully appreciate its potentialities. I hope we are not going to lose the "Bullet" just at a time when people are on the move everywhere, looking for pleasure and somewhere new to go, a time when its possibilities could be realized.

The Chairman: I want to thank the two ladies for their briefs. The first question is from Mr. Perrault.

Mr. Perrault: Mr. Chairman, I think we all appreciated hearing from Miss Berry and Mrs. Murray. It was nice to have them visit our hearing. They are the first ladies I think we have heard from on this tour.

This is a point of information, Miss Berry. Do you have a flying doctor service in Newfoundland at the present time, an air ambulance?

Miss Berry: Yes, in some of the remoter areas.

Mr. Perrault: Do they employ helicopter service?

[*Interpretation*]

ce train n'a jamais vraiment fait de publicit comme attraction touristique. Les vacancier partout essaient de trouver un endroit parti culier pour leurs vacances et je pense qu'u très grand nombre de personnes à reven moyen, surtout pour les jeunes aventurier libres pour se déplacer le *Bullet*, nettoyé e de bon accueil, pourrait offrir une très grand attraction.

A part le train même, le paysage est vrai ment fascinant, vide et sauvage sur de gran des distances avec quelques centres isolés e éloignés et d'autres régions où le paysage s'a doucit avec des bouleaux et des rivières. Un publicité très imaginée pourrait attirer de gens de toutes les régions de l'Amérique d Nord pour voyager dans ce pays. Pour le gens des grandes villes, un nom comme Top sail serait très attrayant.

Avant que le service voyageur disparaiss je demanderais au comité de tenir compte d point de vue que je viens de vous présente En l'appuyant, je pourrais vous dire qu'e Grande-Bretagne, il y a deux petits trains, u à Kent, un en Galles du sud, les deux de attractions touristiques et les voies étroite seraient même un meilleur attrait. En ce qu concerne le coût, le National-Canadien n'a pa du tout l'intention de mettre fin au service d transport des colis. Donc ils doivent mainten les rails et bon nombre de leurs employé dont une partie des dépenses pour faire fon tionner le service voyageur serait maintenu de toute façon. Les Terreneuviens sont hab tués à ce train et n'apprécient pas toutes le possibilités. J'espère que nous ne perdron pas le *Bullett* au moment où les personnes s déplacent partout, essayant de trouver d nouvelles distractions. C'est le moment d réaliser ces perspectives.

Le président: Je remercie ces deux dam de nous avoir présenté leur mémoire. La pr mière question viendra donc de M. Perrault.

M. Perrault: Monsieur le président, je cro que nous avons tous beaucoup aimé entend les audiences de mesdames Berry et Murra Nous sommes contents qu'elles soient venue à notre audience. Ce sont les premières dam que nous avons entendues au cours de cet tournée. A titre d'information, M[lle] Berr avez-vous, à l'heure actuelle, un service d'am bulance aérien?

Mlle Berry: Oui, dans certaines régio éloignées.

M. Perrault: Est-ce qu'ils emploient l hélicoptères?

[Texte]

Miss Berry: Yes, particularly out of St. nthony, that area, and to the southwest ast. I would prefer that somebody more in e know in the Department of Health would nswer this question for you.

Mr. Perrault: How efficient is it?

Miss Berry: I think it is quite efficient.

Mr. McGrath: Would this flying service pply only to what could be considered as nergency cases?

Miss Berry: Emergency, and the outlying ttage hospital areas where there are no ads.

Mr. Perrault: Do you have an approximate timate of the number of people per week ho would require this care?

Miss Berry: I could not give you that. My n experience was 10 years with handi-pped children, and I could give you those gures later. But I do not know the total ming into St. John's.

Mr. Perrault: Do you know of anybody in ewfoundland who has discussed this concept ith the CNR or with the Canadian Transport mmission?

Miss Berry: I very much doubt it.

Mr. Perrault: Did you oppose the CNR plication at the time of the hearings on ese grounds?

Miss Berry: Our association did not partici-te at that time.

Mr. Perrault: Thank you, Mr. Chairman.

Mr. Skoberg: Mr. Chairman, it is very lightening to have some people from the cial science end of our community appear fore us. We have heard many economists, t I am sure that this social end of it is mething that is most important. I am just ndering if either of you ladies could tell us you know of any other place in the world at does not have a passenger service of me description? This will be the only prov-ce in Canada that will not have a passenger rvice, and is it your opinion and that of the ople you represent and of the people you eet day in and day out, that they really cognize this as downgrading the Newfound-nd people?

Mrs. Murray: Yes. I think it is wrong that is should be the only province without pas-nger service.

The Chairman: Mr. Corbin.

[*Interprétation*]

Mlle Berry: Oui, surtout de Saint-Antoine et vers la côte sud-ouest. Je préférerais que quelqu'un qui soit beaucoup plus au courant du ministère de la Santé puisse vous répondre.

M. Perrault: Est-ce que c'est efficace?

Mlle Berry: Oui, je pense très efficace.

M. McGrath: Est-ce que ce service d'ambulance aérien ne desservirait pas tout simplement les cas d'urgence?

Mlle Berry: Oui, effectivement les cas d'urgence et les régions très éloignées qui ont des hôpitaux de petite ville sans accès de routes.

M. Perrault: Avez-vous une estimation du nombre de personnes, par semaine, qui ont besoin de ces soins.

Mlle Berry: Je ne saurais vous le dire. J'ai eu de l'expérience avec les enfants handicapés. Je pourrais vous donner ces chiffres, mais je ne saurais vous donner les autres chiffres venant à Saint-Jean.

M. Perrault: Est-ce que quelqu'un de Terre-Neuve a discuté avec le National-Canadien ou la Commission canadienne des transports.

Mlle Berry: J'en doute.

M. Perrault: Est-ce que vous vous êtes opposée à la demande du National Canadien au moment de l'audience à ce sujet.

Mlle Berry: Non, notre association n'y a pas participé à ce moment.

M. Perrault: Merci, M. le président.

M. Skoberg: Monsieur le président, ce serait beau d'avoir quelqu'un qui s'occupe de sciences sociales devant notre comité. Nous avons entendu beaucoup d'économistes, mais je suis sûr que cet aspect social est quelque chose de très important. Je demande si l'une ou l'autre pourrait nous dire si vous connaissez un autre endroit dans le monde qui n'a pas de service voyageur de quelque sorte? Vous aurez donc la seule province au Canada qui n'aura pas de service voyageur par train. Est-il votre opinion personnelle, l'opinion de ceux que vous représentez au jour le jour, qu'on le reconnaisse comme une dégradation des Terre-Neuviens?

Mme Murray: Oui, je crois que nous ne devrions pas être la seule province au Canada sans service voyageur.

Le président: Monsieur Corbin.

[*Text*]

M. Corbin: Monsieur le président, je voudrais poser mes questions en français, si la chose est possible.

Mr. McGrath: Our province is officially bilingual.

Mr. Corbin: This is why I would like to make my statement in French.

Je crois que Mlle Berry a certainement du mérite d'avoir porté ce problème très humain à notre attention. Cependant, étant donné que les problèmes des soins médicaux, et peut-être aussi les problèmes du transport des malades relèvent des autorités provinciales, selon la constitution canadienne, je me demande si Mlle Berry ou quelqu'un de son groupe a discuté de ce problème très sérieux avec les autorités provinciales et quelle a été leur réaction?

Miss Berry: The answer that I can give is that this matter arose at a meeting of our association three months ago for the first time, because no one had previously travelled on the bus and therefore it was never brought to anyone's attention, the province or the CNR, previously.

M. Corbin: Une autre question, monsieur le président. En regardant la carte de Terre-Neuve, je remarque que tout le long du parcours du chemin de fer il y a des hôpitaux, et je remarque aussi que la plus grande distance qui sépare deux de ces hôpitaux est peut-être de 75 ou de 100 milles. Dans ce cas, un bon service d'ambulance ou un service du genre ne suffirait-il pas à la population dans la plupart des cas?

Miss Berry: At the present time the specialist services required by in almost every case the people we refer are in St. John's, and this is particularly so with regard to the physically handicapped. There are no specialists in other centres. Perhaps in the future the services will be better dispersed, but for the next 10 to 20 years the majority of those requiring specialist care must come to St. John's.

M. Corbin: Monsieur le président, j'aurais une question à poser à l'autre dame, si vous le permettez. Je m'excuse, je n'ai pas bien compris son nom. Voudriez-vous le répéter, s'il vous plaît?

[*Interpretation*]

Mr. Corbin: Mr. Chairman, if possible, should like to ask my questions in French.

M. McGrath: Notre province est officielle ment bilingue.

M. Corbin: C'est la raison pour laquelle j pose ma question en français.

I believe that Miss Berry should be con gratulated for bringing this very human prob lem to our attention. However, in view of the fact that problems concerning medical care and maybe also problems concerning the transportation of patients come under the jurisdiction of the provincial authorities according to the Canadian Constitution, I wonder whether Miss Berry or someone belonging to her group has discussed this very serious problem with the provincial authorities, and what was their reaction?

Mlle Berry: La réponse que je pourrais vous donner, c'est que cette question a été soulevée lors d'une réunion de notre association, il y a trois mois, et pour la première fois parce que personne auparavant n'avait fait le voyage en autobus. Par conséquent, le problème n'avait jamais été attiré à l'attention soit de la province, soit du National-Canadien auparavant.

Mr. Corbin: Another question, Mr. Chairman. Looking at the map of Newfoundland, I notice that there are hospitals all along the railway line, and I also notice that the greatest distance separating these hospitals may be 75 or 100 miles. In this case, would a good ambulance service or a service of this type not be sufficient in most cases for the population?

Mlle Berry: A l'heure actuelle, les services de spécialistes demandés dans presque tous les cas dont les gens auraient besoin et dont nous nous occupons, se trouvent ici à Saint-Jean, et c'est particulièrement vrai quant aux handicappés au point de vue physique. Il n'y a pas d'autres spécialistes dans les autres centres. A l'avenir, il se peut fort bien que les services soient mieux disposés, mais d'ici dix ou vingt ans je crois que nous devrons toujours songer que ceux qui auraient besoin de services spécialisés doivent venir à Saint-Saint-Jean.

Mr. Corbin: Mr. Chairman, with your permission, I would like to ask the other lady a question. I am sorry, but I didn't quite get her name. Would you kindly repeat it?

[*Texte*]

The Chairman: Mrs. Doreen Murray.

M. Corbin: Madame Murray, j'ai beaucoup imé la suggestion que vous faites de conerver le train comme attrait touristique. Maintenant, j'ai manqué quelques passages de os commentaires et je me demande si vous ous proposez de conserver le train sur toute ligne comme attraction touristique ou tout mplement de limiter son trajet à quelques illes, soit la région immédiate de la ville de aint-Jean.

Mrs. Murray: No, I would suggest taking he train as it is, with perhaps one or two ervices a week. I know of many people from he United States and Canada who have come pecially to ride on the train for the whole ngth of the trip. With a short trip you ould not get the advantage of the varying enery and the different types of towns and ountry that you go through.

M. Corbin: Avez-vous une idée, madame urray, du nombre de personnes étrangères, touristes, qui pourraient se servir du train cours de l'année?

Mrs. Murray: If it were advertised properly think there would be a great many. There re not many places in North America that re as unusual as Newfoundland. That is one the things people like about Newfoundland. lready you have Newfoundland songs and ewfoundland jokes. I think Newfoundland as an attraction for people in big cities.

M. Corbin: Je vous remercie beaucoup.

Le président: Avez-vous terminé vos questions, monsieur Corbin?

M. Corbin: Oui, monsieur le président.

Mr. Nesbitt: On a supplementary, Mr. hairman, is Mrs. Murray of the opinion that erhaps the possibilities of tourist travel in ewfoundland will be very much greater fter the great publicity in the national press the last few weeks about the Bullet?

Mrs. Murray: Oh yes, I think there is lready. I was speaking to somebody at lunch me who told me some friends of theirs came pecially to Newfoundland from Toronto to ike this ride because they thought the Bullet as coming off. If we had official publicity I ink there would be many more of them.

[*Interprétation*]

Le président: Madame Doreen Murray.

Mr. Corbin: Mrs. Murray, I really like the suggestion you made to keep the train as a tourist attraction. However, I missed some parts of your comments and I wonder whether you are proposing to keep the train running on the entire line as a tourist attraction or simply to limit its run to a few miles, that is in the immediate vicinity of St. John's. ,

Mme Murray: Non, je suggérerais que l'on prenne le train comme il est avec peut-être un ou deux voyages par semaine. Je connais plusieurs personnes des États-Unis et du Canada qui sont venus spécialement pour faire un voyage en train pendant tout le voyage. Alors, avec un court voyage en train, vous n'auriez pas les avantages des différents genres de paysage et les différents genres de villes et de pays que vous traversez.

Mr. Corbin: Do you have any idea, Mrs. Murray, as to the number of foreigners, tourists, who might use the train during the year?

Mme Murray: Je crois que si on faisait une bonne publicité, il y en aurait beaucoup. Je ne crois pas qu'il existe beaucoup d'endroits en Amérique du Nord qui soient si extraordinaires que Terre-Neuve. C'est une des choses que l'on aime de Terre-Neuve. Déjà vous avez des chansons de Terre-Neuve, vous avez des farces qui sont typiquement terre-neuviennes. Je crois que Terre-Neuve comporte une attraction pour les gens des grandes villes.

Mr. Corbin: Thank you very much.

The Chairman: Are you through with your questions, Mr. Corbin?

Mr. Corbin: Yes, Mr. Chairman.

M. Nesbitt: Une question complémentaire monsieur le président, je me demandais si à son avis, Mme Murray croit que peut-être les possibilités touristiques à Terre-Neuve seraient plus grandes à la suite de la grande publicité dans les journaux à travers le pays depuis quelques semaines au sujet du *Bullet*?

Mme Murray: Oui, je crois qu'il y en a déjà. Je parlais justement à quelqu'un au cours du déjeuner qui m'a dit que des amis sont venus spécialement à Terre-Neuve de Toronto pour faire ce voyage, parce qu'ils croyaient que le *Bullet* allait disparaître. Si nous avions une publicité officielle, je crois qu'il y en autrait davantage.

[*Text*]

Mr. Horner: Miss Berry, I would like to compliment both you ladies for your brief which presents the human aspect of the Bullet and the passenger service on the Island.

In your opinion, Miss Berry, has the railroad in even the past 10 years made a concerted effort to improve the service, or even maintain the service on the Bullet?

Miss Berry: No; I feel that it has gone down. The quality of the service has definitely gone down.

Mr. Horner: You say that in your opinion the service has gone down, but did they make any effort to entice more passengers on to the Bullet by lowering the fares, or by instituting family fares, and weekend excursions as they did on the mainland a few years ago? I think they had a red, white and blue plan.

Miss Berry: We have the red, white and blue plan. They have done that to encourage some...

Mr. Horner: Have they lowered the fares?

Miss Berry: I do not understand the scaling but there is a cheaper fare on the red, on the white on the blue or whatever it is. They have done this, yes.

An hon. Member: They have lowered the fares, but they also lowered the service.

Miss Berry: Yes.

Mr. Horner: In other words, you were not getting more for your money.

Did they attempt to speed up the time for the over-all trip, in any way? I understand it takes 21 hours to go from Port-aux-Basques to St. John's?

Miss Berry: This is probably bound up with a technical thing in the running of engines. When I first travelled on the train I believe it took 27 hours, so perhaps it has come down a little.

Mr. Horner: Did they attempt to put on new or modern coaches? I know that on the mainland the CNR, after years and years of saying that dome cars were not necessary, all of a sudden broke out and bought several dome cars for the mainland services.

Miss Berry: There has been nothing as modern as that. The very old coaches were replaced many years ago, and there has not been anything else that I know of, but I do not want to state that officially.

[*Interpretation*]

M. Horner: J'aimerais féliciter les deux dames de leur mémoire qui présente l'aspect humain du *Bullet* et du service des voyageurs sur l'île de Terre-Neuve. Mademoiselle Berry, à votre avis, depuis dix ans mettons, est-ce que le chemin de fer a fait un effort concerté pour essayer d'améliorer ou même de maintenir le service du *Bullet*?

Mlle Berry: Non, j'ai l'impression que le service s'est nettement détérioré.

M. Horner: Vous dites qu'à votre avis le service s'est détérioré, mais est-ce que le chemin de fer a fait un effort pour essayer d'attirer plus de passagers à bord de *Bullet* en réduisant le tarif ou en substituant des tarifs familiaux et des excursions de fin de semaine comme on l'a fait sur le continent il y a quelques années? Je crois qu'il y avait des tarifs rouge, blanc et bleu?

Mlle Berry: Nous avons le tarif bleu, blanc, rouge. Il l'ont fait pour encourager ..

M. Horner: Est-ce qu'on a réduit les tarifs?

Mlle Berry: Je ne comprends pas le tarif, mais il y a certainement un taux réduit pour le programme bleu, blanc, rouge. Oui, ils l'ont fait.

Une voix: Ils ont réduit les tarifs, mais ils ont réduit le service en même temps.

Mlle Berry: Oui.

M. Horner: En d'autres termes, vous n'en avez pas eu plus pour votre argent. A-t-on essayé d'accélérer le parcours général? Sauf erreur, il faut 21 heures pour aller de Port-aux-Basques à Saint-Jean?

Mlle Berry: C'est probablement une question technique qui a trait au fonctionnement des moteurs. Quand j'ai pris le train pour la première fois, cela prenait 27 heures, alors, on a peut-être un peu réduit le temps du parcours.

M. Horner: A-t-on essayé d'y mettre des wagons modernes ou nouveaux? Je sais que sur le continent, le CNR, après avoir dit pendant des années que les voitures panoramiques n'étaient pas nécessaires, en a soudain acheté plusieurs pour les services continentaux.

Mlle Berry: Non, il n'y a rien eu d'aussi moderne. Les wagons très anciens ont été remplacés il y a longtemps et je ne crois pas qu'il y ait d'autre chose, mais je ne voudrais pas le dire de façon officielle.

exte]

Mr. Horner: Relative to the replacement s service, is it your opinion that road con-ions during most winters—and I under-nd you are having a lovely winter in New-ndland this year—would present no real zard on the Trans-Canada highway which uld, in a sense, be...?

Miss Berry: No, I would not say they uld not. Even in this so-called good winter buses have already been held up on the st coast by blizzards. There were icy condi-ns the last time I caught it and it was held for an hour and a quarter. It makes quite onsiderable difference.

Mr. Horner: In other words, you would say t the rail service provides a more reliable vice to meet the weather conditions on the and?

Miss Berry: I do not deny that it can be d up in bad blizzard weather, but not as ch as buses could be.

Mr. Horner: I have just one further ques-n for Mrs. Murray. With regard to adver-ement possibilities, I gather from your ef that you believe the CNR has made no l effort to capitalize on the potential tour-attraction that the Bullet might well be?

Mrs. Murray: Yes, I think that is so.

Mr. Horner: Could some of the responsibili-for advertising and attracting tourists to Province of Newfoundland also lie with Newfoundland government? Would you they have made a concerted effort to ract tourism and use the Bullet as a fea-e attraction?

Mrs. Murray: No, not so far as I know. I do think I have ever seen any reference to Bullet in their advertising.

Mr. Horner: Forgive me for even referring it, but the Province of Alberta considers rism to be a tremendous industry and does ensive advertising throughout the United tes. Has the Province of Newfoundland ried on any extensive campaign featuring ride on the Bullet and the feasibility of ting off into the wilderness moose hunting, d so on?

Mrs. Murray: Of course, I have no connec-n with this...

Mr. Horner: Yes, I know; but as an erested person you would have been aware something like this?

Mrs. Murray: Yes, I think I would have en.

[*Interprétation*]

M. Horner: En ce qui concerne le service d'autobus de remplacement, diriez-vous à votre avis que les conditions de la route au cours de la plupart des hivers, et je crois savoir que votre hiver cette année est très doux, ne présentent aucun danger réel sur la route transcanadienne qui serait, dans un sens...

Mlle Berry: Non, je ne dirais pas cela. Même avec notre «bon» hiver, les autobus ont déjà été retardés par des tempêtes sur la côte ouest. Il y avait de la glace la dernière fois que je l'ai pris et il a été retardé pendant une heure et quart. Cela fait une différence considérable.

M. Horner: En d'autres termes, les chemins de fer représentent un moyen de transport beaucoup plus sûr pour faire face aux conditions climatiques sur l'île?

Mlle Berry: Je ne nie pas que les chemins de fer puissent être retardés par les tempêtes, mais pas autant que les autobus.

M. Horner: J'aurais une dernière question à poser à Mme Murray. En ce qui concerne les possibilités publicitaires, d'après votre mémoire, j'ai cru comprendre que le CNR n'avait pas vraiment essayé de profiter des possibilités touristiques que le «*Bullet*» représente?

Mme Murray: C'est bien ça, à mon avis.

M. Horner: Serait-il possible que les responsabilités de publicité pour attirer les touristes à Terre-Neuve incombent aussi au gouvernement de Terre-Neuve? Diriez-vous que ce gouvernement a fait un effort concerté pour essayer d'attirer les touristes et employer le «*Bullet*» comme attraction particulière?

Mme Murray: Non, pas à ma connaissance. Je ne crois pas avoir jamais vu d'allusion au «*Bullet*» dans leur publicité.

M. Horner: Pardonnez-moi si je fais même une allusion, mais la province d'Alberta considère le tourisme comme étant une industrie formidable et elle fait beaucoup de publicité à travers les États-Unis. La province de Terre-Neuve a-t-elle fait une grande campagne publicitaire mettant en vedette un voyage en «*Bullet*» et la possibilité de débarquer en plein bois pour aller chasser l'orignal etc.?

Mme Murray: Évidemment, je n'ai pas de rapport avec...

M. Horner: Oui, mais je sais en tant que personne intéressée, vous l'auriez su?

Mme Murray: Oui, je le crois.

[*Text*]

Mr. Rock: My first question to the two charming ladies is to ask how often they themselves use the Bullet?

The Chairman: Mr. Rock, would you repeat your question, please?

Mr. Rock: How often do these two ladies use the train? I would like to know how often people use the train.

Miss Berry: In this particular era, hardly at all, unless the planes are not taking off or landing because of fog. This might happen once a year at a particular time when I am travelling. Therefore, planes and cars are used.

Mr. Rock: In other words, you mostly use your own car.

Miss Berry: It has been my clients who have used the train for many years.

Mr. Rock: And Mrs. Murray?

Mrs. Murray: This is the first time I have been all the way on the train. I have been in Montreal in hospital. I could not fly, so I came down for the first time on the train. I had a tourist's impression of the train, because it was new to me, and this is how it struck me. I wrote my brief because it seemed to me its potentialities were so great.

Mr. Rock: Could Miss Berry explain what she meant when she talked of the downgrading of the train? In other words, what type of downgrading have you noticed?

Miss Berry: This is not part of the brief. Some one asked me a question.

Mr. Rock: Some one asked you about downgrading, and you accepted the fact that there had been a lot of downgrading. I would like to know what type of downgrading there has been.

Mr. Horner: On a point of order. I think you are referring to a question I asked. I asked if there had been any improvements. I did not use the word "downgrading".

The Chairman: Would you care to answer that question?

Miss Berry: All I can say is what is observed on meeting trains, and what is said by parents of children, that the actual fabric itself seems to have gone down. It does not look as bright.

Mr. Rock: Are you referring to the washing of the train and things like that—the windows, and so on?

[*Interpretation*]

M. Rock: J'aurais une première question poser aux deux charmantes dames. Combie de fois prennent-elles, elles-mêmes l «*Bullet*»?

Le président: Voulez-vous répéter la ques tion, Monsieur Rock, je vous prie?

M. Rock: Avec quelle fréquence ces dame prennent-elles le train? J'aimerais savoir ave quelle fréquence les gens prennent le train.

Mlle Berry: Rarement, à cette époque par ticulière, à moins que les avions ne décollen ou n'atterrissent pas en raison de brume. Cel peut se produire une fois par année lorsque j voyage. Alors, on prend l'avion o l'automobile.

M. Rock: En d'autres termes, vous vou servez de votre propre automobile.

Mlle Berry: Ce sont mes clients qui pren nent le train depuis de nombreuses années.

M. Rock: Et Madame Murray?

Mme Murray: C'est la première fois que j prends le train pour tout le trajet. Je su allée à l'hôpital à Montréal. Je n'ai pu y alle en avion et, je suis donc venue en train, alo j'ai eu l'impression d'un touriste en trai parce que c'était tout nouveau pour moi, c'est l'impression que j'ai eue. J'ai rédigé mo mémoire parce qu'il me semblait que s perspectives étaient remarquables.

M. Rock: Est-ce que Mlle Berry pourra nous expliquer ce quelle entend par la dét rioration du service? Quel genre de détéri ration du service avez-vous remarqué?

Mme Berry: Cela ne fait pas partie de mo mémoire. Quelqu'un m'a posé une question.

M. Rock: Quelqu'un vous a demandé tout l'heure ce qui en était de la détérioration d service et vous avez admis qu'il y en avait e beaucoup. Je voudrais savoir quel genre d détérioration il y a eu.

M. Horner: J'invoque le Règlement. Je cro qu'on se réfère à une question que j'ai posé J'ai demandé s'il y avait eu des amélioration Je n'ai pas employé le mot «détérioration».

Le président: Pourriez-vous répondre cette question?

Mlle Berry: Tout ce que je peux dire, c'e ce que j'ai vu moi-même à bord les trains, ce que les parents des enfants me disent, c'e que le tissu lui-même semble être moins lu sant qu'auparavant.

M. Rock: Parlez-vous du lavage du trai des fenêtres et autres choses analogues?

[*Texte*]

Miss Berry: It is not kept up as well, or not leaned as well.

An hon. Member: I bet they are cleaning it his afternoon!

The Chairman: Mr. Perrault you wanted to sk a supplementary question?

Mr. Perrault: Mr. Chairman, it is accurate o say that Miss Berry and Mrs. Murray are ot frequent commuters on the train but I hink the ideas being advanced are neverthe-ess very interesting.

I would like, first of all, to ask Miss Berry whether she would favour the establishment f a once-weekly service by a bus especially quipped for cases of the kind she described, o make a tour of the Island to bring those eople into St. John's?

Miss Berry: I suppose it could be done but would envisage it as being very difficult to uild a bus that would suit all of these people nd be able to bring enough of them at the ight time.

Mr. Perrault: Conceivably, with nurses board...

Miss Berry: You would need that service. It night be something that could be planned for he future, but I have never seen that kind of us.

Mr. Perrault: There may be a unique situa-ion here which can be met by a service even nore specialized than merely the train ervice?

Miss Berry: It could be, yes.

Mr. Perrault: Second, I have a question of Mrs. Murray who has advanced this very nteresting idea.

Incidentally, I have a St. John's tourist older and it promotes travel by train. We vere given this before we came down. I ongratulate the City of St. John's for being roud of its railway.

Do you believe that a continuation of pas-enger facilities of the kind that you lescribed, basically for tourist promotion pur-oses, should be continued even though it nay incur heavy deficits?

Mrs. Murray: As I say in my brief, some of he expenses of running the passenger train vould be incurred in any case if the freight rains are kept on. The track still has to be ept up, and a certain amount of personnel re required.

Mr. Perrault: Yes; but there are certain osts which can be attributed directly to these

[*Interprétation*]

Mlle Berry: On ne l'entretient pas ou on ne le nettoie pas aussi bien.

Une voix: Je vous parie qu'on est en train de le nettoyer après-midi!

Le président: Monsieur Perrault, vous vouliez poser une question supplémentaire?

M. Perrault: Monsieur le président, il est exact de dire que M[lle] Berry et M[me] Murray ne prennent pas le train très souvent, mais je crois que les idées qu'elles ont avancées sont très intéressantes. J'aimerais tout d'abord poser la question suivante à M[lle] Berry: est-ce que vous seriez en faveur d'un service une fois par semaine par un autobus, spécialement équipé pour des cas comme ceux que j'ai décrits, pour faire la tournée de l'Île pour amener ces gens à St-Johns?

Mlle Berry: Je suppose que cela pourrait se faire, mais je crois qu'il serait très difficile de construire un autobus suffisant à tout le monde et qui pourrait en amener assez au bon moment.

M. Perrault: Il est possible qu'avec des infirmières à bord...

Mlle Berry: Vous auriez besoin de ce service. C'est quelque chose qu'on pourrait prévoir pour l'avenir, mais je n'ai jamais vu de tels autobus.

M. Perrault: Il se pourrait qu'il y ait une situation unique ici qui pourrait être résolue par un service encore plus spécialisé que celui du train lui-même?

Mlle Berry: Oui, peut-être.

M. Perrault: Deuxièmement, je voudrais poser une question à M[me] Murray qui a avancé cette idée très intéressante. A propos, j'ai ici, un dépliant publicitaire de la ville de St-John's qui justement nous invite à prendre le train. On nous l'a remis avant de venir ici. Je félicite la ville de St. Johns d'être fière de son chemin de fer. Est-ce que vous croyiez que la continuation des aménagements pour les passagers du genre que vous avez décrit, surtout pour favoriser le tourisme, pourrait se poursuivre même si elle peut subir de forts déficits?

Mme Murray: Comme je le dis dans mon mémoire, certaines dépenses pour le train de voyageurs seraient subies quand même si l'on maintient les trains de marchandises. Il y aurait un certain personnel et les voies à entretenir.

M. Perrault: Oui, mais il y en aurait quand même qu'on pourrait attribuer directement au

[*Text*]

passenger services. Would you tolerate deficits on such a service and, if so, to what extent?

Mrs. Murray: Would the deficit not be made up by the amount of tourism you have?

Mr. Perrault: Or course, that is just speculating.

Mrs. Murray: Prince Edward Island is geographically comparable to Newfoundland and they have a great thing in tourism. If they had a Bullet I expect they would be very glad to hang on to it.

Mr. Perrault: Thank you.

Mr. Marshall: My question is directed to Miss Berry, Mr. Chairman.

You mention in your brief, Miss Berry, the aged coming from intermediary points and you mentioned Deer Lake as an example. There is a town adjacent to Deer Lake, the town of Howley. Did you ever have any experience of bringing the aged from that town?

Miss Berry: No.

Mr. Marshall: What would be the situation...

Miss Berry: They would have to be brought in, I would say, by taxi to Grand Falls to pick up the express. I have not got my timetable with me.

Mr. Marshall: How would the taxi get from Howley to the main highway when there is no road?

Miss Berry: Oh, no; that is the train. You are right. I am sorry. I was thinking of Buchans when you said Howley.

Mr. Marshall: They say there is going to be a link remaining between Deer Lake and Howley, but according to the attitude of the Canadian Transport Commission we do not know that in a couple of years they may not discontinue that service, too. These people would be completely isolated, would they not?

Miss Berry: They would be completely isolated. I suppose they would have to be brought out by helicopter.

Mr. Marshall: They have been promising to build a short stretch of road there for some seven years now and it is not built yet. So these people would be completely isolated?

Miss Berry: Yes.

[*Interpretation*]

service des voyageurs. Tolériez-vous des déficits pour un tel service et, alors, dans quelle mesure?

Mme Murray: Est-ce que les déficits ne seraient pas comblés par le tourisme que vous avez?

M. Perrault: Il ne s'agit là évidemment que de conjectures.

Mme Murray: L'Île du Prince Édouard est géopgrahiquement comparable à Terre-Neuve et ils ont beaucoup de tourisme. J'imagine que s'ils avaient le *Bullet*, ils seraient très contents de le garder.

M. Perrault: Merci.

M. Marshall: J'ai une question à poser à Mlle Berry. Mlle Berry, vous avez mentionné dans votre mémoire, que les vieillards venaient de points intermédiaires et vous avez donné comme exemple, *Deer Lake*. Il y a une ville adjacente à Deer Lake qui s'appelle *Howley*. Avez-vous déjà, eu l'expérience de transporter les vieillards de *Howley*?

Mlle Berry: Non.

M. Marshall: Quelle serait la situation...

Mlle Berry: Je dirais qu'il faudrait qu'ils se rendent par taxi à Grand Falls pour prendre l'express. Quel est le point le plus rapproché? Je n'ai pas mon horaire avec moi.

M. Marshall: Mais comment le taxi se rendrait-il de Howley à la grande route puisqu'il n'y a pas de route?

Mlle Berry: Oh non, c'est le train. Vous avez raison. Excusez-moi. Je songeais à Buckans lorsque vous avez dit Howley.

M. Marshall: On dit qu'il y aurait un lien restant entre Deer Lake et Howley mais d'après l'attitude de la Commission canadienne des Transports, nous ne savons pas si d'ici deux ans, ils ne cesseront pas ce service aussi. Alors ces gens seraient complètement isolés, n'est-ce pas?

Mlle Berry: Oui, ils seraient complètement isolés. J'imagine qu'on devrait les amener par hélicoptère.

M. Marshall: Ils ont promis de construire une courte route depuis environ sept ans maintenant et on ne l'a pas construite encore. Alors ces gens seraient complètement isolés, n'est-ce pas?

Mlle Berry: Oui.

[*Texte*]

Mr. Marshall: Thank you.

I would like to ask Mrs. Murray a question. uring your ride on the Newfoundland train d you discuss anything with the employees, ich as the porters and the conductors?

Mrs. Murray: No, I did not.

Mr. Marshall: You did not. I am sure this ould have been very interesting.

Mr. Allmand: Miss Berry, I notice that our association is a Canadian association of cial workers.

Are you therefore familiar with the proceures that are used in other centres in Cana- where there is no passenger rail service d where they had the same medical probms. For example, on Prince Edward Island, ntrary to what was said by somebody fore, there is no more passenger rail serce. In Fredericton, New Brunswick there is passenger rail service, and the same is ue of many areas in Canada. How does your ssociation treat these people there?

Miss Berry: This brief is from the Newundland Branch only and has no national plications, so there has been no comparison ade.

Mr. Allmand: But they must have met the oblem that you posed in other areas. How d they meet such a problem?

Miss Berry: No doubt they have, but I have answer to that, Mr. Allmand.

Mr. McGrath: Just for the record, there is a ssenger service on Prince Edward Island.

Mr. Allmand: There is?

Mr. McGrath: I have the schedule before e.

The Chairman: One moment please, Mrs. urray would like to reply.

Mrs. Murray: In respect of the deficit curred by the train, are there not deficits curred by railways almost everywhere?

The Chairman: Are you finished, Mr. llmand?

Mr. Allmand: I think it is a serious prob- m that you have brought up, madam, and at is why I am interested in how they deal ith the problem in areas of Canada where

[*Interprétation*]

M. Marshall: Merci. J'aimerais maintenant poser une question à Mme Murray. Dans votre voyage dans le train de Terre-Neuve, est-ce que vous avez discuté avec les employés comme les chefs de train, les porteurs, etc.

Mme Murray: Non.

M. Marshall: Je suis sûr que la conversation aurait été fort intéressante, si vous l'aviez fait.

M. Allmand: Mlle Berry, je constate que votre association est une association canadienne de travailleurs sociaux.

Vous êtes donc au courant des méthodes suivies dans d'autres centres du Canada. Il n'y a pas de service ferroviaire pour les voyageurs et on a des problèmes médicaux aussi. Par exemple, à l'Île-du-Prince-Édouard contrairement à ce qu'on a dit, il n'y a plus de service de voyageur et à Frédéricton au Nouveau-Brunswick, il n'y en a plus non plus. Et c'est la même chose dans plusieurs régions du Canada, cela n'existe plus. Comment votre Association traite-t-elle les gens dans ces régions?

Mlle Berry: Le mémoire qui vous a été présenté vient tout simplement de la succursale de Terre-Neuve seulement et n'a pas de portée nationale. Il n'y a donc pas de comparaisons qui ont été établies.

M. Allmand: Non, mais ils ont dû rencontrer le même problème dans d'autres régions; comment l'ont-ils résolu?

Mlle Berry: Ils l'ont résolu, sans doute, mais je n'ai pas de réponse à ce sujet-là, monsieur Allmand.

M. McGrath: Seulement pour le compte rendu, il existe un service voyageurs à l'île du Prince-Édouard?

M. Allmand: Vraiment?

M. McGrath: J'ai l'horaire devant moi.

Le président: Un instant, s'il vous plaît. Madame Murray voudrait ajouter quelque chose.

Mme Murray: Au sujet du déficit des trains, il y a des déficits des chemins de fer partout, n'est-ce pas?

Le président: Avez-vous terminé, monsieur Allmand?

M. Allmand: Je crois que c'est un grave problème que vous avez soulevé, Madame. Et, c'est la raison pour laquelle je m'intéresse à la façon dont on résout le problème dans les

[*Text*]

they have no passenger rail service. In addition, many areas that do have it have a rail liner, which is almost like a bus. I do not know if you are familiar with the rail liner service. I think what we should do is find out how they deal with these problems in the many parts of Canada where there is no passenger rail service.

I would like to point out that the judgment of the Canadian Transport Commission which permitted the CNR to withdraw the *Newfoundland Bullet* says that if the CNR is not able to provide adequate replacement service for passengers then they will reconvene another hearing and perhaps change the ruling. It might be worthwhile for you as a member of this Association and for us to try and keep a record of the number of stretcher and other difficult social cases and if you find out that there is a real problem between now and April 15 you can request a rehearing from the Canadian Transport Commission.

Mrs. Murray: That is a very interesting point.

Mr. Allmand: If you have statistics, for example, that so many people per week have to come in to St. John's and cannot get the service they require, I think you should bring that to the attention of the Canadian Transport Commission and ask for a rehearing.

The Chairman: Mr. Peddle.

Mr. Peddle: Mr. Chairman, it seems that members of the Committee have the usual idea of Newfoundland and they just do not know because they do not understand. They are nice fellows, I like them and all that, but they just do not understand the situation.

I have heard hon. members of the committee mention hospitals at least 75 and 100 miles—obviously they just do not understand.

Mr. Corbin: Mr. Chairman, on a point of privilege, I did not say that. I thought by looking at the map that they were perhaps such a distance and nobody gave me the facts. I should have been corrected then.

Mr. Peddle: Mr. Chairman, I will ask one of the ladies a question.

Miss Berry, someone mentioned the business of air ambulance. Lest the Committee

[*Interpretation*]

régions du Canada où il n'y a pas de service voyageurs. De plus, dans plusieurs régions où il en existe un, c'est un autorail, et cela ressemble presque à un autobus. Je ne sais pas si vous êtes familiers avec le service d'autorail. J'estime que ce que nous devrions faire, c'est de chercher comment on résout le problème dans les endroits où on n'a pas de service voyageurs.

Je voudrais tout simplement vous signaler que le jugement de la Commission canadienne des transports, qui a permis aux chemins de fer Nationaux du Canada de retirer le *Bullet*, dit que si cette compagnie n'est pas en mesure de remplacer adéquatement le service voyageurs, la Commission convoquera une autre audience et on changera peut-être l'ordonnance. Ce sera peut-être alors une bonne idée pour vous, à titre de membre de cette Association, et pour nous, d'essayer de tenir compte du nombre de cas de civière et des autres cas difficiles de travail social, et si vous pouvez trouver un problème véritable d'ici le 15 avril, vous pouvez alors demander une autre audience de la Commission canadienne des transports.

Mme Murray: C'est un point très intéressant.

M. Allmand: Si vous avez des statistiques, par exemple, à l'effet que tant de personnes par semaine doivent venir à Saint-Jean pour obtenir les services dont elles ont besoin, je crois que vous devriez attirer l'attention de la Commission canadienne des transports sur ce fait et demander une autre audience.

Le président: Monsieur Peddle.

M. Peddle: Monsieur le président, il semble que les membres du Comité ont une idée ordinaire de Terre-Neuve qu'ils ne connaissent tout simplement pas parce qu'ils ne comprennent pas. Ce sont de personnes gentilles et aimables, mais elles ne comprennent tout simplement pas la situation.

J'ai entendu des députés, qui sont membres du Comité, mentionner des hôpitaux à moins de 75 et 100 milles; évidemment ils ne comprennent pas.

M. Corbin: Monsieur le président, une question de privilège. Je n'ai pas dit cela. En examinant la carte, j'ai estimé que les hôpitaux étaient peut-être à cette distance, mais personne ne m'a repris. On aurait dû alors me corriger.

M. Peddle: Je pose une question à l'une de ces dames maintenant. Mademoiselle Berry, quelqu'un a mentionné un service d'ambulance aérien. Pour ne pas donner une mau-

[*exte*]

t the wrong impression, am I correct in ying that air ambulance service is not effec- e in Corner Brook, Port aux Basques, hich is 500 miles from here?

Miss Berry: To the best of my knowledge— d I would prefer not to answer this directly cause something may have come in lately at I know nothing about—the air ambu- nce service here has always been from the mote areas of the southwest coast and ound to St. Anthony and the northern eas.

Mr. Peddle: But to your knowledge, there no air ambulance service from Port-aux- sques, which is 550 miles from here?

Miss Berry: I would presume that if there re an emergency there could be.

Mr. Peddle: In the case of an emergency.

Miss Berry: Someone from the Department Health really should answer that question.

Mr. Peddle: Another member asked the two dies how often they used the trains. I think s implies that those ladies had to use the ain in order to present their brief. It is like ying that in order to criticize a hockey me they had to be a hockey player. I do not e that.

The Chairman: Why do you not put your n questions, Mr. Peddle.

Mr. Rock: Mr. Chairman, it is being ferred that we have no right at all to ques- n here. I think we have the right to ques- n as much as we want. It is important to d these things out. I would like to know if se people who are presenting briefs today ed the train too. I have the right to know at.

The Chairman: Mr. McGrath.

Mr. McGrath: I would like to raise a point order, Mr. Chairman, because I think it is rhaps an inadvertent omission on your part. rangements have been made for us to tour train facilities this afternoon at four lock and I could not think of a better note which to end than to thank these two arming ladies for the excellent evidence d brief that they presented. I just offer that ggestion to you.

The Chairman: I am keeping my eye on my tch and we will be there on time, Mr.

[*Interprétation*]

vaise impression au Comité, est-ce que j'ai raison de dire que le service d'ambulance aérien n'est pas en vigueur à Corner Brook ou à Port-aux-Basques à 500 milles d'ici?

Mlle Berry: Au mieux de ma connaissance, et je préférerais ne pas y donner réponse de façon directe, car il se peut que quelque chose se soit produit dernièrement et que je n'en sois pas au courant, le service d'ambulance aérien a toujours été en vigueur depuis les régions éloignées de la côte Sud-ouest et des alentours jusqu'à St. Anthony et les régions du Nord.

M. Peddle: Mais, à votre connaissance, il n'y a pas de service d'ambulance aérien depuis Port-aux-Basques, qui se trouve à 550 milles d'ici?

Mlle Berry: J'imagine que s'il y avait un cas d'urgence, il y en aurait.

M. Peddle: Dans un cas d'urgence?

Mlle Berry: Quelqu'un du ministère de la Santé devrait vraiment vous répondre à ce sujet-là.

M. Peddle: Un autre député a demandé aux deux dames quelle était la fréquence de leurs voyages en train. C'est impliquer tout de même que les dames doivent emprunter le train afin de venir présenter un mémoire. C'est tout comme si on disait que pour critiquer une joute de hockey, il fallait être joueur de hockey. Je ne comprends pas cela.

Le président: Pourquoi ne pas poser votre propre question, monsieur Peddle?

M. Rock: Monsieur le président, on dirait qu'on n'a pas du tout le droit de poser des questions ici? Je crois que nous avons le droit de poser les questions que nous voulons. Il est important d'obtenir ces renseignements. Je voudrais savoir si ces gens qui présentent des mémoires aujourd'hui, ont aussi voyagé en train? J'ai le droit de le savoir.

Le président: Monsieur McGrath?

M. McGrath: J'aimerais soulever une question de principe, monsieur le président, parce que c'est peut-être un oubli tout simplement de votre part. Des dispositions ont été prises pour que nous fassions la tournée des installations ferroviaires aujourd'hui à 4 heures, et je n'aurais pu penser à un meilleur moyen de terminer que de remercier ces deux charmantes dames, pour les excellents témoignages et mémoire qu'elles ont présentés. C'est une simple suggestion que je vous fais.

Le président: Je surveille ma montre, monsieur McGrath, et nous y arriverons à temps,

[*Text*]

McGrath—as long as you have arranged everything for the tour.

Mr. McGrath: The windows are cleaned and everything.

The Chairman: Mr. Peddle, have you completed your questions? If so, Mr. Peddle is next.

Mr. Pringle: Mr. Chairman, my questions have all been amply answered, some of them a couple of times, so I will pass at this time.

The Chairman: This completes the questioning of the two charming ladies. Thank you very very much. We will adjourn until tomorrow morning at 9.30. To those who would like to go on this tour, may I say that the bus will be at the door at four o'clock.

(*End of volume I—Balance in volume II*)

[*Interpretation*]

à condition que vous ayez pris toutes les dispositions.

M. McGrath: Les fenêtres sont propres et tout est prêt.

Le président: Monsieur Peddle, est-ce que vous avez terminé vos questions? Si oui, M. Pringle est le suivant.

M. Pringle: Oui. On a déjà amplement répondu à toutes mes questions, et deux fois à certaines d'entre elles. Donc, je cède mon tour.

Le président: Ceci met fin aux questions posées à ces charmantes dames. Merci beaucoup. Messieurs, nous levons la séance jusqu'à demain matin, 9 heures 30. Pour ceux d'entre vous qui désirez participer à cette tournée, l'autobus sera ici à la porte à 4 heures.

EVIDENCE

(Recorded by Electronic Apparatus)

Saturday, 22 February, 1969

The Chairman: Ladies and gentlemen, I ould like to welcome those who are present- g briefs here today.

We will start this morning with a presenta- on from the Newfoundland Board of Trade. ay I call the Newfoundland Board of Trade, ease. Would you come forward. I have on y right Mr. Ploughman, who will present e brief. On his immediate right are Mr. cLoughlan and Mr Ayre. I believe you ant to summarize part of your brief, Mr. loughman.

The brief is found on page 516.

Mr. Burford Ploughman (Chairman, Trans- rtation Committee, Newfoundland Board of ade): Gentlemen, in the brief that we have esented we tried to deal with some of the ajor points affecting transportation in New- undland. There are many hundreds of prob- ns here which, combined, certainly have a eat effect on the cost of living of Newfound- nders and the economic growth. It was teresting to note that the report of the oyal Commission on the Economic State and ospects of Newfoundland and Labrador, hich was released after we presented our ief last spring, substantiates a number of e points contained in our brief.

One point we made was that over 90 per nt of our traffic into Newfoundland is car- , goods consumed and so on, which origi- tes from central Canada or a point west of ontreal. There is not a two-way flow of affic. You do not have the freight moving ck into central Canada. One of the tables in e Economic Prospects Commission report dicates that in 1965 the eastbound tonnage as 570,000 tons, whilst the westbound ton- ge was 50,000 tons. So this gives you some dication of what I mean by the imbalance the flow of traffic. It certainly adds a great al to the cost of operation for the two main rriers, the CNR and Clarke Steamships.

We endeavoured to find out what the total st for freight was coming in from the main-

TÉMOIGNAGES

[Enregistrement électronique]

Le samedi 22 février 1969

Le président: Mesdames et messieurs. J'aimerais souhaiter la bienvenue à ceux qui ont un mémoire à nous présenter aujourd'hui.

Nous allons commencer, ce matin, par le mémoire du *Newfoundland Board of Trade*. Je demanderais aux représentants de cet organisme de venir à l'avant de la salle. Merci. A ma droite, M. Burford Ploughman, celui qui va nous présenter le mémoire, à sa droite, MM. James W. McLoughlan et Anthony G. Ayre. J'ai l'impression, monsieur Ploughman, que vous voulez résumer une partie de votre mémoire.

On trouvera le mémoire à la page 516 du compte rendu.

M. Burford Ploughman (président du comité des transports, Newfoundland Board of Trade): Messieurs, dans le mémoire que nous avons présenté, nous avons voulu traiter de certains points importants concernant les transports à Terre-Neuve. Il y a des centaines de problèmes ici qui, tous ensemble, ont certainement une grande influence sur le coût de la vie des Terre-Neuviens ainsi que sur la croissance économique de la province. Chose intéressante, le rapport de la Commission royale d'enquête sur la situation économique et les perspectives de Terre-Neuve et du Labrador, lequel a été publié après la présentation de notre mémoire, le printemps dernier, appuie un certain nombre des arguments que nous avions invoqués.

L'un d'eux, c'est que plus de 90 p. 100 du trafic vers Terre-Neuve consiste en marchandises et en biens provenant du centre du Canada et de points à l'ouest de Montréal. C'est un trafic à sens unique, car peu de marchandises venant de Terre-Neuve atteignent le centre du Canada. L'un des tableaux qui figurent dans le rapport de la Commission fait voir qu'en 1965, le volume de marchandises à destination de l'Est totalisait 570,000 tonnes contre 50,000 à destination de l'Ouest. On voit ainsi l'écart immense entre les deux. Voilà qui contribue beaucoup à faire hausser les frais d'exploitation pour les deux principaux transporteurs, le National-Canadien et *Clarke Steamships*.

Nous avons essayé d'établir les frais de transport des marchandises destinées à Terre-

29692—9½

[*Text*]

land of Canada here to Newfoundland, and I think it would have been interesting to know what the per capita cost of freight is to the people of Newfoundland. I was disappointed to find out that these figures are not available. I do not think they are available even to the provincial government or to the federal government. You gentlemen are here today to listen to problems on transportation and as far as I am concerned I think this is one of the most vital figures that we should know.

I have come up with an estimate, and it is purely an estimate because I do not have all the available figures, but I estimate that the cost of freight for the average family in Newfoundland is $500. And I want to repeat that figure—$500 per family in Newfoundland. To give you an example of what I mean, let us take Ontario as an example. Ninety per cent of the food that they consume is either processed or grown in Ontario. Here in Newfoundland it is only 10 per cent, so we have to bring in over 90 per cent from central Canada. And a large part of this $500 that Newfoundland has had to pay is in addition to what someone would have to pay in central Canada or in some other part of Canada. We feel this is one of the most important points in our brief that we would like to discuss. If we are speaking of regional disparity or trying to overcome it, I think transportation is one of the main areas, as far as Newfoundland is concerned, for which we have to try to find some solutions.

We would strongly recommend that the transportation authorities of the federal and provincial governments undertake a short-range and a long-range study of our transportation problems. The short-range study could deal with extending the freight rate freeze on present rates and extending subsidies to other carriers and so on. With respect to the long-range study, we feel here that transportation cannot be considered as a separate entity.

We feel that this study should be made in consultation with the new federal Department of Regional Economic Expansion and its counterpart in the provincial government. For example—and I am not suggesting that this has happened in the case of the provincial government—it would be pointless to spend millions of dollars in paving roads to communities which will be phased out 10 or 20 years from now. We feel that if the provincial and federal governments have a policy of centralization in Newfoundland, this has to be taken into account in the long-term study to make certain that the moneys—and there is only a limited amount of money available—are going to be utilized in the best possible way. And that, gentlemen, is just my summary of the brief.

[*Interpretation*]

Neuve et provenant de la partie continental du Canada. Il aurait été intéressant, je pens de savoir à quoi s'établissent ces frais par têt d'habitant à Terre-Neuve; je suis désolé qu personne, même le gouvernement provincia ou le gouvernement fédéral, n'ait de telle données. Messieurs, vous êtes ici, aujourd'hu pour connaître les problèmes relatifs a transport; or j'estime qu'il importerait a plus haut point de tenir de tels renseigne ments.

J'ai tenté d'en faire une estimation, je di bien une estimation, car je n'ai pas tous le chiffres en main, et j'en suis arrivé à un moyenne de $500 par famille terre-neuvienne Je le répète, $500 par famille. Aux fins d comparaison, prenons l'Ontario, par exemple Là 90 p. 100 des biens de consommation pro viennent de la province même, tandis qu' Terre-Neuve, c'est seulement 10 p. 100, d sorte que le reste doit venir du Canada cen tral. En outre, une grande partie de ces $50 est en sus de ce que les gens paient dans l Canada central ou ailleurs au pays. Nou trouvons que c'est un des points les plu importants de notre mémoire, un dont nou aimerions discuter. On parle de disparité régionales, de les éléminer; dans cette opti que, je crois que les transports constituen pour Terre-Neuve le domaine le plus impor tant pour lequel il faut trouver une solution.

Nous recommandons fortement que le autorités fédérales et provinciales, en matièr des transports, entreprennent des études court et à long terme de nos problèmes d transport. L'étude à court terme pourrai avoir pour objet le gel des tarifs-marchandi ses actuels, le financement des autres trans porteurs, et ainsi de suite. Quant à l'étude long terme, nous ne croyons pas que la ques tion des transports doive être isolée.

Cette étude devrait se faire en collaboratio avec le nouveau ministère de l'Expansion éco nomique régionale et avec son homologu provincial. Ainsi—et je ne prétends pas que l chose se soit produite au palier provincial—i est inutile de paver des routes à coût de mil lions de dollars pour des localités qui son appelées à disparaître d'ici 10 ou 20 ans. Si l province et le gouvernement fédéral adopten une politique de centralisation à l'égard d Terre-Neuve, il faudrait en tenir compte dan l'étude à long terme, pour être bien sûr qu les fonds, déjà limités, sont employés à bo escient. Voilà, messieurs, un bref résumé d mon mémoire.

Texte]

The Chairman: Thank you very much. Mr. Rose.

Mr. Rose: Mr. Ploughman, I notice that on page 517 of your brief you say that you are a captive market for various manufacturing centres in Ontario and Quebec. Do you not also feel that the businessmen in Newfoundland have a captive market for goods that they sell here?

Mr. Ploughman: Not to the same extent. It is a captive market providing we have the manufacturing facilities and the industry here in Newfoundland that you may have in central Canada or in other parts of Canada.

Mr. Rose: Let us not limit it to manufactured goods but let us think of the goods that are imported. It has been said that there is an advantage taken of the people here by local businessmen in charging more, perhaps, or all that the traffic will bear. Does that not work to the disadvantage of the people here in Newfoundland—on the matter of the cost of imported goods that are retailed through the local business groups, whether they are merchants or wholesalers, or whatever they are? In other words, it is not really competitive here because there is not any real competition for these sales.

Mr. Ploughman: I would disagree with that strongly. There is competition. I do not know of any product being sold in Newfoundland today where you have only one firm selling that particular product. You do have competition. Do you know of any commodities on which anyone has a monopoly?

Mr. Rose: No. I am not acquainted with that part of it. What I have raised a number of times during these hearings is a matter of great concern to me, whether subsidies to transportation or any other subsidies ultimately reach the people who need it most, and this is why I raised the question with you.

Mr. Ploughman: I would agree with you here. We question as well whether the subsidy does eventually reach the consumer. But the question is whether the carriers involved—and there is only one carrier, which is the CNR which I understand receives certain subsidies—pass this on, and gain because of their costing procedures.

Mr. Rose: Therefore I take it that you are saying, and I am not trying to put words in

[*Interprétation*]

Le président: Merci beaucoup. Monsieur Rose.

M. Rose: Monsieur Ploughman, à la page 517 de votre mémoire, vous dites que Terre-Neuve constitue un marché circonscrit pour diverses villes industrielles de l'Ontario et du Québec. Ne croyez-vous pas que les commerçants de Terre-Neuve aient aussi un marché circonscrit à l'égard des produits qui se vendent ici?

M. Ploughman: Pas dans la même mesure. C'est un marché circonscrit à condition d'avoir ici même à Terre-Neuve les industries et les facilités de fabrication dont jouissent le Canada central ou les autres parties du pays.

M. Rose: Ne nous limitons pas aux produits ouvrés, mais parlons aussi des importations. On dit que les commerçants d'ici abusent peut-être de leur clientèle en leur comptant plus qu'il ne faut ou le plus qu'ils peuvent. Cela ne joue-t-il pas au désavantage des Terreneuviens? Quant au coût des denrées importées qui sont vendues ici, en gros ou au détail, que sais-je, n'est-il point vrai que la concurrence ne joue pas ici, vu les circonstances qui y règnent?

M. Ploughman: Je ne puis vraiment pas en convenir. Il y a certainement une concurrence qui s'exerce; en fait, je ne connais actuellement aucun produit qui soit vendu à Terre-Neuve que par une seule société commerciale. Il y a certainement de la concurrence. Connaîtriez-vous une seule denrée qui soit l'objet d'un monopole?

M. Rose: Non, mais je connais peu ce domaine. La question que j'ai soulevée à plusieurs reprises au cours de nos séances, celle qui me préoccupe beaucoup, c'est de savoir si les subventions octroyées pour les transports ou à d'autres fins profitent en dernière analyse à ceux qui en ont le plus besoin. Voilà pourquoi je vous ai posé cette question.

M. Ploughman: A cet égard, j'abonde dans le même sens. Nous aussi, nous demandons si ces subventions parviennent à la longue aux consommateurs? Les transporteurs en cause—et il n'y en a qu'un, effectivement, soit le CNR, qui est financé, sauf erreur, dans une certaine mesure—en font-ils bénéficier les consommateurs, suivant leurs systèmes de comptabilité, voilà la question.

M. Rose: En d'autres termes, sans vouloir vous souffler les mots, vous dites, n'est-ce

[*Text*]

your mouth—please disagree if you feel that way about it—that if the subsidy is not passed on it is not because of any action on the part of the local businessmen but it is laid directly to the door of the carrier. Do you agree with me?

Mr. Ploughman: Right. That is correct.

Mr. Rose: Mr. Ploughman, you asked in your brief under your recommendations on page 518, point (vii), to discuss alternative modes of transportation. You said you had hoped that you would have an opportunity to discuss this when you appeared this morning. Is that not what your brief says?

> Nevertheless we would appreciate your providing us with an opportunity to discuss important aspects of...

alternative modes of transportation. I do not quote you. I paraphrase you.

The Chairman: On what page do you quote from?

Mr. Rose: Page 518, point (vii).

Mr. Ploughman: Is there any particular mode that...

Mr. Rose: It was our request and I was giving you this opportunity, but let us pass on from that for the moment. Would you like to comment on the suggestion that has been made throughout the Atlantic Provinces that there be a rationalization of licensing throughout the Atlantic Provinces agreed to by the various provinces so that trucking could move freely throughout the various provinces without the impediments of various licensing and other regulations which are provincial regulations?

Mr. Ploughman: Yes. This would certainly be of help to the truckers and also would result in savings to the...

Mr. Rose: Do you agree with the concept of Atlantic union?

Mr. Ploughman: With Atlantic union? Political union?

Mr. Rose: Yes.

Mr. Ploughman: As an individual, I would like to see a study made of this and after I see the results of the study... Personally I think it might be a good thing, but I cannot speak for the Board of Trade on this.

Mr. Rose: Thank you.

The Chairman: Mr. Horner.

Mr. Horner: Mr. Chairman, first of all I would like to congratulate Mr. Ploughman for

[*Interpretation*]

pas, que si la subvention n'atteint pas le consommateurs, la faute n'en est pas au commerçants locaux, mais aux transporteurs?

M. Ploughman: C'est exact.

M. Rose: Monsieur Ploughman, au chapitr des recommandations, page 518, section vi de votre mémoire, vous préconisez des discus sions au sujet d'autres modes de transpor Vous espériez avoir l'occasion d'en parler c matin, n'est-ce pas? Il est dit dans votr mémoire que:

> ...néanmoins, nous aimerions bien avoi l'occasion de discuter plusieurs aspect importants...

des autres modes de transport. Je ne cit point, je reprends la phrase à mon compte.

Le président: Où en êtes-vous?

M. Rose: Page 518, section vii.

M. Ploughman: Y a-t-il un mode particulie auquel vous faites allusion?

M. Rose: Tel que vous le demandiez, j'a voulu vous en fournir l'occasion, mais passon pour le moment. Que pensez-vous de ce qu l'on propose pour les provinces de l'Atlanti que, soit que l'on y rationalise la délivranc des permis d'exportation, avec l'assentimen des provinces, afin que les camionneurs puis sent y circuler librement sans être gênés pa les divers règlements et dispositions établi par les provinces?

M. Ploughman: Je crois que cela aiderai les camionneurs et qu'on pourrait réalise ainsi des économies...

M. Rose: Êtes-vous en faveur de l'union de provinces de l'Atlantique?

M. Ploughman: Vous voulez dire au poin de vue politique?

M. Rose: Oui.

M. Ploughman: A titre personnel, j'aimerai bien qu'on en fasse l'étude et quand j'en aura vu le résultat...D'après-moi, ce serait peut être une bonne chose, mais je ne puis parle au nom du Board of Trade à ce sujet.

M. Rose: Merci.

Le président: Monsieur Horner?

M. Horner: Monsieur le président, j'aime rais d'abord féliciter monsieur Ploughman

[*Texte*]

aling with the difference between horizon- freight rates and flat freight rates because s is a problem we have had trouble with in stern Canada. I have been listing a number recommendations that I would like the mmittee to accept after we have started to aw up our brief. On page 518 you suggest it special consideration should be given to eduction in rates on eastbound freight.

We had a brief from the Mayor of Halifax, I lieve it was, suggesting that there should a reduction on raw materials moving east o the Maritimes. The person presenting t case convinced me that there was some tification for his argument. Would that isfy you, or are you referring to finished oducts?

Mr. Ploughman: We are referring to ished products.

Mr. Horner: Finished products?

Mr. Poughman: Yes. Certainly on raw terials this would help as well, but mainly were thinking of finished products.

Mr. Horner: You agree of course with other ggestions that were made, that there should an equal rate from Halifax to St. John's, there is from Montreal to St. John's. In ier words, the Maritimes, as much as possi-, should be a viable entity in themselves. you understand what I mean—the rate ould not really prohibit the Maritimes from ding among themselves.

Mr. Ploughman: No, I would agree. If we n trade within the provinces, certainly we uld like to do this.

Mr. Horner: With regard to coastal ser-es, you suggest that if any of them are ne away with the money certainly should spent in a system of trunk roads. Is there, your opinion, a moral or legal obligation the CNR under the terms of Confederation maintain a coastal service to areas that ve no road or railway service.

Mr. Ploughman: Yes, I think there is a gal responsibility on the part of the CNR to aintain coastal services, and they do. The NR does receive a subsidy from the federal vernment for the operation of such a vice.

Mr. Horner: In your opinion—and you are presenting the Board of Trade for the ole province of Newfoundland...

[*Interprétation*]

d'avoir parlé de la différence qui existe entre les tarifs marchandises horizontaux et les tarifs marchandises fixes. C'est un problème que nous avons eu à envisager dans l'ouest du Canada. J'ai énoncé plusieurs recommandations que je voudrais que le comité accepte quand il rédigera son mémoire. A la page 518, vous suggérez qu'on accorde une attention spéciale à la réduction des tarifs pour les marchandises à destination de l'Est.

Nous avons reçu un mémoire du maire d'Halifax, je pense, qui propose de baisser les tarifs concernant les matières premières destinées aux Maritimes. La personne qui m'a présenté le mémoire m'a convaincu qu'il y avait des explications pour cela. Est-ce que cela vous satisferait ou est-ce que vous parlez des produits ouvrés?

M. Ploughman: Nous parlons des produits ouvrés.

M. Horner: Des produits ouvrés?

M. Ploughman: En effet. Pour ce qui est des matières premières, cela aiderait certainement aussi, mais principalement, nous songions aux produits ouvrés.

M. Horner: Vous êtes d'accord évidemment avec d'autres suggestions qui ont été formulées à l'effet qu'il y ait un taux égal entre Halifax et Saint-Jean tout comme cela existe de Montréal à Saint-Jean. En d'autres termes, les provinces Maritimes, autant que possible, devraient constituer une entité viable, vous comprenez ce que je veux dire. En d'autres termes, les taux ne devraient pas empêcher les provinces Maritimes de commercer entre elles.

M. Ploughman: Oh non, je suis tout à fait d'accord que le commerce intra-provincial devrait exister. Nous aimerions voir cela.

M. Horner: Au sujet des services côtiers, vous dites que si on en élimine un, l'argent devrait certainement être dépensé pour un réseau de routes principales. Y a-t-il, selon vous, une obligation morale ou légale de la part du CNR, aux termes de la Confédération, de continuer à entretenir le service côtier pour les régions qui n'ont pas de service ferroviaire ou de service routier?

M. Ploughman: Je crois, en effet, qu'il existe une obligation légale pour le CNR de maintenir les services côtiers et il le fait. Le CNR reçoit une subvention du gouvernement fédéral pour l'exploitation d'un tel service.

M. Horner: A votre avis, et vous représentez le Board of Trade de toute la province de Terre-Neuve, si j'ai bien compris?

[*Text*]

Mr. Ploughman: Yes, that is correct.

Mr. Horner: ...would you say, the CNR has lived up to this obligation of providing coastal services?

Mr. Ploughman: Yes, but I think at the time of union this service was much more vital than it is today. Roads have been extended into certain areas where there is no longer the necessity of a steamship operation.

Mr. Horner: I fully understand that. But where there is no road coastal services are still provided and are very necessary.

Mr. Ploughman: Yes.

Mr. Horner: Would you say that where coastal services have been removed the money in fact saved has gone into the building of a trunk roads system.

Mr. Ploughman: No, I would not say that.

Mr. Horner: You would not say that.

Mr. Ploughman: No. Any saving on the part of the CNR would really mean that it, the CNR, would receive less subsidy. In other words, if one year there was a $9 million deficit then the federal government would pay the $9 million. The federal government pays.

Mr. Horner: Yes.

Mr. Ploughman: But there is no understanding, as far as I am concerned, that any savings is going to be applied.

Mr. Horner: This is the point you are attempting to make in number 17 in your brief—that you believe there should be a greater relationship between money saved and money spent on the trunk roads.

Mr. Ploughman: That is right. We would like to see the federal government paying a large part. Let us use the Burin Peninsula as a good example. There is a steamship service to the Burin Peninsula at the moment. There is approximately 40,000 people there. If the federal government decided to pay a larger share of the cost of roads to that area they could probably phase out the steamship service to that area. This in effect is what we were saying.

Mr. Horner: I have just one further question on the bus service. The bus service is supposed to be on a trial basis in lieu of the *Newfoundland Bullet*. I was on the bus and

[*Interpretation*]

M. Ploughman: C'est exact.

M. Horner: A votre avis, est-ce que le C a rempli ses obligations en matière de serv côtier?

M. Ploughman: Oui, mais je crois qu moment de l'union, ce service était beauc plus nécessaire qu'il ne l'est à l'heure actue Vous avez des routes maintenant qui ont prolongées dans certaines localités où il n' plus nécessaire d'avoir un service de navir vapeur.

M. Horner: Je comprends, mais là où il a pas de routes, les services côtiers existent ils sont toujours nécessaires.

M. Ploughman: Oui, c'est exact.

M. Horner: Et, est-ce que vous diriez q là où on a enlevé les services côtiers, l'arge effectivement épargné a servi à la constr tion du réseau de routes principales?

M. Ploughman: Non, ce n'est pas ce que dirais.

M. Horner: Vous ne le diriez pas.

M. Ploughman: Non. Toute épargne de part du CN, signifierait simplement que le recevrait moins de subventions. En d'aut termes, si dans une année le déficit était d millions de dollars, le gouvernement fédé compenserait pour les 9 millions. C'est le go vernement fédéral qui paie.

M. Horner: En effet.

M. Ploughman: Il n'y a pas eu d'entente, ma connaissance, que l'argent épargné ser rait à d'autres fins.

M. Horner: C'est le point que vous essay de signaler au numéro 17 de votre mémoi Vous estimez qu'il doit y avoir une meilleu coordination entre l'argent épargné et l'arge dépensé pour les routes principales.

M. Ploughman: Oui. Nous aimerions voir gouvernement fédéral payer une grande pa Prenons la péninsule de Burin comme exe ple. Il y a, à l'heure actuelle, un service navires à vapeur pour la péninsule et population est d'environ 40 mille habitants. le gouvernement fédéral décidait de pay une plus grande part du coût des routes po cette région, il pourrait peut-être éliminer service de navires à vapeur dans cette régio En fait, c'est ce que nous disions.

M. Horner: Une dernière question en ce q a trait au service des autobus. Le service d autobus est censé être une expérience po remplacer le train Bullet. J'ai pris l'autob

[*Texte*]

he *Bullet* last night and I enjoyed the ride very much. But one thing I noticed, and I want your advice on it, is that in coming back on the bus the road appeared to me to be far narrower than our Trans-Canada Highway across the rest of Canada.

Mr. Ploughman: Which route did you take.

Mr. Horner: It went up to Holyrood and came back on the Trans-Canada Highway.

Mr. Ploughman: That is our widest road.

Mr. Horner: With that thought in mind, would you say that in heavy snow conditions across the mainland of Newfoundland to Corner Brook and Port aux Basques it is wide enough to provide safe service? We have had briefs suggesting that it is not and that is why I am asking you.

Mr. Ploughman: I think this depends on the volume of traffic. In certain areas of Newfoundland it may be wide enough today but in other areas, probably between here and Holyrood where you have a large volume of traffic, it may not be wide enough.

Mr. Horner: Are you aware of any accidents that have occurred? In other words, is the bus safety factor one that this Committee should consider?

Mr. Ploughman: I would say that the safety factor is important in any aspect. But, as far as the Board of Trade is concerned, we have already made a statement. We have supported the operation of the busses with the understanding that the passenger service would continue to a point where we could make a proper judgment of this. We have not gone on record really as saying that we favour the discontinuance of the passenger service.

The Chairman: Mr. Skoberg.

Mr. Skoberg: I have a suppelmentary question, Mr. Chairman. In view of the type of winter you are having now, do you think you can make a fair judgment on the merits of bus versus train operations?

Mr. Ploughman: No. I think we are earlier this winter. We did have a fair amount of

[*Interprétation*]

et le Bullet hier soir et j'ai beaucoup aimé le voyage. Mais, il y a une chose que j'ai remarquée et j'aimerais avoir votre avis à ce sujet. En revenant par autobus, j'ai eu l'impression que la route était de beaucoup plus étroite que la route transcanadienne ne l'est ailleurs au Canada.

M. Ploughman: Quelle route avez-vous empruntée?

M. Horner: Nous sommes allés à Holyrood et nous sommes revenus par la route transcanadienne.

M. Ploughman: C'est là la route la plus large.

M. Horner: A votre avis, donc, quand il y a beaucoup de neige, à travers Terre-Neuve jusqu'à Corner Brook et Port aux Basques, est-ce que vous diriez que la route est assez large pour assurer un service sûr? Nous avons eu des mémoires nous indiquant qu'elle ne l'est pas, c'est pour cela que je vous en parle.

M. Ploughman: Je crois que cela dépend du volume de la circulation. Dans certaines régions de Terre-Neuve, il se peut que la route soit assez large, mais dans d'autres régions, disons entre ici et Holyrood, où vous avez une plus grande circulation, il se peut que la route ne soit pas assez large.

M. Horner: Êtes-vous au courant d'accidents qui se seraient produits? En d'autres mots, est-ce que le facteur de sécurité, pour ce qui est des autobus, devrait être pris en considération par notre Comité?

M. Ploughman: Je dirais que le facteur sécurité est toujours important. Mais en ce qui concerne le Board of Trade, nous avons déjà fait une déclaration et nous avons dit que nous appuyions l'exploitation du service d'autobus, compte tenu du fait que le service ferroviaire pour les voyageurs pourrait continuer pendant un certain temps afin de nous permettre de l'évaluer. Nous n'avons pas déclaré que nous étions en faveur de la discontinuation du service ferroviaire pour les voyageurs.

Le président: Monsieur Skoberg.

M. Skoberg: Une question supplémentaire, monsieur le président. Vu le genre d'hiver que vous avez à l'heure actuelle, est-ce que vous seriez en mesure de juger raisonnablement du service des autobus comparativement à celui des trains?

M. Ploughman: Non, je ne crois pas, car nous sommes en avance cet hiver. Il est vrai

[*Text*]

snow, but we have had a relatively mild winter since then. Next year the snowfall could be three or four times what it is this year. So I do not think you could really make a judgment on the basis of the winter we are having this year.

Mr. Skoberg: In your opinion, sir, and in the opinion of your Board, do you consider a trial period should be extended in order to give this a fair test?

Mr. Ploughman: Yes, we would because this has not been a winter where we have had a lot of snow and from the weather aspect it would not be a fair trial.

Mr. Rock: A further supplementary, Mr. Chairman.

The Chairman: Mr. Rock.

Mr. Rock: Has the *Newfoundland Bullet* itself ever been struck in a severe winter?

Mr. Ploughman: Yes.

Mr. Rock: Why the comparison then? You are basing everything on a severe winter, as if a severe winter will only harm your highways and not your railways.

The Chairman: Order please.

Mr. Ploughman: I think there is also the safety aspect. I think the train would be safer in the winter than a bus. If we were experiencing very heavy snowfalls continuously throughout the winter I think the safety factor would be a consideration—I think it would be safer on the train than it would be on the bus.

The Chairman: Mr. Mahoney.

Mr. Mahoney: Sir, you refer in your brief to the fact that 90 per cent of your freight movement is incoming, presumably 10 per cent outgoing, and then you gave us the figures of a 50,000 ton outflow and 570,000 ton inflow. Is that a gross figure for the whole province or are you talking about the Avalon Peninsula?

Mr. Ploughman: No, this would be a gross figure for the province.

Mr. Mahoney: Including the timber movements from Price, Bowater's and so on?

[*Interpretation*]

que nous avons eu passablement de neige mais l'hiver a été plutôt doux depuis ce temps. L'an prochain nous pourrions avoir 3 ou 4 fois plus de neige qu'on en a eu cette année. Et alors, je ne crois pas qu'il soit possible de faire un jugement d'après l'hiver que nous avons cette année.

M. Skoberg: A votre avis et selon votre *Board of Trade* est-ce que la période d'essai devrait être prolongée afin d'avoir une expérience plus raisonnable?

M. Ploughman: Oui, étant donné que cet hiver ne nous a pas apporté beaucoup de neige et que du point de vue du climat ce ne serait vraiment pas une bonne expérience cette année.

M. Rock: Est-ce que je pourrais poser une question supplémentaire, monsieur le président?

Le président: Monsieur Rock.

M. Rock: Pendant les hivers rigoureux, est-ce que le *Bullet* a déjà été pris dans la neige?

M. Ploughman: Oui.

M. Rock: Et alors où trouvez-vous votre comparaison? Vous fondez toute votre argumentation sur un hiver rigoureux, tout comme si l'hiver allait affecter vos routes seulement, mais non vos chemins de fer.

Le président: A l'ordre, s'il vous plaît.

M. Ploughman: Je crois qu'il y a aussi l'aspect de la sécurité. Je crois que le train serait peut-être plus sûr en hiver que l'autobus. S'il y avait continuellement des chutes de neige abondantes, au cours de l'hiver, le facteur de sécurité serait certainement important. Je crois que vous seriez plus sûr en train qu'en autobus.

Le président: Monsieur Mahoney.

M. Mahoney: Monsieur, vous avez parlé dans votre mémoire du fait que 90 p. 100 du transport des marchandises viennent vers Terre-Neuve alors que 10 p. 100 en sortent. Ensuite, vous avez donné les chiffres de 50,000 tonnes en produits sortant et 570,000 tonnes qui entrent. Est-ce que ce sont les chiffres pour toute la province ou parlez-vous de la péninsule Avalon?

M. Ploughman: Non, il s'agit des chiffres pour toute la province.

M. Mahoney: Y compris le transport du bois de Price, Bowater's et ainsi de suite?

[*Texte*]

Mr. Ploughman: This figure is taken from he report of the Royal Commission on the conomic State and Prospects of Newfoundnd and Labrador.

Mr. Mahoney: For what year, sir.

Mr. Ploughman: 1965.

Mr. Mahoney: Since that time have the ood industries expanded quite substantially nd, if so, do you feel there would be some gnificant difference in that ratio now?

Mr. Ploughman: I could not honestly say hether the ratio has changed because I ould imagine the eastbound volume has creased considerably since then as well.

Mr. Mahoney: Implicit in these figures then the fact that an awful lot of equipment is eadheading west.

Mr. Ploughman: Yes, that is correct.

Mr. Mahoney: Do you visualize such a evelopment of industry here that it could ventually eliminate this discrepancy?

Mr. Ploughman: This is what we would ke. I think this would be the answer to our roblem. I mentioned in the brief the Macherson Royal Commission on Transportation. heir report indicated that as far as the ansportation environment of Canada was ncerned—they were looking at Canada as a hole—it reached a point where it was very mpetitive now and there was no longer the me necessity for the federal government to ke the same interest as far as subsidies and on are concerned.

If I could use an example, back in the 00's the federal government of Canada was uite prepared to build railways out west to pen up Canada and the revenue from the heat and so on that moved over the rails as certainly well below what the cost of the il service was. Since then this has changed ecause you do have different modes of transrtation and much more vigorous mpetition.

Here in Newfoundland I do not contend we ave this. We only have two major carriers, e CNR and Clarke Steamships, carrying ost of the volume from the mainland of anada here to Newfoundland.

Mr. Mahoney: I think anyone from western anada who looks back to the 19th century

[*Interprétation*]

M. Ploughman: Les chiffres sont tirés, comme je l'ai dit, du rapport présenté par la Commission royale d'enquête sur l'état et les possibilités économiques de Terre-Neuve et du Labrador.

M. Mahoney: Pour quelle année, monsieur?

M. Ploughman: Pour 1965.

M. Mahoney: Depuis ce temps, l'industrie du bois s'est-elle accrue sensiblement, et, si tel est le cas, y a-t-il, selon vous, une différence marquée dans ce rapport à l'heure actuelle?

M. Ploughman: Je ne saurais dire honnêtement si le rapport a changé, car j'ai l'impression qu'il y a eu une augmentation considérable aussi dans les produits vers l'est.

M. Mahoney: Il ressort donc de ces chiffres qu'il y a beoucoup de matériel qui se dirige directement vers l'ouest?

M. Ploughman: Oui, c'est exact.

M. Mahoney: Est-ce que vous entrevoyez le développement de l'industrie ici, qui pourrait à la longue éliminer ces disparités?

M. Ploughman: C'est ce que nous voudrions voir. Ce serait en fait la solution à nos problèmes. J'ai mentionné dans le mémoire le rapport de la Commission royale d'enquête MacPherson sur les transports. Et, dans ce rapport, on indique que, pour ce qui est du milieu des transports au Canada, on a pris le Canada dans son ensemble, nous en sommes arrivés à un point où il y a beaucoup de concurrence et il n'y a plus la même nécessité pour le gouvernement fédéral de s'y intéresser autant sous forme de subventions, par exemple.

Comme exemple, je pourrais dire qu'au 19e siècle le gouvernement fédéral était très consentant à construire des lignes de chemin de fer dans l'Ouest afin de développer le Canada et les revenus provenant du blé, par exemple, transporté sur rails, étaient de beaucoup inférieur au coût du service ferroviaire. Mais, depuis ce temps, cela a changé, car vous avez des modes de transport différents et la concurrence est beaucoup plus vigoureuse maintenant.

Ici à Terre-Neuve, je prétends que nous n'avons pas cette concurrence. Nous n'avons que deux compagnies, le CNR et la «Clarke Steamships» qui sont les transporteurs de la plus grande partie des denrées qui nous viennent du Canada, de la terre ferme, jusqu'ici.

M. Mahoney: Aucun habitant de l'Ouest du Canada, en revoyant le 19e siècle, ne serait

[*Text*]

would disagree that there was really much important competition in transportation. It was pretty well the CPR.

Mr. Ploughman: This is the point I am making. There was no competition then but there is today. We do not have this competition in Newfoundland.

Mr. Rose: On a point of order, Mr. Chairman, I would like to comment that nobody from British Columbia ever looks back to the nineteenth century, we look ahead.

Mr. Mahoney: It would not hurt at all if you took a look at yourselves sometime! There is not really much, though, in the figures you have given us that would really interest a competitive transportation system, is there? It seems to me that the trade is even pretty slim for the people who are trying to handle it now.

Mr. Ploughman: This goes back to your original question when you asked about industry. This is the answer. As a Board of Trade, if we had this two-way flow of traffic, if we had the industry and if we had a competitive situation we would not want the federal government to pay the cost. We do not have it and because of this we feel that the federal government...

Mr. Mahoney: What types of industry do you feel can be realistically expected within the foreseeable future to develop and to help this out?

Mr. Ploughman: That is a question that you probably should have asked the government when they appeared yesterday. When I say "the government", I think a large part of the industry that has been developed in Newfoundland has been through the—and I suppose the same would apply to any province...

Mr. Mahoney: As businessmen you must have some ideas, though, and hopefully you pass them on to the government, or do you wait for them to give you the word?

Mr. Ploughman: No, we pass them on. As you probably are aware, there are certain planned developments in Newfoundland at the moment. You should be familiar with Come-By-Chance.

Mr. Mahoney: I am indeed.

Mr. Ploughman: Stephenville, and other areas of Canada. Of course, there is the fishery again, which is most important.

[*Interpretation*]

d'accord qu'il y avait beaucoup de concu rence. Il n'y avait à peu près que le C.P.R.

M. Ploughman: C'est le point que je désir souligner. Il n'y avait pas de concurrenc alors, mais maintenant il y en a. Nous n'avor pas cette concurrence à Terre-Neuve.

M. Rose: Un rappel au règlement, monsieu le président. J'aimerais mentionner que le gens de la Colombie-Britannique ne se repor tent jamais vers le 19e siècle. Ils se porter toujours vers l'avenir.

M. Mahoney: Cela ne vous ferait pas d tort du tout de vous regarder un peu. Le chiffres que vous nous avez donnés, ne nou indiquent pas vraiment l'intérêt que pourra avoir un réseau concurrentiel de transpor n'est-ce pas? Il me semble que le commerc n'est pas assez élevé même pour les gens qu s'en occupent présentement.

M. Ploughman: Ceci se rattache à votr première question lorsque vous avez abord l'industrie. C'est là la réponse. En tant qu *Board of Trade*, si nous avions ce couran dans les deux sens, si nous avions l'industrie si nous avions une situation concurrentielle nous ne voudrions pas que le gouvernemen fédéral en assume les frais. Comme nous n les avons pas, nous croyons que le gouverne ment fédéral . . .

M. Mahoney: Quel genre d'industrie, votre avis, pourrait vraiment s'installer ic dans un avenir prochain et aider à résoudr le problème?

M. Ploughman: C'est une question que vou auriez sans doute dû poser au gouvernemen lorsqu'il a comparu hier. Lorsque je dis «l gouvernement», je pense qu'une bonne parti de l'industrie de Terre-Neuve a été établie pa l'entremise du—et j'imagine que la mêm observation vaut pour les autres provinces.

M. Mahoney: Mais en tant qu'homm d'affaires, vous devez avoir certaines idées J'espère que vous en avez fait part au gou vernement, ou est-ce que vous attendez qu'i vous sollicite?

M. Ploughman: Non, nous les communi quons. Comme vous le savez sans doute, nou projetons certains aménagements à Terre Neuve présentement. Vous avez sans dout entendu parler de Come-by-Chance.

M. Mahoney: Certainement.

M. Ploughman: Stephenville et d'autre régions du Canada. Il y a aussi les pêcherie qui sont très importantes.

[Texte]

Mr. Mahoney: Thank you.

Le président: Monsieur Godin?

M. Godin: Merci, monsieur le président. e témoin nous a révélé que 90 p. 100 des iens utilisés dans la province proviennent es importations. Pourrait-il nous dire dans uelle proportion ces produits proviennent oit des autres provinces canadiennes, soit de Angleterre ou soit de l'Europe?

Mr. Ploughman: The bulk of the products ould come from Canada. Prior to Confeder- ion only about 10 per cent of the goods that e used in Newfoundland came from Canada. t that time we were buying from Europe, om the United States and from other world arkets, but today I would say that well over) per cent would come from Canada. I think is raises an important point because most of e raw materials which are shipped out of ewfoundland are shipped to the United tates and to the European markets—particu- rly the United States—so from a transporta- on aspect Confederation was a disadvantage r us because, as I say, the flow of traffic efore was more from New York to St. John's nd the boats would take our raw materials own and, of course, these same boats would ring back the products that we bought.

M. Godin: A l'occasion de notre passage au ouveau-Brunswick et en Nouvelle-Écosse, n s'est rendu compte que là, il existe vrai- ent un surplus de production et que les gens nt vraiment un problème avec les mauvais oyens pour l'exportation. Est-ce que Terre- euve tente à importer davantage de ces pro- nces plutôt que du centre du Canada?

Mr. Ploughman: That is a rather difficult uestion to answer. Many of the companies iat the trade does business with are national mpanies, and if they have plants in the aritimes and it is more economically feasi- e to ship from those plants in the Maritimes Newfoundland, then this is done. I think ie people of Newfoundland, and probably of ie Atlantic provinces, are conscious of trying support each other and of trying to do usiness with each other, but this could prob- ly be done to a greater extent.

M. Godin: Selon le rapport qui nous est umis, on ne trouve pas le nom de votre ssociation dans les mémoires qui ont été umis à la Commission d'enquête. Est-ce que os idées ou vos impressions au sujet du train raient changé depuis le début de cette nquête?

[Interprétation]

M. Mahoney: Merci.

The Chairman: Mr. Godin?

Mr. Godin: Thank you, Mr. Chairman. The witness told us that 90 per cent of products used in the province are in the form of imports. Could he tell us to what extent these products come either from other provinces in Canada, or from England, or from Europe?

M. Ploughman: La majeure partie des produits viendrait du Canada. Avant la Confédération, seulement 10 p. 100 environ des produits et denrées que nous utilisions à Terre-Neuve venaient du Canada. Alors, nous achetions en Europe, aux États-Unis et parfois sur d'autres marchés mondiaux. Mais aujourd'hui, je dirais que beaucoup plus de 90 p. 100 viennent du Canada.

Ceci soulève, je pense, un point important, car la plupart de nos matières premières qui sont expédiées à partir de Terre-Neuve, le sont vers les États-Unis et vers les marchés européens, mais surtout aux États-Unis. C'est pourquoi, du point de vue du transport, la Confédération fut un désavantage pour nous, parce que le débit autrefois, allait de New York vers Saint-Jean. Nos navires apportaient alors nos matières premières à New York et ces mêmes navires rapportaient les produits que nous achetions aux États-Unis.

Mr. Godin: During our trip to New Brunswick and Nova Scotia, we noticed that there was a surplus of production and that people there really have a problem because of poor transportation means. Is Newfoundland trying to import more goods from these provinces rather than from Central Canada?

M. Ploughman: Il n'est pas facile de répondre à votre question. Bon nombre de compagnies sont des compagnies nationales et, si elles ont des usines dans les Maritimes et s'il est plus économique d'expédier à partir de leurs usines des Maritimes vers Terre-Neuve, elles le font. Je pense que les gens de Terre-Neuve et probablement des provinces de l'Atlantique, s'efforcent de s'aider les unes les autres et de commercer les unes avec les autres. Mais ils pourraient le faire dans une plus grande mesure.

Mr. Godin: According to the report submitted to us, the name of your Association does not appear in the briefs submitted to the Royal Commission of Inquiry. Have your views or your ideas changed since the beginning of this inquiry with regard to the train?

[*Text*]

Mr. Ploughman: We did not refer to the train in our brief. So you mean as far as the passenger service is concerned? I think we stated our views earlier on this. The Board of Trade took the stand—and this is no different—that we wanted to see the buses in operation, provided the service continued to the point where a proper comparison could be made of the two services.

The Chairman: Mr. McGrath?

Mr. McGrath: I notice in recommendation No. (vii) of your brief you make reference to other modes of transportation. Specifically, are you in favour of the application of the MFRA to other modes of transportation?

Mr. Ploughman: Yes, and particularly to the trucking industry as well as to the steamship industry. We feel this would certainly help to maintain this competitive position.

Mr. McGrath: How important a factor would it be if it were applied to steamship transportation? I am thinking of a Montreal-St. John's service.

Mr. Ploughman: It is a question of subsidies to carriers, and a member of the Board who is sitting in the audience raised the point at the annual meeting of the Board of Trade whether or not the subsidy should be passed on to the shippers. If it were passed on to the shippers I think there would be a better chance that the saving would be passed on to the consumer, which is what we are interested in. The main thing is being able to work out the mechanics of this. I imagine it would be very difficult.

For example, you could give a subsidy to the CNR of possibly 25 per cent, but when they get into their procedure for costing—I am not suggesting the CNR will do this—they could very well show that the cost of moving goods from Montreal to St. John's is 25 per cent more than it actually is. I am sure you are familiar with the costing procedure. How is this subsidy going to passed on to the individual?

Mr. McGrath: That is the burning question.

The Chairman: Do you have a supplementary, Mr. Perrault?

Mr. Perrault: Mr. Chairman, I just wanted to ask the witness what he estimates the cost of this subsidy extension will be. Has the Board of Trade worked out the cost on this?

[*Interpretation*]

M. Ploughman: Nous n'avons pas du tou parlé du train dans notre soumission. Voulez vous parler du service voyageur? Je pens avoir déjà fait part de notre point de vue plu tôt. Le *Board of Trade* a exprimé une lign de conduite qui n'est pas différente de la nôtre Nous voulions voir les autobus en service pourvu que le service soit ainsi mainten jusqu'à ce qu'il soit possible de faire un comparaison valable des deux services.

Le président: Monsieur McGrath?

M. McGrath: Je vois que dans la recom mandation no. (vii) de votre mémoire, vou parlez d'autres modes de transport. Êtes-vou réellement en faveur de l'application au autres modes de transport des dispositions d la Loi sur les taux de transport des marchan dises dans les provinces Maritimes?

M. Ploughman: Oui, surtout pour l'industri du camionnage et pour les lignes maritimes Nous croyons que cela nous aiderait à mainte nir une situation concurrentielle.

M. McGrath: Est-ce que ce serait un facteu important si on l'appliquait au transpor maritime? Je pense à un service Montréal Saint-Jean.

M. Ploughman: C'est une question de subsi des aux cargos. Un membre du *Board* qui es ici dans l'auditoire a soulevé ce point à l réunion annuelle du *Board of Trade* à savoi si les subventions devraient être accordée aux expéditeurs. Si on le faisait, je pense qu le consommateur aurait plus de chances d faire ces épargnes et c'est ce que nous vou lons. Il importerait surtout de mettre au poin des rouages qui nous permettraient de l faire. J'imagine que ce ne serait pas facile.

Par exemple, si vous donniez une subven tion de 25 p. 100 au National-Canadien, i pourrait, je ne dis pas qu'il le ferait, mais i pourrait établir ses coûts de façon à démon trer que le coût du transport des denrées disons de Montréal à Saint-Jean, est de 25 p 100 de plus qu'il ne l'est en réalité. Je suis certain que vous connaissez cette procédure Comment cette subvention va-t-elle être pas sée aux particuliers?

M. McGrath: C'est la question de l'heure.

Le président: Voulez-vous poser une ques tion supplémentaire, monsieur Perrault?

M. Perrault: Je veux simplement demander au témoin ce qu'il en coûterait pour cette extension des subventions. Le *Board of Trade* a-t-il essayé de calculer ce qu'il en coûterait?

[*Texte*]

Mr. Ploughman: No, we have not. All we know is that transportation costs are extremely high at the moment and if there is a 10 per cent increase it is always on a much higher base in Newfoundland because we pay a higher freight rate, and we can ill afford it because the salary levels in Newfoundland are much lower than they are anywhere else in Canada.

Mr. Perrault: We have this paradox, that some of the Maritime Provinces, of course, want lower freight rates going out of the Maritimes to the central provinces and here we have Newfoundland asking for lower rates coming in. It is going to be difficult to evolve any kind of standard policy.

Mr. Ploughman: I think in the case of Nova Scotia and New Brunswick, where there is probably more industry than in Newfoundland, that aspect could be more important. If Newfoundland had more industry I think the Maritime Freight Rates Act, which now provides these subsidies, would be more important, but it is not as important today. Our big concern today is that everything that is coming in and everything that is going out is going to New York or to Europe, or somewhere else, it is not going back to the mainland of Canada.

Mr. Perrault: Thank you, Mr. Chairman.

The Chairman: Mr. McGrath?

Mr. McGrath: As businessmen, what is the view of the Newfoundland Board of Trade regarding the present rate structure on our ferries to the mainland?

Mr. Ploughman: Again we consider that the rates are high, particularly as far as truck transport is concerned. This could be one way of bringing about a competitive situation. It would certainly help if the rates on trucks going across the gulf were lowered.

Mr. McGrath: I am surprised there is not a specific recommendation from the Board in this regard, because it would appear to me to be a very important point in considering any other modes of transportation.

I have one other question which is in a new area and it is something that is not referred to in the brief. How does the Board feel about the present air services from the mainland to Newfoundland?

[*Interprétation*]

M. Ploughman: Non. Nous savons seulement que les frais de transport sont très élevés en ce moment et que, s'il y a une augmentation de 10 p. 100, l'augmentation de base est toujours beaucoup plus élevée à Terre-Neuve parce que le tarif marchandise est plus élevé et pourtant nous pouvons difficilement nous le permettre parce que le niveau des salaires à Terre-Neuve est bien moins élevé que n'importe où ailleurs au Canada.

M. Perrault: C'est un paradoxe. Certaines des provinces Maritimes veulent un tarif inférieur sur les marchandises allant des Maritimes vers les provinces centrales tandis qu'à Terre-Neuve c'est le contraire. Il sera assez difficile d'établir une politique normalisée.

M. Ploughman: Je pense que cet aspect pourrait être plus important pour la Nouvelle-Écosse et le Nouveau-Brunswick où il y a probablement un peu plus d'industries que nous n'en avons ici à Terre-Neuve. Si Terre-Neuve avait plus d'industries, la Loi sur les taux de transport des marchandises dans les provinces Maritimes, qui prévoit ces subventions, deviendrait plus importante. Mais elle n'est pas aussi importante aujourd'hui. Notre principale préoccupation c'est que tout ce qui nous est expédié, tout ce qui est expédié à l'extérieur, s'en va à New York ou en Europe ou ailleurs, et ne retourne pas à l'intérieur du Canada.

M. Perrault: Merci, monsieur le président.

Le président: Monsieur McGrath?

M. McGrath: En tant qu'hommes d'affaires, quel est le point de vue du *Board of Trade* de Terre-Neuve, à l'égard de la structure actuelle des taux sur les transbordeurs allant vers l'intérieur?

M. Ploughman: Une fois de plus, nous trouvons que les taux sont élevés, surtout, pour le transport par camions. Ceci pourrait être une façon de créer la concurrence. Cela pourrait certainement aider si les tarifs sur les camions qui partent pour le Golfe, avaient un tarif moins élevé.

M. McGrath: Je suis étonné qu'il n'y ait pas eu une recommandation précise formulée par le *Board* à cet égard, parce que cela me semblerait un point très important à examiner en considérant les autres modes de transport.

Je voudrais poser une autre question dans un nouveau secteur d'activités dont on ne parle pas dans le mémoire. Qu'est-ce que le *Board* pense des services aériens du Continent à Terre-Neuve?

[*Text*]

Mr. Ploughman: The service has certainly improved. I think Mr. McGrath raised this question on a previous occasion, is that I certainly think we should have an alternate airport here. I think you were lucky to get in on Thursday night and this has not been an infrequent occurrence as far as St. John's is concerned.

Mr. McGrath: Mr. Chairman and Mr. Ploughman, I received a parliamentary return a couple of days ago in reply to a question of mine about the number of hours when the ceiling was less than 200 feet and/or visibility less than ¼ of a mile for certain airports. I asked about St. John's, Gander, Stephenville, Moncton, Sydney, Halifax International, Montreal International, and Toronto International. It is rather interesting because St. John's stands out by a mile. In these figures for 1967, we had 608 hours of fog when the airport was non-operational, zero disability, as compared to 51 for Montreal, 202 for Moncton, and 135 for Toronto. Anybody who has to travel to Newfoundland frequently would know the significance of these figures and the significance of what I am talking about.

I heard that Air Canada was losing $1 million a year as a consequence of this condition, this weather factor in Torbay. I would think that a strong case could be made, and certainly a body like the Newfoundland Board of Trade would be vitally concerned in this. A strong case could be made for building a new airport, as was done in Halifax. They built a completely new airport in Halifax.

Our airport at Torbay is a wartime airdrome that was taken over and extended and expanded, and the fact remains that it was built in the worst possible location. Would the Board strongly support a move for a new airport, not an alternate airport, but a new one?

Mr. Ploughman: The Board of Trade has already gone on record as supporting an alternate airport. When you say a new one, Halifax has a new one, and they have this fog factor. In other words, replacing the existing facility entirely.

Mr. McLoughlan said we supported an alternate because we did not think we would get anything else. But if we could, yes, we would.

[*Interpretation*]

M. Ploughman: Le service a certainemen été amélioré. Un secteur, du moins pour ce qui est de Saint-Jean, et je pense que monsieur McGrath a déjà soulevé la question, et à mon avis, il nous faudra certainement un aéroport alternatif ici. Vous êtes chanceux d'avoir pu atterrir jeudi soir, et cela se produit assez souvent à Saint-Jean.

M. McGrath: Monsieur le président et monsieur Ploughman, j'ai reçu un rapport parlementaire il y a quelques jours, en réponse à une question, pour savoir pendant combien d'heures le plafond était inférieur à 200 pieds et/ou la visibilté de moins de un quart de mille pour certains aéroports. J'ai demandé ces renseignements pour les aéroports de Saint-Jean, Gander, Stephenville, Moncton, Sydney, Halifax International, Montréal International, et Toronto International. C'est plutôt intéressant, parce que, à Saint-Jean, on ressort du reste dans une proportion d'un mille. D'après les chiffres pour l'année 1967, nous avons eu 608 heures de brouillard, alors que la visibilité à l'aéroport était nulle et le trafic aérien suspendu, comparativement à 51 heures pour Montréal, 202 pour Moncton et 135 pour Toronto. Quiconque doit se rendre assez souvent à Terre-Neuve saurait la signification de ces chiffres ici et ce dont on parle.

J'ai entendu dire que la société Air Canada perdait 1 million de dollars par année par suite des conditions atmosphériques à Torbay. Je serais porté à croire qu'on pourrait très bien présenter un argument valable et sûrement un organisme comme le *Board of Trade* de Terre-Neuve, s'intéresserait vraiment à la question. On pourrait facilement demander à ce qu'il se construise un nouvel aéroport comme ce fut le cas à Halifax. Ils y ont construit un nouvel aéroport.

Notre aéroport à Torbay est un aérodrome militaire qui a été agrandi, et qui est très mal situé. La Commission appuierait-elle vraiment la proposition en vue de la construction d'un nouvel aéroport, pas un aéroport alternatif, mais un nouveau?

M. Ploughman: On sait que le *Board of Trade* est déjà en faveur d'un aéroport alternatif. Lorsque vous dites un nouvel aéroport, Halifax en a déjà un, et ils ont aussi le brouillard. En d'autres termes, qui remplace complètement les installations actuelles.

M. McLoughlan avait dit que nous étions en faveur d'un aéroport alternatif car il ne croyait pas que nous aurions obtenu autre chose. Mais si nous pouvions, certainement nous le serions.

'exte]

Mr. McGrath: Perhaps if we went after a mpletely new airport we might end up with alternate.

Mr. Allmand: Mr. Ploughman, in your brief u talk about the problems of ice conditions the Cabot Strait, the St. Lawrence and the lf of St. Lawrence. You said that in the st two years there was quite a blockage of eight cars coming across the Strait during e winter. In what month does this blockage ie to ice generally occur?

Mr. Ploughman: I believe it would be ound April—March and April—when we t the easterly winds, the prevailing wind at at time, and the ice would back up into the rt of Sydney. Some years you may not get y ice at all, and then other years this con- tion could go on for six to eight weeks. It is t a consistent pattern, but last year, and this as after this brief was presented, the condi- ns were not too hard. But we could very ell have a serious situation again this year.

What we were suggesting in the brief is ternate facilities. We suggested Halifax, but ulgrave we feel now would be the most actical place for the alternate facilities.

There is no need of breaking down this eight. Sydney has the facilities to handle is. When you get an ice condition, the boat nnot go into Sydney, and we are suggesting at to skirt the ice and go into Mulgrave ould mean probably another seven or eight urs. But if it does that now, it means the eight cars have to be broken down. And stead of taking probably six or seven hours load, it may take two or three days. So e are suggesting that there be facilities Mulgrave, and we have a rough timate of the cost. We estimate about $2½ - $3 millions for these facilities at Mulgrave. ight now it is costing them a lot of money ecause it is taking the boats so long to ad.

Mr. McGrath: If they were to build these cilities at Mulgrave or Halifax to deal with ie ferry properly, according to what you say ey would be used only six to eight weeks a ar at the most, and that may not be every ar. It could be, but possibly not.

Mr. Ploughman: This is correct.

Mr. McGrath: The problem with your ggestion is that for the expenditure made aybe the benefits would not be high enough s an investment. You have not thought of her alternatives?

[*Interprétation*]

M. McGrath: Si nous demandions un aéroport entièrement nouveau, nous finirions par avoir un aéroport alternatif.

M. Allmand: Monsieur Ploughman, dans votre mémoire, vous parlez du problème des glaces dans le Détroit de Cabot, le Saint-Laurent et le Golfe du Saint-Laurent. Vous avez dit que, deux années de suite des wagons-marchandises ont été bloqués dans le détroit au cours de l'hiver. A quel mois cela arrive-t-il généralement?

M. Ploughman: Je pense que cela arrive plutôt en avril—mars et avril—avec les vents de l'est, alors que les glaces s'accumulent dans le port de Sydney. Certaines années, vous ne voyez pas de glace du tout, d'autres années ces conditions peuvent durer de 6 à 8 semaines. Ce n'est pas une caractéristique constante, mais l'année dernière, après la présentation de ce mémoire, les conditions étaient assez bonnes. Mais on ne peut jamais savoir. Cette situation grave peut de nouveau survenir cette année.

Ce que nous proposions dans le mémoire, c'est d'avoir des installations alternatives. Nous avons proposé Halifax, mais à notre avis, Mulgrave serait l'endroit idéal pour ces installations. Il n'y a pas lieu de répartir ces marchandises. Sydney dispose de toutes les installations nécessaires pour cela. Et lorsque vous avez des glaces, ces navires ne peuvent se rendre à Sydney et nous proposons que s'ils contournent les glaces et se rendent à Mulgrave, cela entraînerait probablement 7 ou 8 heures de plus. Mais si c'est le cas, les wagons-marchandises devront être répartis. Et au lieu que cette manutention dure six ou sept heures, elle prendra peut-être 2 ou 3 jours. Par conséquent, nous proposons qu'on aménage des installations à Mulgrave. Il en coûterait environ 2 millions à 3 millions de dollars pour l'aménagement de ces services à Mulgrave. En ce moment, il en coûte beaucoup d'argent, parce que le chargement des navires dure longtemps.

M. McGrath: Si ces services étaient aménagés, à Mulgrave ou à Halifax, pour régler la question des transbordeurs comme vous le dites, on ne s'en servirait que pendant 7 ou 8 semaines au plus, et peut-être pas chaque année.

M. Ploughman: Oui, c'est juste.

M. McGrath: Le problème, avec cette proposition, c'est que, à la suite des dépenses qui ont été faites, les avantages ne seraient pas assez grands. C'est un investissement. Vous n'avez pas songé à d'autres solutions de rechange?

[*Text*]

Mr. Ploughman: Yes, but when you speak of investment, I do not think you speak of it in terms of just $2 or $3 million if you consider that when you have this ice blockade it could take four or five or six weeks for freight to move across. You get this backup. What effect is this having on costs?

There could be a large building under construction and there could be materials involved in that building and held up in one of those cars for four or five weeks. So the construction of that job is held up for four or five weeks. You could have a farmer waiting to get feed. What do we do then? We have to fly it in. The over-all loss to the whole economy of Newfoundland has to be taken into consideration as well when you weigh the investment of that $2 or 3 million at Mulgrave.

Mr. McGrath: What percentage of your trade—let us say your importation of products into Newfoundland and the export of products out to the mainland of Canada—goes by ship, up the St. Lawrence, directly to Montreal, as compared with that which comes by railway and ferry across the Cabot Strait? It is Clarke Steamships that works between Montreal and Newfoundland, is it not?

Mr. Ploughman: Yes. I tried to get the figure for 1968. I know in the case of the CNR their volume was 402,000 tons for 1968. I have the 1965 figure.

Mr. McGrath: The latest figure you have.

Mr. Ploughman: It is for 1965. East-bound freight was 291,000. In other words, the CNR carried 291,000 tons at that time. In 1968 this has gone up to 402,000. The private steamships carried 185,000. So again, I would think that this increase has been correspondingly equal to the rail.

Mr. McGrath: Would these steamships work from Newfoundland up the St. Lawrence River towards Montreal, or do they work into Halifax too? Do you have steamships that bring freight from the Maritime Provinces, or is it all from up the river?

Mr. Ploughman: It is mainly directly from Montreal to Corner Brook, Botwood and St. John's. There is some service out of Halifax, but this would be relatively small.

[*Interpretation*]

M. Ploughman: Oui, mais lorsque vous pa lez des investissements, je ne crois pas qu vous puissiez considérer des dépenses de l'o dre de 2 ou 3 millions de dollars comme éta un investissement. Si vous considérez qu'av ce barrage de glaces, il faut peut-être 4, 5 c 6 semaines pour dégager la cargaison. Que en seraient les effets sur le coût?

Il pourrait y avoir un édifice en construc tion dont les matériaux sont retenus sur cett cargaison, de 4 à 5 semaines, ce qui fait qu les travaux de construction sont également retardés de 4 à 5 semaines. Un agriculteur n reçoit pas le fourrage. Que faire? C'est bie simple, on le fait venir par avion. Si vou tenez compte de l'investissement de ces deu ou trois millions de dollars à Mulgrave, vou devez également tenir compte de la perte glo bale à toute l'économie de Terre-Neuve.

M. McGrath: Quel pourcentage de votr commerce, c'est-à-dire vos importations d produits à Terre-Neuve et les produits d'ex portation vers le continent canadien, se fai par navire le long du Saint-Laurent, directe ment à Montréal, comparativement à ce qu arrive par chemins de fer et transbordeur travers le Détroit de Cabot? C'est la Clark Steamships qui fait la navette entre Montréa et Terre-Neuve, n'est-ce pas?

M. Ploughman: Oui. J'ai essayé d'obteni les chiffres pour 1968. Je sais que dans le ca du National-Canadien, le volume était d 402,000 tonnes pour 1968. J'ai les chiffres pou l'année 1965...

M. McGrath: Les derniers chiffres don vous disposez.

M. Ploughman: Ils sont pour l'année 1965 Le fret en direction de l'Est était de 291,000 C'est-à-dire que le National-Canadien a trans porté 291,000 tonnes en 1965. En 1968, ce chif fre est passé à 402,000 tonnes. Les société de navigation maritime ont transporté 185,00(tonnes. Par conséquent, une fois de plus, j(dirais que cette augmentation équivaut à l'augmentation ferroviaire.

M. McGrath: Ces navires vont-ils directe ment de Terre-Neuve via le Saint-Lauren jusqu'à Montréal, ou s'arrêtent-ils aussi à Halifax? Avez-vous des navires qui transpor tent des marchandises des Maritimes ici, ou est-ce que cela vient de Montréal seulement?

M. Ploughman: Ces marchandises provien nent directement de Montréal à Corner Brook, Botwood et Saint-Jean. Il y a des ser vices à partir de Halifax mais ils sont plutôt faible.

Texte]

Mr. Trudel: Mr. Chairman, I gather from the rief that the witness is looking for additional acilities or transportation facilities to the rea. Would this be correct?

Mr. Ploughman: When you say additional acilities, do you mean additional carriers?

Mr. Trudel: Carriers, because you said the ompetition was limited.

Mr. Ploughman: This would be desirable.

Mr. Trudel: Starting from that assumption, ie carriers that are now presently servicing ie area are travelling empty 90 per cent of ie time. They are only carrying volume out. et in the briefs that we have had so far, everal manufacturers or other Boards of rade similar to yours have mentioned that ey could not find service for the outgoing erchandise. We have had one instance here they said it was absolutely impossible r them to obtain space. I am trying to relate ie two statements, and they seem to be so ir apart.

Mr. Ploughman: Is this in Newfoundland?

Mr. Trudel: I am talking about the Atlantic rovinces.

Mr. Ploughman: This may apply in Nova cotia, but it does not apply in ewfoundland.

Mr. Trudel: You mentioned the $500 figure r transportation. Would this be per capita?

Mr. Ploughman: No, per family.

Mr. Trudel: Have you a comparable chart iat you could use for the rest of Canada?

Mr. Ploughman: I feel that the federal gov- rnment should bring in legislation to make iese figures available. I think the federal overnment and the provincial government hould know what the cost is, and realize that ost of what we use here in Newfoundland omes from the mainland of Canada. I think is important that we know what the freight . How can we really rationally discuss this nless we have it?

Right now DBS may have those figures. I o not know if they have them. But even if ey did, under the secrecy act you could not et them, even as Members of Parliament. I ink freight is an important factor I have

[*Interprétation*]

M. Trudel: Monsieur le président, d'après le mémoire, j'en conclus que le témoin demande des services de transport supplémentaires pour la région. Est-ce vrai?

M. Ploughman: Lorsque vous parlez d'installations supplémentaires, voulez-vous dire transporteurs supplémentaires?

M. Trudel: Des transporteurs supplémentaires parce que vous disiez que la concurrence était limitée.

M. Ploughman: Oui, c'est souhaitable.

M. Trudel: En partant de cette hypothèse, les transporteurs qui présentement desservent la région, sont vides dans 90 p. 100 des cas. Et pourtant, dans les mémoires que nous avons eus jusqu'ici, bon nombre de fabricants et de Chambres de commerce analogues au vôtre, ont dit qu'ils ne pouvaient pas trouver de service pour leurs marchandises qui allaient vers l'extérieur. Nous avons eu un cas où ils disaient qu'il était impossible d'obtenir de l'espace. J'essaye de rapprocher les deux déclarations qui semblent être tellement opposées.

M. Ploughman: Cela s'est-il passé à Terre-Neuve?

M. Trudel: Je parle des provinces de l'Atlantique.

M. Ploughman: Cela vaut peut-être pour la Nouvelle-Écosse, mais pas pour Terre-Neuve.

M. Trudel: Vous avez mentionné le chiffre de $500 pour les transports. Ce chiffre serait-il per capita?

M. Ploughman: Non, par famille.

M. Trudel: Avez-vous un tableau comparatif que vous pourriez utiliser pour le reste du Canada?

M. Ploughman: Je considère que le gouvernement fédéral devrait introduire une législation pour que ces chiffres soient disponibles. Je pense que les gouvernements fédéral et provincial, devront savoir ce que ça coûte et comprendre que la plupart de ce que nous utilisons ici provient du continent. Il est impossible que nous sachions ce qu'il en coûte par famille pour le transport. Comment pouvons-nous en discuter si nous n'avons pas cette statistique?

En ce moment, le Bureau fédéral de la Statistique a peut-être ces données. En vertu de la loi sur la statistique, je ne sais pas même s'ils les ont. Et même s'ils les avaient, en vertu de cette loi, vous ne pourriez pas les

[*Text*]

come up with an estimate of $500 per family. I think we should know what this cost really is.

Mr. Trudel: I do not disagree with your statement, sir, and I feel that it is certainly a point of value. But I wanted to find out whether you had any comparable chart.

I would like to suggest to you—and I am not trying to start a debate here—that this transportation aspect is taken into consideration in the equalization payment. You have a 62 or 61 per cent factor in your equalization payment for this province, which is 2½ to 3 times higher than half of Canada. Possibly in some cases the entire amount is in excess of what is being given to the other half of the country.

Mr. Ploughman: I would like to think that possibly one of the big considerations is that most of our minerals here in Newfoundland, or most of what we ship out of this province, is not going back to Canada, but it is ore and paper and so on. And I think here we are making quite a contribution to the gross national product of Canada, and the flow of traffic is going to foreign countries. I think in the equalization grants that you are referring to, this is probably as important a factor as the one you just mentioned.

Mr. Trudel: Possibly, and I think this will have to be verified further. I gathered from your information that the subsidy for the coastal services was not reflected back to the province.

Mr. Ploughman: There are two subsidies in the case of the CNR. One is the subsidy on the Gulf service, which I think approximates $6 million a year, and in the case of this service the rate is based on an extension of the rail. The other subsidy is the coastal service, which about three years ago came to about $7 million.

Mr. Trudel: A supplementary question to Mr. McGrath's question. I gather he is looking for another location for the airport, an alternate location. Is this the inference that was made?

Mr. Ploughman: Yes, that is right.

Mr. Trudel: Thank you, Mr. Chairman.

[*Interpretation*]

obtenir en tant que députés. Et je pense qu le transport des marchandises est un facteu très important. J'ai fait une évaluation d $500 par famille. Je pense que nous devrion vraiment savoir ce qu'il en coûte.

M. Trudel: Je ne suis pas en désaccord ave votre déclaration, et je pense que c'est là u point de vue valable. Mais je voulais savoir s vous aviez un tableau comparatif.

Je voudrais dire, et là, je ne veux pa commencer tout un débat, que dans les paie ments de péréquation, l'on a tenu compt de la question des transports. Vous avez u facteur de 62 ou 61 p. 100 dans les paiement de péréquation pour cette province, soit 2 fois à 3 fois supérieur à ceux de la moitié d Canada. Et dans certains cas même, tout l montant excède ce qui est donné à l'autr moitié du pays.

M. Ploughman: J'aimerais croire que l'un des grandes considérations vient du fait qu la plupart de nos minéraux ici à Terre-Neuv ou sinon la plupart de ce que nous expédion à l'extérieur de cette province, n'est pa retourné au Canada, mais c'est le minerai, l papier etc. Je pense ici que notre contributio au produit national brut est importante et qu le débit du trafic se dirige vers les pay étrangers. Je pense qu'en ce qui concerne le subsides de péréquation auxquels vous fai tes allusion, cela est un facteur tout auss important que celui dont vous venez d parler.

M. Trudel: Peut-être, et je pense qu'il faudrait le bien vérifier. J'ai cru comprendre qu les subventions consenties aux services côtier n'ont pas produit d'effets sur la province.

M. Ploughman: Il y a deux subventions dans le cas du Canadien-National. Une de ce subventions est celle qui a été consentie au service du Golfe et qui s'élève à environ 6 millions de dollars par année, et dans le cas de ce service, le tarif est basé sur une extension du rail. L'autre subvention est pour le service côtier, laquelle il y a environ trois ans de cela, se montait à presque 7 millions de dollars.

M. Trudel: Une question complémentaire à celle posée par M. McGrath. Je crois comprendre qu'il cherche un autre site ou un autre emplacement pour l'aéroport. Est-ce bien ce qu'il a dit?

M. Ploughman: Oui, c'est cela.

M. Trudel: Merci, monsieur le président.

Texte]

The Chairman: Gentlemen, this is the end f the questioning on your brief, and I would ike to thank you.

Our next brief is from Lundrigans Limited, nd I would like to call upon Mr. H. W. undrigan, Vice-President of Lundrigans imited; also Mr. Peter Cook, Manager of D. . L. Transport and Mr. Ronald Newhook, ice-President and General Manager of North tar Cement Limited.

Mr. Lundrigan will summarize his brief.

Mr. H. W. Lundrigan: Mr. Chairman and hembers, a year ago we prepared a brief for ubmission to the Standing Committee on ransport and Communications, the facts of hich were contributed by various groups ithin our organization.

As you may know, our organization is ade up of many activities, but in particular he brief covered the activities of D. B. L. ransport, which is a trucking transport com- any. Mr. Cook is here with me today and Ir. Ronald Newhook of North Star Cement, a rm associated with us on the west coast of ewfoundland, and Mr. W. Shildes who is ssociated with the steel company here which s a relatively new industry, and with which ve have become associated since our brief vas submitted.

Events since the submission of the brief ave shown that the government today is also oncerned about the development of areas of anada including almost all of Newfoundland s areas which need assistance for growth nd development. Our transportation is ssociated with almost every industry and we eel that the benefits of transportation to an ndustry should be looked at more closely han the actual detailed solutions of the trans- ortation itself. In other words, we are very uch concerned about transportation as it ffects an industry.

Therefore we would like to point out and tress again the the importance of secondary ndustry for the proper growth and develop- ent of the province.

We are extremely fortunate in Newfound- and to have several large major industries. n general there would be the paper industry n two large centres in Corner Brook and rand Falls, a mining complex in Labrador ity and, of course, various fisheries develop- ents throughout the province. These large ndustries are beneficial and we should not in ny way belittle this. They do not provide for ontinued increase in employment which aturally comes from growth in population.

[*Interprétation*]

Le président: Merci. Voilà la fin de la période des questions. Je vous remercie, messieurs.

Le prochain mémoire nous vient de la *Lundrigans Limited*, et j'aimerais demander à monsieur Lundrigan, vice-président de la *Lundrigans Limited*, ainsi qu'à monsieur Peter Cook, directeur au D.B.L. Transport et monsieur Ronald Newhook, vice-président et directeur général de la *North Star Cement Limited*. Monsieur Lundrigan commencera par nous résumer son mémoire.

M. H. W. Lundrigan: Monsieur le président et messieurs les députés. Il y a un an, nous avons préparé un mémoire à présenter au comité permanent des transports et des communications. Les données du mémoire avaient été fournies par divers groupes de notre organisme.

Comme vous le savez peut-être notre organisme s'occupe de plusieurs domaines, mais le mémoire couvre en particulier l'activité de la D.B.L. Transport, une société de transport par camion. Monsieur Cook, monsieur Ronald Newhook, de la North Star Cement, société qui située sur la côte ouest de Terre-Neuve et affiliée à la nôtre, et monsieur Bill Shildes, qui est associé à une aciérie assez nouvelle et à laquelle nous nous sommes associés depuis que le mémoire a été présenté.

Depuis que nous vous avons présenté notre mémoire, les événements ont démontré que le gouvernement s'intéresse aussi au développement des régions du Canada notamment presque tout Terre-Neuve, en tant qu'endroits qui auraient besoin de croître et de se développer. Le transport est lié à preque toutes les industries et nous croyons que l'on devrait peut-être examiner d'un peu plus les avantages du transport pour une industrie que les solutions actuelles en détail du transport lui-même.

En d'autres termes, nous nous préoccupons beaucoup des effets du transport sur l'industrie. Nous voudrions donc signaler, et insister encore une fois, sur l'importance de l'industrie secondaire pour le développement et l'expansion appropriés de la province.

Nous sommes très fortunés à Terre-Neuve, d'avoir plusieurs grandes industries d'importance. De façon générale, il y aurait l'industrie du papier dans deux grands centres, à Corner Brook et à Grand Falls, un complexe minier à Labrador dans Labrador City et évidemment différentes entreprises d'amélioration des pêcheries à travers la province. Ces grandes industries soient bonnes, utiles et nous ne devrions pas les déprécier d'aucune manière. Elles ne donnent pas lieu à une aug-

[*Text*]

It is a fact that the primary industries are constantly searching for ways to automate which inevitably reduces the number of people employed and this, of course, adds to the unemployment list.

Therefore, it inevitably falls upon the secondary industries to provide jobs for future generations. Even if some large second centre of primary industry were to be established, the problem will occur again in the next generation. Secondary industries, of course, can only be developed as markets are available for the products manufactured. The most successful secondary industries are those established in large urban areas where transportation is not such a significant part of the total operation.

The rise in the population is nearly 500,000 for the whole of Newfoundland, and it is very rapidly understood that the only secondary industries that could be successful are those which could produce products that could be consumed by a population within the province.

Our organization over the past few years has been investigating means of diversification. Our studies have concluded that there are a very few industries which could be economically established and be successful with a consumer market of this size. It also should be realized that it would be unwise to consider that in any production the manufacturer could hope to service an entire consumer population. Even to expect to obtain 50 per cent of a market would be more than is normally expected. Consequently, the only effective consumer market that any secondary industry could expect in this province would be one of about 250,000 people. Any secondary industry, therefore, must have access to a much larger market.

While Newfoundland is situated geographically this would mean the Maritime Provinces and Eastern Quebec. To give any secondary industry, particularly in Western Newfoundland, any possibility of development and growth, the problem of transportation has to be looked at in the light of how these industries would be assisted in getting their manufactured goods to market, not only in Newfoundland but off the island across the gulf and into the oher provinces of Canada.

We are ideally situated for marine transport, but for the services that consumers today are demanding road and rail transport services have also to be provided.

[*Interpretation*]

mentation continuelle de l'emploi qui provien naturellement de l'accroissement de la popu lation. Il est vrai que les industries primaire cherchent sans cesse à mécaniser, ce qu réduit inévitablement le nombre d'employé et allonge la liste des chômeurs.

Il revient donc aux industries secondaire de fournir des emplois aux futurs générations Même si quelques grands centres secondaire d'industrie primaire devaient être créés, l problème se répéterait pour la prochain génération. Les industries secondaires ne peu vent être développées que si les débouché sont disponibles pour les produits manufactu rés. Les industries secondaires les plus floris santes, sont celles qui sont établies dans le grand centres urbains où le transport ne cons titue pas tellement une partie essentielle d leur activité.

L'accroissement de la population de Terre-Neuve dans son ensemble, est de 500,000 seulement, et l'on constate bien vite que les seules industries secondaires qui pourraient réussir sont celles qui pourraient produire des denrées qui seraient consommées ici-même dans la province.

Depuis quelques années, nous essayons de trouver le moyen de diversifier ces industries, mais nous en sommes venus à la conclusion qu'il y a très peu d'industries secondaires qui pourraient s'établir ici avec succès, étant donné le nombre limité de consommateurs. Il faut réaliser aussi qu'aucune industrie ne devrait espérer pouvoir desservir toute la population. Même si l'on arrivait à desservir la moitié de la population, ce serait plus que ce que l'on pourrait normalement espérer.

Par conséquent, le seul débouché auquel une industrie secondaire pourrait s'attendre dans cette province serait composé d'environ 250,000 consommateurs. Ainsi toute industrie secondaire doit nécessairement avoir accès à un plus grand débouché.

Étant donné la situation géographique de Terre-Neuve, cela voudrait dire les provinces Maritimes et l'est du Québec.

Pour permettre à toute industrie secondaire, surtout dans l'ouest de Terre-Neuve, de se développer et de croître, il faudrait examiner le problème des transports à la lumière de la façon dont on pourrait aider ces industries à acheminer leurs produits vers les débouchés, non seulement à Terre-Neuve, mais à travers le Golfe et dans les autres provinces du Canada.

Du point de vue du transport maritime, nous sommes très bien situés, mais pour pouvoir assurer aux consommateurs les services qu'ils exigent de plus en plus, les services du transport ferroviaire et routier sont nécessaires.

[*Texte*]

We have pointed out in our brief that in e terms of union with Canada there refer- ce is made to the gulf crossing, and I will ote it specifically:

> For the purpose of railway rate regulation the Island of Newfoundland will be included in the Maritime region of Canada, and through traffic moving between North Sydney and Port-aux-Basques will be treated as all-rail traffic.

was apparently the intention at the time of ion that for the purpose of establishing rail tes to consider the Gulf of St. Lawrence as n-existent. At the time of union only exports the primary industries were considered d these exports were primarily by ocean eight. If we are able to develop this prov- ce and place Newfoundland on an equal onomic footing with other provinces of nada, we must reverse the flow and export anufactured goods from Newfoundland to nsumer markets on the mainland of Cana- . If the legislators in the day of union were epared to assist Newfoundland with its ports, then it seems not unreasonable to quest the legislators of the day to provide r assistance to industries by arranging that ports as well can cross the gulf onto the ainland of Canada at a cost that would not greater than if a road existed between rt-aux-Basques and Sydney. For New- undland to have equal opportunity it should t cost an industry any more to transport eight from, say, Stephenville to Sydney an other points in Canada although we have is natural barrier.

This could be accomplished if the ferry ossing, for purposes of establishing freight tes, were to be considered as a bridge or a useway. From our studies in preparation of r submission we realize the complexity of e problems facing the Standing Committee. e feel the emphasis should be placed on ays and means by which transportation uld assist in the future development of this ovince, for if we are successful in this and r economy becomes buoyant and healthy e are not so much concerned with the gional disparities. Transportation may not en be such an important segment of our onomy.

May I summarize briefly the four main ints very specifically covered in the brief? ey are:

1. That the Maritime Freight Rates Act sistance be extended to all modes of ansport.

[*Interprétation*]

Nous avons insisté, dans notre mémoire, sur le fait que dans les conditions de l'union de Terre-Neuve avec le Canada, il est question de la traversée du Golfe et je vais la citer:

> «L'île de Terre-Neuve sera comprise dans la région Maritime du Canada en ce qui a trait aux règlements touchant les tarifs de chemins de fer et le trafic d'entier parcours entre Sydney-Nord et Port-aux-Basques sera réputé être du trafic exclusivement ferroviaire.»

Lors de l'Union, pour établir les tarifs ferroviaire, ou voulait considérer le Golfe du Saint-Laurent comme non-existant. Seulement l'exportation des industries primaires étaient prises en considération et le transport de ces marchandises se faisait par bateau. Si nous pouvons développer la province et mettre Terre-Neuve sur un pied d'égalité avec les autres provinces du Canada, il nous faudra absolument renverser la direction du trafic et exporter les produits manufacturés de Terre-Neuve vers les débouchés du continent canadien. Si les législateurs du temps de l'union, étaient prêts à aider Terre-Neuve avec ses importations, il me semble très raisonnable de demander aux législateurs d'aujourd'hui de fournir une aide aux industries en prenant les dispositions pour que leurs exportations aussi puissent traverser le golfe vers le continent canadien à un prix qui ne dépasserait pas celui que l'on payerait s'il existait une route entre Port-aux-Basques et Sydney. Pour que Terre-Neuve jouisse des mêmes avantages, il faudrait voir à ce qu'une industrie ne débourse pas plus pour transporter ses produits par exemple de Stephenville à Sydney, que d'autres points du Canada malgré cette barrière naturelle.

Nous pourrions le faire si, pour établir des tarifs-marchandises le traversier était considéré comme étant un pont ou une route.

Une brève étude de notre mémoire nous fait comprendre la complexité des problèmes qu'aura à faire face le Comité permanent. Nous estimons que l'on devrait surtout trouver des moyens qui permettraient aux transports d'aider à l'expansion future de notre province, car si nous y réussissons et que notre économie devienne vraiment saine, nous ne nous préoccuperons plus tellement des disparités régionales. Le transport ne sera peut-être plus considéré comme étant un important secteur de notre économie.

Je voudrais à présent vous parler brièvement des quatre points mentionnés dans le mémoire. Ce sont les suivants: 1. que l'aide prévue par la Loi sur les taux de transport des marchandises dans les provinces maritimes porte sur tous les moyens de transports.

[*Text*]

2. That provisions be made available on the Gulf Ferry service for modern handling techniques such as piggyback containerized cargo so that Newfoundland can enjoy the benefits of the use of these new methods which are very rapidly being established elsewhere in Canada.

3. That tolls for trucks and tractor trailors on the gulf service crossing be set at rates not greater than the expenditure required to operate vehicles over an equivalent highway distance—for example, as if the bridge existed. Now, this means market potential would be increased in the mainland for Newfoundland products, and improved transport services would be available to all areas of the island.

4. That assistance be given to improving dock and road facilities, particularly in Corner Brook, in order to provide adequate room and facilities for transfer of cargo to and from trucks, including provisions for handling trailers carried by ships and containerized cargo.

We feel that the economic lifeline for Newfoundland, if not in whole then in part, lies in the North Sydney-Port-Aux-Basques Gulf Ferry service. The economy, the standard of living and the socio-economic position of Newfoundland are dependent not only on maintaining existing services, but on continually striving to improve their quality and efficiency. We strongly feel that the amendment of the Maritime Freight Rate Act to meet the above conditions, a revision of the Gulf Ferry charges, and the updating of transport facilities on the Gulf Ferry and at docks, would greatly assist in the economic development of Newfoundland. We think if we can reverse the trend it is quite apparent it would benefit Canada as a whole.

The Chairman: Gentlemen, before going any further I would like to welcome a gentleman here in the audience this morning whom I think everybody knows. I want to mention the name of the Minister of Defence Production, Hon. Don Jamieson. Mr. Breau?

Mr. Breau: Mr. Chairman, since our arrival in Newfoundland some of the briefs have indicated that they would be interested in having subsidies for transportation to reduce the pressure on the consumer, to reduce the prices.

You seem to indicate, as the other Maritime provinces have, that it would be helpful to

[*Interpretation*]

2. Que les techniques modernes de manu tention, telles que les containers rail-rout soient mises à la disposition du service d traversier du Golfe pour que Terre-Neuv puisse profiter de ces nouvelles méthodes q sont adoptées très rapidement ailleurs a Canada.

3. Que les péages pour les camions et le camions-remorques soient fixés à des tau n'excédant pas les frais de transport requ pour une même distance routière, c'est-à-di comme si le pont existait. De cette façon c augmenterait les débouchés sur le continen canadien pour les produits de Terre-Neuve de meilleurs services de transport seraien disponibles à toutes les régions de l'île.

4. Que l'on fournisse l'aide nécessaire pou améliorer les quais et installations routière surtout à Cornerbrook, afin de disposer d l'espace nécessaire pour le transfert des ca gaisons et que l'on construise les installation nécessaires à la manutention des remorque transportées par bateau et aux marchandise transportées dans des «containers».

Nous estimons que la survie économique d Terre-Neuve réside, au moins en partie, sino totalement, dans le service des transporteur entre Sydney-nord et Port-aux-Basques. L'é conomie, le niveau de vie et la situatio socio-économique de Terre-Neuve ne déper dent pas seulement du maintien des service actuels, mais aussi de la continuité des effort accomplis en vue d'accroître leur qualité, leu efficacité. A notre avis, une modification de l Loi sur les taux de transport des marchandi ses dans les provinces Maritimes, en vue d satisfaire les conditions précitées, une révi sion des taux de transport du *Gulf Ferry* e l'amélioration des installations de transpor du *Gulf Ferry* et des installations de quais e d'entreposage favoriseraient grandement l'ex pansion économique de Terre-Neuve, pour l plus grand bien du Canada tout entier.

Le président: Messieurs, avant d'aller plu loin, j'aimerais maintenant souhaiter la bien venue à un monsieur ici à l'auditoire ce mati qui est connu de tout le monde, je crois. Et j veux par là mentionner le nom du ministr de la Production de défense, monsieur Do Jamieson. Monsieur Breau?

M. Breau: Monsieur le président, depui notre arrivée à Terre-Neuve, certains mémoi res faisaient mention de subventions qu devraient être consenties aux transports afi de réduire la pression exercée sur le consom mateur, sous forme des prix.

Vous semblez indiquer, comme les autre provinces des Maritimes, qu'il serait avanta

[*Texte*]

ave freight subsidies on raw materials so nat you could manufacture here and have etter access to the markets in central anada.

Now, there could be a conflict of opinion ere. Could you tell us whether you have any pecific kinds of industries in mind? For xample, we heard yesterday that a car ould cost more in Newfoundland because of ne freight and perhaps food. Could you tell s whether you have specific kinds of prodcts in mind, not necessarily in detail but in eneral, that you think could be manufacured here and sold in Central Canada? Could ou elaborate on that?

Mr. H. W. Lundrigan: Rather than be spefific I could say that any product, if you want o think about it, can be manufactured in ewfoundland or anywhere, for that matter, ut you must find a number of people who ould consume it. If it is manufactured in ewfoundland—there are not many products; here are quite a number of secondary indusries here now—for a continued growth we ave to get access to other population or therwise there cannot be any secondary ndustry.

Our company, together with others, comined on a study of secondary industries for estern Newfoundland. We started off with 0 products, but cut down to nine that were tudied. Two of them were possibilities and ne will probably come off. Every one of the tems was based on putting in a minimumized factory which in four weeks would prouce the whole production necessary for Newoundland. So, consequently the success of econdary industries is the availability of dditional markets, and herein we think the ransportation would assist greatly.

Mr. Breau: Yes, I agree with that but the roblem that has been indicated to us here is hat consumers pay a lot more for their roducts in Newfoundland. It would be great o have secondary industries and to have ccess to the market, but you have to protect he consumer. Do you think that freight subidies, industrial incentive and good producivity can held you to reduce the level of onsumer prices in Newfoundland?

Mr. H. W. Lundrigan: One could answer es to that but it would probably not work ut that way. Again not trying to be evasive, think the emphasis is on the wrong point. If veryone is employed, the price to the con-

[*Interprétation*]

geux d'obtenir des subventions sur les matières premières afin que vous puissiez entreprendre la fabrication ici et avoir un meilleur accès aux débouchés du Canada central.

Il se peut que les opinions diffèrent à ce sujet. Pouvez-vous nous dire si vous avez des industries précises en vue? Par exemple, hier, on nous a dit qu'une automobile, par exemple, coûterait plus à Terre-Neuve en raison des taux de transport et peut-être les aliments aussi. Pouvez-vous nous indiquer si vous avez des produits particuliers, non pas en détail, mais peut-être en général, qui d'après vous pourraient être fabriqués ici et vendus au Canada Central?

M. H. W. Lundrigan: Nous pourrions peut-être dire que, peu importe le produit auquel vous songez, s'il est fabriqué à Terre-Neuve ou ailleurs. Il faut absolument trouver les gens pour les acheter. Si les produits sont manufacturés à Terre-Neuve, il n'y a pas beaucoup de produits, il y a maintenant beaucoup d'industries secondaires ici, mais pour avoir une expansion continue, il faut absolument trouver un accès à d'autres marchés. Autrement, on ne pourrait pas avoir d'industrie secondaire.

Notre compagnie de concert avec d'autres a fait une étude sur la possibilité des industries secondaires pour l'ouest de Terre-Neuve. Nous avons commencé avec 20 produits et nous en sommes réduits à 9. Deux d'entre eux étaient des possibilités et on devra probablement en retrancher un. Chacun des item était fondé sur l'établissement d'une usine de dimensions minimales qui, dans l'espace de 4 semaines, aurait suffisamment de production pour couvrir tout Terre-Neuve. Par conséquent, le succès de l'industrie secondaire dépend de la possibilité de débouchés. C'est là que nous trouvons que le transport aiderait beaucoup.

M. Breau: Je suis parfaitement de votre avis, mais le problème qu'on nous a signalé ici est le fait que les consommateurs paient beaucoup plus pour leurs produits à Terre-Neuve. Ce serait très bien d'avoir des industries secondaires et d'avoir accès au marché, mais il faut protéger le consommateur. Croyez-vous que des subventions au transport de la marchandise, l'encouragement de l'industrie et une bonne production vous aideraient à réduire le niveau des prix aux consommateurs à Terre-Neuve?

M. H. W. Lundrigan: Je pourrais répondre oui, mais les choses n'iraient probablement pas de cette façon. Je n'essaie pas d'être vague mais je crois qu'on insiste sur le mauvais point. Si tout le monde est employé, le

[*Text*]

sumer is not as important as if half of them are unemployed and consumer prices are low. Reduction or assistance in freight rate obviously has to affect the consumer in lower prices; there is no question about that. Whether its effect will be significant or as great as in other parts of Canada I could not answer. I do not think so.

Mr. Rose: Mr. Chairman, in Mr. Lundrigan's reply to the last question to the effect that if everyone is employed, price is not a factor, I would suggest to Mr. Lundrigan that that depends upon the level of wages. Is that not so? Because we have heard a great deal about the problems of production in a...

Mr. H. W. Lundrigan: But I did not say "not important". I said not "as important".

Mr. Rose: Not "as important". I am sorry if I misquoted you, because I think what you talked about is what has been talked about throughout the Atlantic provinces, and that is the creation of an internal market. When you have the level of unemployment and the low wages here, while it gives you certain productive advantages because of these low wages, it also works against you because the people here do not have the funds with which to purchase some of these products.

Mr. Lundrigan: That is true, but if the market is expanded, if the market area is expanded—Japan probably has the highest wage rate, the highest standard of living speaking of the City of Tokyo. The people are employed, it is a higher standard of living. The cost of living is higher but the economy is good, and secondary industry is so strong in that nation as to be phenomenal.

Mr. Rose: In spite of their isolation.

Mr. H. W. Lundrigan: Yes. To give you an idea of the position of our secondary industries in Newfoundland, based on a report . . .

Mr. Rose: While you are looking for that, I think we could add the point that Japan has a very high population which also makes a difference.

Mr. H. W. Lundrigan: That is right. But their sales are also outside Japan; it is not all internal sales.

Mr. Rose: That is right, and 51 per cent of their industry is owned by Japanese.

Mr. H. W. Lundrigan: This is a study in 1961, that in secondary industries, Newfound-

[*Interpretation*]

prix aux consommateurs n'est pas aussi important que si la moitié d'entre eux sont chômeurs et que les prix sont bas. Une réduction dans l'aide donnée aux transports doit nécessairement affecter les prix aux consommateurs, mais que ce changement soit significatif ou aussi important que dans le reste du Canada, je ne pourrais dire. Je ne crois pas.

M. Rose: Monsieur le président, au sujet de la réponse que monsieur Lundrigan a donnée à la dernière question à l'effet que si tout le monde travaille, les prix ne sont pas un facteur, je pourrais peut-être lui dire que cela dépend du niveau des salaires. N'est-ce pas? Car nous avons beaucoup entendu parler des problèmes de production.

M. H. W. Lundrigan: Je n'ai pas dit «important», mais «pas aussi important».

M. Rose: Pas aussi important. Je m'excuse si je vous ai mal interprété mais ce dont vous parlez, je crois, c'est ce qu'on nous a dit partout dans les provinces de l'Atlantique, soit la création de marchés internes. Lorsque vous avez le niveau du chômage et de bas salaires ici, même si vous avez certains avantages de production, à cause justement de ces bas salaires, il y a aussi un désavantage car les gens n'ont pas les fonds voulus pour acheter ces produits.

M. H. W. Lundrigan: C'est vrai, mais si le marché, si le secteur du marché... par exemple, le Japon a peut-être le niveau de paye le plus élevé, le niveau de vie le plus élevé, du moins pour la ville de Tokyo. Les gens travaillent, ils ont un niveau de vie plus élevé. Le coût de la vie est élevé, mais l'économie est bonne et l'industrie secondaire dans ce pays peut être qualifiée de phénoménale.

M. Rose: Malgré leur isolement.

M. H. W. Lundrigan: Oui. Je vais vous donner une idée de la situation de nos industries secondaires à Terre-Neuve, fondée sur le rapport...

M. Rose: Pendant que vous cherchez cela, je pense que nous pourrions ajouter que le Japon a une grande population ce qui fait une différence.

M. H. W. Lundrigan: Oui, mais ses ventes se font à l'extérieur, et non uniquement dans le pays.

M. Rose: C'est juste, et 51 p. 100 de ses industries sont la propriété des Japonais.

M. H. W. Lundrigan: Il s'agit d'une étude faite en 1961 des industries secondaires et

[Texte]

nd had 3.5 per cent of the gross domestic roduct and Canada in secondary industries ad 23 per cent. In primary industries New- oundland had 24½ per cent and Canada 13 er cent. We were over-balanced with the rimary industries.

Mr. Rose: Yes. It is your isolation too, and think you have made this point. I think we, British Columbia, because of our isolation om the central Canadian markets, find our- lves at a similar disadvantage at times.

I do not feel, sir, that you hold out a great al of hope for the development of second- y industries in this province in a reasonable riod of time. I get the distinct feeling that is reminds me somewhat of a colonial area an emerging area, developing area, in hich there are a reasonably large proportion people who are extremely well off in the rimary industries and a great number of ople who are living under extremely pressed conditions. Do you agree with that?

Mr. H. W. Lundrigan: What you say is a ct but I do not agree that I portray the titude that there is no hope.

Mr. Rose: Well, sir, yes; that is what I am ggesting.

Mr. H. W. Lundrigan: I would like to . . .

Mr. Rose: You are suggesting it is very fficult.

Mr. H. W. Lundrigan: Yes, of course.

Mr. Rose: But it is not hopeless?

Mr. H. W. Lundrigan: I would think not.

Mr. Rose: The kind of suggestions that you ve made about the transportation subsidies d access to the Canadian market must be ne at a great social cost to the rest of nada?

Mr. H. W. Lundrigan: Yes, I would say that could.

Mr. Rose: In subsidies of one form or nother.

Mr. H. W. Lundrigan: Since Canada and ewfoundland joined together there is pected to be a flow of assistance from the ainland of Canada until our economy is ore buoyant. This was understood.

Mr. Rose: Sir, the government in this prov- ce has found it expedient and efficient to ove people from the outports into the owth centres because of the greater ease, r social benefit—this can be argued; never-

[*Interprétation*]

indiquant que Terre-Neuve avait 3.5 p. 100 du produit domestique brut et le Canada, dans les industries secondaires, 23 p. 100. Pour les industries primaires, Terre-Neuve avait 24½ p. 100 alors que le Canada avait 13 p. 100. Nous avons trop d'industries primaires.

M. Rose: Oui, votre isolement y est pour quelque chose et je crois que vous avez signalé ce point. Nous, en Colombie-Britannique, à cause de notre isolement des marchés centraux canadiens, avons parfois les mêmes désavantages.

Je trouve que vous n'exprimez pas beaucoup d'espoir pour les industries secondaires dans la province pour un certain temps. J'ai l'impression que cela me fait penser à une région coloniale ou une région émergeante, en voie de développement, où il y a une très grande proportion de gens qui se trouvent très bien dans les industries primaires et de nombreux autres qui se trouvent dans un état de dépression même. Êtes-vous d'accord?

M. H. W. Lundrigan: Ce que vous dites est vrai, mais je ne suis pas d'accord que je ne donne aucun espoir.

M. Rose: C'est vrai, monsieur, voilà ce que j'avance.

M. H. W. Lundrigan: J'aimerais. . .

M. Rose: Oui, mais vous suggérez tout de même que c'est très difficile.

M. H. W. Lundrigan: Évidemment.

M. Rose: Mais, est-ce sans espoir?

M. H. W. Lundrigan: J'espère que non.

M. Rose: Le genre de suggestion que vous avez faite au sujet des subventions au transport et de l'accès aux débouchés du Canada doit se faire à un coût social très élevé pour le reste du Canada.

M. H. W. Lundrigan: Oui, je dirais que c'est possible.

M. Rose: Sous forme de subvention d'une sorte ou d'une autre.

M. H. W. Lundrigan: Comme Terre-Neuve et le Canada sont unis, on s'attendait qu'il y ait cette aide du continent jusqu'à Terre-Neuve, jusqu'à ce que notre économie soit en meilleure posture. Cela avait été entendu.

M. Rose: Le gouvernement de cette province a trouvé bon et efficace de déménager les gens vers les centres de croissance à partir des régions éloignées en raison d'avantages sociaux, on pourrait en discuter, mais je crois

[*Text*]

theless I think this is the philosophy behind it. The government is presently engaged in this kind of a program. Following that philosophy and enlarging on it it seems to me that perhaps the Government of Canada might feel the same way, that it might be expedient to move more people into certain areas of specialization rather than expecting every area in Canada to be equally competitive and self-sufficient in terms of secondary industries.

Mr. H. A. Lundrigan: When you say that do you mean greater centralization in the Province of Newfoundland or are you saying the whole Province of Newfoundland should be moved into Ontario?

Mr. Rose: I am suggesting to you, sir, that what you have done here locally might be considered as a philosophy on a larger picture, and that certain areas in Canada might be considered better for, say, raising wheat and not for secondary industries; certain areas might be considered to be more efficient for primary industries, and that the social cost to Canadians might be too great to expect every area to be equally productive in terms of secondary industries.

Mr. H. W. Lundrigan: I could not agree because that would mean that you would have to have an employment crisis where there is 100,000 people unemployed, then you inject the primary industry to employ that 100,000 or 10,000. Then you wait until the growth population builds up a crisis again and inject another primary industry. The whole system is based on 99 people becoming unemployed because they become 21 years of age and are educated. You are hoping to find employment for these people and you cannot find it by putting 99 in a primary industry.

Mr. Rose: I think this constant outflow of people has been the problem of the Maritimes. Would you not agree?

Mr. H. W. Lundrigan: No, it is not a problem. The outflow of people is a necessity in many cases because there is no employment, and you have to get a gradual employment by secondary industry. I don't know of any other way to do it?

Mr. Rose: And you are suggesting that the solution to this is to subsidize transportation and inject massive doses of social capital

[*Interpretation*]

tout de même que c'est la philosophie qui animé le gouvernement. Le gouvernemer poursuit à l'heure actuelle ce genre de pro gramme. Suivant sa philosophie maintenant e l'élaborant, il me semble que le gouverne ment du Canada pourrait peut-être avoir le mêmes réactions, soit que ce serait mieux d déplacer plus de gens dans certaines région de spécialité plutôt que de s'attendre à ce qu chaque région du Canada soit aussi concur rentielle et indépendante en termes d'indus tries secondaires.

M. H. W. Lundrigan: Quand vous dite cela, est-ce que vous voulez dire une plu grande centralisation à Terre-Neuve, o est-ce que vous voulez dire que toute la pro vince de Terre-Neuve devrait déménager e Ontario?

M. Rose: Non, ce que je suggère, c'est qu ce que vous avez fait ici au plan local pour rait peut-être être étudié comme philosophi sur une plus grande échelle et que certaine régions du Canada pourraient être considé rées comme plus propices à la culture du blé par exemple, et non pour l'industrie secon daire; certaines régions pourraient être consi dérées plus efficaces pour l'industrie primair et le coût social aux Canadiens pourrait êtr trop élevé si l'on voulait que chaque régio soit aussi productrice en termes d'industri secondaire.

M. H. W. Lundrigan: Je ne peux pas êtr d'accord, car cela voudrait dire nécessaire ment une crise de chômage; là où il y 100,000 chômeurs, vous créez une industri primaire pour en employer 100,000 ou 10,000 Ensuite, vous attendez que la croissance de l population provoque une autre crise et vou créez une autre industrie primaire. Tout l système est fondé sur le fait qu'il y a 99 per sonnes qui deviennent chômeurs parce qu'elle ont 21 ans et qu'elles sont instruites. Vou espérez trouver des emplois pour ces gen mais vous n'en trouverez pas en plaçant le 99 dans l'industrie primaire.

M. Rose: Selon moi, le problème des Mari times est justement cette immigration cons tante des gens.

M. H. W. Lundrigan: Non, ce n'est pas u problème. Cette immigration est nécessair dans plusieurs cas car il n'y a pas d'emploi. I faut obtenir peu à peu des emplois grâce à l'industrie secondaire. Je ne connais d'autre moyens.

M. Rose: Et alors, vous suggérez que l façon de le faire, c'est de subventionner le transports et d'injecter beaucoup de capita

[*Texte*]

rom the remainder of Canada so this area an develop equally with the rest of Canada?

Mr. H. W. Lundrigan: I would never have ny objection to injections of massive doses of apital, but that is not my point. My point is at transportation should be looked at in the ght of assistance to this problem. It is good talk about the freight rates going up or ing down, or competition in trucking, hich we have covered in our brief. All these ings, I think, have to be discussed because her people have greater interests than the pic we are discussing right now, but you ust look at this problem in the light of how e solution to transport will affect secondary dustries for the purpose of this discussion id if you can assist the making of watches Port aux Basques by shipping them to ntral Canada, why not use transportation stead of injections of capital?

Mr. Rose: This is my concern and this is hy I have raised it pretty well with every rief. How we are going to make certain that ny grants, subsidies, or payments of any nd actually reach the people who need to be ached?

Mr. H. W. Lundrigan: I would say give portunity to the people in this province, on is Island, so that these disadvantages will ot hit them. Let me emphasize it by putting the other way: make greater advantages for tting it here. An investor in Central Cana- a looks at Ontario, at Nova Scotia and at ewfoundland. He is not concerned about anada. He is an investor. You have been ere and have travelled on our train and our us and so on: would you put your money ere?

Mr. Rose: I do not have any.

Mr. H. W. Lundrigan: I say you must make e economic climate and one of the factors is ansportation.

Mr. Horner: Mr. Lundrigan, first of all I ould like to compliment you for your nowledgeable brief. Certainly one, in read- g over the brief, could understand you now something of the economy of New- undland. I am concerned with the higher st of living that exists here in Newfound- nd. What percentage of industry's general st would you say could be attributed to the ansportation factor. Could you give us an lea: is it a big factor or a little factor?

Mr. H. W. Lundrigan: It is a phenomenal ctor, not only in the dollars and cents eight rate—

[*Interprétation*]

social du reste du Canada, pour que cette région se développe au même rythme que le reste du Canada?

M. H. W. Lundrigan: Je ne m'opposerais jamais à des apports massifs de capital, mais je ne veux pas parler de cela. Il faut examiner les transports à la lumière de l'aide à ce problème. C'est très bien de parler du coût des transports qui monte ou baisse ou de la concurrence des camions que nous avons mentionnée dans notre mémoire. Il faut en parler parce que d'autres personnes ont des intérêts plus marqués que le sujet que nous discutons actuellement, mais il faut nécessairement étudier ce problème à la lumière de la réaction qu'aura cette aide sur les industries secondaires aux fins de la présente discussion. Si vous pouvez aider l'industrie de la fabrication des montres à Port aux Basques en permettant d'exporter ces produits au centre du Canada, pourquoi ne pas utiliser les transports au lieu d'apports de capital?

M. Rose: C'est ce qui me préoccupe et c'est pourquoi j'en ai parlé dans presque tous les mémoires. Comment allons-nous, justement, nous assurer que les octrois, la péréquation ou les paiements soient passés aux gens à qui on devrait le faire?

M. H. W. Lundrigan: Je dirais, donnons l'occasion aux gens de Terre-Neuve afin que ces désavantages ne les touchent pas, ou je pourrais peut-être dire, rendons plus avantageux le fait de s'installer ici. L'habitant du centre du Canada qui place des capitaux regarde en Ontario, en Nouvelle-Écosse et à Terre-Neuve. Il se soucie peu du Canada. Il veut tout simplement placer des fonds. Vous êtes venus ici, vous avez voyagé par train, par autobus, etc.; est-ce que vous placeriez vos fonds ici?

M. Rose: Je n'en ai pas.

M. H. W. Lundrigan: Et alors, je prétends qu'il faut établir le climat économique nécessaire, et un des facteurs est le transport.

M. Horner: Monsieur Lundrigan, je désire vous féliciter de votre mémoire très bien documenté. En lisant votre mémoire, on peut se rendre compte que vous êtes au courant de l'économie de Terre-Neuve. Je suis préoccupé du coût de la vie élevé qui existe ici à Terre-Neuve. Quel pourcentage, diriez-vous, des frais généraux de l'industrie pourrait être attribué au facteur transport? Pourriez-vous nous donner une idée; est-ce un facteur important ou non?

M. H. W. Lundrigan: C'est un facteur phénoménal, non seulement en dollars et en cents, pour frais de transport...

[*Text*]

Mr. Horner: It is a nominal factor?

Mr. H. W. Lundrigan: It is phenomenal. It is a large factor. It is a tremendous factor. Mr. Ploughman mentioned delays in shipping, delays, for instance, caused by an ice blockade or inadequate facilities provided throughout the province for distribution and so on. It is a problem.

Mr. Horner: I think the one of the boards of trade blamed it on the carrier and said that the carrier was taking advantage of the subsidies and not necessarily passing it on to the consumer. Would you agree with that statement?

Mr. H. W. Lundrigan: You are asking, is it a fact?

Mr. Horner: All right: is it a fact that the carrier has been receiving the biggest advantage of this subsidy and is perhaps the culprit in the high cost of transportation on the island. Perhaps it is justifiable; perhaps it is the because of the elements he has to put up with.

Mr. H. W. Lundrigan: There is a subsidy of the ferry crossing as it is now across the Gulf, and the benefits, presumably, already go to the consumer because the pay back is to the transportation facility.

Mr. Horner: This is true and I am reminded now of the statement of the Minister in the House when he categorically stated that lawyers in Newfoundland charged the higher transfer rates in the building of homes than anywhere else in Canada. Now we have evidence to suggest that carriers are the most expensive part of transportation in Newfoundland.

I am just trying to isolate the factors that contributed to the high cost of living.

Mr. H. W. Lundrigan: Transportation problems contribute to the high cost. For instance, if you are building a building and it is delayed four weeks, it ends up in the cost of the project, does it not?

Mr. Horner: I presume you are a member of the Canadian Trucking Association or the Maritime Motor Transport Association. The Motor Transport Association, we are told, appeared on December 7, 1967 before the Minister of Transport in Ottawa, asking that the MFRA subsidy be made applicable to all modes of transportation, particularly the trucking industry. They were told that it would cost an additional $4 million and at that time the government turned it down. Do

[*Interpretation*]

M. Horner: Un facteur nominal?

M. H. W. Lundrigan: C'est phénoménal, u facteur très important. M. Ploughman a parl des retards dans la livraison des marchandi ses, délais entraînés par les barricades d glace, des services inadéquats, dans la pro vince, pour les livraisons, etc. C'est u problème.

M. Horner: Je crois qu'un des membres d *Board of Trade* a rejeté le blâme sur le transporteurs disant qu'ils bénéficiaient de subsides sans en faire nécessairement béné ficier les consommateurs. Est-ce que vous êtes d'accord avec une telle déclaration?

M. H. W. Lundrigan: Vous demandez s c'est un fait?

M. Horner: Oui. Est-ce un fait que le trans porteur a bénéficié du plus grand avantag que présente cette subvention et que c'es peut-être lui qui est responsable des coût très élevés du transport à Terre-Neuve. Il es peut-être justifié, vu les conditions auxquelle il doit se soumettre.

M. H. W. Lundrigan: Il y a une subventio pour le service des transbordeurs sur le golfe ces avantages, j'imagine, vont déjà aux con sommateurs parce que le retour se fait en service des transports.

M. Horner: Oui, c'est juste. Cela me rappelle la déclaration faite par le ministre en Chambre. Il a déclaré de façon catégorique je pense, que les avocats de Terre-Neuve exigeaient des taux de transfert, pour la construction de maisons, plus élevés que partou ailleurs au Canada. Maintenant, on dit que c sont les transporteurs qui sont le facteur le plus coûteux du transport à Terre-Neuve.

J'essaie tout simplement d'isoler les facteurs qui contribuent à votre coût de vie très élevé.

M. H. W. Lundrigan: Les problèmes de transport contribuent au coût très élevé, ainsi si vous construisez un édifice et que la construction est retardée de quatre semaines, cela augmente le coût des travaux.

M. Horner: Je suppose que vous faites partie de l'Association canadienne des camionneurs ou de l'Association des camionneurs des Maritimes. On a dit plus tôt, que cette dernière association a comparu, le 7 décembre 1967, devant le ministre des Transports à Ottawa, ils ont demandé que les subventions payées au titre de la Loi sur les taux de transport des marchandises dans les provinces maritimes soient applicables à tous les modes de transport et surtout à l'industrie du

Texte]

ou think that that $4 million was a realistic gure? If so, have you any idea whether it as low, high or otherwise?

Mr. P. Cook: I do not have any idea, but I as at that meeting—and Mr. Hellyer ssumed that any subsidy which would go to ie truck carrier would be over and above ie rail. In other words, there would be no ovement of traffic from rail to truck or rail water, the rail would remain at that level id increase the present level and the trucks ould add an additional burden. This was his eason at the time for turning it down.

Mr. Horner: He felt that MFR being pplied to the trucks and other modes would ot necessarily be passed on to the shipper. Is iat what he said?

Mr. Cook: No, no, I did not say that. He id that he thought that the rail traffic would emain at the present level and that this ould only create an additional expenditure money.

Mr. Horner: I see what you mean.

Mr. Cook: We argued that part of the pres- it payment of $14 million would be turned er to truck, water and air and that they ould be left with the lower amount paid to ie rail.

Mr. Horner: You firmly believe that it ould create an atmosphere of greater com- etition if it were passed on to all modes of ansportation?

Mr. Cook: I do not believe in subsidy at all. think subsidies should go to either the anufacturer or the consumer. The purpose a subsidy, in my understanding, is to make cheaper to the consumer. I think that we ould seek our own level in transportation.

Mr. Horner: I think we have seen plenty of idence to suggest that perhaps there is not ough competition in the transportation dustry in Newfoundland and in the Mari- nes generally.

Mr. Cook: Transportation is stifled because st from the gulf alone 40,000 pounds of eight in a boxcar costs $8 and a tractor-

[*Interprétation*]

camionnage. On leur a dit qu'il en coûterait quatre millions de dollars de plus, et à ce moment-là, le gouvernement a refusé. Croyez-vous que quatre millions de dollars représentaient un chiffre réaliste, et dans l'affirmative, pensez-vous que c'était élevé, faible ou quoi?

M. Cook: Je n'en ai pas la moindre idée, mais j'étais à cette réunion et M. Hellyer croyait que toute subvention qui serait donnée aux camionneurs serait en plus de ce qui serait donné aux chemins de fer. En d'autres termes, il n'y aurait pas de mouvement de trafic du rail à la route ou du rail au bateau, le rail resterait à ce niveau et augmenterait le présent niveau; et les camions seraient un fardeau additionnel. C'est la raison qu'il a invoquée à ce moment-là pour refuser la subvention.

M. Horner: Il croyait que les taux de transport des marchandises dans les provinces maritimes, appliqués aux camions et autres modes de transport, ne seraient pas alors nécessairement accordés à l'expéditeur.

M. Cook: Non, non. Je n'ai pas dit cela. Il a dit qu'il pensait que le trafic ferroviaire resterait au niveau actuel et que cela ne ferait que créer une dépense d'argent supplémentaire.

M. Horner: Oui, je comprends ce que vous voulez dire.

M. Cook: Nous disions qu'une partie du présent paiement de 14 millions de dollars seraient donnés au transport routier, maritime et aérien et ce serait sans doute le montant le moins élevé et restant qui sera payé au transport ferroviaire.

M. Horner: Vous croyez vraiment que cela créerait une atmosphère de plus grande concurrence si cela était accordé à tous les modes de transport.

M. Cook: Je ne crois pas du tout en ces subventions. Je pense que les subventions devraient aller au fabricant ou au consommateur. Le but d'une subvention, comme je le comprends, est de faire baisser le coût en faveur du consommateur. Je crois que nous devrions rechercher notre propre niveau dans le transport.

M. Horner: Je pense que nous avons eu suffisamment de preuves qu'il n'y a pas suffisamment de concurrence dans l'industrie des transports à Terre-Neuve et dans les Maritimes en général.

M. Cook: Le transport est étouffé parce que du golfe seulement, un wagon de 40,000 livres de marchandises dans un wagon couvert coû-

[*Text*]

trailer costs $120. You have to take into consideration also a minimum of 12 hours to lay in your equipment. The same equipment going over a 90-mile stretch of road would, if you averaged 45 miles an hour, take 2 hours. So it is quite a cost in manpower, lack of utilization of your capital investment and so forth.

Mr. H. W. Lundrigan: For instance, particularly with secondary industry, where there is a road and the transport units pick up the produce, take it to market and bring back on return trips, this is possible. But where the freight rate now is such that there is disparity, the manufacturer could not touch the road transport system; it has to go by rail and, consequently, runs into the difficulties on both ends.

Mr. Horner: I have one further question and it has to do with having the Maritimes Freight Rates Act apply to goods for export. Now today, under the Maritimes Freight Rates Act, within a select area you get a 30 per cent subsidy on goods coming into central Canada, for example, but not, as we heard yesterday, to the Caribbean or into the Boston area. I think, particularly back in 1867, many people in the Maritimes felt there should be an Atlantic free trade area, along the coast here particularly.

In a sense, having a Maritimes Freight Rates subsidy only apply to goods going into central Canada, I think it could be argued that you are in a way subsidizing the consumers in central Canada—and this should not necessarily be the case. If you could direct your goods to markets anywhere in the world, that subsidy should apply for the same length of travel. Do you know what I mean?

Mr. Cook: I agree with that.

Mr. Horner: And that would be of great benefit to various industries.

Mr. Cook: Oh, I think if there is going to be a subsidy it has to apply to all modes and it has to apply equally in all directions.

The Chairman: Mr. Perrault.

Mr. Perrault: In view of the remarks that we have heard from Mr. Lundrigan today, I would like to ask him whether we can presume that he believes that transportation sub-

[*Interpretation*]

tent $8., un tracteur coûte $120. Il faut aus tenir compte d'un minimum de retard de 1 heures dans la livraison de notre équipemen Ce même équipement parcourant, disons, un route de 90 milles, serait livré, si vous faite en moyenne 45 milles à l'heure, en deux heu res. C'est donc très coûteux pour la main d'œuvre, pour le manque d'utilisation de immobilisations et ainsi de suite.

M. H. W. Lundrigan: Par exemple, surtou en ce qui concerne les industries secondaire où il y a une route et les unités de transpor recueillent les produits, les acheminent a marché et en ramènent d'autres à leur retou cela est possible, mais où le tarif-marchandis est tel qu'il y a un écart, le fabriquant n peut s'intéresser au transport routier; il doi le faire par chemin de fer et c'est pourquo vous avez tant de difficultés aux deux bouts.

M. Horner: Une autre question. Il s'agit d voir les dispositions de la Loi sur les taux d transport de marchandises dans les Maritime s'appliquer aux produits d'exportatio Aujourd'hui, dans les régions choisies, au termes de la Loi, vous pouvez avoir une sub vention de 30 p. 100 pour les marchandise acheminées vers le Canada central, mais no pas, comme on l'a vu hier, vers les Antille ou la région de Boston. Je pense, surtout pou ce qui de 1867, que bon nombre de personne des Maritimes croyaient alors qu'on devrai avoir une zone atlantique de libre-échang surtout le long du littoral.

En un sens, si on avait une subventio visant les taux de transport de marchandise dans les Maritimes qui ne s'appliquerai qu'aux denrées acheminées vers le Canad central, je pense qu'on pourrait prétendre qu vous vous trouvez essentiellement à subven tionner les consommateurs du Canada centra et il n'en serait pas nécessairement ainsi. S vous pouviez vous tourner de n'importe que côté dans le monde, cette subvention devrai s'appliquer à la même distance de transpor Comprenez-vous ce que je veux dire.

M. Cook: Je suis d'accord.

M. Horner: Croyez-vous que ce serait avan tageux pour diverses industries?

M. Cook: Oh, je crois que s'il doit y avoi une subvention, il faudrait qu'elle s'appliqu à tous les modes de transport et dans toute directions.

Le président: Monsieur Perrault?

M. Perrault: Vu les observations que nou avons entendues de la part de M. Lundriga aujourd'hui, je voudrais lui demander s'i croit que les subsides de transport ne son

'exte]

lies are really a second best form of assis-ıce to the Province of Newfoundland and at he would rather see a strong economic se here which would eliminate the need for bsidies?

Mr. H. W. Lundrigan: Yes, I would say that true. If we have a strong economic base I ink that subsidies and freight rates fall into econdary position.

Mr. Perrault: You regard them as a tempo-ry means to strengthen the Newfoundland nomy, you do not look on them as some-ing to be perpetuated ad infinitum.

Mr. H. W. Lundrigan: I would not think ey should be. If we had a strong economic se I could not see it being a serious factor.

Mr. Perrault: Mr. Lundrigan, you have also oken of the problem of accessibility to pulation centres and markets. It is a prob-n that we face in Western Canada as well— traditional problem of selling in central nada. This gives rise to my next question. uld further tariff reductions or free trade certain areas of industry between Canada d the United States be of assistance to eco-mic development in Newfoundland?

Mr. H. W. Lundrigan: Yes, I think it uld, but you would be going down one il—you would be then specializing in the ovince in certain types of industry.

Mr. Perrault: But you talk about accessibil-to market?

Mr. H. W. Lundrigan: Yes.

Mr. Perrault: If lower tariffs are going to ake further population centres accessible to wfoundland industries, surely this would present a benefit for you.

Mr. H. W. Lundrigan: Yes.

Mr. Perrault: It might eliminate, presuma-y, some of the transportation subsidies ich we have agreed is the second best from aid.

Mr. H. W. Lundrigan: Yes.

Mr. Perrault: For example, some of the aritime provinces are interested in freer ade in forest products so they can sell coat-papers in the United States, for example. w this is an area which may eventually minate the need for transportation bsidies.

[*Interprétation*]

qu'un deuxième choix d'aide à la province de Terre-Neuve et que vous préféreriez avoir une assiette économique plus solide?

M. H. W. Lundrigan: Oui, je dirais que c'est vrai, si nous avons un fondement économique solide, je crois que les subsides et les tarifs-marchandises tombent à l'arrière plan.

M. Perrault: Vous voulez avoir un moyen permanent de renforcer votre économie. Vous ne voulez pas voir le subsides perpétués *ad infinitum*?

M. H. W. Lundrigan: Je ne crois pas qu'ils devraient l'être. Si le fondement était solide, je ne crois pas que ce soit un facteur sérieux.

M. Perrault: Monsieur Lundrigan, vous avez aussi parlé du problème d'accessibilité aux centres de population et aux débouchés. C'est un problème que nous avons aussi dans l'ouest du Canada. Vous savez que le problème traditionnel se présente toujours pour vendre dans le Canada central. J'en arrive donc à ma question suivante. Y a-t-il d'autres diminutions tarifaires ou des zones de libre-échange pour certaines industries entre le Canda et les États-Unis qui pourraient peut-être aider le développement économique de Terre-Neuve?

M. H. W. Lundrigan: Oui, je le crois, mais vous vous acheminiez dans une nouvelle voie, vous vous trouveriez à spécialiser dans la province dans certains genres d'industries.

M. Perrault: Vous parlez de l'accessibilité au marché.

M. H. W. Lundrigan: Oui.

M. Perrault: Si des tarifs inférieurs vont permettre que d'autres centres de populations soient à la portée des industries de Terre-Neuve, cela serait sûrement à votre avantage.

M. H. W. Lundrigan: Oui.

M. Perrault: Cela pourrait peut-être faire disparaître certaines subventions qui, nous l'avons convenu, sont la seconde forme préférée d'aide.

M. H. W. Lundrigan: Oui.

M. Perrault: Par exemple, certaines des provinces Maritimes s'intéressent à un plus libre échange pour les produits forestiers pour qu'ils puissent vendre du papier enduit aux États-Unis. C'est un secteur où il y aurait peut-être plus de nécessité d'avoir des subsides en matière de transport.

[*Text*]

Mr. H. W. Lundrigan: Yes, but I think your question leaves us where we are now. For instance, Newfoundland is regarded by most of Canada as a fisheries province. Some people think of it as a paper industry province. Now some people think of Labrador in terms of mining and if nobody thinks about mining then they are just not interested in it. Why should it be that way? We have disadvantages, geographically, because of markets. On page 541 you will note that it says if an industry were established on the west coast of the province our very minimum market would be 300 miles from us. So if you take tha attitude we are restricted to one, two or three modes of industry or else we are left abandoned.

Mr. Perrault: Yes, but you have water transport to the whole Atlantic Seaboard of the United States. Why would it not be feasible, for example, for you to establish a furniture manufacturing industry in Newfoundland? You have a skilled population, you have intelligent people.

Mr. H. W. Lundrigan: All right.

Mr. Perrault: Why could you not consider something like that?

Mr. H. W. Lundrigan: I agree. But can you see a market other than, say, the heart of Montreal for a shipload of furniture?

Mr. Perrault: There is the east coast of the United States.

Mr. H. W. Lundrigan: But could you not see that we would have to have warehouse facilities there. We are doing that with primary industry, but . . .

Mr. Perrault: But secondary industry is your main employer of people per dollar invested.

Mr. H. W. Lundrigan: That is right.

Mr. Perrault: So if you could get more markets for your goods it would be more beneficial. Frankly, many members of the Committee are trying to determine ways in which the job can be done in Newfoundland, partially through transportation subsidies, but we do not want to saddle all the Canadian taxpayers with limitless amounts of subsidies because we know, in the final analysis it is the second best form of aid.

Mr. H. W. Lundrigan: Right.

Mr. Perrault: So my question simply is whether there is some combination of freer

[*Interpretation*]

M. H. W. Lundrigan: Oui, mais je crois q votre question nous laisse où nous somm arrivés. Par exemple, on considère Terr Neuve comme étant une province de pêch Certains croient que c'est la province de l'i dustrie du papier. D'autres croient qu'a Labrador, ce sont les mines et si personne pense aux mines, on n'y est pas intéress Pourquoi en serait-il ainsi? Nous avons d désavantages sur le plan géographique, cause des marchés. A la page 541, vous voy que si une industrie s'établissait sur le littor ouest de la province, notre marché le pl rapproché serait au moins à 300 milles. Don si vous prenez une telle attitude, vous dev vous en tenir à un, deux ou trois modes d'i dustrie ou alors nous sommes abandonnés.

M. Perrault: Oui, mais vous avez tout littoral atlantique des États-Unis. Pourqu par exemple, ne pas avoir une industrie fabrication de meubles à Terre-Neuve? Vo avez une population intelligente, spécialisée.

M. H. W. Lundrigan: Très bien.

M. Perrault: Pourquoi ne pas songer quelque chose du genre?

M. H. W. Lundrigan: J'en conviens, ma pouvez-vous voir un marché autre que le ce tre même de Montréal pour une cargaison meubles?

M. Perrault: Le littoral est des États-Unis.

M. H. W. Lundrigan: Oui, mais ne voye vous pas qu'il nous faudrait avoir des insta lations d'entreposage là? Nous faisons ce pour les industries primaires.

M. Perrault: Mais votre industrie seco daire est votre principal employeur par doll investi.

M. H. W. Lundrigan: Oui, c'est juste.

M. Perrault: Alors, si vous avez plus débouchés pour vos marchandises, ce sera avantageux. Franchement, plusieurs membr du Comité essaient de trouver des voies moyens pour faire le travail à Terre-Neuv en partie par des subventions de transpor mais on ne veut pas imposer aux contribu bles des subventions qui sont sans limite parce que nous savons qu'en fin de compt c'est toujours la seconde meilleure formu d'aide.

M. H. W. Lundrigan: C'est juste.

M. Perrault: Donc, ma question vise savoir s'il y a un programme qui vise le libr

[Texte]

ade, lower tariffs and transportation subsi-ies that can do the job for Newfoundland?

Mr. H. W. Lundrigan: I agree.

Mr. Perrault: And I do not think that any : us should be defeatist about this whole iing.

Mr. H. W. Lundrigan: No. If you could ave a combination of all that you said, :condary industries and freer trade in cer-in types of industries. This all would aid and elp the situation. I am not saying that there as to be secondary industry.

Mr. Perrault: In what industries would you ke to see freer trade established?

Mr. H. W. Lundrigan: That is a good uestion.

The Chairman: I think we are getting away om our subject?

Mr. Perrault: But it relates to how much e are going to pay in transportation ubsidies.

The Chairman: Mr. Allmand.

Mr. Allmand: Mr. Lundrigan, how many arriers are competing in the trans-island rucking business now in Newfoundland?

Mr. Cook: Four on a regular basis. There re probably upwards of 100 on a non-chedule basis, but there are four on a regu-ar basis, issuing bills of lading and that sort f thing.

Mr. Allmand: These are all Newfoundland ompanies?

Mr. Cook: Intra they are; extra there are x, there are two mainland companies.

Mr. Allmand: Yesterday we heard that the NR is in trucking but they only truck along ie Trans-Canada Highway—they are not rucking down the gravel roads to the smaller ommunities. Does your company truck down ie gravel roads to serve all these smaller ommunities?

Mr. Cook: On an LCL freight basis, no; on truckload basis, yes, if road conditions per-nit. A lot of our roads are closed because of ridges and so forth, but when the roads are pen to us we do so on a truckload basis, yes.

[Interprétation]

échange des tarifs plus bas et des subsides en matière de transport et qui pourrait le faire pour Terre-Neuve?

M. H. W. Lundrigan: J'en conviens.

M. Perrault: Et je ne pense pas qu'aucun d'entre nous devrait être défaitiste à ce sujet.

M. H. W. Lundrigan: Non. Si vous pouviez avoir un ensemble de tout ce que vous avez dit, des industries secondaires et un échange plus libre pour certains genres d'industries, tout cela aiderait la situation. Je ne dis pas qu'il faut que ce soit des industries secondaires.

M. Perrault: Dans quelles industries aimeriez-vous avoir un échange plus libre?

M. H. W. Lundrigan: C'est une bonne question.

Le président: Je pense qu'on s'éloigne un peu du sujet.

M. Perrault: Il s'agit de rattacher cela aux subventions que nous paierons.

Le président: Monsieur Allmand?

M. Allmand: Monsieur Lundrigan, combien de transporteurs se font la concurrence pour le camionnage à travers l'île à Terre-Neuve?

M. Cook: Quatre régulièrement. Peut-être jusqu'à 100, disons, suivant des livraisons irrégulières. Mais il y en a quatre d'une façon régulière, émettant des feuilles de route, etc.

M. Allmand: Ce sont toutes des compagnies de Terre-Neuve?

M. Cook: Intra, oui; extra, il y en a six, deux qui sont des compagnies de Terre ferme.

M. Allmand: Hier, nous avons entendu dire que le National-Canadien pour ce qui est du camionnage venait seulement le long de la route transcanadienne. Ils n'entrent pas sur les routes de gravier vers les plus petites collectivités. Que dire de votre compagnie? Est-ce que vous faites du transport le long des routes de gravier vers les petites collectivités? Est-ce que vous les desservez ces petits villages?

M. Cook: Non, pas pour les chargements incomplets, mais pour les chargements complets, oui. Un bon nombre de nos routes sont fermées à cause des ponts. Mais, là où nous pouvons aller, oui.

[*Text*]

Mr. Allmand: Do these three competitors you have do the same? Were you including CNR in these four companies?

Mr. Cook: Oh no. That is not a competitor, that is the government.

An hon. Member: Hear, hear.

Mr. Cook: All other competitors get in on this.

Mr. Allmand: Do I get the impression that you feel the CNR trucking business is not fair competition for your company?

Mr. Cook: Most definitely. I am dead against it; first, on the grounds that they are subsidized under the MFRA because they travel on the rail bill of lading; second, they are subsidized in the general railway deficit; and third, they can move across that gulf for $8 and $40 a pound where it costs us $120.

Mr. Allmand: I understand that gasoline and fuel in Newfoundland is very expensive.

Mr. Cook: Our gasoline diesel tax is 2 cents a gallon less than Nova Scotia and it is 2 cents a gallon more than New Brunswick.

Mr. Allmand: You say 2 cents less than Nova Scotia.

Mr. Cook: And 2 cents more than New Brunswick.

Mr. Allmand: We had a false impression.

Mr. Cook: I might say that the transport costs of the fuel are higher though here, and when you get away from marine depots the cost of the gas goes up as high as 5 cents in transport.

The Chairman: Mr. Rose, on a supplementary.

Mr. Rose: I take it that you have no objection necessarily to the subsidy paid to the CNR as far as transportation is concerned just as long as you get a piece of it too.

Mr. Cook: I think I answered that earlier when I said that I prefer to see a subsidy go to the shipper or the manufacturer rather than to the carrier. The carrier can hide its subsidy and I do not think it gets passed on as quickly.

[*Interpretation*]

M. Allmand: Ces trois concurrents que vou avez, est-ce qu'ils font la même chose? Est-c que vous incluez le National-Canadien dan ces quatre compagnies?

M. Cook: Non, ce n'est pas un concurren c'est le gouvernement.

Une voix: Très bien.

M. Cook: Tous les autres concurrents participent.

M. Allmand: Ai-je bien l'impression qu vous croyez que ces opérations de camionnag du National-Canadien ne présentent pas un concurrence juste pour votre compagnie?

M. Cook: Sûrement. Je m'y oppose du fai qu'il est subventionné en vertu de la Loi su les taux de transport des marchandises dan les Maritimes. Ils ont une feuille de route deuxièmement, ils sont subventionnés e vertu de subsides ferroviaires, et c'est plus o moins caché, et, troisièmement, ils peuven franchir le golfe à $8 et $40 la livre et cel nous en coûte $120.

M. Allmand: Si je comprends bien l'assenc et le carburant à Terre-Neuve coûtent trè cher.

M. Cook: La taxe sur l'essence, sur l'huil diesel, est 2c. le gallon de moins qu'en Nou velle-Écosse et 2c. de plus qu'au Nouveau Brunswick.

M. Allmand: Vous dites 2 cents de moin qu'en Nouvelle-Écosse?

M. Cook: Oui et 2 cents de plus qu'a Nouveau-Brunswick.

M. Allmand: Nous avions une fauss impression.

M. Cook: Je dirais que le coût de transpor de l'essence est plus élevé ici, et lorsque l'or s'éloigne des dépôts maritimes l'essence es augmentée même de 5 cents.

Le président: Monsieur Rose, questio complémentaire?

M. Rose: Je ne crois pas que vous soye vraiment opposé à la subvention payée a National-Canadien aussi longtemps que vou en ayez une part.

M. Cook: Je pense y avoir répondu auparavant lorsque, j'ai dit que je préférais voir un subside aller à l'expéditeur plutôt qu'a transporteur. Le transporteur peut cacher l subside et je ne crois pas qu'il est rapidement transmis.

[Texte]

Mr. Rose: Are you saying this as a trucker?

Mr. Cook: I am saying this as a business-an. I feel that you are far better off if the ipper or manufacturer gets the subsidy ecause I think our free enterprise system ill force him to pass it on faster than the arrier.

Mr. Rose: This has been a concern all rough these hearings, and it has been men-oned nearly every time. The mechanics of it e that there are far fewer carriers than ere are shippers and the big problem of iministration is probably going to eat up a t of the costs, as well.

Mr. Cook: There does not seem to be any roblem of collecting income tax or Canada ension Plan. I think it would work pretty ell if it were executed properly.

Mr. Rose: I see. They should open their ooks as you people do.

Mr. Cook: I think it is reasonable.

The Chairman: Mr. Allmand?

Mr. Allmand: Your trucks cross over to ova Scotia by the ferry. Are you doing that usiness now?

Mr. Cook: Yes, we operate regularly. When say "regularly", it depends on the ferry. We o regularly to Nova Scotia and New runswick.

Mr. Allmand: Do any of the Nova Scotia-ew Brunswick carriers come across to Port ux Basques?

Mr. Cook: There are a few coming on a egular basis, yes.

Mr. Allmand: Yesterday the representatives f the Newfoundland government gave us uite a detailed program for a trunk road evelopment in Newfoundland. I presume at you would very strongly support their equest to us? Are you familiar with their rief?

Mr. Cook: Some of it, yes. I agree with the oard of Trade on this. I think there has to e a lot of planning and that it has to be done the light of what is going to be there in 10 ears or 20 years time. Certainly the Burin eninsula, the Bonavista Peninsula and the reat Northern Peninsula need roads, and eed them very very badly; and that is where he bulk of our population is now centred, ith the exception of the South coast, outside f St. John's, Corner Book and Grand Falls.

Mr. Allmand: Thank you very much.

[*Interprétation*]

M. Rose: Vous dites cela en tant que camionneurs?

M. Cook: En tant qu'homme d'affaires, c'est un avis personnel. Je suis d'avis qu'il vaut beaucoup mieux, disons, que l'expéditeur ou le fabriquant obtienne la subvention, et je pense qu'on peut le faire plus facilement.

M. Rose: C'est une préoccupation qui est revenue tout au cours de ces audiences et qui fut mentionnée à peu près chaque fois. Il y a beaucoup moins de transporteurs que d'expéditeurs, et l'administration pourra représenter une bonne partie des coûts.

M. Cook: Avec l'impôt et le Régime de pensions du Canada, j'imagine que cela pourrait très bien fonctionner.

M. Rose: Il leur faudrait ouvrir leur livres tout comme les autres.

M. Cook: Je crois que c'est raisonnable.

Le président: Monsieur Allmand?

M. Allmand: Vos camions vont en Nouvelle-Écosse par le transbordeur? Est-ce que vous le faites maintenant?

M. Cook: Oui, nous opérons régulièrement; tout dépend du transbordeur. Nous allons régulièrement au Nouveau-Brunswick et en Nouvelle-Écosse.

M. Allmand: Est-ce qu'il y a des transporteurs de la Nouvelle-Écosse et du Nouveau-Brunswick qui traverse à Port-aux-Basques?

M. Cook: Oui, il y en a quelques-uns qui le font régulièrement.

M. Allmand: Hier, les représentants du gouvernement de Terre-Neuve nous ont exposé un programme détaillé pour le développement des routes principales à Terre-Neuve. J'imagine que vous appuyez fortement ces demandes qu'ils nous ont formulées. Est-ce que vous connaissez leur mémoire?

M. Cook: Une partie, oui. Je suis d'accord avec la chambre de commerce. Je crois que cela prendra beaucoup de planification et que cela devra se faire à la lumière de ce qu'il y aura d'ici 10 ou 20 ans. Les péninsules de Burin, de Bonavista et du Nord ont un besoin urgent de routes, et c'est là où se trouve le gros de la population, à l'exception de la côte sud, à l'extérieur de Saint-Jean, Cornerbrook et Grand Falls.

M. Allmand: Merci beaucoup.

[*Text*]

The Chairman: Mr. Mahoney?

Mr. Mahoney: On the "land bridge" concept, sir, you have about 90 miles from North Sydney to Port aux Basques. When you speak of a rate equivalent to the highway rate are you speaking of a cost of moving your unit 90 miles, plainly and simply, or are you suggesting a rate that would, in effect, compensate you for the delay in time, as well? In one case we are talking about a two-hour movement and in the other case presumably seven or eight.

Mr. H. W. Lundrigan: If it were just purely and simply the 90 miles, that would be progress.

Mr. Mahoney: The time dimension is not really...

Mr. H. W. Lundrigan: The time we have learned to live with. We would like to have compensation, but it is difficult to pay enough money to compensate for time, depending on the reason for the delay.

Mr. Mahoney: Yes; so you are really speaking in the one dimension of distance.

Mr. H. W. Lundrigan: At the moment, yes. I mean as far as the season is concerned, yes.

Mr. Mahoney: Secondly, you refer to the CNR being able to move a unit across this channel for $8 and yourselves for $120. Is it a fact that an identical unit with a CNR sign on it gets over at something like one-fifteenth the cost?

Mr. Cook: As close as we can come, and I refer to the MMPA brief which was mentioned earlier, it is calculated on the average cost per mile to move a car in the Maritime provinces. This is the basis. They also consider the commodities, but the average worked out to $8. On P.E.I. the same situation exists. On Prince Edward Island I think it is $15.90 or $16 for a tractor trailer and it is $2 for a boxcar both ways. I mean $2 over, and if it comes back empty it is still only $2.

Mr. Mahoney: You are then speaking of the CNR moving its freight in boxcars and not in tractor-trailers?

Mr. Cook: It is a container to move freight and it is not really important what the shape

[*Interpretation*]

Le président: Monsieur Mahoney?

M. Mahoney: Selon le concept du pont te restre, il y a environ 90 milles de North Sy ney à Port-aux-Basques. Lorsque vous parl d'un taux équivalent à celui qui prévaut s les grandes routes, parlez-vous alors d'u coût pour le transport de votre unité sur u parcours de 90 milles purement et simpl ment, ou est-ce que vous parlez d'un taux q en réalité vous compenserait pour le retard Dans un cas on parle de deux heures et da l'autre cas de 7 ou 8.

M. H. W. Lundrigan: Si nous parlions sim plement de 90 milles, cela constituerait dé un progrès.

M. Mahoney: Le facteur temps...

M. H. W. Lundrigan: Nous avons appris nous arranger du facteur temps. Nous aim rions avoir de la compensation pour ce temp mais il est difficile d'obtenir suffisamme d'argent pour compenser pour le temp quelle que soit la raison du retard.

M. Mahoney: Mais vous ne parlez que d'un dimension.

M. H. W. Lundrigan: Oui, en ce qui con cerne la saison.

M. Mahoney: Deuxièmement, vous dite que le National-Canadien peut déplacer un unité en travers ce détroit pour $8 et, vous mêmes, il vous en coûte $120. Est-ce un fai qu'une unité identique qui porte le sigle d CN coûte moins cher à transporter, parfois 1 fois moins?

M. Cook: Je cite maintenant le mémoire d la MPA dont j'ai déjà parlé et qui a ét présenté à Fredericton:

> Aussi approximativement que possible, l coût du transport par rail est calculé d'a près le millage—le coût moyen par mill pour transporter une unité dans les pro vinces Maritimes.

C'est ce qui sert de base. On a trouvé que l moyenne était de 8 dollars. L'Île du Prince Édouard connaît la même situation, où il e coûte $15.90 ou $16 pour un camion-remorqu et $2 pour un wagon couvert aller et retour Je veux dire qu'il en coûte $2 pour l'aller e $2 pour le retour, même à vide.

M. Mahoney: Vous parlez du CN qui trans porte sa marchandise en wagons couverts e non en camions-remorque?

M. Cook: Il s'agit d'un cadre pour transporter de la marchandise, et la couleur ou la

'exte]

the colour of it is. It is a container in hich freight is carried that counts.

Mr. Mahoney: I appreciate that, but I just anted to understand exactly what we are lking about. A CN tractor-trailer unit...

Mr. Cook: It would depend entirely on the ll of lading on which it moved. If it moves a rail bill of lading and if the movement as a passenger plan I would imagine they ould be assessed in the same manner as we 'e, but I would have to find this out for ire. However, if it is a movement on a CN ll of lading it is assessed on the railway hedule of rates; and most of their goods do ove under a CN bill of lading. In the same anner they are able to transfer part of the FRA once it is approved to their trucks.

Mr. Mahoney: Thank you.

The Chairman: Mr. Skoberg?

Mr. Skoberg: Mr. Chairman, Mr. Lundrigan nd possibly Mr. Cook may enter into this articular phase. You mentioned a while ago iat the CNR was not a competitor; it was the overnment. When I look at the preamble of our brief I see that the majority of what we ave before us was actually built by the peole of the province and is operated by your rporation, I presume. How can there be ompetition, and how can you speak about ompetition, if these industries are owned by ie province of Newfoundland? If you are anaging these corporations, the Atlantic ypsum Limited and North Star Cement imited, in what relationship are you operatng with the government at this particular me?

Mr. H. W. Lundrigan: In the case of North tar Cement Limited, we are associated in hat we are on the west coast of Newfoundand and consequently joined in on this brief. Ve have no other connection. That is the Jorth Star Cement Limited.

In the case of Atlantic Gypsum Limited, his was an industry that was operating at the ime. We took it over at one fifth of its capacty, and took it over as a management conract with the provincial government, to conlinue its operation and endeavour to improve t.

Mr. Skoberg: In the event that the provinial government is in favour of the retention of the MFRA rates, would it not be correct hat, as management people in that particular

[Interprétation]

forme ne sont pas importantes. Ce qui compte, c'est que c'est un cadre qui sert à transporter de la marchandise.

M. Mahoney: Je comprends, mais je voulais aussi comprendre ce dont nous parlions. Un camion-remorque du CN...

M. Cook: Tout dépend de la feuille de route. S'il est transporté par rail dans un train de voyageurs, il sera évalué de la même façon que nous, mais il faudrait que je m'en assure. Cependant, si c'est une feuille de route du CN, le coût du transport sera calculé d'après les taux du chemin de fer, et la majorité de leurs marchandises est transportée sous une feuille de route du CN. De la même façon, ils peuvent transférer une partie des taux de la Loi sur les taux de transport des marchandises dans les provinces Maritimes une fois qu'elle sera approuvée pour le transport fait par camion.

M. Mahoney: Merci.

Le président: Monsieur Skoberg?

M. Skoberg: MM. Lundrigan et Cook pourraient peut-être répondre à ma question. Vous avez dit il y a quelque temps que le National-Canadien n'était pas un concurrent mais que c'était le gouvernement. Dans votre mémoire, dans le préambule, je vois que la majeure partie de ce que nous avons ici a été construit par des gens de la province et est administré par votre société, je présume. Comment peut-il y avoir de la concurrence et comment pouvez-vous parler de concurrence si ces industries sont la propriété de Terre-Neuve? Si vous gérez ces corporations que nous avons ici, Atlantic Gypsum Limited et North Star Cement Limited, quels sont vos rapports avec le gouvernement à l'heure actuelle?

M. H. W. Lundrigan: Dans le cas de la *North Star Cement Ltd.*, nous sommes associés en ce sens que nous sommes sur la côte ouest de Terre-Neuve et par conséquent nous avons participé à ce mémoire. Nous n'avons pas d'autre rapport. Dans le cas de l'Atlantic Gypsum Limited, il s'agissait d'une industrie qui, à ce moment-là, fonctionnait et ne fonctionnait qu'à un cinquième de son plein rendement. Nous avons pris un contrat avec le gouvernement provincial en vue d'en maintenir l'exploitation et de l'améliorer.

M. Skoberg: Si, disons, le gouvernement provincial était en faveur du maintien des dispositions de la Loi sur les taux de transport des marchandises dans les provinces

[*Text*]

industry, you would support the same principle?

Mr. H. W. Lundrigan: You are referring here to Mr. Cook's opinion that...

Mr. Cook: I qualified it by saying it was personal.

Mr. Skoberg: I am just trying to clarify it in my mind.

Mr. H. W. Lundrigan: Relative to the competition in the trucking industry, *per se*—and obviously all interests are not exactly the same when there is a conglomerate as you have here—as long there is competition the level at which it is established is irrelevant. The freight rate subsidy could be applied, or not applied, as long as they are all equal. This is the truckers' opinion.

Mr. Skoberg: You make this quite clear. You say in your preamble:

> Lundrigans Limited has an operating management agreement for Atlantic Gypsum Limited. This firm was among the first of the new industries built by the Government of Newfoundland after Confederation.

Mr. H. W. Lundrigan: That is right.

Mr. Skoberg: As of today what is your direct connection with the government in the operation of Atlantic Gypsum Limited?

Mr. H. W. Lundrigan: It is a management contract, to take over the plant and run it economically on a basis competitive with products coming into the province; and without any subsidy from the provincial government, or any other government, other than what is given to everyone in freight and so on.

Mr. Skoberg: And your profit-and-loss statement has to be made available to the government.

Mr. H. W. Lundrigan: Yes, sir.

Mr. Skoberg: Are these industries now showing a considerable, or a recognized, profit?

Mr. H. W. Lundrigan: After we took it over about three years ago it showed an improvement in the second year, and it is now in the third year. It is a profit-making business; it is very marginal, but it is profitable, and is now at about 40 per cent production capacity rather than 20 per cent.

[*Interpretation*]

Maritimes, n'est-il pas juste de dire que, e tant que responsables de l'administratio vous appuierez le même principe?

M. H. W. Lundrigan: Vous parlez ici d l'avis de M. Cook?

M. Cook: J'ai dit que c'était une opinio personnelle.

M. Skoberg: Je voulais préciser.

M. H. W. Lundrigan: Pour ce qui est de l concurrence dans l'industrie du camionnag il est évident que les intérêts ne sont pas tou à fait les mêmes lorsqu'il y a cet ensembl que vous avez ici. Aussi longtemps qu'il y concurrence, le niveau n'est pas pertinent. O pourrait appliquer ou non les subsides sur l tarif-marchandises, aussi longtemps qu'il aura égalité. Voilà donc l'avis de camionneurs.

M. Skoberg: Vous dites dans votre préam bule que:

> De plus, la *Lundrigrans Limited* dirige l compagnie *Atlantic Gypsum Limited* e vertu d'un accord conclu avec cette der nière. La *Atlantic Gypsum Limited* étai une des nouvelles industries construite par le gouvernement de Terre-Neuv après la Confédération.

M. H. W. Lundrigan: C'est juste.

M. Skoberg: Quels sont vos rapports direct avec le gouvernement pour ce qui est de l'ex ploitation de la *Atlantic Gypsum Limited*?

M. H. W. Lundrigan: C'est un contrat d'ad ministration en vue d'exploiter l'usine d façon concurrentielle avec les produits qu entrent dans la province, et cela, sans sub vention du gouvernement provincial ou d tout autre gouvernement, à l'exception de ce que chacun reçoit pour le transport des marchandises.

M. Skoberg: Donc votre bilan doit être mis à la disposition du gouvernement?

M. H. W. Lundrigan: Oui.

M. Skoberg: Est-ce que ces industries font maintenant des bénéfices assez élevés?

M. H. W. Lundrigan: Nous avons assumé la direction de la compagnie il y a trois ans, la situation s'est améliorée dès la deuxième année et, maintenant, nous en sommes à la troisième année. C'est rentable, marginal mais rentable, et la capacité de production est maintenue à 40 p. 100 au lieu de 20 p. 100.

[*Texte*]

Mr. Skoberg: What amount of freight com-ıg out of Atlantic Gypsum Limited and Iorth Star Cement Limited is carried by rail s compared to truck?

Mr. H. W. Lundrigan: Nearly all is carried y rail for the benefit of the subsidy, and we et in so far as Cape Breton Island with the roducts.

Mr. Skoberg: I have another question, Mr. hairman, for Mr. Lundrigan. You refer to Iorth Star Cement Limited. In view of what ve were told here yesterday about the rate ometimes being as much as 50 per cent less er hour for the workers, what is the com-arison between construction costs here and ıose on the mainland?

Mr. H. W. Lundrigan: Many studies have een made on this by various agencies, and it as been established that the construction ost in Newfoundland is in the order of 20 er cent higher than in other parts of Canada.

Mr. Skoberg: The reason I ask, sir, is that , in fact, transportation is a major cause of ıe high cost of living in the province it hard-adds up in the case of a product that is ıade right here.

Mr. H. W. Lundrigan: The products that re made here are sold competitively with roducts coming in from other parts of Cana-a—sold competitively—and at the same time eople are employed in their manufacture. hat is the only benefit.

Mr. Skoberg: How much export do you ave from the North Star Cement Limited?

Mr. H. W. Lundrigan: Outside the province?

Mr. Skoberg: Yes.

Mr. H. W. Lundrigan: Perhaps Mr. ewhook could answer that.

Mr. Ronald Newhook (North Star Cement imited): Approximately 30 per cent.

Mr. Skoberg: Thirty per cent to export. hat is its destination?

Mr. Newhook: Mostly Labrador.

Mr. H. W. Lundrigan: To Seven Islands.

Mr. Newhook: This would be the lower St. awrence, and eventually some of this would et back into the province of Newfoundland ırough Seven Islands.

[*Interprétation*]

M. Skoberg: Quelle proportion de marchandises sortant de la *Atlantic Gypsum Limited* et de la *North Star Cement Limited*, est transportée par rail plutôt que par camions?

M. H. W. Lundrigan: A peu près tout est transporté par le chemin de fer vu la subvention et nous allons jusqu'à l'île du Cap-Breton avec ces produits.

M. Skoberg: Une autre question, monsieur le président. Monsieur Lundrigan, vous parlez de la *North Star Cement Limited*. Vu ce dont on nous a parlé hier, en nous disant que le taux horaire est parfois jusqu'à 50 p. 100 inférieur, pour les travailleurs, quelle comparaison pouvez-vous établir entre le coût de construction ici comparativement à celui du continent?

M. H. W. Lundrigan: Bon nombre d'études ont été faites par différents organismes et on a établi que le coût de construction à Terre-Neuve était de 20 p. 100 plus élevé que dans les autres régions du Canada.

M. Skoberg: La raison pour laquelle je vous pose la question, c'est que si vraiment le transport est un des principaux facteurs de l'augmentation du coût de la vie ici dans la province, cela ne veut pas dire que vous pourriez utiliser un produit fabriqué ici et utiliser ensuite le transport comme étant le motif de ces prix élevés?

M. H. W. Lundrigan: Les produits fabriqués ici sont vendus en concurrence avec les produits venant des autres parties du Canada, le seul avantage étant que les gens d'ici sont employés à leur fabrication.

M. Skoberg: Quelles sont les exportations de la North Star Cement Limited?

M. H. W. Lundrigan: Vers l'extérieur de la province?

M. Skoberg: Oui.

M. H. W. Lundrigan: M. Newhook pourrait peut-être répondre à cette question.

M. Ronald Newhook (North Star Cement Limited): Environ 30 p. 100 d'exportations.

M. Skoberg: Vers quelles destinations?

M. Newhook: Surtout au Labrador.

M. H. W. Lundrigan: Sept-Îles aussi.

M. Newhook: Le Bas-Saint-Laurent; une partie reviendrait à Terre-Neuve par Sept-Îles.

[*Text*]

Mr. Skoberg: Would I be correct in saying, as we were told yesterday, that in some cases wages are as much as 50 per cent less than they are in other parts of Canada?

Mr. H. W. Lundrigan: There are areas in which this is quite correct; but there are industries where it is not correct.

Mr. Skoberg: It would not be correct in the industry that you are operating?

Mr. H. W. Lundrigan: No; it may be correct in certain aspects of our industry, yes, but not in all.

Mr. Skoberg: Is it your opinion that the port facilities for the handling of containerization traffic should be supplied by the federal authorities.

Mr. H. W. Lundrigan: My reasoning that the federal authorities should be involved is that the development of containerization in other parts of Canada is very very phenomenal indeed and other means of transport such as that piggy back operation Toronto-Montreal is quickly done, but we do not know of it down here. We cannot send a piggy back from St. John's to Sydney. It will not be accepted in the sense that it is in the other parts of Canada.

Mr. Skoberg: I am referring to the facilities such as a crane for the moving of these containers. Do you believe it is the responsibility of the federal government and the port authorities to install this type of crane?

Mr. H. W. Lundrigan: Yes; to provide this service.

Mr. Skoberg: There have been indications from many sources that this should be the responsibility of the shippers, and once again there is added cost. My point is merely to consider that.

Mr. H. W. Lundrigan: I could not support that in the secondary industry sense, because there are many, many shippers and it has to be centralized through one agency, which would be the carrier.

Mr. Skoberg: I have one final question, Mr. Chairman. In our travels, of course, we hear a considerable amount of discussion of, and references to, the waterfront gangs. We see it in other parts of the country, as well. Possibly I could use my own particular community as an example. Are these people controlling the actual interests of secondary industry at this time? For a so-called waterfront gang to

[*Interpretation*]

M. Skoberg: Est-ce que j'ai raison de dir que certains des salaires sont jusqu'à 50 p 100 inférieurs à ceux des autres régions d Canada?

M. H. W. Lundrigan: Oui. Dans certain secteurs, c'est juste, mais pas dans d'autres.

M. Skoberg: Dans votre industrie, est-c que c'est juste?

M. H. W. Lundrigan: Non, peut-être suivan certains aspects de notre industrie mais no pas pour tous.

M. Skoberg: Est-ce que vous croyez que le services portuaires pour la manutention de cadres devraient être fournis par le gouverne ment fédéral?

M. H. W. Lundrigan: La raison pou laquelle je veux la participation du gouverne ment fédéral, c'est que la mise au point d transport par cadres dans les autres région du Canada constitue un élément plutôt phéno ménal, et les autres moyens de transpor comme le service rail-route Toronto-Montréa sont assez rapides mais on n'a rien de cela ici On ne peut rien envoyer par service rail route de St-Jean à Sydney. Ce ne sera pa accepté comme dans les autres régions d Canada.

M. Skoberg: Je parle aussi des autres servi ces, comme les grues. Croyez-vous que c'es là la responsabilité du gouvernement fédéra et des autorités portuaires?

M. H. W. Lundrigan: Oui, afin d'assurer c service.

M. Skoberg: On a souvent dit que c devrait être la responsabilité des expéditeurs et cela ajoute de nouveau aux frais. Je veux seulement tenir compte de cela.

M. H. W. Lundrigan: Je ne suis pas d'ac cord pour ce qui est des industries secondai res car il y a bon nombre d'expéditeurs, et i faut que tout soit centralisé à partir d'une agence qui serait le transporteur.

M. Skoberg: Juste une dernière question Au cours de nos voyages, nous entendrons beaucoup parler des bandes des ports. On peut le voir aussi dans d'autres régions du pays. Je pourrais peut-être prendre ma propre collectivité comme exemple, est-ce que ces personnes contrôlent vraiment les industries secondaires en ce moment? Lorsqu'une équipe travaille ensemble, se peut-il qu'elle

[*Texte*]

ork together, do they exempt any possibility f more competition? Do you believe this is ue here?

Mr. Lundrigan: I am not familiar with that.

Mr. Cook: Are you saying that there is a oup of merchants ganging together to stop e from coming in?

Mr. Skoberg: You people refer to a water-ont gang here. No doubt it will be a group anding together. Well, all right, we will use group of merchants then. Do you think this as any bearing at all in fact?

Mr. H. W. Lundrigan: That would prevent econdary industries from coming in? Is that our question?

Mr. Skoberg: Or competition generally.

Mr. H. W. Lundrigan: No. I would say you ould find pockets of that but if any mer-ant is affected he naturally resists. But on e basis of people who are interested in the evelopment of this province I could not see at for anything.

The Chairman: Mr. Horner.

Mr. Horner: I do not know whether these gures have been given to the Committee, ut what percentage of the transportation to Newfoundland coming across from North ydney to Port aux Basques would move by il and what percentage would move by uck?

Mr. H. W. Lundrigan: Which way now?

Mr. Horner: Let us say coming to ewfoundland.

Mr. H. W. Lundrigan: Coming to New-undland.

Mr. Cook: I would say less than 5 per cent oves by truck.

Mr. Horner: Less than 5 per cent goes by uck. Basically because of that land bridge?

Mr. Cook: Yes. The whole concept of the ing, the way it is operated right now, really galizes a monopoly. It is only fair to say at at the time this Act was passed and the nditions were drawn up there was no high-ay, but the problem is that there is a reluc-nce to change, and this is the whole crux of e matter.

Mr. Horner: I agree. This what we are nding in Newfoundland and in the Mari-mes, that the Maritime Freight Rates Act ally has not grown with the conditions. To

[*Interprétation*]

empêche une concurrence supplémentaire? Croyez-vous que ce soit vrai ici?

M. Lundrigan: Je ne suis pas au courant de cette situation.

M. Cook: Dites-vous qu'il y a des marchands qui se groupent pour empêcher certains produits d'entrer?

M. Skoberg: Vous parlez de cette bande du bord de l'eau. Il est certain qu'il s'agira d'un groupe qui fera front commun. Bon, alors, parlons d'un groupe de marchands. Est-ce que vous croyez que cela a quelque rapport que ce soit?

M. H. W. Lundrigan: Que cela empêcherait des industries secondaires de venir ici? Est-ce là votre question?

M. Skoberg: Ou la concurrence en général.

M. H. W. Lundrigan: Non. Je dirais qu'on en trouverait, mais si un marchand est affecté, naturellement, il résiste. Mais suivant les personnes qui s'intéressent au développement de cette province, je ne vois pas qu'il puisse en être ainsi.

Le président: Monsieur Horner.

M. Horner: J'ignore si les chiffres ont été fournis au Comité, mais quelle proportion du transport vers Terre-Neuve en provenance de Sydney-Nord à Port aux Basques viendrait par chemin de fer et quel pourcentage par camion?

M. H. W. Lundrigan: Dans quel sens?

M. Horner: Disons, pour aller à Terre-Neuve.

M. H. W. Lundrigan: Pour aller à Terre-Neuve.

M. Cook: Je dirais que moins de 5 p. 100 est transporté par camion.

M. Horner: Moins de 5 p. 100 par camion. Essentiellement à cause de ce pont?

M. Cook: Oui. Tout le principe de la question, de la façon dont cela fonctionne maintenant, se trouve à légaliser un monopole. Il est juste de dire qu'au moment où cette loi a été adoptée et les conditions posées, il n'y avait pas de route, mais le problème est que l'on répugne à changer et c'est là le cœur du problème.

M. Horner: Oui, j'en conviens. C'est ce que nous trouvons à Terre-Neuve et dans les Maritimes, à savoir que la Loi sur les taux de transport des marchandises dans les provinces

[*Text*]

pursue that question a little further, what percentage moves out in the same way?

Mr. H. W. Lundrigan: Out of the province?

Mr. Horner: Out of the province, across that...

Mr. H. W. Lundrigan: If you take truck and rail both, virtually nothing. In fact the shame of it is this. They installed in Port aux Basques a system whereby a mainland rail car comes across on a specially built ferry, is transferred to our local gauge railway, comes to St. John's, unloads its load and goes back on the same ship empty. And if you put anything in that you are paying the freight rate. It should go back for nothing. I mean it is a waste of money to use facilities for air, when the same ship that brings it over can take it back for no money.

Mr. Horner: I did not quite understand that. If you put anything in that you pay a freight rate on it?

Mr. H. W. Lundrigan: Of course you pay a freight rate. Every facility on that route right back to the mainland has the capability of handling it whether it is loaded or empty. It is the same cost whether loaded or empty, yet the freight costs money going back whereas the benefits could come to us for nothing.

The Chairman: Mr. Carter.

Mr. Carter: What does North Star cement sell for per sack in St. John's?

Mr. Newhook: Approximately $1.50.

Mr. Carter: What does the same cement sell for in Montreal?

Mr. Newhook: From that same company?

Mr. Carter: From the same company.

Mr. Lundrigan: I would have to meet the competition or it would not sell.

Mr. Carter: It would be less than $1.50, I presume.

The Chairman: Gentlemen, would you please talk one at a time because it is very hard to understand you.

Mr. Carter: My question, Mr. Chairman, concerned the price of a sack of dry cement. In St. John's manufactured by North Star Cement it is $1.50 and in Montreal I understand it is 50 cents a bag less. Am I correct?

[*Interpretation*]

Maritimes n'a pas su s'adapter aux condition nouvelles. Pour approfondir cette question u peu, quel pourcentage va vers l'extérieur d la même façon?

M. H. W. Lundrigan: A l'extérieur de l province?

M. Horner: A l'extérieur de la province, travers ce...

M. H. W. Lundrigan: Presque rien, si vou prenez à la fois le camion et le chemin de fe De fait, voilà le grand problème. On a install à Port aux Basques un système par lequel u wagon du continent vient à bord d'un trans bordeur spécial, est transféré à notre chemi de fer à notre écartement, vient à Saint-Jean décharge et retourne à vide sur le mêm navire. Et si vous y mettez quoi que ce soi vous payez un tarif-marchandises. Il devrai retourner sans rien payer. C'est un gaspillag d'argent de prendre l'avion, alors que l même navire qui l'amène pourrait le ramener.

M. Horner: Je n'ai pas tout à fait compris Si vous y mettez quoi que ce soit, vous paye un tarif-marchandises?

M. Lundrigan: Évidemment. Tout servic sur ce parcours vers le continent peut s'e charger, qu'il soit chargé ou vide. C'est l même coût qu'il soit vide ou rempli, et pour tant le retour des marchandises coûte de l'ar gent, alors que les bénéfices pourraient nou venir pour rien.

Le président: Monsieur Carter.

M. Carter: Combien *North Star Cemen* vend-il le paquet à Saint-Jean?

M. Newhook: $1.50 environ.

M. Carter: Combien ce même ciment coûte t-il à Montréal?

M. Newhook: De la même compagnie?

M. Carter: Oui.

M. Lundrigan: Je dois faire face à la concurrence ou il ne se vendrait pas.

M. Carter: Moins de $1.50, je suppose.

Le président: Messieurs, veuillez parler un à la fois car il est très difficile de vous comprendre.

M. Carter: Monsieur le président, ma question portait sur le prix d'un sac de ciment sec A Saint-Jean, il est de $1.50, fabriqué par *North Star Cement,* et à Montréal, je pense que c'est 50 cents de moins le sac. Est-ce juste?

[Texte]

Mr. Newhook: We have not sold cement in Montreal for approximately 12 years. We cannot compete in that area.

Mr. Carter: I did not know whether there were any special subsidies on the transportation of freight which would affect the selling price in Montreal versus that of St. John's.

Mr. Newhook: No, our competitors in Quebec can ship their cement cheaper than we can over the same distance.

The Chairman: Does that answer your question?

Mr. Carter: Yes. Thank you.

The Chairman: Mr. Horner.

Mr. Horner: I want to pursue that idea. We have the freight car coming over to St. John's and going back empty, and you stated, Mr. Lundrigan, that if you put anything in it, the rate is then higher than what it was coming out to St. John's.

I have not been in the trucking business commercially, but one would assume that it would go back at half the rate. One would assume, once you had the car over in St. John's and it had to go back to Port aux Basques anyway, that even half the rate would be enough. If I were a commercial shipper, I would not expect to use that car for nothing.

Mr. H. W. Lundrigan: Maybe a 10 per cent rate?

Mr. Horner: Well, there would be a question of insurance and liability and the whole lot. I know they are very knowledgeable as to how to arrive at the rates, but they do use a lot of arguments such as this.

But I would assume it should be at half the rate—at least not more than half and certainly not more than the initial rate.

Mr. Cook: You see, there is not the competitive atmosphere for the initial rate as you have coming in. I use your general statement and it again reflects my personal views in this particular case. I think it is safe to say that although the railways had trouble raising rates, they had no trouble in changing classification. So, something that at one time was Class 85 or Class 100, to meet competition it was perhaps changed to Class 70, where another mode came into the picture. So, this

[*Interprétation*]

M. Newhook: Nous n'avons pas vendu de ciment à Montréal depuis environ douze ans. On ne peut faire de concurrence dans ce secteur.

M. Carter: Je ne savais pas s'il y avait de subventions spéciales sur le transport des marchandises, qui affecteraient le prix de vente à Montréal comparativement à celui de Saint-Jean.

M. Newhook: Non, nos concurrents au Québec peuvent expédier leur ciment meilleur marché que nous-mêmes pour le même parcours.

Le président: Cela répond-il à votre question?

M. Carter: Oui. Merci.

Le président: Monsieur Horner.

M. Horner: Je voulais poursuivre cette idée. Nous avons un wagon de marchandises allant à Saint-Jean qui retourne à vide, et vous avez dit, monsieur Lundrigan, que si vous y mettiez quelque chose, le taux est alors plus élevé que ce qu'il était quand il va à Saint-Jean.

Je n'ai pas été dans l'industrie du camionnage du point de vue commercial, mais l'on pourrait peut-être présumer qu'il devrait retourner à demi-tarif. On pourrait supposer qu'une fois que le wagon est rendu à Saint-Jean et qu'il doit retourner à Port aux Basques de toute façon, même la moitié du tarif suffirait. Je ne m'attendrais pas, si j'étais expéditeur commercial, à employer le wagon pour rien.

M. Lundrigan: Peut-être un tarif de 10 p. 100?

M. Horner: Il y aurait la question des assurances, de responsabilité, etc. Je sais qu'ils savent très bien comment arriver à leur tarif, mais ils utilisent beaucoup d'arguments comme celui-ci.

Je suppose que ce devrait être le demi-tarif, pas plus de la moitié et certainement pas plus que le tarif initial.

M. Cook: Vous croyez, il n'y a pas de concurrence pour le tarif initial quand il vient à Terre-Neuve. Je me sers de votre déclaration générale et, encore une fois, elle reflète mon opinion personnelle de ce cas particulier. Je crois qu'on peut dire que bien que les chemins de fer aient beaucoup de difficulté à augmenter les tarifs, ils n'ont pas de difficulté à modifier la classification. De sorte qu'un article qui était de la classe 85 ou 100 a pu être porté à la classe 70 afin de faire face à la

[*Text*]

is an area which was not controlled by government.

Mr. Horner: I just have one further question. After your meeting with the Minister on December 7, 1967, which is a year and four months ago, you were informed—and I am referring to page 836 of the Committee proceedings—that a study of the Atlantic Provinces transportation system would be undertaken by the Canadian Transport Commission. This Committee is making a study of that, but we are one year and four months behind that statement. Have you seen any evidence that the Canadian Transport Commission is making a study in Newfoundland of this very problem and have you seen any recommendations they might be turning out?

Mr. Cook: Not to date.

Mr. Thomas (Moncton): I have a short supplementary to Mr. Horner's question on rates. I would like to get this straight. It does not make sense to me. Did I understand you to say, sir, that the rate they would charge you to ship back from St. John's to Moncton is a higher rate than a shipper would pay on a car going from Moncton to St. John's? Is that what you said?

Mr. Cook: In most instances, yes. First of all, the quantity is not there. They move out there at a much lower rate.

Mr. Thomas (Moncton): Let us talk about a carload rate or a classification by...

Mr. Cook: I know of one instance where wallboard was coming in there from the mainland at an agreed charge and that company was not able to get an equal agreed charge back out. In other words, the copaco was coming into the province at a lower rate.

Mr. Thomas (Moncton): Did they give you any reason for this? There must be an explanation for it.

Mr. Cook: It was the Board of Transport Commissioners. It was out of our hands.

Mr. Thomas (Moncton): I understand perfectly.

Mr. Trudel: I would like to ask Mr. Lundrigan or Mr. Cook when they last made a representation to the CNR regarding the extension of a rate for the facilities they men-

[*Interpretation*]

concurrence lorsqu'un autre mode de transport est entré en jeu. Ce domaine n'a pas été contrôlé par le gouvernement.

M. Horner: Une autre question. Après votre réunion avec le ministre, le 7 décembre 1967, il y a un an et quatre mois, on vous a dit, et je me réfère à la page 836 du compte rendu du Comité, qu'une étude sur le système des Transports des provinces de l'Atlantique serait faite par la Commission canadienne des transports. Le Comité en fait une étude, mais voilà maintenant un an et quatre mois qui se sont écoulés. Avez-vous constaté que la CCT a fait une étude de ce problème à Terre-Neuve et avez-vous vu les recommandations qu'ils ont faites?

M. Cook: Pas jusqu'à maintenant.

M. Thomas (Moncton): Une brève question supplémentaire relative à la question de M. Horner sur les tarifs. Je voudrais tirer quelque chose au clair, car je n'y comprends rien. Est-ce que je vous ai bien compris, monsieur, que le taux qu'on vous chargerait pour expédier de Saint-Jean à Moncton serait plus élevé que celui que l'expéditeur paierait pour expédier de Moncton à Saint-Jean? Est-ce ce que vous avez dit, monsieur Cook?

M. Cook: Dans la plupart des cas, oui. Tout d'abord vous n'avez pas la quantité voulue. Les taux de transport y sont beaucoup moins élevés.

M. Thomas (Moncton): Oui, mais parlons d'un tarif par chargement ou d'une classification par...

M. Cook: Je connais le cas de panneaux de Walco de revêtement muraux qu'on transportait à Terre-Neuve à un taux moins élevé que celui qu'on lui accordait pour le projet inverse. Autrement dit, la société Copaco transportait vers la province à un taux moins élevé.

M. Thomas (Moncton): Est-ce qu'on vous a donné la raison pour cela? Il doit y en avoir une.

M. Cook: Il s'agissait de la Commission canadienne des transports et cela ne relevait pas de nous.

M. Thomas (Moncton): Je comprends parfaitement.

M. Trudel: J'aimerais demander à M. Lundrigan ou à M. Cook quand ils ont fait des représentations au CN la dernière fois, pour obtenir une extension du taux pour les servi-

[*Texte*]

oned. Yesterday we were led to believe that ne people who use this type of service we efer to were saying that the CNR has been ost co-operative in this type of service and as actually been trying to give them exactly hat they were looking for, and I am thinkng of Bowaters. When was the last time you ade a representation...

Mr. Cook: On a back haul.

Mr. Trudel: On a back haul on a comparale quantity or level of merchandise to the NR?

Mr. Cook: There was no big sale to Bowaer. I mean, there were hundreds of thouands of tons of newsprint a year.

Mr. Trudel: No, no, I am thinking on a arload basis. I am not trying to compare the wo companies. When was the last time you ade a direct representation to the CNR egarding the use of this facility? I am talkng about the larger guage railroad cars that ou referred to as going back empty.

Mr. Cook: We are in competition with the NR, so I have not asked them for a rate to ove my cars back.

Mr. Trudel: Thank you.

Mr. H. W. Lundrigan: But other sections of ur organization have in recent weeks.

Mr. Trudel: On a specific item?

Mr. H. W. Lundrigan: On specific items.

Mr. Trudel: Could you give us the item?

Mr. H. W. Lundrigan: I can suggest steel.

Mr. Trudel: Thank you. And you were efused the rate?

Mr. H. W. Lundrigan: The rate to ship steel rom St John's to Montreal for reinforcing alves is about $17 per ton.

Mr. Trudel: It is $17 per ton. What system re you using at the present time?

Mr. H. W. Lundrigan: Water transportation.

Mr. Trudel: Water transportation. Thank ou.

[*Interprétation*]

ces qu'ils ont mentionnés. Hier on nous a dit que ceux qui utilisent le genre de service que vous venez de mentionner prétendaient que le CN a collaboré à ce genre de service et qu'il a effectivement essayé de leur donner tout ce qu'ils recherchaient. Je songe par exemple aux gens de la Bowaters. Quand avez-vous fait des représentations la dernière fois?

M. Cook: Pour un voyage de retour?

M. Trudel: Pour le trajet de retour avec un volume ou un niveau comparable de marchandises au CN.

M. Cook: Il n'y a pas eu de grande vente à Bowaters. Il y avait des centaines de milliers de tonnes de papier journal par année.

M. Trudel: Non, mais je songeais surtout au tarif des chargements complets. Je ne tentais pas de faire une comparaison entre les deux compagnies. Quand avez-vous fait des représentations au CN la dernière fois quant à l'utilisation de ce service? Je parle des wagons à grand écartement qui retournent vides selon vous.

M. Cook: Nous faisons la concurrence au CN et, par conséquent, je ne leur ai pas demandé de me faire un tarif spécial pour les ramener.

M. Trudel: Merci.

M. H. W. Lundrigan: Mais d'autres sections de votre organisation l'ont fait depuis quelques semaines.

M. Trudel: Pour un produit en particulier?

M. H. W. Lundrigan: Pour quelques produits en particulier.

M. Trudel: Pourriez-vous nous dire lesquels?

M. H. W. Lundrigan: L'acier, par exemple.

M. Trudel: Merci. Et on a refusé de vous l'accorder?

M. H. W. Lundrigan: Le taux d'expédition de l'acier de St. John's à Montréal, pour les soupapes de renforcement est d'environ $17 la tonne.

M. Trudel: C'est $17 la tonne. Quel mode de transport utilisez-vous à l'heure actuelle?

M. H. W. Lundrigan: Le transport par navire.

M. Trudel: Par navire. Merci.

[*Text*]

The Chairman: This is the end of the question period and I would like to thank these gentlemen.

At this time I would like to call upon the Central Newfoundland Chamber of Commerce. Gentlemen, on my right I have Mr. Mark Arnold, Secretary, and Mr. K. Mercer. Mr. Arnold.

Mr. Mark Arnold (Secretary, Central Newfoundland Chamber of Commerce): Good morning, gentlemen. We have a very short brief and it is set out on page 859, the last page of the transportation reports. As I say, it is very short but we would like to briefly re-emphasize three or four points in the brief.

The Central Newfoundland Chamber of Commerce services approximately 30,000 people in an area of approximately 120 to 150 miles. We feel that this Act is of great importance to us simply because we are in the central part of the province and there is no competitive means of transportation in that area to the CNR.

If it is possible—and your good selves would be the only judges of this—we would like further assistance in that Act on freight coming into the province. We are a captive market and, as previously mentioned, we have no competitive means of transportation.

Mr. K. Mercer (Central Newfoundland Chamber of Commerce): We are also deeply concerned with the new L.C.L. rates introduced by the CNR last September. I think these rates are also contained in most other briefs that have been submitted and they were gone into in quite some detail in the brief of the Maritime Transportation Committee.

Mr. Arnold: Our third point—and this point has been brought up previously and I am sure it will be brought up again later today—is the annoying experience which all of Newfoundland, and ourselves in particular, are experiencing in the pilferages, shortages and delays in freight which are occurring with shipments from Central Canada, or any part of Canada, really. This gulf service up until recently, with the introduction of CN's containerization, has caused us many problems. We are happy with the containerization of freight and we hope that this will stop some of the shortages, pilferages, and so on, which we are experiencing.

Mr. Mercer: To round out our brief we would also support the Newfoundland Board

[*Interpretation*]

Le président: Voici la fin de la période des questions. Je voudrais remercier ces messieurs.

Je voudrais maintenant passer à la *Central Newfoundland Chamber of Commerce.*

Messieurs, j'ai ici à ma droite M. Mark Arnold, le secrétaire et M. K. Mercer. Monsieur Arnold.

M. Mark Arnold (secrétaire, Chambre de commerce du centre de Terre-Neuve): Bonjour, messieurs. Nous avons un très court mémoire qui se trouve à la page 859, soit à la fin de votre compte rendu. Comme je l'ai dit il est très court et nous aimerions souligner brièvement trois ou quatre points du mémoire.

La Chambre de commerce du centre de Terre-Neuve dessert environ 30,000 personnes dans une région d'environ 120 à 150 milles. Nous estimons que la Loi sur les taux de transport des marchandises des provinces Maritimes est très importante pour nous simplement parce que nous sommes dans la partie centrale de la province et, encore une fois, nous n'avons aucun moyen de faire concurrence au NC pour le transport dans cette région.

Si c'est possible, et vous seuls pourrez en juger, nous aimerions que la Loi nous aide davantage en ce qui concerne le transport vers la province. Nous sommes un marché en exclusivité et comme on l'a déjà dit, il n'y a aucun moyen concurrentiel de transport.

M. K. Mercer (Chambre de commerce du centre de Terre-Neuve): Nous sommes aussi très préoccupés par les nouveaux taux annoncés par le CN en septembre dernier. Je crois qu'on en parlait dans la plupart des autres mémoires qui vous ont été présentés et que la *Maritime Transportation Committee* vous en a parlé plus longuement dans son mémoire.

M. Arnold: Notre troisième point, qui a déjà été mentionné et qui le sera sans doute encore aujourd'hui, c'est l'ennuyeuse expérience que Terre-Neuve et nous-mêmes en particulier éprouvons, soit les vols, les pertes et les retards dans le transport des marchandises venant du centre du Canada et, en fait, de n'importe quelle partie du Canada. Et le service du golfe, jusqu'à la récente introduction du programme de service des cadres, nous a posé beaucoup de problèmes. Nous sommes très satisfaits du service des cadres pour les marchandises et nous espérons que cela éliminera une bonne partie des pertes, des vols, etc., que nous éprouvons.

M. Mercer: Pour terminer notre mémoire, nous appuyons aussi le *Newfoundland Board*

exte]

Trade in their recommendation that an -free port such as Mulgrave be sought as alternate to Sydney.

That, gentlemen, is the extent of our brief.

The Chairman: Are there any questions, ntlemen?

Mr. Portelance: Mr. Arnold, you mentioned at these shortages were increasing the cost transport. Where do these shortages occur? they occur at the originating point or at s end of the transport?

Mr. Arnold: I do not think it is possible to ually pinpoint where it happens. However, would suggest that perhaps one possibility in the transfer of freight from one car to other, which happens in Sydney where y transport from rail to boat and then to l again. We hope that containerization— d I am sure this is CN's intention as well— ll stop a lot of this, but until that time nes we do not really know.

Mr. Skoberg: Mr. Arnold, do you now have ficient facilities to handle the containeriza- n traffic at the various points to which you er?

Mr. Arnold: Are you talking about the CNR e in Newfoundland?

Mr. Skoberg: Yes. Is there any containeri- tion traffic at any of the points you are presenting today?

Mr. Arnold: Yes, at Grand Falls, the cen- l part.

Mr. Skoberg: And are there sufficient trains d facilities there to handle the containers?

Mr. Arnold: My understanding of what is ppening is that unless the containerized ight for central Newfoundland is a full ntainer it comes across the island and stops for example, Corner Brook, Deer Lake, nder, Gand Falls and St. John's. However, the major bulk of the freight within that ntainer is for one specific area—and let us e St. John's as an example, which is this le of Grand Falls—it comes to St. John's fore it gets to Grand Falls, even though it s to by-pass Grand Falls' door.

Mr. Skoberg: I gather from your brief that ur highway communication is not too od. Is that correct?

Mr. Arnold: No, we are right in the central rt of the island and we are right on the ans-Canada Highway.

[*Interprétation*]

of Trade qui recommande l'aménagement d'un autre port libre de glace, Mulgrave par exemple, comme port alternatif pour Sydney.

Messieurs, ceci termine notre mémoire.

Le président: Y a-t-il des questions?

M. Portelance: Monsieur Arnold, vous avez mentionné que les pertes de marchandises augmentaient les frais de transports. Savez-vous où cela se produit? Est-ce au point de départ ou au point d'arrivée?

M. Arnold: Je ne crois pas qu'il soit vraiment possible de dire exactement où cela se produit. Toutefois, je pourrais dire qu'une des sources possibles serait dans le transport des marchandises d'un wagon à un autre, par exemple, à Sydney le transport se fait par chemin de fer, ensuite par navire et ensuite par chemin de fer. Nous espérons que les cadres vont mettre un frein à cela et je pense que le NC vise le même but. Nous ne pourrons toutefois en être certains avant un certain temps.

M. Skoberg: Monsieur Arnold, avez-vous suffisamment d'installations pour la manutention des cadres aux divers endroits que vous avez mentionnés?

M. Arnold: Vous voulez parler de la ligne du CN à Terre-Neuve?

M. Skoberg: Oui, y a-t-il des cadres à manutentionner aux points dont vous parlez aujourd'hui?

M. Arnold: Oui, à Grand-Falls dans la partie centrale.

M. Skoberg: Y a-t-il suffisamment de trains et de facilités pour manutentionner les cadres?

M. Arnold: Je crois savoir que, si les cadres de marchandises à destination du centre de Terre-Neuve ne sont pas pleins, ils traversent l'Île et arrêtent par exemple à Corner Brook, Deer Lake, Gander, Grand Falls et Saint-Jean. Toutefois, si la plus grande partie des marchandises dans le cadre sont destinées à un endroit en particulier, disons Saint-Jean, qui se trouve de ce côté-ci de Grand Falls, elles viennent à Saint-Jean avant d'aller à Grand Falls même si elles doivent passer juste devant la porte de Grand Falls.

M. Skoberg: D'après votre mémoire, j'ai cru comprendre que le lien par route n'est pas très bon. Est-ce exact?

M. Arnold: Non, nous sommes dans la partie centrale de la province, en plein sur la Route transcanadienne.

[*Text*]

Mr. Skoberg: You are right on the Trans-Canada Highway?

Mr. Arnold: We have no problems with highway freight.

Mr. Skoberg: It looked like all of your business was done with the CN.

Mr. Arnold: No, this is not true. As I say, the highway runs right in front of our door. The CN also runs in front of our door. We also have Clarke Traffic Services which operates from Montreal to Botwood, which is 22 miles from Grand Falls.

Mr. Skoberg: Do you have any estimate of the breakdown of the rail versus road?

Mr. Arnold: No, I do not have it, but I know that Clarke Traffic Services rates into Botwood are based on the CN rates into central Newfoundland, so even though we have a faster service we do not have a competitive means of service as far as rates are concerned.

Mr. Skoberg: Does the Central Newfoundland Chamber of Commerce support the principle of complete retention of the M.F.R. rates at this particular time?

Mr. Arnold: Yes.

Mr. Skoberg: Have you made any submissions to the Canadian Transport Commission in this regard?

Mr. Arnold: Not as such, no.

Mr. Skoberg: Do you expect to, or do you conclude that this will be your official representation?

Mr. Arnold: I will put it to you this way. If it is to our advantage, and I think I can speak for the Chamber on this, we will do anything. If submitting a brief or an additional brief means this, yes, I do not think there would be any hesitancy on our part whatsoever.

Mr. Rock: Can you give us reasons why the representatives from your Chamber, or your association, did not appear before the CTC when they held the hearings concerning replacing of the "Bullet" train by the CN bus service?

Mr. Arnold: Why we did not appear?

[*Interpretation*]

M. Skoberg: Vous êtes en plein sur la Rou transcanadienne?

M. Arnold: Nous n'avons aucun problèr avec le transport des marchandises sur l grandes routes.

M. Skoberg: J'avais l'impression que vo faisiez toutes vos affaires avec le CN.

M. Arnold: Non, ce n'est pas vrai, comr je l'ai dit, la grand-route passe devant n portes. Le NC passe également à notre port Nous avons aussi le *Clarke Traffic Servic* qui va de Montréal à Botwood qui se trouve 22 milles de Grand Falls.

M. Skoberg: Est-ce que vous sauriez qu'el est la relation route-chemin de fer pour l marchandises transportées.

M. Arnold: Non, je l'ignore mais je sais qu les taux de la *Clarke Traffic Services* so fondés sur les taux du NC pour le centre d Terre-Neuve de sorte que, même si nou avons un service plus rapide, nous n'avor pas de concurrence en ce qui concerne l taux.

M. Skoberg: Est-ce que la Chambre d commerce du centre de Terre-Neuve est e faveur de garder les taux de la Loi sur l taux de transport des marchandises dans l provinces Maritimes à l'heure actuelle?

M. Arnold: Oui.

M. Skoberg : Avez-vous fait des représenta tions à la Commission canadienne des tran ports à cet égard?

M. Arnold: Non.

M. Skoberg: Prévoyez-vous le faire o votre représentation d'aujourd'hui doit-el être considérée comme étant votre représer tation officielle?

M. Arnold: Disons que nous ferions n'im porte quoi, et je parle au nom de la Chambr de commerce, si nous estimions qu'il est notre avantage de le faire. S'il faut présente un ou plusieurs mémoires à cette fin, nou n'hésiterions pas à le faire, j'en suis sûr.

M. Rock: Pourriez-vous nous donner le raisons pour lesquelles les représentants d votre organisme n'ont pas comparu devant l Commission canadienne des transports lor des séances au sujet de la substitution d train «Bullet» au service d'autobus d National-Canadien?

M. Arnold: Pourquoi nous n'avons pa comparu?

Texte]

Mr. Rock: Yes. I notice that most of the eople who appeared before the CTC in egards to the hearings for the "Bullet" were eople based here in St. John's, Newfoundnd, and none of the municipalities or the ssociations of the municipalities along the racks seemed to be interested. They did not ppear to try for retention of the train or for ne bus service or anything like that. So I ant to know why a public body like yours id not appear?

Mr. Arnold: Well, I think possibly for me make a statement on behalf of the Chamer in that connection would be a little wrong ght now. However, I know personally of me of the reasons why we did not. Number ne was for public opinion. We felt that we ould not put ourselves in a position where- we should back one or the other. We felt is was not our place, and we just did not o it.

Mr. McGrath: A supplementary question. ould it not have been in your interest to ack both?

Mr. Arnold: I agree with you, yes.

Mr. Trudel: We have heard mentioned on vo or three occasions this morning the empness or the non-use of equipment as to outoing freight. Do you feel that containers ould change that?

Mr. Arnold: No, I do not think so.

The Chairman: Mr. Perrault.

Mr. Perrault: Page 859 of Issue No. 15 conining the brief submitted in March of 1968, ys in part,

> Our 5th emphasis, and last but by no means least, is one that is the cause of a serious complaint in that different rates are being charged on the same commodity at the same shipping point, sometimes the same day and for the same destination.

wonder if you could give us some examples f how this is applied, because it certainly eems to be a most disturbing allegation.

Mr. Arnold: As a matter of fact, it is one hich causes us a great deal of disturbance. lowever, you will notice in the next paraaph that we state,

> Members of the Springdale Chamber of Commerce will briefly present to you exhibits showing such disparity in rates.

Mr. Perrault: Do you have those exhibits?

[*Interprétation*]

M. Rock: Oui. J'ai remarqué que la plupart des gens qui ont comparu devant la Commission lors des audiences au sujet du «Bullet» étaient de Saint-Jean (Terre-Neuve); aucune des municipalités ou des associations en cause ne semblait intéressée. Personne ne semblait vouloir lutter pour garder le train ou parler en faveur du service d'autobus. Je me demandais alors pourquoi un organisme public comme le vôtre n'avait pas comparu?

M. Arnold: Je crois que si je devais faire une déclaration au nom de la Chambre à cet égard, j'aurais tort. Toutefois, je connais personnellement certaines des raisons pour lesquelles nous ne l'avons pas fait. Premièrement, en raison de l'opinion publique. Nous estimions que nous ne devrions pas nous déclarer en faveur de l'un ou de l'autres service. Comme il semblait que ce n'était pas à nous de le faire, nous ne l'avons pas fait.

M. McGrath: Une question supplémentaire. Est-ce que cela n'aurait pas été dans votre intérêt d'appuyer les deux?

M. Arnold: Je suis parfaitement d'accord.

M. Trudel: A deux ou trois occasions, ce matin, on a parlé de l'inutilisation du matériel expédié à l'extérieur. Croyez-vous que les containers changeraient la situation?

M. Arnold: Je ne le crois pas, non.

Le président: Monsieur Perrault.

M. Perrault: A la page 859 de la publication n° 15 renfermant le mémoire présenté en mars 1968, il est dit que:

> En cinquième et dernier lieu, cause de graves plaintes, on compte des tarifs différents pour les mêmes marchandises expédiées du même endroit vers la même destination, et ce parfois la même journée.

Est-ce que vous pourriez m'en donner des exemples, car cela me semble assez inquiétant.

M. Arnold: En fait, je m'en préoccupe beaucoup. Toutefois, vous remarquerez que dans le paragraphe suivant, nous disons que:

> Les membres de la Chambre de commerce de Springdale vous présentent brièvement des pièces justificatives indiquant les disparités dans les taux.

M. Perrault: Les avez-vous?

[*Text*]

Mr. Arnold: No, we do not have them, and we understand that the Springdale Chamber was represented here yesterday and they did not bring them before this Committee.

Mr. Perrault: May we expect to have that material sent to Ottawa in care of our Chairman?

Mr. Arnold: I can make these arrangements, definitely, yes.

Mr. Perrault: I think we should have that material, Mr. Chairman.

The Chairman: There are no more questions? I would like to thank you on behalf of the Committee.

Our next brief will be from Mr. Max Thornhill.

Mr. McGrath: Mr. Chairman, before we proceed with the next brief, on a point of order I wonder if I could ask for the unanimous consent of the Committee to have these tables appended to today's evidence regarding the operational capacity of airports in eastern Canada? They are contained in a Parliamentary Return. I would like to have it appended to the evidence.

The Chairman: Does the Committee agree?

Some hon. Members: Agreed.

The Chairman: Mr. Thornhill has asked me if he can read his brief. We do not have copies. It is only about a page and a half, so I think the Committee would agree to let him read it.

Some hon. Members: Agreed.

Mr. Max Thornhill: Mr. Chairman, members, ladies and gentlemen, I might preface my remarks by saying that I present this today as a private citizen and it is basically directed towards passenger transportation to the Burin Peninsula.

The Burin Peninsula, an area of Newfoundland lying south of a straight line drawn from Terrenceville in Fortune Bay to Brookside in Placentia Bay, does not have a form of public transportation in the true sense of the word. The area in question has a population close to 30,000 people. The vast majority of these people live on the foot of the Peninsula, which is some 200 miles from St. John's and more than 100 miles from the Trans-Canada highway. This makes it the largest single populated area in the province, farthest removed from a source of public transportation.

The situation is even more ridiculous when I draw to your attention the fact that six of the towns in this area have been designated

[*Interpretation*]

M. Arnold: Non, mais nous avons appris que la Chambre de commerce de Springdale a comparu hier et qu'elle ne vous les a pas présentées.

M. Perrault: Est-ce qu'on peut s'attendre à les recevoir à Ottawa à l'adresse de notre président?

M. Arnold: Je peux demander qu'on le fasse, bien sûr.

M. Perrault: Je trouve que nous devrions les avoir, monsieur le président.

Le président: Il n'y a pas d'autres questions? Je voudrais donc vous remercier au nom du comité.

Le prochain mémoire est celui de M. Max Thornhill.

M. McGrath: Monsieur le président, avant de continuer, j'invoque le règlement. Je me demande si le comité consentirait à l'unanimité à annexer au compte rendu d'aujourd'hui les tableaux concernant la capacité opérationnelle des aéroports dans l'est du Canada. Il s'agit justement d'un document parlementaire. J'aimerais qu'il soit versé en annexe.

Le président: Le comité est-il d'accord?

Des voix: D'accord.

Le président: Monsieur Thornhill m'a demandé la permission de lire son mémoire car nous n'en avons pas d'exemplaires et il n'y a qu'une page et demie à lire. Alors, je crois que le comité y consentira, n'est-ce pas?

Des voix: D'accord.

M. Max Thornhill: Monsieur le président, messieurs du comité, mesdames et messieurs, je préfacerai mes observations en disant que je vais vous présenter le présent mémoire à titre de simple citoyen. Je l'ai conçu essentiellement en fonction du transport des passagers dans la péninsule de Burin. La péninsule de Burin une région de Terre-Neuve directement au sud d'une ligne tirée de Terrenceville sur la Baie Fortune et Brookside sur la Baie Placentia n'a pas de mode de transport public véritable. La région en question a une population de près de 30,000 personnes dont la plupart habitent à l'extrémité de la péninsule, soit à quelque 200 milles de St-Jean et à plus de 100 milles de la route transcanadienne. Il s'agit donc de la région la plus peuplée de la province qui se trouve si éloignée d'un moyen de transport public.

La situation nous paraîtra d'autant plus ridicule lorsque je vous signalerai le fait que six villes de cette région ont été désignées

[*Texte*]

as growth areas. Surely, gentlemen, there is an urgent need for some form of public transportation in an area that needs communication with the capital and the rest of the province.

As the situation now stands, it is quite a burden on the people to get in and out of the Peninsula. The only form of transportation to and from is that supplied by taxi. The comparative cost of travelling on these taxis with other forms of transportation in other parts of the province is in excess of 100 per cent.

In view of the foregoing, I would like to recommend strongly and support others that the Canadian National Railway extend its road cruiser service to cover the Burin Peninsula. This in my view would be an appropriate form of public transportation to this growth area. Thank you.

Mr. Horner: In looking at the map, I see your road, No. 11, going down to the Burin Peninsula. Is this road not good enough, or does it not serve the area well enough? Could you give us some idea as to the ability of that road to serve the Peninsula?

Mr. Thornhill: It would probably be a bit unfair of me to try and answer this. I should first of all point out that I am a civil servant, and I have to withhold some of my remarks.

Mr. Horner: I understand that.

Mr. McGrath: May I supplement the answer from the witness and state that this is a dirt road in very poor condition. It is of great concern to the Government of Newfoundland, to the people of Newfoundland, and it is a great retarder of progress for the Burin Peninsula at the present time.

Mr. Horner: The reason I asked that question was in no way to attempt to put you on the spot. We had evidence before the Committee yesterday that there was quite a strong suggestion that money should be taken from the subsidies saved off the railroad to build roads, to build trunk roads, and we have had evidence today and yesterday to suggest the same with regards to the coastal shipping. The money saved there should be turned towards the construction of better trunk roads. My second question is, do you believe that the road could be built up to serve that Peninsula successfully?

Mr. Thornhill: Yes, I believe it could. And could I just go back to your former remark and say that I do not think there is probably

[*Interprétation*]

comme des centres de croissance. Sûrement, messieurs, il y a un besoin urgent d'avoir un mode de transport public dans une région qui a besoin de communications avec la capitale et le reste de la province.

Dans la situation actuelle, c'est un fardeau considérable pour la population de quitter et de revenir à la péninsule. La seule forme de transport disponible ce sont les taxis. Le coût de transport comparativement aux autres modes de transport dans les autres parties de la province est de plus de 100 p. 100 plus élevé.

Par conséquent, je recommanderai fortement et j'appuierai ceux qui voudraient que le National-Canadien assure ce service d'autobus à la péninsule. A mon avis, ce serait un mode de transport public adéquat pour cette zone de croissance. Merci.

M. Horner: En regardant la carte, je vois la route nº 11 qui va vers cette péninsule de Burin. Est-ce que cette route n'est pas assez bonne ou ne dessert pas assez bien la région? Pourriez-vous nous donner une idée jusqu'à quel point cette route dessert la péninsule?

M. Thornhill: Ce serait injuste de ma part d'essayer de vous répondre. Tout d'abord, je dois vous dire que je suis fonctionnaire et je devrais peut-être me retenir de faire certaines observations.

M. Horner: Je comprends.

M. McGrath: Est-ce que je pourrais suppléer aux renseignements fournis par le témoin, et dire que c'est une route de terre en très mauvais état. Le gouvernement de Terre-Neuve et la population de l'île s'en inquiètent car cela retarde le progrès de la péninsule à l'heure actuelle.

M. Horner: La raison pour laquelle je vous ai posé la question n'était pas de vous mettre dans l'embarras. Nous avons entendu des témoignages hier qui laissaient entendre que l'argent épargné sur les subventions accordées aux chemins de fer devrait servir à construire un réseau de routes principales. Aujourd'hui et hier, d'autres témoignages proposent la même chose pour la navigation côtière. On a dit que l'argent qu'on y épargne soit utilisé pour la construction de meilleures routes principales. La deuxième question que je voudrais poser, c'est, croyez-vous qu'on puisse vraiment améliorer cette route de façon à desservir adéquatement cette péninsule?

M. Thornhill: Oui je le crois et si vous me permettez de revenir à vos premières remarques, je dirai que je ne crois pas que ce serait

[*Text*]

very much of a saving by the withdrawal of the coastal boats to the south coast, because these boats are still in operation and operate from Port-aux-Basques to Argentia. So this part of the coast, indeed, still has access to coastal service.

Mr. Horner: You suggested in your brief to us that the CNR build a railroad to connect Burin Peninsula with their main line.

Mr. Thornhill: No, I did not, sir. I stated that the Canadian National Railway should extend its road cruiser service.

Mr. Horner: Oh, road cruiser service. Bus lines.

Mr. Thornhill: Right. At the moment we do not have a bus line to the Burin Peninsula.

Mr. Horner: But if the road was fixed up, do you believe the CNR would?

Mr. Thornhill: Well, I not only believe that the CNR would. Probably other commercial operators would do so as well.

Mr. Rock: Are you aware, sir, that the Minister of Transport in his brief had the intention in the government's far-reaching plan to build that section also, as well as the one over to Labrador?

Mr. Thornhill: Yes, I saw this in the paper a couple of days ago, but in the meantime, we the people of this area are suffering from having to pay such high costs. And in addition to this, schedules are not what they should be, the comfort of the passengers is not very good, the protection of the passengers is not very good, and the competence of the drivers is another thing that is not taken into consideration.

Mr. Pringle: Is it your understanding, or do you happen to know where on the priority list the improvement of your existing road lies at the present time, or do you know if there are definite plans in the future to improve this particular road to the Burin Peninsula?

Mr. Thornhill: I cannot answer you specifically. It has taken going into two years to upgrade 20 miles of this particular road. If this is in the long-range program it is certainly going to take many years before we can expect to get a good road to the Burin Peninsula.

[*Interpretation*]

une épargne considérable si on retirait les navires côtiers sur la côte sud parce que ces navires offrent encore un service de Port-aux-Basques à Argentia. Donc, cette partie de la côte est toujours desservie par un service côtier.

M. Horner: Vous dites dans votre mémoire que le National-Canadien a construit un chemin de fer pour rattacher la péninsule de Burin à leur ligne principale.

M. Thornhill: Non, je n'ai pas dit cela. J'ai dit que le National-Canadien devrait étendre son service d'autobus.

M. Horner: Ah bon! son service d'autobus.

M. Thornhill: Oui. En ce moment nous n'avons pas de service d'autobus pour la péninsule de Burin.

M. Horner: Mais si la route était améliorée, croyez-vous que le National-Canadien le ferait?

M. Thornhill: Je le crois, non pas seulement pour le National-Canadien, mais d'autres entrepreneurs commerciaux le feraient aussi sans doute.

M. Rock: Savez-vous que le ministre des Transports, dans son mémoire, avait l'intention, en vertu du programme à longue échéance du gouvernement, de construire une telle route ainsi que la route au Labrador?

M. Thornhill: Oui. Je l'ai lu dans les journaux il y a quelques jours, mais entre-temps ces gens de cette région, souffrent d'avoir à payer des frais aussi élevés. De plus, les horaires ne sont pas adéquats, le confort des passagers n'est pas extraordinaire, la protection des passagers est peu assurée, et la compétence des chauffeurs est une autre chose dont on ne tient pas compte.

M. Pringle: Est-ce que vous savez quelle priorité on accorde à l'amélioration de votre route ou savez-vous si on a des projets précis pour améliorer cette route de la péninsule de Burin?

M. Thornhill: Je ne saurais vous répondre de façon précise. Il a fallu près de deux ans pour améliorer cette route sur une distance de vingt milles. Si ce projet fait partie d'un programme à long terme, il faudra sûrement un certain nombre d'années avant d'avoir un bonne route vers la péninsule de Burin.

[*Texte*]

Mr. Pringle: You probably stated it and I missed it, but what length of road is required here? How much road are we talking about?

Mr. Thornhill: It is approximately 100 miles to Marystown. This is the first large town. There would probably be another 50 miles on to Grand Bank and Fortune. The over-all would be probably 130 miles right to the tip of the Burin Peninsula, a town called St. Lawrence.

Mr. Pringle: Well, it would appear that the necessity of an improved road is of great priority and, of course, the building of highways is a provincial matter. It comes under provincial jurisdiction, whereas transportation, such as a Canadian National Railway bus service, would come—if the road gets repaired, and your statement today is just to get our support, is that correct?

Mr. Thornhill: My statement today, sir, is that we should not have to wait for the road to be repaired. We should be able to get a form of subsidized transportation similar to the other parts of the province. As it now stands, we are paying double what they pay in any other part of the province.

Mr. Pringle: This is the point I was trying to get at. Do we have to have the roads before we have the transportation? And you state now that you feel that with the existing roads there could be public transportation to take advantage of the road and operate, but they would require a subsidy in order to operate successfully. Is this correct?

Mr. Thornhill: This is what the present operators who operate taxis to the Burin Peninsula now contend, that the reason for their high cost is because of roads. I did not delve into that. However, I did do a comparison when I prepared a brief last year for this Committee, dealing with the cost of transportation on taxis to the Burin Peninsula, and I went to some length to study other taxis operating within the province. And I find that many of these taxis indeed operate on as much dirt road as they do to the Burin Peninsula, not in one length of time, but in a total of one week.

Mr. Pringle: Can you tell us what the taxi fare is to the general area you are referring to?

Mr. Thornhill: To Grand Bank is $25 in the winter and $20 in summer, a distance of 231 miles. I can travel to Cornerbrook by private

[*Interprétation*]

M. Pringle: Vous l'avez sans doute déjà dit et je ne l'ai pas entendu, mais de combien de milles s'agit-il? Quelle est la longueur de la route en cause?

M. Thornhill: Il y a environ 100 milles pour arriver à Marystown. C'est la première grande ville. Il y aurait sans doute un autre 50 milles pour se rendre à Grand Bank et Fortune. Dans l'ensemble, ce serait sans doute 130 milles pour se rendre jusqu'à la pointe de la péninsule de Burin, soit la ville de St. Lawrence.

M. Pringle: Il semble que la nécessité d'améliorer la route devrait jouir d'une très grande priorité et, bien entendu, la construction de la route relève de la compétence provinciale. Tandis que le transport, comme le service d'autobus du National-Canadien relèverait—si la route est réparée, et votre déclaration aujourd'hui vise à obtenir notre appui, n'est-ce pas?

M. Thornhill: Ma déclaration c'est qu'on ne devrait pas avoir attendre que la route soit réparée. Nous devrions avoir un mode de transport subventionné tout comme le reste de la province. A l'heure actuelle, nous payons deux fois plus qu'on paie dans toutes les autres régions de la province.

M. Pringle: C'est ce à quoi je voulais en arriver. Est-ce qu'il faut avoir les routes avant d'obtenir le transport? Et vous dites maintenant que selon nous, un mode de transport public pourrait utiliser cette route dans son état actuel, mais qu'il lui faudrait une subvention pour être rentable, est-ce exact?

M. Tornhill: C'est ce que les exploitants de taxis prétendent à l'heure actuelle, que la raison pour laquelle leurs coûts sont élevés, c'est que le route est en mauvais état. Je ne m'y suis pas penché outre mesure, mais j'ai fait une comparaison, lorsque j'ai préparé un mémoire pour ce Comité l'année dernière, traitant du coût de transport des taxis à la péninsule de Burin, et j'ai également étudié les autres services de taxis dans la province. Je constate que bon nombre de ces taxis empruntent autant de routes de terre que dans la péninsule du Burin, non pas pour un voyage donné, mais sur une durée d'une semaine.

M. Pringle: Pourriez-vous nous dire quel est le tarif des taxis pour se rendre à la région dont vous parlez?

M. Thornhill: Pour aller à Grand Banks, c'est $25 l'hiver et $20 l'été, pour une distance de 231 milles. Pour aller à Corner Brook, par

[*Text*]

taxi for $17, a distance of 423 miles, and if I were travelling on the CNR road cruiser service I could go to Cornerbrook for anywhere between $9.90 and $13.50. This indeed is almost twice the distance that it is to Grand Bank.

Mr. McGrath: Mr. Chairman, I think I know what the intent of this brief is, and why the witness is here, even though roads are a provincial responsibility. Is it fair to suggest, Mr. Thornhill, that now that Canadian National has gone into the bus service, you feel that Canadian National should be obliged to provide the Burin Peninsula with bus service?

Mr. Thornhill: I do so, sir, yes.

Mr. Skoberg: Is there any time during the year when the roads are completely blocked—underwater or snowed in?

Mr. Thornhill: There are times of the year when the road is snowed in. However, I must say they have a fairly efficient operation in getting it open. However, the Highways Department are at a loss when conditions exist such as existed this week, when the road is closed completely and traffic, except trucks, is unable to get through. Therefore, people are unable to get in from the Burin Peninsula. This week a relative of mine had to see an orthopaedic surgeon but could not make it and will have to see him next week. These are serious problems.

Mr. Rock: Is it because of the thawing out?

Mr. Thornhill: It is because of the mild weather we have had and the frost in the road is now coming out.

Mr. Skoberg: Then the only other way for your produce to get in would be by the ferry service or the ports?

Mr. Thornhill: You could get in by boat service. The CN has recognized this emergency now by putting a boat on direct from Marystown to Argentia. EPA has also recognized it by putting an air fare on from St. John's to Frenchman's Cove.

Mr. Skoberg: Does the D.B.L. Transport serve your area at all—the one we just heard previously?

Mr. Thornhill: No; not in passengers at least.

Mr. Skoberg: No, I am referring to truck service.

Mr. Thornhill: We have private individual trucks operating there, but I am not aware of the total truck service that we do have.

[*Interpretation*]

taxi, il faut compter $17, un parcours d 423 milles, et si je voyegais sur le servic d'autobus du National-Canadien, je pourrai aller à Corner Brook pour entre $9.90 e $13.50. C'est à peu près deux fois la distanc à Grand Bank.

M. McGrath: Monsieur le président, j pense savoir quel est l'objectif de c mémoire, et pourquoi le témoin est ici, mêm si les routes sont du ressort provincial. Est-i juste de dire, monsieur Thornhill, que main tenant que le National-Canadien a un servic d'autobus, nous sentez que le National-Cana dien devrait fournir un tel service à la pénin sule de Burin?

M. Thornhill: Oui.

M. Skoberg: Monsieur le président, est-c qu'au cours de l'année, il y a des routes qu sont bloquées par la neige ou l'eau?

M. Thornhill: Il y a des périodes de l'anné ou la route est fermée à cause de la neige Toutefois, les opérations de nettoyage son assez efficaces. Cependant, le ministère de l Voirie est perdu lorsque vous avez des condi tions comme celles de cette semaine où l route est tout-à-fait fermée et le trafic, sau les camions, ne peut y passer. Donc les gen ne peuvent sortir de la péninsule de Burin J'ai un membre de ma famille qui a dû s rendre chez un orthopédiste et n'a pu s'y ren dre, il devra revenir la semaine prochaine C'est un problème assez grave.

M. Rock: Est-ce à cause du dégel?

M. Thornhill: C'est à cause de la douce tem pérature que nous avons eue et la rout dégèle.

M. Skoberg: La seule façon donc d'y envoyer votre produit serait par le service d transbordeur ou les ports?

M. Thornhill: Vous pourriez vous y rendr par le bateau. Le National-Canadien reconnaî cet état d'urgence en mettant un bateau en service direct de Marystown à Argentia. EPA l'a reconnu en mettant un vol de Saint-Jean à Frenchman's Cove.

M. Skoberg: Est-ce que la région est desser vie par le *D.B.L. Transport*, le service don on vient juste de parler.

M. Thornhill: Non; pas un service-voya geurs, du moins.

M. Skoberg: Non, je parle de camions.

M. Thornhill: Nous avons des camionneur indépendants, mais je ne sais pas ce qu'il en est quant à l'ensemble du service d camionnage.

[*Texte*]

Mr. Skoberg: There is no recognized truck line, as such, that is serving your area right now?

Mr. Thornhill: As I say, I am not aware of what trucking operation is going on to the Burin Peninsula. When Marystown was under construction there were many large flat trailer trucks going to that area; whether or not it is regular I do not know.

The Chairman: This completes the questioning. I would like to thank you.

Gentlemen, it is now twelve o'clock, Before we left Halifax three days ago I received a telegram from a gentleman from St. John's, Newfoundland, asking if he could be heard here. He did not have time to send his brief before our schedule was made out and I told him that if I could arrange the time I would be only too pleased to hear him. If the Committee would agree, maybe we could sit a few minutes longer to hear this gentleman.

I will call on Mr. Lush from the Railway Unions Labour Council. Mr. Lush?

Mr. F. A. F. Lush (Secretary, Railway Unions Labour Council, St. John's, Newfoundland): Mr. Chairman and gentlemen, this Railway Unions Labour Council represents 11 unions and is a formidable group protesting the taking away of the passenger trains. We have taken issue with the Transport Commission that by holding its hearings in St. John's it did not reach the people from outside points, and there is a dormant opposition, I believe, in towns and municipalities to the taking away of our passenger trains.

We submit here a resume of passengers carried from 1961 to 1968. You will notice the year 1966 was the year the CNR decided to put in an application to close the passenger service.

This is the third time we have been before committees of this kind and our main theme has been to urgrade our passenger service, to speed it up, to get better equipment. We think that if this was done, there would be no car or bus that could compete with our rail passenger service.

We have seen the advantages of Confederation, both socially and materially. St. John's Harbour got a face lifting and Port Aux Basques got a modern ferry terminal and millions of dollars have been provided for these facilities, but our narrow gauge railroad remains the same and in 18 years of operation

[*Interprétation*]

M. Skoberg: Il n'y a pas de ligne reconnue qui dessert votre région, maintenant?

M. Thornhill: Comme je l'ai dit. Je ne sais pas quelles sont les opérations de camionnage qui se font dans la péninsule de Burin. Lorsque Marystown était en construction il y avait bon nombre de camions-remorques qui allaient dans cette région; mais est-ce que c'est un service régulier ou non, je n'en sais rien.

Le président: Ceci met fin à la période de questions merci beaucoup.

Messieurs il est midi. Avant de quitter Halifax, il y a trois jours, j'ai reçu un télégramme de quelqu'un de Saint-Jean, Terre-Neuve, qui me demandait si on pouvait l'entendre ici. Il n'a pu envoyer son mémoire avant que notre horaire soit fait et je lui ai dit que si je pouvais le faire, je me ferais un plaisir de l'entendre. Donc, si le Comité en convient, peut-être pourrions nous siéger quelques minutes de plus pour l'entendre.

J'accorde la parole à monsieur Lush du Conseil ouvrier des syndicats ferroviaires. Monsieur Lush?

M. F. A. F. Lush (secrétaire du Conseil ouvrier des syndicats ferroviaires, Saint-Jean, Terre-Neuve): Monsieur le président, messieurs, le Conseil ouvrier des syndicats ferroviaires représente 11 syndicats et est un groupe formidable qui proteste contre l'élimination du service des voyageurs. Nous avons soulevé la question auprès de la Commission canadienne des transports qu'en tenant ses réunions à Saint-Jean elle n'a pas atteint les gens de l'extérieur, et il existe, je crois une opposition inactive dans les villes et municipalités à la cessation du service-voyageurs.

Nous vous soumettons un résumé des voyageurs transportés de 1961 à 1968. Vous remarquerez que l'année 1966 est l'année où le National-Canadien a décidé de demander l'abandon du service-voyageurs.

C'est la troisième fois que nous comparaissons devant des comités de ce genre et nous avons toujours demandé une amélioration du service des voyageurs, nous avons demandé du meilleur matériel et plus de rapidité. Nous croyons que si c'était fait, il n'y a pas de voiture ou d'autobus qui pourrait faire la concurrence au train.

Nous avons vu les avantages de la Confédération du point de vue social et du point de vue matériel. Le port de Saint-Jean a été modernisé et Port-aux-Basques a obtenu un terminus moderne de transbordeurs et des millions de dollars ont été prévus pour ces installations portuaires. Toutefois, notre ligne

[*Text*]

we think the CNR should have done something towards the elimination of curves to improve the speed of our trains.

A lady yesterday made reference to the red, white and blue fares and we do have these in Newfoundland, but red, white and blue fares depend for profit on the fast movement of passengers. If a person takes a sleeper the meals are included, and the faster the train is going the less meals have to be served. Travelling 22 hours means eating three meals on the train. That is why we say that faster train travel would be cheaper and would be profitable for the CNR, with red, white and blue fares, because less time would be spent serving meals.

We take issue with the $916,000 loss in 1966; we do not have the breakdown of the figure, so we will reserve comment. We would draw to your attention, however, that the St. John's Municipal Council, this last week, has budgeted $525,000 to cover losses on this transportation system in 1969. Now, the Municipal Council is only a mite in transportation compared to CNR and they are paying this out to keep transportation going for service to the public of St. John's. Yet, we find a large corporation like the CNR with $916,000—we do not know the breakdown of the figures. Such things do not tie in with our thinking. We have Mr. Penney here today, who is a trainman, and he will tell you that our trains can go faster. Mr. Penney, what do you think?

Mr. A. W. Penney (Conductor, Railway Unions Labour Council, St. John's, Newfoundland): There is no doubt in our minds that the passenger train service could be 17 hours from St. John's to Port Aux Basques where at present you will find it is around 22 hours. This train has done this: some time ago when Mr. Gordon visited here to train crossed the Island in 16½ hours.

An hon. Member: Would you repeat that, please?

Mr. Penney: Mr. Donald Gordon visited here.

An hon. Member: What year was that?

Mr. Penney: At the time of his retirement.

An hon. Member: Was it 1966?

Mr. Penney: The train crossed the Island at that time in 16 hours and 30 minutes. I do not

[*Interpretation*]

ferroviaire à écartement étroit demeure la même et nous estimons que le National-Canadien aurait dû faire quelque chose en 18 ans pour enlever les courbes et améliorer la vitesse des trains.

Hier, une dame a mentionné le tarif bleu, blanc, rouge et nous l'avons ici, mais ce tarif bleu, blanc, rouge dépend pour son succès sur le transport rapide des voyageurs. Si une personne prend un wagon-lit, les repas sont compris et plus vite va le train, moins de repas doivent être servis. Un voyage de 22 heures veut dire trois repas à bord du train. Par conséquent, nous prétendons que ce serait au profit du National-Canadien d'avoir des trains plus rapides à l'égard des tarifs bleus, blancs et rouges

Nous nous opposons au $916,000 de pertes en 1966; nous n'avons pas les détails de ces chiffres, alors nous n'osons pas formuler des commentaires. Mais nous voulons souligner, toutefois, que cette dernière semaine le conseil municipal de Saint-Jean a établi un budget de $525,000 pour combler le déficit de 1969 de ce service de transport. Le conseil municipal de Saint-Jean est peu important dans le domaine des transports en comparaison du National-Canadien, mais la municipalité de Saint-Jean va défrayer ce déficit afin que ce service soit maintenu pour le public de Saint-Jean. Mais le National-Canadien a un déficit de $916,000 et ne nous donne pas les détails de ces chiffres. Nous ne pensons pas de cette façon. Nous avons M. Penney, ici, un cheminot, il pourra vous dire aujourd'hui que c'est possible pour nos trains d'aller plus vite. Qu'en pensez-vous, monsieur Penney?

M. A. W. Penney (chef de train, Conseil ouvrier des syndicats ferroviaires, Saint-Jean, Terre-Neuve): Il n'y a aucun doute dans notre esprit que le service-voyageurs, que le trajet pourrait se faire en 17 heures de Saint-Jean à Port-aux-Basques, alors qu'à l'heure actuelle vous trouverez que le trajet se fait en 22 heures. Le train l'a fait, il y a quelque temps, lorsque M. Gordon est venu nous visiter. Le train a traversé l'île en 16½ heures.

Une voix: Pourriez-vous, s'il vous plaît, répéter ce que vous venez de dire?

M. Penney: Quand monsieur Donald Gordon est venu nous visiter.

Une voix: En quelle année?

M. Penney: Au moment de sa retraite.

Une voix: Est-ce que c'était en 1966?

M. Penney: Le train avait traversé l'île, à ce moment-là en 16 heures et trente minutes.

[*Texte*]

see for the life of me, and I have 27 years service working as a freight conductor and passenger conductor, why the passenger service cannot be stepped up to 17 hours instead of the present 21 or 22 hours. For example, we have almost the same schedule now that we had 10 or 12 years ago when we had steam locomotives which required, at various terminals—Clarenville, Bishop's Falls and Corner Brook—to be refueled, the fires cleaned and engines changed periodically at those terminals.

At various points along the road those engines had to be watered. Since dieselization there is none of this. The same engine that goes on the train here goes through to Port Aux Basques. Some years ago with the steam locomotives we handled a mail car, an express car which had to be express, and mail de-train and in-train at various locations, while at present there is no mail car and there is no express car, but we have almost the same time schedule as we had at the time of handling the mail and express.

Mr. Lush: There is one point I would like to make.

Mr. Penney: Yes.

Mr. Lush: With regard to the losses on our passenger service, assuming that the passenger service was replaced by buses, and assuming then that the losses mount on the buses and the same argument is put forward, will the buses meet the same fate as the passenger trains?

The Chairman: Mr. McGrath?

Mr. McGrath: Mr. Chairman, I just have one brief question. I think it should be noted that we have two experienced railroaders on our Committee: the hon. member for London East and the hon. member for Moose Jaw, and perhaps they would be more knowledgeable on this than I, but I am intrigued by this figure quoted in here wherein the CNR claims it would cost them $140 million to remove the curves. You take issue with that and I think quite rightly so.

As an experienced railroader, what in your view would be a realistic figure? I realize now that perhaps this is in the area of guess work, but it does seem to me that this is what the CNR is guilty of in this particular regard;

[*Interprétation*]

Je n'y comprends rien et j'ai 27 ans de service auprès des chemins de fer, j'ai travaillé comme chef de trains de marchandises et comme chef de trains de voyageurs. Je ne vois donc pas pourquoi le service-voyageurs ne pourrait pas donner lieu à un trajet de 17 heures plutôt que de 21 ou 22 heures. Par exemple, nous avons presque le même horaire à l'heure actuelle qu'il existait il y a dix ou douze ans, alors que nous avions des locomotives à vapeur qui exigeaient à divers terminus, Clarenceville, Bishop's Falls et Corner Brook, des arrêts pour faire le plein de carburant, nettoyer les feux et changer de locomotives de temps à autre.

A divers endroits le long de la ligne, il fallait aussi les approvisionner d'eau. Depuis l'arrivée des locomotives avec moteurs diesels, ce n'est plus nécessaire. C'est la même locomotive qui fait le trajet de Saint-Jean à Port-aux-Basques. Il y a quelques années, les locomotives à vapeur comportaient aussi un wagon de courrier, un wagon de messageries; il fallait les charger et les décharger aux divers endroits, alors qu'à l'heure actuelle, il n'y a plus de wagon pour le courrier, il n'y a plus de wagon pour les messageries. Nous avons tout de même le même horaire que nous avions au moment où il fallait manutentionner et le courrier et les messageries.

M. Lush: J'ai un autre point que je voudrais faire.

M. Penney: Oui.

M. Lush: Au sujet des pertes pour le service-voyageurs, présumant que les autobus vont remplacer les trains et présumant aussi que les déficits augmenteront avec les autobus, on pourrait peut-être alors se demander si le service des autobus sera éliminé?

Le président: Monsieur McGrath?

M. McGrath: Monsieur le président, j'ai juste une question très brève que je voudrais poser. Je crois qu'on devrait peut-être noter que nous avons ici deux cheminots d'expérience: l'honorable député de London-Est et l'honorable député de Moose Jaw qui, peut-être, s'y connaîtraient mieux que moi dans ce domaine, mais le chiffre m'intrigue alors que le National-Canadien prétend que cela coûterait 140 millions de dollars pour éliminer les courbes. Vous doutez du chiffre, et je crois que c'est à juste titre.

D'après votre expérience, à titre de cheminot, quel serait, d'après vous, un chiffre réaliste? Je comprends qu'il s'agit peut-être d'une estimation, mais j'ai l'impression que c'est exactement ce que le National-Canadien

[*Text*]

they made a guess to support their own argument.

Mr. Lush: This was asked when the royal commission on transport was here. Those figures were pulled out of the hat, shall we say. As we say, we do not know of any independent engineering firm. Our trainmen and sectionmen say that a lot of the curves can be taken out with bulldozers but I cannot give you any figures on that. I am not an engineer and therefore I do not know.

Mr. McGrath: One other question: even with the curves as they now exist, in your view can the service be speeded up?

Mr. Lush: Yes, as Mr. Penney said, it could be speeded up by about 3½ hours.

Mr. McGrath: The train was able to make the trip in 16 hours to impress Mr. Gordon. Is it realistic to suggest that this 16 hour average could be arrived at with a few minor efficiencies made to it?

Mr. Lush: Well, I think you would have to take out some curves because you would have quite a job eating in the dining car if you were travelling at that speed.

Mr. McGrath: Well, how did Mr. Gordon manage to eat? He is known to have a great appetite.

The Chairman: Mr. Breau?

Mr. Breau: Mr. Gordon's trip was non-stop, was it not? Did his train stop like the passenger trains do?

Mr. Lush: No, it was practically non-stop.

Mr. Perrault: Another supplementary. Can you tell us how many cars made up the train involved in Mr. Gordon's trip?

Mr. Lush: Do you remember?

Mr. Penney: No.

Mr. Perrault: Was it a shorter train than normal?

Mr. Lush: Oh, it would be, yes.

Mr. Perrault: It was shorter?

Mr. Lush: Yes.

The Chairman: Mr. Rose?

[*Interpretation*]

a fait dans ce cas particulier; ils ont estimé c que cela coûterait à l'appui de leur argument

M. Lush: On a demandé cela lorsque l Commission royale d'enquête sur les trans ports a siégé ici. Ces chiffres ont, disons, ét pris au hasard. Comme nous le disons, nou ne savons pas si un bureau d'ingénieurs indé pendant a été consulté. Nos ingénieurs et nc cheminots disent qu'il y a beaucoup de cour bes qui pourraient être éliminées grâce a bulldozer, mais je ne puis vous donner d chiffres. Je suis un ingénieur et je ne le sai pas.

M. McGrath: Une autre question: mêm avec les courbes qui existent à l'heur actuelle, à votre sens, est-ce qu'on pourrai accélérer le service?

M. Lush: Oui, comme M. Penney l'a di cela serait possible. Il serait possible d'épar gner 3½ heures.

M. McGrath: Le train a été capable de fair le trajet dans 16½ heures pour impressionne M. Gordon. Alors serait-il réaliste de dire qu cette moyenne de 16 heures pourrait êtr maintenue si on rendait plus efficace certain aspects du trajet?

M. Lush: Il faudrait peut-être éliminer cer taines courbes, car il serait très difficile d manger, par exemple, avec les courbes à cett vitesse.

M. McGrath: Comment M. Gordon a-t-i réussi à manger? Il a bon appétit d'après c que j'ai entendu dire?

Le président: Monsieur Breau?

M. Breau: Son trajet a été sans arrê n'est-ce pas? Est-ce que son train a arrêt comme les trains du service-voyageurs?

M. Lush: Non, le voyage s'est fait pratique ment sans arrêt.

M. Perrault: Une autre question supplé mentaire. Pourriez-vous nous dire combien d wagons comportait le train pour le trajet d M. Gordon?

M. Lush: Vous en rappelez-vous?

M. Penney: Non.

M. Perrault: Est-ce qu'il s'agissait d'u train plus court que d'habitude?

M. Lush: Oui, il le serait.

M. Perrault: Il était plus court?

M. Lush: Oui.

Le président: Monsieur Rose?

[*Texte*]

Mr. Rose: Mr. Chairman, I have several questions here. I will state them briefly and I hope the answers will be brief too. Has the service, in your opinion, been deliberately downgraded in order to justify the buses?

Mr. Lush: Yes, we think so.

Mr. Rose: Have you any evidence of this that you could give the Committee?

Mr. Lush: Yes, I can say offhand what the people who talk about the trains say. They talk about the dirty windows, the dirty window sills and so on.

Mr. Rose: You feel that it is deliberately run down?

Mr. Lush: Yes. For instance, members of your Committee travelled on the train last night to Holyrood, but this is not the train that Newfoundlanders travel on. They spent two days cleaning up the train that you travelled on; they had an official there for two days and every bit of debris in the yard, every brake shoe, was cleaned up for you fellows.

Mr. Rose: This downgrading was a management decision. I thought perhaps they would make it as dirty as they could to sort of show comparison between it the buses.

How many jobs have been lost, as far as the various organizations you represent are concerned, as a result of this change?

Mr. Lush: We feel that cutting off the passenger service is like cutting off our right arm. By cutting off half of the service, I think the loss of employment must be much greater than was stated in the Transport Commission's report.

Mr. Rose: I understand that other jobs have been found and there has been retraining and this sort of thing. In this part of the country where the unemployment rate is extremely high, how many jobs have disappeared, whether the men are looked after or not? There are no jobs for other people to fill.

Mr. Lush: There are no jobs lost yet, you know.

Mr. Rose: No, I am not speaking of this. But in your view, what will be the total loss of jobs?

Mr. Lush: We think it will probably be up to about 200.

Mr. Perrault: I am sorry, I just wanted to ask a supplementary.

[*Interprétation*]

M. Rose: Monsieur le président, j'ai plusieurs questions à vous poser. J'essaierai de les poser brièvement et j'espère que les réponses seront brèves aussi. Est-ce que le service, à votre avis, a été détérioré délibérément afin de justifier le service des autobus?

M. Lush: Je le crois, oui.

M. Rose: Avez-vous des preuves à cet égard que vous pourriez présenter au Comité?

M. Lush: Je pourrais dire ce que les gens ont dit, on parle des trains, on parle des wagons sales, de fenêtres sales, etc.

M. Rose: Vous croyez que le service a été détérioré d'une façon délibérée?

M. Lush: Oui. Par exemple, les membres de votre Comité ont voyagé hier soir jusqu'à Holyrood, mais ce n'est pas le train dans lequel les Terre-neuviens voyagent. Ce train-là pour vous, on l'a nettoyé pendant deux jours, il y avait un fonctionnaire là, pendant deux jours et tout a été nettoyé justement à votre intention.

M. Rose: Et cette détérioration a été faite à la suite d'une décision de la direction. J'aurais cru qu'on l'aurait laissé aussi sale que possible pour montrer une comparaison avec les autobus. Combien de postes ont été perdus par les organismes que vous représentez par suite de ce changement?

M. Lush: Évidemment, le service de voyageurs si vous éliminez cela, vous nous coupez la main droite. En coupant le service de moitié, je crois qu'il y aurait beaucoup plus de pertes d'emplois que ce qu'on dit dans le rapport de la Commission des transports.

M. Rose: Je comprends que d'autres postes ont été trouvés et que du recyclage a été fait, etc., mais combien de postes ont été perdus dans cette partie du pays où le taux du chômage est très élevé? Combien d'emplois sont disparus? Il n'y a pas d'autres emplois de rechange?

M. Lush: Il n'y a pas eu de pertes d'emplois, jusqu'ici.

M. Rose: Non, ce n'est pas ce que je dis. Mais, à votre sens, quel sera le total des employés éliminés à la suite de cela?

M. Lush: Nous estimons environ 200.

M. Perrault: Je m'excuse, je voulais poser une question supplémentaire.

[*Text*]

Mr. Rose: Certainly.

The Chairman: You will allow a supplementary, Mr. Rose?

Mr. Perrault: Does the Canadian National Railway dispute your estimate of 200 or do they claim that they have offered alternative employment?

Mr. Lush: No, we put that in our brief.

Mr. Perrault: Does the railway dispute the position you have taken on that?

Mr. Lush: No.

Mr. Perrault: In other words, they admit there is going to be a net loss of 200 men.

Mr. Lush: No, they have not admitted that; they go along with 125.

Mr. Perrault: Have they suggested alternative methods of providing employment for them?

Mr. Lush: Yes. As it says in the brief, they have on-the-job training and so on.

Mr. Rose: That was not the point I was trying to make. It was not whether or not the people were provided for who were presently employed, but in an area of high unemployment a total of some 200 jobs are going to disappear and they will not be filled. Whether you call it silent firing or something else, it does not make any difference.

I noticed it stated in your brief that although passenger service for various reasons has fallen considerably it still served last year some 67,000 people, the point being that it still indicates a need. What is the story about service in the past? Has it always been just tri-weekly, because the buses—and you made the point of unfair competition—have a schedule much in excess of this.

Mr. Lush: The train operates in the summertime six days a week.

Mr. Rose: Do you have any idea of the total figure that it cost the CNR to provide the buses in the first instance?

Mr. Lush: It is estimated at about $700,000.

Mr. Rose: In your opinion, how far would that have gone in updating the rail service.

Mr. Lush: I am afraid I cannot answer that at the present time.

[*Interpretation*]

M. Rose: Certainement.

Le président: Vous permettez une question supplémentaire, monsieur Rose?

M. Perrault: Est-ce que le National-Canadien met en doute le chiffre de 200 ou est-ce qu'ils prétendent avoir offert des emplois alternatifs?

M. Lush: Non, nous avons mis ce chiffre dans notre mémoire.

M. Perrault: Est-ce que le chemin de fer dispute la position que vous avez prise?

M. Lush: Non.

M. Perrault: En d'autres termes, ils admettent qu'il y aura une perte nette de 200 hommes.

M. Lush: Ils prétendent qu'il n'y en a que 125.

M. Perrault: Est-ce qu'ils ont suggéré d'autres emplois?

M. Lush: Oui, on le dit dans le mémoire. Ils ont organisé un programme de formation en cours d'emploi.

M. Rose: Ce n'est pas ce que je voulais dire. Je ne voulais pas savoir si l'on s'occuperait des travailleurs actuellement en emploi. Rien n'empêche que, dans une région à chômage élevé, 200 emplois vont disparaître et ne seront pas remplacès. Que vous appeliez cela congédiement en douce ou autre chose, peu importe, il n'y a aucune différence.

Je crois que dans votre mémoire vous insistez beaucoup sur le fait que, bien qu'il ait diminué sensiblement, le service voyageurs a quand même desservi quelque 67,000 personnes. Cela indique qu'on a encore besoin de ce service. Quel est l'historique du service? Est-ce qu'il fonctionnait seulement trois fois par semaine parce que les autobus, et vous avez parlé de concurrence déloyale, ont un horaire beaucoup plus fréquent.

M. Lush: Oui, En été le train fonctionne six jours par semaine.

M. Rose: Est-ce que vous avez une idée de ce qu'il en a coûté au National Canadien pour acheter des autobus d'abord?

M. Lush: Environ 700 mille dollars.

M. Rose: A votre avis, dans quelle mesure cela a pu améliorer le service voyageurs des chemins de fer?

M. Lush: Je ne saurais vous répondre à l'heure actuelle.

[*Texte*]

Mr. Rose: If the passenger service is to be discontinued and the railbed has to be improved in any event to handle more freight, then the buses do not necessarily take away from that particular need to improve the railbed, do they?

Mr. Lush: No. You have the main line down through Nova Scotia and we have the modern train to Port-aux-Basques, but we still have the narrow gauge winding roads for hauling freight or passengers. We think this road has to be straightened out. In this modern day and age, if we cannot get something in seven or eight days from Toronto in to Newfoundland, then we are not progressing very much.

Mr. Rose: Do you know of any other province that does not have a rail passenger service?

Mr. Lush: Only what was said here yesterday about New Brunswick and Prince Edward Island. But I would say that if we had a mainline gauge here and people were not patronizing it we would not be down here today.

Mr. Horner: A number of questions in which I was interested have been answered, but I have a question with regard to the attitude of management on downgrading the service of the train. What is the practice with regard to right-of-way on the track? Does the passenger train pull over for the freight train and wait on the siding, or what happens?

Mr. Lush: Could I have your question again, please.

Mr. Horner: What has always been the attitude with regard to passenger service and priorities on the track? Does the passenger train pull over and wait for the freight?

Mr. Lush: Schedule-wise, the passenger train is the superior train, but it very often happens that they meet and they get delayed on the various sidings.

Mr. Horner: The passenger train gets delayed?

Mr. Lush: It varies, you know; it happens both ways.

Mr. Horner: I am now looking at what has been suggested by you and others. It has been suggested that management's attitude has been to downgrade the service. Do you think that in the past couple of years—since the completion of the Trans-Canada Highway, in

[*Interprétation*]

M. Rose: A votre avis, si le service voyageurs doit être discontinué, il faut améliorer de toute façon les rails pour le service messageries, et les autobus ne feront pas disparaître cette nécessité d'améliorer les assises de la voie?

M. Lush: Vous avez la ligne principale qui va jusqu'en Nouvelle-Écosse et le train moderne vers Port aux Basques; nous avons toujours une voie secondaire à faible écartement pour le transport des marchandises et des voyageurs. Cette voie devrait être redressée. A notre époque, si nous ne pouvons recevoir quelque chose en sept ou huit jours de Toronto, il n'y a pas grand progrès.

M. Rose: Croyez-vous qu'il y ait d'autres provinces qui n'aient pas de service ferroviaire pour voyageurs?

M. Lush: Le Nouveau-Brunswick et l'Île du Prince-Édouard. Mais si nous avions une voie à écartement régulier ici et que les gens ne l'empruntaient pas, on ne serait pas ici aujourd'hui.

M. Horner: On a déjà répondu à certaines questions qui m'intéressaient, mais j'en ai une au sujet de la direction qui détériore le service ferroviaire. Quelle pratique a-t-on adopté au sujet du droit de passage? Est-ce que le service voyageurs doit se retirer sur la voie d'évitement pour laisser passer les marchandises ou quoi?

M. Lush: Pourriez-vous poser la question de nouveau s'il vout plaît, monsieur Horner?

M. Horner: Quelle est l'attitude à l'égard du service voyageurs et de la priorité sur la voie? Est-ce que le service voyageurs doit prendre la voie d'évitement pour laisser passer les marchandiese?

M. Lush: Pour ce qui est de l'horaire, le service voyageurs passe en premier. Mais, bien souvent, il arrive qu'ils se rencontrent et sont retardés sur les différentes voies d'évitement.

M. Horner: C'est le service voyageurs qui est retardé?

M. Lush: Cela dépend; cela peut se produire pour les deux.

M. Horner: On a dit que l'attitude de l'administration avait été de laisser détériorer le service. Croyez-vous qu'au cours des quelques dernières années, depuis qu'on a terminé la route transcanadienne en 1966, il y a eu une augmentation du nombre de fois où le service

[*Text*]

any case, in 1966—that there has been an increase in the number of times in which a passenger train has had to pull over and stand by for the freight to go by?

Mr. Lush: I would not say that this has been deliberate.

Mr. Rose: No, I do not say it is deliberate, but have you been asked to do this because of circumstances?

Mr. Lush: It is not too often. It is very rare that the passenger train takes the siding. However, where you take our freight trains nowadays have probably 40 to 60 cars while a passenger train has 9 cars, so it is only reasonable—at least that is the way I feel—that we take the siding. But that happens only periodically.

Mr. Horner: You suggested, sir, that the trackage eventually will have to be straightened. I was speaking to a CPR official on the mainland the other day and he suggested that in moving their freight across the mainland they average, with stopping and so on, 27 miles an hour on their movement of freight. I realize that you have a length of rail something in excess of 548 miles here in Newfoundland—much shorter than the mainland—but could you give the Committee some ideas as to what your average speed would be on the movement of freight.

Mr. Lush: The freight moves at an average of 30 miles an hour and the passenger 45.

Mr. Allmand: After the decision by the Canadian Transport Commission to permit the discontinuance of passenger service did the unions here in Newfoundland make any appeal? The Act provides for two types of appeal, as a matter of fact. Did you make either type of appeal?

Mr. Lush: Through the Railway Act we are going to make an appeal.

Mr. Allmand: Excuse me, sir, I cannot hear you.

Mr. Lush: Through the Railway Act.

Mr. Allmand: Did you make an appeal under the Railway Act?

Mr. Lush: We are making it now.

Mr. Allmand: You are making it now?

Mr. Lush: Yes.

[*Interpretation*]

voyageurs a dû attendre pour laisser passer le service marchandises?

M. Lush: Non. Je ne dirais pas que cela a été fait de propos délibéré.

M. Rose: Non, ce n'est pas ce que je dis. Mais, est-ce qu'on vous a demandé de le faire vu les circonstances?

M Lush: Non, cela n'arrive pas tellement souvent. C'est plutôt rare que le service voyageurs doit prendre la voie d'évitement. Cependant, si vous regardez les trains de marchandises d'aujourd'hui, qui sont de 40 à 60 wagons, alors qu'un train de voyageurs n'en a que 9 wagons, alors il est raisonnable, du moins c'est là mon avis, que nous prenions la voie d'évitement. Cela se présente de temps à autre.

M. Horner: Vous avez dit qu'on devrait éventuellement redresser la voie. Je m'entretenais l'autre jour avec un représentant du CPR sur le continent, il a dit que lorsqu'ils font le transport des marchandises à travers le Canada, le train marchandises fait en moyenne 27 milles à l'heure, compte tenu des arrêts. Je sais que vous avez environ 548 milles de chemins de fer à Terre-Neuve—c'est beaucoup moins que sur le continent. Mais pourriez-vous nous dire quelle est la vitesse moyenne du train de marchandises?

M. Lush: En moyenne 30 milles à l'heure, et le service voyageurs, 45.

M. Allmand: Après que la Commission canadienne des transports a décidé de permettre l'interruption du service voyageurs, est-ce que les syndicats, ici à Terre-Neuve, ont appelé de la décision? La Loi prévoit deux genres d'appels. Quel genre d'appel, avez-vous fait?

M. Lush: Simplement en vertu de la Loi sur les chemins de fer, nous allons faire appel.

M. Allmand: Je ne vous entends pas bien.

M. Lush: En vertu de la Loi sur les chemins de fer.

M. Allmand: Est-ce que vous avez fait appel en vertu des dispositions de la Loi?

M. Lush: Oui, nous sommes en train de le faire.

M. Allmand: Vous le faites maintenant?

M. Lush: Oui.

[*Texte*]

Mr. Allmand: So you expect to file an appeal shortly?

Mr. Lush: Yes, we will have it ready within a week.

Mr. Allmand: Thank you.

Mr. Perrault: What is the usual make-up of the train from St. John's? For example, how many day coaches does the one we took last night usually have?

Mr. F. G. Chancey (Chairman, Railway Unions Labour Council): Mr. Chairman, if I may interject a point here, our trains vary in size. And this might be an opportune time to say that the train that left at Christmas carried 700 people and had about 10 sleepers. This was a big train.

Mr. Perrault: Do you have a normal size train that you make up? For example, does the train that left last night at 11.30 p.m. usually consist of five or six daycoaches and two sleepers? Could you give us an approximate idea.

Mr. Chancey: Would you not say that would be an average train?

Mr. Penney: No. On last night's train, for instance, if my memory serves me right, there were five coaches. Ordinarily at this time of the year there would be three coaches.

Mr. Perrault: Was there one sleeper on that?

Mr. Penney: Ordinarily at this time of the year there are two sleepers and a crew car.

Mr. Perrault: How many of a crew?

Mr. Penney: When I refer to the crew car, I am referring to the dining car staff.

Mr. Perrault: How many members of the union would be working aboard that train last night, for example?

Mr. Penney: You mean the dining car staff?

Mr. Perrault: The number of employees.

Mr. Penney: There were four trainmen, a conductor, two brakemen, a baggageman, and I am not exactly sure about the stewards.

[*Interprétation*]

M. Allmand: Vous vous attendez alors, à présenter l'appel d'ici peu, si je comprends bien?

M. Lush: Oui, ce sera prêt d'ici une semaine.

M. Allmand: Merci.

M. Perrault: Quelle est la composition habituelle du train qui vient de St-Jean? Combien de wagons ordinaires a habituellement le train que nous avons pris hier?

M. F. G. Chancey (président du Conseil des syndicats ferroviaires): Monsieur le président, je voudrais intervenir ici. La dimension de nos trains varie. Ce serait peut-être l'occasion de dire que le train qui est parti à Noël transportait 700 personnes et comprenait environ 10 voitures-lits. C'était un train assez important.

M. Perrault: Est-ce que vous avez un train moyen que vous constituez, disons, comme le train qui est parti hier soir à 11 h 30. Est-ce qu'il comprend toujours cinq ou six voitures ordinaires et deux voitures-lits?

M. Chancey: Ne diriez-vous pas que c'était un train moyen?

M. Penney: Le train d'hier soir, par exemple, si je me souviens bien, avait 5 wagons ordinaires. Habituellement à cette période-ci de l'année il y en aurait trois.

M. Perrault: Y avait-il un wagon-lits?

M. Penney: A cette période-ci de l'année, il y a ordinairement deux wagons-lits et un wagon pour le personnel.

M. Perrault: Combien y a-t-il de membres d'équipage?

M. Penney: Quand je parle du wagon pour le personnel, je veux parler du personnel du wagon-restaurant.

M. Perrault: Combien de membres du syndicat travaillaient à bord de ce train, hier soir?

M. Penney: Vous voulez parler du personnel du wagon-restaurant?

M. Perrault: Le nombre d'employés à bord.

M. Penney: Il y avait quatre agents de train, un chef de train, deux serre-freins, un bagagiste, et quelques garçons de tables dont je ne connais pas le nombre.

[*Text*]

Mr. Perrault: What did it all add up to approximately?

Mr. Penney: Let us say 10 or 12 men.

Mr. Perrault: What I was interested in Mr. Chairman, and I hope that we might be able to obtain it, is the percentage of occupancy of seats. I think that is relevant in applying it to bus travel and so on. Thank you very much.

Mr. Nesbitt: When was the last new passenger equipment acquired by the railway four years ago, five years ago or ten years ago?

Mr. Lush: About ten years ago.

Mr. Nesbitt: Would you have any idea of the value of the equipment and the amount of equipment at that time.

Mr. Lush: I will get the figures for you. I do not have them here.

Mr. Nesbitt: Could you get for us the exact time the last new equipment was bought, the amount and so on.

Mr. Lush: Yes, I know what you mean.

Mr. Breau: I think it would be also helpful to know if the figures being requested are consistent with the cost in the rest of the country, and if the cars last as long as they do in New Brunswick or elsewhere.

The Chairman: That was not the question Mr. Nesbitt asked.

Mr. Breau: He asked when the new equipment was bought. We are trying to find out whether or not the service was downgraded and if it was not well managed. In that regard we should find out if the life of a car in Newfoundland is comparable to the mainland.

Mr. Nesbitt: I quite see your point, Mr. Breau, but my point in asking the question was to find out whether they had spent some millions of dollars on equipment that is just going to be thrown away.

Le président: Monsieur Godin, vous pouvez poser vos questions.

M. Godin: Je vous remercie, monsieur le président. Dans la région de Québec, nous avons eu, depuis un an, plusieurs accidents: déraillements de wagons et autres. La province de Terre-Neuve a-t-elle été témoin d'accidents de ce genre depuis quelques années?

[*Interpretation*]

M. Perrault: Enfin, qu'est-ce que cela représente en tout?

M. Penney: Disons 10 ou 12 hommes.

M. Perrault: Ce qui m'intéressait, monsieur le président et j'espère que nous serons en mesure d'obtenir ce chiffre, c'est le pourcentage des sièges occupés. Je pense que ce sera là un renseignement pertinent si on veut l'appliquer au transport par autobus. Merci beaucoup.

M. Nesbitt: Quand le National Canadien a-t-il acheté du matériel neuf pour la dernière fois? Il y a environ 4, 5 ou 10 ans?

M. Lush: Il y a environ 10 ans.

M. Nesbitt: Quelle était la valeur ou l'importance du matériel à ce moment-là? Ou pourriez-vous nous dire ce que cela représentait en argent?

M. Lush: Je pense que je pourrai obtenir les chiffres pour vous, monsieur Nesbitt.

M. Nesbitt: Nous voudrions savoir exactement quand on a acheté du matériel neuf pour la dernière fois, et ce qu'il en a coûté.

M. Lush: Je vois ce que vous voulez dire.

M. Breau: Je pense qu'il serait utile aussi de savoir si les chiffres demandés, sont consistants avec ceux du reste du pays, et si les wagons durent aussi longtemps qu'au Nouveau-Brunswick ou ailleurs.

Le président: Ce n'est pas la question qu'a posée M. Nesbitt.

M. Breau: Il a demandé quand le matériel a été acheté. Maintenant, nous essayons de savoir si le service s'est détérioré et s'il est bien administré. A cette fin, nous devrions savoir si la durée des wagons à Terre-Neuve peut se comparer à celle d'un wagon sur le continent.

M. Nesbitt: Je vois très bien ce à quoi vous voulez en venir, monsieur Breau, mais j'ai posé la question afin de voir si on a dépensé des millions de dollars pour un équipement qui va être mis de côté.

The Chairman: Would you ask your questions please, Mr. Godin.

Mr. Godin: Thank you, Mr. Chairman. In the past year we have witnessed several accidents, derailments and so on, in the Quebec City area. Have you had accidents of this type over the past few years in the Province of Newfoundland? Could this be one of the

[Texte]

st-ce que cela pourrait être une des raisons our lesquelles le nombre de voyageurs a iminué?

Mr. Lush: No, we have had no accidents ke that to passenger trains. We have had eople killed by being struck by the train or eing struck by a truck, but not in the actual peration of the passenger trains.

M. Godin: Est-ce que plusieurs gares seront ermées à la suite de la décision d'abandon- er le train?

Mr. Lush: No, I could say not many ecause even at the present time the buses re using the stations and we will still have ie freight service using the stations. Mr. 'enney, would you care to add to that?

Mr. Penney: I do not think that there will e any stations closed completely but there is possibility of some operators' positions eing eliminated.

M. Godin: Dans le Journal de la Chambre, y a environ deux semaines, le CN nous onnait des chiffres qui indiquaient que des illiers de personnes ont perdu leur emploi epuis cinq ans, alors qu'en même temps, le hiffre total des salaires était passablement ugmenté. En ce qui concerne Terre-Neuve, evant le congédiement d'un grand nombre e travailleurs, avons-nous là une occasion de oir augmenter le salaire des officiers qui demeureront en fonctions?

Mr. Lush: Yes, that could be the situation. There is no doubt about that. But we have ot suffered any major layoffs here as yet.

Mr. Skoberg: Mr. Chairman and Brother Lush, I am just wondering whether or not here has been any application made before y the Canadian National to abandon this passenger train?

Mr. Lush: We do not know but we have our wn theories and a lot of people have. It has een said that this is a deal that was consum- nated some years ago and it is only coming ut now. We have accused publicly the Premier of this Island and Mr. Pickersgill of ollusion in regard to the Trans-Canada High- vay and the passenger trains, one for the ther. This has been denied but we are not onvinced that there was not some deal or omething before that time.

Mr. Skoberg: I presumed last night that as ar as the roadbed is concerned, it is an xcellent roadbed, and as far as the curves

[*Interprétation*]

reasons why the number of passengers has declined?

M. Lush: Non, nous n'avons pas eu d'accident de ce genre dans le service voyageurs. Il y a eu des gens qui ont été tués quand ils ont été frappés par un train ou par un camion, non pas durant l'opération même des trains de passagers.

Mr. Godin: Will many stations be closed down as a result of the decision to give up the train service?

M. Lush: Non, pas tellement, parce que, même en ce moment, les autobus utilisent ces gares. Il y a toujours les services des messageries qui utilisent les gares. Monsieur Penney, avez-vous quelque chose à ajouter?

M. Penney: Je ne crois pas qu'on fermera complètement des gares, mais il se peut que des postes d'opérateurs disparaissent.

Mr. Godin: About two weeks ago, the CN gave us figures in the House of Commons Debates indicating that thousands of people have lost their job over the past five years, while at the same time the total figure for wages had increased a fair amount.

With regard to Newfoundland, in view of the great number of lay-offs, will this situation give rise to an increase in salary for those officers who will not be laid off?

M. Lush: Oui, il pourrait en être ainsi, il n'y a aucun doute à ce sujet, mais nous n'avons pas vraiment eu de mise à pied importante jusqu'ici.

M. Skoberg: Monsieur le président, confrère Lush, je me demande si on a présenté une demande auparavant au National-Canadien pour abandonner ce service aux voyageurs.

M. Lush: Nous ne savons pas, mais nous avons nos propres théories comme bien d'autres. On dit que cette entente a été conclue il y a quelques années et qu'elle vient tout juste d'être connue. Nous avons publiquement accusé le premier ministre de cette île et M. Pickersgill d'avoir fait collusion pour ce qui est de la route transcanadienne ou du service aux voyageurs, l'un ou l'autre. Cela a été réfuté, mais nous ne sommes pas tout à fait convaincus qu'il n'y a pas eu d'entente de conclue avant ce temps.

M. Skoberg: J'ai trouvé hier soir, que l'encaissement était excellent; pour ce qui est des courbes, on peut facilement les faire disparaî-

[*Text*]

are concerned they can be ironed out in a 10-or 20-year period. There is nothing that has to be done immediately.

In your opinion do you consider that the standardization of the track itself would be necessary at this time in the history of the province?

Mr. Lush: I think it has to come. For instance in Port aux Basques I notice they are getting some new jacks for the transfer of cars and that is going to cost $1 million. But how do you know that within five years that thing might not be obsolete? As you say, in the movement of freight and passengers you still have a narrow gauge line and you cannot move it as fast through Newfoundland as you can move it through Nova Scotia. And we have to get all our goods. As we said here this morning, 90 per cent comes from the mainland.

Mr. Skoberg: The question I asked this morning, sir, of one of the other witnesses was whether or not he considered that the trial period should be extended because of the climatic conditions you have had this year. Does your organization that you are representing agree with that statement?

Mr. Lush: It comes from us. We cannot see how any three men could come down to Newfoundland and hold hearings and decide in three months that the bus service is the best service for Newfoundland forever and ever and ever. You have to be clairvoyant to make a decision like that. No three men could do that.

Mr. Skoberg: Are any of the members on the Canadian Transport Board residents of your province?

Mr. Lush: No.

Mr. Skoberg: At any time?

Mr. Lush: No.

Mr. Skoberg: Did they have any staff people with them who were residents of the province or did they accept representation from those people most directly concerned?

The Chairman: I do not think that your question is related to the subject, Mr. Skoberg.

Mr. Skoberg: I think it is very much so.

Mr. Lush: Yes, they had a DOT representative here.

Mr. Skoberg: I did hear that some instructions have been issued—and this once again may be in the rumour department—to those

[*Interpretation*]

tre au cours d'une période de 10 ou 20 ans. I n'y a rien qui doive être fait immédiatemen Et croyez-vous que la normalisation des voie serait essentielle à ce stade-ci dans l'histoir de la province?

M. Lush: Il faudra y arriver un jour. Ainsi à Port-aux-Basques, je vois qu'on obtient d nouveaux dispositifs pour le transfert de wagons et cela coûtera 1 million de dollars Mais dans 5 ans, ce sera peut-être désue Comme nous disons, pour le service des voya geurs et des marchandises, nous avons tou jours une voie étroite. Et l'on ne peut pas, Terre-Neuve, se déplacer aussi rapidemen qu'en Nouvelle-Écosse. Il nous faut transpor ter toute notre marchandise. Comme nous l'a vons dit ce matin, 90 p. 100 des marchandise viennent du continent.

M. Skoberg: Ce matin, je voulais savoi d'un autre témoin, s'il trouvait que la périod d'essai devait être prolongée vu les condition climatiques que vous avez eues cette année L'organisme que vous représentez est-il d'ac cord avec cette déclaration?

M. Lush: C'est nous qui l'avons faite. Nou ne pouvons voir comment seulement troi hommes peuvent venir à Terre-Neuve, avoi des audiences, et décider en trois mois que l service d'autobus est à jamais le meilleu pour Terre-Neuve. Il faut être devin pou prendre une telle décision. Ce ne sont pa trois hommes qui peuvent le faire.

M. Skoberg: Est-ce qu'il y a des membre de la Commission des Transports qui habiten votre province?

M. Lush: Non.

M. Skoberg: Y en a-t-il jamais eu?

M. Lush: Non.

M. Skoberg: Est-ce qu'ils avaient des mem bres de leur personnel qui venaient de Terre Neuve et ont-ils eu des instances de person nes concernées de plus près?

Le président: Je ne crois pas que ce soi une question qui se rattache au sujet, mon sieur Skoberg.

M. Skoberg: Je le pense.

M. Lush: Oui, ils avaient un représentan du ministère des Transports ici.

M. Skoberg: J'ai entendu que des directive ont été émises, une fois de plus, ce n'es peut-être qu'une rumeur, à l'intention de

Texte]

eople who come in to Port au Basques to de the bus and not the train. Do you know hether there is any substance in that atement?

The Chairman: Order.

Mr. Skoberg: I would suggest, Mr. Chairman, this is most important. This is one of ne most important aspects of the situation.

The Chairman: Are you through, Mr. koberg?

Mr. Skoberg: No, I have another one here, believe, Mr. Chairman.

The Chairman: Try to get a better one this me.

Mr. Skoberg: I realize it is rather difficult o answer questions such as that, particularly hen some Committee members are not preared to listen to the answers, but I am just ondering whether or not you have any hought as to why there was not official epresentation made by the Province of Newoundland itself? Has your organization pproached the government in this regard?

Mr. Lush: Yes, we have had two meetings ith the government and they did not commit hemselves either one way or another.

Mr. Mahoney: On a point of order, Mr. Chairman, the record of the hearing of the Canadian Transport Commission shows that he Attorney General of the province ppeared. Maybe Mr. Skoberg is speaking bout a different thing but I think he should larify it.

An hon. Member: Could the judgment of he Board be recorded in the minutes?

[*English*]

The Chairman: As an exhibit, not an ppendix. All in favour?

Some hon. Members: Agreed.

Mr. Thomas (Moncton): On a point of order with regard to what my honourable friend just said, it is true the Government of Newfoundland was represented at that hearing, but if you recall I asked the Minister representing the Government of Newfoundland yesterday if they intended to make any further representations on this and he said he did not know. That is on the record.

Mr. Breau: On the same point of order, Mr. Chairman, he answered on that that he could not state the policy of the government. He

[*Interprétation*]

personnes qui viennent à Port-aux-Basques pour qu'elles prennent l'autobus et non pas le train. Savez-vous si cela est vrai ou pas?

Le président: A l'ordre.

M. Skoberg: Je dirais, monsieur le président, que cela est très important, c'est un aspect de la situation des plus importants.

Le président: Avez-vous terminé, monsieur Skoberg?

M. Skoberg: Non, je crois que j'ai une autre question ici, monsieur le président.

Le président: Essayez d'avoir quelque chose d'un peu mieux cette fois-ci.

M. Skoberg: Je me rends compte qu'il n'est pas facile de répondre à de telles questions, surtout quand des membres du Comité ne sont pas prêts à entendre les réponses. Mais seulement, je me demandais si vous savez pourquoi on n'a pas présenté des instances officielles au nom de la province de Terre-Neuve. Est-ce que votre organisation est entrée en communication avec le gouvernement à cet égard?

M. Lush: Oui, nous avons rencontré le gouvernement à deux reprises. Ils ne se sont pas engagés d'une façon ou d'une autre.

M. Mahoney: J'invoque le Règlement, monsieur le président. Le compte rendu de l'audience de la Commission canadienne des Transports nous montre que le procureur général de la province a comparu. Peut-être que M. Skoberg parle d'une autre chose, mais je pense qu'il faudrait préciser.

Une voix: Est-ce que le jugement de la Chambre de commerce peut être inscrit au compte rendu?

Le président: Comme pièce de témoignage, non en annexe. Tous en faveur?

Des voix: Convenu.

M. Thomas (Moncton): Monsieur le président, j'en appelle au Règlement sur ce qu'on vient de dire. C'est vrai que le gouvernement de Terre-Neuve fut représenté au cours de cette audience, mais si vous vous souvenez, j'ai demandé au ministre représentant le gouvernement de Terre-Neuve hier, si ce dernier avait l'intention de faire d'autres instances à cet égard. Il a dit qu'il n'en savait rien. Et cela est consigné au compte rendu.

M. Breau: Pour le même appel au Règlement, il a dit qu'il ne pouvait faire part de la politique du gouvernement. Il était ici pour

[*Text*]

was here to represent the government as far as the brief was concerned. He does not state the policy of the government. That is the Premier's responsibility.

Mr. Skoberg: Mr. Chairman, I am wondering whether or not any of the witnesses could tell this Committee why that particular passenger train leaves this city at 11.30 at night?

The Chairman: That is another question for the CNR.

Mr. Skoberg: I believe we are trying to determine transportation policy, Mr. Chairman. If you leave at 11.30 at night out of a city such as this you are not going to have traffic on it. I understand two years ago it left around noon. There must be a reason for the changing of the schedule and I would like to know what it is.

Mr. Lush: Yes, mostly to coincide with the mainland schedules and the ferries.

Mr. Skoberg: At Port aux Basques. Is that true? Thank you.

Mr. Allmand: Gentlemen, has there ever been any suggestion that you might have rail liner service in Newfoundland, and if so, has your union taken any position on rail liner service for passengers?

Mr. Lush: No, the only reference to rail liner service was the Canadian Transport Commission. In their report they discard that as being impractical. We have never supported rail line. We have always gone for the improvement of the passenger service here.

Mr. Allmand: In many areas of Canada they service passengers with rail liners. What great objection do you have to rail liners?

Mr. Lush: We do not have any objections to rail liners. We have never gone after them. The only reference made, as I said, was to the Canadian Transport Commission when Mr. Richard Cashin made the suggestion in his brief to the Canadian Transport Commission. That is the only reference to rail liners that was ever made.

Mr. Allmand: Thank you.

Mr. Carter: Most of my questions, Mr. Chairman, have already been answered. Has Mr. Lush any knowledge of the situation in Port aux Basques where body transfers take place, where they transfer freight cars from the wide gauge to the narrow gauge, and is he aware of certain statements that have been

[*Interpretation*]

représenter le gouvernement dans la présentation du mémoire. Il n'établit pas les politiques du gouvernement, c'est le premier ministre qui fait cela.

M. Skoberg: Je me demande si un des témoins pourrait dire à ce Comité pourquoi ce train de voyageurs quitte la ville à 11 heures 30 le soir?

Le président: C'est une autre question pour le CN.

M. Skoberg: Nous essayons d'établir des lignes de conduite en matière de transport, monsieur le président. Si vous quittez une ville comme celle-ci à 11 heures 30 le soir, vous n'aurez pas un grand nombre de passagers. Il y a deux ans, il partait à midi. J'imagine qu'on a des motifs pour modifier l'horaire, et j'aimerais les connaître.

M. Lush: Oui. C'est pour coïncider les horaires du continent et les transbordeurs.

M. Skoberg: A Port-aux-Basques, c'est bien cela? Merci.

M. Allmand: Messieurs, est-ce qu'on a jamais suggéré que vous pourriez avoir le service autorail à Terre-Neuve, et si oui, est-ce que votre syndicat a établi une ligne de conduite pour le service autorail aux voyageurs?

M. Lush: Non, le seul moment où on a parlé de l'autorail, c'est devant la Commission canadienne de Transports. Selon le rapport qui en a résulté, ce n'est pas pratique. Nous n'avons jamais été en faveur de l'autorail, nous avons toujours demandé une amélioration du service aux voyageurs ici.

M. Allmand: Dans bon nombre de régions du Canada, le service aux voyageurs se fait au moyen de l'autorail. Pourquoi vous opposez-vous à l'autorail?

M. Lush: Nous ne nous opposons pas vraiment à l'autorail. Nous n'avons jamais essayé de l'obtenir. Le seul moment où il en fut question comme je l'ai dit c'est devant la Commission canadienne des Transports, lorsque M. Richard Cashin en a fait la proposition dans son mémoire. C'est le seul moment où on a parlé de l'autorail.

M. Allmand: Merci.

M. Carter: La plupart de mes questions monsieur le président on déjà fait l'objet de réponses. Je demanderais à M. Lush s'il est au courant de la situation à Port-aux Basques où l'on transfère des wagons de marchandise d'un rail à écartement large à une voie d'écartement étroit? Est-il au courant aussi de

[*Texte*]

made that this operation is a dangerous one in that the facilities were never built for this sort of thing and it is a dangerous operation as far as the workers are concerned?

Mr. Lush: I cannot answer that question. I am familiar with the operations but as to the safety or otherwise I have no comment to make.

Mr. Carter: You have no knowledge of this.

Mr. Trudel: Mr. Chairman, I would like to ask Mr. Lush how many union employees are attached to the rail service.

Mr. Lush: In the rail service?

Mr. Trudel: Yes, in its entirety.

Mr. Lush: We have about 2,000.

Mr. Trudel: What percentage of these employees are now attached to the passenger division or the transport of passengers?

Mr. Lush: I think nearly all of them.

Mr. Trudel: What differential would you have between the freight division and the passenger division? Or have you no breakdown?

Mr. Lush: No, no breakdown.

Mr. Trudel: Thank you.

Mr. Turner (London East): If the railroads cut off passenger trains, the men go back into freight service, right?

Mr. Lush: That is right, sir.

Mr. Turner (London East): According to your seniority you pick the best job. Somebody has to go out on the street. Can you take your seniority to another district?

Mr. Penney: No.

The Chairman: One at a time, please.

Mr. Chancey: Our organization does allow us to move to the mainland if we lose our employment in Newfoundland.

Mr. Turner (London East): On the running crews, can they take their seniority to the mainland?

Mr. Penney: No. In answer to your question, no, as far as the trainmen are concerned. Our seniority just figures from St. John's to Port aux Basques.

[*Interprétation*]

certaines déclarations qui ont été faites à l'effet que ces opérations sont plutôt dangereuses, dans ce sens que les services n'ont jamais été aménagés à cette fin et que c'est plutôt dangereux pour les travailleurs.

M. Lush: Je ne saurais répondre à cette question. Je connais les opérations en cause, mais pour ce qui est du facteur de sécurité, je n'ai pas de commentaire à faire.

M. Carter: Vous n'êtes pas au courant.

M. Trudel: Monsieur le président, je voudrais demander à M. Lush combien d'employés syndiqués sont attachés au service ferroviaire.

M. Lush: Au service ferroviaire?

M. Trudel: Oui, en tout.

M. Lush: Nous en avons environ 2,000.

M. Trudel: Alors quel pourcentage de ces employés sont actuellement rattachés au service aux voyageurs ou au transport des voyageurs?

M. Lush: A peu près tous, je crois.

M. Trudel: Quelle différence y a-t-il entre le service de messagerie et le service des voyageurs. Est-ce que vous avez une ventilation?

M. Lush: Non, aucune ventilation.

M. Trudel: Merci.

M. Turner (London-Est): Lorsque le service aux voyageurs prend fin, ces hommes sont transférés au service des messageries, n'est-ce pas?

M. Lush: Oui.

M. Turner (London-Est): Suivant l'ancienneté, on prend les meilleures places. Quelqu'un est donc jeté dans la rue. Pouvez-vous transférer votre ancienneté dans un autre district?

M. Penney: Non.

Le président: Un à la fois, s'il vous plaît.

M. Chancey: Notre association nous permet d'aller sur le continent si nous perdons notre emploi à Terre-Neuve.

M. Turner (London-Est): Est-ce que le personnel itinérant peut transférer son ancienneté sur le continent?

M. Penney: Non. En réponse à votre question, non, pour ce qui est des cheminots. Notre ancienneté ne compte que de Saint-Jean à Port-aux-Basques.

[*Text*]

Mr. Turner (London East): Can you give me the length of service of the employees who are going to be affected by this—of the oldest and the youngest?

Mr. Penney: I would say in the vicinity of 10 to 12 years' seniority.

Mr. Turner (London East): Is that the most senior? When did the CNR hire employees here in the last five years? Did they hire anybody?

Mr. Penney: Yes, they hired employees the year before last.

Mr. Turner (London East): Are these temporary employees or are they still working?

Mr. Penney: No, no, they were just temporary employees. Usually more or less for vacation purposes.

Mr. Turner (London East): Have you any employees that are close to pension age?

Mr. Penney: Within the next five years.

Mr. Turner (London East): Has the Company made any suggestions that they would make up the five years' difference, because as you know the CNR pension plan is 65?

Mr. Penney: No, except that they have agreed verbally that they will try to fit those affected into other employment.

Mr. Turner (London East): Has the Company offered the employees ony severance pay for the years that they are going to lose?

Mr. Penney: Not to my knowledge.

Mr. Turner (London East): You said in your figures approximately 200 employees. The Company says roughly 130. Have they been offered any positions with the CNR, and if they have, will they have to move their homes to the mainland?

Mr. Lush: That has been said to us, yes. A porter or a steward said to us some time ago that they could transfer to the mainland, probably to Toronto or Winnipeg.

Mr. Turner (London East): If they do transfer you, will there be any loss in pay? Will there be a difference if they put you in another job?

[*Interpretation*]

M. Turner (London-Est): Pourriez-vous me donner la durée du service des employés qui seront affectés par tout cela, des vieux et des jeunes?

M. Penney: Je dirais environ de 10 à 12 ans d'ancienneté.

M. Turner (London-Est): Est-ce là l'ancienneté la plus longue? Quand le National-Canadien a-t-il embauché des employés ici au cours des cinq dernières années? N'ont-ils embauché personne?

M. Penney: Oui, ils ont embauché des employés, il y a deux ans.

M. Turner (London-Est): Est-ce qu'ils travaillent toujours ou est-ce que c'était à temps partiel?

M. Penney: Simplement à temps partiel, le plus souvent à l'occasion des vacances.

M. Turner (London-Est): Est-ce qu'il y a des employés qui se trouvent près de l'âge de la retraite?

M. Penney: Dans les cinq prochaines années.

M. Turner (London-Est): La compagnie a-t-elle laissé entendre qu'elle comblerait les cinq années qui manquent, car, comme vous savez, le régime de pension du National-Canadien commence à 65 ans.

M. Penney: Non, sauf qu'on a convenu oralement qu'on essaierait de transférer ceux qui sont affectés dans un autre emploi.

M. Turner (London-Est): La compagnie a-t-elle offert aux employés une paye de compensation à l'égard des années qu'ils vont perdre?

M. Penney: Non, pas à ma connaissance.

M. Turner (London-Est): Vous dites, selon vos chiffres environ 200 employés. La compagnie dit 130 environ. Est-ce qu'on leur a offert un poste au National-Canadien? Si on l'a fait, devront-ils déménager sur le continent?

M. Lush: C'est ce qu'on nous a dit, oui. Un «porter» ou un «steward» nous a dit, il y a quelque temps, qu'il pourrait être transféré sur le continent, probablement à Toronto ou à Winnipeg.

M. Turner (London-Est): Est-ce qu'il y aura une perte de salaire en cas de transfert? Est-ce qu'il y aurait une différence si on vous donnait un autre travail?

exte]

Mr. Lush: That is the situation here even ith the other jobs. The CNR say there are 5 jobs, and they are going on their job training to find jobs for all of them. If I am rning $450 a month and I get another job ying $350 a month my wages have gone wn and my standard of living has gone wn. But to read it in the paper it seems at they have placed everybody.

Mr. Turner (London East): When you buy a me, you buy it figuring on a certain amount money coming in. Right?

Mr. Lush: That is true, yes.

Mr. Turner (London East): If this money is ken off you are in trouble. They have not scussed this with the Brotherhood?

Mr. Lush: No, not yet, although they have trained bus drivers from the staff of carmen or anyone who wanted.

Mr. Turner (London East): Could you give e a comparison of the pay between the running crews and the bus drivers in dollars and nts? In other words, how much per week es a bus driver make?

Mr. Chancey: The bus drivers now, sir, I ink are based on $475 a month. The bus rivers are non-organized. They are seeking embership in one of our local unions and hen they are organized they will be a par ith the trades pay that is paid in Newfoundnd. But they are only at the stage of being rganized at the present time.

Mr. Turner (London East): These bus drivrs are former employees of the Canadian ational Railways?

Mr. Chancey: I represent the carmen, sir. Ve have now seven former carmen who are riving buses.

Mr. Turner (London East): Has the compay made any offer to retrain the engineers, ne firemen, the trainmen, or the conductors?

Mr. Chancey: The company put out a genral bulletin and anybody interested in enterng the bus service could apply.

Mr. Turner (London East): As a former ngineer of Canadian National you know the ong hours we worked. I have been fortunate nough to have been in the passenger service or the last 10 years, and it has taken me 28

[*Interprétation*]

M. Lush: Voilà la situation, même avec un autre emploi. Le CN dit qu'il y a 125 emplois; il utilisera le recyclage des emplois pour trouver du travail pour tous ces employés. Si je gagne $450.00 par mois et que j'obtiens un autre emploi qui paye $350.00 par mois, mon salaire est moins élevé, mon niveau de vie est aussi moins élevé. Mais à lire les journaux, on dirait que tout le monde a eu un autre emploi.

M. Turner (London-Est): Si vous achetez une maison, vous le faites en anticipant un certain revenu, n'est-ce pas?

M. Lush: C'est vrai, oui.

M. Turner (London-Est): Si on vous enlève cet argent, vous avez des difficultés, n'est-ce pas? En a-t-on discuté avec le syndicat?

M. Lush: Non, pas encore. On a cependant recyclé en chauffeurs d'autobus les wagonniers et tous ceux qui le voulaient.

M. Turner (London-Est): Pourriez-vous nous donner une comparaison des salaires entre le service roulant et les chauffeurs d'autobus en dollars et en cents? En d'autres termes, combien gagne un chauffeur d'autobus à l'heure actuelle?

M. Chancey: A l'heure actuelle ils travaillent sur une base de $475 dollars par mois. Les chauffeurs d'autobus ne sont pas syndiqués. Ils désirent faire partie de l'un de nos syndicats, ce qui les mettraient sur un pied d'égalité au point de vue salaire, avec ceux qui sont payés à Terre-Neuve. Mais à l'heure actuelle, ils sont en voie de se syndiquer.

M. Turner (London Est): Est-ce que ces chauffeurs d'autobus sont d'anciens employés du CN?

M. Chancey: Je représente les wagonniers. Je dirais qu'à l'heure actuelle, il y a sept anciens wagonniers qui conduisent des autobus.

M. Turner (London-Est): Est-ce que la compagnie a offert de recycler les mécaniciens, les chauffeurs, les agents de train, et les conducteurs?

M. Chancey: La compagnie a publié un bulletin général et tous ceux qui étaient intéressés à faire partie du service d'autobus pouvaient en faire la demande.

M. Turner (London-Est): A titre d'ancien mécanicien du CN, vous connaissez les longues heures de travail. J'ai été plutôt chanceux d'être affecté au service passagers depuis dix ans, mais il m'a fallu vingt-huit

[*Text*]

years to get up there; so I have done my share of hard work.

If they take an engineer and a conductor who are in charge of the train, it is their responsibility to get this train over the road. If they make them bus drivers it would mean an awful slash in wages; is that right?

Mr. Penney: That is right.

Mr. Turner (London East): How much?

Mr. Penney: I cannot quote the figures...

Mr. Turner (London East): About one-half?

Mr. Penney: I beg your pardon?

Mr. Turner (London East): Or close to one-third?

Mr. Penney: Yes; it would be very near one-third.

Mr. Turner (London East): And this basically affects pension rights, too; is that right?

Mr. Penney: Yes; certainly this solely depends now on certification.

Mr. Turner (London East): Does the CNR pension scheme apply to the Newfoundland railroad?

Mr. Penney: That is right.

Mr. Turner (London East): Thank you. Thank you very much.

The Chairman: Mr. Allmand?

Mr. Allmand: I have a supplementary question. Were any of the men offered work on bus maintenance as automotive mechanics, and so forth, in addition to the position of driving the buses?

Mr. Penney: Yes.

Mr. Allmand: How many such positions have been offered?

Mr. Chancey: They have a garage maintenance staff now, sir, of 10 motor mechanics and 7 maintenance men.

Mr. Allmand: Is the maintenance shop in St. John's?

Mr. Chancey: The maintenance shop is in St. John's; and there is one man at Port-aux-Basques.

Mr. Allmand: Thank you.

[*Interpretation*]

ans pour y parvenir; j'ai donc fait ma part d travail difficile.

Si on prend un mécanicien ou un conduc teur, qui sont responsables du train, ils son responsables du train et du parcours. Si on e fait des chauffeurs d'autobus, il y aura un diminution de salaire considérable, n'est-c pas?

M. Penney: Oui.

M. Turner (London-Est): De combien?

M. Penney: Je ne saurais vous donner de chiffres exacts...

M. Turner (London-Est): Environ d moitié?

M. Penney: Pardon?

M. Turner (London-Est): Ou d'environ l tiers?

M. Penney: Tout près du tiers, oui.

M. Turner (London-Est): Et, au fond, vos prestations de pension se trouvent affectées, n'est-ce pas?

M. Penney: Certainement. Cela dépend uniquement de l'accréditation maintenant.

M. Turner (London-Est): Est-ce que le régime de pension du CN s'applique au chemin de fer de Terre-Neuve?

M. Penney: Oui.

M. Turner (London-Est): Merci.

Le président: Monsieur Allmand.

M. Allmand: Une question supplémentaire. Est-ce qu'on a offert aux employés de travailler à l'entretien des autobus, par exemple, à titre de mécaniciens, en plus des postes de chauffeurs?

M. Penney: Oui, monsieur.

M. Allmand: Combien d'emplois ont été offerts ainsi?

M. Chancey: Le personnel d'entretien à l'heure actuelle, monsieur, est composé de dix mécaniciens et de sept préposés à l'entretien.

M. Allmand: Est-ce que l'atelier d'entretien se trouve à Saint-Jean?

M. Chancey: Oui, et il y a un employé à Port-aux-Basques.

M. Allmand: Merci.

[*Texte*]

Mr. Lush: As machinists, we had hoped hat the machinists would go as repairmen on he buses; but in St. John's we have a Voca- ional Training School which issues certifi- ates to Grade A auto mechanics. After the ulletins went out for Grade A auto mechan- cs it eliminated many of our machinists; but he machinists would have gone on as nechanics on the buses.

The Chairman: Gentlemen, this is the end f our session for this morning. I wish to hank you.

We will meet again at 2.30 this afternoon.

AFTERNOON SITTING

The Chairman: Gentlemen, I see a quorum. hope you will permit me to make a short presentation this afternoon. We have an honour this afternoon to have with us another Minister from the House of Commons in Ottawa in the person of the Minister without Portfolio, Mr. James Richardson. If the Committee will agree, I will ask Mr. Richardson o sit beside me. He is here as an observer nly, not as a witness or as a member of the Committee.

Gentlemen, at this time I would like to call on the Corner Brook Chamber of Commerce o present the first brief this afternoon. On ny immediate right we have Mr. Belanger nd Mr. Noseworthy is next to him. Mr. Nose- worthy will make a short presentation of his brief. You will find the brief on page 647.

Mr. Alan Noseworthy (Chairman, Transportation Committee, Corner Brook Chamber of Commerce): Mr. Chairman and gentlemen, the brief which we are presenting today has been slightly revised and we have provided the members of the Committee with the revised brief. In summary it is as follows. The item which we consider the most important and the essential one at the moment in harbour development.

The federal department of Public Works has failed to consult with municipal and provincial authorities in planning the harbour development at Corner Brook. To the best of our knowledge no study has been carried out to integrate this facility into this city's transportation and distribution system.

The Canadian National Railways facilities. Millions have been spent on improvement of the rolling stock but in Corner Brook no money has been spent on the freight shed terminals. The terminals were constructed

[*Interprétation*]

M. Lush: A titre de machinistes, nous espérions que les machinistes se voient offrir des postes de mécaniciens pour le service d'autobus. Mais à Saint-Jean il y a un collège de formation professionnelle, qui émet un certificat de mécanicien automobiles de première classe. Après que le bulletin fut publié pour les mécaniciens automobiles de première classe, plusieurs de nos mécaniciens y sont allés; autrement les machinistes auraient pu devenir mécaniciens pour les autobus.

Le président: Voici la fin de notre séance de ce matin. Messieurs, je vous remercie.

SÉANCE DE L'APRÈS-MIDI

Le président: Messieurs, je vois que nous avons un quorum. J'espère que vous me permettrez de vous faire une brève présentation, cet après-midi. Nous avons l'honneur d'avoir avec nous un autre ministre de la Chambre des communes, en la personne du ministre sans portefeuille, l'honorable James Richardson. Si les membres du Comité sont d'accord, je vais inviter M. Richardson à s'asseoir à mes côtés. Il sera ici à titre d'observateur seulement et non à titre de témoin ou de membre du Comité.

Messieurs, à ce moment-ci, j'aimerais demander à la Chambre de commerce de Corner Brook de présenter le premier mémoire cet après-midi. Immédiatement à ma droite, j'ai M. Bélanger et M. Noseworthy. M. Noseworthy vous fera une courte présentation de son mémoire. Vous trouverez le mémoire en question à la page 647.

M. Alan Noseworthy (président, Comité des transports de la Chambre de commerce de Corner Brook): Monsieur le président, messieurs, le mémoire que nous présentons cet après-midi a été légèrement revisé; nous avons donc donné une copie corrigée du mémoire aux membres du Comité. En résumé, voici ce qui en est: la question que nous estimons la plus importante à l'heure actuelle est l'aménagement du port. Le ministère fédéral des Travaux publics n'a pas consulté les autorités municipales et provinciales pour les études d'aménagement du port. A notre connaissance, aucune étude n'a été faite en vue d'intégrer les installations portuaires dans le système de transport et de distribution de la ville.

En ce qui concerne les installations des Chemins de fer nationaux du Canada: on a dépensé des millions de dollars pour le matériel roulant, mais aucune amélioration n'a été apportée aux hangars de la gare terminus. La

[*Text*]

four or five generations ago and are not competitive with modern equipment.

Equitable freight rates maintain rate freeze until the Atlantic Provinces transportation study is completed. Canadian National Railway passenger service.

Passenger rail service should be continued until 1970 and during this period a comparative study be made of the two modes of transportation. Air Canada service scheduling could be improved. This Chamber is opposed to a regional air policy that means a replacement of Air Canada by a regional carrier.

This is a summary of the brief which we have already supplied to the Committee, Mr. Chairman.

The Chairman: Thank you very much. Are there any questions, gentlemen? Mr. Mahoney.

Mr. Mahoney: You state there is no functioning body in authority to govern and control the functioning of the port and integrate its operation with the economy and the development of the city. How is your port operated? Who is the port authority?

Mr. Noseworthy: We do not have an authority which is comparable to the National Harbours Board, not in this respect. The Bowaters, which are the largest employers and the biggest industry on the west coast, have their own wharf and their own wharf facilities and they have their own port superintendent. There is a commission called the Humber Harbours Board or the Bay of Islands Harbours Board, but I do not think they are affiliated with the National Harbours Board.

Mr. Mahoney: The port facilities, then, are not operated under either dominion or provincial government authority?

Mr. Noseworthy: No.

Mr. Mahoney: Does your municipality not have jurisdiction to act in this area if it chooses to do so?

Mr. Noseworthy: Not to my knowledge.

Mr. Mahoney: Are there no regional planning provisions?

Mr. Noseworthy: No. They have the authority but they never use it.

[*Interpretation*]

gare terminus a été construite il y a quatre ou cinq générations et ne répond plus du tout aux normes modernes.

Tarifs marchandises équitables: on demande le gel des tarifs marchandises jusqu'à ce qu'on ait terminé l'étude sur les transports dans les provinces de l'Atlantique.

Le service passager du National-Canadien devrait être maintenu jusqu'en 1970 et d'ici là, on pourrait faire des études comparatives sur les deux modes de transport. Quant au service aérien d'Air Canada, on pourrait améliorer les horaires. Notre Chambre de commerce s'oppose à une politique régionale des services aériens qui auraient pour conséquence le remplacement d'Air Canada par une société locale.

C'est là un résumé du mémoire que nous avons déjà présenté au Comité, monsieur le président.

Le président: Merci beaucoup. Y a-t-il des questions? M. Mahoney.

M. Mahoney: Vous avez déclaré qu'il n'y a aucun organisme responsable de l'administration du port et de son intégration dans la municipalité. Comment fonctionne ce port? Qui le régit?

M. Noseworthy: Nous n'avons pas d'organisme de régie portuaire comparable au Conseil de ports nationaux. La société Bowaters, qui est l'industrie la plus considérable sur la côte ouest de Terre-Neuve, a ses propres quais, ses propres installations portuaires et la société nomme son propre directeur du port. Il existe une commission que l'on appelle *Humber Harbours Board*, ou *Bay of Islands Harbours Board*, mais je ne crois pas qu'elle soit affiliée au Conseil des ports nationaux.

M. Mahoney: En d'autres termes, les installations portuaires ne sont régies ni par l'autorité fédérale ni par l'autorité provinciale?

M. Noseworthy: C'est exact.

M. Mahoney: Est-ce que la municipalité ne dispose pas de l'autorité voulue pour agir dans ce domaine, si elle le désire?

M. Noseworthy: Pas à ma connaissance.

M. Mahoney: Est-ce qu'il n'existe pas de dispositions légales permettant la planification régionale?

M. Noseworthy: Ils ont l'autorité, mais ils ne l'utilisent jamais.

[*Texte*]

Mr. Mahoney: Do you think you really should be complaining to us about this, as opposed to complaining to your city council?

Mr. Noseworthy: The situation is that the Corner Brook Chamber of Commerce and a group of interested people have been trying to get something going in the way of harbour development for the past number of years. Actually, I think the first brief was submitted to Mr. Pickersgill in about 1963 or 1964, and since that time it has been announced that the first phase of a program will be started this year, but there has been no move by either the federal or the provincial authorities to co-ordinate it with the city oouncil to see what progress has been made or how this thing should be co-ordinated.

Mr. Mahoney: Has there been any move by the city council to try to get the other authorities to co-ordinate?

Mr. Noseworthy: Yes, and I think they requested, without success, to have some definitive plans set up on what is going to happen. The Mayor is here and I think he will be reporting this afternoon and he can speak on this then.

Mr. Mahoney: Thank you.

Mr. Noseworthy: There is also the point of co-ordinating the development at the waterfront, with access roads through the city for industrial purposes, rather than have them plying the residential streets.

Mr. Mahoney: If your city is making a representation later this afternoon, I can hold my other question until then.

The Chairman: Mr. McGrath.

Mr. McGrath: My question has been dealt with in part by Mr. Mahoney's question. I just wanted some amplification on your submission that there has been no consultation with local authorities on the harbour development. As I understand it, the money for this harbour development has just been voted by Parliament. Are you aware of any plan that has been devised for the harbour?

Mr. Noseworthy: Three plans were devised for the harbour and we do not know which one has been selected. We know from our experience in working with this matter that there were three possible alternatives, but at the moment we do not know which one it is and how it will fit into our scheme.

Mr. McGrath: If I may just make a suggestion, sir, perhaps if you spoke to Mr. Rich-

[*Interprétation*]

M. Mahoney: Croyez-vous vraiment que vous devriez vous plaindre à nous, plutôt qu'au Conseil municipal de votre ville?

M. Noseworthy: Le fait est que la Chambre de commerce de Corner Brook et quelques gens intéressés essaient depuis des années de mettre en marche des projets d'aménagement portuaire. Je crois que le premier mémoire a été présenté à M. Pickersgill en 1963 ou en 1964. On a annoncé que la première étape du programme serait mise en vigueur cette année mais ni le gouvernement provincial ni le gouvernement fédéral n'ont pris d'initiative pour consulter le conseil municipal afin de se rendre compte si le programme avançait ou si il y avait possibilité de coordonner l'action des divers gouvernements.

M. Mahoney: Est-ce que le conseil municipal a essayé d'amener les autres échelons de gouvernement à coordonner leurs efforts?

M. Noseworthy: Oui, je crois que le Conseil a demandé, en vain d'ailleurs, qu'un programme définitif soit établi pour le futur. Le maire est ici et je crois qu'il témoignera cet après-midi; il pourra traiter de cette question.

M. Mahoney: Merci.

M. Noseworthy: Il y a aussi la question de l'aménagement du quartier portuaire et de la construction de routes d'accès au port pour le transport des marchandises; actuellement, les camions circulent dans des quartiers résidentiels.

M. Mahoney: Si le Conseil témoigne cet après-midi, je crois qu'il vaut mieux attendre pour poser ma question.

Le président: Monsieur McGrath.

M. McGrath: On a déjà répondu à ma question en partie; je voulais simplement que vous précisiez votre affirmation, à savoir qu'il n'y a pas eu de consultation avec les autorités locales au sujet du développement du port. Si j'ai bien compris, les crédits pour l'aménagement du port viennent tout juste d'être approuvés par le parlement. Êtes-vous au courant d'un projet quelconque qui aurait été élaboré pour le port?

M. Noseworthy: Trois plans ont été élaborés et nous ne savons pas lequel a été choisi. D'après ce que nous en savons, il y a trois choix possibles. Nous ignorons à l'heure actuelle quel plan a été choisi et comment il pourrait s'intégrer dans notre projet.

M. McGrath: S'il m'est permis de faire une suggestion; vous pourriez peut-être en parler,

[*Text*]

ardson, who is active in the Department of Transport, before you learn today he might be able to solve this problem.

The Chairman: Thank you. Mr. Pringle, do you have a supplementary question?

Mr. Pringle: Yes, just a short supplementary. If I heard you correctly you mentioned that you were opposed to regional air service. Is this just in your particular area? Do you mind telling us why you are opposed to this?

Mr. Noseworthy: We have a feeling that Air Canada might carry out the same type of program as the Canadian National Railways did in getting rid of their pasenger trains and that eventually the west coast may be bypassed as a drop-off point, and in order for us to get to the mainland or to Europe we may have to fly from Stephenville to Halifax or to Gander. The quality of the service and the scheduling is such that it discourages people from the west coast from travelling.

Mr. Pringle: As I understand it, there is not so much opposition to regional air services as...

Mr. Noseworthy: ...As a replacement.

Mr. Pringle: As a replacement. You do not want to lose the Air Canada facilities on the west coast of Newfoundland.

Mr. J. Merrill Belanger (Past President, Corner Brook Chamber of Commerce): I will carry on from there. It is a matter of continuity of scheduling. Last year we had a scheduling set up by Air Canada on the morning flight from here to St. John's which eventually ended up in Boston. We had to change aircraft at Halifax and we had a two or three hour delay before we could get on the aircraft for Montreal. If you are trying to make connections, it is 60 miles from where we live in Corner Brook to the airport in Stephenville, and you probably have to leave home about seven o'clock in the morning and you arrive in Montreal about five o'clock in the afternoon. That is a whole day's flying to cover a thousand miles. If you were flying out of St. John's on a DC-9 you would be there in two and half hours. It is the joining of the scheduling on the regional air service that we are opposed to.

Mr. Pringle: However, I presume you would take another look at it if the regional air service in this particular area was upgrad-

[*Interpretation*]

avant de partir, à M. Richardson, qui joue un rôle actif au sein du ministère des Transports; peut-être pourrait-il résoudre ce problème.

Le président: Merci. Monsieur Pringle, est-ce que vous auriez une autre question à poser?

M. Pringle: Oui. Si je vous ai bien compris, vous avez dit que vous étiez opposé au service aérien régional. Est-ce que vous visez votre région seulement? Pourriez-vous nous dire pourquoi vous vous opposez à cette mesure?

M. Noseworthy: Nous avons l'impression qu'Air Canada pourrait peut-être mettre en vigueur le même genre de programme que les Chemins de fer nationaux du Canada qui ont abandonné le service voyageur et nous craignons qu'éventuellement la côte de l'ouest soit éliminée comme point d'arrêt et qu'il nous faille prendre un avion de Stephenville pour nous rendre à Halifax ou Gander et, de là, sur le continent américain ou en Europe. La qualité du service ainsi que l'horaire sont tels qu'ils enlèvent aux gens de la côte de l'ouest le goût de voyager.

M. Pringle: Si je comprends bien, il n'y a pas beaucoup d'opposition aux services aériens régionaux...

M. Noseworthy: Comme remplacement.

M. Pringle: Comme remplacement. Vous ne voulez pas perdre le service d'Air Canada sur la côte ouest de Terre-Neuve.

M. J. Merrill Bélanger (ex-président, Chambre de commerce de Corner Brook): Si vous me permettez de continuer, il s'agit de la continuité des horaires. L'an dernier, nous avions un vol le matin qui partait de Saint-Jean et qui pouvait se terminer à Boston. Il fallait que nous changions d'avion à Halifax, et il nous fallait attendre deux ou trois heures avant d'avoir la correspondance pour Montréal. Si vous essayez de faire la correspondance, et si vous demeurez comme moi à Corner Brook, à soixante milles de Stephenville, vous devez probablement partir de chez vous à sept heures le matin et vous arrivez à Montréal à cinq heures l'après-midi. Cela vous prend donc toute une journée pour vous rendre à mille milles. Si vous partez de Saint-Jean, par le DC-9, cela prend deux heures et demie. C'est donc la raison pour laquelle nous nous opposons à la fusion des horaires des services aériens régionaux.

M. Pringle: J'imagine que vous envisageriez la question d'une autre façon si le service aérien régional était amélioré au point où on

Texte]

and improved to the point where it would ve you better service to Montreal than you ight get on a national air line.

Mr. Belanger: If you have a flight running ght through from St. John's to Montreal to ronto with no change of aircraft, you can- t very well improve on that unless you ve a direct flight. If you have a regional air rvice which only has a regional base of avel and you are going to Halifax, you have change aircraft and there is bound to be a lay.

Mr. Pringle: I just have one more question. hat are the average weather conditions for ying in your area with respect to ground g?

Mr. Noseworthy: I can say that the Ste- henville airport has a better record than ther St. John's or Halifax.

Mr. Pringle: Thank you.

The Chairman: Mr. Rose.

Mr. Rose: I would like to complement my olleague from Fraser Valley East on an xcellent line of questioning. I am trying to nderstand in what way they were supple- ientary. I really cannot understand that.

In any event, I would like to go on to mething else. It has been suggested that ransportation should not be considered in olation from a number of other forms of id, such as growth areas or equalization ayments. I realize we are sitting as a Trans- ort and Communications Committee, but I hink the justification for this is because ransportation is considered to be a primary id to economic development. I would like to ear your comments on this. Do you feel here should be more co-ordination between he various forms of aid rather than limiting to transportation?

The Chairman: Which gentleman do you ish to address your question to?

Mr. Rose: Mr. Belanger, or the other gentle- an that spoke. I have forgotten his name.

Mr. Belanger: Without getting into jargon, presume right now you are talking about egional disparity. However, we are also alking about total systems of transportation, nd I think one is part and parcel of the other. Certainly part of our problem down here is istance. The other part of our problem is hat do you do with your transportation. Do ou improve your transportation to the level f what you have in central Canada, or wher- ver the plus areas are. You have to improve he whole thing as a unit, not just in thought.

[*Interprétation*]

pourrait vous donner jusqu'à Montréal, un meilleur service que vous ne pourriez obtenir d'une compagnie nationale.

M. Bélanger: Si l'on avait un vol allant directement de St-Jean à Montréal et Toronto sans changement d'avion, il serait très difficile d'améliorer ce genre de service à moins d'avoir un vol direct. Mais si votre service n'est que régional et que vous allez plus loin qu'Halifax, il faut changer d'avion à Halifax, ce qui cause des retards.

M. Pringle: Une seule autre question. Quelles sont les conditions climatiques moyennes pour les avions dans votre région, au sujet du brouillard au sol par exemple?

M. Noseworthy: Je peux dire que Stephenville est en meilleure position que St-Jean ou Halifax à cet égard.

M. Pringle: Je vous remercie.

Le président: Monsieur Rose.

M. Rose: Je voudrais féliciter mon collègue de Fraser Valley est pour ses excellentes questions. J'essaie de comprendre comment il se fait qu'elles aient été des questions supplémentaires.

De toute façon, je voudrais aborder un autre sujet. On a déjà dit que les transports ne devraient pas être étudiés isolément ou séparément de toutes les autres formes d'aide, par exemple, les régions de croissance ou les paiements de péréquation. Je comprends que nous sommes au Comité des transports et des communications, mais je trouve que la justification, c'est que les transports sont censés être une aide principale pour le développement économique. Croyez-vous donc qu'il devrait y avoir plus de coordination entre les différentes formes d'aide plutôt que de limiter notre assitance aux transports?

Le président: A qui posez-vous la question?

M. Rose: A M. Bélanger ou à M. Noseworthy.

M. Bélanger: Sans être trop technique, je présume, que vous parlez des disparités régionales. Cependant, nous parlons aussi d'un réseau total de transport et je pense que l'un fait partie de l'autre. Une partie de nos problèmes ici est représentée par la distance, une autre, parce qu'il faut faire du transport. Faudra-t-il améliorer le système de transport jusqu'au niveau que connaissent le Canada central ou les régions un peu plus prospères? Il vous faut donc améliorer toute la situation au complet.

[*Text*]

Mr. Rose: I do not think you got the precise sense of my question. Certainly transportation is of primary concern but it has been suggested, and I will suggest it myself, that perhaps you must co-ordinate the transportation system with the growth area concept and other forms of aid, because if you immediately rationalize or equalize the transportation system this in itself is not necessarily going to solve all the problems that you might meet in Corner Brook, is it?

Mr. Belanger: No. That is only part of them.

Mr. Rose: That is right, and therefore all the aid plans should be co-ordinated through a co-ordinating agency, and it should not be just limited to transportation. Would you agree with that?

Mr. Belanger: Naturally. Perhaps I did not explain myself very well. We are talking about regional disparity and you are talking about lifting up an area, and transportation is just one portion of that. The whole thing should be done as a total.

Mr. Rose: This is the point I wish to bring out. Yours is one of the relatively few briefs that spell out the concern felt about the loss of passenger service on the CNR trains in Newfoundland. It has been mentioned in other briefs but in a different context. Is it of more importance to you in Corner Brook than it might be somewhere else?

Mr. Noseworthy: I think we feel that if the CNR had put the same effort into promoting train passenger travel and did the same public relations job as they are doing today on the buses, they would not have needed to replace the passenger trains with buses.

An hon. Member: That is a very good point.

The Chairman: Order, please. Mr. Mahoney.

Mr. Mahoney: I have a supplementary question. Would you now opt in favour of an abandonment of the bus service and a restoration of the train service to its former status, with the upgrading that...

Mr. Noseworthy: No, not particularly, but I think we find it rather odd that the CNR should pick Newfoundland and say that they are going to discontinue the passenger train service, when they have tried to upgrade the service in other parts of Canada, and let the trains here almost turn into cattle cars. Who

[*Interpretation*]

M. Rose: Je ne crois pas que vous ayez tout à fait compris ma question. Le transport est sûrement une des principales préoccupations, mais on a dit, et je le dirai moi-même, que peut-être il nous faut coordonner le réseau des transports avec le concept des régions de croissance et d'autres formes d'aide parce que si vous rationalisez ou faites immédiatement l'égalisation du système, cela ne se trouvera pas nécessairement à résoudre les problèmes de Corner Brook, n'est-ce pas?

M. Bélanger: Non, cela n'en est qu'une partie.

M. Rose: C'est juste. Par conséquent, tous les programmes d'aide devraient être coordonnés dans l'ensemble par une agence de coordination et ça ne devrait pas simplement se limiter au transport. Êtes-vous d'accord?

M. Bélanger: Naturellement. Peut-être que je ne me suis pas exprimé assez bien. Nous parlons des disparités régionales et vous parlez d'aider une région à se relever et le transport n'est qu'une partie de l'ensemble, qu'une partie du tout.

M. Rose: C'est à quoi je voulais en arriver. Votre mémoire est un des rares où l'on précise l'inquiétude qui existe au sujet de la perte du service voyageurs sur les trains du CN à Terre-Neuve. On en a parlé dans d'autres mémoires, mais dans un contexte différent. Est-ce plus important pour vous à Corner Brook que cela pourrait l'être ailleurs?

M. Noseworthy: Nous sommes d'avis que si le National Canadien avait déployé le même effort pour le service voyageur et fait le même travail de relations publiques qu'ils font maintenant pour les autobus, ils n'auraient pas eu à remplacer le train par les autobus.

Une voix: C'est assez vrai.

Le président: A l'ordre. Monsieur Mahoney.

M. Mahoney: Est-ce que vous seriez pour qu'on abandonne les autobus en faveur d'une restauration du service ferroviaire à son ancien niveau?

M. Noseworthy: Non, pas en particulier, mais je pense qu'il est plutôt curieux que le CN décide d'interrompre, précisément à Terre-Neuve, le service voyageurs alors que la société a essayé d'améliorer le service dans d'autres régions du Canada tout en laissant les wagons devenir presque des wagons à

[*Texte*]

wants to travel by train when it is not cleaned up? I might tell you—and this is not in our brief—that we are also aware of the fact that the ships plying the Gulf of St. Lawrence as ferries are certainly not suitable—about half way through the summer—are almost unsuitable for human habitation.

Mr. Mahoney: I think we are talking about trains and buses.

Mr. Noseworthy: Yes, but it ties in.

Mr. Mahoney: You did suggest though, as I understood your answer, that had the CNR run the passenger train service the way they should have the buses would never have been necessary.

Mr. Noseworthy: No, they would not have been thought of.

Mr. Mahoney: Therefore, I would take it that your Chamber's position is that you would prefer to have an upgraded passenger train service and forget the buses.

Mr. Noseworthy: We would, yes.

Mr. Mahoney: Thank you.

Mr. Rose: On the matter of the so-called "Newfie Bullet" the government in Newfoundland has been strangely silent in its support for its retention. Do you have any views on this?

Mr. Noseworthy: No. If so, they would be political and I would rather not get into politics at the moment.

Mr. Rose: Sir, we are all politicians here and I feel that ultimately all decisions are political decisions. When you are dealing with politicians this is one of the things you have to look out for. The question might have been political too. I am not suggesting that it was but it might have been.

Sir, do you have any concern for the local coastal service either for tourists or for freight?

Mr. Noseworthy: Let me put it this way: the road has been built to St. Anthony. Just to brief the Committee, automatically as soon as the road was opened up to a certain area people refused to take their freight off the coastal boat because she arrives at all hours of the night and blowing her whistle and they have to get out of bed and go to the wharf and take their freight. These days have end-

[*Interprétation*]

bestiaux. Personne n'aime voyager dans un train qui n'est pas propre. Je pourrais aussi vous dire—et ceci ne figure pas au mémoire—que nous sommes aussi au courant du fait que les navires qui traversent le golfe Saint-Laurent comme transbordeurs ne conviennent vraiment pas—déjà vers le milieu de l'été—à des voyageurs humains.

M. Mahoney: On parle de trains et d'autobus.

M. Noseworthy: On essaie de les rattacher l'un à l'autre.

M. Mahoney: Un instant, vous n'avez tout de même proposé, si j'ai bien compris votre réponse, que si le National Canadien avait assuré un service des voyageurs comme il était sensé le faire, vous n'auriez jamais eu besoin d'autobus.

M. Noseworthy: Non.

M. Mahoney: J'en conclurais donc que vous préfériez vous-méme avoir une amélioration du service des voyageurs et simplement oublier les autobus.

M Noseworthy: Oui.

M. Mahoney: Je vous remercie.

M. Rose: Pour ce qui est du «Newfie Bullet», le gouvernement de Terre-Neuve a gardé le silence complet en ce qui a trait au maintien de ces services. Est-ce que vous avez un point de vue là-dessus.

M. Noseworthy: Non, ce serait des raisons d'ordre politique et je ne veux pas faire de politique en ce moment.

M. Rose: Nous sommes tous des hommes politiques ici et j'imagine que toutes les décisions sont des décisions d'ordre politique. Lorsque vous traitez de politique, c'est une des choses dont vous devez tenir compte. Donc, la question peut traiter de nature politique. Je ne dis pas que ce l'était mais peut-être cela aurait pu l'être.

Est-ce que vous vous préoccupez du service côtier pour les voyageurs ou les marchandises?

M. Noseworthy: La route a été construite jusqu'à St-Antoine (St. Anthony). Sulement pour vous renseigner dès que la route est ouverte jusqu'à une certaine région, on refuse de débarquer les marchandises parce qu'il faut se lever en pleine nuit bien souvent, mais ces jours sont révolus. Dès que les chemins sont praticables, on prend le camion pour transporter les marchandises.

[*Text*]

ed. As soon as the road goes through they are looking for their freight by transport truck of some type or other.

Mr. Rose: I was concerned particularly with the development of the tourist trade. I have heard, and do not know with how much foundation, that there is a reluctance on the part of some of the ships that are in this particular area and north of this to book large groups for summer passage. Have you heard this?

Mr. Noseworthy: No. I think the coastal service to Labrador has to be maintained, but I think we have to be realistic and say that it is not important to the north coast anymore.

Mr. Rose: Not even from the tourist point of view?

Mr. Noseworthy: No.

Mr. Horner: You state on the first page of your brief that your highest priority is placed on harbour development. Could you give us some idea as to why, in your mind, the Federal Government with the co-operation of the provincial government has proposed the building up of a third or fourth major port—well, a second major one under the National Harbours Board. I was led to believe that on the Bay d'Espoir they were going to build huge grain elevators to store Canadian wheat so that it would be an all-weather port. Not that I opposed to that, but looking at it from a complete stranger's point of view, why not Port-aux-Basques, why not Corner Brook? Is there not deep water pretty well all around the island of Newfoundland?

Mr. Noseworthy: No. You must imagine Corner Brook as the distributing centre for the northwest coast of Newfoundland plus certain sections of the Notre Dame Bay area and possibly the White Bay area, which is near Bay de Verde, because the transport trucks come that way. So, we are a centre in ourselves. We have a few old wharves that were built by the paper company in 1923 or 1925 and we are trying to get by with them. You cannot operate efficiently, you cannot operate safely. Some of the shipping companies have refused to come to Corner Brook to discharge their cargo because the facilities are not there for them.

Mr. Horner: This is the point I wanted to pursue: if the government has money—federal and provincial—to spend on the development of another port, why, in your mind, do you think they are reluctant to include Corn-

[*Interpretation*]

M. Rose: Je me préoccupe essentiellement du développement du tourisme. Je ne sais pas si c'est fondé mais il semblerait que certains navires, surtout ceux qui se trouvent dans cette région et au nord, acceptent avec très peu d'empressement des groupes partant en voyages d'été. En savez-vous quelque chose?

M. Noseworthy: Non, je n'en ai pas entendu parler. Le service côtier au Labrador doit être maintenu et il faut être réaliste et dire que ce n'est pas vraiment important pour la Côte nord.

M. Rose: Même pas du point de vue touristique?

M. Noseworthy: Non.

M. Horner: Vous déclarez à la première page de notre mémoire que votre première priorité est fondée sur le développement portuaire. Pourriez-vous nous donner une idée pourquoi, à votre avis, le gouvernement fédéral, avec la collaboration du gouvernement provincial, a proposé la construction d'un troisième ou quatrième port—ou un deuxième en importance—en raison du Conseil des Ports nationaux? Je pense à la Baie d'Espoir où l'on voulait aménager d'immenses élévateurs à grain pour entreposer le blé canadien, pour en faire un port de toutes saisons. Ce n'est pas que je m'y oppose mais pour quelqu'un qui ne s'y connaît pas, pourquoi pas Corner Brook ou Port-aux-Basques? Est-ce qu'il n'y a pas d'eaux profondes tout autour de Terre-Neuve?

M. Noseworthy: Non. Corner Brook deviendrait le centre de distribution pour le nord-ouest de Terre-Neuve et certaines sections de la Baie Notre-Dame et peut-être de la baie Blanche, près de Baie Verte parce que les camions passent par là; donc nous constituons nous-mêmes un centre. Nous avons quelques anciens quais construits vers les années 1923-1925 par les anciennes sociétés de papier et nous essayons de nous débrouiller avec ces quais. Il est impossible d'y travailler efficacement, avec sécurité. Certaines sociétés refusent de venir décharger leurs cargaisons à cause du manque d'installations.

M. Horner: C'est justement sur quoi je veux insister. Si le gouvernement fédéral ou provincial dépense de l'argent pour aménager un autre port, pourquoi, à votre avis, croyez-vous qu'ils hésitent à inclure Corner Brook

[*Texte*]

er Brook as one of the ports operating under the National Harbours Board?

Mr. Noseworthy: They have included Corner Brook. According to the latest information we have, and this brief was prepared before this announcement, the first phase of Corner Brook's development is going through this year.

Mr. Horner: It is going through this year?

Mr. Noseworthy: It is going through this year. We are as important to western Newfoundland as St. John's is to the Avalon peninsula and as Halifax is to Nova Scotia. This is the point we are trying to make. There are people who think we on the west coast do not belong to the province, but we do. We are part of Newfoundland and we are the distributing centre for the whole of western Newfoundland.

Mr. Thomas (Moncton): What about ice conditions in the Corner Brook harbour?

Mr. Noseworthy: The ice-breakers have been there from the Federal Government for the last few years. I have been in Corner Brook for the last 20 years. When I first went to Corner Brook the paper company had to ship their paper to Port-aux-Basques or to St. John's to get it out to the eastern seabord of the United States. For the past 10 years the boats have been coming into Corner Brook all winter long. The ice-breakers and the conditions at Corner Brook have been such that this year for the first time we have Clarke steamships coming in from Montreal every 10 days.

Mr. Horner: Then you foresee, in the very near future, the National Harbours Board taking over the port facilities and the management of the port facilities at Corner Brook.

Mr. Noseworthy: We would hope so.

Mr. Horner: You also foresee, and it is your understanding that the Federal Government will, in taking them over, be prepared to improve them and upgrade them to what might, in a sense, be called "national standards"?

Mr. Noseworthy: And modern standards.

Mr. Horner: And modern standards.

Mr. Noseworthy: So that we can accommodate side loaders that Clarke steamships and those people want to put in.

[*Interprétation*]

comme un des ports relevant du Conseil des Ports nationaux?

M. Noseworthy: Ils ont inclus Corner Brook. D'après les derniers renseignements, la première étape du développement de Corner Brook, et ce mémoire a été présenté avant cette déclaration se fera cette année.

M. Horner: Cette année?

M. Noseworthy: Oui, cette année. C'est tout aussi important pour l'ouest de Terre-Neuve que St-Jean pour la péninsule de Avalon, et Halifax pour la Nouvelle-Écosse. Voici où nous voulons en venir. Certains croient que nous, les gens de l'ouest de Terre-Neuve, n'appartenons pas à cette province. Nous faisons partie de Terre-Neuve et nous sommes le centre de distribution pour le nord-ouest de cette province.

M. Thomas (Moncton): Quelles sont les conditions de la glace dans le port de Corner Brook?

M. Noseworthy: Les brise-glaces du gouvernement fédéral s'y trouvent depuis quelques années. Je suis à Corner Brook depuis vingt ans. Lorsque je suis arrivé pour la première fois à Corner Brook, la société de papier devait expédier ses marchandises à Port-aux-Basques ou encore à St-Jean pour les acheminer à la côte est des États-Unis. Depuis dix ans, les navires viennent à Corner Brook au cours de l'hiver. Les brise-glaces et les conditions sont telles, qu'ils viennent tout l'hiver et maintenant la Clarke Steamships vient de Montréal tous les dix jours—cette année pour la première fois.

M. Horner: Alors, vous prévoyez que dans un avenir rapproché, le Conseil des Ports nationaux assumera la responsabilité des services portuaires de Corner Brook?

M. Noseworthy: Nous l'espérons.

M. Horner: Vous prévoyez aussi et vous en avez conclu que le gouvernement fédéral en assumant sa responsabilité, sera prêt à les améliorer à un niveau suivant les normes nationales.

M. Noseworthy: Oui. Les normes nationales qui sont plus modernes.

M. Horner: Plus modernes.

M. Noseworthy: Oui. Afin que nous puissions utiliser les chargeurs latéraux que la Clarke Steamships veut installer.

[*Text*]

Mr. Horner: And then again in doing that at Corner Brook they will also build up the harbour at the Bay d'Espoir in order to...

Mr. Noseworthy: We do not know anything about Bay d'Espoir.

Mr. Horner: You do not know anything about that, and you do not believe that in any it will .

Mr. Noseworthy: It does not conflict or concern us in any way.

Mr. Belanger: Mr. Horner, they concern two entirely different areas.

Mr. Noseworthy: Two entirely different areas.

Mr. Horner: The reason I asked that question, Mr. Chairman, was that it used to be an old rule of thumb that one harbour in one province was all that would come under the National Harbours Board. I am led to believe that it might well be in the Province of Newfoundland that there may be three harbours in the very near future come under the National Harbours Board, and this will have a direct bearing on harbours in the rest of the maritimes. I know with Halifax and St. John's, for example, it was evident in the Committee proceedings there there is some conflict. I am just trying to clear up that point and apparently I have cleared it up.

Mr. Noseworthy: It is a very good point.

The Chairman: Any other questions, gentlemen?

Mr. Rose: I have a supplementary to what Mr. Horner just asked Mr. Chairman. Do I understand that these harbours are going to be run strictly under the National Harbours Board?

Mr. Belanger: We have no indication of that.

Mr. Horner: I am sorry, I was led to believe, or at least I thought you said that you had indications that Corner Brook was going to be taken over by the National Harbours Board.

Mr. Belanger: I think the word "hope" was used rather than "indication".

Mr. Horner: There has been no indication whatsoever then.

Mr. Belanger: Absolutely none.

Mr. Horner: I see the Minister shaking his head. I think that should be on record.

[*Interpretation*]

M. Horner: Et en y incluant Corner Brook, ils amélioreront aussi le port de la Baie d'Espoir.

M. Noseworthy: On n'en sait rien.

M. Horner: Et vous ne croyez pas que...

M. Noseworthy: Cela n'entre pas en conflit, cela ne nous concerne pas du tout.

M. Bélanger: Il s'agit de deux régions tout à fait différentes.

M. Noseworthy: Vraiment tout à fait différentes.

M. Horner: La raison pour laquelle je posais la question c'est qu'un port dans une province relevait toujours du Conseil des Ports nationaux. Maintenant, je suis porté à croire qu'il se peut que la province de Terre-Neuve ait trois ports qui, d'ici peu, relèveront du Conseil des Ports nationaux et cela aura un effet direct sur les ports du reste des maritimes. Je sais qu'il existe un certain conflit entre St-Jean et Halifax,—on a pu s'en rendre compte au cours de nos audiences—j'essaie simplement de faire la lumière sur cette affaire et il semblerait que j'ai réussi.

M. Noseworthy: C'est excellent.

Le président: Vous avez d'autres questions à poser, messieurs?

M. Rose: Pour ce qui est de ce que monsieur Horner a dit, si je comprends bien, ces ports seront exclusivement du ressort du Conseil des Ports nationaux?

M. Bélanger: Il n'y a pas eu d'indication à cet effet.

M. Horner: Je m'excuse mais j'étais porté à croire ou du moins je croyais que vous disiez que tout semble indiquer que le Conseil des Ports nationaux assumerait la responsabilité du port de Corner Brook.

M. Bélanger: Je crois que l'on a employé le mot «espérons» plutôt qu'«indication».

M. Horner: Il n'y a eu aucune indication à cet effet jusqu'ici.

M. Bélanger: Aucune.

M. Horner: Le Ministre fait un signe de tête, cela devrait être signalé dans le procès-verbal.

[*Texte*]

Mr. Belanger: Our problem is this: We have been asking since 1964 for a harbour development in Cornerbrook. We had an indication in 1968 that there was $200,000 spent for engineering studies that were completed, and this year in the appropriation for 1969-70 there is $1,165,000 appropriated for phase one.

Our question always has been: what is the total cost of the harbour development. It is not a question of phase one, but what is the whole thing—the ultimate goal? If you look at the whole cost of it, what is this going to encompass. Phase one is what?

Mr. Horner: There is no sense in spending a million dollars if it is not in some plan that will connect or join up with future development.

Mr. Belanger: You see, the whole thing has to be an integral part of Corner Brook—right?

Mr. Horner: Exactly.

Mr. Belanger: If we know the whole concept, then our municipality can start planning to meet whatever is going to be there.

Mr. Horner: Have you approached the government and asked them for their overall plan with regard to harbour development?

Mr. Belanger: On a number of occasions.

Mr. Horner: And have you had a satisfactory reply?

Mr. Belanger: Nothing.

Mr. Horner: I think you have done yourselves real proud by pointing this out to the Committee so that this could be one of the recommendations this Commitee could put to the government—to make known their plans with regard to the development of the Corner Brook harbour.

The Chairman: Mr. Rose, a supplementary?

Mr. Rose: Actually, sir, I was pleased to have Mr. Horner come in on a supplementary to my question. It sounded to me like a complete independent line of questioning, but nevertheless I excuse him on many grounds.

I was wondering, sir, if there had been any thought in the Province of Newfoundland that you could report to us, for the shared development of harbour control with the province and the Federal Government? I understand, sir, that through the National Harbours Board there is a system of decentralization being discussed. In the Province of British Columbia we have one brand new super port where the control is shared between the pro-

[*Interprétation*]

M. Bélanger: Voici le problème: depuis 1954 nous avons demandé des aménagements portuaires à Corner Brook. En 1968, on a dépensé $200,000 pour des études qui n'ont jamais été terminées; en 1969 et 1970 on a alloué $1,165,000 pour la première étape.

Voici la question qu'on se pose depuis toujours: il ne s'agit pas de première, deuxième, troisième, ou quatrième étape; quel est le but ultime? Si on considère l'ensemble, qu'est-ce que cela va comprendre? La première étape, c'est quoi?

M. Horner: Inutile de dépenser un million de dollars si ce n'est pas partie intégrante d'un programme à long terme.

M. Bélanger: Il faut que cela soit partie intégrante de Corner Brook—exact?

M. Horner: Exactement.

M. Bélanger: En connaissant tout le plan, on peut prévoir une certaine planification pour faire face à ce qui se produira.

M. Horner: Est-ce que vous avez demandé au gouvernement quel était son projet d'ensemble pour ce port?

M. Bélanger: Plus d'une fois.

M. Horner: Vous avez obtenu une réponse satisfaisante?

M. Bélanger: Absolument rien.

M. Horner: Je pense qu'il est bon que vous ayez signalé cela au Comité pour que ce soit une des recommandations que ce Comité puisse ainsi formuler au gouvernement—soit de faire connaître ces points au sujet du développement du port de Corner Brook.

Le président: Monsieur Rose, une question complémentaire?

M. Rose: J'étais heureux de voir M. Horner poser une question complémentaire à ma question. Cela semblait être une question tout à fait en dehors du sujet, mais néanmoins je ne lui en veux pas pour différentes raisons.

Je me demandais tout simplement si dans Terre-Neuve on pourrait nous parler de la part du développement portuaire du Fédéral et des provinces. Je crois que par l'entremise du Conseil des Ports nationaux, il existe un régime de décentralisation qui fait l'objet de discussions, et, en Colombie-britannique nous avons un nouveau super port dont le contrôle est partagé entre le gouvernement fédéral et le gouvernement provincial.

[*Text*]

vincial government and the Federal Government.

Mr. Belanger: To the best of our knowledge, sir, no.

Mr. Rose: Therefore, you feel that as far as you are concerned this whole thing would be up to the Federal Government?

Mr. Belanger: Let me put it this way: Transportation, or the creation of highways and modes of transportation are a provincial responsibility. A harbour is a federal responsibility. But one must tie into the other somehow or other. So, surely there should be the consultation between the two bodies to find out what is the development, the size, how best you develop and plan it to fit in with the other.

Mr. Rose: Our Mr. Bennett would not agree with you on that.

Mr. Belanger: I imagine he and I would disagree on a number of things.

Mr. Rose: Thank you.

Mr. Allmand: Mr. Noseworthy, the figures in your brief that has been filed with us are dated, at the latest, 1964. Have you any recent figures for shipping tonnage in your harbour for 1967 or 1968 and, also, the number of ships which visited the harbour in those years?

Mr. Noseworthy: We have them but we did not bring them with us. They would be slightly higher than these figures.

Mr. Allmand: Have they increased?

Mr. Noseworthy: They have increased, yes.

Mr. Allmand: Perhaps it would be helpful, if we are going to make the recommendations that Mr. Horner thinks we should, if we had those figures on the tonnage of shipping in the Corner Brook harbour.

Mr. Noseworthy: We could have that mailed to you next week.

Mr. Allmand: Could you also tell us the destinations of the shipping out of Corner Brook? Is it mainly up the St. Lawrence to Montreal and so forth, or is it to Halifax or down to the United States?

Mr. Noseworthy: Australia, New Zealand, the United Kingdom and all the ports of the eastern seaboard of the United States plus the gulf ports.

[*Interpretation*]

M. Bélanger: Non, pas à ma connaissance.

M. Rose: Alors vous croyez qu'en ce qui vous concerne, tout cela relèverait du gouvernement fédéral?

M. Bélanger: Disons ceci: le transport ou la création de routes et les modes de transport relèvent du gouvernement provincial. Les ports relèvent du gouvernement fédéral. Mais les deux doivent être coordonnés d'une façon ou d'une autre. Par conséquent, il doit y avoir consultation et un effort de coordination de la part de deux pour trouver le meilleur moyen possible de réussir.

M. Rose: M. Bennett ne serait pas d'accord.

M. Bélanger: Je crois qu'il ne serait pas d'accord avec moi sur plusieurs choses.

M. Rose: Je vous remercie.

M. Allmand: M. Nosewofthy, les chiffres les plus récents que vous avez mis dans le mémoire que vous avez déposé auprès de nous remontent à 1964. Je me demandais si vous aviez des chiffres plus récents pour la navigation en 1967 ou 1968 ainsi que le nombre de navires qui ont visité notre port au cours de ces années.

M. Noseworthy: Nous les avons. Nous ne les avons pas en mains, toutefois ils seraient légèrement supérieurs aux chiffres que vous avez ici.

M. Allmand: Ils ont augmenté?

M. Noseworthy: Oui.

M. Allmand: Il serait peut-être utile que nous ayons ces chiffres sur les expéditions du port de Corner Brook si nous désirons formuler les recommandations que M. Horner souhaite que nous fassions.

M. Noseworthy: Nous pourrions vous les envoyer la semaine prochaine.

M. Allmand: Je me demandais si vous pourriez aussi nous dire quels sont les ports d'arrivée de la navigation à partir de Corner Brook? Est-ce principalement le long de la Voie maritime du St-Laurent jusqu'à Montréal ou Halifax, ou aux États-Unis?

M. Noseworthy: L'Australie, le Royaume-Uni et tous les ports de l'est des États-Unis en plus des ports du golfe.

[*Texte*]

Mr. Allmand: So you have overseas shipping as well as shipping into Canada?

Mr. Noseworthy: The paper from Corner Brook goes to practically all parts of the world where newsprint is used.

Mr. Allmand: With respect to the discontinuation of passenger service, did your Chamber of Commerce lodge an appeal against the judgment of the Canadian Transport Commission on that matter?

Mr. Noseworthy: Not as such, I do not think. I have no recollection of doing it.

Mr. Allmand: Because there is a provision under the Railway Act by which you can appeal a judgment for the discontinuation of railway passenger service.

Mr. McGrath: May I supplement that, Mr. Chairman, just as a point of clarification. This point was made during the course of our examination of the estimates of the Canadian Transport Commission. The President of the Commission was vague on this business of how one went about an appeal under the new Transport Act. He made the point very strongly that certainly the Commission would not sit in on an appeal against the ruling of one of its own committees—in this case, the railway committee of the Canadian Transport Commission. So, obviously, there is still some ambiguity on just what the procedure for appealing a decision is?

Mr. Allmand: That is not true at all, Mr. Chairman. I am not talking about an appeal to the Commission. I am talking about the appeal to the Governor in Council which is set out very clearly in Section 53 of the Railway Act. This morning, in reply to a question I asked the unions, they said they were making an appeal next week. It is very clear. I think the appeal is pretty similar to the appeal that existed under the old railway act. However, your Chamber of Commerce made no appeal?

Mr. Noseworthy: We have not made an appeal.

Mr. Allmand: Thank you.

Mr. McGrath: Just again on a point of order, Mr. Chairman. The resolution which was passed by the Committee was designed to lodge such an appeal in the House.

Some hon. Members: Oh, nonsense.

The Chairman: Order, please. Are you through, Mr. Allmand?

[*Interprétation*]

M. Allmand: Alors vous avez des expéditions outre-mer en plus de celles du Canada?

M. Noseworthy: Le papier journal de Corner Brook se vend partout où l'on imprime des journaux dans le monde.

M. Allmand: Quant à la discontinuation du service des voyageurs, est-ce que votre Chambre de Commerce en a appelé contre la décision de la Commission canadienne des Transports à cet égard?

M. Noseworthy: Pas en tant que tel. Je ne crois pas, je ne me souviens pas qu'on l'ait fait.

M. Allmand: Parce qu'il y a une disposition qui prévoit un appel d'une décision prise par la Commission de discontinuer un service de passagers.

M. McGrath: Est-ce que je pourrais suppléer à cela et donner une explication. Au cours de l'examen des prévisions budgétaires de la Commission canadienne des Transports, le point a été soulevé et le Président de la Commission a été assez vague sur cette question de la procédure d'appel en vertu de la nouvelle loi. Il a insisté pour dire que la Commission n'inscrirait pas un appel contre l'un de ses propres comités, par exemple. Dans ce cas-ci, contre le comité ferroviaire. Il semble qu'il y ait une certaine ambiguïté quant à la procédure des appels?

M. Allmand: Ce n'est pas vrai, monsieur le président. Je ne parle pas d'un appel auprès de la Commission mais d'un appel auprès du Gouverneur en Conseil qui est défini très clairement à l'article 53 de la Loi sur les chemins de fer. Ce matin, en réponse à une question, j'ai demandé au Syndicat ferroviaire qui m'a dit justement qu'il en ferait appel la semaine prochaine. C'est très clair. La façon de procéder est à peu près la même que celle qui existait en vertu de l'ancienne Loi sur les chemins de fer. Mais votre Chambre de Commerce ne l'a pas fait.

M. Noseworthy: Nous n'avons pas fait d'appel.

M. Allmand: Je vous remercie.

M. McGrath: La résolution adoptée par le Comité était destinée à inscrire un tel appel à la Chambre.

Quelques voix: C'est absurde!

Le président: Avez-vous terminé, monsieur Allmand?

[*Text*]

Mr. Allmand: Yes.

Mr. Skoberg: Are you gentlemen aware of the fact that the Governor in Council may rescind the decision of the Canadian Transport Commission without an appeal.

I am sure if they were to receive your recommendation, whichever it may be, that it would have some effect on the board. Are you aware of that section of the Act which Mr. Allmand is referring to where you really do not have to initiate an appeal as such—because the Governor in Council himself may rescind this particular order of the Board. Are you aware of that section?

Mr. Noseworthy: No, we are not.

Mr. Skoberg: I have another supplementary.

The Chairman: You have the floor.

Mr. Skoberg: What facilities do you have at your port now for the handling of any containers? In your brief you refer to dock-aid and heavy lift equipment.

Mr. Noseworthy: Practically none. If there is any heavy equipment or cargo destined for Corner Brook at the moment it would have to go to another port and be railed or trucked to Corner Brook.

Mr. Skoberg: And, in your opinion, you believe there is sufficient demand there for that type of equipment.

Mr. Noseworthy: Cargo is by-passing the port already.

Mr. Skoberg: In your opinion do you believe that the federal government should install that type of equipment or do you think the shipping companies should?

Mr. Noseworthy: I think they are obligated to.

Mr. Belanger: You are talking about a complete port concept, are you not? Part of a port concept is the equipment to handle all kinds of cargo—the cargo that is coming into this port.

The Chairman: Mr. Trudel.

Mr. Trudel: Mr. Chairman, I would like to ask the witness if the bulk of their shipments are now water-borne out of that port?

Mr. Noseworthy: Yes, water-borne.

[*Interpretation*]

M. Allmand: Oui.

M. Skoberg: Je me demande si les messieurs savent que le Gouverneur en Conseil peut abroger les recommandations de la Commission sans appel.

Mais, si le Gouverneur général en Conseil devait recevoir vos recommandations cela pourrait avoir des répercussions. Il n'est vraiment pas nécessaire d'initier un appel comme tel, car le Gouverneur en Conseil lui-même peut abroger cette ordonnance de la Commission. Connaissiez-vous cet article de la loi?

M. Noseworthy: Non, nous n'en étions pas au courant.

M. Skoberg: J'ai une question supplémentaire.

Le président: Allez-y, vous avez la parole.

M. Skoberg: Quelles sont les installations portuaires que vous avez à l'heure actuelle pour la manutention des «containers». Je vois que dans votre mémoire, vous parlez justement d'équipement et de matériel portuaire lourds.

M. Noseworthy: Pratiquement rien. S'il y en a à l'heure actuelle qui doit être expédié à Corner Brook, cela doit se faire par un autre port, puis transporté par chemins de fer ou camions vers Corner Brook.

M. Skoberg: Et vous estimez qu'il y a suffisamment de demande pour ce genre de matériels.

M. Noseworthy: A l'heure actuelle, les marchandises ne passent pas par le port.

M. Skoberg: Croyez-vous que c'est au gouvernement fédéral d'installer ce genre d'équipement ou aux compagnies de navigation maritime?

M. Noseworthy: Je crois qu'ils sont obligés de le faire.

M. Bélanger: Vous parlez de l'équipement portuaire en général, n'est-ce-pas? Une partie d'un port comporte l'équipement qui doit servir à manutentionner toutes sortes de marchandises qui arrivent au port.

Le président: Monsieur Trudel.

M. Trudel: Monsieur le président, je voudrais demander au témoin si la plus grande partie de leurs expéditions à partir de ce port se fait par bateau.

M. Noseworthy: Oui, par bateau.

[*Texte*]

Mr. Trudel: Would it be 100 per cent, 75 per cent or 50 per cent? Would you have any idea?

Mr. Noseworthy: I would say 90 per cent.

Mr. Trudel: The other form would be what?

Mr. Noseworthy: There would be some rail shipments but very few.

Mr. Trudel: When was the last time that you have been on the Bullet yourself, sir?

Mr. Noseworthy: On the Bullet?

Mr. Trudel: Yes, on the rail.

Mr. Noseworthy: The rail passenger train.

Mr. Trudel: Yes.

Mr. Noseworthy: Oh, about two years.

Mr. Trudel: And the other gentleman.

Mr. J. Merrill Belanger: It is a rather embarrassing question to ask.

Mr. McGrath: Mr. Chairman, just to set the record straight, Mr. Allmand was quite correct because it has been pointed out to me that Section 53 of the Railway Act is still in effect, which allows for an appeal procedure. I would strongly suggest to these gentlemen from the Corner Brook Chamber of Commerce that they make such an appeal to the Governor in Council because time is running out.

The Chairman: Thank you, Mr. Belanger.

Our next brief is from The Brotherhood of Railway, Airlines and Steamship Clerks, Freight Handlers, Express and Station Employees.

I have on my right Mr. Thoms, Mr. Abbott and Mr. Butt. I would ask Mr. Thoms to give us a summary of their brief.

Mr. Esau Thoms (General Chairman, Brotherhood of Railway, Airline and Steamship Clerks, Freight Handlers, Express and Station Employees): Thank you, Mr. Chairman. We were supposed to appear at two o'clock this afternoon but I want to assure everybody present that it is not our Brotherhood's fault. We have given 40 copies of our brief in English to the Committee. We apologize for not being able to give the same number of copies in French but it was almost a physical impossibility. I will run through the brief,

[*Interprétation*]

M. Trudel: Dans quelle proportion. 100 p. 100, 75 p. 100 ou 50 p. 100? Auriez-vous une idée?

M. Noseworthy: Je dirais 90 p. 100.

M. Trudel: Quel est l'autre moyen de transport?

M. Noseworthy: Une partie se fait par chemins de fer mais il y en a très peu.

M. Trudel: Quelle est la dernière fois que vous avez voyagé par le «Bullet»?

M. Noseworthy: Le «Bullet» dites-vous?

M. Trudel: Oui, par chemin de fer.

M. Noseworthy: Vous voulez dire le train pour passagers?

M. Trudel: Oui.

M. Noseworthy: Voilà environ deux ans.

M. Trudel: Et l'autre monsieur.

M. Bélanger: C'est une question plutôt embarrassante.

M. McGrath: Monsieur le président, simplement pour mettre les choses au point, M. Allmand avait raison, je viens d'apprendre que l'article 53 de la Loi sur les chemins de fer est toujours en vigueur, ce qui prévoit une procédure d'appel. Je suggérerais donc fortement à ces messieurs de la Chambre de commerce de Corner Brook de faire un tel appel auprès du gouverneur en conseil car il n'y a pas de temps à perdre.

Le président: Merci beaucoup, monsieur Bélanger. Le prochain mémoire nous vient de la Fraternité des commis manutentionnaires de marchandises, des employés des messageries et de stations pour les lignes aériennes et maritimes.

J'ai à ma droite, Monsieur Thoms, ensuite Monsieur Abbott et Monsieur Butt. J'ai demandé aux messieurs de nous faire un résumé de leur mémoire. Je demanderais à Monsieur Thoms de le faire.

M. Esau Thoms (Directeur général Fraternité des commis de chemin de fer, de navires à vapeur et des lignes aériennes, de manutenteurs de marchandises et d'employés de messageries et de gares): Merci, monsieur le président. Nous nous proposions de comparaître à deux heures cet après-midi, mais je veux assurer tout le monde que ce n'est pas notre faute si nous ne l'avons pas fait. Nous avons remis notre mémoire au comité, quarante copies en anglais, nous nous excusons de ne pas être en mesure de vous donner 40

[*Text*]

because I am pretty sure everybody has a copy of it.

Our number one question is the abandonment of our train passenger service. One of the points in the brief raises the question: Was Canadian National legally able to make an application to the CTC to abandon something which, in our opinion, Canadian National do not own?

This is one question that I thought somebody from this Committee could probably answer from a legal point of view. A few weeks ago I did write the Committee a two-page letter and posed this question. Perhaps somebody can give us the Committee's official viewpoint on this.

Another point in respect of abandonment of our train passenger service is that Newfoundland will be the only province in Canada without a train passenger service. This, in our opinion, is a terrible indictment against Confederation, if this is allowed to go unchallenged or if Canada as a whole allows it to happen.

Another problem which our Brotherhood, and many other brotherhoods in the railroads are concerned about, is the fact that some 200 men will be unemployed when the train passenger service is taken away from us. This of course is a very serious thing because most of these Newfoundlanders are of my age and over and probably never have had the opportunity to acquire the necessary educational qualifications or skills to do something else. It is going to be pretty hard now for those chaps to obtain other employment.

The bus service is not as dependable as our train passenger service. While February of this year may not have been as severe as normally, I have known February in other years when buses would not operate efficiently and safely across this province, suggested to the CTC that instead of holding their hearings in December, 1967 in St. John's that they should have held them on Gallants Hill in a February snow storm, if they really wanted to get a good picture of the train passenger service.

We have had many royal commissions, many investigations into transportation in Newfoundland over the years. The provincial royal commission in 1966 said in no uncertain terms that Newfoundlanders were being made to play an inferior role in transportation. They made many recommendations that our Brotherhood certainly agrees with. One was to retain and upgrade the train passenger service. The royal commission on transportation in 1966 could not be said to be favouring railway employees because nobody from the

[*Interpretation*]

copies en français, mais c'était pratiquement impossible. Je vais résumer le mémoire car je suis sûr que vous avez tous les copies. Tout d'abord, l'abandon de notre service ferroviaire. Un des points que nous soulevons dans le mémoire, est la question suivante: Le National-Canadien pouvait-il légalement faire une demande à la Commission canadienne des transports en vue d'abandonner quelque chose qui, à notre avis, ne lui appartient pas?

C'est une question à laquelle j'aimerais que quelqu'un du Comité puisse répondre d'un point de vue légal. Il y a quelques semaines, j'avais envoyé au Comité une lettre de deux pages dans laquelle j'avais posé cette question. Je me demande si quelqu'un ici pourrait y répondre. L'autre point en ce qui concerne l'abandon de notre service voyageur est le fait que Terre-Neuve sera la seule province du Canada n'ayant pas un service voyageur. A notre avis, c'est là un blâme terrible contre la Confédération, si le Canada laissait passer cette situation sans prendre les mesures qui s'imposent. Un autre problème qui préoccupe notre fraternité et plusieurs autres dans les chemins de fer est le fait que 200 personnes seront mises à pied lorsque le service des voyageurs sera éliminé. Cette situation est très grave, car la plupart de ces terre-neuviens, sont à peu près de mon âge et n'auront probablement jamais l'occasion de s'instruire, et de se recycler pour exercer un autre métier. Il sera très difficile pour ces gens d'obtenir un autre emploi.

Le service d'autobus n'est pas aussi fiable que le service voyageurs. Bien que le mois de février cette année n'ait pas été aussi dur que d'habitude, j'ai connu des mois de février où les autobus ne fonctionnaient pas sûrement ni efficacement à travers la province. Et j'ai suggéré à la Commission canadienne des transports qu'au lieu de tenir leurs sessions à Saint-Jean en décembre 1967 ils devraient le faire en février à Gallants Hill pendant les tempêtes de neige s'ils voulaient vraiment avoir une idée du service voyageurs.

Tout au long des années, nous avons eu plusieurs enquêtes sur le transport à Terre-Neuve. La Commission Royale d'enquête provinciale en 1966 a dit de façon assez claire que les Terre-Neuviens étaient classés de façon inférieure en matière de transports. Ils ont fait plusieurs recommandations qui étaient agréées par notre fraternité. Une de ces recommendations était de maintenir et d'améliorer le service ferroviaire pour voyageurs. On ne peut pas dire que ce rapport de 1966 favorisait les cheminots car aucun membre de

[*Texte*]

railway brotherhoods were on that commission. Therefore their findings must be at least semi-impartial. The trains have been allowed to deteriorate down through the years and suggestions from railway brotherhoods have ended up in the wastepaper baskets of some manager's or railway clerk's office in Montreal.

We brought many things to their attention that we were sure patrons of the Newfoundland railway wanted corrected and they were not corrected. Now of course, they have been allowed to deteriorate to the point where people say that they are either too dirty or too slow and therefore they cannot travel on them.

I want to point out—and I can document this if anybody on the Committee wants it—that the fact we have a narrow gauge railroad is not the reason that we have a slow train across this province. I have heard from top management that with a narrow gauge you can run a train across Newfoundland just as fast as you can on a standard gauge. Whether this is true or not, I am not that much of a railroader to know, but I do know that the chap who said it should know.

We also have a problem in Newfoundland with the Argentia and Bonavista subdivisions—two branches which serve the Bonavista branch, the Argentia area and the entire south-west coast. They have made application to the CTC to have their two branches abandoned and if this is allowed to happen, of cause, the people on the Bonavista Peninsula will have to be serviced by probably a third or fourth-class dirt road, and on the Argentia south-west coast it will certainly mean the unemployment of at least 80 stevedores in that area and a much higher cost to the consumer.

Another point in our brief concerns our coastal boat service. We contend in our brief that coastal boat service should be placed under the operation of the CTC because at the present time Canadian National can—and they have done it—take away coastal runs withour regard to anybody or without asking anybody whether they should or should not do this. We think that if, in cases where they want to abandon small railway stations where perhaps there is only one or two employees, they have to go before the CTC then, where there is a coastal run which may affect thousands of people and hundreds of employees, this should also come before the Canadian Transport Commission. As a result they have abandoned their own boats and hired charter boats, paying of course substandard wages.

[*Interprétation*]

notre fraternité ne faisait partie de la Commission. Par conséquent, leurs décisions et leurs conclusions doivent être impartiales au moins de moitié. On a laissé le service ferroviaire se détériorer au cours des années et les suggestions formulées par les fraternités ont fini quelque part à Montréal dans la corbeille à papier d'un directeur ou d'un employé des chemins de fer.

Nous avons signalé bien des choses que, à notre avis, les dirigeants des chemins de fer de Terre-Neuve auraient aimé voir corrigées mais ne l'ont pas été. On a laissé le service se détériorer à tel point que les gens se disent maintenant, les trains sont tous bien trop sales ou trop lents et par conséquent, ils ne veulent plus s'en servir. Laissez-moi vous dire, et je peux vous le prouver que ce n'est pas parce que nous avons un service ferroviaire à voies d'écartement étroit que nous avons un service lent. J'ai entendu quelqu'un de la haute direction me dire qu'il est possible de faire le trajet à travers l'île de Terre-Neuve sur les voies d'écartement étroit, aussi rapidement que sur n'importe quelle autre voie. Je ne sais si cela est vrai ou non, je ne suis pas spécialiste, mais celui qui me l'a dit devrait le savoir.

Nous avons aussi un problème à Terre-Neuve avec les subdivisions d'ARGENTIA et de BONAVISTA, deux branches qui desservent *Bonavista et Argentia* ainsi que toute la côte du sud-ouest. Ils ont fait la demande à la commission canadienne des Transports en vue d'abandonner ces deux embranchements et si cette demande était acceptée, les habitants de la péninsule de Bonavista, devront se contenter d'une route de 3e ou 4e ordre et sur la côte sud-ouest à Argentia, cela voudra dire certainement la mise à pied d'au moins 80 débardeurs dans cette région et un coût beaucoup plus élevé pour le consommateur.

Un autre point de notre mémoire a trait au service de cabotage. Nous prétendons dans notre mémoire que les caboteurs devraient relever de la CCT car à l'heure actuelle le National Canadien peut, et il l'a déjà fait d'ailleurs, éliminer certains services de cabotage sans égard pour personne et sans demander à qui que ce soit. Nous croyons donc que quand ils veulent abandonner une petite gare où il n'y a qu'un seul employé ou deux, ils devraient se présenter à la CCT et de même lorsqu'il s'agit d'un service de cabotage qui touche des milliers de gens et des centaines d'employés. C'est pourquoi le CN a abandonné ses propres navires pour en noliser d'autres, et faire évidemment des salaires inférieurs.

[*Text*]

Before I continue on with the brief, I have to my right the Vice-President of the CBRT for the Maritime area, Brother Abbott, who would like to give some details on the coastal shipping, with your permission Mr. Chairman.

Mr. L. K. Abbott (Vice-President, Brotherhood of Railway, Airline and Steamship Clerks, Freight Handlers, Express and Station Employees): Mr. Chairman, our brotherhood, the Canadian Brotherhood of Railway Transport and General Workers, represents 33,000 members in Canada, 23 of whom are on the Canadian National Railways and 1,100 of whom are on the Canadian National (Newfoundland) Steamship Service.

We support the brief presented here today by the Brotherhood of Railway, Airline and Steamship Clerks, and are supplementing it with a few remarks because we believe that the CN ships in Newfoundland are a big industry.

We not only represent a thousand people but in addition to that there are two or three hundred more people who we do not represent on these ships—they are represented by other organizations. Then when this is supplemented with ancillary operations such as marine departments, dockyards and what have you, it runs into a good sized industry employing approximately 2,000 to 3,000 people. We certainly feel that any elimination of this service is a deterioration in the economic factor in Newfoundland. From what I read in the paper the past couple of days, it seems to be roads at any cost. It seems that the Government of Newfoundland is dwelling on the idea of roads and this to the elimination of trains and coastal services. We believe that this is a bad way to operate.

During the past year there have been three ships taken out of service by the Canadian National Railways—the Burgeo, the Baccalieu and the Northern Ranger. This has been done without any notification whatsoever to the employees or to the people who represent these employees. This has resulted in over 200 people being affected by the lay-up of these ships.

Our Brotherhood, as well as Mr. Thoms' Brotherhood, has made many representations to the Canadian National Railways, to the government, to the Minister of Transport and the Minister of Labour through the press and radio, and as yet it has been to no avail. There has been no result from it. The matter of tying up these ships seems very bad to us because the railways tie these ships up and then they go and charter other ships.

[*Interpretation*]

Avant d'aller plus loin, j'ai à ma droite, le vice-président régional de la Fraternité canadienne des cheminots et employés des transports et autres ouvriers pour la région de l'Atlantique. Le confrère Abbott nous donnera des détails sur le cabotage, avec votre permission, monsieur le président.

M. Abbott: Monsieur le président, notre syndicat, la Fraternité canadienne des cheminots et employés des transports et autres ouvriers, qui représentent 33,000 membres au Canada, dont 23 travaillent pour le CN et 1100 se trouvent sur la *CN (Newfoundland) Steamship Service.*

Nous appuyons le mémoire présenté par la Fraternité des commis de chemins de fer, de navires à vapeur et de lignes aériennes, auquel nous voudrions ajouter quelques remarques car nous estimons que les navires du CN à Terre-Neuve constituent une industrie importante.

Nous représentons non seulement 1100 personnes mais de plus, il y a 200 ou 300 autres personnes à bord des navires que nous ne représentons pas mais qui sont représentées par d'autres organismes syndicaux. Quand on y ajoute aussi les services auxiliaires comme les services de la marine, les chantiers navaux, et ainsi de suite, cela représente une industrie de 2000 ou 3000 personnes. Nous croyons donc que toute élimination de service est une détérioration pour l'économie de Terre-Neuve. D'après ce que j'ai vu dans les journaux, depuis quelques jours on semble ne parler que de routes à tout prix. Apparemment le gouvernement de Terre-Neuve insiste sur les routes, au détriment des services ferroviaires et des services de cabotage. A notre sens, ce n'est pas de la bonne administration.

Depuis un an, trois navires ont été enlevés du service du CN, le *Burgeo*, le *Baccalieux* et le *Northern Ranger*, on l'a fait sans préavis aux employés ni aux gens qui représentent les employés, de sorte que plus de 200 personnes ont été touchées par le retrait de ces navires.

Notre fraternité, ainsi que la fraternité de monsieur Thoms, a fait un bon nombre de représentations aux Chemins de fer nationaux, au gouvernement, au ministre des Transports et au ministre du Travail, au moyen de la presse et de la radio, sans succès, toutefois, jusqu'ici. La question de retirer ces navires du service nous semble très mauvaise parce que les chemins de fer retirent les navires et en nolisent d'autres ensuite.

[*Texte*]

My information is that they have now chartered a ship which is called the *Sarah* for a period of two years. This is unofficial information which I have. They are going to run this ship for two years on a regular service on the south coast. I might say, Mr. Chairman, that the wages and working conditions on these ships are approximately half or less than half of what they are on the Canadian National ships themselves.

In fact, the wage rate today, as I understand it, is $200 a month—$200 a month—and that is for a thirty-day month. Now, the Commission that heard the case on the Newfoundland shipping last year made recommendations to the government and they have recommended implementation of the forty-hour week and the Canadian Labour Standards Code by 1974, so there are several years to go yet. But we deplore the type of working conditions and the wages which these people have and we feel that Canadian National, as a Crown Corporation, should not be permitted to enter into these kind of working conditions in order to get a cheap charter or have a cheaper operation than what their own regular boats would do, which is paying at least a decent wage and providing decent working conditions to the people whom they employ and who are represented by union.

The railways will tell us, of course, that they have supplemented the services by newer ships, but I say to you gentlemen that these ships have been placed in the gulf service between North Sydney and Port-aux-Basques which was a term of Confederation and they have no relationship whatsœver to the coastal services. The coastal services are something separate and apart, so the supplementing of the ships in the gulf, as I say, has no relationship to it.

We really do not think that the railways should be allowed to do this because we think if they do, with the elimination of the trains, with the elimination of the coastal ships, that before too many years are out we may find the elimination of the dockyard. I think this is the only province in Canada where the railway owns the dockyard, and certainly if the ships are eliminated and they get into chartered ships, then what is going to be the need for the dockyards at St. John's? The long-range program might be to eliminate these.

I would be glad to answer any questions, Mr. Chairman, but I think that this Committee should look very seriously at the idea of the railways being allowed to eliminate the coastal services and chartering boats, and that the Commmittee should recommend that

[*Interprétation*]

D'après mes renseignements, ils viennent de noliser le navire *Sarah* pour une période de deux ans. Ce sont des nouvelles officieuses que j'ai reçues. Mais ils ont l'intention de s'en servir pour établir un service régulier pendant deux ans sur la côte sud. Je pourrais ajouter, monsieur le président, que les salaires et les conditions de travail sur ces navires sont la moitié ou moins ce qu'elles sont sur les navires du CN.

En fait, si j'ai bien compris aujourd'hui, le taux des salaires est de $200 par mois, pour un mois de trente jours. La Commission qui a entendu la cause des expéditions à Terre-Neuve l'an dernier a formulé des recommandations au gouvernement et a recommandé la mise en vigueur d'une semaine de quarante heures ainsi que la mise en vigueur du code ouvrier d'ici 1974, il reste encore quelques années à faire. Mais nous déplorons les salaires et les conditions de travail de ces gens et nous estimons qu'on ne devrait pas permettre au National-Canadien, en tant que corporation de la Couronne, de s'engager dans ce genre d'activité pour pouvoir affrèter plus économiquement ou offrir un service plus économiquement qu'avec leurs propres navires, c'est-à-dire qu'ils devraient payer des salaires adéquats et offrir des conditions de travail adéquates à leurs employés qui sont syndiqués.

Les chemins de fer nous diront qu'ils ont suppléé au service, grâce aux nouveaux navires, mais je peux vous dire, messieurs, que ces navires ont été mis en service dans le golfe entre North Sydney et Port-aux-Basques selon les conditions de la Confédération, ce qui n'a rien à avoir avec le service de cabotage. Un service de cabotage est autre chose complètement, et, par conséquent, le fait de compléter le nombre de navires dans le golfe n'a rien à voir à ce sujet. Nous estimons qu'il faudrait empêcher les chemins de fer d'agir ainsi, car sinon, avec l'élimination des trains et des caboteurs, avant trop longtemps, ils élimineront les chantiers navaux. C'est peut-être la seule province du Canada où le chemin de fer est propriétaire du chantier naval, et si on élimine les navires et qu'ils ont recours à des navires nolisés, à quoi servira le chantier naval de St-Jean? Le programme à long terme vise peut-être à l'éliminer.

Je serai heureux de répondre à toutes les questions, monsieur le président, mais je crois que votre Comité devrait étudier sérieusement l'idée de permettre aux chemins de fer d'éliminer leur service de cabotage et d'affréter des navires, et que le Comité recom-

[*Text*]

new ships be provided to the coastal services in Newfoundland. Thank you, sir.

The Chairman: Thank you.

Mr. Thoms: I just want briefly to highlight the remainder of our brief. It deals with Port-aux-Basques problems and ice-breaker service for Lewisporte, a ship for Labrador service which will use Lewisporte as a turn-around terminal, an extra boat on the Corner Brook—Lewisporte service for tourists and freight traffic, highway safety for interprovincial drivers, Corner Brook harbour development which we want also, and although not directly affecting our union, freight transportation for Bell Island. I just want to read in conclusion the top part of page 5 of my brief, the first paragraph of which I think does bear repeating:

> To show how Newfoundland is being used as a guinea-pig, allow your imagination to view the Province of Quebec if Canadian National was taking their train passenger service from them. In that province they would not dare. In this province apparently anything goes, all because we have created the image that we are conventional in our thoughts, loyal in our actions and steadfast in our respect for government authority.
>
> Now, let me forewarn all concerned and all others who think that Newfoundlanders can be led down the garden path forever. We are not to be taken for granted any longer. We have no desire to be free and unequal. We want freedom with equality. We want justice in the same way as Quebecers need it and we are not willing to be classed in an inferior role. We are not willing to have a second-rate transportation system because someone within Canadian National wishes to buy buses.

Now gentlemen, in the audience are eight more members of my brotherhood who are well qualified to answer any particular questions that I think you can put to us along with the other two here. I thank you.

The Chairman: Mr. Horner?

Mr. Horner: Just a quick question on the Bullet versus the bus. Would you in the railroad and locomotive trade have any comment for the Committee concerning the fog conditions here on the island. I understand sometimes they are pretty bad. I do not want to

[*Interpretation*]

mande qu'on fournisse de nouveaux navires au service de cabotage de Terre-Neuve. Merci.

Le président: Merci.

M. Thoms: Je veux simplement résumer le reste de notre mémoire. Il s'agit des problèmes de Port-aux-Basques, et un service de brise-glace à Lewis Port, un navire pour desservir le Labrador dont le terminus serait à Lewis Port, un autre navire pour le service entre Corner Brook et Lewis Port pour les touristes et les marchandises, la sécurité routière pour les conducteurs interprovinciaux, l'expansion du port de Corner Brook, que nous désirons également, et bien que cela n'affecte pas directement notre syndicat, le transport des marchandises à l'île Bell. Je veux simplement vous lire, en guise de conclusion, au haut de la page 5 de notre mémoire, le premier paragraphe qu'il est bon de répéter:

> Pour nous montrer comment Terre-Neuve sert de cobaye, imaginez-vous si le CN enlevait son service passagers dans la province de Québec. Ils n'oseraient même pas dans cette province. Ici, on se permet tout, parce que selon l'idée que les gens se font de nous, nos pensées sont conservatrices, nos actes loyaux, et notre respect pour l'autorité inébranlable.
>
> Permettez-moi d'avertir ceux qui croient que les gens de Terre-Neuve vont se laisser ainsi leurrer pendant longtemps. On ne nous prendra plus pour acquis bien longtemps. Nous ne désirons pas être libres et inférieurs. Nous voulons la liberté et l'égalité; nous voulons un peu de justice tout comme le Québec la réclame, et nous ne sommes pas prêts à accepter un rôle inférieur. Nous ne sommes pas prêts à accepter un réseau de transports de second ordre parce qu'un employé du Canadien National désire acheter des autobus.

Il y a huit autres members de la fraternité ici qui sont en mesure de répondre aux questions que vous voulez bien poser. Merci.

Le président: Monsieur Horner?

M. Horner: Une courte question sur les avantages du *Bullet* sur les autobus. Avez-vous des commentaires à faire au comité pour ce qui est des conditions du brouillard ici dans l'île. Je crois comprendre que la visibilité n'est pas tellement bonne parfois. Je ne

[*Texte*]

belittle the engineer's responsibilities in any way, but he has those tracks to follow. Would you suggest that in studying the safety factor the Committee might consider the danger might be greater on a bus than on a train? Would you give us some idea of your thoughts on that?

Mr. Thoms: With all due respect to you, Mr. Horner, I do not think everybody should go around saying that all of us think that it should be called the Newfie Bullet; it is not the Newfie Bullet—it is the train passenger service. In my opinion the trains are much safer than a bus on the Trans-Canada Highway, and I have travelled the Trans-Canada Highway and I have travelled the trains.

Mr. Horner: Sir, I would like to apologize if I hurt anyone's feelings. I thought it was an accepted name. Perhaps I was caught up in the...

The Chairman: Order, please!

Mr. Horner: Maybe I was caught up with the advertising theme of it, sir. I have heard a lot about the track and I do not think for one minute that a 30-mile trip over it last night was any way to judge it. Could you give the Committee some idea at how slow you would have to go around some of the curves with the passenger train, not hauling a load of freight? What is the slowest curve you have to take and what would be your straightest run at the highest speed the book says you can run, just an idea?

Mr. Thoms: Mr. Horner, I really do not know but we have a dispatcher here with the Canadian National, Mr. Butt.

Mr. W. H. Butt, (General Chairman, representing the Brotherhood of Railway, Airline and Steamship Clerks, Freight Handlers, Express and Station Employees): I could answer that if you wish. I would say the lowest speed on the curve is 5 miles per hour and the top speed for passenger trains is 45 miles per hour. This is for a very short section, by the way.

Mr. Trudel: The speed regulations, sir, would you agree, do not necessarily have anything to do with the tracks because you have straight tracks where you have a speed limitation of five miles per hour under certain conditions?

Mr. Butt: Straight track at five miles per hour?

[*Interprétation*]

veux pas diminuer les responsabilités des ingénieurs, mais il doit suivre les rails. Êtes-vous d'accord, que lorsque le Comité étudie le facteur de sécurité que les dangers sont plus grands pour un autobus que pour un train? Pourriez-vous nous faire part de votre opinion à ce sujet?

M. Thoms: Avec tout le respect que je vous dois, monsieur Horner, je ne crois pas qu'on doive dire que nous croyons tous qu'il faut l'appeler le «*Newfie Bullet*»; il s'agit plutôt du service voyageurs. A mon avis, le train offre une plus grande sécurité qu'un autobus sur la route transcanadienne, et je connais les deux.

M. Horner: Je m'excuse si je vous ai insulté. Je croyais que c'était le nom accepté. Je me suis peut-être laissé emporter...

Le président: A l'ordre, s'il vous plaît.

M. Horner: Peut-être est-ce que c'est la campagne publicitaire qu'on a fait qui m'a emballé. J'ai beaucoup entendu parlé de la voie et je ne crois pas qu'un voyage de 30 milles, hier soir, nous permette de porter un jugement. Pourriez-vous nous dire à quelle vitesse vous devriez ralentir pour négocier certaines des courbes avec le service voyageur, sans un chargement de marchandises? Quelle est la courbe où vous devez ralentir le plus et quelle est la vitesse maximale que vous pouvez atteindre dans un saut droit, d'après le règlement? Pouvez-vous nous donner une idée?

M. Thoms: Je ne sais vraiment pas, mais nous avons un régulateur du Canadien National avec nous, monsieur Butt.

M. W. H. Butt (Président général, représentant la Fraternité des commis des chemins de fer, de navires à vapeur et de lignes aériennes, de manutenteurs de marchandises et d'employés de messageries et de gares): Je peux répondre si vous le désirez. La vitesse minimale est de cinq milles à l'heure et la vitesse maximale, 45 milles à l'heure pour le service passagers, mais sur un petit parcours seulement.

M. Trudel: Est-ce que vous convenez que les règlements en matière de vitesse n'ont pas nécessairement quelque chose à voir avec les voies, car vous avez des voies droites où, dans certaines conditions, vous avez une limite de vitesse de 5 milles à l'heure?

M. Butt: Une voie droite où la limite est de 5 milles à l'heure?

[*Text*]

Mr. Trudel: Five and ten miles per hour.

Mr. Butt: No, we do not have any except in yards, of course. But not on a straight main track at five miles per hour unless there is an unsafe condition of some sort.

Mr. Horner: I notice on page 6 you suggest that this might eventually lead nearly to the rolling up of the tracks. Do you really believe that the discontinuance of the passenger service is the initial step towards what in 20 years from now might result in there being no longer a railway track operative in Newfoundland, certainly one not connected all the way across the province?

Mr. Thoms: In my opinion, if their plans which have not been disclosed remain unchecked and we do not get support from our mainland friends, in 20 years Canadian National because of improved road conditions may decide to eliminate the railway altogether in Newfoundland.

Mr. Horner: I had some such suspicions myself, and I just wondered whether that fear was evident. Now, one further question with regard to coastal service. You suggest on page 10 of the brief that there is no authoritative body you can appear before to object to the discontinuance of the coastal service run by the CNR. Am I right?

Mr. Thoms: That is right.

Mr. Horner: This is in essence what you are saying on the bottom of page 10. You cannot apply, you cannot appear before the CTC, or anything. As soon as the CNR feel that area is served by a road well enough they can discontinue the service.

Mr. Thoms: The Canadian National abandoned the coastal service between Corner Brook and Lewisporte. We wrote the CTC—in fact, we wrote everybody else in Ottawa also—and the CTC came back and told us that it was entirely out of their jurisdiction.

Mr. Horner: Did the Newfoundland government have anything to say about the abandonment of this service?

Mr. Thoms: The Acting Premier, the Honourable T. A. Hickman, appeared before the CTC and asked that the service be kept on for five years and run in conjunction with the bus.

Mr. Horner: His wishes were not listened to? Just one or two rather quick questions. Why Lewisport instead of Botwood? We had

[*Interpretation*]

M. Trudel: 5 ou 10 milles à l'heure.

M. Butt: Non, sauf dans les gares de triage. Mais pas sur une voie principale droite, à 5 milles à l'heure à moins que les conditions présentent un danger quelconque.

M. Horner: A la page 6, vous proposez que, éventuellement, cela pourrait entraîner une disparition des voies. Croyez-vous vraiment que la discontinuation d'un service passagers est une première étape, et que dans 20 ans il n'y aura peut-être plus de chemins de fer à Terre-Neuve, du moins pas un service qui traverse toute l'île.

M. Thoms: Je dirai que si leur projet, qui n'a pas été dévoilé, n'est pas contrôlé, et que nous n'obtenons pas l'appui de nos amis du continent, d'ici vingt ans le National Canadien, vue l'amélioration de l'état des routes, pourra décider de faire disparaître les chemins de fer à Terre-Neuve.

M. Horner: C'est bien ce que je pensais, et je me demandais si je laissais paraître cette crainte. Une autre question maintenant pour ce qui est du service de cabotage. A la page 10 du mémoire vous laissez entendre qu'il n'y a pas d'organisme compétent auprès duquel vous pouvez vous présenter pour vous opposer à l'abolition du service de cabotage du National Canadien. Est-ce exact?

M. Thoms: C'est exact.

M. Horner: C'est essentiellement ce que vous dites au bas de la page 10. Vous ne pouvez pas faire de demande, ni comparaître à la Commission canadienne des transports, ou quoi que ce soit. Dès que le National Canadien est d'avis que le service routier est assez bon, il peut discontinuer le service.

M. Thoms: Le CN a discontinué le service de cabotage entre Corner Brook et Lewisport. Nous avons communiqué avec la CCT qui nous a répondu que cela ne relevait pas de sa compétence.

M. Horner: Est-ce que le gouvernement de Terre-Neuve a eu un mot à dire pour ce qui est de l'abandon de ce service?

M. Thoms: Le premier ministre suppléant, l'honorable T. A. Hickman, a comparu à la CCT pour demander qu'on maintienne le service pendant 5 ans de concert avec les autobus.

M. Horner: On n'a pas daigné écouter ses demandes? Encore une ou deux courtes questions. Pourquoi Lewisport plutôt que Bot-

[*Texte*]

some evidence this morning that there was a steamship service into Botwood and I noticed from the map that Lewisport is not very far away. Now, which one of those ports is the best to your mind?

Mr. Thoms: Lewisporte is the Canadian National terminal; that was the reason for that. Botwood is Clarke Steamship Company Ltd. Montreal, and Anglo-Newfoundland Development Co. Ltd., the A.N.D. the paper company's terminal.

Mr. Horner: You suggest that there is no way the operational service in that area could be served by one of those ports being developed rather than both of them, or...

Mr. Thoms: It is not a matter of development at Lewisport. What we wanted for Lewisport was a boat that would leave there and go down to northern ports in Newfoundland and go to Labrador. At the present time according to our information—at least last year—wholesalers in Lewisport, and we have this in complaints from them because they want us to help, said that they would get orders from Labrador which is now, of course, in a great industrial growth area, and they could not guarantee delivery because the boats did not originate at Lewisport.

The boat would originate at St. john's, go to Lewisport and probably be filled up. For instance, if you ordered 500 sacks of flour, delivery of the 500 sacks could not be placed on that ship and therefore they lost the order. We have asked the railway to take this up. In fact, we have also now asked the member for the area, Mr. Lundrigan, to handle the matter.

Mr. Horner: That is a good example, I might say, to use with me—the flour.

Mr. Abbott: If I might add, Mr. Chairman, we also hear that this year, instead of a ship running from Lewisport right around to the terminal of Corner Brook, this ship is now going to terminate its services in St. Barbe which is on the lower part of the coast, the Strait of Belle Isle, so there will not be any service of C.N. into Corner Brook this year according to our information.

Mr. Horner: From Lewisporte?

Mr. Abbott: From Lewisport or from Corner Brook.

Mr. Horner: Then you believe that is a necessity? You do not believe that it could go up the coast by road?

[*Interprétation*]

wood? Ce matin nous avons entendu un témoignage selon lequel il y avait un service maritime vers Botwood, et je vois sur la carte que Lewisport n'est pas tellement éloigné. Lequel de ces deux ports, à votre avis, est le meilleur?

M. Thoms: Lewisport est le terminus du National-Canadien. Botwood est le terminus de la *Clarkes Steamship Company Ltd., Montréal* et de l'Anglo-Newfoundland Development Co. Ltd., l'A.N.D. et le terminus de la société de papier.

M. Horner: Vous dites qu'il est impossible que le service de cette région soit assuré par un seul des deux ports, plutôt que de développer les deux ou . . .

M. Thoms: Ce n'est pas une question de développement à Lewisport. Ce que nous voulions pour Lewisport c'était un navire qui partirait de là pour se rendre au Labrador et au littoral nord de Terre-Neuve. D'après nos renseignements, l'année dernière du moins, tous les grossistes de Lewisport, et nous le savons par leurs griefs car ils veulent qu'on leur vienne en aide, ont dit qu'ils reçoivent des commandes du Labrador qui connaît, à l'heure actuelle, une expansion industrielle très grande et qu'ils ne peuvent pas garantir les livraisons parce que les navires ne partent pas de Lewisport.

Le navire part de St-Jean, s'arrête à Lewisport où on le remplit. Si vous aviez commandé 500 sacs de farine, et qu'on ne pouvait pas les mettre à bord de ce navire, ils perdaient la commande. Nous avons demandé au chemin de fer d'étudier la question et nous avons demandé au député de la région M. Lundrigan, de prendre la question en main.

M. Horner: Je dois dire que vous avez bien choisi votre exemple celui de la farine.

M. Abbott: Permettez-moi d'ajouter, monsieur le président, qu'on entend aussi dire que, cette année, au lieu d'avoir un navire partant de Lewisport jusqu'au terminus de Corner Brook, que le terminus de ce navire sera St-Barbe qui est dans la partie inférieure du littoral du détroit de Belle-Isle, de sorte qu'il n'y a pas de service du CN à Corner Brook cette année, suivant les renseignements que nous avons obtenus.

M. Horner: A partir de Lewisport?

M. Abbott: Oui, à partir de Lewisport ou de Corner Brook.

M. Horner: Croyez-vous que c'est une nécessité? Ne croyez-vous pas qu'on pourrait le faire par route le long du littoral?

[*Text*]

Mr. Abbott: There is certainly a reason for some of it to go by road, but the connection in Corner Brook at the terminal I would think would be a necessity.

Mr. Horner: Just one further question, Mr. Thoms. You have witnessed the Committee proceedings, I believe, for a couple of days now and you noticed what little effect the Cabinet Minister had on the appeal with regard to coastal service. What do you really think of this Committee now? Do you think we are going to be able to have much influence on the government's decision with regard to freight rates and the passenger service too?

Mr. Thoms: Well, frankly—and here, of course, I am cutting my own throat—I am sure you have already heard what I have said on television and seen it in the press. I think this is an exercise in futility for obvious reasons. For instance, the main one is that we have had many, many, many, many Royal Commissions on transportation and I think that Ottawa knows now all that they can know about transportation problems in this province, and I would surmise that the federal government has already decided on their policy. What this Committee will do, of course, because of government majority membership, is to go along with government policy.

Mr. Horner: If we came out here with the idea that we were coming out on an object of futility I am sure I would rather be in Alberta, and I love your Newfoundland province. I think we Committee members have to come out here with the belief that we can still perform a service to the Island as members of Parliament; I think we have to come out here with that belief. We cannot come out here with the attitude that we are performing a service in futility; surely you will give us that much credit.

Mr. Thoms: Well, I am not trying to make enemies while I am here appealing for something, but just take as an example the Committee's actions. They are going to try out the Newfoundland passenger service so they leave St. John's at 11.30 tonight and they end up in Holyrood, which is only an hour or so ride, and come back by bus. I also said, by the way, that they would probably be asleep coming back, and I understand that some of them were.

If you want to really see Newfoundland trains you should leave and go to Port aux

[*Interpretation*]

M. Abbott: Il y a certainement une raison pour qu'une partie des marchandises soient transportées par route, mais je crois que l'arrêt au terminus de Corner Brook est une nécessité.

M. Horner: Une autre question, monsieur Thoms. Vous avez été témoin, depuis quelques jours, des délibérations du Comité et vous avez pu observer le peu d'effets que l'intervention du ministre du Cabinet, a eu sur l'appel ayant trait au service de cabotage. Qu'est-ce que vous pensez vraiment de ce Comité maintenant? Pensez-vous que nous serons en mesure d'exercer beaucoup d'influence sur les décisions du gouvernement à l'égard du tarif marchandises et le service passagers?

M. Thoms: Peut-être que je suis en train de me couler moi-même, mais je suis certain que vous avez déjà vu dans les journaux et entendu à la télévision ce que j'y ai dit. Je pense que, pour des raisons bien évidentes, c'est un exercice de futilité. La principale c'est que nous avons eu un grand nombre de commissions royales d'enquête sur les transports, et je pense que les fonctionnaires d'Ottawa savent tout ce qu'ils peuvent savoir au sujet des transports dans la province. Et j'en conclurais que le gouvernement fédéral a déjà établi sa ligne de conduite. Il est évident que, vu sa composition majoritaire, le Comité ne fera qu'accepter la ligne de conduite du gouvernement.

M. Horner: Si nous étions venus ici tout en étant convaincus que c'était un exercice futil, je suis sûr que je préférerais me trouver en Alberta, bien que j'aime bien la province de Terre-Neuve. Je pense que les membres du Comité sont venus ici dans l'espoir que nous pourrons encore rendre service à l'île, en tant que membres du Parlement. Je pense qu'il faut que nous soyons venus avec de tels espoirs. Il est impossible que nous soyons venus en sachant que c'est un exercice futile. Il faut nous accorder au moins cette bonne volonté.

M. Thoms: Enfin, je ne veux pas me faire des ennemis alors que je plaide une cause, mais prenons, par exemple, l'activité du Comité. Afin de connaître vous-mêmes ce qu'est le service passagers de Terre-Neuve, vous allez partir de St-Jean à 23 h. 30 ce soir pour vous rendre à Holyrood, un trajet d'environ une heure, et revenir par autobus. J'ai également mentionné que bon nombre d'entre vous sommeillerait déjà à bord de l'autobus, et je crois comprendre que ce fût le cas.

Mais si vous voulez vraiment voir les trains de Terre-Neuve, vous devriez vous rendre à

[*Texte*]

Basques and then come back by bus, and anybody who has ever sat in a plane, for instance, for five hours—the bus seat is no different. And I am telling you that nobody on this Committee would ever say that we should have a bus service.

Mr. Horner: I agree with you 100 per cent, but I would also agree that the short distance we did go is better than nothing.

The Chairman: Mr. Trudel?

Mr. Trudel: Mr. Chairman, is Mr. Thoms aware of how many new jobs have been created by this new system of bus transportation?

Mr. Thoms: I am.

Mr. Trudel: Would you mind telling the Committee, sir?

Mr. Thoms: It is supposed to be around 60 bus drivers when they start to operate and 8 or 10 mechanics. I have not seen the figures on how many ticket clerks, but probably 10 to 12.

Mr. Trudel: Do you feel that 100 people would be a fair, over-all assessment?

Mr. Thoms: It probably is; it may be a little under.

Mr. Trudel: It could be 10 either way. I am just trying to make an assessment. We are now talking of something that is possible, and you mentioned a figure of 200. That has not happened as yet. You mentioned that relative to possible losses.

Mr. Thoms: Our trains have not gone yet.

Mr. Trudel: No; and they are not going; they are still going to be running.

Mr. Thoms: The train passenger service?

Mr. Trudel: No; the train.

Mr. Thoms: I am thinking of the train passenger service when I say 200.

Mr. Trudel: Yes; but we had no way by which we could relate that this morning. I asked a specific question to that effect and I did not get a satisfactory answer.

Let us leave that subject, sir. In the earlier part of your statement you mentioned the snowfalls that you experience here in Febru-

[*Interprétation*]

Port-aux-Basques et ensuite revenir par autobus, et quiconque a déjà été assis dans un avion pendant cinq heures, par exemple, le siège d'un autobus n'est pas différent. Et je vous dis que personne dans ce comité ne dirait jamais que nous devions avoir un service d'autobus.

M. Horner: Je suis tout à fait d'accord avec vous, mais je conviendrais aussi que le petit parcours que nous avons parcouru est mieux que rien.

Le président: Monsieur Trudel?

M. Trudel: Monsieur le président, monsieur Thoms sait-il combien de nouveaux emplois ont été créés par ce nouveau système de transport par autobus?

M. Thoms: Oui.

M. Trudel: Pourriez-vous le dire au Comité, monsieur Thoms?

M. Thoms: Le chiffre est censé être d'environ 60 chauffeurs d'autobus, lorsque le service commencera à fonctionner et 8 ou 10 mécaniciens. Je n'ai pas vu les chiffres pour les préposés aux billets, mais ils seront de 10 à 12 sûrement.

M. Trudel: Croyez-vous qu'un chiffre de 100 personnes serait une évaluation générale juste?

M. Thoms: Sans doute; ça pourrait être un peu moins.

M. Trudel: Cela pourrait être 10, dans un sens ou l'autre. J'essaie seulement d'en arriver à une évaluation.

Nous parlons d'une éventualité et vous parliez de 200. Cela ne s'est pas encore matérialisé. Vous en avez parlé à propos des pertes possibles.

M. Thoms: Nos trains n'ont pas encore disparu.

M. Trudel: Non, et ils ne disparaîtront pas. Ils fonctionneront toujours.

M. Thoms: Le service voyageur?

M. Trudel: Non, le train.

M. Thoms: Je pense au service des voyageurs lorsque je dis 200.

M. Trudel: Oui, mais nous ne pouvions aucunement établir de lien ce matin. J'ai posé une question précise à cet effet et je n'ai pas obtenu de réponse satisfaisante.

Changeons donc de sujet, monsieur. Au début de votre déclaration, vous avez parlé des chutes de neige que vous avez ici au mois

[*Text*]

ary. Are you aware of what has been the average snowfall in inches in this part of the country for the last 10 years?

Mr. Thoms: No, sir.

Mr. Trudel: Thank you. I have another question I would like to pose to you, sir. Are you aware of the Royal Commission on Coasting Trade that was conducted in this province in 1961?

Mr. Thoms: I have never heard tell of it.

Mr. Trudel: The other gentleman, I believe, is Mr. Abbott?

Mr. Thoms: Yes.

Mr. Trudel: Are you familiar, sir, with the increased volume of coastal shipping that has taken place in the last five years?

Mr. L. K. Abbott (Vice-President, Brotherhood of Railway, Airline and Steamship Clerks, Freight Handlers, Express and Station Employees): There has not been any actual increase in the shipping itself.

Mr. Trudel: I am talking about the volume in tonnage.

Mr. Abbott: I do not know what the tonnage is. It has certainly increased, because there have been developments in places such as Baie d'Espoir that have increased the volume.

Mr. Trudel: Therefore the volume increase is not directly related to the number of ships that are in operation?

Mr. Abbott: No; the railways charter extra ships.

Mr. Trudel: To come back to Mr. Thoms, do your responsibilities either in your work or in your union activities, extend to Quebec, sir?

Mr. Thoms: In a broad sense, yes. We are concerned about our membership, at least the working people, in Quebec.

Mr. Trudel: That was not the intent of my question, sir.

Mr. Thoms: You mean our jurisdiction?

Mr. Trudel: No; yours.

Mr. Thoms: My jurisdiction?

Mr. Trudel: Yes.

[*Interpretation*]

de février. Est-ce que vous seriez au courant de la moyenne de chutes de neige, en pouces, dans cette partie du pays, au cours de dix dernières années.

M. Thoms: Non, monsieur.

M. Trudel: Merci. J'aimerais vous poser une autre question. Êtes-vous au courant de la *Royal Commission on Coasting Trade* qui a été faite dans cette province en 1961?

M. Thoms: Je n'en ai jamais entendu parler.

M. Trudel: L'autre représentant est monsieur Abbott, je crois?

M. Thoms: Oui.

M. Trudel: Est-ce que vous connaissez le volume accru des expéditions côtières au cours des cinq dernières années?

M. L. K. Abbott (Vice-président, Fraternité des commis de chemins de fer, de navires à vapeur et de lignes aériennes, de manutenteurs de marchandise et d'employés de messageries et de gares): Il n'y a pas eu d'augmentation véritable dans les expéditions mêmes.

M. Trudel: Je parle du volume en tonnage.

M. Abbott: Je l'ignore. Il y a certainement eu une augmentation, parce qu'il y a eu une évolution à des endroits tels que la Baie d'Espoir ce qui a augmenté le volume.

M. Trudel: Donc, l'augmentation du volume n'est pas rattachée directement au nombre de navires en opération?

M. Abbott: Non, le chemin de fer affrète des navires supplémentaires.

M. Trudel: Pour revenir à monsieur Thoms, vos responsabilités, dans votre travail ou votre activité syndicale, s'étendent-elles à la province de Québec?

M. Thoms: Oui, dans un sens large. Nous nous intéressons à nos membres, ou du moins aux travailleurs du Québec.

M. Trudel: Ce n'était pas là le but de ma question.

M. Thoms: Vous voulez dire votre compétence?

M. Trudel: Non, la vôtre.

M. Thoms: La mienne?

M. Trudel: Oui.

[*Texte*]

Mr. Thoms: The province of Newfoundland.

Mr. Trudel: I ask because you made a very pointed statement about the conditions of the railroad in Quebec that aroused my curiosity. I come from Montreal and could possibly go into a long discussion, but that is not the point of this discussion. We however, have had to suffer railroad cutbacks, to a far greater degree than the entire length of your railroad service here. I was wondering whether you were starting from a statement of fact when you made your last assertion regarding Quebec.

Mr. Thoms: I asked that you allow your imagination to view the Province of Quebec if Canadian National were to take their train passenger service from it. If Quebec tomorrow, for example, were to lose all of its train passenger service—this is the situation I was talking about.

The Chairman: Mr. Allmand, on a supplementary.

Mr. Allmand: Do you know how many discontinuations of rail passenger trains there have been in Quebec since 1960, and how many thousands of people have been affected by those discontinuations? Have you checked on those figures?

Mr. Thoms: All too many, I am sure; but I am thinking about this as our only passenger train service here. They have many train passenger services in Quebec.

Mr. Allmand: Yes; but there have been many discontinuations of passenger train service in Quebec.

Mr. Thoms: I have read the question about it in *Hansard*. I believe we have had only one in Newfoundland, but certainly an awful lot more in Quebec.

The Chairman: Mr. Perrault?

Mr. Perrault: Mr. Chairman, this is a supplementary comment.

I think it is unfortunate that there has been this unfavorable reference to one of our sister provinces. I am not from Quebec, but I may say, Mr. Chairman, that I have the highest respect for my colleagues from Quebec. I have faith that they have brought, and will continue to bring, objective judgment to bear on the question of passenger service, be it in the Province of Newfoundland or in the Province of Quebec. I question the advisability of including this kind of statement in a presentation to this Committee.

[*Interprétation*]

M. Thoms: La province de Terre-Neuve.

M. Trudel: Je pose la question parce que vous avez parlé avec insistance des conditions des chemins de fer au Québec, ce qui a éveillé ma curiosité. Je viens de Montréal et je pourrais peut-être vous faire un long exposé, mais ce n'est pas l'objet de ce débat. Nous avons dû subir aussi des réductions dans le service ferroviaire dans une mesure beaucoup plus grande que la totalité de votre réseau ici. Je me demandais si vous commenciez à partir d'une déclaration de fait lors de votre dernière affirmation sur la province de Québec.

M. Thoms: Je vous ai demandé de vous imaginer ce qui arriverait dans la province de Québec si le Canadien-National cessait le service-voyageurs dans le Québec. Si le Québec, demain par exemple, perdait tout le service-voyageurs, c'est de cette situation que je parlais.

Le président: Monsieur Allmand, avec une question complémentaire.

M. Allmand: Savez-vous combien de services-voyageurs ont cessé dans la province de Québec depuis 1960 et combien de milliers de personnes ont été affectées par ces dispositions? Avez-vous vérifié ces données?

M. Thoms: Bien trop, j'en suis sûr; mais j'y pense en tant que notre seul service de voyageurs ici. Il y en a eu beaucoup dans la province de Québec.

M. Allmand: Oui, mais il y en a beaucoup qui ont été discontinués au Québec.

M. Thoms: J'ai lu une question à ce sujet dans le *Hansard* et je pense qu'il n'y en a eu qu'une à Terre-Neuve, mais sans doute beaucoup plus dans le Québec.

Le président: Monsieur Perrault?

M. Perrault: Monsieur le président, je voudrais faire des commentaires supplémentaires. Je crois qu'il est malheureux qu'il y ait eu cette allusion défavorable à l'endroit de l'une de nos provinces. Je ne viens pas de la province de Québec, mais permettez-moi de dire monsieur le président que j'ai le plus grand respect pour mes collègues du Québec. Je suis persuadé qu'ils ont toujours porté et qu'ils continueront à porter des jugements objectifs lorsqu'il s'agit du service des voyageurs, qu'il s'agisse de la province de Terre-Neuve ou de Québec. Je mets en doute l'opportunité d'inclure ce genre de déclaration dans une soumission devant ce Comité.

[*Text*]

Mr. Thoms: Mr. Chairman, that is his opinion. It is not mine.

Mr. Perrault: It is not based on fact.

The Chairman: Mr. Trudel?

Mr. Trudel: I will be very brief, Mr. Chairman.

Mr. Perrault: We are not trying to play province against province. We are here to analyse your problems, sir—and, I think, with an open mind.

I would, however, like to leave with you this thought, that the problems that you are experiencing now we have had to live with for some time, and I think they are possibly of greater magnitude than you possibly are aware of. We are concerned with the people, as well, but we can also bear with your problem. I would like to have an open mind on this and not try to play one province against the other, because that will not get us anywhere.

Some hon. Members: Hear, hear.

The Chairman: Mr. Skoberg, on a supplementary.

Mr. Skoberg: Mr. Thoms, are you concerned here in Newfoundland with the complete elimination of rail service or with the curtailment of certain rail traffic, such as has happened in Quebec, or any other province in Canada?

Let us put the record straight here. A few remarks were made a while ago by the hon. member opposite, which I think were completely uncalled for. The point is whether you are concerned with complete elimination, or curtailment? Would you answer that please?

Mr. Thoms: I am concerned here with the complete elimination of our train passenger service. I think that will be disastrous for the province. We are a new part of Canada. I think it is a violation of the Terms of Union, but obviously that is something that somebody could decide about.

I think the Canadian National is taking from us something that they never really owned. For example, if I sent you, in some part of Saskatchewan, from point A to point B in a taxi, you would not dare sell that taxi on the way, would you? We gave the Newfoundland Railway to the Federal government of Canada and they passed it to CN to operate and maintain. And that is all—to operate and maintain, not to abandon. It is my opinion,

[*Interpretation*]

M. Thoms: Monsieur le président, c'est son opinion, pas la mienne.

M. Perrault: Cela n'est pas fondé sur les faits.

Le président: Monsieur Trudel?

M. Trudel: Je serai très bref, monsieur le président.

M. Perrault: Nous n'essayons pas de faire jouer une province contre l'autre. Nous sommes ici pour analyser vos problèmes et de le faire avec l'esprit ouvert. Mais je voudrais tout simplement vous dire que les problèmes auxquels vous faites face à l'heure actuelle nous les avons eus depuis quelque temps, et je crois qu'ils sont peut-être beaucoup plus grands que vous ne le pensez. Nous nous préoccupons aussi des gens, mais nous pouvons aussi nous occuper de votre problème. J'aimerais avoir l'esprit ouvert à ce sujet et non pas essayer de favoriser une province au détriment de l'autre, car cela ne nous amènera nulle part.

Des voix: Bravo.

Le président: Monsieur Skoberg, une question complémentaire.

M. Skoberg: Monsieur Thoms, vous préoccupez-vous ici à Terre-Neuve de l'abandon complet du service ferroviaire ou de la diminution d'un certain trafic ferroviaire, comme cela s'est produit au Québec, ou dans toute autre province. Mettons les choses au clair. Un honorable député d'en face a fait des remarques il y a quelques minutes et qui, à mon avis, étaient loin d'être nécessaires. La question est de savoir si vous vous préoccupez de la suppression complète ou de la diminution. Pourriez-vous me donner une réponse?

M. Thoms: Je me préoccupe de l'abandon complet de notre service des voyageurs. Je crois que ce serait désastreux pour la province. Nous sommes la plus récente province du Canada. Je crois que c'est une violation des conditions de l'union, mais là évidemment quelque chose dont quelqu'un devrait décider.

Je pense que le Canadien National nous enlève quelque chose qui n'a jamais vraiment été sa propriété. Par exemple, si je vous envoyais en Saskatchewan, du point A au point B, en taxi, vous n'oseriez jamais vendre le taxi en route, n'est-ce pas? Nous avons donné le *Newfoundland Railway* au gouvernement du Canada et ils l'ont confié au CN pour qu'il exploite. C'est tout: exploitation et entretien, pas abandon. Ils n'ont pas le droit

[*Texte*]

and the opinion of many others, that they have no business abandoning the train passenger service in this province.

The Chairman: Mr. Trudel?

Mr. Trudel: My last remarks related merely to the reference that you make in the last portion of your statement, sir. And you have repeated in your answer to this gentleman here the point that we should be considering.

The premise of your presentation, sir, I do not disagree with, and I have an open mind and I am willing to consider it. But the point I made specifically to you was that your comparison would place us in a very unfavorable position from which to judge your presentation if we have to consider that aspect of it foremost.

The Chairman: Mr. Carter?

Mr. Carter: Mr. Chairman, Mr. Thoms made reference a moment ago to the discontinuation of two coastal boats—I think they were the *Baccalieu* and the *Burgeo*—and Mr. Abbott pointed out that seamen on these boats were getting $200 a month.

What has happened to the crews from the ships that have been taken off the run? Have they been paid off?

Mr. Abbott: We have a seniority roster on these ships whereby the senior people may exercise their seniority over junior people on other ships. There are 14 or 15 ships. The senior people, of course, will move into the other ships, but down the line there are going to be people who will be out of work. They say that on these two ships it represents 150 people; and within the past year a third ship, the *Northern Ranger,* has been taken out of the service.

Mr. Carter: Yes; but some crew members from these two ships will be placed on...

Mr. Abbott: No; this has no connection whatsoever with the chartered boats, and this is what we object to. We believe that if the railways have to hire chartered boats they should do so on what we call a bare-bottom charter; that is, hire the ship itself and place the railway employees on it. This would take care of quite a number of the crew of the *Baccalieu* and the *Burgeo.* I have taken this up with the railways and they have given me the sort of curt reply that that is difficult.

Mr. Carter: How many crew members would be affected by this?

Mr. Abbott: There are roughly 150 on the two ships.

[*Interprétation*]

d'abandonner le service-passagers. C'est mon avis et celui de bien d'autres.

Le président: Monsieur Trudel?

M. Trudel: Mes dernières observations avaient trait simplement à l'allusion que vous faites dans la dernière partie de votre déclaration, monsieur. Et vous avez répété dans votre réponse au monsieur ici la question que nous devrions étudier. Je ne suis pas contre le principe qui est à la base de votre présentation, et j'ai l'esprit ouvert et je suis prêt à l'étudier. Mais je vous ai précisé que votre comparaison nous placerait dans une situation très défavorable pour pouvoir juger de votre présentation, si nous devons considérer cet aspect tout d'abord.

Le président: Monsieur Carter?

M. Carter: Monsieur le président, monsieur Thoms a parlé, il y a quelques minutes, de la discontinuation de deux caboteurs, le *Baccalieu* et le *Burgeo,* je crois, et monsieur Abbott a signalé que les marins de ces navires recevaient $200 par mois. Qu'est-il arrivé aux équipages des navires qui ont été retirés? Ont-ils été payés?

M. Abbott: Nous avons une liste d'ancienneté sur les navires selon laquelle les plus anciens peuvent exercer leur ancienneté sur les nouveaux, sur les autres navires. Il y a 14 ou 15 navires. Évidemment, les anciens iront sur les autres navires, mais au bas de l'échelle, il y aura des gens au chômage. On dit que cela représente environ 150 personnes sur ces deux navires et au cours de l'an dernier un troisième, le *Northern Ranger,* a été retiré du service.

M. Carter: Oui, mais certains membres de l'équipage de ces deux navires seront placés—

M. Abbott: Non, cela n'a aucun rapport avec les navires nolisés et c'est à cela que nous nous opposons. Nous estimons que si les chemins de fer doivent affréter des navires, ils devraient le faire sur un navire dans lequel ils placeraient les employés du chemin de fer. Cela règlerait le cas d'un grand nombre de marins du *Baccalieu* et du *Burgeo.* J'en ai saisi le chemin de fer et il m'a dit que c'est difficile.

M. Carter: Combien de marins seraient touchés par cela?

M. Abbott: Environ 150 sur les deux navires.

[*Text*]

Mr. Carter: And how many of these have been relocated in other jobs?

Mr. Abbott: This is what we are developing now. They have to find out, and we have to develop it. All the senior people will certainly be, but somewhere down the line the junior people will be out of work.

Mr. Carter: Mr. Chairman, Mr. Thoms and other witnesses mentioned that 200 people would be unemployed as a result of the abandonment of the passenger rail service. These are people who are directly employed by the CNR, but how many people are indirectly deriving their living, or part of their living, from the rail passenger service? Do you have any figures on the people who do the laundry and repair the linen, and this sort of thing, and do the food-catering end of it?

Mr. Thoms: I have no figures on them, no.

Mr. Carter: But there are 200 people directly affected by it and who will be directly unemployed?

Mr. Thoms: That is right. For instance, Canadian National said in a letter to their employees on July 12, 1968: "127 full time and 57 seasonal". Anybody can surmise that these are conservative figures, for sure.

Mr. Carter: With a small "c" or a large "C"?

Mr. Thoms: A small "c" of course. But roughly 200 will be out of jobs. We really cannot say what effect it will have, but it certainly will have an effect on an awful lot of other people whom we cannot locate.

The Chairman: A supplementary question, from Mr. Trudel.

Mr. Trudel: To follow up Mr. Carter's line of questioning, Mr. Abbott, are any of your members serving on these chartered boats?

Mr. Abbott: No. The railway may put one purser on just to look after the checking of the cargo; and usually this is what happens. But the other members of the crew are placed there by the person who owns the ship.

Mr. Trudel: Could the deckhands, sir, and the other members of the crew belong to your union?

Mr. Abbott: They could, but they are very difficult to organize. Usually they are owner-operated and involve just a small number of

[*Interpretation*]

M. Carter: Combien ont été réintégrés dans d'autres emplois?

M. Abbott: C'est ce que nous sommes en train de développer. Ils doivent trouver, et nous devons le développer. Tous les plus anciens le seront certainement, mais au bas de l'échelle, les moins anciens seront sans travail.

M. Carter: Monsieur Thoms et d'autres témoins ont mentionné qu'il y aurait 200 personnes en chômage à la suite de l'abandon du service voyageurs. Ce sont des gens qui sont directement à l'emploi du CNR mais combien gagnent indirectement leur vie ou une partie de leur vie à partir du service des voyageurs? Avez-vous des chiffres sur ceux qui sont dans le domaine de l'alimentation, des buanderies, les pourvoyeurs, etc.?

M. Thoms: Non.

M. Carter: Mais il y a 200 personnes directement touchées et qui seront directement en chômage?

M. Thoms: C'est exact. Par exemple, le Canadien-National a dit dans une lettre du 12 juillet 1968 adressée aux employés: «127 à plein temps et 57 employés saisonniers.» On peut donc supposer qu'il s'agit de chiffres «conservateurs».

M. Carter: Avec un «C» majuscule ou minuscule?

M. Thoms: Minuscule, évidemment. Mais environ 200 seront en chômage. Nous ne pouvons pas déterminer les répercussions, mais cela touchera certainement un grand nombre de gens que nous ne pouvons repérer.

Le président: Une question supplémentaire de M. Trudel.

M. Trudel: Monsieur Abbott, après les questions de M. Carter, est-ce que vous avez de vos membres qui travaillent dans ces navires?

M. Abbott: Non; le chemin de fer pourrait peut-être y mettre simplement un commissaire pour la cargaison, et c'est généralement ce qui se produit. Mais les autres membres de l'équipage sont placés là par le propriétaire du navire.

M. Trudel: Est-ce que les matelots de pont et les autres membres de l'équipage pourraient faire partie de votre syndicat?

M. Abbott: Oui, mais d'habitude il est très difficile de les syndiquer. En général, ces bateaux sont exploités par leur propriétaire

[*Texte*]

people. They usually get fired before we can organize them.

Mr. Trudel: Thank you.

The Chairman: Mr. Carter?

Mr. Carter: Mr. Chairman, I have just one or two brief questions. Somebody mentioned this morning that during the Christmas period there were 700 passengers moved on the passenger trains at one time, such as students coming and going, and so on.

Can Mr. Thoms tell the Committee how many buses the CNR have and if they would be able to handle that volume of traffic when the occasion rises again, as it undoubtedly will?

Mr. Thoms: I will pass this to Mr. Butt. He is in a better position to know than I am.

Mr. Butt: I am not aware of the exact number of buses. I understand it is around 20. Of course, they would not be all located for instance, at St. John's, for that number to leave St. John's.

It is my opiniion that they would not be able to handle 700 people with the number of buses currently in service.

Mr. Carter: Can Mr. Thoms tell the Committee, Mr. Chairman, how often this situation arises that there are this number of passengers? Does it happen, say, four or five times a year, or just at Christmas time?

Mr. Thoms: I would have to say, mainly, yes; at Christmas, and when the university closes, and so on; on special occasions, yes.

Mr. Carter: Mr. Chairman, I have one further question. I understand that a company, a subsidiary of Canadian National, has made an application to obtain a franchise to truck freight across Newfoundland. I wonder if, in Mr. Thoms' opinion, this is the first step to completely take up tracks and do away eventually with the freight service which you now have.

Mr. Thoms: As far as I know, it is a supplementary service. I may just a well inform you now, of course, that our Brotherhood now represents the drivers of the CNR trucks, so naturally we are in favour of at least this sort of service. It is a supplementary service rather than a service that will take over.

Mr. Carter: Do you think that with the abandonment of these two coastal boats and

[*Interprétation*]

et il n'y a qu'un petit nombre de personnes. On les congédie d'habitude avant que nous puissions les organiser.

M. Trudel: Merci.

Le président: Monsieur Carter?

M. Carter: Monsieur le président, j'ai une ou deux brèves questions. Quelqu'un a mentionné ce matin que pendant la saison de Noël, il y avait eu 700 voyageurs transportés sur les trains à un moment donné, par exemple des étudiants etc. Est-ce que M. Thoms pourrait dire combien d'autobus le CNR possède et est-ce qu'il aurait pu suffire à ce volume de trafic si la situation se présentait, et il est certain qu'elle se présentera?

M. Thoms: Monsieur Butt serait peut-être plus à même de répondre à cette question que moi.

M. Butt: Je ne connais pas le nombre exact d'autobus, mais j'ai l'impression qu'il s'agit de 20. Évidemment, ils ne seraient pas tous situés à Saint-Jean, par exemple, pour quitter la ville. A mon avis, ils ne pourraient pas répondre aux demandes de 700 personnes avec le nombre d'autobus actuellement en service.

M. Carter: Monsieur Thoms pourrait-il dire au comité combien de fois il y a ce nombre de passagers? Cela arrive-t-il 3, 4 ou 5 fois par année ou seulement à Noël?

M. Thoms: Principalement à Noël et à la fin des cours universitaires et autres occasions spéciales.

M. Carter: Monsieur le président, une dernière question. J'ai cru comprendre qu'une filiale du National-Canadien a fait une demande pour obtenir un permis d'exploitation pour le camionnage à Terre-Neuve. Je me demande si, de l'avis de monsieur Thoms, c'est le premier pas pour éliminer les voies ferrées et, éventuellement, le service des marchandises que vous avez actuellement.

M. Thoms: Autant que je le sache, il s'agit d'un service supplémentaire. Je ferais aussi bien d'ajouter que notre syndicat représente les chauffeurs de camions du National-Canadien et que, par conséquent nous sommes pour le moins en faveur d'un tel service. C'est un service supplémentaire plutôt qu'un service destiné à remplacer l'autre.

M. Carter: Croyez-vous que l'abandon des deux caboteurs et le nolisement des deux

[*Text*]

the charter of these other two, this is the beginning of the end for the coastal boat service?

Mr. Thoms: In my opinion, it is, yes.

The Chairman: Mr. Allmand.

Mr. Allmand: Mr. Thoms, you said that approximately 200 workers will lose their jobs. Are these workers under the jurisdiction of your unions represented here this afternoon or are those 200 included under the unions that were here this morning? This morning we had running trades, and I think mechanics and so forth. How many men under your unions will lose their jobs?

Mr. Thoms: Directly, for instance, I believe there are 50 on the seniority roster of the sleeping and dining cars that I represent. The remainder would come under the TCU jurisdiction.

Mr. Allmand: What is the TCU?

Mr. Thoms: Transportation Communications Employees Union. Mr. Cook represents them. And the balance would be under the Labour Council that presented a brief here this morning.

Mr. Allmand: The union men who were here this morning said that the men who were in their unions had been offered some alternative employment, either driving the buses or maintaining the buses as mechanics. Have the men in your unions represented here this afternoon been offered any alternative employment?

Mr. Thoms: Well, some, yes, but the qualifications for a bus driver are so high that most of our people cannot really qualify because if they are 45 years of age or over, they cannot become bus drivers. They need a certain academic qualification also, which many of them do not have. We do not have very many. I do not know exactly what the figure is, but it is not noticeable.

Mr. Allmand: What about the other unions? Were any of their men offered alternative employment on these new jobs?

Mr. Butt: Yes, some of them were.

Mr. Allmand: With respect to seniority also, the question was asked this morning whether these men who will be laid off will have the right to claim jobs in other parts of the railway here in Newfoundland or even on

[*Interpretation*]

autres signifient le début de la fin du service des caboteurs.

M. Thoms: A mon sens, oui.

Le président: Monsieur Allmand.

M. Allmand: Monsieur Thoms, vous avez dit qu'environ 200 personnes allaient perdre leur emploi. S'agit-il de travailleurs qui relèvent de la compétence de votre syndicat représenté ici cet après-midi, ou est-ce que ces 200 comprend aussi les travailleurs qui relèvent des autres syndicats ici ce matin? Ce matin, nous avions le personnel itinérant de même que les mécaniciens, je crois. Combien de membres de vos syndicats perdront leur emploi?

M. Thoms: Directement, par exemple, je crois qu'il y en a 50 sur la liste d'ancienneté des services des wagons-lits et des wagons-restaurants que je représente. Les autres relèveraient du syndicat des télécommunications et des transports.

M. Allmand: Quel est ce syndicat?

M. Thoms: Le syndicat des employés des transports et des télécommunications. C'est M. Cook qui le représente. Tous les autres relèveraient du Conseil des syndicats ferroviaires qui a présenté un mémoire ce matin.

M. Allmand: Les représentants de syndicats qui étaient ici ce matin nous ont dit que leurs hommes avaient reçu une offre d'un autre emploi, soit en conduisant les autobus, soit pour l'entretien des autobus à titre de mécaniciens. Est-ce que les membres de notre syndicat, représenté ici cet après-midi, ont reçu des offres d'un autre emploi?

M. Thoms: Certains, oui, mais les qualifications exigées sont telles pour devenir chauffeur d'autobus que la plupart de nos hommes ne peuvent pas se qualifier. S'ils ont 45 ans ou plus, ils ne peuvent pas être chauffeurs d'autobus. Ils ont aussi un besoin d'un certain niveau d'éducation et beaucoup de nos membres ne l'ont pas. Nous n'en avons pas trop, je ne connais pas les chiffres exacts, mais il n'est pas très élevé.

M. Allmand: Qu'en est-il pour les autres syndicats. Est-ce qu'ils ont reçu des offres pour un autre emploi à ces postes?

M. Butt: Certains ont reçu une offre, oui.

M. Allmand: Quant à l'ancienneté, on a demandé ce matin aussi, si les hommes qui seront mis en disponibilité auront le droit de demander un emploi pour le chemin de fer ailleurs à Terre-Neuve ou sur le continent.

[*Texte*]

the mainland. Are your seniority districts limited to Newfoundland?

Mr. Thoms: The members I represent are restricted to an agreement under which, if they get laid off, they cannot go anywhere other than to the unemployment insurance office.

Mr. Allmand: What about the other unions?

Mr. Butt: The same would apply to ours.

Mr. Allmand: You said in your remarks that Newfoundland was being used as a guinea pig in that this was the first province to be deprived of a passenger rail service. Are you not aware that on Prince Edward Island they have no passenger train except only a mixed train which goes from Charlottetown to the ferry. It is a short distance, but they have no passenger train as such. Would you be satisfied with a mixed train here in Newfoundland?

Mr. Thoms: No, I would not. I think we should have a train passenger service that is as near mainland standards as possible. This can be achieved if Canadian National wants to put their backs to the wheel.

Mr. Allmand: You say in your brief here that you are the only province . . .

Mr. Thoms: Without a train passenger service.

Mr. Allmand: Yes.

Mr. Thoms: And I think that is essentially correct.

Mr. Allmand: You would count passenger service as a mixed train?

Mr. Thoms: Yes, I would say so.

Mr. Allmand: You already have, I see, some other mixed trains in Newfoundland. You have a mixed train to Argentia, and to Bonavista, I see, and to Carbonear. What kind of service do people on these passenger cars, on those mixed trains, get?

Mr. Thoms: As far as I know, the one to Argentia is only a part of a caboose. That is the only passenger service available there. There is no passenger train service as such. It is a mixed train.

Mr. Allmand: It is a mixed train like the one in P.E.I., I believe.

[*Interprétation*]

Est-ce que vos districts d'ancienneté se limitent à Terre-Neuve?

M. Thoms: Les membres que je représente sont limités à une entente en vertu de laquelle, s'ils sont mis en disponibilité, ils ne peuvent aller ailleurs qu'à l'assurance-chômage.

M. Allmand: Et qu'en est-il des autres syndicats?

M. Butt: La même chose s'applique pour nos membres.

M. Allmand: Vous avez dit dans vos remarques que Terre-Neuve servait de cobaye en ce sens qu'elle était la première province privée d'un service de voyageurs. Ne savez-vous pas que l'Île-du-Prince-Édouard n'a pas de service de voyageurs comme tel, si ce n'est un train mixte qui va de Charlottetown jusqu'au traversier. Il s'agit d'une très courte distance, il n'y a pas de service de voyageurs comme tel. Seriez-vous satisfait de ce genre de train ici à Terre-Neuve?

M. Thoms: Non, je crois que nous devrions avoir un service de trains de voyageurs qui soit aussi semblable que possible à celui du continent. C'est possible si le National-Canadien veut vraiment se mettre à la tâche.

M. Allmand: Dans votre mémoire, vous prétendez être la seule province . . .

M. Thoms: Sans un service de trains de voyageurs.

M. Allmand: Oui.

M. Thoms: Et je crois qu'essentiellement c'est vrai.

M. Allmand: Selon vous, les trains mixtes constituent-ils un service de voyageurs?

M. Thoms: Oui, je crois.

M. Allmand: Je vois que vous avez déjà d'autres trains mixtes à Terre-Neuve. Il y en a un pour Argentia, un pour Bonavista, et un autre pour Carbonear, jusqu'à Carbonear. Quel genre de service les gens ont-ils sur les wagons de passagers de ces trains mixtes.

M. Thoms: Autant que je sache, celui qui va à Argentia ne comprend qu'une section du dernier wagon, c'est tout. Le train ne comporte pas de wagons de passagers comme tels. C'est un train mixte.

M. Allmand: Oui, mais c'est un train mixte comme celui de l'Île-du-Prince-Édouard, je crois.

[*Text*]

Mr. Thoms: Yes. If you wanted to go to St. John's from Argentia, how would you go? You leave Argentia—at what time?

Mr. Butt: At seven o'clock in the morning, and it gets to Bonavista at 11.20. It is very slow. It is very bad service.

Mr. Thoms: It is not a train passenger service.

The Chairman: Mr. Rose has a supplementary question.

Mr. Rose: I want to refer to something you said earlier, Mr. Thoms, and that is that you said you represent the drivers of the supplementary service of the CNR, the trucks. Do you have any trouble getting qualified recruits to drive those trucks?

Mr. Thoms: The Brotherhood does not hire, as you probably know. The railway, I would say, has had problems, yes.

Mr. Rose: It has been suggested to me that some private truck operators have difficulty in getting adequately trained and satisfactory recruits from this part of the country for this sort of long-distance freight hauling. Would you agree with that?

Mr. Thoms: I do not think so. I think truck drivers in this province are on about the same proportion as they would be in any other part of Canada. The only reason that I would see that a privately owned trucking service may not be able to recruit drivers at will would be on account of the wages or working conditions.

Mr. Rose: You are not suggesting that someone could be imported from another Maritime or Atlantic province at a lower wage than perhaps would be acceptable here for the same work.

Mr. Thoms: I do not think so, no.

Mr. Rose: Thank you.

Mr. Nesbitt: I do not know which one of the three witnesses this question should be directed to, but they can best decide among themselves. There have been allegations made by others at our hearings that there has been some attempt by the Canadian National Railway, deliberately or accidentally as the case may be, to downgrade the railway service and the passenger trains, or whatever they are called, that go across Newfoundland. I was wondering if this is your view, or the view of any of the witnesses, and if so, for what reason?

[*Interpretation*]

M. Thoms: Et si vous voulez vous rendre à St. John's d'Argentia, comment ferez-vous? Vous partirez d'Argentia à quelle heure?

M. Butt: Vous quittez à 7 heures du matin. Le trains rentre à Bonavista à 11 heures vingt. Il est très lent. Le service est médiocre.

M. Thoms: Ce n'est pas un service de voyageurs.

Le président: Monsieur Rose a une question supplémentaire.

M. Rose: Il s'agit de quelque chose que vous avez dit tout à l'heure, Monsieur Thoms. Vous avez dit que vous représentez les chauffeurs du service supplémentaire des camions du CN. Éprouvez-vous des difficultés à trouver des recrues qualifiées pour chauffer les camions?

M. Thoms: Comme vous le savez probablement, notre fraternité n'engage pas les chauffeurs. Le chemin de fer a eu certaines difficultés, oui.

M. Rose: On m'a dit que certains exploitants de camions privés avaient de la difficulté à trouver des hommes compétents dans ce coin du pays pour ce genre de camionnage à longue distance. Êtes-vous du même avis?

M. Thoms: Non, je ne le crois pas. Nous avons à peu près autant de chauffeurs de camions ici que n'importe où au Canada toute proportion gardée. La seule raison qui, selon moi, pourrait empêcher une exploitation privée de trouver facilement des chauffeurs serait les salaires ou les conditions de travail.

M. Rose: Vous ne prétendez pas qu'on pourrait faire venir quelqu'un d'une autre province à un salaire inférieur à celui qui serait acceptable ici pour le même travail?

M. Thoms: Non, je ne crois pas.

M. Rose: Merci.

M. Nesbitt: Je ne sais pas à qui adresser ma question, parmi, les trois témoins, mais ils pourront choisir eux-mêmes. Certains ont laissé entendre au cours des audiences que le National-Canadien avait tenté, délibérément ou accidentellement, quel que soit le cas, de réduire le service ferroviaire et les trains de voyageurs, quelle que soit leur appellation, qui traversent Terre-Neuve. Je me demandais si c'était votre avis ou l'avis d'un témoin et, si oui, pourquoi?

[*Texte*]

Mr. Thoms: I believe I have given you one example. If I have not, I will give you one—the train that used to leave St. John's and get into Corner Brook at 4 o'clock in the morning. The railway used to have a Corner Brook car which they would set out on the siding. And if you went into Corner Brook you would sleep in the car until 8 o'clock in the morning. Automatically, somebody in CN decided that this was not good, so rather than take the car on for Corner Brook, they would have you get up at 3 o'clock so that you could get off at 4 o'clock in Corner Brook.

Nobody in their right mind anyway would leave St. John's at a certain hour expecting to get off in Corner Brook at 3 or 4 o'clock in the morning. We brought this to the attention of the Canadian National management, and we did not get any consideration whatsoever. Automatically, this throws everybody wanting to go to Corner Brook by train to a plane or a car or some other way.

The condition of the cars left much to be desired, as far as deterioration goes. I believe I mentioned in my brief that car washing seemed to be a lost art. For instance, on many occasions that I travelled on trains you could get your clothes dirty from dirty windows, dirty seats, and things like this. It certainly was not the employees' fault, because if they hired the employees to clean the cars they would have to clean them or they would be fired. The dining car service, for instance—I am not sure if this was by accident or design—was brought down to a level that probably mainlanders may enjoy, but certainly we in Newfoundland do not, and that is this refrigerated-type meal. Most Newfoundlanders—at least I am one of them anyway—want three square meals a day, and fish on Fridays and fish on Wednesdays and probably fish and brewis for breakfast, and things like that. This left our trains. The linen left our trains. And, of course, for the average Newfoundlander travelling public who was apparently going to do all his travelling on the train, he was being deprived of something which he should have had in this way. Probably a tin of soup is all right for somebody who is used to it, "up along" as we say. But it is not food that we are used to, and therefore we do not like this kind of service.

Mr. Nesbitt: Thank you. Have any of the other gentlemen something additional to add?

Mr. Butt: I have one thing that I would like to add, and that is the speed of the trains. I know from personal experience that very often we have had a train leave Port aux Basques three to four hours late and arrive at

[*Interprétation*]

M. Thoms: Je pense vous avoir donné un exemple. Sinon, je vais vous en donner un. Le train qui autrefois quittait Saint-Jean et arrivait à Corner Brook à 4 heures du matin. On avait autrefois un wagon pour Corner Brook qu'on mettait sur une voie d'évitement, et vous pouviez dormir jusqu'à 8 heures du matin, là dans le wagon, une fois à Corner Brook. Quelqu'un, à un moment donné, au CN a décidé que cela n'allait pas et alors, plutôt que d'avoir un wagon à destination de Corner Brook, on vous faisait lever à 3 heures du matin pour que vous puissiez quitter le train à Corner Brook à 4 heures.

Personne ne quitterait Saint-Jean en s'attendant justement d'arriver à Corner Brook à 3 heures ou 4 heures du matin, à moins d'être fou. Nous avons attiré l'attention du CN à ce sujet, mais nous n'avons eu aucune considération ou attention particulière. Tous ceux qui vont à Corner Brook optent évidemment pour l'avion ou l'automobile.

La condition des wagons laisse à désirer, quant à la détérioration. J'ai mentionné, dans mon mémoire, qu'on semblait ne plus laver les wagons. Dans plusieurs trains à bord desquels j'ai voyagé, les gens salissaient leurs vêtements en raison des sièges sales, des fenêtre sales et le reste. Mais ce n'était certainement pas la faute des employés car s'ils étaient engagés pour laver les wagons, ils devaient le faire ou bien se voir mettre à la porte. En ce qui concerne la voiture-restaurant, je ne sais si c'était à dessein ou non, il n'y avait que des repas réfrigérés. Les continentaux les aiment peut-être, mais la plupart des Terre-Neuviens, et je suis du nombre veulent trois bons repas par jour, du poisson le vendredi, du poisson le mercredi et probablement du poisson ainsi que du potage pour déjeuner. Il n'y a plus de linge non plus. On ne trouve plus cela dans nos trains. Et bien sûr, le public moyen de Terre-Neuve, qui voyage toujours en train, estime ainsi être lésé de quelque chose qui lui est dû. Une soupe en boîte est sans doute assez bonne pour quelqu'un qui y est habitué «sur le pouce», comme on dit. Mais ce n'est pas le genre de repas auquel nous sommes habitués et nous n'aimons donc pas ce genre de service.

M. Nesbitt: Merci. Quelqu'un d'autre a-t-il quelque chose à ajouter?

M. Butt: J'aimerais ajouter quelque chose, il s'agit de la vitesse des trains. Je sais, d'après mon expérience personnelle, que très souvent, il est arrivé qu'un train parte de Port-aux-Basques avec un retard de 3 ou 4

[*Text*]

St. John's on time. Or vice versa, leave St. John's late and arrive at Port aux Basques on time. That is an example of the speed that can be maintained.

Mr. McGrath: Mr. Chairman, most of my questions have already been asked, but I would like to make an observation. I do not know where Mr. Thoms got the impression that everybody was asleep on that bus last night. On the bus that I travelled on there was no way for a person to sleep.

Mr. Thoms: I did not say everybody was asleep.

Mr. McGrath: Well, you created the impression that we were sleeping on the bus last night. I make the point that you could not sleep on the bus I was on, and I am not going to go into the reasons.

Mr. Thoms, you seem to be sensitive in certain areas. I have no objection to our train being called the "Bullet", if that will help our cause, or will help capture the imagination across Canada. I do not think many Newfoundlanders object to it being called the "Bullet", but that is not my point.

The question I want to ask is this. As the labour union very directly involved in abandonment, did you initiate appeal proceedings against this decision, bearing in mind that you would be able to call upon the facilities of the CLC in this regard, their research facilities in Ottawa?

Mr. Thoms: I commenced appeal procedures internally, within my own Brotherhood, and from our legal counsel in Ottawa it was pointed out to us, of course, that the 30-day time-limit had expired, and therefore there was nothing they could do about it. I have appealed to every member of Parliament who I thought could help, and I have written letters to the leaders of every political party in Parliament that could help, asking that the Canadian Transport Commission decision be rescinded. I received letters back from all political parties saying that they were sympathetic towards us and would do everything possible.

And the Prime Minister of Canada, through his secretary, Mr. William G. Morris, on November 8, 1968, sent this to me:

> Further to our letter of October 22nd, we have received further information in this connection.

[*Interpretation*]

heures, et arrive à Saint-Jean à l'heure. Ou, inversement, qu'il parte de Saint-Jean en retard et arrive à Port-aux-Basques à l'heure. C'est un exemple de la vitesse que l'on peut maintenir.

M. McGrath: Monsieur le président, la plupart de mes questions ont déjà été posées, mais je voudrais faire une observation. Je ne sais pas où M. Thoms a pris que tout le monde dormait, hier soir, dans l'autobus. Dans l'autobus que j'ai pris, il n'y avait pas moyen de dormir.

M. Thoms: Je n'ai pas dit que tout le monde dormait.

M. McGrath: Non, mais vous avez tout de même laissé entendre que nous dormions hier soir dans l'autobus. Je vous fais remarquer qu'il n'y avait pas moyen de dormir dans l'autobus où j'étais, et je ne vais pas commencer à en donner les raisons.

Monsieur Thoms, vous semblez être sensible sur certaines questions. Je n'ai aucune objection à ce que l'on appelle notre train le «*Bullet*», si cela peut servir notre cause ou aider à accrocher l'imagination des Canadiens. Je ne pense pas que beaucoup de Terre-neuviens s'opposent à cette appellation, mais là n'est pas la question.

Voici la question que je veux vous poser. A titre de syndicat très directement mêlé à cette question de l'abandon du service ferroviaire, est-ce que vous avez entamé une procédure d'appel contre cette décision, en vous rappelant que vous pourriez profiter des services de recherche du Congrès du travail du Canada, à Ottawa, à cet égard?

M. Thoms: J'ai entamé une procédure d'appel au sein de ma propre fraternité, et notre conseiller juridique à Ottawa nous a fait remarquer, bien sûr, que le délai de 30 jours avait été dépassé, et qu'on ne pouvait donc rien y faire. J'ai fait appel à tous les députés que j'estimais pouvoir nous aider, et j'ai écrit au chef de chaque parti politique au Parlement qui pouvait nous aider, leur demandant de faire annuler la décision de la Commission canadienne des transports. J'ai reçu en réponse des lettres de tous les partis politiques dans lesquelles ils nous disaient qu'ils sympathisaient avec notre cause et feraient tout leur possible.

Et le premier ministre du Canada m'a envoyé, par l'intermédiaire de son secrétaire M. William G. Morris, la lettre suivante en date du 8 novembre 1968:

> Faisant suite à votre lettre du 22 octobre, nous vous informons que nous avons reçu des renseignements complémentaires à cet égard.

[*Texte*]

As you probably know by now, there is in fact no application before the Canadian Transport Commission in this connection since the Commission made a decision several months ago.

Now, just listen to these few words.

Unfortunately, this decision is not one that government could have the Commission change.

Mr. McGrath: Who wrote that letter?

Mr. Thoms: William G. Morris, Secretary. You can have a copy if you want to.

The Prime Minister does not feel that he should comment on your suggestion that taking the train passenger service away is a violation of the Terms of Union."

And you may have a copy if you want it.

Mr. McGrath: For a point of clarification, Mr. Chairman. It has been pointed out to me that the appeal referred to by you is under Subsection (2), Section 53, of the Railway Act where the appeal is made on a point of law and there the 30-day factor comes into effect. But under Subsection (1) of Section 53 there is no time factor involved. An appeal can be made at any time to the Governor in Council.

Mr. Thoms: Which I did, and look at the answer.

Mr. McGrath: No, but as I understand it, this is not what I would consider a formal appeal or formal appeal proceeding. Correct me if I am wrong.

Mr. Morris, in his letter to you, says that the decision cannot be changed, and he underlines that, and of course this is at variance with what has been pointed out to me in the Act. The point of my questioning was that it would seem to me that with the very extensive research facilities I am surprised that the learned people you have at CLC in Ottawa did not point this out to you. I do not say that facetiously because time is running out on us. It seems to me that this Committee is the only chance we have now, unless a formal appeal is initiated before April 15.

Mr. Thoms: As far as an appeal is concerned, if I write to the Prime Minister of

[*Interprétation*]

Comme vous le savez probablement maintenant, aucune demande à cet égard n'a été présentée à la Commission canadienne des transports depuis que le Commission a annoncé sa décision, il y a plusieurs mois de cela.

Et écoutez bien les quelques mots qui suivent:

Malheureusement, ce n'est pas là une décision que le gouvernement pourrait amener la Commission à modifier.

M. MacGrath: Qui a écrit cette lettre?

M. Thoms: Le secrétaire, M. William G. Morris. Vous pouvez en avoir un exemplaire, si vous voulez.

Le premier ministre n'estime pas devoir formuler de commentaire au sujet de vos observations, soit, que l'annulation du service de voyageurs des chemins de fer constitue une violation des conditions de l'Union.

Vous pouvez en avoir un exemplaire si vous le désirez?

M. McGrath: Un éclaircissement, monsieur le président. On m'a signalé que l'appel dont vous parlez est prévu au paragraphe (2) de l'article 53 de la Loi sur les chemins de fer, selon lequel on peut en appeler sur une question juridique, et là, le délai de 30 jours est applicable. Mais aux termes du paragraphe (1) de l'article 53, le facteur temps n'entre pas en ligne de compte. On peut en appeler n'importe quand auprès du gouverneur en conseil.

M. Thoms: C'est ce que j'ai fait, et voyez la réponse.

M. McGrath: Non, mais d'après ce que je crois comprendre ce n'est pas là ce que je considérerais comme une procédure en appel en bonne et due forme. Que l'on me corrige si je me trompe.

Dans la lettre qu'il vous a envoyée, M. Morris dit que la décision ne peut être modifiée, et il insiste bien sur ce fait; or, cela n'est évidemment pas conforme aux dispositions de la Loi que l'on m'a signalées. La raison pour laquelle j'ai posé cette question c'est qu'il me semble qu'avec les vastes services de recherche, il est surprenant que les spécialistes que vous avez à la CTC, à Ottawa, je suis étonné qu'ils ne vous l'aient pas signalé. Je ne dis pas cela facétieusement, car, le temps nous manque. Je pense que ce Comité est la seule chance que nous ayons maintenant, à moins qu'un appel en bonne et due forme soit présenté avant le 15 avril.

M. Thoms: Pour ce qui est de l'appel, vous écrivez au premier ministre du Canada, vous

[*Text*]

Canada and ask him to do something about it, is this not an appeal? The underlining, by the way, is mine.

The Chairman: Yes, that is important.

Mr. Thomas (Moncton): I have a supplementary question. I am dumbfounded now; I have asked this two or three times. I asked Mr. Pickersgill in the Transport Committee meeting and I have asked here two or three times and we have been told that this decision can be reversed by the Governor in Council. Now, here is a letter from the Prime Minister's office saying it cannot be reversed.

Mr. McGrath: With great respect, though, that is probably just the opinion of a secretary.

The Chairman: I believe to make it clear I should get the letter that Mr. Thoms said he sent to the Prime Minister to find out what was in the letter, resulting in their reply.

Mr. Thomas (Moncton): My supplementary question is this, and I have asked it six times in various places: How can this decision be reversed? To whom do you appeal to have this decision reversed? I have been told three different things.

Mr. Allmand: On a point of order, Mr. Chairman. While we were in Parliament a few years ago, if you remember, when the *Dominion* was discontinued by the Board of Transport Commissioners an appeal was made under this section, I believe, and it was put on by the Governor in Council for the summer. It was reintroduced, so the Governor in Council did reverse the decision of the old Board of Transport Commissioners. My understanding from all the hearings we had last year is that that type of appeal still exists but it has to be made in a formal way; you just do not write a letter to the Prime Minister.

Mr. Thomas (Moncton): You said it can be reversed.

Mr. Allmand: There is something wrong with the letter.

Mr. McGrath: Mr. Chairman, the letter is a very short one. Would the witness read it into the evidence for us?

Mr. Thoms: I just did it.

[*Interpretation*]

lui demandez de faire quelque chose à cet égard, n'est-ce pas là un appel? En passant, c'est moi qui ai souligné ce passage.

Le président: Çà c'est important, oui.

M. Thomas (Moncton): Je voudrais poser une question supplémentaire, je suis à présent confondu; j'ai demandé cela deux ou trois fois. J'ai demandé à M. Pickersgill, au Comité des transports, au cours d'une réunion, et j'ai posé la question ici deux ou trois fois et on nous a dit que cette décision peut être renversée par le gouverneur en conseil. Voilà une lettre du Cabinet du premier ministre disant qu'on ne peut renverser cette décision.

M. McGrath: En toute déférence, c'est sans doute l'avis d'un secrétaire.

Le président: Il nous faudra obtenir la lettre que monsieur Thoms a envoyée au premier ministre, afin de voir ce qu'il en était et de comparer les deux.

M. Thomas (Moncton): Voici ma question supplémentaire. Je l'ai déjà posée six fois à différents endroits: Comment cette décision peut-elles être renversée? A qui présentez-vous un appel pour renverser cette décision? On m'a dit trois choses différentes.

M. Allmand: J'en appelle au Règlement, monsieur le président. Pendant que nous étions au Parlement, il y a quelques années, lorsque le Dominion a été discontinué par la Commission des transports du Canada, un appel a été rejeté, en vertu de cet article, je crois, ce fut renvoyé par le gouverneur en conseil pour l'été. Il fut présenté de nouveau, et le gouverneur en conseil a renversé la décision de l'ancienne Commission des transports du Canada. Si je comprends bien, à la suite de toutes les audiences que nous avons eues l'année dernière, ce genre d'appel existe toujours, mais il faut interjeter appel en bonne et due forme, et non pas simplement en écrivant au premier ministre.

M. Thomas (Moncton): Vous avez dit qu'elle peut être renversée.

M. Allmand: Il y a une chose qui ne va pas avec la lettre.

M. McGrath: Monsieur le président, le témoin pourrait-il faire lecture de cette lettre laquelle est très brève? Consignez-là au compte rendu.

M. Thoms: Je viens de le faire.

[*Texte*]

Mr. McGrath: I am sorry, I was looking up that Act when you did. Would you read the pertinent part again?

Mr. Thoms:

Unfortunately this decision is not one that the Government could have the Commission change.

Mr. Allmand: I submit to you that he does not know what he is talking about.

An hon. Member: I do too. I have a supplementary...

The Chairman: Order! order! Are you through, Mr. McGrath? Mr. Rock, on a supplementary.

Mr. Rock: He has read into the record those phrases or that paragraph, but I do not believe the witness had read the letter that he sent to the Prime Minister. I do not think this is fair. We do not know what his request was to the Prime Minister.

Mr. Thoms: I do not have it here.

Mr. Rock: I do not think that is fair at all. We do not know...

Mr. Skoberg: I would like to ask you a direct question, Mr. Thoms. Was it your opinion when you directed your communication to the Prime Minister that this, in effect, was then directed to the Governor in Council, and did you consider this would initiate an appeal to the Governor in Council?

Mr. Thoms: In my...

The Chairman: Mr. Skoberg, I do not think you should put words in the mouth of this gentleman.

Mr. Skoberg: Could we please have an answer? I think it is perfectly all right. I have heard a lot of questions around here today that certainly have been putting words in people's mouths, and I believe the question is quite simple, Mr. Chairman.

Mr. Thoms: In my opinion, when I write the Prime Minister of Canada I am writing to the Government of Canada.

The Chairman: Mr. Allmand?

Mr. Allmand: You say you consulted with your headquarters in Ottawa—your trade union headquarters—the Canadian Labour Congress, I believe. Did you not say you consulted with your lawyers in Ottawa?

Mr. Thoms: I said I consulted internally with my Brotherhood and we had a legal opinion.

[*Interprétation*]

M. McGrath: Je m'excuse je regardais la loi pendant que vous le faisiez. Voudriez-vous relire la partie pertinente?

M. Thoms:

Malheureusement cette décision n'en est pas une que le gouvernement pourrait faire changer par la Commission.

M. Allmand: Je vous dirais qu'il ne sait pas du tout ce dont il parle.

Une voix: J'ai la même impression. J'ai une question supplémentaire...

Le président: A l'ordre. Avez-vous terminé Monsieur McGrath? Monsieur Rock, sur une question supplémentaire.

M. Rock: Le témoin a versé au compte rendu ces phrases, cet alinéa, je ne crois pas qu'il ait donné lecture de la lettre qu'il a fait parvenir au premier ministre. Ce n'est pas juste. On en sait pas ce qu'il a demandé au premier ministre.

M. Thoms: Je n'ai pas cette lettre ici.

M. Rock: Je ne crois pas que ce soit juste. On ne sait pas du tout quelle fut sa demande.

M. Skoberg: Je voudrais poser une question directe, monsieur Thoms. Lorsque vous avez écrit au premier ministre, étiez-vous d'avis que cela était une procédure d'appel auprès du gouverneur en conseil?

M. Thoms: A mon...

Le président: Monsieur Skoberg, vous ne devez pas lui prêter des paroles.

M. Skoberg: Pourrions-nous avoir une réponse? Je pense que c'est parfaitement dans l'ordre. Bien des questions de ce même genre aujourd'hui ont été posées. C'est une question très simple, monsieur le président.

M. Thoms: A mon avis, lorsque j'écris au premier ministre du Canada, j'écris au gouvernement du Canada.

Le président: Monsieur Allmand?

M. Allmand: Vous dites que vous avez consulté votre siège social, soit le Conseil du travail du Canada à Ottawa? N'avez-vous pas dit que vous aviez consulté vos avocats à Ottawa?

M. Thoms: J'ai dit que j'ai pris une consultation interne auprès de ma fraternité. Nous avons reçu une opinion juridique.

[*Text*]

Mr. Allmand: You had a legal opinion and. .

Mr. Thoms: The 30-day time limit had expired and therefore we could not actually appeal.

Mr. Allmand: I suggest you reconsult with other attorneys.

The Chairman: Are you finished, Mr. McGrath?

Mr. McGrath: I have no further questions.

The Chairman: Mr. Breau?

Mr. Breau: Mr. Chairman, I would like to ask a question of the witness. Forgetting the comparison between the train and a bus service, have you compared the transportation service between the Atlantic Provinces? For example, have you compared the service that Newfoundland will get it they have a bus service with New Brunswick, Nova Scotia and PEI?

Mr. Thoms: I am not familiar enough with PEI, New Brunswick and Nova Scotia but probably Mr. Abbott would be better able to answer you.

Mr. Abbott: I think there is a much more varied passenger service in New Brunswick, PEI and Nova Scotia than there is in Newfoundland. In Newfoundland, of course, you have one direct line of communication and certainly it does not compare at all with the other provinces.

Mr. Breau: Have you checked the schedules in New Brunswick?

Mr. Abbott: I live there; I live in New Brunswick.

Mr. Breau: I live there too. Do you know there is no bus service from Edmundston to Campbellton at all? There is no subsidized transportation. There is not even transportation at all in the northern part of the province.

Mr. Abbott: They have run one of their trains up through Edmundston a couple of years. .

Mr. Breau: Not from Edmundston to Campbellton.

Mr. Abbott: No, to Pacific Junction.

The Chairman: I have just asked the gentleman here for a copy of his letter that he

[*Interpretation*]

M. Allmand: Vous avez reçu un avis juridique, et. . .

M. Thoms: Le délai de trente jours était écoulé, par conséquent nous ne pouvions donc interjeter appel.

M. Allmand: Je vous proposerais de consulter d'autres avocats.

Le président: Avez-vous terminé? Monsieur McGrath?

M. McGrath: Je n'ai pas d'autres questions.

Le président: Monsieur Breau?

M. Breau: Monsieur le président, je voudrais poser une question au témoin. Oublions la comparaison entre le train de l'autobus pour le moment. Avez-vous comparé les services de transport entre les provinces de l'Atlantique? Par exemple, avez-vous fait une comparaison entre le service que Terre-Neuve obtiendra, si elle a un service d'autobus, avec celui de l'Île-du-Prince-Édouard, de la Nouvelle-Écosse et du Nouveau-Brunswick?

M. Thoms: Je ne connais pas suffisamment l'Île-du-Prince-Édouard, le Nouveau-Brunswick et la Nouvelle-Écosse, mais j'imagine que M. Abbott serait plus en mesure de vous répondre.

M. Abbott: Je pense qu'il y a beaucoup plus de services voyageurs variés dans ces trois provinces qu'à Terre-Neuve. Vous n'avez qu'une ligne directe de communication et cela ne se compare pas du tout avec les autres provinces.

M. Breau: Vous avez vérifié les horaires au Nouveau-Brunswick?

M. Abbott: J'habite là.

M. Breau: J'y habite également. Vous savez qu'il n'y a pas du tout de service d'autobus d'Edmundston à Campbellton. Il n'y a absolument aucun mode de transport subventionné. Il n'y a même pas de transport du tout dans la partie Nord de la province.

M. Abbott: Il y a quelques années, il y avait un train qui passait par Edmundston.

M. Breau: Pas de Edmundston à Campbellton.

M. Abbott: Non. De Edmundston à Pacific Jonction.

Le président: Je viens de demander au témoin de nous faire parvenir copie de la

[*Texte*]

sent to the Prime Minister so we could have it as an exhibit. Is it agreed?

Some hon. Members: Agreed.

Mr. Rock: This is another line of questioning.

Which should have the priority; the spending of $140 million for re-alignment and grading while still maintaining the narrow gauge; the spending of $225 million to correct to standard gauge and re-align and grade, which would serve the railway users and a great sector of the province, or to spend $244 million to upgrade and pave all the trunk roads, and $150 million for the proposed Labrador route? Which do you think should have the priority? One actually serves the whole province and the other one affects...

Mr. Thoms: Mr. Chairman, it has not been established to our satisfaction that it would cost $140 million to put the Newfoundland railway track in the condition we need it to get a fast service. In our opinion this is just something that they pulled out of the air; they did not substantiate it at the hearing. It was just a figure; if I said $40 million I would be just right in my opinion.

Mr. Rock: When CN gives a figure I think it has been investigated. I do not think they just pull figures from the air.

Mr. Thoms: Well, sit down at a negotiating table with me some time.

Mr. Rock: When it comes to labour negotiations it is very hard to know what they are going to pull out because of the fact that they do not know how far you are going to go.

The Chairman: Mr. Mahoney?

Mr. Mahoney: I have just one question to Mr. Abbott. In the initial instance you associated yourself completely with Mr. Butt's brief. Since I do not have a copy of it I do not know whether the attitude he expressed was contained in the brief or was a pronunciation *ex cathedra*, but in any case do you share his view that this afternoon you are engaged in an exercise in futility before this Committee?

Mr. Abbott: I hope that we are not. I certainly think the Committee has had a purpose and I certainly hope that their recommendations are going to be favourable to us.

[*Interprétation*]

lettre qu'il a fait parvenir au premier ministre pour que nous puissions l'avoir comme pièce à l'appui. Êtes-vous d'accord?

Des voix: D'accord.

M. Rock: Monsieur le président, voici une autre série de questions.

Qu'est-ce qui devrait avoir la priorité? La dépense de 140 millions de dollars pour le réalignement et le remblayage, tout en maintenant l'écartement étroit, la dépense de $225 millions de dollars pour ramener les voies à l'écartement normal et pour réaligner et remblayer, ce qui desservirait les personnes qui utilisent le chemin de fer et tout un secteur de la province, ou la dépense de $244 millions de dollars pour relever et paver toutes les routes principales, et de $150 millions de dollars pour la future route du Labrador. Laquelle de ces dépenses devrait avoir la priorité? L'une dessert en réalité toute la province et l'autre touche...

M. Thoms: Monsieur le président, cela n'a pas été établi à notre satisfaction qu'il en coûterait 140 millions de dollars disons pour mettre la voie ferrée des chemins de fer de Terre-Neuve en état de nous permettre d'avoir un service rapide. A notre avis, ce n'est qu'un chiffre imaginé; ils ne l'ont pas établi au cours de l'audience. Ce n'était qu'un chiffre. Si je disais 40 millions de dollars, je serais aussi juste dans mon opinion.

M. Rock: Lorsque le National-Canadien vous donne un chiffre, il a été vérifié, ce ne sont pas des imaginations.

M. Thoms: Eh bien, venez vous asseoir à la table de négociations une bonne fois et vous verrez.

M. Rock: Mais lorsqu'on en arrive aux négociations de travail c'est très difficile de savoir ce qu'ils vont nous sortir, car eux-mêmes ne savent pas jusqu'où vous irez.

Le président: Monsieur Mahoney?

M. Mahoney: Une simple question que je voudrais poser à M. Abbott. Au début, vous étiez tout à fait d'accord avec le mémoire de M. Butt. Vu que je n'en ai pas copie, je ne sais pas si l'attitude qu'il a formulée se trouvait contenue dans le mémoire où était une déclaration *ex-cathedra*, mais de toute façon, est-ce que vous partagez son point de vue, voulant que, cet après-midi, ce soit un exercice de futilité, devant le présent Comité?

M. Abbott: J'espère que ce ne l'est pas. Je crois que le Comité avait un but et j'espère vraiment que ces recommandations nous seront très favorables.

[*Text*]

Mr. Mahoney: Thank you.

The Chairman: Mr. Carter?

Mr. Carter: Mr. Thoms, did I understand you to say you represent some truck drivers?

Mr. Thoms: Yes, sir; all employed by Canadian National Railways.

Mr. Carter: What is their approximate wage per month?

Mr. Thoms: It all depends on the overtime; it is around $2.80 an hour.

Mr. Carter: Is this for an 8-hour day? The CNR provides relief drivers, is that right?

Mr. Thoms: Relief drivers? You mean two drivers on a truck? No; just one.

Mr. Carter: It is possible for a man to work ten or twelve hours, then.

Mr. Thoms: Quite normal.

Mr. Carter: And they pay time and a half for this.

Mr. Thoms: After 40 hours.

Mr. Carter: After 40 hours? In your item 6 of that brief you say:

> drivers of huge box car type trucks, speeding across Newfoundland without adequate safeguards such as maximum hours of work or relief drivers.

Are these non-union truckers?

Mr. Thoms: A good many of the big box type are non-union, yes.

Mr. Carter: How much do they make per hour?

Mr. Thoms: I really cannot say, sir.

Mr. Carter: Can you give me an idea? Is it $50 a week, or $60 a week, or...

Mr. Thoms: I know some drivers who make $70 to $75 a week.

Mr. Carter: How many hours do they work?

Mr. Thoms: Generally, as required.

Mr. Carter: Is it 15 or 16 hours or what? You know what non-union outfits do. They work you until you die.

[*Interpretation*]

M. Mahoney: Merci.

Le président: Monsieur Carter?

M. Carter: Monsieur Thoms, si je comprends bien vous dites que vous représentez aussi les camionneurs?

M. Thoms: Oui, monsieur; tous à l'emploi du National-Canadien.

M. Carter: Quel est leur salaire mensuel approximatif?

M. Thoms: Tout dépend du surtemps; environ $2.80 l'heure.

M. Carter: Est-ce pour une journée de 8 heures? Et le National-Canadien assure un service de chauffeurs de relève. Est-ce exact?

M. Thoms: Chauffeurs de relève? Vous voulez dire deux chauffeurs dans un camion? Non, seulement un.

M. Carter: Alors, il est possible qu'un homme travaille dix ou douze heures.

M. Thoms: C'est régulier.

M. Carter: C'est temps et demi?

M. Thoms: Après 40 heures.

M. Carter: Après 40 heures? A l'article 6 de votre mémoire, vous dites que les chauffeurs de grand camion-remorque, roulant sur les routes de Terre-Neuve sans la protection d'heures maximums de travail ou de chauffeurs de relève. Est-ce que ce sont des chauffeurs non syndiqués?

M. Thoms: Un grand nombre de chauffeurs de camion-remorque ne sont pas syndiqués.

M. Carter: Combien font-ils l'heure?

M. Thoms: Je ne saurais vous le dire.

M. Carter: Pourriez-vous me donner une idée? Est-ce $50 ou $60 par semaine?

M. Thoms: Je sais que certains font de $70 à $75 par semaine.

M. Carter: Combien d'heures travaillent-ils?

M. Thoms: Règle générale, suivant les exigences.

M. Carter: Est-ce 15 ou 16 heures, ou quoi? Vous savez ce qui arrive parfois dans les entreprises non syndiquées. On les fait travailler jusqu'à épuisement.

[*Texte*]

Mr. Thoms: It could be, depending on the run, yes.

Mr. Carter: Do they supply relief drivers?

Mr. Thoms: No.

Mr. Carter: Thank you very much, sir.

The Chairman: Well gentlemen, this is the end of the questioning period.

Mr. Thoms: For some unknown reason I have had this letter in front of me all the time, the letter to the Hon. P. E. Trudeau. I also sent it to the Hon. Robert Stanfield, the Hon. David Lewis, and the Hon. Réal Caouette.

Honourable Sirs:—

I write requesting your opinion regarding the decision of the Canadian Transport Commission to permit CN to abandon our train-passenger service. Outside of all of the physical arguments, that I'm sure you are familiar with, there is one other argument that has not been settled, and that is as follows.

Article 31 of the Terms of Union, authorizes in part that we, (Newfoundland) passed the Newfoundland Railway to the Government of Canada. The Federal government on April 1, 1949, by Order in Council P.C. 1454, the Governor General in Council entrusted to Canadian National Railways the operation and management of the Newfoundland Railway.

It is my opinion that "operation and management" does not mean abandonment and therefore if such an application was to be presented to the Canadian Transport Commission, it should have been by the Federal Government and not Canadian National Railways. If I am right, the Transport Commission's decision is null and void.

As elected representatives, will each of you give me your expert opinion by return letter.

Meanwhile, may I solicit your help in stopping the disruption of train-passenger service that will end on or before April 1969.

Mr. Rock: Mr. Chairman, there was no actual request that there be an Order in Council for an appeal.

Mr. Thoms: I asked...

Mr. Rock: You did not ask for any appeal.

[*Interprétation*]

M. Thoms: Cela pourrait dépendre du trajet, oui.

M. Carter: Est-ce qu'il y a des chauffeurs de relève?

M. Thoms: Non.

M. Carter: Merci beaucoup, monsieur.

Le président: Messieurs, voici la fin de la période des questions.

M. Thoms: Pour une raison que je ne connais pas, j'avais la lettre devant moi tout le temps. La lettre que j'ai adressée au très honorable P. E. Trudeau. Je l'ai fait parvenir à M. Stanfield, à M. David Lewis et à M. Réal Caouette.

«Messieurs,

Je vous demande votre opinion au sujet de la décision de la Commission canadienne des Transports de permettre au CN d'abandonner notre service voyageurs. En dehors de toutes les discussions matérielles que vous connaissez, j'en suis sûr, il y a un autre argument qui n'a pas encore été réglé, et c'est le suivant: La condition 31, des conditions de l'Union, autorise en partie que nous, de Terre-Neuve, passions le Newfoundland Railway au gouvernement du Canada. Le premier avril 1949, par le décret ministériel C.P. 1454, le gouvernement fédéral et le gouverneur en conseil a confié aux Chemins de fer Nationaux du Canada l'exploitation et la gestion du Newfoundland Railway.

A mon avis, «exploitation et gestion» ne veulent pas dire abandon et, par conséquent, si une telle demande devait être présentée à la Commission canadienne des Transports, cela aurait dû être fait par le gouvernement du Canada et non par les Chemins de fer Nationaux du Canada. Si j'ai raison, la décision de la Commission canadienne des Transports est nulle et sans effet.

Pourriez-vous me donner votre opinion, par le retour du courrier, en votre qualité de représentants élus de la population.

En attendant, est-ce que je pourrais demander votre aide pour empêcher que le service voyageurs cesse en avril 1969.

M. Rock: Monsieur le président, on n'a pas demandé un décret ministériel pour un appel?

M. Thoms: J'ai demandé..

M. Rock: Vous n'avez pas demandé d'appel.

[*Text*]

Mr. Thoms: "...may I solicit your help in stopping..." If they stop the trains, that will satisfy me.

The Chairman: I would like to thank you three gentlemen.

At this time I would like to call upon Mr. Harvey Keats of the City of Corner Brook.

I have the pleasure to have here on my right His Worship the Mayor of Corner Brook, Mr. N. F. Murphy. Mr. Murphy will give a summary of his brief.

Mayor N. F. Murphy (City of Corner Brook): Mr. Chairman, Mr. Minister and members of the Committee, the brief that is presented to you today by the City of Corner Brook is divided into several sections: it deals with the port of the city of Corner Brook; it deals with the over-all growth of the area; it deals with Canadian National Railways and the passenger service; and I have indicated in the last paragraph that there are other aspects which we would like to present and these will concern air and roads.

Every member of the Committee has had a copy of this and if I may I would like to move straight into dealing with these four sections. I have set them out in four sections—sea, road, air and rail.

I would like to start by telling you that I came to this hearing by train and I came because I could not risk coming in any other way. Last week I was on the plane coming from the mainland and everyone was put off at Gander. St. John's was fogged in. I checked yesterday and I found that you could not be sure that the plane would get in last night. In fact it did not; it got in this morning. I did not particularly want to drive myself in in my own car because I did not want to waste the day driving and then having to drive back again. I have been in the bus—I have not travelled on it. I have been in it and I did not fancy a trip on the bus and so I came by train and I must say I was very comfortable and arrived here on the dot of eight o'clock this morning.

If I may start off, there are a number of questions that came up this afternoon and were not answered to my satisfaction, and in the course of my remarks I will try to cover some of these.

First of all I must agree with everything that was presented to you by the Chamber of Commerce of the City of Corner Brook concerning the harbour development and the port facilities. As you will see in the brief that we have presented to you, we feel very strongly about the situation that has devel-

[*Interpretation*]

M. Thoms: ...«est-ce que je pourrais demander votre aide pour empêcher...». S'ils arrêtent les trains, cela me satisfera.

Le président: Je veux vous remercier tous les trois, messieurs. Nous allons demander maintenant à M. Harvey Keats de Corner Brook, de se présenter.

J'ai le plaisir d'avoir à ma droite ici, Son Honneur le maire de Corner Brook, monsieur N. F. Murphy. Monsieur Murphy va nous donner un résumé de son mémoire.

M. le maire N. F. Murphy (Ville de Corner Brook): Monsieur le président, monsieur le ministre, membres du Comité. Le mémoire que vous présente aujourd'hui la ville de Corner Brook est divisé en plusieurs sections et traite du port de la ville de Corner Brook. On y parle aussi de la croissance générale de la région, du National-Canadien et du service voyageurs. J'ai indiqué aussi dans le dernier paragraphe qu'il y avait d'autres aspects que nous voudrions présenter et que ceux-ci auraient trait au service aérien et au service routier.

Chaque membre du comité a reçu une copie de ce mémoire et si vous me le permettez, j'aimerais donc vous parler directement de ces quatre sections, transport maritime, routier, aérien et ferroviaire.

J'aimerais commencer par vous dire que je suis venu en train parce que je ne pouvais risquer le voyage par aucun autre moyen de transport. La semaine dernière, j'étais dans l'avion venant du continent et tout le monde a été retenu à Gander, parce que le brouillard recouvrait St-Jean. J'ai vérifié hier et on ne pouvait pas m'assurer que l'avion atterrirait hier soir. En fait, l'avion est arrivée ce matin. Je ne voulais pas venir moi-même en automobile car je ne voulais pas passer toute une journée pour venir et une autre pour retourner. Je n'ai pas fait le voyage en autobus car j'ai déjà essayé ce moyen de transport et cela ne me tentait pas du tout et alors, je suis venu en train. Et nous sommes arrivés à huit heures juste ce matin, après un voyage très confortable.

Si vous me le permettez, il y a un certain nombre de questions qui ont été soulevées cet après-midi et qui n'ont pas reçu de réponses satisfaisantes à mon sens. Alors, je vais essayer de traiter certaines d'entre elles.

Tout d'abord, je suis tout à fait d'accord avec tout ce qu'a dit la Chambre de commerce de la ville de Corner Brook au sujet du développement du port et des installations portuaires. Comme vous verrez dans le mémoire qui vous a été présenté, nous avons des sentiments très forts au sujet de la situa-

[*Texte*]

oped over the years—the lack of action and the importance now of the fact that before you in the House of Commons in the estimates is $1.1 million for work to commence this year. If the estimates go through, work will commence this year on the harbour development.

I will confirm what the Chamber of Commerce presentation said, that we have had no consultation. We have not been consulted at all. We do not have a plan. We have asked for a plan and we have not received it. I am hoping to get a plan. I must submit we have had the artist's conception of what the ships will look like docking, but this is not a plan or working plan. It is just an artist's conception of a ship docking with a large shed alongside and it does not really mean anything. It does not tell us a thing. I must confirm this.

The question of Bay D'Espoir was brought up. To give you a complete picture of this I must tell you—and I am sure you will be surprised when you hear this; I was when I was told it—that the port of Corner Brook deals with a greater tonnage in 12 months of the year than does the port of St. John's—a greater tonnage goes through the port of Corner Brook than through the port of St. John's.

The concept of Bay D'Espoir is that it is to be a trans-shipment port. This is the way I understood it, and to the port of Bay D'Espoir, if it ever comes into being, will come goods from all parts of the world which will be redistributed. This would be of tremendous value to Canada and it would be of tremendous importance to the province of Newfoundland. Of course we are interested in seeing our province grow and seeing more development take place here. We would support Bay D'Espoir, which would come under the National Harbours Board if it came into being at all.

I equally have not heard of any approach being made to the National Harbours Board to look after the city of Corner Brook.

If I may pass now to the road situation. The road situation throughout the province affects the city of Corner Brook equally as it does every other part. The Trans-Canada Highway is now complete from Port aux Basques to St. John's. It is already obsolete. It is not big enough, wide enough, to take the traffic that is on it at certain times. Certain large transport trucks, buses and so on are hugging the middle of the road, and I can assure you, if you have not travelled on parts of our Trans-Canada Highway, that it is a frightening thing, particularly at night-time, to see the headlights and the identification

[*Interprétation*]

tion qui s'est développée au cours des ans, du manque d'action et de l'importance du fait que les prévisions budgétaires comprennent un montant de 1.1 million pour des travaux qui doivent commencer cette année.

Je vais confirmer ce qui a été dit dans le mémoire de la Chambre de commerce: nous n'avons pas été consultés du tout. Nous n'avons pas de programme, nous l'avons demandé mais ne l'avons pas reçu. Et j'espère que nous l'aurons. Évidemment, j'ai vu des esquisses à quoi ressembleraient les navires et les quais, mais cela ne constitue pas un plan de travail. Ce n'est qu'une esquisse d'un bateau en train d'accoster le long d'un hangar et cela ne veut rien dire. Cela ne nous dit absolument rien. Je dois donc confirmer ce qu'on a dit à cet égard.

La question de Baie d'Espoir a été soulevée aussi. Pour vous donner une idée d'ensemble—et je suis sûr que vous serez surpris de l'entendre, moi-même je l'ai été quand je l'ai appris—le port de Corner Brook doit manutentionner plus de tonnage au cours des douze mois de l'année que celui de St-Jean. Il y a plus de volume de trafic au port de Corner Brook qu'à celui de St-Jean.

Baie d'Espoir constituera un port de transit. C'est ce que j'ai cru comprendre. Et si jamais il y a un port à la Baie d'Espoir, on y verra des marchandises provenant du monde entier qui seront réexpédiées. Cela constituera un très grand avantage pour le Canada et aura beaucoup d'importance pour la province de Terre-Neuve. Évidemment, nous sommes intéressés à voir croître notre province et voir plus d'expansion. Alors, nous serions en faveur du développement du port de Baie d'Espoir qui relèverait de la compétence du Conseil des ports nationaux, si jamais cela se produit.

Je n'ai pas entendu parler d'une demande faite au Conseil des ports nationaux pour s'occuper de la ville de Corner Brook.

Si je puis maintenant passer à la situation des routes à travers la province, qui intéresse aussi la ville de Corner Brook comme partout ailleurs. La route Trans-canadienne est maintenant terminée de Port-aux-Basques à St-Jean. Elle est déjà désuète; elle n'est pas suffisamment large pour répondre à la situation parfois. Certains grands camions, autobus etc. roulent si près du milieu de la route que je puis vous assurer que si vous n'avez pas emprunté certaines parties de notre route Trans-Canadienne, c'est une chose qui vous fait peur, surtout le soir, de voir les phares devant vous et les lumières d'identité de ces

[*Text*]

lights of these trucks coming down the highway at you, possibly at 60 miles an hour, when you do not know how big the thing really is. When it goes by there is a great bang of air and already the Newfoundland government has embarked now on a program of enlarging and bringing up the Trans-Canada Highway to maximum standards.

This will take, I believe, several years, and this in turn must affect us in the city of Corner Brook. At this present moment 12 miles road some 20 miles from Corner Brook—12 miles of road—is torn up and is just a muddy, almost bottomless mess. It is quite a hazard to people who must travel it from one end of the highway to the other.

We have arterial roads—not arterial roads; they are main roads branching off—and there are two that I want to mention in particular. One, if you will look at your maps, is the Great Northern Peninsula road. This is assuming more and more importance to the people living in those areas. The other is the Burin Peninsula. The Burin Peninsula has some 40,000 people there, and at the present moment the only road access has been cut off by the fact that weather conditions and an unpaved road make it almost impossible and impassible.

We are faced now with a situation in the province of Newfoundland where we are getting traffic congestion on our main highways, where it is becoming more important than ever to try and tie in these big highways going to the Great Northern Peninsula and the Burin Peninsula with another going down to the power development area of Bay D'Espoir, which is becoming another important road. We must look to the day in Newfoundland when we must embark on a program of paving these roads. I am sure that no Newfoundlander would disagree with me when I say that we must look to the federal government for assistance in this under one method or another. The Great Northern Peninsula road was built under the Roads to Resources Program.

You have already heard this afternoon evidence given on the fact that this road going up the Great Northern Peninsula is obviating the necessity of the Canadian National Steamships. You have heard this afternoon how the people who are supplied up there would prefer to get their goods by road at a normal time of business during the day. This will apply to other parts of our province as well. The Burin Peninsula is another one and there are others in our province. If all of these roads are to be good all-year-round roads,

[*Interpretation*]

camions qui vous arrivent peut-être à 60 milles à l'heure, alors que vous ne savez pas quelle grosseur ils ont, et lorsqu'ils vous croisent cela crée un gros déplacement d'air. Le gouvernement de Terre-Neuve a maintenant entrepris un programme de réaménagement de la route, afin qu'elle réponde aux normes de la route Trans-Canadienne.

Cela prendra plusieurs années. A notre tour, cela nous touche à Corner Brook. A l'heure actuelle, sur 12 milles de route, à 20 milles de Corner Brook, le pavage est arraché et il ne reste qu'un fouillis vaseaux et sans fond qui constitue un danger pour tous les usagers de la route.

Nous avons de grandes voies de communications et des embranchements. Il y en a deux que je veux mentionner en particulier. Si vous regardez votre carte, vous verrez que l'une est celle de la grande péninsule du Nord. Elle devient de plus en plus importante pour les gens qui y vivent. L'autre est celle de la péninsule de Burin, où se trouve 40,000 personnes et où, à l'heure actuelle, le seul accès par la route a été enlevé en raison du fait que les conditions climatiques et l'absence de pavage rendaient la route absolument impossible et impraticable à l'heure actuelle.

Nous faisons donc face à une situation à Terre-Neuve à l'heure actuelle où nous avons une congestion de la circulation sur nos grands-routes et où il devient de plus en plus important d'essayer de relier toutes ces grands-routes se rendant vers la grande péninsule du Nord et la péninsule de Burin et maintenant, avec celle qui va vers le développement hydro-électrique de Baie d'Espoir, et qui prent de plus en plus d'importance. Nous devons donc prévoir le jour ou il faudra paver ces routes. Je suis sûr qu'aucun terre-neuvien ne niera qu'il faut absolument se tourner vers le gouvernement fédéral pour obtenir de l'aide d'une façon ou d'une autre à cet égard. La route de la grande péninsule du nord a été construite en vertu du programme des routes d'accès aux ressources.

Vous avez déjà entendu cet après-midi les témoignages à l'effet que la route qui se rend dans la péninsule du grand nord élimine la nécessité d'avoir les navires du CN. Cet après-midi, vous avez entendu comment les gens qu'on approvisionne dans ce coin-là préféreraient avoir leurs marchandises par la route aux heures d'affaires normales de la journée. Ceci s'appliquerait également aux autres parties de la province. La péninsule de Burin est un autre exemple. Si l'on veut que toutes ces routes soient praticables en tout

[*Texte*]

particularly if the boats are going to be taken off, they will have to be brought up to a high standard, higher than at present, and they will have to be paved.

I will pass now to air, if I may. I will just say a few words about the situation. This may have been in the brief. I did not see the brief presented by the Chamber of Commerce, but the situation is that of the whole west coast now and Air Canada operating through Stephenville and going both ways—going to St. John's and going to the mainland.

We have two flights a day in each direction: two in the morning and two in the evening. You will be interested in some facts for the travelling businessman. If he wishes to come into St. John's on the morning flight by Air Canada, he must leave his home at about 6.30 in the morning to catch a flight that goes through Stephenville at about eight o'clock. If he is a traveller or businessman living in a hotel he will not get breakfast at 6.30 in the morning. No hotel serves breakfast at that hour of the morning. If he is lucky he can talk someone into making him a cup of tea and if he is smart he has put aside a couple of biscuits to go with it. When he gets on the plane, he takes his place, the plane gets in the air and he says, "Now I am ready for breakfast." The stewardess says, "I am sorry, you have missed breakfast; it was served between Sydney and Stephenville. You can have a cup of coffee or a glass of lemonade or a glass of milk." He does not get anything to eat and he gets into St. John's at about 10.30 or something like that.

If, on the other hand, he is leaving for the mainland, particularly Toronto, he strikes all these flights known as the milk run because they stop everywhere. He leaves home at about 10 o'clock in the morning and gets a flight at about 11.30 out of Stephenville. He gets to Toronto at 5.30 Toronto time which, in fact, is seven o'clock Newfoundland time. He has been travelling now since ten o'clock in the morning until seven at night by his Newfoundland time and he has had, in the course of that, one meal of sandwiches. Once upon a time he used to get a nice regular meal but now he gets a sandwich and he has done nine hours of travelling.

Last year and in previous years it was possible for this same traveller to change planes at Halifax and to catch the jet flight at 12.30, I think, which got him into Toronto in two hours and he was there then at about 1.30 Toronto time, which was three o'clock Newfoundland time. He had actually travelled only about five hours and he got a very nice lunch on the way.

[*Interprétation*]

temps, et surtout si on élimine les navires, il faudra les améliorer et les paver.

Je passerai maintenant au service aérien si vous me le permettez. Je vais dire seulement quelques mots au sujet de la situation. C'est peut-être dans le mémoire. Je n'ai pas vu le mémoire présenté par la Chambre de commerce, mais la situation est la même pour toute la côte de l'ouest et Air Canada va dans les deux, vers Saint-Jean et vers le continent.

Nous avons deux vols chaque jour dans chaque direction; deux le matin et deux le soir. Vous serez intéressés dans certains faits qui touchent l'homme d'affaires qui voyage. S'il veut arriver à Saint-Jean par le vol du matin d'Air Canada, il doit quitter son foyer vers 6h30 du matin afin de prendre l'avion qui passe par Stephenville disons vers 8 heures.

Si c'est un voyageur de commerce ou un homme d'affaires qui vit à l'hôtel, il n'aura pas son petit déjeuner à l'hôtel à 6h30 du matin. Aucun hôtel ne sert le petit déjeuner à cette heure. S'il est chanceux, il pourra peut-être obtenir une tasse de thé et s'il a eu du bon sens, il a mis de côté quelques biscuits le soir à cette fin. Et maintenant, il est en route en avion et il se dit: «Maintenant, je suis prêt à manger» mais l'hôtesse lui dit: «Je regrette mais le petit déjeuner a été servi entre Sydney et Stephenville. Vous pouvez avoir une tasse de café, un verre de limonade ou un verre de lait». Et alors, il n'a rien à manger. Il arrive donc à Saint-Jean vers 10h30.

Si, d'autre part, il se rend sur le continent, surtout à Toronto, il ne tient pas compte de toutes les envolées qu'on appelle «livraison du lait» car elles arrêtent partout. Il quitte son foyer vers 10 heures; il part de Stephenville vers 11h30, il arrive à Toronto à 5h30, heure de Toronto, ce qui, effectivement, est 7 heures du soir, heure de Terre-Neuve. Et alors, il voyage depuis 10 heures du matin jusqu'à 7 heures le soir toujours selon l'heure de Terre-Neuve. Et au cours de cette journée, il a eu un repas de sandwiches. Autrefois, il avait un bon repas régulier mais maintenant, il n'a que des sandwiches. Et il a voyagé pendant neuf heures.

L'an dernier et auparavant, il était possible pour le même voyageur de changer d'avion à Halifax et d'attraper le réacté à 12h30 je crois, ce qui l'amenait à Toronto dans l'espace de deux heures. Et alors, à ce moment-là, il était là vers 1h30, heure de Toronto, soit 3 heures, heure de Terre-Neuve et il n'avait voyagé que cinq heures en réalité et il avait un excellent déjeuner en route.

[*Text*]

Now if we go over to the evening time, the same man who leaves Corner Brook to go to St. John's arrives here in St. John's at 11.15 at night and it is too late to get a meal. He will not get a meal anywhere then and he has not had anything on the plane, but he has probably had a six o'clock meal before he left Corner Brook. On the other hand, when he goes to the mainland he leaves Corner Brook at seven o'clock in the evening, catches the 8.30 flight out of Stephenville and gets into Toronto at 3.30 a.m. Newfoundland time and the stewardess prays that on the way he has been asleep because she has not got a meal to give him at all.

This is a downgrading of the service we used to have. It is not as good as it used to be. There is no direct connection now between Stephenville, Halifax and Toronto. It is my personal opinion that what the west coast needs is a direct flight, and this need only be once a week, from St. John's to Stephenville to Montreal. I hazard a guess that if Air Canada—and this has been suggested to them—would put on one direct flight a week, say on a Monday, going St. John's, Stephenville, Montreal and Toronto, it would be filled and if they would have one direct flight back a week, say on a Friday or a Saturday, going Toronto, Montreal, Stephenville, St. John's, this would be of tremendous value not only to our local residents but to those businessmen visiting.

We are also disturbed at the possibility of regional carriers being introduced and we have heard rumours—and admittedly they are only rumours but I am not the only one who has heard them—of Air Canada now considering operating only from St. John's to Halifax to Montreal to Toronto, leaving regional carriers to take the people to join them either in St. John's or Halifax. Already we have discussed the possibility—and I toss it to you as a thought—of a special weekly flight perhaps that goes Stephenville, St. John's and then the direct flight to Montreal, at no additional cost because it is going to be an additional burden to any businessman who has to come the long way around, but in the long run it might be faster.

We are served also by two other airlines: Eastern Provincial Airways, which go Corner Brook, Gander and St. John's and operate once a day. It is possible for the St. John's businessman to leave St. John's in the morning, get to Corner Brook, have an afternoon's business and catch the evening flight back. And we have one other airline, Newfoundland Air Transit, which does not operate a

[*Interpretation*]

Et maintenant, le même homme qui quitte Corner Brook pour aller à Saint-Jean le soir arrive à Saint-Jean à 11h15 du soir. Il est donc trop tard pour obtenir un repas; il n'en aura nulle part à ce moment-là. Il n'a rien eu sur l'avion. Mais il a probablement eu un repas à 6 heures avant de quitter Corner Brook. D'autre part, lorsqu'il se rend sur le continent, il quitte Corner Brook à 7 heures le soir, attrape l'avion qui quitte Stephenville à 8.30 et arrive à Toronto à 3h30 du matin, heure de Terre-Neuve. L'hôtesse espère qu'il aura dormi en route parce qu'elle n'a rien à lui donner à manger.

Voilà une détérioration du service que nous avions autrefois. Ce n'est plus aussi bon que ce l'était autrefois. Il n'y a plus de correspondance directe maintenant entre Stephenville, Halifax et Toronto. Personnellement, je suis d'avis que ce dont la côte de l'ouest a besoin, c'est d'une envolée directe. Une fois par semaine suffirait, de Saint-Jean à Stephenville à Montréal. Et j'oserais dire que sir Air Canada, et cela leur a été suggéré d'ailleurs, voulait instaurer un vol direct, mettons une fois par semaine le lundi, sur le trajet St-Jean-Stephenville-Montreal-Toronto, l'avion serait complet. Et si on voulait nous donner un vol direct pour revenir, soit le vendredi ou le samedi, Toronto-Montréal-Stephenville-St-Jean, cela aiderait énormément non seulement nos résidants à nous mais les hommes d'affaires qui nous visitent.

Nous nous préoccupons aussi de la possibilité d'introduction de transporteurs régionaux. Nous avons entendu des rumeurs et évidemment, ce ne sont que des rumeurs mais je ne suis pas le seul à les avoir entendues, selon lesquelles Air Canada envisage maintenant la possibilité de faire parcours Saint-Jean-Halifax-Montréal-Toronto, laissant ainsi aux transporteurs régionaux le soin d'amener les passagers à St-Jean ou à Halifax. Nous avons déjà discuté de la possibilité d'avoir un vol spécial hebdomadaire de Stephenville-Saint-Jean et ensuite le vol direct à Montréal sans coût additionnel parce que ce serait un fardeau additionnel pour tout homme d'affaires qui doit faire ce grand détour. Mais à la longue, ce serait peut-être plus rapide.

Nous sommes aussi desservis par deux autres lignes aériennes, *Eastern Provincial Airways* qui va à Corner Brook, Gander et Saint-Jean, une fois par jour. Les hommes d'affaires de St-Jean peuvent quitter St-Jean le matin, se rendre à Corner Brook faire leurs affaires l'après-midi et reprendre l'avion du soir. Il y a aussi la *Newfoundland Air Transit* qui n'a pas de vol à horaire fixe, mais dont

[*Texte*]

schedule, but its headquarters are quite close to Corner Brook and it is a charter line basically.

I move on, if I may, to the railway service. I was a little surprised that this afternoon I heard somebody express annoyance, if I can use that word, that anyone would refer to our railroad as the Newfie Bullet.

Let me tell you that we are very proud and very fond of our railway. It has been with us for a very long time—some 80 years—and while we enjoy the jokes about our railway, we are not too fussy when other people tell these jokes. Perhaps the misunderstanding this afternoon was based only on the fact that somebody might look down on our railway.

At no time have any of us been opposed to the bus service—this is my presentation now—but we are bitterly opposed to the discontinuance of the passenger train service. I am disappointed that the Committee today has not had the opportunity to visit North Sydney and Port aux Basques, to travel on the ferry and to spend 22 hours on the train travelling from either St. John's to Port aux Basques or Port aux Basques to St. John's. For those of you who have not had the opportunity, you may now never get it. I sincerely hope this will not be the case and that you can come back at some other time and enjoy the trip.

I am sorry not only that you did not have the opportunity to enjoy this trip, but you did not have the opportunity to talk to the people who work on the railway. What I am going to tell you this afternoon comes from me and I neither work on the railway nor spend my time on the railway, but I have, in the past six months, taken it upon myself to talk to a large number of men who work on the railway in various capacities and I have been astonished at the information they have given me.

Admittedly you are getting it secondhand from me and the only way you can get this information is to go to these people yourselves, sit down with them and talk to them. Perhaps they would not talk to you, I do not know. Maybe they would be scared to say what they really think for fear of losing their jobs.

However, I think it is fair to tell that there has been a great upgrading in the Newfoundland railway at Port aux Basques. They are capable on the railway now of handling a lot more freight and a lot more passengers at Port aux Basques than they could 20 years ago.

[*Interprétation*]

le bureau d'administration est près de Corner Brook. C'est essentiellement une entreprise d'affrètement.

Maintenant, passons au service ferroviaire. J'ai été un peu étonné, cet après-midi, d'entendre quelqu'un se déclarer ennuyé, si l'on veut bien me permettre cette expression, que l'on appelle notre train de «Newfie Bullet.»

Nous sommes très fiers, très amoureux de notre chemin de fer, lequel existe depuis fort longtemps, soit 80 années; nous-mêmes, nous aimons bien rigoler au sujet de notre chemin de fer, alors cela nous importe peu que les autres en fassent autant. Le malentendu qui a pris naissance cet après-midi vient peut-être du fait que quelqu'un pourrait mépriser notre chemin de fer.

Jamais l'un d'entre nous ne s'est-il opposé au service d'autobus, je tiens à le souligner, mais nous sommes fermement contre l'abolition du service-voyageurs. Je suis déçu de voir que le comité n'ait pas eu l'occasion de visiter North Sydney et Port-aux-Basques, de prendre le transbordeur et de passer 22 heures à bord du train pour aller de Saint-Jean à Port-aux-Basques ou réciproquement. Pour ceux d'entre vous qui n'ont jamais fait ce trajet par train, l'occasion ne se présentera peut-être plus jamais. J'espère bien qu'il n'en sera pas ainsi que vous pourrez revenir à un autre moment et avoir la chance de le faire.

Je regrette non seulement qu'on ne vous a pas donné l'occasion de prendre le train, mais aussi que vous n'ayez pu parler à ceux qui travaillent à bord de celui-ci. Ce que je vais vous dire, cet après-midi, à titre personnel, n'étant pas employé des chemins de fer, ni un fréquent usager de ceux-ci, découle de mes nombreuses conversations, ces six derniers mois, avec un bon nombre des divers employés du chemin de fer. J'ai été étonné des renseignements qu'ils m'ont fournis.

Je reconnais que cela devient da bouche à bouche maintenant, mais la seule façon de vous en assurer, c'est de rencontrer ces gens vous-mêmes et de leur parler. Peut-être ne vous diront-ils rien, qui sait? Peut-être craindraient-ils de dire le fond de leur pensée et de s'exposer à perdre leur emploi.

Quoi qu'il en soit, il est bon de vous dire qu'à Port-aux-Basques, on a grandement amélioré le service ferroviaire, lequel peut désormais manutentionner beaucoup plus de marchandises et transporter beaucoup plus de voyageurs qu'il y a vingt ans.

[*Text*]

It is interesting to note that while they have upgraded it at Port aux Basques, while they have introduced facilities at Argentia to handle freight and to handle passenger cars and passengers, over the last 80 years there has been very little in the way of upgrading the speed of the railway. I have some old timetables that go back many many years and I was interested to see that 50 years ago it took 27 hours to go from St. John's to Port aux Basques, in 1933 they brought that down from 27 to 25½ and today it is down to 22 hours. Yet, and I tell you this with the full confidence that the information that has been given to me is correct, when the President of the CNR came here recently he was taken across in just over 17 hours.

An hon. Member: Non-stop?

Mr. Murphy: No, not non-stop. They stopped at the odd few places. They did not stop for much more than a "hellow, how are you," but they did not stop to load and unload freight. There would have been time to put off the mail—express mail—just like that, but I am informed by railroaders that if the railway wanted to it could put a train across every day in 18 hours without any trouble at all.

I can give you some figures which will interest you on this, I am sure. Let me tell you that at one section of our railway, which is nine miles long, it takes the train—the express—49 minutes. It does not take them 49 minutes because of the grade, it takes them 49 minutes because the schedule says not to do it faster than that. I am talking now, of course, about a deliberate attempt on the part of the CNR to downgrade itself so that it then can get out of business.

There are a number of things that could be brought up at this point. I would sooner that you went and talked to the railway men yourselves. I do not expect perfection, but I noticed last night that the sheets on my bed had holes in them—it is just one of those things. I noticed a lot of other things, too. I noticed, for instance, that the white slip on the back of the seat was not white and I was told—now, this is quite correct—"We have been told not to change them after each trip; they have got to last longer than that". Is this economy or is this downgrading?

I notice the menu has changed. We were very proud of our menu on our trains and people came from all parts of Newfoundland to get a good meal on the railway. This has changed now and the fare is very simple. In fact now, according to CNR standards, they do not serve breakfast because the train is

[*Interpretation*]

Chose intéressante, alors que l'on a amélioré le service à Port-aux-Basques et aménagé des installations à Argentia pour le transport des marchandises et des voyageurs, on a fait à peu près rien, deluis 80 ans, pour accroître la vitesse du trajet. J'ai chez moi de vieux horaires qui remontent bien loin dans le passé; ainsi, il y a 50 ans, il fallait 27 heures pour se rendre de Saint-Jean à Port-aux-Basques; en 1933; il en fallait 25½, et aujourd'hui, le trajet prend 22 heures. Pourtant—et je vous le dis avec l'entière certitude que ce renseignement qu'on m'a fourni est exact—lorsque le président du National-Canadien est venu ici récemment, on lui a fait faire le parcours en 17 heures.

Une voix: Sans escale?

M. Murphy: Non. Le train s'est arrêté ici et là, mais seulement pour quelques instants, le temps d'une poignée de main ou deux, mais pour prendre ou décharger des marchandises. On aurait eu le temps de décharger le courrier et les messageries. Les cheminots me disent que si l'on voulait, on pourrait s'assurer sans aucun mal que le trajet quotidien prenne au plus 18 heures.

Je vous donnerai des chiffres qui seront de nature à vous intéresser, j'en suis sûr. Sur un tronçon qui a neuf milles de longueur, le train prend 49 minutes, non pas à cause de la pente, mais simplement parce que l'horaire est fait ainsi. Il est interdit d'aller plus vite. Voilà ce qui me semble, de la part du National-Canadien, une tentative délibérée pour abaisser la qualité du service, afin d'être poussé à l'abolir.

Il y a un certain nombre de choses qu'on pourrait signaler dès maintenant, mais je préférerais que vous vous entreteniez vous-mêmes avec les cheminots. Je ne m'attends pas à la perfection, mais j'ai pu constater hier soir que les draps sur mon lit étaient troués. C'est peu, mais j'ai observé bien d'autres choses aussi, comme la propreté douteuse de la couverture blanche sur le dos du siège. On nous a dit—je vous le jure—qu'il était interdit de la changer après chaque voyage, parce qu'elle devait durer plus longtemps que cela. Est-ce par souci d'économie ou simplement une baisse dans la qualité du service?

J'ai aussi remarqué qu'on avait modifié le menu. Nous pouvions nous enorgueillir jadis des repas qu'on servait à bord de nos trains; d'ailleurs, les gens venaient de partout pour prendre un bon repas dans le train. Aujourd'hui, tout est changé; les repas sont très simples. En fait, suivant les directives du Natio-

[*Texte*]

due to arrive at St. John's at 8 o'clock. On any passenger train in Canada in the CNR system, they tell me, that arrives before 8 o'clock or at 8 o'clock there is only a continental breakfast—although I must say I was very grateful for that.

I do not want you to get the impression, though, that it has been downgraded to the point that our railway is now a Toonerville Prairie line, it is not. Some of the equipment is first class.

I looked at the sleeping cars last night and they are modern cars; I think they are post-war cars. Certainly we have some pre-war cars still in use, but of the ones I looked at last night some of them were post-war and very good and they had one private car on which was an old one, but as a private car, it was fine. I think there is no argument about this. I have talked to many men and there is no doubt in their minds from the instructions they have been given that it has been a two-pronged attack, one is economy and the other is "We do not care, let it go at that and we can talk our way out of it".

The CNR has done something which I feel badly about. They keep talking about the loss the CNR has sustained in Canada last year as being $36 million. They talked about the loss in Newfoundland as being $1 million. I suggest to you that this word is wrong.

It is not a loss. In fact, the cost of services in Newfoundland has only been $1 million and if you look at it in that light, I will astonish you by telling you that we have ferry service between North Sydney and Port aux Basques; we have passenger and freight services on the railway; we have a coastal steamship service and it only cost $1 million to give us all this. If you can tell me where you will get a bargain like that anywhere else in the world, then I will be astonished in turn.

I must tie this in with the CBC announcement by the President of the CBC who was here on Thursday—two days ago—and talked to the Rotary club in st. John's. He quoted a figure of $150 million as being the cost of services of the CBC throughout Canada.

He used the word "cost" not "loss" because this is a service that every Canadian is entitled to. So I maintain that the cost of the Newfoundland railway is only the service we are entitled to and if you work it out it comes to $2 a head per year for every Newfoundlander which is not bad.

[*Interprétation*]

nal-Canadien, le petit déjeuner n'est pas servi à bord, étant donné que le train arrive à Saint-Jean à 8 heures du matin. Ailleurs au Canada, sur le réseau du National-Canadien, jusqu'à huit heures, me dit-on, un petit déjeuner continental est offert aux voyageurs; pour ma part, j'en serais fort aise.

Je ne voudrais pas vous donner à entendre que le service s'est détérioré en tous points. Non, car l'équipement est de premier ordre, dans certains cas.

J'ai jeté un coup d'œil sur les wagons-lits hier soir, ils sont modernes, je pense qu'ils remontent à l'après-guerre. On se sert aussi de wagons plus anciens, bien sûr, mais de ceux que j'ai vus hier soir, certains ont été construits après la guerre et sont en excellent état. Il y avait, en particulier, un wagon privé, assez vieux, mais bien conservé. Je pense donc qu'aucun doute n'existe à ce sujet. Pour tous ces gens à qui j'ai parlé, il est bien évident, à la lumière des directives qu'ils ont reçues, qu'on a voulu, d'abord, faire des économies, mais aussi qu'on s'en moque, que les critiques vont bon leur train quand même.

Sous un aspect, le National-Canadien s'est mal comporté, à mon sens. Il ne cesse de répéter que ses pertes l'an dernier au Canada ont atteint 36 millions de dollars, et à Terre-Neuve même un million. Pour moi, perte n'est pas le terme juste.

Il ne s'agit pas d'une perte, en l'occurrence. Les frais réels d'exploitation à Terre-Neuve ont totalisé seulement un million de dollars. Si l'on n'envisage que ce seul aspect, je vous étonnerai en vous disant que nous comptons un service de transbordement entre North Sydney et Port-aux-Basques, des trains pour voyageurs et marchandises, un service côtier, et il nous en coûte qu'un million de dollars pour tout cela. Si vous pouvez me dire où l'on peut trouver mieux ailleurs, alors je serais vraiment étonné.

Je dois rappeler la déclaration faite par le président de la Société Radio-Canada qui, jeudi dernier, a pris la parole devant le *Rotary Club*, à Saint-Jean. Il a mentionné le chiffre de 150 millions de dollars comme étant le coût des services de la société Radio-Canada au pays.

Il a dit coût, non pas perte, parce que c'est un service auquel ont droit tous les Canadiens. C'est pourquoi je maintiens que le chemin de fer de Terre-Neuve n'est que le service auquel nous avons droit, service qui revient annuellement à $2 par tête d'habitant. Ce n'est pas si mal.

[*Text*]

I now would like to talk about the train-bus figures. I am sorry I was not here to hear the figures that were given you, but I heard them on radio and I have seen them in the newspapers. The CNR is trying to tell us now that the figures for bus passengers were up. Let me tell you that there are only three trains a week operating in each direction, but there are four or five buses daily in each direction.

Let me tell you that many people are taking the bus for short journeys, but not for long journeys. Let me tell you that when you put the figures in this light, you will find that at this time of year—now, in February—there are not too many people travelling and it has always been thus. In the wintertime in Newfoundland you could always travel without any difficulty by train and get a berth, but now the railway is using these figures to tell us what a tremendous improvement there will be in passenger travel once the buses have been offered to them. I disagree.

I think also that the facilities offered in the buses, as you know after having travelled in the buses, are very different. While one could travel on a bus for a short distance and put up with it, it is a bit cramped and I think it would be very difficult for a mother and three children travelling from St. John's to Port aux Basques if the only means of travel were the bus.

I think it is extremely difficult for people with disabilities, people who are sick or people perhaps in plaster casts as there is nothing at all laid out for these people. I think the bus service is fine, but I think it has to be backed up now with a passenger service which must never be allowed to disappear.

You wll be interested in a follow-up on my statement that I came in by train because of the fog. I should tell you now that the Supreme Court of Newfoundland is presently on circuit and had to go to its first port of call, Grand Falls, by train to meet its schedule because the airlines could not move and you could not drive because of the fog. I happened to meet the Justice who was in charge of the Supreme Court and he was telling me that he had to go by train. The Supreme Court would not have got to Grand Falls to start its circuit but for the fact that the railway was there.

Here is another interesting thing. On the tables at lunch today you saw this advertisement for the buses, put out by the CNR which they have not done for railways over the years. I could talk about the cost figures because the CNR has never gone into the cost

[*Interpretation*]

Je voudrais parler maintenant du train-autobus. Je regrette d'avoir été absent lorsqu'on vous a fourni les données pertinentes. Je les ai vues dans les journaux, je les ai entendues à la radio. Le National-Canadien nous donne à entendre que le nombre des passagers d'autobus a augmenté. Or, il n'y a que trois trains par semaine dans chaque direction contre quatre ou cinq autobus par jour.

En outre, une bon nombre de gens prennent l'autobus pour de courts trajets et le train pour de longs trajets. Lorsque l'on envisage les chiffres dans cette perspective, on s'aperçoit qu'à cette époque de l'année, en février, peu de gens voyagent, et il en fut toujours ainsi. A l'hiver, à Terre-Neuve, il est toujours possible de voyager sans difficulté par train et d'obtenir une place; maintenant, le chemin de fer nous sort des chiffres pour démontrer que l'autobus entraînera une augmentation sensible du nombre de voyageurs. Je ne suis pas d'accord.

Je pense de même que les installations à bord des autobus, comme vous le savez vous-mêmes après avoir utilisé ce mode de transport, sont loin d'être aussi convenables. Alors qu'un court trajet en autobus s'endure assez bien, malgré tout, il n'y a pas tellement d'espace. A ce compte-là, il serait très difficile pour une mère et ses trois enfants de se rendre de Saint-Jean à Port-aux-Bacques s'il n'y a qu'un seul moyen de transport, l'autobus.

Ce le serait aussi pour les gens invalides, infirmes, avec un membre dans le plâtre, etc., car il n'y a rien de prévu pour accommoder ces gens. Je pense bien que le service d'autobus est excellent, mais qu'il faut le compléter par un service-voyageurs qui ne devrait jamais disparaître.

Soit dit en passant, permettez-moi d'ajouter que je suis venu en train à cause du brouillard. Or, en ce moment, les juges de la Cour suprême de Terre-Neuve, dont la première escale dans leur tournée est à Grand Falls, ont dû prendre le train, vu le mauvais temps. Par pure coïncidence, j'ai rencontré le juge en chef qui m'a dit que force lui était de prendre le train. Voilà donc que la Cour suprême n'aurait pas pu se rendre à Grand Falls pour y tenir ses audiences, n'eut été la disponibilité du chemin de fer.

Autre chose fort intéressante. Sur les tables au déjeuner aujourd'hui, il y avait cette annonce du National-Canadien pour les autobus, alors qu'on n'a rien fait de semblable pour les chemins de fer au cours des années. Je pourrais vous parler du facteur coût; le

[*Texte*]

igure that it has given out. I am sure you gentlemen are quite capable of looking into his yourselves and making your own conclusions.

I would like to talk to you about the fact hat there must be an alternate method of ravel for the public. They all do not want to ly; a lot of people are scared of flying. They annot always fly and the bus is not the nswer.

Another question came up on the number f passengers being carried. I checked that ut and I found that at the peak season the rains will carry as many as 1,000 passengers n one train. The buses, I think, have a apacity of 39 passengers and at the present noment there are 16 of them.

If you multiply 30 by 16 and if they all go n one direction at the same time, they will ot match the 1,000 on the train. Admittedly his is only at holiday time. At Christmas vhen the university students are going back or holidays, at Easter and during the sum- ner when the tourists are around, the num- ers are up, but I should tell you that the erries can bring in a lot more people to Port ux Basques than the buses can take out of here. During the summer you have to expect hese people to come and they will not all ome in their own cars.

I could talk about the job losses, but all I vill say is that the figures for the actual umber of jobs that will disappear are proba- ly correct, but do not take into account nany other jobs such as, cleaners, electri- ians and other people who are hidden away nd will no longer have employment.

The Chairman has asked me to finish uickly and I will end up by saying, again, nd it is in brief, that I believe the terms of Confederation are being violated by the CNR eing allowed to discontinue passenger ser- ice. I refer you to the terms of Confedera- ion because it is clearly laid down there. This is the third presentation that I have nade; I presented a brief to the Canadian Transportation Commission; I presented a rief to the Newfoundland Public Utilities Board and now I am glad of the opportunity o present it to you.

I tell you that I believe you have a respon- ibility not only to the people of Canada, but articularly to the people of Newfoundland, o see that at no time do any of the terms of Confederation be violated in any way.

[*Interprétation*]

National-Canadien, lui, ne dit jamais rien des chiffres qu'il rend publics. Enfin, je suis sûr que vous, messieurs, pouvez étudier la question vous-mêmes et tirer vos propres conclusions.

J'ajouterai qu'à mon sens, il devrait y avoir d'autres modes de transfert public. Tout le monde n'aime pas prendre l'avion, il y en a qui ont peur de voyager ainsi, mais l'autobus n'est pas la réponse pour eux.

Il a été aussi question du nombre de voyageurs. Étant allé aux renseignements, j'ai appris qu'à la saison de pointe, le train pourra transporter jusqu'à 1,000 voyageurs par trajet. Les autobus, par contre, ne peuvent prendre que 39 passagers; or, en ce moment, on ne dispose que de 16 véhicules.

Multipliez 30 par 16, c'est-à-dire si tous vont dans la même direction en même temps, vous êtes encore loin des 1,000 voyageurs que peut transporter le train. Bien sûr, on ne voit cela qu'aux vacances, à Noël, quand les étudiants retournent dans leur foyer, à Pâques, à l'été, quand les touristes affluent. Je dois dire que les bacs peuvent amener beaucoup plus de voyageurs à Port-aux-Basques que les autobus peuvent prendre. L'été, on peut s'attendre à une affluence de touristes, qui ne sont pas tous en voiture.

Je pourrais vous parler du chômage éventuel, mais tout ce que je dirai, c'est que les chiffres quant au nombre d'emplois appelés à disparaître sont probablement exacts, mais qu'ils ne tiennent pas compte des autres métiers qui disparaîtront: nettoyeurs, teinturiers, électriciens et tous les autres, dont le cas est moins évident, qui ne pourront plus se trouver du travail.

Le président me demande de terminer rapidement. Aussi je termine en répétant, bref, que les conditions de la Confédération seront enfreintes si l'on permet au National-Canadien de mettre fin à son service-voyageurs. Je vous renvoie aux conditions de la Confédération, car la chose y est établie bien clairement. C'est le troisième mémoire que je présente, soit le premier à la Commission canadienne des transports, le deuxième à l'Office des services publics de Terre-Neuve, et celui-ci, que je suis honoré de vous communiquer.

A mon sens, vous avez des responsabilités à assumer, non seulement envers la population du Canada, mais tout particulièrement envers Terre-Neuve, pour que jamais aucune des conditions de la Confédération ne soit enfreinte.

[*Text*]

If, in fact, there is to be any change in the terms of Confederation, it can only be brought about by direct negotiations between the Government of Newfoundland and the Government of Canada. No one else can change the terms of Confederation and might well be, in fact, the subject of a general election, certainly in this province. I would like to feel that you gentlemen are quite capable of making up your minds after listening to all the presentations that have been made. I am sure you are aware that in only one month's time Canada and Newfoundland will have been partners in Confederation for 20 years. On March 31, we celebrate our twentieth anniversary, and 15 days later the CNR plans, by their own statement, to discontinue passenger service. You have a responsibility then to see that in fact they are not allowed to do this. I feel quite sure that I can safely leave this in your hands. Thank you very much.

Mr. Corbin: Mr. Chairman, on page 8 of the brief there is a paragraph that says:

> There is no doubt that had the Canadian National Railway not decided to introduce bus service, it would have been introduced shortly by some private business firm . . .

and so on. Can you state as a fact, sir, that private enterprise would have established this bus service very soon? Can you give any names?

Mr. Murphy: Already in Newfoundland, we have two or three bus services operating in their own sections. We had one bus service that was operating between Cornerbrook and St. John's; it was one of these big CN-type buses. It was surely then only a question of time before either they amalgamated or one of them became big enough to take over, not to take over the whole system but to operate over the whole highway. They are doing it now, or they were for a time, with taxis, small cars, and as the traffic grows this inevitably will grow into a bus service.

Mr. Corbin: I had many other questions but I will just ask one other, Mr. Chairman. Is it not a fact, which you may want to confirm or deny, that more Newfoundlanders today are purchasing cars; likewise, private companies prefer to run their own fleets of trucks? As a consequence, this is the very reason the provincial government is emphasizing, and will do so for 15 or 20 years as we were told yesterday, a far-reaching road building program? I wonder if you would have any comments in that respect?

[*Interpretation*]

S'il faut apporter, d'ailleurs, des modifications au libellé de la Confédération, ce ne sera qu'en vertu de négociations directes entre le gouvernement de Terre-Neuve et celui du Canada. Personne d'autre ne peut modifier les conditions de la Confédération; la chose, d'ailleurs, pourrait faire l'objet d'élections générales, du moins dans cette province. J'aimerais croire que vous, messieurs, êtes très capables de vous décider vous-mêmes après avoir entendu toutes les présentations qui ont été faites. Je suis sûr que vous savez que dans un mois seulement, il y aura vingt ans que Terre-Neuve est entré dans la Confédération. Nous célèbrerons le vingtième anniversaire le 31 mars, et quinze jours plus tard, le CN a l'intention de discontinuer le service voyageur. Vous avez donc la responsabilité de voir à ce qu'on ne leur permette pas de le faire. Je suis sûr que je puis vous laisser l'affaire entre les mains. Je vous remercie.

M. Corbin: Monsieur le président, à la page 8 du mémoire il y a un paragraphe qui dit: Qu'il n'y a aucun doute que si le Canadien National n'avait pas décidé d'introduire un service d'autobus, cela aurait été fait avant longtemps par certaines sociétés privées, et le reste. Pouvez-vous donc dire, de façon certaine, qu'il y aurait eu une entreprise privée qui aurait établi ce service d'autobus bientôt? Pouvez-vous nous nommer qui que ce soit?

M. Murphy: Mais, nous avons deux ou trois services d'autobus qui exploitent chacun leur propre secteur. Nous en avions un entre Corner Brook et Saint-Jean, c'était l'un de ces gros autobus du CN. Sûrement ce n'était qu'une question de temps avant qu'ils ne se fusionnent ou que l'un devienne assez grand, non pas pour prendre tout le réseau, mais pour parcourir toute la grande route. Ils le font, à l'heure actuelle, ou ils le faisaient, pendant un certain temps même en taxis, en petites voitures et au fur et à mesure que la circulation augmente, inévitablement, on en arrive à un service d'autobus.

M. Corbin: J'avais toute une série de questions à poser mais j'en poserai juste une autre, monsieur le président. N'est-ce pas un fait, que vous voudrez peut-être confirmer ou nier, que plus de Terre-Neuviens aujourd'hui achètent des automobiles; et que, de même, les sociétés privées préfèrent avoir leur propre flotte de camions? En conséquence, c'est la raison même pour laquelle le gouvernement provincial insiste et continuera à insister d'ici quinze ou vingt ans, comme on nous l'a dit hier, sur un programme de construction des routes à long terme? Avez-vous des commentaires à ce sujet?

[*Texte*]

Mr. Murphy: I will say that the economic development in Newfoundland depends on the building of roads to all parts of our province. We cannot afford now to wait for the boats. I lived on the coast for some years and I can tell you that I have sat watching the coastal boat tied up for 21 days. It is not uncommon to have a coastal boat tied up for 5 to 10 days. You cannot keep the economy of a province running this way, but you can when you build roads, when you get things moving.

Mr. Corbin: Thank you, sir.

Mr. Rock: You said something to the effect that Air Canada intends to opt out of regional flights. Where did you get this information?

Mr. Murphy: Sir, these things come to me from many sources.

Mr. Rock: Yes, well is it not a fact that it is actually some other regional carriers who want Air Canada to get rid of that service so that they could opt in, but that Air Canada does not want to opt out?

Mr. Murphy: I have never heard that somebody else wants them to opt out so they can opt in.

Mr. Rock: Well, we heard this in other hearings, that is why I ask.

Mr. Murphy: This is possible. We believe, just as the CN has a responsibility, so has Air Canada, to supply services to Newfoundland and not withdraw them.

Mr. Rock: Before today, when was the last time you took the "Bullet"?

Mr. Murphy: Oh, in the past five or six years I have ridden the "Bullet" a number of times.

Mr. Rock: What does that mean?

Mr. Murphy: I must say that more often I have to fly in and back in a day and I cannot afford the luxury, the privilege, the leisure, of riding the "Bullet". It is 16 hours from Cornerbrook to St. John's; it is very pleasant. You get on at 4 o'clock in the afternoon, you do a bit of work, write your brief for presentation to this Committee, you go and have your dinner, you come back and you do a bit more work, correcting it, you go and have a lunch and then it is time for bed. When you

[*Interprétation*]

M. Murphy: Je dirais que le développement économique de Terre-Neuve dépend de la construction des routes allant dans toutes les parties de notre province. Nous ne pouvons pas nous payer le luxe d'attendre les navires. J'ai demeuré le long du littoral pendant un certain nombre d'années et je puis vous dire que j'ai vu le service côtier arrêté pendant vingt et un jours. Ce n'est pas extraordinaire de voir un bateau côtier arrêté pendant cinq ou dix jours. Il est impossible de maintenir l'économie d'une province de cette façon, mais c'est possible lorsque vous construisez des routes, lorsque vous mettez les choses en marche.

M. Corbin: Merci, monsieur.

M. Rock: Mais vous avez dit quelque chose à l'effet qu'Air Canada a l'intention de se désister des vols régionaux. Où avez-vous pris ces renseignements?

M. Murphy: Ces choses me viennent, monsieur, de plusieurs sources.

M. Rock: N'est-ce pas un fait, qu'il s'agit en fait d'un autre transporteur régional qui voudrait qu'Air Canada se débarasse de ce service afin de pouvoir s'y intégrer, mais qu'Air Canada ne veut pas le faire?

M. Murphy: Je n'ai jamais entendu dire qu'on voulait qu'Air Canada le fasse.

M. Rock: Nous avons entendu cela à d'autres audiences, c'est pourquoi je le demande.

M. Murphy: C'est possible, évidemment, mais nous croyons que, tout comme le CN, Air Canada a aussi, une responsabilité d'assurer des services à Terre-Neuve et non pas les retirer.

M. Rock: Avant aujourd'hui, quelle est la dernière fois que vous avez pris le «Bullet»?

M. Murphy: Depuis cinq ou six ans, j'ai voyagé par le «Bullet» à plusieurs reprises.

M. Rock: Qu'est-ce que cela veut dire?

M. Murphy: Mais je dois dire que plus souvent je suis obligé de venir et de retourner en avion la même journée et que je ne puis me permettre le luxe, l'avantage, le loisir de voyager en «Bullet». Cela prend 16 heures de Corner-Brook à St-Jean; c'est très agréable. Vous embarquez à quatre heures l'après-midi, vous faites un peu de travail, vous rédigez votre mémoire pour le présenter au Comité, vous allez prendre votre dîner, vous faites un peu plus de travail, vous le corrigez, vous

[*Text*]

wake up in the morning there is just time for a cup of tea and a bit of toast and your are in St. John's at 8 o'clock.

Mr. Rock: Yes, I know, but it seems, sir, that you must admit you have not taken that train for a long time, except for today to write your brief.

Mr. Murphy: No, no, I have been on that train half a dozen times in the past five or six years.

Mr. Rock: Well, that is it, perhaps once a year for the past six years.

Mr. Murphy: Yes, but now this is the type of business I have to conduct.

Mr. Rock: Yes, I know, but you can understand that in the same period of time, though, the CNR has lost 50 per cent of its passengers.

Mr. Murphy: Now, ask me the question: how many times have I tried to get into St. John's and my flight has been cancelled and I have been left sitting at the airport.

Mr. Rock: Well, I am not arguing that point. We are talking now about the "Bullet".

Mr. Murphy: It works out about the same.

Mr. Rock: During your statements you sort of inferred that in some manner CNR increased their hours of scheduling. This is the way it ended up. Have you any proof that they actually increased . . .

Mr. Murphy: No, no, they have come down.

Mr. Rock: They have come down?

Mr. Murphy: It used to take 27 hours to go from Port aux Basques to St. John's; it is 22 now, but, in fact, they can do it in 18. They took the CNR president across in 17 hours.

Mr. Rock: Yes, right. This means that the CNR president actually had a schedule that would be like an express schedule?

Mr. Murphy: That is right.

Mr. Rock: Did the people in Newfoundland ever demand an express schedule or did they always expect the schedule as it is, to stop at every municipality wherever anyone wanted to stop?

Mr. Murphy: I would not say the people of Newfoundland had demanded this. I think it

[*Interpretation*]

prenez un petit goûter, ensuite vous vous couchez. Puis le matin quand vous vous levez juste le temps de prendre une tasse de thé et des *toasts* et vous êtes à Saint-Jean à huit heures.

M. Rock: Oui, je sais, mais il semble, monsieur, que vous devez admettre que vous n'avez pas pris ce train, depuis longtemps, sauf aujourd'hui pour rédiger votre mémoire.

M. Murphy: Non, non, je l'ai pris cinq ou six fois depuis cinq ou six ans.

M. Rock: Ah oui; une fois par année depuis cinq ou six ans.

M. Murphy: Oui, mais c'est le genre d'affaires que j'ai à diriger.

M. Rock: Oui, mais vous comprenez que pendant cette période de temps, le CN a perdu 50 pour cent de ses voyageurs.

M. Murphy: Et maintenant, demandez-moi combien de fois j'ai essayé de venir à St-Jean et que mon vol avait été annulé et que j'ai été laissé en plus à l'aéroport.

M. Rock: Ce n'est pas ce dont je parle. Nous parlions du «Bullet».

M. Murphy: Oui, çà revient à peu près à la même chose.

M. Rock: Dans vos déclarations, vous avez laissé entendre que d'une façon ou d'une autre, le CN avait augmenté les heures de son horaire. Vous avez terminé sur cela. Avez-vous une preuve du fait qu'ils l'ont fait?

M. Murphy: Non, non, ils les ont diminués.

M. Rock: Ils les ont diminués?

M. Murphy: Cela prenait 27 heures de Port-aux-Basques à Saint-Jean; cela n'en prend que 22 aujourd'hui, mais en fait ils peuvent le faire en 18. Ils ont transporté le président du CN en 17 heures.

M. Rock: Oui, c'est exact. Cela veut dire que l'horaire du président du CN était un horaire de rapide, n'est-ce pas?

M. Murphy: C'est exact.

M. Rock: Est-ce que les gens de Terre-Neuve ont demandé un horaire de rapide, ou est-ce qu'ils se sont toujours attendus qu'on aie l'horaire prévu à l'heure actuelle, qui est d'arrêter partout où les gens veulent arrêter?

M. Murphy: Je ne dirais pas que les gens de Terre-Neuve l'avaient demandé. On a sou-

[*Texte*]

has been brought up many times. That what we would like is an express that took just our passengers and mail. In fact, this is what we have, but the CNR is in no rush to push this train through; it takes 22 hours and that is the express. It is listed as the express; it does not carry any freight, just passengers and mail.

Mr. Rock: I guess express in Newfoundland does not mean the same thing as it does in other parts of Canada.

Mr. Murphy: Possibly not.

Mr. Perrault: I would like to ask Dr. Murphy a question regarding the terms of entry into Confederation on the part of Newfoundland. Do you mean to infer from your statement today that if 100 years from now it is demonstrated that rocket power is a far more feasible way to transport the people of Newfoundland around this province, and to communicate with the rest of Canada, that the people of Newfoundland will still insist that a passenger service, which by then may be completely outmoded and technologically in the stone age, should be retained?

Mr. Murphy: No, sir. I have already covered that point. I said that it was my firm belief that the terms of Confederation can be changed by direct negotiations between the government of Newfoundland—that is the people of Newfoundland—and the Government of Canada.

Mr. Perrault: Yes, this judgment also suggests—certainly the way I have read it and here again I have listened with interest to the arguments advanced today and I am trying to bring an objective mind to bear—that there has to be as good as or better service as a result of the institution of this new form of travel, regardless of whether or not the two services continue for a period of time.

There are arguments for and against, but I think merely to invoke the technical terms of union is really irrelevant because the question is: how can we best serve the people of Newfoundland and their transportation needs? If we attempted to invoke all of the terms of British Columbia's entry into Confederation we could engage in ceaseless argument which really would be quite useless in the context of modern conditions.

[*Interprétation*]

vent dit que ce qu'on aimerait, c'est un service rapide qui ne prendrait que les passagers et le courrier. De fait, c'est ce que nous avons, mais le CN n'est pas pressé de faire avancer ce train plus rapidement. Cela prend 22 heures et voilà notre rapide. Il est sensé être le rapide; il ne transporte pas de marchandises, seulement les voyageurs et le courrier.

M. Rock: L'expression «rapide» ne signifie pas la même chose ici, qu'ailleurs au Canada, j'imagine.

M. Murphy: Peut-être pas.

M. Perreault: J'aimerais demander au Dr Murphy une question au sujet des conditions de l'entrée de Terre-Neuve dans la Confédération, de la part de Terre-Neuve. Est-ce que nous devons comprendre, d'après ce que vous avez dit aujourd'hui, que si dans 100 ans, on peut prouver que les trains turbo-réactés sont plus efficaces pour transporter les Terre-Neuviens dans la province et pour communiquer avec le reste du Canada, que les gens de Terre-Neuve insisteront toujours pour qu'un service de voyageurs qui, à ce moment-là, pourrait fort bien être désuet et de l'âge de pierre, au point de vue technologique, soit conservé?

M. Murphy: Non, monsieur. Et j'ai déjà expliqué la chose. J'ai dit que je croyais qu'on peut changer les conditions de l'entrée dans la Confédération par des négotiations directes entre le gouvernement de Terre-Neuve, c'est-à-dire les gens de Terre-Neuve, et le gouvernement du Canada.

M. Perrault: Oui, cette décision suggère, sûrement en la lisant, et, encore une fois, j'ai écouté attentivement les arguments proposés aujourd'hui, j'essaie d'avoir l'esprit ouvert sur cette question, qu'il doit y avoir un service aussi bon, sinon meilleur, à la suite de l'établissement de ce nouveau mode de voyage, peu importe si les deux services continuent pour un certain temps.

Il y a du pour et du contre, mais le fait de simplement faire appel aux conditions techniques de l'entrée n'est vraiment pas pertinent car, ce qu'il faut savoir, c'est comment nous pouvons desservir le mieux les Terre-Neuviens en matière de transports. Si nous tentions d'invoquer un onzième des conditions de l'entrée de la Colombie-Britannique dans la Confédération, nous nous engagerions dans une discussion sans fin qui ne serait vraiment pas pertinente dans le contexte des conditions modernes.

[*Text*]

Mr. Murphy: You have an argument, but, in fact, at stake here are the terms of Confederation of Newfoundland with Canada. I do not believe that anybody, except the two major governments, has the right to break these terms. This is the point I am making. You and I may agree that we need rocket power tomorrow, but until the two governments agree this is the way it must be done and take that out of the terms of Confederation, it cannot be done.

Mr. Allmand: I have a supplementary, Mr. Chairman. Sir, has there in fact been a legal opinion prepared on this point? Was one submitted to the Canadian Transport Commission or was there an appeal in law considered from the decision of the Canadian Transport Commission based on the terms of reference of Confederation?

Mr. Murphy: Considered by us?

Mr. Allmand: Yes.

Mr. Murphy: We considered it and did not know how to go about it as you have already heard Mr. Thoms say. At that time we did not even know you could appeal the ruling of the Canadian Transport Commission. We found out, as I understood, too late.

Mr. Allmand: Are there any legal opinions on this point? It is a serious point about the terms of reference of Confederation?

Mr. Murphy: I just wonder what right we would have to take a legal argument and go, say, to the Governor in Council. Should it not be the Newfoundland government?

Mr. Allmand: Well, it could be anybody.

Mr. Murphy: This is my feeling, that it should be the Newfoundland government that does this. Frankly we do not understand, a lot of people do not understand, why the Newfoundland government has been silent on this question. Maybe it has not been silent, maybe they have signed some sort of agreement with the federal government, we do not know.

Mr. Allmand: Yesterday the representatives said they were going to look at how the people of Newfoundland reacted to both means of transportation and then they may make a decision.

Mr. Murphy: In fact, the Newfoundland government asked for a five-year period

[*Interpretation*]

M. Murphy: Vous avez un argument, mais de fait, ce qui est un jeu ici, ce sont les conditions de l'union de Terre-Neuve au Canada. Et je ne crois pas que personne, sauf les deux gouvernements principaux, ait le droit d'y changer quoi que se soit. Nous serons peut-être d'avis que cela nous prend des turbo-réactés demain, mais jusqu'à ce que les deux gouvernements décident que c'est la façon de procéder et qu'on enlève cela des conditions de l'union, on ne peut pas le faire.

M. Allmand: J'ai une question supplémentaire, monsieur le président En fait, est-ce qu'il y a eu une opinion juridique à cet égard? Est-ce qu'il y en a une qui a été présentée à la Commission canadienne des transports? Ou est-ce qu'on a songé à interjeter appel devant la loi de la décision de la Commission fondée sur les attributions de la Confédération?

M. Murphy: Envisagés par nous?

M. Allmand: Oui.

M. Murphy: Nous l'avons envisagé, mais nous ne savions pas comment nous y prendre, comme vous l'avez entendu de la part de M. Thoms. Nous ne savions même pas, alors qu'il était possible d'interjeter appel de la décision de la Commission canadienne des transports. Quand nous l'avons appris, c'était trop tard.

M. Allmand: Est-ce qu'il y a des opinions juridiques à cet égard? C'est un point très sérieux ce rapport aux conditions de l'union.

M. Murphy: Je me demande ce que nous pourrions faire si nous prenions une opinion juridique, et si nous nous présentions au gouverneur en conseil. Est-ce que ça ne devrait pas être le gouvernement de Terre-Neuve?.

M. Allmand: Ce pourrait-être n'importe qui.

M. Murphy: C'est l'impression que j'ai que ça devrait être le gouvernement de Terre-Neuve qui le fasse. Franchement nous ne comprenons pas. Beaucoup de gens ne comprennent pas pourquoi le gouvernement de Terre-Neuve a été silencieux à ce sujet. Peut-être ne l'a-t-il pas été. Il a peut-être signé un genre d'accord avec le gouvernement fédéral? On ne le sait pas.

M. Allmand: Hier les représentants ont dit qu'ils allaient étudier la réaction des gens aux deux modes de transport et qu'ils prendraient une décision par la suite.

M. Murphy: En fait, le gouvernement de Terre-Neuve avait demandé une période de

[*Texte*]

when both would operate. I must say I agree with this and if at the end of five years it is quite obvious that the railway is no longer needed, then I would be the first one to agree with the Newfoundland government going to the federal government and saying, "Let us drop this out of the terms of Confederation, we are quite happy now with just the bus service".

Mr. Allmand: The section of the law relating to the appeal says that it can be made by any person, group and so forth.

Mr. Murphy: It is a little difficult to get a single person though or a small group to take up a big thing like this; it should be at government level.

Mr. Allmand: It could be done by municipalities or trade unions or boards of commerce and so forth; thank you.

The Chairman: Are there any other questions gentlemen?

Mr. Peddle: Dr. Murphy, everyone of the witnesses today has been asked—I do not know what the relevance is—how often do you ride the train. Is it not a fact that in the year under review, on which the CNR based their application to abandon, 1966, that 90,000 Newfoundlanders used the train?

Mr. Murphy: Yes.

Mr. Peddle: I think this is the relevant point rather than whether you or I or some other individual rides the train.

Mr. Murphy: More than that Mr. Peddle, twice in 1968 the CNR proudly announced, proudly announced on radio and television and in the newspapers, that they had a record month carrying passengers, whatever month it was. At the same time, with the other breath they were saying, so we have got to discontinue our passenger service. It did not make sense.

Mr. Mahoney: I think first I should like to compliment the witness on his very eloquent presentation of what might be termed a precis of many of the points of view we have heard here in the last two days. To get back to the mundane things, when we were questioning the Port of Cornerbrook Chamber of Commerce there were a couple of questions left up in the air and I would just like to clear these up. As I gathered from them, the port development to date has been pretty much a matter of private enterprise. Is it not within the competence of the City of Corner-

[*Interprétation*]

cinq ans pour l'exploitation des deux. Je suis tout à fait d'accord et si à la fin de la période de cinq ans il est évident qu'on n'a pas besoin de chemin de fer, je serais le premier à convenir que le gouvernement de Terre-Neuve demande au gouvernement de Canada d'éliminer cela des conditions de l'union, continuons simplement avec les autobus.

M. Allmand: Dans la loi, au sujet des appels, on dit que l'appel peut être interjeté par n'importe quelle personne ou groupe de personnes.

M. Murphy: Oui, mais ce n'est pas facile pour une personne ou un petit groupe de faire ce genre de chose. Ça devrait se faire au niveau du gouvernement.

M. Allmand: Cela pourrait se faire par les municipalités, les syndicats, Chambres de commerce ou groupes du genre. Merci.

Le président: Y a-t-il d'autres questions, messieurs?

M. Peddle: Monsieur Murphy, on a posé la même question à tous les témoins aujourd'hui, je ne sais quelle en est la pertinente, prenez-vous souvent le train? N'est-il pas vrai que, durant l'année à l'étude, sur laquelle le CN fonde sa demande d'abandonner le service soit 1966, 90,000 Terre-Neuviens ont utilisé le train?

M. Murphy: Oui.

M. Peddle: Je crois que c'est là le point pertinent, et non le fait que vous ou moi ou quiconque ait pris le train.

M. Murphy: Mieux que cela, monsieur Peddle, à deux reprises, au cours de 1968, le CN a fièrement annoncé, à la radio, à la télévision et dans les journaux, que la clientèle avait été exceptionnellement nombreuse pendant ce mois, quel que soit le mois. En même temps, on annonçait qu'il fallait discontinuer le service. Et cela n'avait pas de sens.

M. Mahoney: Tout d'abord, j'aimerais féliciter le témoin de son excellente présentation de ce qu'on pourrait appelé un résumé de plusieurs des points de vue que nous avions entendus depuis deux jours. Mais pour revenir aux choses normales et ordinaires, lorsque nous interrogions la Chambre de commerce du port de Corner Brook, il y a deux ou trois choses qui ont été laissées en suspens que j'aimerais éclaircir. Si j'ai bien compris, le développement du port jusqu'à maintenant était une question d'entreprise privée jusqu'à maintenant. N'est-ce pas du ressort de la ville

[*Text*]

brook to regulate the port development in a planning way until some greater authority moves in at least?

Mr. Murphy: We believe it is. We also believe that it is a federal responsibility and we have tried to work quietly with the federal authorities to find out what they are doing and how they would like to do it. Naturally, if they are going to spend $4 million or $5 million or $10 million or whatever it is, we do not want to put a spoke in this wheel because we need this so desperately.

Let me tell you that in the past two or three months, sir, the first sideloader came into Cornerbrook and she could not unload. They had to use conventional cranes to take the cargo out. Now, this is a desperate situation because they do not want to come in, it takes too long, they lose time.

Mr. Mahoney: I gathered that one of the major problems was the haphazard way in which the port had developed, the lack of integration of port facilities with other transportation systems, including your own city streets and so on. Surely while you are waiting for the federal government you are hopefully doing something to minimize the mess that allegedly is developing?

Mr. Murphy: Sir, we are working day and night trying to minimize the mess that has developed. But you cannot do this quickly; it has to be done very carefully so that everybody is eventually working together. We want to work with the people who have the money.

Mr. Perrault: Mr. Chairman, I would like to make reference to a point raised a few moments ago when we were discussing another point. I refer to the Canadian Transport Commission File No. 27563.488,

> IN THE MATTER OF the application of the Canadian National Railways under Section 314 I of The Railway Act, for authority to discontinue passenger train service between St. John's and Port aux Basques. .

Now on page 18, it is stated:

> When Newfoundland entered Confederation in 1949, one of the Terms of Union agreed upon by Canada and Newfoundland was Term 31(a) contained in Appendix "A" to Statutes of Canada, 1949, chap. 1:
>
> "At the date of Union, or as soon thereafter as practicable, Canada will take

[*Interpretation*]

de Corner Brook de réglementer le développement du port jusqu'à ce qu'une autorité supérieure s'en charge?

M. Murphy: Nous le croyons, oui. Mais nous croyons aussi qu'il s'agit d'une responsabilité fédérale. Nous avons essayé de travailler tranquillement avec les autorités fédérales pour savoir ce qu'elles voulaient et comment elles allaient procéder. Si on est pour dépenser 4, 5 ou 10 millions de dollars, nous ne voulons pas les en empêcher, car nous en avons vraiment besoin.

Depuis deux ou trois mois nous avons vu notre premier navire à déchargement de côté arrivé chez-nous, mais ils ne pouvaient pas se décharger. On a dû utiliser des grues ordinaires pour le faire. C'est une situation désespérée, car ils ne peuvent venir, cela prend trop peu de temps, il y a du retard.

M. Mahoney: Un des principaux problèmes c'était la façon dont se faisait le développement du port, le manque d'intégration avec les autres modes de transports y compris vos propres rues, municipalités, etc. En attendant le gouvernement fédéral, j'espère que vous faites quelque chose pour minimiser les problèmes qui apparemment se développent.

M. Murphy: Nous travaillons jour et nuit pour essayer de minimiser les dégâts. Mais il est impossible de faire cela en vitesse; il faut procéder avec beaucoup de soin, afin que finalement, tout le monde travaille ensemble. Nous voulons travailler avec ceux qui ont de l'argent.

M. Perrault: Monsieur le président, j'aimerais revenir à un point mentionné tout à l'heure à un autre sujet. Il s'agit du dossier 27563.488 de la Commission canadienne des transports:

> Relativement à la demande des Chemins de fer Nationaux du Canada, invoquant l'article 314 I de la Loi sur les chemins de fer pour obtenir l'autorisation de discontinuer le service du train de voyageurs entre St-Jean et Port-aux-Basques,

A la page 18, on dit:

> Quand Terre-Neuve est entrée dans la Confédération en 1949, une des conditions de l'Union acceptées tant par le Canada que par la Province en cause était la clause 31(a) qui figure au chapitre I de l'annexe «A» des statuts du Canada de 1949 et que voici:
>
> «A la date de l'Union ou assistôt que possible après cette date, le Canada pren-

[*Texte*]

over the following services and will, as from the date of Union, relieve the Province of Newfoundland of the public costs incurred in respect of every service taken over, namely,..

(a) the Newfoundland and Railway..."

Then later, and I think this is the relevant section:

On April 1, 1949, by Order in Council P.C. 1454, the Governor General in Council entrusted to Canadian National Railways the operation and management of the Newfoundland Railway. The operative words of that Order in Council as it relates to this case are:

"...Therefore, His Excellency the Governor General in Council, on the recommendation of the Minister of Transport, is pleased to order that, effective April 1, 1949, the Newfoundland Railway, including rights-of-way, wharves, dry docks and other real property, rolling stock, equipment, ships and other personal property...the title to which is vested in His Majesty, be and they are hereby entrusted in respect of management and operation thereof to the Company on the terms in the Canadian National Railways' Act expressly specified, namely, that such management and operation shall continue during the pleasure of the Governor in Council..."

Mr. Chairman, the way I interpret that—first, let me say I would like to ask your interpretation of it—is that there should be negotiations with the Government of Newfoundland and the federal government. Surely this is something that governments should sit down and discuss, but at the same time it would appear that Newfoundland agreed that they were going to turn over the operation of their railway and it should continue during the pleasure of the Governor in Council. Surely you are entrusting to some other authority the judgment whether or not the service shall continue and on what basis.

Now, I would like your interpretation of this.

Mr. Murphy: My interpretation of that is the Government of Canada would tell the Governor in Council when the time has come, and they will only do that after negotiating with Newfoundland.

[*Interprétation*]

dra à son compte les services énumérés et, à compter de la date de l'Union, libérera la province de Terre-Neuve des frais publics subis à l'égard de chaque service absorbé, à savoir:

a) Le chemin de fer de Terre-Neuve,

Et plus loin, et voici la section pertinente, je crois:

Le 1er avril 1949, le Gouverneur général en conseil a confié aux Chemins de fer nationaux du Canada l'exploitation et la gestion des Chemins de fer de Terre-Neuve. Les termes relatifs à l'exploitation dudit décret du Conseil étaient, en substance, les suivants:

«...En conséquence, il plaît à Son Excellence le Gouverneur général d'ordonner, sur la recommandation du ministre des Transports, qu'à partir du 1er avril 1949, le Chemin de fer de Terre-Neuve, y compris les emprises, les quais, cales sèches et toute autre propriété immobilière, ou matériel roulant, équipement, bateaux et autres propriétés personnelles... dont les titres sont détenus par Sa Majesté, soit dorénavant et de par les présentes confiés à la Compagnie, en ce qui concerne la gestion et l'exploitation, aux termes et conditions spécifiquement exposés dans la loi sur les Chemins de fer Nationaux du Canada, c'est-à-dire que cette gestion et exploitation durera selon le bon plaisir du Gouverneur en conseil...»

Monsieur le président, j'interprète cela et j'aimerais avoir votre propre interprétation—comme signifiant qu'il devrait y avoir des négociations entre le gouvernement de Terre-Neuve et le gouvernement fédéral. A n'en point douter, c'est là une question que les deux gouvernements devraient discuter entre eux, mais, d'autre part, il semblerait que Terre-Neuve ait convenu qu'elle allait céder l'exploitation de son chemin de fer, et que celle-ci serait maintenue au bon plaisir du gouverneur en conseil. Vous laissez donc à une autre autorité le soin de juger si le service doit être maintenu ou non, et à quelles conditions.

J'aimerais maintenant avoir votre interprétation de la chose.

M. Murphy: Mon interprétation, c'est que le gouvernement du Canada informera le gouverneur en conseil lorsque le moment sera venu, et qu'il ne le fera qu'après avoir négocié avec le gouvernement de Terre-Neuve.

[*Text*]

Mr. Perrault: Yes, but let me point out that there is no suggestion that negotiations be mandatory. It may be desirable, but there is no legal directive contained in this document that this must be done. I added that just to clear up this point that we discussed earlier.

Mr. Murphy: Then you have to go back to the terms of Confederation which can only be altered by agreement between the two governments.

Mr. Perrault: Mr. Chairman, I only can say that I hope this possibly could be sent to the courts where it could be discussed.

The Chairman: We will let the courts decide.

Mr. Perrault: All right.

The Chairman: This will end the question period. I would like to thank you, Mr. Mayor and doctor.

May I call, once more, on Mr. Keats. Is Mr. Keats here?

Mr. Keats: First, let me explain that I am a representative of the travelling public, a private citizen and I represent a large number of people who have received correspondence in the past months which I have forwarded, I think, to Mr. McGrath, expressing the desire and need for CNR freight and protesting the removal of passenger train equipment.

In summary, a brief which I have presented to the Committee stated that by removing the passenger train service in Newfoundland to my mind is an injustice to the people of Newfoundland because it leaves us with only a bus service which is neither reliable nor safe when compared to a rail service.

Secondly, Canadian National have not taken into consideration that by removing this kind of service it will create a hardship for a number of people such as the sick and invalids. Also, there is a large number of people who do not like bus or air travel.

Thirdly, I know of no other part of Canada—I exclude Prince Edward Island from this because it is true that the only other mixed train is serving Prince Edward Island, but the longest haul that a train has in Prince

[*Interpretation*]

M. Perrault: Oui, mais permettez-moi de faire remarquer que nulle part on ne dit que les négociations sont obligatoires. Qu'elles soient souhaitables, d'accord, mais ce document ne porte aucune directive judiciaire en ce sens. Si j'ajoute cela, c'est simplement pour préciser la question dont nous avons parlé plus tôt.

M. Murphy: Il faut alors se reporter aux conditions de la Confédération, qui ne peuvent être modifiées que par une entente entre les deux gouvernements.

M. Perrault: Monsieur le président, tout ce que je peux dire, c'est que j'espère que la question pourrait être renvoyée aux tribunaux, où l'on pourrait en discuter.

Le président: Nous laisserons la décision aux tribunaux.

M. Perrault: Entendu.

Le président: C'est maintenant la fin de la période de questions. Je vous remercie, monsieur le maire.

J'aimerais faire de nouveau appel à M. Keats. Est-il ici?

M. Keats: Tout d'abord, permettez-moi de vous expliquer que je suis un simple citoyen, représentant le public voyageur, et que je représente aussi un grand nombre de personnes qui ont reçu, au cours des derniers mois, des lettres que j'ai fait suivre, je crois, à M. McGrath, et dans lesquelles on exprime le désir et le besoin que l'on a du service de transport ferroviaire des marchandises du National Canadien et on se plaint de la suppression du service de train de voyageurs.

En résumé, j'ai déclaré dans un mémoire présenté au Comité qu'à mon avis, la suppression du service de train de voyageurs à Terre-Neuve constituait une injustice à l'égard de la population de Terre-Neuve, car cela ne nous laissait plus qu'un service d'autobus qui n'est ni régulier ni sûr, comparativement à un service ferroviaire.

Deuxièmement, le National-Canadien n'a pas tenu compte du fait que la suppression du service de voyageur allait poser des problèmes pour un certain nombre de personnes, comme les malades ou les invalides. Il y a aussi beaucoup de gens qui n'aiment pas voyager en autobus ou en avion.

Troisièmement, je ne connais pas d'autre région du Canada—l'exclusion de l'île-du-Prince-Édouard, qui est desservie par le seul autre train mixte, mais le parcours le plus long qu'ils aient à couvrir, selon l'horaire du

[*Texte*]

Edward Island according to Canadian National timetables is a distance from St. John's to Bonavista, not 600 miles. So there is no other place in Canada where a bus service exists where a railway does exist.

This is a brief summary of my brief.

The Chairman: Any questions, gentlemen? Well, gentlemen, this finishes the inquiry in St. John's, Newfoundland, and I would like to thank everyone of you.

[*Interprétation*]

National-Canadien, est celui de Saint-Jean à Bonavista et non pas 600 milles—il n'y a donc pas d'autre région au Canada, dis-je, où l'on ne dispose que d'un service d'autobus alors qu'il existe un chemin de fer.

Voilà donc un bref résumé de mon mémoire.

Le président: Avez-vous des questions à poser, messieurs? Bon, messieurs, ceci met fin à notre enquête à Saint-Jean de Terre-Neuve, et je tiens à vous remercier tous.

APPENDIX "Q"

BRIEF

Topic:

Present transportation and communication needs of the Province of Newfoundland and Labrador.

Submitted to:

Standing Committee on Transport and Communications.

Submitted by:

The Government of Newfoundland and Labrador.

PREFACE

The Province of Newfoundland and Labrador, latest to enter Confederation, this March 31 celebrates the 20th anniversary of its union with the rest of Canada.

Those twenty years have seen it move forward at a more rapid rate than any other province in the measurable aspects of progress. Despite these giant steps it is still far behind most other provinces in such tangibles. The rapid rate of progress to date has been made possible only by the realization of the Federal Government and sister provinces that Canada, for its national integrity, must constantly move towards the equalization of opportunity for all; that a political democracy can only be really effective when it is complemented by economic democracy.

As Newfoundland enters its twenty-first year of Confederation, it can look with pride on the results of Federal-Provincial efforts.

It has achieved a climate ideal for the development of industrial productivity through a program that included the education and training of its people to standards never even dreamed of before 1949. It has a beginning on the construction of modern port facilities; has established the world's highest per capita development of low-cost hydro power; and has created, again through Federal-Provincial co-operation, a program that is daily attracting profit-minded businessmen to establish in the province.

To build on the foundation which has been laid through this "Operation Boot Strap" will require throughout the decade ahead further carefully planned Federal-Provincial partnership.

APPENDICE «Q»

MEMOIRE

Objet:

Présents besoins de la province de Terre-Neuve et du Labrador en matière de transport et de communications.

Destinataire:

Comité permanent des transports et des communications.

Auteur:

Le gouvernement de Terre-Neuve et du Labrador.

PRÉFACE

Le 31 mars courant, la province de Terre-Neuve et du Labrador, dernière à faire partie de la Confédération, célèbre le 20e anniversaire de son union au reste du Canada.

Au cours de ces vingt années, elle a progressé à un rythme plus rapide que toute autre province en ce qui concerne les aspects mesurables du progrès. Malgré les énormes progrès accomplis, elle vient bien loin en arrière de la plupart des autres provinces pour ce qui est de ces valeurs matérielles. Ces progrès rapides ont été jusqu'ici rendus possibles du fait que le gouvernement fédéral et les provinces-sœurs ont réalisé que pour maintenir son intégrité nationale, le Canada doit tendre constamment vers l'égalité des chances pour tous ses citoyens; qu'une démocratie politique n'est vraiment efficace que lorsqu'elle se double d'une démocratie économique.

Au moment où Terre-Neuve entreprend sa vingt et unième année au sein de la Confédération, elle peut se louer des résultats de la collaboration fédérale-provinciale.

Grâce à la mise en œuvre d'un programme visant l'instruction et la formation de sa population à des niveaux qu'avant 1949 on ne songeait même pas, elle a réalisé un climat tout indiqué pour le développement de la productivité industrielle. La construction d'installations portuaires modernes y est déjà en marche; elle a établi l'aménagement d'énergie hydro-électrique bon marché selon la proportion la plus élevée du monde par tête d'habitant; toujours à la faveur de la collaboration fédérale-provinciale, elle a mis en œuvre un programme qui réussit chaque jour à convaincre des hommes d'affaires avides de bénéfices à venir s'installer dans la province.

Afin de poursuivre l'œuvre de développement dont la base a été «l'opération départ», la prochaine décennie devra connaître d'autres réalisations attribuables à une collaboration fédérale-provinciale encore plus poussée.

This brief deals with a major present problem—the need to provide the transportation that is essential to the entire economic development of the province, and without which its industrial growth will be stunted, perhaps to the point of extinction.

To protect the tremendous Federal-Provincial investment of the past twenty years in the Province of Newfoundland and Labrador requires a complementary investment for the future with concentration in those areas that are the concern of this brief—transportation and communications.

THE SITUATION

I. ROADS

Despite progress on the resettlement program there are still hundreds of Newfoundland communities depending either solely on water transport or on third-rate roads for transportation of people and supplies.

Living in these communities is daily becoming less socially tolerable and less inviting for the establishment of even small industries because of the lack of acceptable roads linking with the Trans-Canada Highway.

On the Mainland portion of our province communities have grown up largely around prime industry resources quite isolated from one another. While raw materials have reasonable transportation to markets, passengers depend largely on air transport for communication with the island part of our province and with other communities on the Mainland. There is no land link for passengers and ordinary supplies between the various communities within this territory of 100,000 square miles, well over half the extent of Japan.

This lack of inter-community links creates an atmosphere of isolation, and results in a barrier for bringing into Labrador the population so necessary to its full development.

II. WATER

The Island of Newfoundland has along its south coast, provided by nature, deep water ports almost equidistant between Europe (2300 miles to London) and major Great Lakes ports (Chicago 2200 miles).

Here are ideal natural environments for transshipment from the ocean giants of the present and future to ships built to navigate the St. Lawrence Seaway—located on direct

Le présent mémoire traite d'un problème dont l'importance est toujours d'actualité, la nécessité d'assurer les moyens de transport essentiels à l'ensemble de l'expansion économique de la province et sans lesquels son développement industriel sera entravé, sinon arrêté complètement.

Afin que les sommes considérables investies au cours des vingt dernières années par les gouvernements fédéral et provincial dans la province de Terre-Neuve et du Labrador portent fruit, il faut prévoir pour l'avenir des investissements supplémentaires, notamment dans les domaines qui font l'objet du présent rapport—les transports et communications.

LA SITUATION

I. VOIRIE

Malgré les progrès que connaît le programme de rétablissement, il existe encore des centaines d'agglomérations terreneuviennes où le transport des habitants et approvisionnements ne s'effectue que par voie maritime ou par des chemins de troisième ordre.

Chaque jour, la vie dans ces agglomérations devient de plus en plus intolérable pour les habitants et moins intéressante pour l'établissement d'industries, même petites, par suite de la pénurie de routes de raccordement de norme acceptable à la route Transcanadienne.

Dans la partie continentale de notre province, les agglomérations se sont développées en grande partie autour de ressources de l'industrie primaire plutôt isolées les unes des autres. Tandis que le transport des matières premières vers les marchés s'effectue assez bien, les voyageurs doivent emprunter surtout la voie aérienne pour communiquer avec la partie insulaire de la province et avec les autres agglomérations situées sur le continent. Il n'existe aucune liaison terrestre pour les voyageurs et les approvisionnements ordinaires entre les diverses localités dispersées sur ce territoire d'une superficie de 100,000 milles carrés, plus de la moitié de celle du Japon.

De cette absence de liaisons entre les agglomérations résulte un climat d'isolement et un obstacle à la venue au Labrador de la main-d'œuvre si nécessaire à sa pleine expansion.

II. TRANSPORT MARITIME

Le long du littoral sud de l'île de Terre-Neuve sont situés des ports de mer naturels situés à presque égale distance de l'Europe (2,300 milles, Londres) et des principaux ports des Grands lacs (Chicago, 2,200 milles).

Il s'agit là de hâvres naturels sans pareils pour le transbordement de marchandises des océaniques géants du présent et de l'avenir aux navires conçus pour sillonner la voie

line from Europe to the mouth of the St. Lawrence River.

III. AIR

Gander, at present styling itself the "Crossroads of the World", is globally in an ideal location to be the hub of a wheel whose air transportation spokes reach to the far corners of the earth. Its present runways and warehousing facilities, however, were built to answer the needs of a world at least ten years out of date.

IV. RAIL

(a) Rail service at the present time is restricted to a 550-mile arc reaching from St. John's through Central Newfoundland and down the southern part of the west coast to Port-aux-Basques.

There is no railway servicing the entire south coast and the Great Northern Peninsula of the Island, or the huge land mass of Labrador, except for the spur line from Sept Isles to Labrador City.

(b) As the result of a poll of a sample of Newfoundland companies who are extensive users of freight facilities, it would appear that neither now nor in the foreseeable future are Newfoundland shippers benefiting by the Maritime Freight Rate Act as it applies on shipments originating within the Atlantic Provinces and moving inland as far as Levis, Quebec.

The only carrier receiving this subsidy at the present time is the Canadian National Railways.

V. TERMINAL AND WAREHOUSING FACILITIES

Terminal and warehousing facilities for all modes of transport in Newfoundland and Labrador were constructed on the basis of concepts that were adequate in the days prior to the development of containerization. Not one terminal for air, sea, rail or highway transport is today equipped to take advantage of containerization, a must in the economic handling of cargo today and in the years ahead.

VI. COMMUNICATIONS

In the matter of communication, all of Labrador and much of the Island of Newfoundland is at present uncovered by existing television distribution facilities.

maritime du Saint-Laurent qui prolonge en ligne directe la route maritime entre l'Europe et l'embouchure du Saint-Laurent.

III. TRANSPORT AÉRIEN

L'aéroport de Gander, qui se proclame présentement le «carrefour du monde», occupe dans l'ensemble un emplacement idéal lui permettant d'être le moyeu d'une roue dont les rayons du transport aérien se prolongent aux quatre coins du monde. Toutefois, les pistes et entrepôts dont il est présentement doté ont été construits pour répondre aux besoins d'un monde déjà vieux de dix ans.

IV. TRANSPORT FERROVIAIRE

a) Présentement, le service ferroviaire est assuré sur un arc de 550 milles qui, partant de Saint-Jean, traverse le centre de la province et longe la partie sud de la côte ouest jusqu'à Port-aux-Basques.

Aucun chemin de fer ne dessert l'ensemble de la côte sud et la péninsule Great Northern de l'île, ni la vaste étendu du Labrador, sauf l'embranchement entre Sept-Îles et Labrador City.

b) Il ressort d'un sondage parmi un échantillonnage de compagnies terreneuviennes qui utilisent considérablement les moyens de transport que ni présentement ni dans un avenir prévisible les expéditeurs de la province bénéficient-ils des dispositions de la Loi sur les taux de transport des marchandises dans les provinces maritimes s'appliquant aux expéditions en provenance des provinces maritimes et transportées vers l'intérieur jusqu'à Lévis (P.Q.).

A l'heure actuelle, le seul transporteur bénéficiant de cette subvention est le National-Canadien.

V. INSTALLATIONS DE TERMINUS ET D'ENTREPOSAGE

Les terminus et entrepôts utilisés par les divers moyens de transport de Terre-Neuve et du Labrador ont été aménagés d'après des concepts qui se justifiaient avant l'avènement de la conteneurisation. Aucun terminus aérien, maritime, ferroviaire ou routier ne possède présentement les installations lui permettant de prendre avantage de la conteneurisation, technique absolument essentielle de nos jours et à l'avenir pour le transport rentable des marchandises.

VI. COMMUNICATIONS

Dans le domaine des communications, tout le territoire du Labrador et une grande partie de celui de l'île de Terre-Neuve n'est pas présentement desservi par les émetteurs de télévision présentement exploités.

RECOMMENDATIONS

PREMISE

The present trend towards resettlement will continue with the movement of population to growth centres in response to the economic and social attractions of such. Concentration must be on the provision of firm links—road, rail, water and air—between these centres.

This will mean the most economical use of the tax dollar in meeting the principal needs of both the businessman and the individual citizen throughout the province.

It is, therefore, submitted that the interests of Canada and its Province of Newfoundland and Labrador can be best served by the setting of specific transportation and communications objectives as follows:

I. ROADS

The construction of an up-to-standard all-weather trunk road system in the Province of Newfoundland and Labrador along with continued upgrading of the Trans-Canada Highway and an alternative Trans-Canada Highway route through Labrador from east to west.

Phase One of this proposed program is outlined in Appendix A to this brief.

Phase Two should provide for the linking up of the two principal land masses—the Island of Newfoundland and mainland Labrador—by a tunnel under the Straits of Belle Isle with interim improvement in the ferry service between St. Barbe and Forteau.

II. WATER

(a) The logic of Newfoundland's south coast location of Mortier Bay and Come-by-Chance as centres for bulk transshipment ports and the transshipment of containerized cargo from ocean leviathans to Great Lakes ports should be researched thoroughly by studies in the areas of economic, geological, and general marketing feasibility. These studies can best be carried out by personnel already on Federal payrolls.

Such studies should also, because of the rapid progress being made in less well endowed natural ports on the east coast of the United States, be given top priority for immediate action.

RECOMMANDATIONS

AVANT-PROPOS

La présente tendance vers le rétablissement se poursuivra par suite du mouvement de la population vers les centres de croissance qui possèdent certains attraits économiques et sociaux. On doit concentrer les efforts sur l'aménagement de liaisons fermes—routières, ferroviaires, maritimes et aériennes—entre ces centres.

Il faudra que le produit des impôts soit employé le plus économiquement possible pour répondre aux principaux besoins tant de l'homme d'affaires que du citoyen ordinaire de la province.

En conséquence, nous croyons que les intérêts du Canada et de sa province de Terre-Neuve et du Labrador seront le mieux sauvegardés par l'établissement des objectifs suivants dans les domaines des transports et communications.

I. VOIRIE

Construction d'un réseau de routes principales conforme aux normes et pouvant résister à toutes les intempéries dans la province de Terre-Neuve et du Labrador, amélioration constante de la route transcanadienne et tracé de rechange de la route transcanadienne traversant le Labrador de l'est à l'ouest.

La phase première de ce programme envisagé est exposée dans l'appendice A au présent mémoire.

La deuxième phase devrait assurer la liaison des deux principales étendues de terre que constituent l'île de Terre-Neuve et la partie continentale du Labrador par un tunnel sous-marin traversant le détroit de Belle-Isle, tout en améliorant dans l'intervalle le service de transbordement entre St-Barbe et Forteau.

TRANSPORT MARITIME

a) Est-il logique de situer sur la rive sud de Terre-Neuve, à Mortier Bay et Comme-by-Chance, les centres des ports de transbordement du vrac et du transbordement, à destination des ports des Grands lacs, des marchandises transportées en conteneurs par les gros océaniques? Cela doit faire l'objet de recherches approfondies par la poursuite d'études portant sur les possibilités économiques, géologiques, et commerciales, de préférence par des fonctionnaires émargeant déjà au budget du gouvernement fédéral.

En raison des progrès rapides que connaissent des ports naturels moins bien situés sur la côte est des États-Unis, on doit accorder à ces études la plus haute priorité de manière à ce que des mesures immédiates puissent être prises.

(b) The extension of the arterial highway system as recommended in Appendix A will eliminate the need for much of the present coastal shipping service operated at a loss by Canadian National Railways, but it will not eliminate the need for ferry facilities in areas not reached by the trunk road system.

Therefore, provision must be made for such service on at least a temporary basis until such communities have been taken out of isolation by the provision of future road tributaries.

III. AIR

(a) At Gander there is another ideal location for transshipment, this time of air-borne cargoes. Relatively inexpensive additions to existing facilities would not only provide a tremendous service to users of air transport throughout the world, but would protect the present Canadian investment in Gander against obsolescence and deterioration into second-rate status.

Gander is strategically located for incoming cargo on jumbo jets from all points of the compass destined for transshipment to smaller aircraft. It does require extension of its runways and the construction of warehousing facilities where shipments can be stored pending transfer to smaller aircraft or other modes of transportation. Cargoes received at Come-by-Chance and destined for air transport to the interior of the continent could also be very easily trucked to Gander.

On the other hand, the establishment of a transshipment deep water port at Mortier Bay might very well be complemented by a runway so that cargo could be moved for the completion of its journey by air where water transport did not meet the needs of shippers.

(b) The coastline of Newfoundland contains sizeable communities that will not in the foreseeable future be resettled elsewhere. At present their sole means of transportation is by water. Emergency situations arise from time to time when such transportation is either just not available or too slow to cope with emergency needs.

It is submitted that it is only the Government of Canada that can provide such communities with paved landing strips so that emergency trips may be made by both publicly owned and private planes. The list of such communities is contained in Appendix B.

b) Le prolongement du réseau d'artères envisagé à l'appendice A éliminera le besoin d'une grande partie du service de cabotage presentement exploité à perte par le National-Canadien, mais non celui de services de transbordement dans les régions non desservies par le réseau de routes principales.

En conséquence, on doit prévoir l'exploitation de pareils services, au moins temporairement, jusqu'à ce que l'aménagement de routes secondaires permette de tirer ces agglomérations de leur isolement.

III. TRANSPORT AÉRIEN

a) Gander constitue un autre emplacement idéal pour les opérations de transbordement des marchandises transportées par voie aérienne. L'expansion relativement peu coûteuse des installations actuelles assurerait non seulement un éminent service aux usagers du transport aérien à travers le monde, mais empêcherait que les présentes installations du Canada à Gander ne deviennent désuètes et de second ordre.

L'aéroport de Gander est située à un endroit de premier plan où arrive des quatre points cardinaux à bord des gros avions à réaction des marchandises devant être transbordées à bord d'aéronefs plus petits. On devrait en prolonger les pistes et y construire des entrepôts pour y entreposer les marchandises jusqu'à leur transbordement à bord d'aéronefs plus petits ou d'autres moyens de transport. Les marchandises reçues à Come-by-Chance et destinées à être transportées vers l'intérieur du continent pourraient également être très facilement transportées par camion jusqu'à Gander.

D'autre part, l'aménagement d'un port de transbordement en eau profonde à Mortier Bay pourrait fort bien s'accompagner de celui d'une piste, ce qui permettrait le transport aérien des marchandises pour la dernière partie du trajet dans les cas où le transport maritime ne répond pas aux besoins des expéditeurs.

b) La côte de Terre-Neuve compte des agglomérations d'une certaine importance qui ne seront pas rétablies ailleurs dans un proche avenir. Leur seul moyen de transport pour l'instant est le transport maritime. De temps à autre se produisent des situations d'urgence lorsque ces moyens ne sont pas disponibles ou trop lents pour répondre aux cas d'urgence.

Nous croyons que seul le Gouvernement du Canada est en mesure d'aménager des bandes d'atterrissage revêtues en dur dans ces agglomérations de manière à ce que les avions des services publics et les avions privés puissent effectuer des vols d'urgence. La liste de ces agglomérations figure à l'appendice B.

IV. RAIL

(a) It would appear that the extension of highways throughout the province will eliminate any need for services or additions to existing Canadian National Railways lines. Concentration here should be on extension of the movement already begun to provide improved warehousing and containerization facilities in the effort to lower the cost of transportation of goods by this traditional and dependable means.

(b) Following a careful survey of prime users of rail transportation facilities and the bearing on their business survival of the present Maritime Freight Rate Subsidy, it is recommended that for the Province of Newfoundland no provision be made for the introduction of an extra-regional subsidy, but that the present intra-regional subsidy be retained, not only on railway shipments, but extended to shipments made by all other modes of transportation.

V. TERMINAL AND WAREHOUSING FACILITIES

A study of containerization, new technology, and central warehousing indicates that a revolution in the movement of freight is taking place, a revolution certain to accelerate in the years ahead as shippers and ship operators become increasingly aware of their manifold benefits. Anticipating the radically different terminal and warehousing needs resulting from containerization and strategically located warehouses, a detailed and comprehensive examination of the present and future needs of this province should be undertaken immediately by competent personnel at present on Federal staff.

VI. COMMUNICATIONS

The completion of the contemplated domestic satellite communications system for Canada will do much to fill the communications vacuum already noted in the Province of Newfoundland, both island and mainland sections.

Any acceleration in the implementation of this program will help materially in a province where isolation on a per capita basis is probably the most serious in Canada.

IV. TRANSPORT FERROVIAIRE

a) Il semblerait que l'aménagement de routes à la grandeur de la province ne nécessitera pas la mise en œuvre de services ni le prolongement des voies actuelles du National-Canadien. On devrait tendre à poursuivre les efforts déjà entrepris en vue d'améliorer les installations d'entreposage et de conteneurisation de manière à diminuer le coût du transport des marchandises par ce moyen traditionnel et fiable.

b) A la suite d'une étude approfondie des principaux usagers du transport ferroviaire et de l'importance que revêt pour la survie de leur exploitation commerciale la présente subvention à l'égard des taux de transport des marchandises dans les provinces maritimes, nous recommandons que dans le cas de la province de Terre-Neuve il ne soit pas prévu l'établissement d'une subvention extra-régionale, mais qu'on continue d'appliquer la présente subvention intra-régionale, non seulement à l'égard des expéditions par chemin de fer mais aussi par tous les autres moyens de transport.

V. INSTALLATIONS DE TERMINUS ET D'ENTREPOSAGE

Une étude du phénomène de la conteneurisation, des nouvelles techniques et des installations centrales d'entreposage révèle qu'il se produit dans le domaine du transport du fret une révolution qui s'accentuera certainement dans les années à venir à mesure que les expéditeurs et les exploitants de navires prendront de plus en plus conscience des nombreux avantages qu'elles comportent. De manière à prévoir les besoins absolument différents en matière de terminus et d'entrepôts qui résulteront du phénomène de la conteneurisation et de l'emplacement d'entrepôts à des endroits de premier plan, une étude détaillée et globale des besoins actuels et futurs de la province doit être immédiatement entreprise par les fonctionnaires compétents de l'administration fédérale.

VI. COMMUNICATIONS

La réalisation envisagée du réseau intérieur canadien de communications par satellite aidera beaucoup à combler les lacunes déjà signalées dans ce domaine pour ce qui est des parties insulaire et continentale de la province de Terre-Neuve.

Tout progrès sensible que connaîtra la réalisation de ce programme améliorera la situation d'une province où l'isolement par tête d'habitant atteint probablement la proportion la plus élevée au Canada.

FINANCE

ROADS

It is submitted that the financing a trunk road system outlined in Appendix A should be on a Federal-Provincial cost-sharing basis on a 75-25% ratio.

It is further submitted that the extension of the Trans-Canada Highway on an alternative route through Labrador and the tunnel under the Straits of Belle Isle should be on a Federal-Provincial cost-sharing basis on a 90-10% ratio.

WATER

The province would expropriate where necessary all land essential to the installation of docking and materials-handling facilities and the Federal Government assume responsibility for the construction and equipping of transshipment ports.

The community, in conjunction with the province, will undertake responsibility for providing warehousing facilities.

AIR

The province will provide all land necessary for the establishment of warehouses and, wherever possible, make available Crown lands that can be used for the establishment or extensions of runways in the upgrading to present and future standards of transshipment airports and landing strips.

The actual construction of warehouses will be a combined community and provincial responsibility.

FINANCES

VOIRIE

Nous croyons que le financement de l'aménagement du réseau de routes principales exposé à l'appendice A doit se faire selon un régime à frais partagés par les gouvernements fédéral et provincial selon une proportion de 75-25.

Pour ce qui est du prolongement de la route transcanadienne sur un tracé de rechange traversant le Labrador et de la construction d'un tunnel sous-marin traversant le détroit de Belle-Isle, nous croyons que le financement doit se faire selon un régime à frais partagés par les gouvernements fédéral et provincial selon une proportion de 90-10.

TRANSPORT MARITIME

La province exproprierait au besoin tous les terrains nécessaires à l'aménagement d'installations d'amarrage et de manutention des marchandises et le gouvernement fédéral assumerait la responsabilité de la construction et de l'équipement des ports de transbordement.

L'agglomération, de concert avec le gouvernement provincial, assumera la responsabilité de fournir les installations d'entreposage.

TRANSPORT AÉRIEN

La province fournira tous les terrains nécessaires à l'aménagement d'entrepôts et, dans la mesure du possible, mettra à la disposition des intéressés les terres de la Couronne pouvant servir à l'établissement ou au prolongement de pistes dans le cadre de l'amélioration des aéroports et bandes d'atterrissage de transbordement en conformité des normes actuelles et futures.

La construction des entrepôts relèvera conjointement des administrations municipale et provinciale.

APPENDIX A

PHASE 1

TOTAL NUMBER OF MILES AND COST OF RECONSTRUCTION, PAVING AND MAINTENANCE OF AN UP-TO-STANDARD ALL-WEATHER TRUNK ROAD SYSTEM

Map Ref.	Route	Distance	Cost	Maintenance Costs 1960–68
			$	$
1	Port-aux-Basques to Rose Blanche	28 mi.	1,500,000	600,000
2	Deer Lake to St. Anthony	272 mi.	33,000,000	3,800,000
3	T.C.H. to LaScie	70 mi.	8,000,000	1,700,000
4	Lewisporte to Twillingate via New World Island	51 mi.	13,000,000	2,000,000
5	Boyd's Cove to Gander Bay	22 mi.	3,300,000	12,000
6	T.C.H. near Gander via Gander Bay, Carmanville, Wesleyville, Gambo to T.C.H.	157 mi.	30,000,000	2,900,000
7	T.C.H. near Bishop's Falls to Harbour Breton	128 mi.	15,000,000	150,000
8	Clarenville to Bonavista	65 mi.	19,000,000	3,200,000

APPENDIX "R"

Submitted to the Standing Committee, Transport and Communications, House of Commons, in behalf of the residents of Bell Island by their representative elected at an open public meeting held on Thursday, January 3, 1969.

It is respectfully submitted that:

WHEREAS Bell Island, a hard-working happy community of over 14,000 persons until 1959, became an economic disaster area as a result of the arbitrary decision of the management of its major industry commencing in that year; and that

WHEREAS, through the combined efforts of the Federal and Provincial Governments, some 8,000 of these inhabitants have been relocated in employment situations elsewhere in Canada, there still remain geographically and economically marooned a hard core of non-transplantable 6,000 persons; and that

WHEREAS Federal, Provincial, and Canada Manpower authorities agree that this present 6,000 population represents a permanent total of inhabitants without any prospects for present or future business or industrial employment on the Island; and that

WHEREAS the Federal and Provincial Governments and the Premier of Newfoundland and the Member of the House of Assembly for Bell Island have reached a blind alley in every effort to re-establish the Dosco mine or to bring a new industry to the Island; and that

WHEREAS it is the isolation of the Island from the subcontinent of Newfoundland and the heavy expense of ferry service that prevents potential wage-earners among the 6,000 Bell Island population from securing off-island employment or in-job training; and that

WHEREAS, even with the present aproximately $300,000.00 annual subsidization by the Federal Government of the Bell Island ferry service, the fare schedule is too high for Bell Island people to travel regularly from the Island—an additional handicap for people who are least able to afford any added handicap, the people with the lowest

APPENDICE «R»

Présenté au Comité permanent des Transports et Communications de la Chambre des communes au nom des résidents de Bell Island, par les représentants qu'ils se sont choisis lors d'une assemblée publique tenue le jeudi 30 janvier 1969.

Le présent mémoire fait respectueusement valoir que:

CONSIDÉRANT que Bell Island, qui comptait une population laborieuse et paisible de plus de 14,000 personnes jusqu'en 1959, s'est trouvé dans un marasme économique par suite d'une décision arbitraire de la Direction de sa principale industrie, applicable à partir de cette année-là; et

CONSIDÉRANT que, grâce aux efforts combinés des gouvernements fédéral et provinciaux, environ 8,000 de ces habitants ont été placés en emploi dans d'autres endroits du Canada, mais qu'il reste encore du point de vue géographique et économique, un groupe de 6,000 personnes non transplantables; et

CONSIDÉRANT que les autorités fédérales, provinciales et la Direction de la Main-d'œuvre du Canada admettent d'un commun accord que ce groupe actuel de 6,000 personnes constitue une population permanente n'ayant, actuellement ou pour l'avenir, aucunes perspectives d'emploi dans le commerce ou l'industrie dans l'île; et

CONSIDÉRANT que tous les efforts des gouvernements fédéral et provinciaux, du premier ministre de Terre-Neuve et du député de Bell Island à la Chambre des communes pour rouvrir la mine Dosco ou pour établir dans l'île une nouvelle industrie ont abouti à une impasse et

CONSIDÉRANT que c'est l'isolement de l'île du sous-continent de Terre-Neuve et les lourdes dépenses d'un service de transbordeurs qui empêchent les salariés éventuels que compte une population de 6,000 âmes à Bell Island, de trouver de l'emploi en dehors de l'île ou de suivre une formation en emploi et

CONSIDÉRANT que malgré la subvention fédérale annuelle d'environ $300,000 au service de transbordeurs de Bell Island, le prix des billets est trop élevé pour que les habitants de cette localité puissent se rendre régulièrement au travail à l'extérieur de l'île—ce qui est un autre désavantage pour des gens le moins en mesure de sur-

income among the people of the province with the lowest average income in Canada; and that

WHEREAS the cost of transportation of goods and materials necessary to life, plus the added percentage mark-up by Island retailers combine to place the cost of living at 25-30 per cent higher for residents of Bell Island who are captive customers of Island retailers because of inability to travel to the main Island of Newfoundland without a heavy incubus of expense; and that

WHEREAS until some permanent solution to the isolation of Bell Island is reached through the building of a causeway, a bridge, or a tunnel, the ferry service must continue at an increasing cost to the Federal Government because of the shrinking number of those able to use the ferry; and that

WHEREAS this isolation can result in nothing but capital depreciation of valuable private and government capital assets on the Island (schools, hospital, etc.); and that

WHEREAS isolation of the population can only increase from year to year the constant increase of welfare expenditures unless the population of Bell Island is given the chance to rehabilitate themselves economically by commuting to employment where employment exists; the only

SOLUTION to the existing problem with its manifold adverse economic and morale implications is for the Federal Government to follow to its natural conclusions the principle involved in its present participation of ferry service from Bell Island to the subcontinent of Newfoundland, and provide free ferry service for every Bell Island resident properly identified as such.

IT IS FURTHER SUBMITTED THAT:
such ferry service is a moral obligation of a government that did in the past benefit from the taxes of the company whose disastrous decision placed Bell Islanders in their present unfortunate plight as well as from the taxes paid by those employee Bell Islanders themselves; and that

monter tout obstacle additionnel, puisqu'il s'agit d'un groupe d'habitants dont le revenu moyen est le plus faible de tous les travailleurs du Canada; et

CONSIDÉRANT que le coût du transport des marchandises et des matières indispensables à la vie, lequel est majoré d'un tantième par les détaillants de l'île, est de 25 à 30 p. 100 plus élevé pour les résidents de Bell Island qui doivent s'approvisionner forcément dans l'île, vu leur incapacité de se rendre à la principale île de Terre-Neuve sans encourir de fortes dépenses; et

CONSIDÉRANT que jusqu'à ce qu'on trouve une solution permanente à l'isolement de Bell Island au moyen de la construction d'une chaussée, d'un pont ou d'un tunnel, le service des transbordeurs doit être maintenu et coûter des sommes de plus en plus fortes au gouvernement fédéral, étant donné le nombre croissant de ceux qui sont en mesure de se servir du transbordeur; et

CONSIDÉRANT que cet isolement ne saurait entraîner que la dépréciation de précieux avoirs de l'État et des particuliers dans l'île (écoles, hôpitaux, etc.); et

CONSIDÉRANT que l'isolement de la population ne peut qu'augmenter d'année en année le montant des dépenses croissantes pour le bien-être, à moins que la population de Bell Island n'ait la chance de se réadapter du point de vue économique en se rendant au lieu de l'emploi au moyen d'un abonnement au chemin de fer; la seule

SOLUTION au problème actuel et à ses multiples et néfastes conséquances d'ordre moral et économique que peut apporter le gouvernement fédéral, c'est de suivre jusqu'au bout le principe que comporte sa participation actuelle au service de transbordeurs entre Bell Island et le sous-continent de Terre-Neuve, et de mettre gratuitement ce service de transbordeurs à la disposition de toute personne pouvant établir qu'elle est un résident de Bell Island.

NOUS ESTIMONS EN OUTRE qu'un tel service de transbordeurs est une obligation morale de la part d'un gouvernement qui a bénéficié effectivement dans le passé des impôts versés par la compagnie dont la décision désastreuse a placé les habitants de Bell Island dans la malheureuse situation où ils se trouvent actuellement, ainsi que des impôts versés par les employés de Bell Island; et

such ferry service will open up opportunities of employment to able-bodied Bell Islanders making possible the curtailing of relief rolls simultaneously with the addition to the Federal Treasury of taxes on the incomes of these thus rehabilitated; and that

immediate action is urgent to avoid further spiralling of the costs of keeping large numbers of Bell Islanders in enforced non-productivity, and further erosion of the morale of the adult population with its possible contagion on the young.

qu'un tel service de transbordeurs offrira des chances d'emploi aux robustes habitants de Bell Island, ce qui permettra de réduire le nombre des assistés tout en ajoutant au trésor fédéral les impôts prélevés sur les revenus de ceux qui seront ainsi réintégrés dans l'emploi, et

que des mesures immédiates s'imposent pour empêcher que le maintien d'un grand nombre d'habitants de Bell Island dans l'improductivité forcée n'accentue la courbe ascendante des frais et pour éviter que le moral de la population adulte ne s'affaiblisse davantage et que ce malaise se répande parmi les jeunes.

APPENDIX "S"

WEATHER STATISTICS RELATING TO ST. JOHN'S AIRPORT

1. What were the number of hours when the ceiling was less than 200 feet and/or visibility less than a ½ mile for the following airports for the year 1967: St. John's, Nfld., Gander, Nfld., Stephenville, Nfld., Moncton, N.B., Sydney, N.S., Halifax International, Montreal International and Toronto International?

2. What were the number of hours when the ceiling was less than 200 feet to 400 feet and/or visibility ½ to ¾ of a mile for the following airports for the year 1967: St. John's, Nfld., Gander, Nfld., Stephenville, Nfld., Moncton, N.B., Sydney, N.S., Halifax International, Montreal International and Toronto International?

3. What were the number of hours when the ceiling was less than 500 to 900 feet and/or visibility 1 to 2½ miles, for the following airports for the year 1967: St. John's, Nfld., Gander, Nfld., Stephenville, Nfld., Moncton, N.B., Sydney, N.S., Halifax International, Montreal International and Toronto International?

ANSWER

(Text)

Hon. Paul T. Hellyer (Minister of Transport): 1. St. John's, Nfld., 608; Gander, Nfld., 254; Stephenville, Nfld. 220; Moncton, N.B. 202; Sydney, N.S. 323; Halifax International 787; Montreal International 51; Toronto International 135.

2. If it is meant when the ceiling was 200 feet to 400 feet and/or visibility ½ to ¾ mile the answer is St. John's, Nfld. 1275; Gander, Nfld. 675; Stephenville, Nfld. 374; Moncton, N.B. 620; Sydney, N.S. 1059: Halifax International 1098; Montreal International 174; Toronto International 204.

3. If it is meant when the ceiling was 500 to 900 feet and/or visibility 1 to 2½ miles the answer is St. John's Nfld. 1712; Gander, Nfld. 1430; Stephenville, Nfld. 848; Moncton, N.B. 1114; Sydney, N.S. 1365; Halifax International 1570; Montreal International 807, Toronto International 809.

APPENDICE «S»

LES PLAFONDS ET LA VISIBILITÉ AUX AÉROPORTS

1. Pendant combien d'heures le plafond a-t-il été de moins de 200 pieds et (ou) la visibilité inférieure à un demi-mille aux aéroports suivants en 1967: Saint-Jean, Gander et Stephenville (T.-N.), Moncton (N.-B.), Sydney (N.-É), ainsi que les aéroports internationaux de Halifax, Montréal et Toronto?

2. Pendant combien d'heures le plafond a-t-il varié entre 200 et 400 pieds et (ou) la visibilité s'est échelonnée entre un demi et trois quarts de mille aux aéroports suivants en 1967: Saint-Jean, Gander et Stephenville (T.-N.), Moncton (N.-B.), Sydney (N.-É.), ainsi que les aéroports internationaux de Halifax, Montréal et Toronto?

3. Toujours en 1967, pendant combien d'heures le plafond a-t-il varié entre 500 et 900 pieds et (ou) la visibilité s'est échelonnée entre un mille et deux milles et demi aux aéroports suivants: Saint-Jean, Gander et Stephenville (T.-N.), Moncton (N.-B.), Sydney (N.-É.), ainsi que les aéroports internationaux de Halifax, Montréal et Toronto?

L'hon. Paul T. Hellyer (ministre des Transports): 1. A Saint-Jean (T.-N.), 608 heures; à Gander (T.-N.), 254; à Stephenville (T.-N.) 220; à Moncton (N.-B.), 202; à Sydney (N.-É.) 323; à l'aéroport international d'Halifax, 787; à l'aéroport international de Montréal, 51; et à l'aéroport international de Toronto, 135.

2. S'il s'agit des périodes de temps où le plafond a varié entre 200 et 400 pieds et (ou) la visibilité entre ½ et ¾ de mille, la réponse est la suivante: à Saint-Jean (T.-N.), 1,275 heures à Gander (T.-N.), 675; à Stephenville (T.-N.), 374; à Moncton (N.-B.), 620; à Sydney (N.-É.) 1,059; à l'aéroport international d'Halifax, 1,098; à l'aéroport international de Montréal, 174; et à l'aéroport internationaal de Toronto, 204.

3. S'il s'agit des périodes de temps où le plafond a varié entre 500 et 900 pieds et (ou) la visibilité entre 1 et 2½ milles, la réponse est la suivante: à Saint-Jean (T.-N.), 1,712 heures à Gander (T.-N.), 1,430; à Stephenville (T.-N.) 848; à Moncton (N.-B.) 1,114; à Sydney (N.-É.), 1,365; à l'aéroport international d'Halifax, 1,570; à l'aéroport international de Montréal, 807; et à l'aéroport international de Toronto, 809.

APPENDIX "T"

BRIEF

To The Parliamentary Standing Committee on Transportation:

The Railway Unions Labour Council composed of the following Unions:

International Association of Machinists & Aerospace Workers, Local No. 1237,
Brotherhood Railway Carmen of America, Local No. 551,
Brotherhood of Locomotive Firemen & Enginemen, Local No. 889,
Brotherhood of Maintenance of Way Employees, Local No. 251,
Brotherhood of Railway Trainmen, Local No. 923,
Brotherhood Railway Airline & Steamship Clerks, Freight Handlers, Express & Station Employees, Local No. 443,
Journeymen, Pipefitters, Apprentices and Helpers of North America and Canada, Local No. 425,
International Brotherhood Electrical Workers, Local No. 514,
Transport & Communication Employees Union, System Division No. 85,
Sheet Metal Workers International Union, Local No. 552,
International Brotherhood Boilermakers, Iron Shipbuilders, Blacksmiths & Helpers of North America, Local No. 717,

ubmits this Brief for your consideration and upport. For the purposes of brevity the words "the Council" will denote the Railway Unions Labour Council.

The Council has been accused of self nterest in its objections to the discontinuance f the passenger trains—with this we violently disagree. The Council Unions, being an organized body, have protested against the ction proposed as being wrong: not so with he hard core of rail travellers in the towns nd municipalities who have no means by which to express their opinions or register ny opposition. The Railway Transport Committee, by holding the hearings in St. John's, id not hear the dormant opposition to the emoval of passenger trains. The Council eels that the decision of the Railway Transort Committee is grossly unfair when they lesignated April 15, 1969, as the deadline for he decision as to which service is better for he travelling public—passenger trains or usses. Passenger trains operate tri-weekly in he fall and winter months and when the usses went into operation on December 2nd, 968, two busses left St. John's daily—East nd West a total of 28 busses per week and 6 assenger trains. Anybody with a grain of

APPENDICE «T»

MÉMOIRE

Au Comité permanent des Transports du Parlement:

L'union des syndicats de cheminots qui comprend les syndicats suivants:

International Association of Machinisis & Aerospace Workers, section locale 1237, *Brotherhood Railway Carmen of America*, section locale 551, *Brotherhood of Locomotive Firemen & Enginemen*, section locale 889, *Brotherhood of Maintenance of Way Employees*, section locale 251, *Brotherhood of Railway Trainmen*, section locale 923, *Brotherhood Railway Airline & Steamship Clerks, Freight Handlers, Express & Station Employees*, section locale 443, *Journeymen Pipefitters Apprentices and Helpers of North America and Canada*, section locale 425, *International Brotherhood Electrical Workers*, section locale 514, *Transport & Communication Employees Union, System Division 85, Sheet Metal Workers International Union*, section locale 552, *International Brotherhood Boiler Makers, Iron Shipbuilders, Blacksmiths & Helpers of North America*, section locale 17,

vous soumet le présent mémoire en vue d'obtenir votre appui. Aux fins d'être concis, les mots «le Conseil» signifieront l'Union des syndicats de cheminots.

On a accusé l'Union de manifester un intérêt personnel lorsqu'elle s'oppose à la discontinuation des trains à voyageurs—nous répudions violemment cette assertion. Les unions de syndicats qui constituent un corps organisé ont protesté contre la mesure proposée parce qu'elle leur semblait néfaste; il n'en a pas été ainsi du noyau d'usagers du rail dans les villes et les municipalités, qui n'ont aucun moyen d'exprimer leurs opinions ou de faire valoir une opposition quelconque. Le Comité des transports par chemin de fer qui a tenu des séances à St. John's n'a pas entendu cette opposition muette à l'enlèvement des trains à voyageurs. L'Union est d'avis que le Comité des transports par chemin de fer a pris une décision extrêmement injuste lorsqu'il a fixé le 15 avril 1969 comme date-limite pour la décision sur le choix du meilleur service pour le public voyageur—soit des trains ou des autobus. Les trains à voyageurs fonctionnent trois fois par semaine dans les mois d'automne et d'hiver. Lorsque les autobus ont été mis en service, le 2 décembre 1968, deux

common sense would see which is the better service, especially for short travel passengers—brand new busses leaving daily or an outmoded passenger train on narrow guage track which operates only three days a week and takes 22 hours to reach Port-aux-Basques. A fairer trial would be to run passenger trains and busses on the same schedule. We list hereunder the number of passengers carried for the years 1961 to 10 months of 1968:

Year	St. John's to Port-aux-Basques— Train 101	Port-aux-Basques to St. John's— Train 102	
1968 (10 mo.).....	35,210	32,137	67,347
1967.....	42,289	38,720	81,009
1966.....	44,857	42,939	87,796
1965.....	61,689	57,357	119,046
1964.....	62,249	56,058	118,307
1963.....	54,041	57,545	111,586
1962.....	60,899	65,668	126,567
1961.....	73,908	77,583	151,491

Allowing 2,000 more passengers by December 31, 1968, would make the total for 1968—69,347. In 1965 the highway was completed across the Island and in 1966 there was a decrease of 6786 passengers. This was the year the C.N.R. elected upon which to base their argument for the discontinuance of passenger trains. The figures indicate the monopoly the C.N.R. had on passenger train travel up to 1965. Competition from private automobiles or other transportation was not a factor. Even in 1968 for a ten-month period 67,347 passengers were carried. We repeat that the passenger trains could have been speeded up—in fact, experienced enginemen and trainmen tell us that the run could be shortened by 3½ hours. But speed is not enough—we need better equipment, e.g. air-conditioned cars, and a smoother ride such as mainland travellers enjoy. We assert that with faster and better equipment no bus or private car could seriously compete with the railway.

The costs advanced at the hearings before the Railway Transport Committee for the

autobus partaient de St. John's tous les jours—de l'est et de l'ouest—soit un total de 28 autobus par semaine et de six trains à voyageurs. Quiconque possède un grain de bon sens verra tout de tuite lequel est le meilleur service, spécialement pour de courtes randonnées—des autobus flambant neufs qui sont en service tous les jours ou un train à voyageurs démodé qui circule sur une voie étroite, ne fonctionne que trois jours par semaine et qui prend 22 heures pour atteindre Port-aux-Basques. A titre d'essai raisonnable, on pourrait mettre en service des autobus et des trains à voyageurs qui suivraient un horaire semblable. Le tableau ci-dessous indique le nombre de voyageurs transportés depuis 1961 jusqu'à la fin d'une période de 10 mois en 1968:

Année	St. John's à Port-aux-Basques — Train nº 101	Port-aux-Basques à St. John's — Train nº 102	
1968 (10 mois)...	35,210	32,137	67,347
1967.....	42,289	38,720	81,009
1966.....	44,857	42,939	87,796
1965.....	61,689	57,357	119,046
1964.....	62,249	56,058	118,307
1963.....	54,041	57,545	111,586
1962.....	60,899	65,668	126,567
1961.....	73,908	77,583	151,491

Si l'on ajoute 2,000 voyageurs à la date du 31 décembre 1968, le total serait de 69,347 cette année-là. En 1965, la route qui traverse l'île a été parachevée et en 1966, on a constaté une baisse de 6,786 dans le nombre de voyageurs. C'est l'année qu'a choisie le National-Canadien pour fonder sa décision sur la discontinuation des trains à voyageurs. Les chiffres démontrent que le National-Canadien détenait le monopole du trafic-voyageurs jusque'n 1965. La concurrence des voitures privées ou d'autres transports n'entrait pas même en ligne de compte. Même en 1968 sur une période de 10 mois, il a transporté 67,347 voyageurs. Nous répétons que la vitesse des trains à voyageurs aurait dû être accélérée—en fait, des ingénieurs de locomotives et des cheminots d'expérience nous disent que le parcours aurait pu être raccourci de 3 heures et demie. La vitesse ne suffit pas—il faut du meilleur outillage (c'est-à-dire des wagons climatisés et un roulement plus silencieux dont les voyageurs puissent jouir). Nous affirmons que si les trains étaient plus rapides et mieux équipés, ni autobus ni voitures privées ne pourraient rivaliser avec eux.

Lors des témoignages entendus au Comité des transports, on a fait valoir qu'il en coûte-

removal of curves was 140 millions, and for the construction of a standard guage 240 millions. To our knowledge there has not been any cost survey by an independent engineering firm on the elimination of curves or provision of mainland guage.

In Newfoundland we have seen the advantages of Confederation, both socially and materially, and St. John's has a new waterfront, and Port-aux-Basques has a modern ferry terminal, and millions of dollars have been spent to bring these and other improvements about, but the narrow guage railway remains the same as when it was built 70 years ago. Why shouldn't this narrow guage be straightened out, even at the cost mentioned? It is our opinion, and this is shared by others, that the C.N.R. in its 18 years of operation in this Province could have removed the vast majority of the curves so that faster trains could have been possible. It certainly is not an engineering impossibility in the light of the machinery available to-day. It is the lifeline of the Province and it is the only type of transportation which operates adequately and safely in all seasons. In fact the discontinuance of the passenger service will put us in the position of being the only Province of its size without a railway passenger service. Too much emphasis has been placed on the loss in 1966 of $916,000. An editorial in the St. John's "Evening Telegram" set out an opinion which is shared by many: "As far as we are concerned, and as we have said before, there is too much emphasis on the cost of this service. We don't think that there is any Province in Canada where the cost of maintaining Federal public services have been so minutely and constantly examined than in Newfoundland. And on June 7, 1967, the same paper, in favour of maintaining the railway passenger service, said in part "that the C.N.R. is fighting to close its branch lines and abolish its passenger service altogether. But this is perfectly normal C.N.R. policy in Newfoundland. Ever since Confederation the Railway was waged a campaign to duck as much of its responsibility as possible. We had to fight them in Court to make them accept the responsibilities which were plainly written out in the Terms of Union and they have never forgiven us for winning our case."

rait $140 millions pour enlever les courbes et $240 millions pour construire une voie ferrée à écartement normal. Nous ne sachons pas qu'une firme particulière d'ingénieurs ait fait une enquête sur ce que coûterait l'élimination des courbes ou la construction d'une voie à écartement normal sur la terre ferme.

Nous avons connu à Terre-Neuve les avantages de la Confédération, du point de vue social et matériel. La partie de la ville de Saint-Jean qui faisait face à la mer a été reconstruite; Port-aux-Basque possède une gare de transbordeurs moderne, et des millions de dollars ont été dépensés pour ces améliorations et d'autres encore, mais la voie ferrée à écartement étroit est la même que celle qui a été construite il y a 70 ans. Pourquoi cette voie étroite ne serait-elle pas redressée, même au coût mentionné? Nous sommes d'avis, et d'autres partagent notre opinion, qu'au cours de ces 18 années d'exploitation dans la province de Terre-Neuve le National-Canadien aurait pu éliminer la grande majorité des courbes de sorte qu'il eût été possible de mettre en service des trains plus rapides. Ce n'est certes pas une impossibilité technique, étant donné le genre de machines dont on dispose aujourd'hui. Le réseau de voies ferrées est la vie même de la province et c'est le seul moyen de transport qui fonctionne d'une manière sûre et satisfaisante en toute saison. La discontinuation du service de trains à voyageurs ferait de nous la seule province de son étendue qui serait privée de ce service. On a trop insisté sur la perte de $916,000 subie en 1966. Un éditorial de l'«*Evening Telegram*» de St. John's a exposé une opinion que partagent un grand nombre de personnes: «Pour ce qui nous concerne et comme nous l'avons déjà dit, on a trop insisté sur le coût de ce service. Nous ne connaissons pas de province au Canada où le coût du maintien des services publics par le gouvernement fédéral ait été examiné aussi minutieusement et constamment qu'à Terre-Neuve». Et de continuer le même journal, dans son numéro du 7 juin 1967, où il favorisait le maintien du service de trains à voyageurs: «le National-Canadien fait tous les efforts possibles pour fermer ses lignes d'embranchement et abolir à la fois son service de trains à voyageurs. Cela semble une politique parfaitement normale de la part du National-Canadien, à Terre-Neuve. Depuis le début de la Confédération, cette compagnie de chemin de fer a mené une campagne pour se dérober le plus possible à ses engagements. Il nous a fallu la traduire en justice pour lui faire respecter les engagements qui étaient clairement énoncés dans les conditions de l'Union et elle ne nous a jamais pardonné d'avoir gagné notre cause.»

The Railway Transport Committee has set an undetermined day prior to April 15, 1969, to render a decision as to the trans-island transportation service for Newfoundland—one, the passenger train, but needing upgrading and modernization, and the other an unproven bus service. It is incredible that the Transportation Committee could come to St. John's hold hearings and decide in the short period of approximately four months that bus transportation is the best method of transportation for this Province ad infinitum. If those men are not clairvoyant, how can they decide in this short period that a bus service is the best all round service for Newfoundland. We take issue on this alone and say that it will take 3 to 5 years to decide the merit of such service. In Newfoundland there is only one two-lane highway over which to travel by car or trailer truck. The highway parallels the rail line for most of the way and the trains and busses serve the same towns and settlements with the exception of that portion of the portion of the highway between Badger and Deer Lake. The busses provide a new service to the people in the Springdale and Baie Verte area. People in this area had to drive a considerable distance to Badger to join the train. Notwithstanding this the passenger train can give a better service if upgraded and modernized.

With reference to the loss on operation in 1965—$918,000—we do not have access to the breakdown of these figures—therefore we reserve comment. However, we do not accept this figure hook, line and sinker. We submit that the St. John's Municipal Council, which operates the St. John's Transportation System, has budgeted a $525,000 amount to cover losses on its operation in 1969. The St. John's Municipal Council is only a mite in transportation as compared to the C.N.R.

The Constitutional Conference has just ended and as at previous conferences the Premiers of the Atlantic Provinces have talked long and hard on regional disparity. Our narrow, winding, rail line is a glaring example of regional disparity—on the mainland standard guage and in Newfoundland narrow. We ask your support to correct this disparity by the retention of an upgraded passenger service comparable to that enjoyed by mainland train travellers.

Le Comité des transports par chemin de fer a fixé une date indéterminée et antérieure au 15 avril 1969 pour rendre une décision concernant le choix du service de transport dans l'île de Terre-Neuve—d'un côté, le train à voyageurs, mais un service qui a besoin d'être rénové et modernisé; de l'autre, un service d'autobus qui n'a pas fait ses preuves. Il est incroyable que le Comité des transports puisse venir à Saint-Jean et y tenir des séances afin de décider dans à peine 4 mois que le transport par autobus est le meilleur moyen de transport pour cette province à l'avenir. A moins d'être des voyants, comment peuvent-ils décider en si peu de temps qu'un service d'autobus est le meilleur service en général pour Terre-Neuve? Nous contestons ce point et disons qu'il faudra de 3 à 5 ans pour juger de la valeur d'un tel service. A Terre-Neuve, il n'y a qu'une route à deux voies que peuvent emprunter les voitures ou les camions-remorques. La route suit la voie ferrée sur la plus grande partie de son parcours et les trains et les autobus desservent les mêmes villes et villages à l'exception de ce tronçon de route qui relie Badger à Deer Lake. Les autobus assurent un nouveau service à la population de Springdale et de Baie Verte. Les habitants de cette région doivent parcourir une très grande distance pour se rendre à Badger et y prendre le train. Nonobstant ce qui précède, le train à voyageurs peut fournir un meilleur service s'il est rénové et modernisé.

Quant à la perte subi en 1965—$918,000—nous nous abstenons de tous commentaires puisque nous n'avons pas accès à la ventilation de ces chiffres. Cela ne veut pas dire, toutefois, que nous acceptons ce chiffre d'emblée. Nous faisons observer que le Conseil municipal de St. John's, qui exploite le *St. John's Transportation System*, a prévu le montant de $525,000 dans son budget pour couvrir ses pertes d'exploitation en 1969. En matière de transport, le Conseil municipal de St. John's n'est rien en comparaison du National-Canadien.

La Conférence constitutionnelle vient de se terminer et, comme aux assises précédentes, les premiers ministres des provinces de l'Atlantique ont conféré longtemps sur les disparités régionales. Notre voie ferrée, étroite et sinueuse, est un exemple frappant de disparité régionale—pour ce qui concerne les voies à écartement normal sur la terre ferme et les voies étroites à Terre-Neuve. Nous sollicitons votre appui pour remédier à cette disparité en maintenant un service de trains à voyageurs rénové et comparable à celui dont jouissent les voyageurs qui empruntent les trains de la terre ferme.

We are concerned over the loss of employment should the passenger trains be discontinued and, whilst the C.N.R. has plans and benefits for those affected, yet we feel that in cutting off one-half of the transportation system more employees then the 129 mentioned in the report of the Railway Transport Committee will be affected.

We are also apprehensive concerning the freight traffic. Strong competition exists from the side leaders which run to St. John's and Corner Brook. And now that Corner Brook is to get wharf improvements faster freight service can be expected from these ships. The narrow guage with upwards of 1200 curves is a bottleneck to competition to the fast freight service of the side loaders.

Assuming that the passenger trains are replaced by busses and in this operation costs begin to mount as did the cost of the passenger train service, is there any guarantee that the busses will not meet the same fate as the trains?

We welcome the Parliamentary Transportation Committee to Newfoundland and it is hoped that you will experience the hospitality of this Island. We had hoped that the Committee would travel by train to Port-aux-Basques, and return by bus, or vice versa. By this you would have had the experience of travel by both systems and therefrom realize the inadquacy of the passenger train service.

F. G. Chancey
Chairman

F. A. F. Lush
Secretary

Nous nous inquiétons de la perte d'emploi qui résulterait de la discontinuation des trains à voyageurs et, bien que le National-Canadien ait des programmes et des prestations à l'intention de ceux qui seraient touchés, nous estimons quand même que la suppression de la moitié du système de transport mettrait à pied plus d'employés que les 129 mentionnés dans le rapport du Comité des transports par chemin de fer.

Nous nous inquiétons aussi au sujet du trafic-marchandises. Les autres voituriers qui exploitent des services entre St. John's et Corner Brook offrent une forte concurrence. Et lorsque les quais de Corner Brook auront été améliorés on peut s'attendre à ce que les navires qui y passeront fournissent un service de transport plus rapide. La voie étroite et ses 1200 courbes ou plus est une entrave à la concurrence qu'offre le service rapide de transport des marchandises des autres voituriers.

S'il arrivait que les trains à voyageurs soient remplacés par des autobus et que les coûts de cette dernière exploitation commencent à monter comme l'a fait celle du service de trains à voyageurs, y a-t-il une garantie que les autobus ne subiront pas le même sort que les trains?

Nous sommes heureux d'accueillir les membres du Comité parlementaire des transports à Terre-Neuve, et nous espérons que vous jouirez de l'hospitalité qui vous est offerte dans l'île. Nous avions espéré que les membres du Comité se rendraient par train à Port-aux-Basques et en reviendraient par autobus, ou vice versa. Vous auriez ainsi eu l'expérience des deux systèmes de transport et pu vous rendre compte de l'inefficacité du service de trains à voyageurs.

Le président,
F. G. Chancey

Le secrétaire,
F. A. F. Lush

BY THE RAILWAY TRANSPORT COMMITTEE

JUDGMENT

WOODARD, C.:

On September 29, 1967, The Canadian National Railway, hereinafter referred to as the "Railway" filed with the Railway Transport Committee of the Canadian Transport Commission, an application for leave to discontinue its passenger Trains Nos. 101 and 102 and the coach service being provided on mixed Trains Nos. 203 and 204, both services operating between St. John's and Port aux Basques, in the Province of Newfoundland, and the substitution therefor of a highway bus service between the same points over the Trans Canada Highway. This application was filed under the provisions of Section 314 I of The Railway Act.

At the time of filing of the application, regulations for applications of this type, as contemplated by Section 314 I, had not been promulgated. The Railway Transport Committee, which I will refer to hereafter as the "Committee", issued, under date of November 6th, 1967, Order R-507, which set forth regulations applicable only to this case, to be complied with by the Railway. On the basis of our analysis of revenue and cost data supplied by the Railway, the Committee found, and so declared in its Order R-507, that the loss sustained by the Railway in the operation of these trains in the year 1966, was $918,000, and set the matter down for a hearing in the Department of Labour Hearing Room, 5th Floor Confederation Building, St. John's, Newfoundland, to begin at 10.00 A.M. local time, December 11th, 1967.

At the outset of the hearing, Mr. Esau Thoms, General Chairman, Brotherhood of Railway, Airline and Steamship Clerks, Freight Handlers, Express and Station Employees, asked the Committee to consider a six-months' suspension of the hearing, on the grounds that he had not received a copy of the Railway's application in sufficient time to prepare a proper case. After giving due consideration to Mr. Thoms' request, as enlarged upon in his argument, we came to the decision that the hearing should continue.

Description of Railway Line and Present Passenger Services:

Under the Terms of Union of Newfoundland with Canada, as approved by Chapter 1

Séances tenues à St-Jean (Terre-Neuve)
les 11, 12 et 13 décembre 1967

par le COMITÉ DU TRANSPORT FERROVIAIRE

Le JUGEMENT

WOODARD, C.:

Le 29 septembre 1967, les Chemins de fer Nationaux du Canada, ci-après dénommés le «Chemin de fer», déposaient au bureau du Comité du transport ferroviaire de la Commission des transports du Canada, une demande d'autorisation de mettre fin à son service des trains numéros 101 et 102 et à son service de voitures de voyageurs fourni sur les trains mixtes numéros 203 et 204, ces deux services fonctionnant entre St-Jean et Port-aux-Basques dans la province de Terre-Neuve, et de les remplacer par un service d'autobus qui assurerait le service entre les mêmes points sur la Route transcanadienne. La demande a été déposée en vertu des dispositions de l'article 314 I de la Loi des chemins de fer.

A la date de dépôt de la demande, les règlements touchant les demandes de ce genre, tels qu'envisagés par l'article 314 I, n'avaient pas été promulgués. Le Comité du transport ferroviaire, que j'appellerai dorénavant le «Comité», publiait, le 6 novembre 1967, l'ordonnance R-507, qui exposait le règlement applicable seulement à cette cause, auquel le Chemin de fer devait se conformer. En se fondant sur notre analyse des revenus et des frais d'exploitation fournis par le Chemin de fer, le Comité exposa et il le déclara dans son Ordonnance R—507) que la perte subie par le Chemin de fer dans l'exploitation de ces trains pour l'année 1966 était de $918,-000, et ordonna la tenue d'une audience dans la Salle des audiences du ministère du Travail, 5e étage de l'édifice de la Confédération, St-Jean (Terre-Neuve), à compter de 10 heures du matin (heure locale), le 11 décembre 1967.

Au début de l'audience, M. Esau Thoms, président général de la Fraternité des Commis, Manutentionnaires de marchandises, employés des Messageries et de stations pour les lignes aériennes et maritimes, demanda au Comité d'étudier la possibilité de suspendre l'audience pendant six mois pour la raison qu'il n'avait pas reçu copie de la demande du Chemin de fer dans un délai suffisant pour préparer sa cause convenablement. Après examen suffisant de cette demande de M. Thoms, détaillée dans l'exposé de ses motifs, nous en sommes venus à la conclusion que l'audience devait continuer. *Description de la Ligne du Chemin de fer et des Services voyageurs actuels:*

Selon les conditions de l'Union de Terre-Neuve avec le Canada, approuvées dans le

of the Statutes of Canada, 1949, and by virtue of Order in Council P.C. 1454, dated April 1st, 1949, the Newfoundland Railway System was entrusted to Canadian National for management and operation. The said railway system was (and still is) a narrow gauge railway (three feet, six-inch gauge), with many steep grades and severe curves along the 547 miles which make up the main line between St. John's and Port aux Basques.

Evidence was adduced by the Railway that, since Confederation, it had spent 30 million dollars on main line capital improvements, including such items as large-scale rail and tie renewals, bridge strengthening, ballasting, etc. No attempt had been made to improve the right of way by elimination of curves or grades, or by conversion to standard gauge, as studies had proven that the cost of such projects would be prohibitive. These studies estimated a cost of 225 million dollars to convert to standard gauge and re-align the more severe curves and grades, and a cost of 140 million dollars for re-alignment and grading, while still maintaining the narrow gauge.

It was also stated that since 1949, the Railway had purchased 48 pieces of passenger equipment at a cost of 4 million dollars, and also upgraded some 16 units of steel equipment from the pre-Confederation fleet, and also completely dieselized both freight and passenger services. None of the coaches, sleepers or diners, are air-conditioned, and because of the narrow gauge track and curvature, are of necessity, built on a smaller scale than is the standard equipment used on the mainland.

The curvature and grades on the line also have a bearing on the time required for Trains 101 and 102 to make the journey between St. John's and Port aux Basques, and still make the stops necessary for the handling of local traffic. Train 101, from St. John's to Port aux Basques, requires 21 hours and 35 minutes to complete the 547-mile trip, while Train 102 in the reverse direction requires 22 hours. The mixed trains, Nos. 203 and 204, require approximately 30 hours in each direction.

The normal consist of Trains 101 and 102 is two diesel units, a steam generator car, baggage car, lounge car, three coaches, one dining car, two sleepers and a sleeping car for the diner crew. Should business warrant, additional coaches and sleepers are added. The current schedules provide for three trips

Chapitre 1 des Statuts du Canada, 1949, et en vertu de l'Arrêté en conseil C.P 1454 du 1er avril 1949, le Réseau ferroviaire de Terre-Neuve a été confié au Canadien National pour sa gestion et son exploitation. Ledit réseau ferroviaire était (et est encore) un chemin de fer de petit calibre (trois pieds, six pouces d'écartement), s'étendant sur des pentes raides et des virages difficiles le long des 547 milles qui composent la ligne principale entre St-Jean et Port-aux Basques.

Des éléments de preuve ont été apportés par le Chemin de fer à l'effet que, depuis la Confédération, il avait dépensé 30 millions de dollars en immobilisations pour améliorer la ligne principale, y compris des articles tels que rails et attaches renouvelés massivement, consolidation de ponts, empierrements et ainsi de suite. Aucune initiative n'avait été prise pour améliorer l'emprise en éliminant les courbes et les pentes, non plus que par la conversion au calibre d'écartement normal de la voie, des études ayant révélé que le coût de pareils projets aurait été trop élevé. Ces études ont révélé qu'il en coûterait 225 millions de dollars pour passer au calibre normal d'écartement et pour redresser les courbes et réduire les pentes trop prononcées, alors qu'il en aurait coûté 140 millions pour réaliser ces aménagements tout en maintenant la voie étroite.

Il fut en outre signalé que depuis 1949 le Chemin de fer avait acheté 48 voitures-passagers au coût de 4 millions de dollars, et avait en outre remis en état 16 voitures en acier qui dataient de la flotte antérieure à la Confédération, puis avait entièrement muni les services de passagers et de marchandises de locomotives Diesel. Aucune des voitures, aucun des wagons dortoirs ou restaurants n'a l'air climatisé et, à cause de la voie étroite et des courbes, ils sont construits à échelle plus réduite que les voitures normales utilisées sur le continent.

Les courbes et les pentes le long de la ligne influent sur le temps qu'il faut pour que les trains 101 et 102 se rendent de St-Jean à Port-aux-Basques, tout en faisant le nombre d'arrêts voulu pour servir le trafic local. Le train 101 de St-Jean à Port-aux-Basques prend 21 heures et 35 minutes pour parcourir les 547 milles du voyage, alors que le train 102 prend 30 heures environ dans chaque direction.

La composition normale des trains 101 et 102 est de deux locomotives Diesel, un wagon à vapeur, un wagon à bagages, un wagon salon, trois voitures à passagers, un wagon-restaurant, deux wagons-dortoirs et un wagon-dortoir pour le personnel de la cuisine. Si la clientèle augmente, on ajoute des voitu-

per week in each direction although during the summer months this service is augmented to a daily service to accommodate heavier traffic. Trains 203 and 204 handle only two coaches on the rear of a freight train and operate only one day a week in each direction September 24 to December 31, two days a week January 1 to June 4, and no service June 5 to September 23.

It was the evidence of the Railway that passenger carryings had fallen off gradually since 1960, and that there had been a very great drop since 1965. The year 1965 marked the completion of the Trans Canada Highway.

The completion of the highway link between Port aux Basques and St. John's resulted in a very noticeable shift from rail travel to travel by private automobile, and in an attempt to re-attract this passenger business, and to better serve passengers who continue to use commercial transport, the Railway had decided to apply to the Committee for permission to discontinue its slow conventional rail passenger service and substitute therefor a fast comfortable bus service operating over the highway.

Description of Proposed Bus Service:

It is the Railway's intention, should the application be granted, to purchase a total fleet of 16 buses, 11 of which would handle summer operations and 10 of which would handle the winter operations. The balance of the fleet would be used for standby or overflow service.

Each bus would seat 39 passengers, be air conditioned and equipped with a lavatory, and the operator would have at his station a mobile radio-telephone with which he could contact strategically-located dispatchers in the event of breakdown or delays. Each bus would have approximately 200 cubic feet of space for hand luggage.

The bus schedules would consist of daily express runs over the full distance between Port aux Basques and St. John's in both directions, local runs over the same area, and intermediate local runs between specific points. The proposed express schedule over the whole route would entail traveling time of about 13 hours and 15 minutes and the local schedule would take about 15 hours and 25 minutes. For ready reference I reproduce hereunder the proposed summer and winter schedules as contained in Exhibit 9, filed by the Railway.

res à passagers et des wagons-dortoirs. L'horaire actuel prévoit trois voyages par semaine dans chaque direction, bien que durant l'été ce service soit transformé en service quotidien pour servir un trafic plus lourd. Les trains 203 et 204 n'ont que deux voitures à passagers attachés à l'arrière des wagons-marchandises; ils ne fonctionnent qu'un jour par semaine en chaque direction, du 24 septembre au 31 décembre, deux jours par semaine du 1er janvier au 4 juin et il n'y a pas de service du 5 juin au 23 septembre.

Le Chemin de fer a témoigné que le trafic passagers avait baissé graduellement depuis 1960 et que la chute s'était fortement accentuée depuis 1965. C'est en 1965 que se terminait la Route transcanadienne.

L'achèvement du lien routier entre Port-aux-Basques et St-Jean a produit un changement très remarqué: les gens délaissent le chemin de fer pour voyager en voiture particulière, et afin de recapturer le public voyageur et de mieux servir les voyageurs qui continuent à utiliser le transport commercial, le Chemin de fer décidait de demander au Comité l'autorisation de discontinuer son service ferroviaire pour voyageurs, service conventionnel trop lent, pour le remplacer par un service rapide d'autobus empruntant la grand' route.

Description du projet de service d'autobus:

Si la demande est accordée, le Chemin de fer se propose d'acheter une flotte de 16 autobus, dont 11 fonctionneraient l'été et 10 l'hiver. Les autres autobus serviraient de remplacement ou de rajout aux périodes de pointe.

Chaque autobus contiendrait 39 voyageurs assis, l'air serait climatisé et il y aurait salle de toilette; le chauffeur aurait dans sa cabine un radio-téléphone mobile qui lui permettrait de communiquer avec des expéditeurs placés à des endroits stratégiques en cas de panne ou d'autre retard. Chaque autobus aurait une aire de 200 pieds cubes pour les bagages à main.

Les horaires d'autobus consisteraient en des voyages sans arrêts sur toute la distance entre Port-aux-Basques et St-Jean dans les deux directions, des voyages pour les localités sur tout le même parcours et des voyages locaux mais intermédiaires entre des points déterminés. Le voyage-express sur tout le parcours durerait 13 heures et 15 minutes alors que le voyage pour les localités durerait 15 heures et 25 minutes. Pour consultation rapide, je reproduis ci-dessous les horaires proposés pour l'été et l'hiver, tels que reproduits dans l'Annexe 9 déposée par le Chemin de fer.

*—arrêt pour repas F—arrêt sur signal S—arrêt régulier CS—arrêt conditionnel

The Railway intends to apply the same Red White and Blue fare system on its buses as is now in effect on the railway service, and would in addition, inaugurate a no-charge reservation system which would allow a check on passenger requirements. Main bus terminals would be set up in the existing passenger terminals at St. John's and Port aux Basques, and where possible, existing railway stations would be used as intermediate terminals. Where this is not possible, due to their distance from the highway, arrangements would be made to use service stations, hotels or restaurants as bus stops along the route. It is the intention to make available to the travelling public at most boarding points, information as to the on-time performance of the buses, delays, etc.

Originally, and as outlined at the hearing the Railway felt that it would be necessary to set up shelters at 14 locations where other facilities are not available. After a later review in January 1968, the Railway advised the Committee that a number of required shelters could be eliminated by the use of other facilities such as existing railway stations, tours village accommodation, restaurants or service stations. This proposal would result in a maximum of five shelters being required, which would be heated and lighted, with a caretaker in charge to keep them clean and to provide snow clearing when necessary.

The Trans Canada Highway follows the railway line very closely throughout the whole route with the exception of a portion between the villages of Badger and Deer Lake. Because communities in this area would be virtually isolated from passenger service, should a bus operation be introduced, the Railway proposes to operate a daily coach service on its express train between Bishop's Falls and Corner Brook in both directions, which would give residents of the area a rail link with the bus operation. In addition, to dispel the fears of the people of Newfoundland arising out of the belief that a bus operation cannot be run successfully in the winter months the Railway proposes to operate a coach service on Trains 203 and 204, two trips a week in each direction over the whole line, between December 1968 and May 1, 1969, said service to be discontinued on May 1, 1969.

It would not be the intention of the Railway to set up any type of feeder services to the proposed bus operation. In its opinion such feeder services now exist in the form of

Le Chemin de fer se propose d'utiliser sur ses autobus le même système de prix Rouge, Blanc, Bleu qu'il utilise actuellement pour son service ferroviaire, et il inaugurerait en outre un service gratuit de réservations qui permettrait de vérifier les besoins des voyageurs. Les principaux terminus d'autobus seraient installés dans les actuels terminus de voyageurs à St-Jean et Port-aux-Basques et là où c'est possible, les stations ferroviaires existantes seraient utilisées comme terminus intermédiaires. Là où ce projet ne serait pas possible en raison de leur distance de la route, on prendrait des dispositions pour utiliser les stations-service, les hôtels ou les restaurants comme arrêts d'autobus le long de la route. On se propose de mettre à la disposition du public voyageur, à la plupart des arrêts, des renseignements sur la performance des autobus quant aux retards, aux arrivées à l'heure, etc.

A l'origine et comme il a été expliqué à l'audience, le Chemin de fer a cru qu'il serait nécessaire d'ériger des abris à 14 endroits où de telles commodités n'existent pas. Après une étude subséquente en janvier 1968, le Chemin de fer avisait le Comité qu'un certain nombre d'abris pourraient être éliminés par le recours à d'autres commodités, comme les gares de chemin de fer existantes, les logements de voyageurs, dans les villages les restaurants ou les stations-service. Il sortirait de cette proposition que cinq abris seulement seraient nécessaires; ils seraient chauffés et éclairés, et un gardien s'en chargerait pour la propreté et l'enlèvement de la neige lorsque nécessaire.

La Route transcanadienne suit de très près le chemin de fer sur tout le parcours, sauf pour un bout de chemin entre les villages de Badger et de Deer Lake. Comme l'instauration d'un service d'autobus priverait presque complètement ces localités d'un service de transport des voyageurs, le Chemin de fer se propose d'annexer à son train express un service quotidien de voyageurs fonctionnant dans les deux sens entre Bishop's Falls et Corner Brook, ce qui donnerait aux résidants de la région une liaison ferroviaire avec l'autobus. De plus, afin de dissiper les craintes des gens de Terre-Neuve qui croient que l'autobus n'est pas sûr en hiver, le Chemin de fer se propose d'ajouter un service-voyageurs à ses trains 203 et 204 pour deux voyages par semaine en chaque direction sur toute la ligne, de décembre 1968 au 1er mai 1969, ledit service devant être discontinué le 1er mai 1969.

Le Chemin de fer n'a pas l'intention d'organiser des services de desserte à son projet de service d'autobus. A son avis, de tels services existent déjà sous forme d'autobus et de taxis

ocal bus and taxi operations in most communities that are to be served, augmenting he use of the private automobile.

Opposition to the Application:

The position of the Province of Newfoundand, as stated by the Honourable T. A. Hickman, Q.C., Minister of Justice, Province of Newfoundland, was to the effect that any alternative service inaugurated by the Railway should be one that would properly discharge its responsibilities, or those of Canada, o the people of Newfoundland, as contemplated by the Terms of Confederation of 1949. Mr. Hickman stated that a trial period should e considered to prove that a bus service ould be, not only equal, but superior to the resent service. It was his suggestion that etween the time of inauguration of the bus ervice and the fall of 1970, the Railway hould maintain at the same time a scheduled rain-passenger service. This, in his opinion, ould afford the opportunity to gain the equired information and experience related o a regularly scheduled trans-Island bus serice, to determine its worth in comparison to rail operation, and the extent of its acceptaility by the travelling public. In short, the Province of Newfoundland feels that it should ot be required to accept a "Pig in a Poke", o use Mr. Hickman's expression, but would e prepared to accept an alternative to the resent rail passenger service once it had roven to be properly operable in all seasons f the year.

Mr. Richard Cashin, Member of Parliament or St. John's West, and representing the Members of Parliament from Newfoundland, vas of the same view as Mr. Hickman that he responsibility rests with the Railway to emonstrate by experience, rather than in pinion, that a bus service is workable and a efinite improvement over the existing pasenger train service. He thought this could nly be accomplished by operating the two ervices concurrently until sufficient time had lapsed to prove the merits of one over the ther and the public acceptance of the new ervice. Mr. Cashin was also of the opinion hat the Railway should conduct studies into he feasibility of a Dayliner or R.D.C. operaion rather than the proposed bus operation.

In response to a request from the Committee, the Railway has since furnished information as to the revenues and costs that would

locaux desservant les villages en cause et l'usage de la voiture familiale continue de croître.

Opposition à la demande

La prise de position de la Province de Terre-Neuve, telle qu'exprimée par l'honorable T. A. Hickman, C.R., ministre de la Justice de cette province, est la suivante: le service de rechange que fournirait le Chemin de fer devra en être un qui assume la responsabilité du Chemin de fer et aussi du Canada envers la population de Terre-Neuve, comme il a été prévu dans les conditions d'entrée dans la Confédération en 1949, M. Hickman soutient qu'il faut prévoir une période d'essai qui prouverait qu'un service d'autobus pourrait être non seulement égal mais supérieur à l'actuel service ferroviaire. Il proposait que le Chemin de fer, à compter de l'inauguration de son service d'autobus et jusqu'à l'automne de 1970, maintienne parallèlement un service de train-voyageurs fondé sur un horaire. A son avis, cette solution donnerait le temps nécessaire au recueil des renseignements et à l'acquisition de l'expérience voulus pour qu'on puisse juger d'un service d'autobus à horaire régulier et reliant les deux extrémités de l'île, que l'on en détermine la valeur par rapport au service ferroviaire et qu'on sache si le public l'accepte. Bref, la province de Terre-Neuve croit qu'on ne doit pas lui faire accepter un projet non éprouvé, mais elle accepterait une autre solution à l'actuel service ferroviaire pour voyageurs à condition que le nouveau service ait prouvé qu'il peut fonctionner toute l'année.

M. Richard Cashin, député de St-Jean ouest et représentant de la députation de Terre-Neuve au Parlement, partage les mêmes vues que M. Hickman, c'est-à-dire qu'il revient au Chemin de fer de prouver par l'expérience, plutôt que par une expression d'opinion, qu'un service d'autobus est praticable et sera nettement supérieur au présent service ferroviaire pour voyageurs. Il estime que cette démonstration n'est possible que si les deux services fonctionnent parallèlement jusqu'à ce que l'écoulement du temps vienne prouver la supériorité d'un service sur l'autre et que le public ait montré sa préférence pour le nouveau service. M. Cashin est aussi d'avis que le Chemin de fer devrait effectuer des études sur la possibilité d'instaurer un service d'automotrice (Dayliner) ou autorail Diesel plutôt qu'un service d'autobus.

Suite à une demande du Comité, le Chemin de fer a depuis fourni des renseignements sur les recettes et les coûts d'exploitation aux-

accrue should a Railiner operation be instituted.

Having assessed this information, it appears that the large capital outlay required for the purchase of rail diesel cars would, of itself, ensure substantial annual losses for this service, that the prospective patronage of the service would be considerably smaller than the prospective patronage of the proposed bus service and that fewer places and a smaller population would have immediate access to such rail passenger service than to the proposed bus service.

The Committee is therefore unable to accept the suggestion of Mr. Cashin that the substitution of R.D.C. operation might be preferable to the proposed bus service.

Evidence was adduced by the Railway that 129 full-time employees would be affected, should the application be granted. This effect on employees was strongly attacked by Mr. Thoms and by other Railway Labour leaders at the hearing. The breakdown of employees was 65 equipment department, 38 sleeping and dining car department, 24 running trades and 2 stores department employees. These employees only hold seniority on the Newfoundland Area of the Canadian National, and although some employees affected may be able to retain employment by the exercise of seniority, it still results in 129 Railway employees being forced out of work either directly or indirectly due to the passenger train discontinuance. The Railway answered the strong protests of the Unions by stating that the company policy of preference of employment, on-the-job training, and normal attribution due to deaths and retirements would help to a considerable degree in alleviating the effect of the passenger train discontinuance. In addition, it was pointed out that a recent Railway-Union job security benefit plan would benefit some employees in the *non-operating* groups. This agreement takes the form of supplemental unemployment insurance payments, severance pay, relocation allowances, retraining and such other measures as may be appropriate in particular circumstances. These benefits would be available in some degree to 105 of the 129 employees.

It is estimated that the bus service would create 57 positions and it is the Railway's hope that most of these positions could be properly filled from its existing labour pool, not necessarily from the employees affected by the change, but at least from the Railway, leaving these employees' former positions available to some of those displaced by the discontinuance of the rail service.

quels on pourrait s'attendre si un service d'automotrice était mis en service.

De l'appréciation de ces renseignements il se dégage que la forte dépense de capitaux qu'il faudrait consentir pour acheter les trains Diesel assurerait à elle seule de fortes pertes annuelles de la part de ce service, que la clientèle prévue pour ce service serait beaucoup plus mince que celle attendue pour le service d'autobus et enfin qu'un plus petit nombre de localités et de gens auraient facilement accès à ce service ferroviaire qu'au service d'autobus.

Le comité ne peut donc pas accepter la proposition de M. Cashin à l'effet que le recours à l'autorail Diesel serait préférable au service d'autobus.

Le Chemin de fer a fourni la preuve que 129 employés à plein temps seraient affectés si la demande était accordée. M. Thoms et d'autres chefs syndicaux se sont attaqués avec vigueur, à l'audience, à ce problème des employés. Dans le détail, 65 d'entre eux s'occupent du matériel, 38 sont affectés au service des wagons-restaurants et wagons-dortoirs, 24 font partie du personnel sédentaire et deux sont magasiniers. Ces hommes n'ont d'ancienneté que pour la région terreneuvienne du Canadian-National et bien que certains employés affectés puissent être réengagés grâce à leur ancienneté, il n'en demeure pas moins que 129 employés des Chemins de fer seront mis en chômage directement ou indirectement à cause de l'abandon du service du train-voyageurs. Répliquant aux vigoureuses protestations des syndicats, le Chemin de fer déclare que la politique de la Compagnie en matière de préférence d'emploi, de formation au travail et des remplacements dus aux décès et aux mises à la retraite aiderait grandement à atténuer l'effet de la suspension du service du train-voyageurs. De plus, on a fait remarquer qu'un régime de sécurité d'emploi adopté récemment sera profitable aux groupes sédentaires. Cet arrangement prend la forme de versements supplémentaires d'assurance-chômage, de paye de cessation d'emploi, d'allocations de réinstallation ailleurs, de recyclage et telles autres mesures appropriées en des circonstances particulières. Ces avantages seraient disponibles dans une certaine mesure à 105 des 129 employés.

On estime que le service d'autobus créerait 57 emplois et le Chemin de fer formule le vœu que la plupart de ces emplois puissent être comblés convenablement à même la réserve de main-d'œuvre existante, pas nécessairement pas les employés affectés par le changement, mais du moins par des gens du chemin de fer, ce qui mettrait les emplois de ces anciens employés à la disposition de certains des employés déplacés par la suppression du service ferroviaire.

While no evidence or vocal opposition was introduced by the municipalities and towns along the line, there are on file with the Committee, a large number of briefs which had been received prior to, and during hearing. As the general tenor of the briefs is similar to the opposition raised at the hearing, I will not deal with them separately, other than to say that they have been considered, and add considerable weight to the oral opposition presented at the hearing. To sum up in a few words the feeling expressed in these briefs, it would seem to be, "Do not treat us, the people of Newfoundland, as second-class citizens of Canada, by forcing upon us a second-class system of passenger service. We, as the youngest Province in the Confederation, are entitled to treatment equal to that given to the other provinces."

Summary:

Having heard the evidence given both in support of, and in opposition to the Railway's application, and having given consideration to it and to the contents of briefs filed with the Committee, we must now come to a decision which we feel is fair and just.

The Railway, on the one hand, is at present operating a passenger service which is showing a continuing decline in patronage. This decline is due partly to competition from other forms of travel, and partly to the inescapable fact that the railway plant does not lend itself, with the expenditure of huge sums of money, to better schedules and other amenities that might bring back the patronage that the service once enjoyed when it was a virtual monopoly.

In an attempt to regain the passenger business the Railway is prepared to enter a new field of passenger service, a highway bus operation, to replace the existing railway passenger service. For this bus operation, it intends to purchase and utilize a fleet of modern air conditioned buses, combining the ultimate in highway coach travel with greatly accelerated schedules and more frequent express and local services to serve the needs of the travelling public.

On the other hand, those in opposition to the Railway's proposal expressed very strong doubts that a highway bus operation could be maintained under the extreme weather conditions that are experienced in Newfoundland during some periods of the year. While admitting that interruptions in rail service occurred during times of fog or winter storms,

Bien qu'aucun témoignage ou aucune opposition orale n'ait été présenté par les municipalités et les villages le long de la ligne, le Comité a déposé dans son dossier un nombre considérable d'exposés qui lui sont parvenus avant ou durant l'audience. Comme la teneur en général de ces exposés s'apparente à l'opposition qui a été manifestée à l'audience, je ne vais pas parler de chacun d'entre eux; je dirai seulement que ces mémoires ont été étudiés: «Ne nous traitez pas, nous, la population l'opposition orale présentée à l'audience. Pour résumer en quelques mots les sentiments exprimés dans ces mémoires, ils semblent dire: «Ne nous traitez pas, nous la population de Terre-Neuve, comme des citoyens canadiens de seconde classe, en nous contraignant à accepter un système de transport-voyageurs de seconde classe. Nous, la plus jeune province de la Confédération, avons droit à égalité de traitement avec les gens des autres provinces.».

Sommaire

Après avoir entendu les éléments de preuve soutenant ou rejetant la demande du Chemin de fer, et après les avoir étudiés ainsi que le contenu des mémoires présentés au Comité, nous devons maintenant prendre une décision qui nous paraisse juste et équitable.

D'un côté, nous avons un chemin de fer qui fonctionne actuellement à perte avec son service aux voyageurs. Cette baisse est due en partie à la concurrence venant d'autres formes de voyage et en partie au fait inéluctable que l'installation ferroviaire ne se prête pas, sans la dépense d'immenses sommes d'argent, à de meilleurs horaires et à d'autres commodités susceptibles de ramener la clientèle que connaissait jadis le service lorsqu'il constituait presque un monopole.

Afin de recapturer la clientèle des voyageurs, le Chemin de fer est prêt à se lancer dans un nouveau domaine de transport des voyageurs, un service d'autobus sur les grandes routes, qui remplacerait l'actuel service ferroviaire aux voyageurs. Pour établir ce service d'autobus, le Chemin de fer se propose d'acheter et d'utiliser une flotte d'autobus modernes à air climatisé, qui allie ce qu'il y a de plus moderne dans le transport en commun sur les routes à des horaires grandement accélérés, et des services express et locaux plus fréquents pour répondre aux besoins du public voyageur.

D'autre part, les opposants aux projets du Chemin de fer ont exprimé des doutes sérieux quant à la possibilité d'exploiter un service d'autobus sur les routes dans les plus sévères conditions atmosphériques que l'on trouve à Terre-Neuve à certaines époques de l'année. Tout en admettant que le service ferroviaire subissait des interruptions durant les

they were of the opinion that such conditions would have an even more serious effect on highway bus schedules. It was for this reason that they advocated a trial period of bus operation prior to any discontinuance of the existing rail service.

The second major point raised in opposition was the effect that the change from rail to bus passenger service would have on the railway personnel employed in the operation of the present service. One hundred and twenty-nine employees will be affected, either directly or indirectly, and this, in the opinion of those opposed, is a matter of public interest which should be considered by the Committee. This opinion was reiterated and supported by Members of the House of Assembly in final argument and in a large number of briefs on file from municipalities, Boards of Trade, Chambers of Commerce, and other interested parties.

Conclusions:

I have reached the conclusion that the Railway should be given some form of relief from its present situation, that is, the operation of a passenger service which is the best rail service possible, considering the condition of the existing rail plant, but which, for various reasons is showing a continuing decline in patronage and has shown a loss of over $900,000 in the year 1966.

The institution of a highway bus service would, in our opinion, reduce this loss by a considerable amount, while at the same time providing more convenient, faster schedules for the travelling public, and perhaps providing the Railway with a means of regaining the patronage it has lost over the past years.

We are aware of the effect this move will have on railway employees. However, we feel confident that the recent Railway-Union Agreements covering technological and organizational changes will be of considerable benefit in softening the impact of a change such as the one here proposed. We feel that the new service proposed by the Railway would be an improvement over the existing service and therefore of benefit to all the people of Newfoundland, even though it would have unfortunate effects on the jobs of some railway personnel.

We also share the concern of the people of Newfoundland as to whether the service as here proposed will be as efficient as is expected in all the extremes of weather experienced in the Province. Until the service has proven itself to be efficient, we feel that the decision

jours de brume ou les tempêtes de l'hiver, ils étaient d'avis que de telles conditions auraient des effets encore plus graves sur les horaires des autobus. C'est pour cette raison qu'ils préconisaient une période d'essai du service des autobus avant que le service ferroviaire actuel soit supprimé.

Le deuxième point important soulevé par l'opposition a trait à l'effet qu'aurait le passage du train à l'autobus sur le personnel employé actuellement au service ferroviaire. Cent vingt-neuf employés seront affectés, directement ou indirectement, et ceci, de l'avis de l'opposition, est une question d'intérêt public dont le Comitée doit tenir compte. Cette opinion a été réitérée et soutenue par les membres de l'Assemblée législative dans l'argument final et dans un grand nombre des exposés reçus des municipalités, des chambres de commerce, boards of trade et autres groupes intéressés.

Conclusions:

Je suis arrivé à la conclusion qu'il faut donner au Chemin de fer une forme de secours dans la situation où il se trouve, c'est-à-dire l'exploitation d'un service pour voyageurs qui soit le meilleur service ferroviaire qui se puisse donner, considérant l'état de l'appareil ferrovaire actuel, mais qui pour diverses raisons accuse une baisse continue de clientèle et essuie une perte de revenus de plus de $900,000 en l'année 1966.

L'institution d'un service d'autobus, à notre avis, réduirait cette perte d'un montant considérable tout en assurant un service plus commode, plus rapide pour le public voyageur, et fournissant peut-être au Chemin de fer un moyen de recapturer la clientèle qu'il a perdue au cours des années passées.

Nous savons que ce changement affectera les cheminots en cause. Cependant, nous avons confiance que les récents accords passés entre le Chemin de fer et les syndicats relativement aux changements tant techniques que d'organisation aideront considérablement à adoucir le contrecoup d'un changement comme celui que l'on propose ici. Nous estimons que le nouveau service proposé par le Chemin de fer sera une amélioration par rapport au service actuel, donc un service bénéfique pour toute la population de Terre-Neuve, même si le changement produit des effets malencontreux sur l'emploi de certains membres du personnel.

Nous partageons également l'inquiétude de la population de Terre-Neuve à savoir si le nouveau service sera aussi efficace qu'on le croit dans les périodes d'intempéries fort rudes que connaît la province. Tant que le service n'aura pas fait ses preuves d'efficacité,

of this Committee should provide for safeguards to protect the travelling public from the possibility of any breakdown in passenger service.

I would accordingly grant the application of the Canadian National to discontinue the railway passenger services provided by Trains 101 and 102 and coach service provided on mixed Trains Nos. 203 and 204, and to substitute therefor a bus service over the Trans Canada Highway between St. John's and Port aux Basques, on schedules comparable to those suggested in their presentation to the Committee. In my opinion, the granting of the application must be subject to the conditions set forth in the reasons for judgment of the Chairman of the Committee, and may only take effect as and when he has directed.

July 3, 1968.

(Signed) J.M. WOODARD

CONCUR: (SGD) D.H. Jones
CONCUR: (SGD) W.R. Iwin

nous estimons que la décision du Comité doit prévoir des garanties assurant la protection du public voyageur contre la possibilité de tout arrêt du service aux voyageurs.

En conséquence, j'accorderais la demande du Canadien-National de discontinuer son service ferroviaire aux voyageurs avec les trains 101 et 102 et le service de voitures à voyageurs sur les trains mixtes 203 et 204, et je les remplacerais par un service d'autobus qui emprunterait la Route transcanadienne entre St-Jean et Port-aux-Basques, à des horaires comparables à ceux suggérés dans son mémoire au comité. A mon avis, la concession de la demande doit être assujétie aux conditions exposées dans le jugement du Président du Comité, et ne sauraient prendre effet qu'au moment qu'il aura indiqué.

3 juillet 1968

Je suis d'accord: (Signé) D. H. Jones
Je suis d'accord: (Signé) W. R. Irwin

ONES, Chairman:

When these proceedings opened at St. ohn's, Newfoundland, on December 11, 1967, Honourable J. W. Pickersgill, P.C., President, Canadian Transport Commission, was present. After his opening statement which set his case in the context of the principles mbodied in the National Transportation Act, Statutes of Canada, 1967, chap. 69, particularly those in the new section 314 I of the Railway Act, R.S.C. 1952, chap. 234, he withdrew or the reasons expressed by him at the time nd I presided over the hearing.

The facts with which the Railway Transport Committee is concerned in this case are ully set forth in the Judgment of Woodard, . I agree with his statement of the facts and hey need not be repeated here.

However, there are two issues on which I wish to dwell that are central to the decision n this case.

When Newfoundland entered Confederation n 1949, one of the Terms of Union agreed pon by Canada and Newfoundland was erm 31(a) contained in Appendix "A" to tatutes of Canada, 1949, chap. 1:

> "At the date of Union, or as soon thereafter as practicable, Canada will take over the following services and will, as from the date of Union, relieve the Prov-

BROCHURE N° 14

JUILLET 1968

M. Jones, président:

L'ouverture des présentes négociations a eu lieu à Saint-Jean de Terre-Neuve, le 11 décembre 1967 en la présence de l'honorable J. W. Pickersgill, C.P., Président de la Commission canadienne des Transports. Après avoir fait un premier exposé qui a situé la cause dans le contexte des principes de la loi nationale sur les Transports, chapitre 69 des Statuts du Canada, 1967, et surtout de ceux que renferme le nouvel article 314 I de la Loi sur les Chemins de fer, Statuts révisés du Canada 1952, chapitre 234, il s'est retiré pour les raisons qu'il a exposées alors et la présidence m'a été dévolue.

Les faits qui intéressent le Comité des transports ferroviaires en l'occurrence sont exposés en détails dans le jugement de M° Woodard. Je suis d'accord avec cet exposé des faits qu'il n'y a pas lieu de répéter ici.

Toutefois, il y a deux points que je traiterai plus longuement, car il s'agit, en l'occurrence, de problèmes essentiels que doit régler la décision.

Quand Terre-Neuve est entrée dans la Confédération en 1949, une des conditions de l'Union acceptées tant par le Canada que par la Province en cause était la clause 31(a) qui figure au chapitre I de l'annexe «A» des statuts du Canada de 1949 et que voici:

> A la date de l'Union ou aussitôt que possible après cette date, le Canada prendra à son compte les services énumérés et, à compter de la date de l'Union, libé-

ince of Newfoundland of the public costs incurred in respect of every service taken over, namely,...

(a) the Newfoundland Railway..."

On April 1, 1949, by Order in Council P.C. 1454, the Governor General in Council entrusted to Canadian National Railways the operation and management of the Newfoundland Railway. The operative words of that Order in Council as it relates to this case are:

"...Therefore, His Excellency the Governor General in Council, on the recommendation of the Minister of Transport, is pleased to order that, effective April 1, 1949, the Newfoundland Railway, including rights-of-way, wharves, dry docks and other real property, rolling stock, equipment, ships and other personal property...the title to which is vested in His Majesty, be and they are hereby entrusted in respect of management and operation thereof to the Company on the terms in the Canadian National Railways' Act expressly specified, namely, that such management and operation shall continue during the pleasure of the Governor in Council..."

When Canada took over the Newfoundland Railway and when operation and management was entrusted to Canadian National Railways, there was in existence between Port aux Basques and St. John's a train service for the transportation of passengers which until the completion of the Trans Canada Highway was the only reliable overland method by which people could travel between those and intermediate points located on the railway.

What is proposed by Canadian National Railways involves the virtual elimination of transportation of passengers by rail on the main line in the Province and substitution by Canadian National of public passenger transport service by road, based on the presumption that public passenger transport should be provided so long as there is a substantial demand for such service.

As I have stated, the only reliable means of overland travel in 1949 was by the Newfoundland Railway and, in interpreting the effect of the entrustment of that Railway to Canadian National, pursuant to the Terms of Union, I feel we should give effect to one of the cardinal principles of interpretation of Canadian constitutional documents, giving to their provisions a large and liberal interpretation to impart to them the flexibility that

rera la province de Terre-Neuve des frais publics subis à l'égard de chaque service absorbé, savoir:

a) Le chemin de fer de Terre-Neuve, y compris le service de vapeurs et autres services maritimes;

Le 1er avril 1949, le Gouverneur général en conseil a confié aux Chemins de fer nationaux du Canada l'exploitation et la gestion des Chemins de fer de Terre-Neuve. Les termes relatifs à l'exploitation dudit décret du Conseil étaient, en substance, les suivants:

«...En conséquence, il plaît à Son Excellence le Gouverneur général d'ordonner, sur la recommandation du ministre des Transports, qu'à partir du 1er avril 1949, le chemin de fer de Terre-Neuve, y compris les emprises, les quais, cales sèches et toute autre propriété immobilière, ou matériel roulant, équipement, bateaux et autres propriétés personnelles .. dont les titres sont détenus par Sa Majesté, soit dorénavant et de par les présentes confié à la Compagnie, en ce qui concerne la gestion et l'exploitation, aux termes et conditions spécifiquement exposés dans la loi sur les Chemins de fer Nationaux du Canada, c'est-à-dire que cette gestion et exploitation durera selon le bon plaisir du Gouverneur en conseil...»

Quand le Canada a repris le Chemin de fer de Terre-Neuve et que l'exploitation et la gestion en ont été confiées aux Chemins de fer nationaux du Canada, il y avait, entre Port-aux-Basques et Saint-Jean un service de voyageurs qui, jusqu'à l'achèvement de la Route Trans-canadienne, était le seul moyen de communication par terre possible entre ces deux endroits et les points intermédiaires situés le long de la voie.

La proposition des Chemins de fer nationaux tend à supprimer le transport des voyageurs par la voie ferrée principale de la province pour y substituer un service routier public du National-Canadien, dans l'idée que le transport public des voyageurs serait offert tant que la demande d'un pareil service resterait importante.

Je répète que le seul moyen de voyager par voie de terre auquel on pouvait se fier en 1949 était le Chemin de fer de Terre-Neuve et en interprétant les conséquences du transfert de ce chemin de fer au National-Canadien en conformité des termes de l'Union, j'estime qu'il faut appliquer un des principes essentiels de toute interprétation de documents concernant la Constitution du Canada, soit qu'il y a lieu d'en considérer les dispositions

changing or unforeseen circumstances may require.

There was no Trans Canada Highway in Newfoundland in 1949 but that fact does not relieve this Committee, in its consideration of the present application, of its duty to relate the proposed discontinuance of the passenger train service to the presumption that public transportation service for passengers between St. John's, Port aux Basques and intermediate points should be assured so long as it is required by public convenience and necessity.

It is true that the application for discontinuance is accompanied by the proposal to substitute a bus service which would continue to provide such passenger service through the instrumentality of Canadian National. We were not told in precise terms the reasons for the bus service proposal accompanying the application for discontinuance but we are entitled to assume that this was probably done in recognition of the presumption just referred to.

In the result, the Committee is of opinion that it must deal with this application in accordance with the criteria established by section 314 I of the Railway Act.

Subsection (5) of section 314 I of the Railway Act requires the Canadian Transport Commission to have regard "...to all matters that to it appear relevant..." and to determine "...whether the passenger train service is uneconomic and is likely to continue to be uneconomic and whether the passenger train service should be discontinued."

As a condition precedent to the making of such determination, the Commission must first find that the Applicant has incurred "actual loss" in the operation of the passenger train service in question. By Order No. R-507, the Committee found there to have been actual loss in 1966 of $918,000.

When the Commission is deciding whether an uneconomic passenger train service is to be discontinued, it is required to have regard to the criteria contained in subsection (6) of section 314 I. This subsection is important and is set out fully below:

"(6) In determining whether an uneconomic passenger-train service or parts thereof should be discontinued, the Commission shall consider all matters that in its opinion are relevant to the public interest including, without limiting the generality of the foregoing

(a) the actual losses that are incurred in the operation of the passenger-train service;

avec tolérance et une certaine largeur d'esprit de façon à leur conférer toute la souplesse qu'exigeraient l'évolution des circonstances ou des conditions imprévues.

Il n'y avait pas de route Transcanadienne à Terre-Neuve. Ce fait ne dispensera, toutefois, pas le Comité, lorsqui'l examinera la présente demande, de la tâche qui lui incombe de n'envisager la cessation proposée du service ferroviaire de voyageurs qu'à la condition de la continuer entre Saint-Jean, Port-aux-Basques et les points intermédiaires, tant qu'il représentera une nécessité pour le public.

Il est vrai que la demande de suppression du service est accompagnée d'une proposition tendant à y substituer un service d'autobus qui continuerait à assurer le transport des voyageurs par l'intermédiaire du Canadien-National. On ne nous a pas précisé les raisons de cette proposition de service routier qui accompagnait la demande de cessation du service ferroviaire, mais il est permis de conclure à l'acceptation de la condition sus-mentionnée.

En conséquence, le Comité est d'avis qu'il lui faut traiter la demande en conformité des critères établis par l'article 314 I de la Loi sur les chemins de fer.

Le paragraphe (5) de l'article 314 I de la Loi pertinente porte que la Commission canadienne des Transports doit tenir compte... «de tous les facteurs qui lui semblent pertinents», et «déterminer si le service de trains de voyageurs est non rentable et si vraisemblablement il continuera à le demeurer et si le service de trains de voyageurs doit être supprimé.»

Comme condition préalable de cette détermination, la Commission devra d'abord constater que le demandeur a subi «des pertes réelles» du fait de l'exploitation du service de voyageurs en cause. Selon l'Ordre n° R-507, le Comité a constaté que les «pertes réelles» en 1966 étaient de $918,000.

Quand la Commission décidera s'il y a lieu de supprimer un service de voyageurs non rentable, elle devra tenir compte des critères figurant au paragraphe (6) de l'article 314 I. Ce paragraphe, qui est important, figure intégralement ci-dessous;

(6) Lorsqu'elle décide si un service non rentable de trains de voyageurs ou des parties de celui-ci doivent ou non être supprimés, la Commission doit examiner toutes les questions qui, à son avis, concernent l'intérêt public et notamment, sans limiter la portée générale de ce qui précède:

a) les pertes réelles subies du fait de l'exploitation du service de trains de voyageurs;

(b) the alternative transportation services, including any highway or highway system serving the principal points served by the passenger-train service, that are available or are likely to be available in the area served by the service;

(c) the probable effect on other passenger-train service or other passenger carriers of the discontinuance of the service, or of parts thereof; and

(d) the probable future passenger transportation needs of the area served by the service."

It should be said in passing that the statutory provisions mentioned refer to the Canadian Transport Commission, but its function in this case is being carried out by the Railway Transport Committee of the Commission, pursuant to subsection (3) of section 17 of the National Transportation Act, and the General Rules made by the Commission pursuant thereto.

The Committee in reaching its conclusions has considered all the matters referred to in subsection (6) of section 314 I of the Railway Act, including the actual loss of $918,000 for the year 1966, as well as all the other evidence placed before it in these proceedings.

The evidence is that while there is in existence today a modern "...highway or highway system serving the principal points served by the passenger train service..." there are no adequate public facilities for the transportation of passengers over that highway or highway system.

Because of this fact and the requirement of a public service for the transport of passengers to meet the public convenience and necessity, we hold that the passenger train service which is the subject of this application cannot be discontinued without the substitution therefor of a bus service at least as good as, if not better than the present passenger train service.

Because the Province of Newfoundland is unique in all of Canada in that apart from Canadian National there are no other passenger train services or passenger carriers of comparable scope, we have found it unnecessary to apply the provisions of paragraph (c) of subsection (6) of section 314 I of the Railway Act.

There is strong evidence before us that the people of Newfoundland need a modern, speedy and reliable public means of passenger transportation, and no evidence that this need will be in any way diminished in the future.

b) les autres moyens de transport, notamment toute route ou système routier desservant les principaux points desservis par le service de trains de voyageurs, dont dispose ou dont disposera vraisemblablement la région desservie par le service;

c) l'effet probable qu'aurait, pour d'autres services de trains de voyageurs ou d'autres transporteurs de voyageurs, la suppression totale ou partielle du service; et

d) les futurs besoins qui se manifesteront probablement en matière de transport des voyageurs dans la région desservie par le service.

Il y aurait lieu de dire en passant que la disposition statutaire ci-dessus mentionne la Commission Canadienne des transports, dont les attributions sont, cependant, dévolues à son Comité des transports ferroviaires, en vertu du paragraphe (3) de l'article 17 de la loi nationale sur les transports, et du Règlement général établi par la Commission aux termes de cet article.

En arrivant à ses conclusions, le Comité a tenu compte de tous les points mentionnés dans le paragraphe (6) de l'article 314 I de la loi sur les chemins de fer, y compris la perte réelle de $918,000 pour l'année 1966, ainsi que tout autre témoignage déposé devant lui au cours des séances.

Selon le témoignage, il existe bien aujourd'hui «...une route ou un réseau routier» modernes ...«pour desservir les principaux points d'arrêt du service ferroviaire de voyageurs», mais il n'y a pas de moyens de transport publics adéquats prenant des passagers sur ladite route ou ledit réseau routier.

Étant donné ce qui précède et la demande existante d'un service de transport pour les voyageurs qui répondrait aux besoins du public, nous estimons que le service ferroviaire de voyageurs qui fait l'objet de la présente demande ne peut être discontinué sans qu'on y substitue un service d'autobus au moins aussi bon, sinon meilleur, que le service actuel de transport par chemin de fer.

Comme la province de Terre-Neuve est unique au Canada en ce qu'outre le National-Canadien, il n'existe aucun autre service ferroviaire, ni autre moyen de transport pour voyageurs d'envergure analogue, nous avons jugé inutile d'appliquer les dispositions de l'alinéa (c) du paragraphe (6) de l'article 314 de la loi sur les Chemins de fer.

D'après tous les témoignages, il faut à la population de Terre-Neuve un moyen de transport pour voyageurs moderne, rapide et sûr, et rien n'indique que cette nécessité sera moins grande à l'avenir.

Accordingly, on the basis of all the evidence before us, we find and declare that the passenger train service which is the subject of this application is uneconomic and should be discontinued by Canadian National Railways and replaced by the proposed bus service but only on the date and upon performance of the conditions hereinafter set forth.

Much evidence was introduced at the hearing concerning the bus service to be inaugurated and operated by Canadian National Railways as a substitute for the present passenger train service. Witnesses appearing on behalf of Canadian National were strongly of the opinion that this service when in operation would find favour with the travelling public in Newfoundland because, to mention only a few of the reasons given, it would be more comfortable, it would be faster and it would be more modern. Canadian National is convinced, and its witnesses so stated, that the rugged terrain of the Province and the extremes of weather to which it is subject would not create any greater difficulties in operation than has the railway over the years since Canadian National undertook its operation and management.

The Committee had an opportunity to inspect a prototype bus at St. John's in December and, unquestionably, these vehicles will be clean, modern, comfortable and fast. However, the Committee is deeply concerned to ensure that Canadian National will be able to provide the highway service on a year-round basis in the face of weather conditions with which anyone who lives in Newfoundland is familiar. Canadian National has not operated a bus line in Canada at all comparable to what is proposed in Newfoundland and this would inevitably mean that there will be many problems to be solved in operating and maintaining schedules. Canadian National is very optimistic about its ability to operate the proposed bus service all the year round. But, not unnaturally, those who appeared in opposition wanted more than the opinions expressed by representatives of Canadian National at the hearing as assurance of its ability to perform the service. The Committee has given very serious consideration to the claims of Canadian National and the fears expressed by those opposed and has concluded that, as one condition of the discontinuance of the passenger train service, there must be what is in effect a trial period.

Another important aspect of this application involves the shelters which Canadian National proposes to provide for passengers getting on or getting off busses at the two

En conséquence, et sur la foi des témoignages dont nous sommes saisis, nous constatons et affirmons que le service de trains de voyageur qui fait l'objet de la présente demande est non économique, que le National-Canadien devrait le supprimer et le remplacer par le service d'autobus envisagé, mais seulement à la date et aux conditions mentionnées ci-après.

Beaucoup de témoignages ont été déposés, au cours des séances, sur le service d'autobus devant être inauguré et exploité par le National-Canadien pour remplacer le service ferroviaire de voyageurs actuel. Les témoins qui ont comparu pour la Compagnie des chemins de fer nationaux étaient fortement d'avis que ce service, une fois mis en marche, serait bien accueilli par le public qui se déplace à Terre-Neuve parce qu'entre autres raisons, il serait plus commode, plus rapide et plus moderne. Le National-Canadien est convaincu, comme l'on déclaré ses témoins, que la topographie accidentée de la province et les températures extrêmes qui se produisent ne créeraient pas de plus grandes difficultés de fonctionnement qu'elles n'ont causées depuis des années au Chemin de fer depuis que le National-Canadien en a assumé l'exploitation et la gestion.

Le Comité a eu l'occasion d'inspecter un prototype d'autobus à Saint-Jean en décembre dernier, et ces véhicules seront, sans contredit, propres, modernes, confortables et rapides. Toutefois, le Comité est très soucieux de garantir que le National-Canadien pourra fournir des services de transport routier toute l'année, étant donné les conditions climatiques dont peut se rendre compte quiconque a habité Terre-Neuve. La National-Canadien n'a jamais exploité, ailleurs au Canada, un service routier comme celui qu'on envisage pour la province, ce qui signifie inévitablement bien des problèmes d'horaire et d'entretien à résoudre. Le National-Canadien est très optimiste quant à sa capacité d'exploiter le service routier envisagé toute l'année durant. Mais, ce qui est d'ailleurs tout naturel, ceux qui s'y opposent ont réclamé d'autres garanties que les opinions sur la capacité de la Compagnie que ses représentants ont exprimées pendant la séance à ce sujet. Le Comité, ayant soigneusement étudié les affirmations du National-Canadien en regard des craintes exprimées par les opposants, en a conclut qu'une des conditions de la suppression du service ferroviaire de voyageurs serait, en fait, une période d'essai.

Un autre aspect important de la demande à l'étude a trait aux abris que le National-Canadien se propose d'ériger à l'intention des voyageurs qui prennent l'autobus, ou en des-

terminal points of St. John's and Port aux Basques as well as at intermediate stops between those points.

The evidence before us is that the present passenger railway stations at St. John's and Port aux Basques as well as at certain other points, will be converted for use by bus passengers and that, where required, heated, all-weather shelters will be constructed and will be equipped with satisfactory communication links, so that passengers may know the times of arrival and departure of busses and when busses have undergone breakdowns or delay.

For the reasons given above, and those of Woodard, C., an Order will issue directing the discontinuance of the passenger train service comprised in this Application, effective April 15, 1969, provided Canadian National Railways has met the following conditions:

1. The bus service proposed by Canadian National and described in detail in the Judgment of Woodard, C., shall be inaugurated and continued as long as a requirement for passenger service continues, and the passenger facilities, including terminals and the shelters mentioned above, with proper communication links, shall be provided and installed, all to the satisfaction of the Committee.

2. Until Canadian National is notified by the Committee that the bus service is inaugurated and the passenger facilities are provided and installed to the satisfaction of the Committee, the passenger train service shall continue to be operated in the same manner and as frequently as it was during the comparable period in 1967.

3. From the date Canadian National is notified that the Committee is satisfied that the bus service is inaugurated and the passenger facilities provided and installed, until April 15, 1969, the passenger train service shall continue to be operated in emergencies created by extremes of weather or by any other cause, until full bus service is restored. To meet the requirements of this condition, Canadian National shall keep and maintain ready for operation such passenger train equipment as the Committee shall direct.

4. Canadian National will be required to operate a daily coach service in both directions on its express trains, between Bishop's Falls and Corner Brook, to provide a rail link with the bus service for residents in the area between Badger and Deer Lake.

cendent, à Saint-Jean et à Port-aux-Basques, ainsi qu'aux arrêts intermédiaires.

D'après le témoignage déposé, les gares de voyageurs actuelles à Saint-Jean et à Port-aux-Basques, ainsi qu'à certains autres endroits, seront transformées à l'intention des usagers de l'autobus et, partout où on l'estimera nécessaire, des abris chauffés, utilisables par tous les temps, seront construits et équipés de moyens de communication appropriés afin de permettre aux voyageurs de se renseigner sur les heures d'arrivée et de départ ainsi que sur les pannes ou les retards éventuels des autobus.

Pour les raisons exposées ci-dessus et par Me Woodard, un Ordre sera émis et publié tendant à la suppression du service de trains de voyageurs qui fait l'objet de la présente demande à partir du 15 avril 1969, à condition que le National-Canadien s'en tienne aux termes suivants:

1. Le service d'autobus proposé par le National-Canadien et décrit en détail dans le Jugement de Me Woodard, sera inauguré et continué aussi longtemps que durera la demande d'un service de voyageurs, et la compagnie fournira les installations nécessaires aux voyageurs, y compris les terminus et les abris sus-mentionnés, pourvus des moyens de communications appropriés, de façon à satisfaire le Comité.

2. Jusqu'à ce que le Comité fasse savoir au National-Canadien que le service d'autobus a été inauguré et que les installations ont été mises en service à sa pleine satisfaction, le service de trains de voyageurs continuera à fonctionner de la même manière et aussi fréquemment que durant la période comparable de 1967.

3. A partir de la date où le National-Canadien aura été notifié de l'inauguration du service d'autobus et de la mise en service des installations destinées aux voyageurs à la pleine satisfaction du Comité, le service de trains de voyageurs continuera à fonctionner jusqu'au 15 avril 1969, dans toutes les situations d'urgence créées par les intempéries ou toute autre cause, jusqu'à ce que le service d'autobus soit rétabli intégralement. Afin de remplir cette condition, le National-Canadien maintiendra le matériel ferroviaire nécessaire prêt à fonctionner à tout moment selon les directives du Comité.

4. Le National-Canadien sera tenu de mettre tous les jours à la disposition du public des wagons de voyageurs dans les deux sens sur ses trains express entre Bishop's Falls et Corner Brook, afin de faire le raccord avec le service routier à l'intention des habitants de la région située entre Badger et Deer Lake.

5. If, prior to April 15, 1969, Canadian National Railways fails or is unable to perform any of the conditions enumerated above, or if at any time before that date the Committee is not satisfied that the bus service is at least as good as the present passenger train service, it may, upon notice to Canadian National and to all parties who appeared before it in December 1967, reconvene the hearing to consider whether in the exercise of its general powers under the Railway Act, it should impose further conditions to be met prior to the discontinuance of the passenger train service or direct the adoption of such measures as may be necessary to ensure the adequacy of the bus service.

July 3, 1968.

5. Si, avant le 15 avril 1969, les Chemins de fer nationaux n'exécutent pas, ou ne sont pas en mesure d'exécuter, l'une ou l'autre des conditions énumérées ci-dessus, ou si, à un moment donné avant cette date, le Comité n'est pas convaincu que le service d'autobus est au moins aussi bon que le service de trains de voyageurs actuel, il pourra se réunir à nouveau en audience après en avoir notifié le National-Canadien et toutes les parties qui ont comparues à ses séances en décembre 1967, afin d'examiner si, dans l'exercice de l'autorité générale que lui confère la loi sur les Chemins de fer, il devrait imposer de nouvelles conditions à remplir avant la suppression du service de trains de voyageurs, ou ordonner l'adoption des mesures éventuellement requises pour assurer le fonctionnement satisfaisant du service d'autobus.

Dick, representing Brotherhood Locomotive Firemen and Enginemen; C. D. Cook, representing Brotherhood of Railway Trainmen; A. W. Leblanc, representing Brotherhood of Railway Carmen of America; James O'Dea, representing Sheet Metal Workers International Union, Local No. 552; and

UPON reading the submissions filed; and in accordance with the judgments rendered in this matter—

The Railway Transport Committee of the Canadian Transport Commission hereby orders:

1. Subject to the following conditions, the Applicants shall, on April 15, 1969, discontinue passenger train service between St. John's and Port aux Basques, in the Province of Newfoundland provided by Train Nos. 101 and 102 and coach service on Mixed Train Nos. 203 and 204.

(1) The bus service proposed by the Applicants and described in detail in the Judgment of Woodard, C., shall be inaugurated and continued as long as a requirement for passenger service continues, and the passenger facilities, including terminals and the shelters mentioned therein, with proper communication links, shall be provided and installed, all to the satisfaction of the Committee.

(2) Until the applicants are notified by the Committee that the bus service is inaugurated and the passenger facilities are provided and installed to the satisfaction of the Committee, the passenger train service shall continue to be operated in the same manner and as frequently as it was during the comparable period in 1967.

(3) From the date the Applicants are notified that the Committee is satisfied that the bus service is inaugurated and the passenger facilities provided and installed, and until April 15, 1969, it will not be necessary for the Applicants to run their passenger trains except in case of emergencies created by extremes of

représentant l'Opposition officielle de Terre-Neuve; M. H. A. Collins, député A. L. Gander; M. Gerald F. Lang, pour le Conseil municipal de Saint-Jean; M. E. E. James O'Dea, représentant le Syndicat international des ouvriers de Caminoirs, local 512; et

APRÈS AVOIR pris connaissance des mémoires déposés; et en conformité des jugements rendus en la matière,

Le Comité des transports ferroviaires de la Commission canadienne des transports ordonne par les présentes:

1. Sous réserve des conditions suivantes, les demandeurs supprimeront, le 15 avril 1969, le service de transport de voyageurs entre Saint-Jean et Port-aux-Basques, dans la province de Terre-Neuve, effectué par les trains nos 101 et 102, ainsi que les wagons pour voyageurs des trains mixtes nos 203 et 204.

(1) Le service d'autobus proposé par les demandeurs et décrit en détail dans le jugement de Me Woodard, sera inauguré et continué aussi longtemps que durera la demande d'un service de voyageurs, et la compagnie fournira les installations nécessaires aux voyageurs, y compris les terminus et les abris sus-mentionnés, pourvus des moyens de communication qui s'imposent, de façon à satisfaire le Comité.

(2) Jusqu'à ce que le Comité fasse savoir au National-Canadian que le service d'autobus a été inauguré et que les installations ont été mises en service à sa pleine satisfaction, le service de trains de voyageurs continuera à fonctionner de la même manière et aussi fréquemment que durant la période comparable de 1967.

(3) A partir de la date où les demandeurs auront été notifiés de l'inauguration du service d'autobus et de la mise en service des installations destinées aux voyageurs à la pleine satisfaction du Comité, et jusqu'au 15 avril 1969, les demandeurs n'auront à faire fonctionner leurs trains de voyageurs que dans les

weather or by any other cause, until full bus service is restored. To meet the requirements of this condition, the Applicants shall keep and maintain ready for operation such passenger train equipment as the Committee shall direct.

(4) The Applicants will, in accordance with their undertaking, operate a daily coach service in both directions on their express trains, between Bishop's Falls and Corner Brook, to provide a rail link with the bus service for residents in the area between Badger and Deer Lake.

(5) If, prior to April 15, 1969, the Applicants fail or are unable to perform any of the conditions enumerated above, or if at any time before that date the Committee is not satisfied that the bus service is at least as good as the present passenger train service, it may upon notice to the Applicants and to all parties who appeared before it in December 1967, reconvene the hearing to consider whether in the exercise of its general powers under the Railway Act, it should impose further conditions to be met prior to the discontinuance of the passenger train service or direct the adoption of such measures as may be necessary to ensure the adequacy of the bus service.

2. The Applicants shall keep and maintain ready for operation sufficient passenger train equipment to meet the requirements of condition numbered (3) in section 1.

3. The Applicants shall publish in three consecutive issues of the two daily newspapers in St. John's, Newfoundland, and post at all the stations located on the line served by the said passenger train service a copy of this Order.

Dated at Ottawa, this 3rd day of July, 1968.

(Sgd) C.W. RUMP,
Secretary,

Railway Transport Committee.

cas d'urgence créés par les intempéries ou toute autre cause, jusqu'à ce que le service d'autobus soit rétabli intégralement. Afin de remplir cette condition, les demandeurs maintiendront le matériel ferroviaire nécessaire prêt à fonctionner à tout moment selon les directives du Comité.

(4) Les demandeurs offriront, en conformité de leurs engagements, un service quotidien dans les deux sens au moyen de leurs trains express entre Bishop's Falls et Corner Brook, afin de faire le raccord avec le service routier à l'intention des habitants de la région située entre Badger et Deer Lake.

(5) Si, avant le 15 avril 1969, les demandeurs n'exécutent pas, ou ne sont pas en mesure d'exécuter, l'une ou l'autre des conditions énumérées ci-dessus, ou si à un moment donné avant cette date, le Comité n'est pas convaincu que le service d'autobus est au moins aussi bon que le service de trains de voyageurs actuel, il pourra, après en avoir notifié les demandeurs et toutes les parties qui ont comparu à ses séances en décembre 1967, se réunir à nouveau en audience, afin d'examiner si, dans l'exercice de l'autorité générale que lui confère la loi sur les Chemins de fer, il devrait imposer de nouvelles conditions avant la suppression du service de trains de voyageurs, ou ordonner l'adoption des mesures éventuellement requises pour assurer le fonctionnement satisfaisant du service d'autobus.

2. Les demandeurs garderont et maintiendront suffisamment de matériel roulant pour voyageurs prêt à fonctionner pour répondre aux exigences de la condition n° 3 de l'article 1.

3. Les demandeurs feront publier dans trois numéros consécutifs des deux quotidiens de Saint-Jean (Terre-Neuve), et afficheront dans toutes les gares de la ligne de chemin de fer desservie par lesdits trains de voyageurs, un exemplaire du présent Ordre.

Ottawa, en date du 3e jour de juillet 1968.

Secrétaire,

Comité des transports ferroviaires

APPENDIX "V"

BRIEF TO THE COMMONS COMMITTEE ON TRANSPORT AND COMMUNICATIONS AT HEARINGS HELD ST. JOHN'S, NFLD. FEBRUARY 23, 1968.

MR. CHAIRMAN:

I represent 1,600 union members of the Brotherhood of Railway, Airline and Steamship Clerks, Freight Handlers, Express and Station Employees in the Province of Newfoundland who are engaged in the transportation industry. They are concerned about transportation, the lack of transportation and the future of transportation in the Province, not only because it affects their pocket book, but they believe, and I share this view that our Province will only be as great as the transportation facilities therein and for this reason, wisdom must guide the policy of the transportation industry and not the fortune seekers that we see surrounding us at times.

Your Terms of Reference as it appears in the January 30th issue of Hansard, says along with some other directives that you are empowered to consider and report upon all aspects of transportation as they relate to the Atlantic Provinces, etc. etc. etc.

This, in my opinion, gives you a pretty wide berth and should allow for very liberal presentations from interested persons. However, it would seem to me, and please correct me if I am wrong, the times limits you have selected and the regulations you have effected, will bar a lot of evidence and presentations from this hearing.

The first official advertisement of your intention to hold hearings was contained in the local issue of the daily newspapers of February 6th, giving the Terms of Reference with the provision that persons wishing to appear should forward 50 copies of their brief to the Clerk of the Committee by February 15th.

I do not think anyone will disagree with me when I say the notice was too short. Nine days to prepare an effective brief on the transportation problems of the Atlantic Provinces do not afford interested parties the necessary time to compile anything outside of some observations. You completely isolate the general public when you require that 50 copies must be submitted.

APPENDICE «V»

Mémoire présenté au comité de la Chambre des communes sur les Transports et les Communications lors de l'audience tenue à Saint-Jean de Terre-Neuve, le 23 février 1968.

Monsieur le président,

Je représente les 1,800 syndiqués de la Fraternité des employés de bureau des chemins de fer, de l'aviation, de la navigation, des manutentionnaires de marchandises, des messageries et des employés de gare de la province de Terre-Neuve qui travaillent dans l'industrie des transports. Ils sont préoccupés par le transport, par l'absence de moyens de transport et par l'avenir de cette industrie dans la Province, non seulement à cause de leur livret de banque, mais plutôt parce qu'ils sont persuadés, et je partage là leur point de vue, que l'avenir de leur Province est lié au développement des moyens de transport. A cause de cette raison, la sagesse devrait être le guide de la politique de l'industrie du transport, et non ces chercheurs de bonne fortune qui parfois nous entourent.

Votre mandat, tel que décrit dans le *Hansard* du 30 janvier, vise, à part d'autres directives, à vous confier le pouvoir d'étudier et de rapporter tous les aspects de l'industrie du transport tels qu'ils existent à l'heure actuelle dans les provinces Maritimes, etc. . .

Selon mon opinion, ce mandat vous permet d'avoir des assises très larges et devrait permettre aux personnes intéressées de faire des représentations très libres. Cependant, il me semble, et corrigez-moi si je me trompe, que les délais choisis et les règlements énoncés, empêchent la présentation de nombre de témoignages et de mémoires devant cette audience.

La première annonce pertinente à votre intention de tenir audience a paru dans les journaux locaux du 6 février, expliquant le mandat et invitant les personnes désirant témoigner à envoyer 50 exemplaires de leur mémoire au secrétaire du Comité avant le 15 février.

Je pense que personne ne me contredira si j'affirme que le délai était trop court. Neuf jours pour préparer un mémoire efficace sur les problèmes du transport dans les provinces Maritimes ne permettent pas aux personnes intéressées d'avoir le temps nécessaire pour rassembler des faits autres que des observations générales. Vous ne permettez pas au grand public de participer aux audiences quand vous exigez la soumission de 50 exemplaires d'un mémoire.

I assume that you expect to receive briefs from labour and business organizations and interested governments, and when you say "persons" this may mean any interested citizen in the province. However, with the 50 copies proviso, this may only be adhered to by a large Union, not all of the business community and naturally a provincial government. For the ordinary citizen who is also supposed to have his voice heard, will any of you on the Committee tell me how any ordinary citizen can be expected to supply 50 copies of a brief on transportation and still meet a nine day deadline.

Perhaps, you feel as I do, that this can be termed as only a cruise through the Atlantic Provinces for the Committee, to see first hand the physical side of our transportation problems. If this is so, and the circumstances such as I have related above should verify this, I'm wondering why the bother with Hearings at all, knowing that we cannot prepare properly for it.

I'm sure, that there are many M.P.'s who are now very well acquainted with the transportation needs of the Atlantic Provinces. I'm certain that Newfoundland M.P.'s are. If Royal Commissions and studies are yardsticks, and can be listened to, you have probably already seen our transportation needs for this province and the most that we have time to do, is to look over some of them and bring some of their recommendations to your attention, with a few added views from our Brotherhood.

Outside of the studies outlined in Handsard, this Province has been presented with several reports on Transportation and the most recent one was the findings of a Royal Commission on Transportation in September 1966. In that report there are some items that even our Brotherhood cannot agree with, although there are many recommendations that we do agree with and if effected would solve many of our transportation problems.

I should only deal with transportation as confined to railroading, because that mode is what I am most familiar with, however, I will probably have some comment on other modes of transportation.

Our Newfoundland Royal Commission on Transportation says on page 9 of their report that:

> One is forced to the conclusion, in view of the disparity in the facilities offered,

Je suppose que vous vous attendez à recevoir des mémoires en provenance des organisations syndicales, des associations professionnelles et commerciales et des gouvernements intéressés, pourtant, lorsque vous parlez de «personnes», il semble que ceci s'adresse à tous les citoyens de la province. Cependant, le chiffre de 50 exemplaires du mémoire à soumettre restreint la participation aux audiences aux grands syndicats, à certaines associations commerciales et, évidemment, au gouvernement provincial. Pour le simple citoyen qui devrait supposément faire entendre sa voix, pouvez-vous me dire, nous, les membres de ce Comité, comment un simple citoyen a les moyens de soumettre 50 exemplaires de son mémoire sur le transport dans un délai de neuf jours.

Peut-être pensez-vous, comme je le pense du reste moi-même, qu'il s'agit pour le Comité d'effectuer une croisière dans les provinces Maritimes, afin que ses membres voient de leurs propres yeux les problèmes les plus flagrants de nos transports. S'il en est ainsi, et les circonstances que j'ai mentionnées plus haut le prouveront, je me demande pourquoi il faut s'encombrer d'audiences, puisqu'il n'y a pas moyen de s'y préparer décemment.

Je suis sûr que de nombreux députés sont très au courant des problèmes du transport dans les provinces Maritimes. Tous les députés de Terre-Neuve y sont sensibilisés, j'en suis certain. Si l'on peut se baser sur les rapports des commissions royales d'enquête et les diverses études, vous êtes alors probablement déjà au courant de nos besoins pour cette province, et ce que nous avons alors à faire c'est de consacrer notre temps à revoir certaines de ces recommandations et à les porter à votre attention en y ajoutant quelques commentaires de notre Fraternité.

En dehors des études mentionnées dans le Hansard, cette province a présenté de nombreux rapports concernant le transport, le plus récent étant celui de la Commission royale d'enquête sur le transport du mois de septembre 1966. Dans ce rapport, certains aspects soulevés ne remportent pas l'adhésion de notre Fraternité, malgré qu'un grand nombre d'entre eux nous sont agréabbles, et, s'ils étaient mis en pratique, pourraient résoudre beaucoup de nos problèmes de transport.

Je dois m'en tenir uniquement au problème du transport ferroviaire, puisqu'il m'est le plus familier, cependant je ferai quelques commentaires sur d'autres moyens de transport.

La Commission royale d'enquête sur le transport de la Province de Terre-Neuve disait, à la page 9 de son rapport, et je cite:

> «On est forcé à conclure, à la vue de la disparité des moyens offerts, que les

that the travelling public in Newfoundland are classed in an inferior role to their Mainland neighbours when comparing transportation facilities."

This is a terrible indictment after 19 years of Confederation and your Committee should take special note of this. The Commission was talking about rail transportation. Almost immediately after this bold, but true statement was made, CN boldly applies to widen the gap and substitute a bus service for the Newfoundland travelling public instead of the trains.

Can you imagine the uproar in the Province of Quebec if a Royal Commission reported as such, but here in this Province, we are as the Premier says we are, God fearing, humble, law-abiding and loyal subjects. There is no doubt we are this, and because we are we do not deserve this sort of treatment.

C.N.'s reasoning, is that the public was not patronizing the trains. What sort of patronizing did they expect? After 19 years, and the pre-confederation Newfoundland Railway placed in the hands of the great Canadian National and having this for 19 years, a Royal Commission can say this, that we were second class transportation citizens.

The Royal Commission made some other particular references to rail-passenger services; for example, they said the tables (on the passenger trains) were stripped down to paper napkins and the services generally in the dining car was at a very low standard.

They also mentioned the need for more frequent trains. Their final recommendations as it appears on page 74 of their report makes the following recommendations:

1. An increased passenger service.
2. A better dining car service.
3. Better sleeping car service.
4. A heavier re-railing policy.

Our Brotherhood can add another recommendation that should be commenced immediately. CN should implement an immediate and large scale policy of removing the curves along the track from St. John's to Port aux Basques, so that trains can proceed at near mainland speeds. The curvature of the rail-line is one of the basis reasons for the 22 hour run over the 547 miles.

voyageurs à Terre-Neuve sont considérés comme citoyens de deuxième classe si on les compare à leurs voisins du continent quant à la différence des moyens de transport.»

C'est une terrible constatation après 19 ans de confédération, et votre Comité devrait prendre note de cette citation. La Commission parlait alors du transport ferroviaire. Juste après cette grave mais véridique constatation, le National Canadien s'appliquait bravement à accroître cette disparité en remplaçant le train par un service d'autobus destiné au public de Terre-Neuve.

Pouvez-vous imaginer quelle serait la levée de boucliers dans la Province de Québec si une Commission royale d'enquête faisait un tel rapport. Mais ici, nous sommes, tels que l'a décrit le premier ministre, des gens vivant dans la crainte de Dieu, humbles, obéissants et de loyaux sujets. C'est ce que nous sommes sans aucun doute, mais nous ne méritons pas alors d'être traités ainsi.

Le raisonnement du National Canadien se base sur le fait que le public boude les trains. Quelle sorte d'encouragement voudrait-il avoir? Dix-neuf années se sont écoulées depuis le passage de Newfoundland Railway aux mains du National Canadien, et après dix-neuf ans, une commission royale peut affirmer que nous sommes des citoyens de deuxième classe en ce qui concerne le transport.

La Commission royale a fait certaines constatations particulières en ce qui a trait au service passager. Par exemple: les tables, dans les wagons de voyageurs ont été supprimées et remplacées par des serviettes en papier, et le service dans les wagons-restaurants laissait grandement à désirer.

La Commission a aussi mentionné le besoin d'augmenter la fréquence des trains. Les recommandations finales, telles qu'elles apparaissent à la page 74 dudit rapport sont les suivantes:

1. Un service de passagers accrû.
2. Un service de wagons-restaurants amélioré.
3. Un service de wagons-lits amélioré.
4. Un service de réparation des voies à la politique plus dynamique.

Notre Fraternité peut ajouter à cela une autre recommandation qui devrait être concrétisée immédiatement. Le National Canadien devrait corriger les courbes de la voie sur le trajet de Saint-Jean à Port-aux-Basques, afin que les trains puissent circuler à une vitesse avoisinant la vitesse soutenue sur le continent. Les courbes de la voie sont une des principales raisons pourquoi le trajet de 547 milles est accompli en 22 heures.

I feel that under the present physical circumstances, CN can never be expected to be competitive. They can give better service, there is no doubt about that, but with the curvature of the Rail they cannot compete. So of prime importance is the need for the tracks to be straightened as quickly as possible. We do not suggest the big expense of a standard guage—with a straightened narrow guage, we can get the speed. There is nothing physical that I can see to delay this. If finance are used as an excuse, then there is a matter of government policy to contend with.

Newfoundland deserves a train-passenger service. The Terms of Union with Canada would never have been signed if it was known that we would lose our Train passenger service or if it was known that the service would be decreased or lose it's Newfoundland flavour.

Your Committee has been asked to recommend measures for the Atlantic Provinces. I suggest you should strongly recommend the retaining and upgrading of the rail-passenger service in Newfoundland as a first step for progress.

The other mode of transportation that our Brotherhood is interested in, is the CN Coastal Service. The former Newfoundland Railway Coastal fleet, now the CN Coastal Fleet has contributed towards the betterment of Newfoundland in such a way that it would be difficult to equate it with another public service. Long before Confederation, the Trans Canada Highway and the linking highways, the Railway Coastal fleet performed the chore as the transportation life-line, in line with the highest traditions of the sea that Newfoundlanders are so well known for.

There is no doubt that the time arrivals of the coastal boats at the many hundreds of the ports of calls have been the subject of speculation for many years by many people and while wind, weather and tides certainly were retarding factors in their schedules, one thing must be noted, and that is, they arrived, they performed and they were dependable.

Over the past few years or so, there has been a trend in some circles that the coastal fleet is fast losing its value and should fade out of the picture, because new roads are linking the communities. This may seem attractive for government spending, and some may advocate that we do away with the coastal fleet and allow all traffic to traverse by road. To those who can afford the high costs of transport by secondary roads, this may be all right but for those who still must watch

Il me semble qu'en vertu des présentes circonstances, le National-Canadien ne devrait pas s'attendre à être compétitif. La compagnie peut donner un meilleur service, sans aucun doute, mais à cause des courbes de la voie le train ne peut être compétitif. Il est ainsi d'une importance primordiale que la voie soit redressée aussitôt que possible. Nous ne voulons pas suggérer d'avoir recours à la voie normale, une voie étroite renforcée permet une vitesse suffisante. Il n'y a pas d'obstacle majeure, à ma connaissance, pour retarder ce projet. Si la situation financière en est l'excuse, il est du devoir du gouvernement d'y remédier.

Terre-Neuve mérite un service ferroviaire pour voyageurs. L'Acte d'union avec le Canada n'aurait jamais été signé s'il avait été connu que nous perdrions notre service passager ou qu'il aurait été diminué ou qu'il aurait perdu son cachet Terre-Neuvien.

Votre Comité a pour mandat de faire des recommandations concernant le transport dans les provinces Maritimes. Par conséquent, je suggère que vous recommandiez fortement la reconduction et l'amélioration du service voyageur ferroviaire à Terre-Neuve comme première étape vers les progrès.

L'autre moyen de transport dont notre Fraternité se préoccupe est le Service côtier du National Canadien. L'ancienne flotte côtière du Newfoundland Railway, qui appartient désormais au National Canadien, a contribué à l'essort de Terre-Neuve d'une façon inégalable par aucun autre moyen de transport public. Bien avant l'entrée de Terre-Neuve dans la Confédération, la création de la route transcanadienne et de ses embranchements, la flotte côtière assurait le lien vital des communications, dans une tradition maritime de haut aloi qui fait la réputation des gens de Terre-Neuve.

Il est hors de doute que les horaires des navires côtiers aux centaines de ports desservis étaient l'objet de spéculations de la part des nombreux usagers pendant de nombreuses années: le vent, les conditions météorologiques, la marée étant certainement des facteurs de retard, il n'en ressort pas moins que les bateaux arrivaient toujours à bon port.

Au cours des dernières années, il était de mise dans certains milieux d'avancer que la flotte côtière perdait de sa valeur et devait disparaître du paysage, faisant place ainsi aux nouvelles routes reliant les diverses localités. Cela semble attrayant pour les dépenses gouvernementales, et certains affirment que nous devrions abandonner la flotte côtière et prôner les transports routiers. Pour ceux qui peuvent supporter les frais élevés du transport par routes secondaires, cela semble par-

their dollars, the coastal boat is still the best means of travel.

Water traffic is still the cheapest and in Newfoundland with a very low per capita income, in fact, the lowest in Canada, water traffic is still the most attractive.

At least, each Newfoundland outport family should have the choice between the expensive carriage by road or the less expensive carriage by water. Tourist traffic alone, that can bring much needed business into the province can be enticed by maintaining our coastal fleet.

Our coastal fleet should be increased to the extent that freight can be handled on all of the pre-confederation runs and in the summer season extended to accommodate the thousands of passengers that would like to share the beauty of Newfoundland with all of us.

One other aspect of the coastal fleet that requires your attention is the apparent ease that CN can abandon such-and-such a coastal run. At present, if CN feels that it is necessary to close out a small railway station or a branch line, they apply to the Canadian Transport Committee and interested persons can have their views made known. This is not so for our coastal fleet. CN can abandon a coastal run at will. While I have no doubt that some person is consulted, the general public is not given an opportunity by right to protest and present argument.

We recommend that your Committee see to it, that such coastal runs that are to be abandoned, should be subject to public scrutiny in the same manner as is applied when rail lines are abandoned.

Since we commenced to write this brief we have been informed that there is no need to detail our arguments, because we will have the opportunity to make oral presentations to the committee, it is therefore our wish to conclude by listing some of our recommendations. They are as follows:

1. That CN should upgrade the rail-passenger service in the Province of Newfoundland and maintain it in such a manner that it will be as near mainland standards as possible.

2. That the 1700 curves be removed as quickly as possible.

fait, mais pour ceux qui doivent encore économiser sur leurs vêtements, les navires côtiers sont finalement le meilleur moyen de communication.

Le transport maritime est toujours celui qui revient le meilleur marché, et, à Terre-Neuve, avec un revenu par tête très bas, en fait le plus bas au Canada, le transport par eau est encore le plus attrayant.

Pour le moins, chaque famille terreneuvienne habitant dans un port devrait avoir le choix entre le transport par route très coûteux et le transport maritime bien meilleur marché. Le trafic touristique lui-même, qui peut apporter du travail dont on a fort besoin dans la province, pourrait être aiguillonner par le maintient de notre flotte côtière.

Notre flotte côtière devrait être accrue au point que le transport des marchandises puisse être rétabli sur tous les circuits existants avant la confédération, et la saison d'été devrait être allongée afin de permettre aux milliers de passagers qui veulent partager avec nous les beautés naturelles de Terre-Neuve de visiter notre île.

Un autre aspect de la flotte côtière qui requiert votre attention est la facilité avec laquelle, apparemment, le National Canadien peut se permettre d'abandonner tel ou tel circuit côtier. Aujourd'hui, lorsque le National Canadien pense devoir fermer une petite gare ou un embranchement, il doit en référer à la Commission canadienne des transports, et les personnes intéressées peuvent faire valoir leurs points de vue. Ceci est loin d'être le cas en ce qui concerne notre flotte côtière. Le National Canadien peut abandonner un circuit côtier selon son bon vouloir. Si j'admets que certaines personnes sont consultées, il n'en est pas moins vrai que le grand public n'a pas le droit de protester et de contester ces décisions.

Nous recommandons à votre Comité que l'abandon de certains services côtiers soit soumis au public de la même façon que les demandes d'abandon de certaines voies ferrées.

Après avoir commencé la rédaction de ce rapport, nous avons appris qu'il n'était pas nécessaire de préciser nos points de vue, étant donné qu'il nous sera donné l'occasion de faire des représentations de vive voix devant le Comité. Nous terminons donc ce mémoire en énonçant nos recommandations ainsi qu'il suit:

1. Que le National Canadien améliore le service voyageur de la province de Terre-Neuve et le maintienne dans un état équivalent aux normes fixées pour le continent.

2. Que les milles sept-cent courbes soient corrigées aussitôt que possible.

3. That the coastal boat service be increased and future planned abandonments be subject to approval or otherwise of the Canadian Transport Commission.

4. That the applications of CN in their proposal to abandon the Argentia and Bonavista Subdivisions be held in abeyance for a further five years.

5. That the coastal traffic will not be moved from the port of Argentia, until all interested persons have had an opportunity to present their views at public hearings.

6. That the Port of Corner Brook be improved for the handling of freight.

7. That ice-breakers be supplied for the port of Lewisporte so that it can be used as all-winter port for direct shipments from the mainland.

8. That free transportation will be supplied to the residents of Bell Island C.B.

9. That negotiations commence with the U.S. Government so that the Argentia Naval Base can take Air Traffic when Torbay Air Port is fogged in.

10. That negotiations commence with the U.S. Government to allow a portion of the present non usable water front at Argentia for overflow stevedoring operations.

11. That B-C186 will not pass in the Commons.

All of the above items can be debated by our Brotherhood and we will be quite willing to do so at the hearings.

Freshwater, Nfld. Feb. 13, 1968.

E. E. THOMS, General Chairman, Bro. of Railway Airline Clerks, Freight Handlers, Express and Station Employees.

3. Que les services côtiers soient améliorés et que les projets futurs d'abandon de services soient soumis aux décisions de la Commission canadienne des transports.

4. Que les demandes du National Canadien pour l'abandon des subdivisions d'Argentia et de Bonavista soient retenues pour une période supplémentaire de 5 ans.

5. Que le trafic côtier ne soit pas supprimé dans le port d'Argentia avant que toutes les personnes intéressées aient pu exposer leurs points de vue lors d'une audience publique.

6. Que le port de Corner Brook soit amélioré quant aux installations de manutention des marchandises.

7. Que des brise-glace soient dépêchés au port de Lewisport afin qu'il puisse être utilisé à longueur d'année pour la réception de marchandises en provenance directe du continent.

8. Qu'un moyen de transport gratuit soit fourni aux habitants de l'Île Bell.

9. Que des négociations soient entreprises avec le gouvernement des États-Unis afin que la base navale d'Argentia puisse recevoir le trafic aérien lorsque l'aéroport de Torbay est fermé pour cause de brouillard.

10. Que des négociations soient entreprises avec le gouvernement des États-Unis afin de permettre que la partie non-utilisée du port d'Argentia soit employée au surplus d'opérations de quai.

11. Que le projet de loi C-186 ne soit pas présenté aux Communes.

Tous ces points pourront faire l'objet de commentaires de la part de notre Fraternité, et nous serions heureux de le faire lors de l'audience.

Freshwater, Terre-Neuve,
le 31 février 1968.

Fraternité des employés
de chemins de fer, de
l'aviation, des manutentionnaires
de marchandises, des messageries
et des employé de gare.

APPENDIX "W"

BRIEF TO THE STANDING COMMITTEE ON TRANSPORT AND COMMUNICATIONS

The Mayor and Councillors of the City of Corner Brook, on behalf of its citizens, welcome the opportunity to make a presentation to the Committee to present the City's views on the matters of transportation as it affects the City and surrounding area.

While they are interested generally in all aspects of transportation and communication, we feel that our submission should be somewhat confined. Undoubtedly, the Committee will receive many submissions during its visit—some of these submissions will deal in detail with the various matters to be studied. The degree of detail on any one item will depend on the extent to which a particular group is affected by specific problems. We are content, therefore, to leave such technical matters as freight rates, train and boat schedules, airline schedules, etc. to other groups such as the Chamber of Commerce and large industries who are better equipped to make presentations on this matter.

As a municipal government, one of our main concerns is the economic growth of our community and environs. In this connection, it is safe to say that the general feeling of interested groups is that Corner Brook's greatest immediate potential lies in the role it plays as a distribution and commercial centre for western and northern Newfoundland, and, to some degree, Labrador. It is an elementary fact that the success of a distribution centre depends almost entirely upon its *transportation facilities*. It is this topic that we wish to present to you today.

THE PORT OF CORNER BROOK

The port of Corner Brook, which for all practical purposes is a year round port, is the only deep water port in western Newfoundland, and as such, services all of western Newfoundland, the great northern peninsula, and Labrador.

The bulk of the general cargo for the City and surrounding areas is brought in by water. The port, therefore, is of paramount importance to the economy of the area and its significance is self evident. Unfortunately, the present waterfront facilities which are privately owned, and were built 40 years ago, are dilapidated and obsolete. The increased

APPENDICE «W»

MÉMOIRE AU COMITÉ PERMANENT DES TRANSPORTS ET COMMUNICATIONS

Le maire et les conseillers de Corne Brook, au nom des citoyens de leur ville, s réjouissent de l'occasion qui leur est offert de présenter un mémoire au Comité et d faire connaître ainsi leurs vues sur le pro blème des transports et de ses répercussion sur la ville et la région environnante.

En général, tous les aspects des transport et des communications nous intéressent, mai nous croyons que notre mémoire doit se bor ner à certaines questions. Le Comité recevr sans doute plusieurs mémoires au cours de s visite, et certains vont étudier en détail le différentes questions qui touchent de plu près tel ou tel groupe. Nous allons donc nou contenter de laisser des questions technique comme le fret, les horaires de chemins de fer de bateaux, d'avions, etc., à des organisme comme la Chambre de commerce et aux gran des industries qui sont plus en mesure qu nous de rédiger des mémoires sur ce questions.

A titre de municipalité, l'une des question qui nous préoccupent le plus, c'est la crois sance économique de notre collectivité et d ses environs. A ce sujet, on peut dire à coup sûr que, selon l'opinion la plus largement répandue parmi les groupes intéressés, la plu grande partie du potentiel actuel de Corne Brook réside dans le rôle qu'il joue comme centre de distribution et de commerce pou l'Ouest et le Nord de Terre-Neuve et, jusqu'à un certain point, pour le Labrador. Il est bien connu que la prospérité d'un centre de distribution dépend presque entièrement de se installations de transport. C'est de cette question que nous voulons vous entretenir aujourd'hui.

LE PORT DE CORNER BROOK

Le port de Corner Brook, pratiquement ouvert toute l'année, est le seul port en eau profonde de l'Ouest de Terre-Neuve et, comme tel, dessert tout l'Ouest de Terre-Neuve, la grande péninsule du Nord, et le Labrador.

Le gros des marchandises destinées à la ville et à la région environnante est transporté par eau. Le port a sans conteste une importance primordiale pour l'économie de la région; malheureusement, les installations portuaires actuelles, qui sont une propriété privée, et qu'on a construites il y a 40 ans, sont délabrées et désuètes. Et le tonnage des mar-

demands put upon the facilities through continually increasing tonnages have put such a strain on them that the deterioration in the last few years have made them dangerous to work with. I would like to quote an excerpt from a Brief submitted to the Minister of Transport in 1964—"The construction and conditions of the waterfront structures are such that they present a fire hazard and cause a grave anxiety regarding their safety. All of the old docks and sheds are of combustible timber construction, and dock piles coated with oil and tar. Furthermore, the congestion of the waterfront would not permit a rapid deployment of fire fighting equipment in extinguishing a localized fire.

Such a fire could develop into a major disaster which might wipe out a large part of the port due to the concentration of the docks in one area."

The entire subject of the harbour development and facilities has been under consideration for some time by the Department of Public Works of Canada and it is our understanding now, that shortly, action will be taken to commence work on the reconstruction and the building of new facilities in this area for which, we believe, the sum slightly in excess of one million dollars has been placed in the estimates and is presently before Parliament.

However, it is only fair to say that the importance of the harbour facilities are vital to the continued economic growth and even the maintenance of the present economic growth of this area.

The shipping company which uses this port, the Clarke Steamship Company, has advised Council that unless the facilities are available, they will be forced to discontinue their service as at the end of this year. This will result in a loss of a considerable number of jobs in the port area, plus the loss of a considerable payroll which runs, I believe, in the region of some four hundred thousand dollars a year. Quite apart from this comes the inconvenience brought about by the unavailability of direct shipping from Montreal and the picture which would arise from the discontinuation of this steamship service is not only grave, but is likely to cause a terrible blow to the economic picture of this area.

GROWTH OF THE AREA

It is a well known fact that since Confederation, Newfoundland generally has experienced considerable economic growth. Naturally, Corner Brook and the surrounding areas have to some extent shared in this growth. The building and opening of the Trans-Canada Highway and the all-weather road up the great Northern Peninsula have

chandises augmentant sans cesse, l'usage croissant qu'on en a fait a été tel que leur détérioration, ces dernières années, les a rendues dangereuses. Permettez-moi de citer un extrait d'un mémoire présenté au ministre des Transports en 1964: «La construction et les conditions des installations portuaires sont telles que celles-ci présentent un risque d'incendie et posent de graves problèmes de sécurité. Tous les vieux quais et hangars sont en bois inflammable, et les piliers des quais sont enduits de pétrole et de goudron. De plus, l'encombrement des quais empêcherait d'y déployer rapidement un matériel de lutte contre l'incendie pour éteindre les flammes.

Un tel incendie pourrait prendre les proportions d'un sinistre et détruire une grande partie du port dont les quais sont concentrés dans un secteur.»

Le ministère des Travaux publics du Canada étudie depuis un certain temps toute la question de l'expansion du port et de ses installations, et nous croyons savoir qu'on commencera sous peu la reconstruction et la construction de nouvelles installations dans ce secteur, pour qui, semble-t-il le budget prévoit une somme légèrement supérieure à un million de dollars, crédit actuellement soumis à l'étude du Parlement.

Il est juste de dire que l'importance des installations portuaires est vitale pour la croissance économique continue, et même pour le maintien de la croissance économique actuelle de cette région.

La compagnie de navigation qui utilise ce port, la *Clarke Steamship Company*, a averti le conseil qu'à moins d'avoir les installations voulues, elle se verra forcée d'interrompre son service à la fin de la présente année. Ce qui entraînera la suppression d'un nombre considérable d'emplois dans le port, sans compter les pertes en salaires qui, je crois, se chiffrent à environ $400,000 par an. A cela vient s'ajouter le fait qu'on ne pourra plus expédier directement de Montréal, ce qui veut dire que l'interruption de ce service de navigation n'est pas seulement grave en soi, mais va vraisemblablement porter un coup terrible à l'économie de cette région.

CROISSANCE DE LA RÉGION

Il est notoire que, depuis son entrée dans la Confédération, Terre-Neuve, en général, a connu une grande croissance économique. Bien entendu, Corner Brook et la région environnante ont, jusqu'à un certain point, participé à cette croissance. La construction de la route trans-canadienne et de la route «toutes saisons» qui longe la grande péninsule du

linked the entire west coast and have changed the supply pattern in this area. Many areas of the coast, particularly those which formerly depended upon St. John's for the supply of goods and service, now look to Corner Brook for the very obvious reason that with the roads available and the shorter distances, this is now obviously the supply centre for the entire west coast of Newfoundland. On top of this, the proximity of Corner Brook to the newly created industrial areas of Baie Verte, Little Bay, Whale Back and so on, has made a natural source of supply. Now available is faster and more economic movement of goods to these areas and at the same time, the increased activity increases employment in our City and thus the benefits are two-fold. On the other hand, increased activity is actually beyond our capacity because our facilities were provided to meet the needs of a small self-sufficient town of ten thousand and no major changes have taken place during the years in these facilities.

However, the City has now grown to house thirty thousand people, the surrounding area in the Bay of Islands has grown and roads have sprouted to every community in the area and we find ourselves the hub now of an area which holds a population of approximately one hundred and fifty thousand people.

With this tremendous growth, much of which has happened in recent years, it is quite obvious that while we have reaped the benefits of Confederation in so far as the social benefits which accrue to all Canadians everywhere in Canada (and this has contributed to our economic growth) in fact the Federal spending has been almost non-existent in our area to the present date.

CANADIAN NATIONAL RAILWAYS

We are quite sure that some members of the Committee are familiar with the tremendous developments that the Canadian National Railway's base in Port aux Basques. Much money has been spent in this area to speed up the transportation of supplies and goods with the least amount of handling, and so in Port aux Basques will be found some of the most modern freight handling facilities in all of Canada. The Canadian National Railway facilities in Corner Brook, however, are not adequate to handle all traffic coming into this area for, quite apart from the direct steamship service provided by cargo ships from Montreal to Corner Brook, which incidentally are faster and cheaper than Canadian Na-

Nord a permis de relier toute la côte ouest et de modifier le système d'approvisionnement de cette région. Plusieurs secteurs de la côte, particulièrement ceux qui, autrefois, étaient tributaires de Saint-Jean pour la fourniture des biens et des services, se tournent maintenant vers Corner Brook pour la raison bien évidente que les nouvelles routes et les distances plus courtes en ont fait le centre d'approvisionnement de toute la côte ouest de Terre-Neuve. En outre, la proximité de Corner Brook des nouveaux secteurs industriels de Baie-Verte, de Little Bay, de Whale Back, etc., en a fait une source naturelle d'approvisionnement. Il est maintenant possible d'expédier des biens vers ces régions plus rapidement et d'une façon plus économique; en même temps, cette activité accrue fait augmenter le nombre des emplois dans notre ville et, ainsi, entraîne des bénéfices sur deux plans. D'autre part, cette activité dépasse actuellement nos capacités, car nos installations, créées en fonction des besoins d'une petite ville de 10,000 habitants qui se suffit à elle-même, n'ont subi aucune grande transformation au cours des ans.

Mais la ville compte actuellement 30,000 habitants, la région voisine de Bay of Islands s'est développée, les routes relient toutes les localités de la région et nous nous retrouvons maintenant au centre d'une région qui compte une population d'environ 150,000 personnes.

Par suite de cette croissance accélérée, dont une grande partie s'est faite ces dernières années, il est évident que nous avons tiré profit de la Confédération pour ce qui est des prestations sociales accordées à tous les Canadiens, partout au Canada (et cela a contribué à notre croisssance économique), mais en réalité, les dépenses du gouvernement fédéral dans notre région ont été pratiquement inexistantes jusqu'à présent.

LES CHEMINS DE FER NATIONAUX DU CANADA

Nous sommes à peu près sûrs que certains membres du Comité connaissent bien les importantes installations que les Chemins de fer nationaux du Canada ont établies à Port-aux-Basques. On a dépensé beaucoup d'argent dans cette région pour accélérer le transport des biens et des marchandises, avec le moins de manutention possible, et c'est pourquoi on trouve à Port-aux-Basques quelques-unes des installations de manutention les plus modernes du Canada. Les installations des Chemins de fer nationaux du Canada à Corner Brook, cependant, ne suffisent pas à assurer le transport de toutes les marchandises qui arrivent dans cette région, car, sans compter le service de navigation entre Montréal et Corner

tional Railway, it must be borne in mind that the Canadian National Railway, in Newfoundland operates a coastal ship service which has a base in Corner Brook and which handles freight from Corner Brook up the north west coast to southern Labrador and down the north east coast of Newfoundland.

While there is always the possibility that with changing conditions, with the introduction of a better road system, with the necessity for providing faster service, the Canadian National Railway may soon find that the demand of its services will diminish. This will be true, perhaps, for those areas reached quickly by road from the central point of Corner Brook but for many years to come undoubtedly there will be a need to maintain the Canadian National Railway coastal services for the furthermost points and for Labrador, for there are still areas on the north coast of Newfoundland which are without roads and must be serviced by sea.

It will be extremely expensive to build roads to some of these areas and it would appear, therefore, that a coastal service will have to be maintained and to maintain a coastal service, it is imperative to maintain improved facilities in the port of Corner Brook. It is impossible to have adequate water transportation unless there are adequate port facilities and the entire matter of port facilities in Corner Brook is of the utmost and vital importance to the entire area under consideration.

In spite of the fact that money has been allocated in the estimates, it is important to draw the attention of the Committee to the serious situation which will develop if this matter is not developed further and rapidly.

CANADIAN NATIONAL RAILWAY PASSENGER SERVICE

The announcement that the Canadian National Railway in Newfoundland is to discontinue passenger service in April of 1969 has been greeted by the City Council of the City of Corner Brook with an unanimous degree of dismay and this has been shared by members of the public across Newfoundland to a great extent, and in fact, to the extent of considerable demonstration of feeling, particularly during the train ride which was taken by the members of Parliament of this province several months ago.

It is our firm belief that this is not in the interest of the travelling public, the employees, the province and the economy of the entire area. It is worth considering the history of the railway from its beginning, the work that has been done by the railway, the

Brook, dont les cargos, soit dit en passant, sont plus rapides et plus économiques que les trains du Canadien National, on ne doit pas oublier que le CN exploite à Terre-Neuve, un service de cabotage qui possède un port à Corner Brook et transporte les marchandises de Corner Brook, le long de la côte du nord-ouest, jusqu'au Sud du Labrador, puis le long de la côte nord-est de Terre-Neuve.

Il est toujours possible que de nouvelles conditions, la construction d'un meilleur réseau routier, et la nécessité d'assurer un service plus rapide, permettent bientôt au CN de découvrir que ses services sont moins en demande, notamment dans ces régions qu'on peut atteindre rapidement par la route à partir de Corner Brook; mais pour plusieurs années à venir, il sera sans aucun doute nécessaire de maintenir le service de cabotage du Canadien National pour les points les plus éloignés et pour le Labrador, car il y a encore des régions, le long de la côte nord-est de Terre-Neuve, qui n'ont pas encore de routes et qu'on doit desservir par mer.

La construction de routes dans certaines de ces régions coûtera très cher, et il semble donc qu'on devra maintenir un service de cabotage; à cette fin, il est impérieux qu'on améliore les installations du port de Corner Brook. Il est impossible d'avoir un bon service de transport maritime sans de bonnes installations portuaires, et toute la question des installations portuaires de Corner Brook est d'une importance vitale pour la région.

En dépit du fait que le budget prévoit des crédits, il est important d'attirer l'attention du Comité sur la situation délicate qui va naître si on ne règle pas toute cette question rapidement.

LE SERVICE DES VOYAGEURS DES CHEMINS DE FER NATIONAUX DU CANADA

L'annonce que les Chemins de fer nationaux du Canada allaient discontinuer leur service des voyageurs, à Terre-Neuve, en avril 1969, a été accueillie par le conseil municipal de la ville de Corner Brook avec un sentiment unanime de consternation, sentiment partagé par une grande partie de la population de Terre-Neuve et qui s'est manifesté d'une manière très vive, particulièrement au cours du voyage en chemin de fer effectué par les députés de cette province, il y a plusieurs mois.

Nous sommes convaincus que cela dessert les intérêts du public voyageur, des employés, de la province et de l'économie de toute la région. Il vaut la peine de se rappeler les débuts des chemins de fer, le travail qu'ils ont accompli, leur importance pour les diver-

importance of the railway to the various communities it serves and to the people employed on the railway.

However, while one can fall into the trap of feeling sentimental about discontinuation of such service, in fact there are two important aspects of this matter which must be brought to this committee.

First, the Terms of Confederation firmly laid down that the service would be continued commensurate with the amount of traffic offering. It was surely never intended, nor in fact visualized, that the day would come when at the wave of a wand the passenger service might be discontinued. It could, in fact, be stated that not only was it never the intention or visualized that this discontinuance might occur, but had this, in fact, ever arisen it would surely have been plainly stated that the service would be continued until it was discontinued throughout the rest of Canada. Under the Terms of Confederation, it is believed that the passenger service was to be continued in perpetuity or until Canada no longer had a rail passenger service operated by the Canadian National Railway. This will be dealt with in full detail at the hearing and there will be other items. However, the second important aspect is that in fact the Canadian National Railway made the announcement that they would discontinue their passenger service in Newfoundland before they were even granted a license to operate a bus service which was to replace the rail service.

There are many aspects of the newly introduced bus service which do not appear to fulfill the terms of Confederation and it is firmly held that the rail passenger service not only should be continued but must be continued to present to the travelling public an alternative method of travelling in the event of one or the other breaking down.

There is no doubt that had the Canadian National Railway not decided to introduce bus service, it would have been introduced shortly by some private business firm and it is doubtful, under those circumstances, if the Canadian National Railway would have entered into competition with a private company.

One of the most interesting points that must be pointed out is the fact that in the whole of Canada during the last fiscal year reported by the Canadian National Railway, the cost of operating the Canadian National Railway services was thirty-six million dollars. The cost of operating all services in Newfoundland, and this included rail passenger service, freight services and steamship services, was only one million dollars. However, it has been more than abundantly

ses localités qu'ils desservent et pour les personnes qui sont à leur service.

On pourrait peut-être faire du sentimen avec la discontinuation de ce service, mai cette question a deux aspects important qu'on doit porter à l'attention de votr Comité.

Tout d'abord, l'e pacte confédératif avai établi bien clairement que le service conti nuerait, proportionnellement à l'importanc du trafic marchandises. On n'avait sûremen jamais eu en vue ni, en fait, prévu le jour où d'un coup de baguette, le service des voyageurs pourrait être supprimé. On aurait pu bien sûr, déclarer qu'on n'avait jamais prévu ni envisagé cette interruption, mais si cela s'était produit, on aurait certainement déclaré que le service continuait jusqu'à sa suppression dans tout le Canada. Selon le pacte confédératif, on peut croire que le service des voyageurs devait être assuré à perpétuité, ou jusqu'à ce que le Canada n'ait plus le service des voyageurs du CN. On étudiera à fond cette question au cours de la séance, de même que d'autres questions. L'autre aspect important, c'est le fait que les Chemins de fer nationaux ont annoncé qu'ils interrompaient leur service des voyageurs à Terre-Neuve avant même d'avoir obtenu le permis d'exploitation du service d'autobus qui doit remplacer le service de chemins de fer.

Sous plusieurs aspects, le nouveau service d'autobus ne semble pas respecter les conditions du pacte confédératif, et nous soutenons fermement que le service des voyageurs doit non seulement continuer, mais aussi permettre au public voyageur de choisir un autre mode de transport, au cas où l'un des deux disparaîtrait.

Il ne fait aucun doute que si le CN n'avait pas décider de créer un service d'autobus, une entreprise privée l'aurait bientôt fait, et il est douteux, dans ces conditions, que le CN soit entré en concurrence avec une compagnie privée.

L'un des points les plus intéressants à souligner, c'est le fait que, au cours de la dernière année financière, le coût d'exploitation global des services du Canadian National a atteint 36 millions de dollars, alors que le coût d'exploitation de tous les services, à Terre-Neuve, y compris le service des voyageurs, le service des marchandises et le service maritime, n'a atteint qu'un million de dollars. Mais il est devenu plus qu'évident, ces dernières années, que le CN était impatient de discontinuer ses

evident over the past few years that the Canadian National Railway has been anxious to discontinue its service and the rail passenger service has been allowed to deteriorate to the point of being simply disgraceful. The freight services have reached the stage of being deplorable. The damage and loss, the delays and the multitude of other complaints that pour forth from every business firm that has dealings with the Canadian National Railway are too numerous to mention.

There are many ways in which the Canadian National Railway could have helped the Province of Newfoundland; one of the simplest of which would be a rail liner service linking with the bus service to provide fast and comfortable service across the Province.

There are still communities which are dependent upon the railway alone and they have to be considered before such action can be taken by the Canadian National Railway. Nor has any consideration been given the disabled or sick people who travel in fair comfort on the passenger train but are unable, due to their various conditions, to travel by bus.

Should, in fact, the Canadian National Railway be allowed to discontinue their service this will be the only province in Canada which no longer has a rail passenger service supplied by the Canadian National Railway. The simple hard fact remains, however, that at stake here is a principle, the principle of all citizens, all the people of Canada being equal, the principle of the Canadian National Railway, the national railway of Canada supplying all the people of Canada that it possibly can and making available to as many people in Canada a service that is designed for all of Canada. There must be no difference between the Province of Newfoundland or Nova Scotia or New Brunswick or Prince Edward Island or Alberta or Saskatchewan or British Columbia or anywhere else and it is formally contended that under these circumstances this is an ill-advised step to allow the Canadian National Railway to discontinue its passenger service, a step which would result in making the people of Newfoundland, frankly, second class citizens—no longer entitled to rail service—but only to bus service. Not only does the discontinuation of this service make Newfoundland a province of second class citizens but in allowing this to happen, the Government of Canada is breaking the terms of Confederation and every member of Parliament has a moral responsibility to see that the Province of Newfound-

services, et c'est pourquoi on a laissé le service des voyageurs se détériorer au point d'être tout simplement ridicule, tandis que le service des marchandises devenait déplorable. Il serait fastidieux d'énumérer les dommages, les pertes, les retards, et une multitude d'autres plaintes qu'ont fait pleuvoir toutes les maisons d'affaires qui ont traité avec les Chemins de fer nationaux du Canada.

Le CN aurait pu aider la province de Terre-Neuve de plusieurs façons; l'une des plus simples aurait été d'établir un système d'autorails, relié au service d'autobus, en vue d'assurer un service de transport rapide et confortable, à travers la province.

Il y a encore des localités qui dépendent uniquement des chemins de fer et on doit en tenir compte avant que le CN puisse agir. On n'a pas tenu compte non plus des invalides ou des malades qui voyagent par chemins de fer, dans un certain confort, mais qui ne peuvent pas voyager par autobus, à cause de leur état.

Si on devait permettre au Canadian National d'interrompre ses services, Terre-Neuve serait la seule province canadienne à ne plus avoir le service des voyageurs du CN. Il n'en reste pas moins qu'il s'agit ici d'un principe, du principe de l'égalité de tous les citoyens canadiens, du principe voulant que les Chemins de fer nationaux desservent tous les habitants du Canada, autant que possible, et leur fournissent un service qui convient à tout le Canada. Il ne doit pas y avoir de différence entre Terre-Neuve et la Nouvelle-Écosse, le Nouveau-Brunswick, l'Île du Prince-Édouard, l'Alberta, la Saskatchewan ou la Colombie-Britannique, ou n'importe quel autre endroit, et nous affirmons formellement que, dans ces conditions, il serait mal avisé de permettre au CN de discontinuer son service des voyageurs, mesure qui aboutirait à faire des habitants de Terre-Neuve des citoyens de seconde zone n'ayant plus droit à un service de chemins de fer, mais seulement à un service d'autobus. Non seulement l'interruption de ce service fait de Terre-Neuve une province de seconde zone, mais, en permettant cela, le gouvernement canadien enfreint les conditions du pacte confédératif, et chaque député a l'obligation de voir à ce que la province de Terre-Neuve reste fière d'être membre de la Confédération canadienne et à ce que le gouvernement fédéral, sous aucun prétexte, ne permettra que les conditions du

land shall remain proud to be a member of the Dominion of Canada and aware that the Federal Government will, under no circumstances, allow any of the terms of Confederation to be tampered with by any individual body, corporation or what have you.

There are other aspects of transportation and communication which will be discussed more fully at the actual hearing.

pacte confédératif soient violées par un individu, une société, etc.

Nous discuterons davantage, au cours de la présente séance, d'autres aspects des transports et communications.

APPENDIX "X"

99A Campbell Ave.,
St. John's, Nfld.,
January 26, 1969.

The Chairman,
Commons Transport Committee,
Ottawa.

Dear Sir,

I wish to submit to you the following brief for hearings to be held by your Committee in St. John's during February.

Ever since Canadian National made application to discontinue rail passenger service in Newfoundland, I have been totally against the move, as I feel it's not to the best interest of the people of Newfoundland, especially those depending upon a reliable method of transportation.

First and foremost, Canadian National in its present plans is offering the people of Newfoundland, what I call a second class method of transportation as the planned bus service is neither adequate nor sufficient to meet the traveling public's needs. No doubt this past month has shown this point very clearly. These buses have been off the road, according to various news reports, no less than four times, and either stopped or stuck in snow drifts the same number of times for long periods of time. During these times the train had to come to the rescue or those passengers en route would have been stranded.

Secondly, seventeen buses cannot serve the people of Newfoundland adequately all year round. In the name of common sense, what can eight 40-passenger buses do when a train of twenty cars cannot accommodate the travelling public at peak periods. To serve the people adequately all year round Canadian National would need fifty or more buses which wouldn't prove economical as thirty of them would lie up eleven months of the year.

Thirdly, buses cannot provide a reliable service in Newfoundland six months of the year. Climatic conditions won't permit it. This month's records won't permit me to say more as the records speak for themselves.

Fourthly, Canadian National wants to give the people inadequate and second class transportation while they improve and give the

APPENDICE «X»

Saint-Jean (Terre-Neuve)
Le 26 janvier 1969

Comité permanent des transports et communications
Ottawa

Monsieur le président,

Je me permets de soumettre le présent mémoire à votre Comité, qui doit tenir des séances à Saint-Jean au cours de février.

Le Canadien National a demandé d'interrompre son service des voyageurs, à Terre-Neuve; je suis tout à fait contre cette mesure, car je crois qu'elle dessert les intérêts des habitants de Terre-Neuve, particulièrement de ceux qui dépendent d'un moyen de transport sûr.

D'abord et avant tout, le Canadien National, à l'heure actuelle, offre aux habitants de Terre-Neuve ce que j'appelle un moyen de transport de seconde classe, car le service d'autobus qu'on prévoit établir ne répondra pas plus aux besoins du public voyageur. Pour s'en rendre compte, il suffit de voir ce qui est arrivé au cours du dernier mois. A quatre reprises au moins, les autobus n'ont pu rouler parce qu'ils étaient pris dans la neige, et ce, pendant un bon bout de temps. Les trains ont dû alors venir au secours des passagers qui, autrement, seraient restés dans la tempête.

Deuxièmement, seize autobus ne peuvent réussir à desservir la population de Terre-Neuve toute l'année. Scrogneugneu! Comment huit autobus à quarante places pourraient-ils répondre aux besoins du public, aux périodes de pointe, alors qu'un train de vingt wagons ne peut pas le faire? Pour assurer un bon service à longueur d'année, le Canadien National aurait besoin de cinquante autobus ou davantage, ce qui ne prouve pas que le système serait économique, car trente d'entre eux seraient mis à l'écart onze mois par an.

Troisièmement, les autobus ne peuvent pas fournir un service sûr, à Terre-Neuve, pendant six mois de l'année. Les conditions climatiques ne le permettent pas. Je n'ai pas besoin d'en dire plus, car les chiffres du présent mois parlent d'eux-mêmes.

Quatrièmement, le Canadien National veut nous donner un service de transport inadéquat et de seconde classe, alors qu'il améliore

other provinces the best that first class service can offer. Replacing the Cariboo Express will not help solve the high loss in money but will only increase it. It will drive tourists from Newfoundland and drive Newfoundlanders to the highway in their cars, where now they use the train to get clear of it. C.N. as far as I see now, will operate a fleet of empty buses such as I have seen this past week when the bus arrived here on one day with one passenger and again on another day two. Never has the train matched that figure.

What we want them to give us is year-round, dependable service in the rail service which buses can't replace, not a bus service that is neither adequate or reliable. May I suggest that C.N.'s permission to remove the passenger trains be cancelled and that instead of removing the trains, the service be upgraded so as to meet mainland standards. (a) To do this C.N. should cut the time distance from St. John's to Port aux Basques. This can be done by operating shorter trains and eliminating long stopovers and stops that are unnecessary. (b) Present sleeping cars and coaches be reconditioned and equipped with air conditioning. (c) Dining cars to serve meals that apply to Newfoundland, which tourists and Newfoundlanders alike want and can't get. (d) Finally, trains in slow traffic periods be supplemented by motorized coaches which would be more dependable and economical than buses.

Finally, sir, why should we, the people of Newfoundland, have to put up with poor service and highway fatigue in sitting up in a bus that is full of rolling brackets, screaming children and tobacco smoke, or a traffic congested, snow and ice clogged road for a period of sixteen to eighteen hours on a distance of over six-hundred miles, while the people of mainland Canada can rest in comfortable coaches and sleeping cars. This to me is neither fair nor just to the people of Newfoundland.

As a public transportation company, Canadian National should be and is obligated to provide Newfoundland with adequate and dependable service all year round. The Cariboo express Sirs, and not buses can provide this. In the name of everything that is just and right, I ask you to have this decision by C.T.C. reversed and our trusted and proven and reliable rail service remain. If not I feel Newfoundland faces nothing as far as transses services dans les autres provinces et leur offre ce qu'il y a de mieux. Remplacer l'express «Caribou» ne résoudra pas le problème des fortes pertes d'argent, mais l'aggravera. Cette mesure éloignera les touristes de Terre-Neuve et poussera les habitants de cette province à utiliser le réseau routier, alors qu'ils prennent actuellement le train justement pour ne pas s'aventurer sur ces routes. D'après ce que je vois, le Canadien National a l'intention d'exploiter un service d'autobus vides, comme celui que j'ai vu arriver, un jour de la semaine dernière, avec un seul passager à son bord, et le lendemain, avec deux passagers. Le train n'a jamais pu en arriver jusque là.

Ce que nous voulons, c'est que le CN nous fournisse, toute l'année, un service sûr, ce qu'un service d'autobus ne peut remplacer, surtout s'il n'est pas adéquat ou sûr. Je me permets de proposer qu'on retire au CN la permission d'interrompre son service des voyageurs, et, qu'au lieu de supprimer des trains, on améliore le service de façon à atteindre le niveau du service sur le continent. (a) Pour ce faire, le Canadien National devrait réduire la durée du trajet entre Saint-Jean et Port-aux-Basques. On pourrait y arriver en faisant rouler des trains moins longs et en supprimant les longs arrêts non nécessaires. (b) Il faudrait rénover les wagons-lits et les voitures actuels et y installer la climatisation. (c) Il faudrait aussi que les wagons-restaurants servent des repas qui conviennent à Terre-Neuve et que les touristes et les habitants de Terre-Neuve veulent, mais ne peuvent obtenir. (d) Finalement, lorsque la circulation est encombrée, qu'on supplée les trains par des autorails qui seraient plus sûrs et économiques que des autobus.

Enfin, pourquoi les habitants de Terre-Neuve devraient-ils subir, pendant seize à dix-huit heures, sur une distance de plus de six cents milles, un piètre service et la fatigue de la route en voyageant à bord d'autobus pleins de bouteilles qui roulent sur le plancher, d'enfants qui pleurent, et de fumée de tabac, alors que les routes sont encombrées, ou recouvertes de neige et de glace, tandis que les habitants du continent peuvent se reposer dans des voitures et des wagons-lits confortables? Il me semble que cela n'est pas juste pour les habitants de Terre-Neuve.

Le Canadien National étant une compagnie de transport public, il doit fournir à Terre-Neuve un service adéquat et sûr, toute l'année. L'express «Caribou» le peut, mais non les autobus. Ce n'est que justice de demander que la Commission canadienne des transports renverse cette décision et maintienne notre service de chemins de fer, sur lequel nous pouvons compter et qui a déjà fait ses preuves. Sinon, je crois que les habitants de

portation goes, but confusion and chaos. In a growing province this rail service is vital and must be allowed to remain and be improved.

I remain
Yours truly,

Harvey Kents.

Terre-Neuve, pour ce qui est des transports, ne connaîtront que confusion et chaos. Ce service est vital pour la croissance de notre province et on doit l'y laisser, tout en l'améliorant.

Veuillez agréer, Monsieur le président, l'assurance de ma haute considération.

Harvey Kents.

MINUTES OF PROCEEDINGS

MONDAY, February 24, 1969.
(28)

The Standing Committee on Transport nd Communications met this day at harlottetown at 9.30 a.m., the Chairman, Ir. Lessard, presiding.

Members present: Messrs. Allmand, reau, Carter, Corbin, Godin, Lessard *LaSalle*), McGrath, Mahoney, Nesbitt, errault, Portelance, Pringle, Rock, Rose, koberg, Thomas (*Moncton*), Trudel, Turer (*London East*)—(18).

Also present: Messrs. Macquarrie and MacLean, Members of Parliament.

Witnesses: The Premier of Prince Edward Island: The Honourable Alex Campbell; *From the Charlottetown Board of Trade:* Messrs. W. R. Brennan, Chairman of the Transportation and Communications Committee; R. W. Smith, President, and C. W. Moffatt, General Manager.

The Chairman introduced Premier Campbell and invited him to read the brief of the Government of Prince Edward Island and before being questioned thereon.

The Premier filed with the Clerk of the Committee a copy of the brief presented by the Province of Prince Edward Island to the Federal Government of Canada concerning the Northumberland Strait Crossing. (*Exhibit A*) The Premier accepted to provide additional information to the Members of the Committee. It was *agreed* that this information be filed with the Clerk of the Committee as *Exhibit B*.

The Chairman then introduced other witnesses who summarized their briefs and were questioned thereon.

The Charlottetown Board of Trade *agreed* to file as *Exhibit C* additional in-

PROCÈS-VERBAL

Le LUNDI 24 février 1969
(28)

Le Comité permanent des transports et des communications se réunit aujourd'hui à Charlottetown à 9 heures et demie du matin, sous la présidence de M. Lessard, président.

Présents: MM. Allmand, Breau, Carter, Corbin, Godin, Lessard (*LaSalle*), McGrath, Mahoney, Nesbitt, Perrault, Portelance, Pringle, Rock, Rose, Skoberg, Thomas (*Moncton*), Trudel, Turner (*London-Est*)—(18).

Aussi présents: MM. Macquarrie et MacLean, députés.

Témoins: Le premier ministre de l'Île du Prince-Édouard, l'honorable Alex Campbell. Représentant le *Board of Trade de Charlottetown:* MM. W. R. Brennan, président du conseil du Comité des transports et communications, M. R. W. Smith, président, et M. C. W. Moffatt, directeur général.

Le président présente le premier ministre Campbell et l'invite à donner lecture du mémoire du gouvernement de l'Île du Prince-Édouard avant d'être interrogé à ce sujet.

Le premier ministre remet au secrétaire du Comité le texte du mémoire présenté par la province de l'Île du Prince-Édouard au gouvernement fédéral du Canada concernant la traversée du détroit de Northumberland (*Pièce «A»*). Le premier ministre consent à fournir des renseignements supplémentaires aux membres du Comité. Il est convenu que ces renseignements (*Pièce «B»*) seront remis au secrétaire du Comité.

Le président présente alors d'autres témoins, lesquels donnent lecture d'un résumé de leurs mémoires et sont interrogés à ce sujet.

Le *Board of Trade* de Charlottetown *consent* à remettre comme *pièce «C»* des

formation with the Clerk of the Committee.

At 12.30 p.m. the Committee adjourned until 2.00 p.m. this day.

AFTERNOON SITTING
(29)

The Standing Committee on Transport and Communications met this day at Charlottetown at 2.00 p.m., the Chairman Mr. Lessard presiding.

Members present: Messrs. Allmand, Breau, Carter, Corbin, Godin, Lessard (*LaSalle*), McGrath, Mahoney, Nesbitt, Perrault, Portelance, Pringle, Rock, Rose, Skoberg, Thomas (*Moncton*), Trudel, Turner (*London East*)—(18).

Also present: Messrs. Macquarrie and MacLean, Members of Parliament.

Witnesses: From the Prince Edward Island Potato Marketing Board: Messrs. Donald MacKenzie, Member; Robert Farquharson, Member; and George MacMurdo; *From Jenkins Brothers Limited:* Mr. J. R. Phaneuf; *From Hawker-Siddley:* Mr. A. W. Owen, Traffic Manager. *Major D. A. MacDonald, Private Citizen. From the Maritime Motor Transport Association:* Messrs. J. Lowell Hogg, Vice-president; A. H. Howard, Director; and Keith MacKinnon, Director; *From Industrial Enterprises Incorporated:* Mr. Joseph A. Bergasse.

The Chairman introduced the witnesses and invited them to summarize their respective briefs before being questioned thereon.

(*See Appendix "Y" for brief of Jenkins Brothers Limited.*)

(*See Appendix "Z" for second brief of Major MacDonald.*)

(*See Appendix "A-1" for brief of Industrial Enterprises Incorporated.*)

On motion of Mr. Perrault, it was

renseignements supplémentaires au secrétaire du Comité.

A midi et demi, le Comité s'ajourne jusqu'à 2 heures de l'après-midi.

SÉANCE DE L'APRÈS-MIDI
(29)

Le Comité permanent des transports et des communications se réunit aujourd'hui à Charlottetown à 2 heures de l'après-midi, sous la présidence de M. Lessard.

Présents: MM. Allmand, Breau, Carter, Corbin, Godin, Lessard (*LaSalle*), McGrath, Mahoney, Nesbitt, Perrault, Portelance, Pringle, Rock, Rose, Skoberg, Thomas (*Moncton*), Trudel, Turner (*London-Est*)—(18).

Aussi présents: MM. Macquarrie et MacLean, députés.

Témoins: Représentant l'Office de mise sur le marché des pommes de terre de l'Île du Prince-Édouard: MM. Donald MacKenzie, membre; Robert Farquharson, membre, ainsi que George MacMurdo; représentant *Jenkins Brothers Limited:* M. J.-R. Phaneuf; représentant *Hawker-Siddley:* M. A. W. Owen, gérant du trafic. Le major D. A. MacDonald, particulier. Représentant l'Association du transport par véhicules à moteur des provinces Maritimes: MM. J. Lowell Hogg, vice-président; M. A. H. Howard, administrateur; et M. Keith MacKinnon, administrateur; représentant *Industrial Enterprises Incorporated:* M. Joseph A. Bergasse.

Le président présente les témoins et les invite à présenter un sommaire de leurs mémoires avant d'être interrogés à ce sujet.

(*Voir Appendice «Y»—mémoire de Jenkins Brothers Limited*)

(*Voir Appendice «Z»—second mémoire du major MacDonald*)

(*Voir Appendice «A-1»—mémoire de Industrial Incorporated*)

Sur la motion de M. Perrault, *il est décidé:*

Resolved,—That the Eastern Provincial Airways be requested to appear before this Committee at Ottawa on a date to be determined.

At 4.25 p.m. the Committee adjourned to the call of the Chair.

Que les *Eastern Provincial Airways* soient priés de comparaître devant le Comité à Ottawa à une date qui sera fixée plus tard.

A 4h.25 de l'après-midi, le Comité s'ajourne jusqu'à nouvelle convocation du président.

Le secrétaire du Comité,
Robert Normand,
Clerk of the Committee.

The Chairman: I would like to welcome you all to this sitting this morning in Charlottetown. I would like to apologize to those who were here last year and did not have a chance to be heard; things look much better today from that point of view. Before continuing I would like to call upon the Premier of Prince Edward Island to say a word to the audience. I will now call on the Right Honourable Mr. Alex Campbell, please.

The Honourable Alex Campbell (Premier of Prince Edward Island): Thank you very much, Mr. Chairman.

The Chairman: We may go off our schedule this morning but I think it would be in order to listen to the brief of the Province first this morning. Would the Committee agree?

Some hon. Members: Agreed.

The Chairman: Premier Campbell.

Mr. Campbell: Mr. Chairman, I wonder if I might have Mr. Wells circulate copies of the province's brief so that the members of your Committee may have an opportunity to make notes as we go through it.

The Chairman: You will find the brief of the Province on page 843. The brief has been changed a little and I think the Premier will give us an outline of the new brief.

Mr. Campbell: Mr. Chairman, and members of the Committee, I understand this morning there will be approximately seven briefs presented to your Committee outlining the various problems of transportation as they affect Prince Edward Island, but at the outset let me say on behalf of the government and people of Prince Edward Island, I welcome you and the members of your Committee to this province and to this capital city.

I have been given to understand that your journey here was considerably less arduous than that of your predecessors approximately one year ago. We are pleased that you have come to observe our transportation facilities, to learn about our transportation problems,

TÉMOIGNAGES

(Enregistrement électronique)

Le lundi 24 février 1969

[*Interprétation*]

Le président: Je voudrais vous souhaiter la bienvenue à la réunion de ce matin à Charlottetown. J'aimerais, tout d'abord, exprimer nos regrets à ceux qui étaient ici l'an dernier et qui n'ont jamais eu l'occasion de se faire entendre. A ce propos, je crois que les choses iront beaucoup mieux aujourd'hui.

Avant de continuer, j'aimerais demander au premier ministre de l'Île-du-Prince-Édouard de venir nous adresser la parole. Monsieur Alex Campbell.

L'honorable Alex Campbell (premier ministre de l'Île-du-Prince-Édouard): Merci, monsieur le président.

Le président: Je crois que nous pourrions laisser de côté notre horaire ce matin pour entendre d'abord le mémoire présenté par la province. Est-ce entendu?

Des voix: D'accord.

Le président: Le premier ministre, M. Campbell.

M. Campbell: Monsieur le président, je me demande si vous permettriez à monsieur Wells de distribuer des copies du mémoire de la province pour que les membres de votre comité puissent avoir l'occasion de prendre des notes, au fur et à mesure que nous en ferons lecture.

Le président: On trouvera le mémoire de la province à la page 843. Comme le mémoire a été un peu modifié, je crois que le premier ministre nous exposera les grandes lignes du nouveau mémoire.

M. Campbell: Monsieur le président, messieurs du comité, sauf erreur, on présentera environ sept mémoires ce matin, dans lesquels seront exposés les divers problèmes du transport, tels qu'ils touchent l'Île-du-Prince-Édouard. Tout d'abord, au nom du gouvernement et de la population de l'Île-du-Prince-Édouard, je vous souhaite la bienvenue dans notre province et dans notre capitale.

On m'a laissé entendre que votre voyage a été beaucoup moins épuisant que celui de vos prédécesseurs, il y a environ un an. Nous sommes heureux que vous soyez venus prendre connaissance de nos aménagements de transport, de nos problèmes en matière de

[*Text*]

and to consider the suggestions for improvements which will be advanced here today.

We believe that it is very important for Members of the House of Commons, representing as you do all parts of Canada, to visit and become much better acquainted with each and every part of the country. We hope that this visit to Prince Edward Island and the other Atlantic provinces will be beneficial to you and productive of good results for the people of Atlantic Canada.

Transportation is vital to the economic and social life of any area, but it is particularly vital when that area is an Island dependent upon exporting its production and importing most of its requirements. Because we are an Island we are more conscious and more concerned with transportation than might often be the case if conditions were otherwise. Further, the fact that we are located on the eastern extremity of this country far removed from our major markets and suppliers greatly increases the importance of transportation and its impact on our economy.

It is in this light, viewed from our position with all attendant circumstances that our transportation must be considered, but I would hope that as members of this very important Committee you would place yourselves in an Islander's position for this day and subsequently when you are preparing your report to the House of Commons.

When I speak of transportation I have in mind all the major modes of transportation—railway, highway, air and water. To these I emphatically add one more—Causeway.

We also are considering the major elements of the transportation system: facilities, railway tracks, roads, airports, harbours, and so on. Equipment: rail cars and locomotives, trucks, airplanes, ships and so on. Rates: it is of little value to an economy to have facilities and equipment if the rates for moving goods are such that they impose prohibitive or unreasonable penalties on an area. Service: unless the transport provides reasonably adequate service to the region, it is again failing in its responsibility.

I hope that in our discussions today we will give proper consideration to all modes of transportation and to all aspects of this important industry.

In general, we urge that greater emphasis be placed upon the co-ordination of planning and action on the part of all federal agencies, federal departments of government, and the Province of Prince Edward Island. The prolif-

[*Interpretation*]

transport et des suggestions qui seront faites aujourd'hui en vue d'améliorer la situation.

Nous croyons qu'il importe au plus haut point pour les députés fédéraux qui, comme vous, représentent toutes les régions du Canada, de visiter et de mieux connaître chacun des secteurs qui le constituent. Nous espérons que votre visite de l'Île-du-Prince-Édouard et des autres provinces de l'Atlantique vous sera avantageuse et donnera lieu à d'heureuses conséquences pour leurs habitants.

Les transports sont essentiels pour la vie économique et sociale de toute région, bien sûr, mais surtout lorsqu'il s'agit d'une île qui doit exporter ses produits et importer la plupart des denrées dont elle a besoin. Étant insulaires, nous sommes peut-être plus conscients de la question des transports et y sommes peut-être plus intéressés que si les conditions étaient autres. De plus, notre emplacement à l'extrême est du pays nous éloigne des principaux débouchés et fournisseurs, ce qui augmente fortement l'importance des transports et leurs incidences sur notre économie.

C'est dans cette optique, vu la situation et toutes les circonstances qui l'entourent, qu'il faut envisager les transports chez nous. J'espère qu'à titre de membres de ce comité très important, vous penserez comme des insulaires pour un jour et lorsque vous rédigerez votre rapport pour la Chambre des communes.

Lorsque je parle de transport, j'ai en tête tous les principaux modes de transport, c'est-à-dire chemins de fer, routes, air et eau. Et j'insisterai sur un autre mode, celui de la chaussée.

Nous étudions aussi les principaux éléments des réseaux de transports, soit les aménagements, voies ferrées, aéroports, routes, ports, ainsi que les équipements: wagons, locomotives, camions, avions, navires. Quant aux tarifs, que sert à l'économie d'avoir les aménagements et les équipements voulus si les tarifs sont tels qu'ils imposent des sanctions prohibitives ou déraisonnables à une région donnée? Quant aux services, à moins que les transports ne puissent raisonnablement fournir un service convenable à la région, ils ne remplissent pas vraiment leur rôle.

J'espère que lors de nos délibérations aujourd'hui, nous pourrons étudier convenablement tous les modes de transports et tous les aspects de cette industrie importante.

De façon générale, nous demandons qu'on insiste davantage sur la coordination des projets et des programmes souhaitables qui émanent des organismes administratifs, des ministères fédéraux et de la province. Le fait

[*Texte*]

eration of government activity over the years has far too often resulted in a haphazard and disjointed approach to the over-all problems of transportation.

The days of independent approaches by the CNR, Air Canada, regional carriers, the trucking industry, the Department of Transport, and many others must be brought to an end. It will only be through a concerted and co-ordinated effort that a rational, realistic and long-range approach to our total transportation needs may be made.

In particular, we stress the need for the CNR to make long-range plans in connection with its service throughout the province. The seemingly haphazard phasing out of facilities and services to points across the Island must be brought to a halt. Severe, economic and social hardships can only be the result of such an approach. We would like to see the CNR examine and study its present and future role in Prince Edward Island and produce long-range plans to provide adequate and financially acceptable service to our people.

In October 1967, the Minister of Transport wrote the Premiers of the Atlantic Provinces requesting their views on the Atlantic Provinces transportation study so as to assist the government with the formulation of future transportation policy for the region.

In mid-December, 1967, when the four premiers met Mr. Hellyer to submit our objections to the new railway non-carload freight rates, the Minister told us that he would be receptive to a proposal from the Atlantic provinces suggesting future transportation policy for the Atlantic area. The Premiers accepted this invitation, and representatives of the four governments have met for further discussion.

The four governments have appointed a task force to study and prepare for the governments a future transportation policy for the Atlantic provinces. This group is at work and will shortly be presenting the results of its studies. This is a good example of greatly expanding united effort in the provinces to jointly and co-operatively work on our many areas of common interest and concern.

The assignment undertaken by the task force is a vitally important one. The results of its work will, we hope, form the basis of the

[*Interprétation*]

qu'il y ait eu prolifération d'activités gouvernementales au fil des ans a trop souvent donné une approche incalculée et discontinue à l'égard du problème dans l'ensemble.

Il faut mettre fin à cette attitude indépendante qui se rencontre chez le National-Canadien, Air Canada, les transporteurs régionaux, l'industrie du camionnage, le ministère des Transports et bien d'autres. Ce n'est que par un effort concerté qu'on pourra adopter une optique à longue échéance à la fois rationnelle et réaliste envers les problèmes de transport.

En particulier, nous insistons pour que le National-Canadien formule des projets à long terme en matière du service qu'il dispense par toute la province. Il faut que cesse l'abolition des services et la désaffectation des installations par toute la province, surtout que la mûre réflexion y semble absente. Les suites ne peuvent qu'en être néfastes sur les plans économique et social. Nous aimerions que le National-Canadien mette en question son rôle actuel et futur dans l'Île-du-Prince-Édouard, afin d'élaborer des plans à long terme qui assureraient à notre population un service financièrement acceptable et adéquat.

En octobre 1967, le ministre des Transports, dans une lettre adressée aux premiers ministres des provinces de l'Atlantique, leur demandait d'exprimer leurs opinions sur l'étude des transports dans la région atlantique et ainsi aider le gouvernement à formuler une politique nationale en matière des transports.

A la mi-décembre 1967, lorsque les quatre premiers ministres se sont réunis avec M. Hellyer pour lui présenter leurs objections aux nouveaux tarifs ferroviaires pour expéditions en chargements incomplets, le Ministre leur a dit qu'il accueillerait toute proposition des provinces de l'Atlantique au sujet d'une politique future en matière des transports pour cette région. Les premiers ministres ayant accepté son invitation, les représentants des quatre gouvernements se sont réunis pour débattre la question en détail.

Les quatre gouvernements ont constitué un groupe d'études qu'ils ont chargé d'élaborer, à l'intention du gouvernement, une politique future en matière des transports pour les provinces de l'Atlantique. Ce groupe, qui est actuellement à l'œuvre, présentera bientôt le résultat de ses travaux. Voilà un excellent exemple de l'intensification de l'effort dans les provinces afin d'œuvrer, de concert avec le gouvernement fédéral, dans les divers domaines d'intérêt et de préoccupation communs.

La tâche du groupe d'études revêt une importance énorme. Aussi espérons-nous que les données de ses travaux formeront la base

[*Text*]

Atlantic government's proposals to the Minister of Transport and to the Government of Canada.

The Government of Prince Edward Island is pleased to see the attention that the CNR is now giving to our immediate problems at Cape Tormentine and Borden. We feel that improvements to the ferry terminals which are now under way will improve the present ferry service to our province. We are also pleased to see the increased carrying capacity represented by the *John Hamilton Gray* and the recently purchased summer ferry.

However, I must emphasize that terminal improvements and capacity increases will still not allow for trouble free and convenient passage to and from the mainland. Until such time as a permanent crossing is constructed we urge the CNR and the Department of Transport to look carefully at present requirements, judge carefully the projections for future requirements, and take the necessary steps to provide the required vessels and the docking facilities.

The transportation facilities operated by the CNR between Borden, Prince Edward Island, and Cape Tormentine, New Brunswick, are at present the economic lifeline of this province, but a ferry service, despite the number of ships or how efficiently they are operated, will never provide proper transportation between the province and the mainland, nor does it meet the commitments made to this province when it joined Confederation nearly 100 years ago.

The obligation to provide continuous communication which the Government of Canada undertook in 1873 can only be honoured by the construction of a permanent crossing. Not only will this connection be the fulfillment of a 96 year old obligation, it is also, and more importantly, an absolute necessity for the complete economic development of this part of Canada. The construction of this crossing is also a sound economic project when one makes a cost analysis of all the benefits that will accrue from it.

We pointed these facts out very clearly in the recent brief presented to the federal government and, Mr. Chairman, I will leave with you a copy of that brief and more copies can be made available to the members of this Committee although it is my understanding that copies were distributed, at the time they were presented to the Prime Minister, to each

[*Interpretation*]

des propositions formulées par les gouvernements des provinces de l'Atlantique au ministère des Transports et au gouvernement du Canada.

L'Île-du-Prince-Édouard se réjouit de l'attention que le National-Canadien accorde présentement aux problèmes immédiats de Cap-Tormentine et de Borden. Nous estimons que les travaux exécutés présentement aux terminus de chemins de fer amélioreront les services actuels de transbordement dans notre province. Nous nous réjouissons des nouvelles facilités de transport que représente le «John Hamilton Gray» et le transbordeur d'été que l'on vient d'acheter.

Toutefois, je dois insister sur le fait que ces travaux et nouvelles facilités ne nous permettront pas d'éliminer tous les inconvénients que pose actuellement la traversée du détroit. Jusqu'au moment où l'on aménagera une chaussée permanente, nous voudrions que le National-Canadien et le ministère des Transports examinent attentivement les besoins actuels et estiment précisément les exigences futures, afin de prendre les mesures voulues pour que l'on dispose des navires et des aménagements portuaires requis.

A l'heure actuelle, les installations de transport du National-Canadien, entre Borden, à l'Île-du-Prince-Édouard, et Cap-Tormentine, au Nouveau-Brunswick, se révèlent indispensables à l'économie de l'Île, mais un service de transbordement, quelque soit le nombre de bâtiments employés, même si leur exploitation est on ne peut plus efficace, jamais ne constituera un mode de transport convenable entre la province et la terre ferme, ni ne répondra aux engagements faits à la province lorsqu'elle s'est jointe à la Confédération, il y a tout près d'un siècle.

L'engagement pris par le gouvernement du Canada en 1873, soit de prévoir des moyens permanents de communications, ne sera acquitté que par l'aménagement d'une chaussée permanente. Non seulement remplira-t-on ainsi une promesse vieille de 96 ans, mais ce qui est plus important, on en admettra la nécessité pour le plein développement économique de cette partie du Canada. L'aménagement de la chaussée se révèle économique, si l'on fait l'analyse des coûts et de tous les avantages qui en découleraient.

Nous avons nettement signalé ces faits dans un mémoire présenté récemment au gouvernement fédéral. Monsieur le président, je vais vous laisser un exemplaire de ce mémoire; j'en tiens d'autres à votre disposition quoique, sauf erreur, tous les députés en aient obtenu au moment où nous l'avons remis au premier ministre; néanmoins, je veux m'assurer que

[*Texte*]

one of the members of Parliament and I hope that each one of the members of your Committee has therefore his own copy of that brief.

One of the most significant points made in that brief is that it will cost the federal government approximately $1 billion over the next 60 years to provide adequate ferry service, docking facilities and so on, as compared to the present estimated cost of $160 million for a permanent crossing, I do not intend to dwell on this subject at any greater length but we have attached a copy, as I mentioned Mr. Chairman, and additional copies can be made available to the Committee if they are required.

We trust that you will read and analyse the arguments contained in that brief.

Prince Edward Island suffers from a lack of transportation facilities and adequate transportation services. The Atlantic Provinces Transportation Study, Volume III, page 1 states:

> Shippers of many agricultural and fisheries products in Prince Edward Island cannot exploit the markets fully, because of the shortcomings of the transportation facilities.

We are concerned about the deterioration of facilities and services provided by the railway. Again, I do not propose to go into this in detail; this can be done much more graphically by the Board of Trade, the shippers, businessmen and representatives of the many companies that use the services, who will be giving you their own views.

But in general we are concerned about the shortage of sufficiently suitable railway equipment to move our agricultural and fisheries production to markets outside the province.

There is a shortage of locomotive power, services are being curtailed and we fear that railway lines are not being adequately maintained. The frequency and quality of service does not meet the needs of our shippers and business enterprises. We urge that positive moves be made by the railway to improve facilities, equipment and service which would demonstrate to all of us that the CNR is determined to provide now and in the future the rail services which would contribute to an expanding economy.

[*Interprétation*]

tous les membres de votre comité l'ont en main.

Un des arguments les plus significatifs de ce mémoire, c'est qu'il en coûtera au gouvernement fédéral environ un milliard de dollars au cours des soixante années à venir pour assurer un service convenable de transbordement et entretenir les aménagements voulus, contre un coût estimatif, du moins à l'heure actuelle, de 160 millions de dollars pour une chaussée permanente. Je n'ai pas l'intention de trop insister sur ce sujet, mais je le répète, monsieur le président, nous disposons d'exemplaires de notre mémoire, que je pourrai transmettre, s'il le faut, aux membres du comité.

Nous osons espérer que vous lirez ce document et analyserez les arguments y contenus.

L'Île-du-Prince-Édouard souffre de l'absence d'aménagements et de services de transport qui lui seraient appropriés. A la page 1 du volume III de l'étude des transports dans les provinces de l'Atlantique, on dit:

> Les expéditeurs de nombreux produits agricoles et produits de la pêche de l'Île-du-Prince-Édouard ne peuvent exploiter complètement les marchés à cause des inconvénients que pose le transport.

Nous sommes préoccupés par la détérioration des services assurés par les chemins de fer. Une fois de plus, je n'ai pas l'intention de vous parler de cela en détail; cela peut être fait de façon beaucoup plus adéquate par la Chambre de commerce, par les expéditeurs, par les hommes d'affaires et par les représentants des nombreuses sociétés qui ont recours à ces services, dont vous entendrez les divers points de vue.

Mais de façon générale, nous sommes préoccupés par le manque de matériel ferroviaire adéquat pour acheminer les produits de notre agriculture et de notre pêche vers les marchés situés à l'extérieur de la province.

Il y a insuffisance de puissance locomotrice, les services sont diminués, et nous sommes d'avis que les lignes de chemin de fer ne sont pas assez bien entretenues. La fréquence et la qualité du service ne répondent pas aux besoins de nos expéditeurs et de nos entreprises commerciales. Nous voulons donc que de réelles dispositions soient prises par les chemins de fer pour améliorer les installations, le matériel et le service, ce qui vous prouverait à tous que le National-Canadien est bien décidé à fournir, maintenant et à l'avenir, un service ferroviaire qui contribue à une économie en expansion.

[*Text*]

Equally essential to an expanding economy is the matter of freight rates. Unless the shippers and importers in this area can move goods at reasonable rates our primary industries, and indeed all economic development, will be severely restricted and retarded.

For this reason we are very much opposed to the non-carload freight rates structure imposed by the railway in the fall of 1967. Subsequent events have not eased our concern and we contend that this new non-carload tariff will cause the closure of some already established industries, seriously impede the development of primary and secondary industries, and significantly increase the cost of a vast quantity of goods imported into this region.

Once again I will not go into details or particulars; this will be vividly and more effectively done by the users of the service. Under this new non-carload rate structure, rates, practices and conditions of charges were radically changed. The implementation of this new tariff in September, 1967 virtually cancelled all former rail express rates as well as competitive L.C.L. freight rates. The provision of free pick up and delivery on railway cartage services for shipments moving at commodity or non-competitive rates was also cancelled.

In addition, a density rule of 10 pounds per cubic foot for assessing charges was instituted. There were other charges which we will not detail here.

Under the new National Transportation Act rates and rules no longer require the prior approval of the Canadian Transport Commission. Hence drastic and damaging charges in non-carload freight shipments were forced on the people and economy without any prior review, discussion or approval.

These changes are particularly detrimental to the Atlantic Provinces. Because of our relatively small and scattered population, there is less opportunity to ship in full carload to the market or to bring in goods in carload quantities. The statistics confirm this.

In 1966 the railways handled 364 pounds of L.C.L. Freight per person in the Atlantic Provinces, compared with the national figure of 192 pounds per capita. This means that the

[*Interpretation*]

Un facteur tout aussi important pour une économie en expansion est celui du tarif de transport des marchandises. A moins que les expéditeurs et les importateurs de cette région ne puissent transporter leurs denrées à un prix raisonnable, nos industries primaires et, à vrai dire, toute expansion économique, seront sérieusement restreintes et freinées.

C'est pourquoi nous nous opposons fortement à la structure du tarif de chargement incomplet imposée par les chemins de fer à l'automne de 1967. Les événements qui ont suivi n'ont pas diminué notre préoccupation, et nous sommes d'avis que ce nouveau tarif de chargement incomplet entraînera la fermeture de certaines industries déjà établies, nuira gravement au développement des industries primaires et secondaires, et augmentera de façon marquée le coût de bon nombre de marchandises importées dans cette région.

Une fois de plus, je ne veux pas entrer dans les détails; les usagers du service sauront le faire de façon plus efficace et plus vivante. En vertu de la nouvelle structure du tarif de chargement incomplet, on a modifié de façon radicale les taux, les méthodes et les conditions de paiement. L'entrée en vigueur de ce nouveau tarif au mois de septembre 1967 a presque fait disparaître tous les tarifs de messageries qui existaient autrefois, ainsi que les tarifs concurrentiels de chargement incomplet. On a aussi aboli le service de ramassage et de livraison gratuits par le service des messageries pour les expéditions à tarif-marchandises où à tarif non concurrentiel.

En outre, on a institué une règle de densité de 10 livres par pied cube pour l'évaluation du coût. On a ajouté d'autres frais, dont nous ne donnerons pas le détail ici.

En vertu de la nouvelle Loi nationale sur les transports, le tarif et le règlement n'ont plus à recevoir l'approbation préalable de la Commission canadienne des transports. En conséquence, le tarif très élevé et nuisible des expéditions de marchandises par chargement incomplet a été imposé à la population et à l'économie sans examen, discussion ou approbation préalables.

Ces modifications sont particulièrement nuisibles aux provinces de l'Atlantique. A cause du chiffre peu élevé de notre population et de l'éparpillement de cette dernière, nous avons moins l'occasion d'expédier des marchandises vers les marchés ou d'en faire venir par chargement complet. Les données statistiques le confirment.

En 1966, les chemins de fer ont transporté 364 livres par personne de marchandises par chargement incomplet dans les provinces de l'Atlantique, comparativement à un chiffre

[*Texte*]

Atlantic Provinces in 1966 used 89.5 per cent more L.C.L. freight service than the rest of Canada.

On December 13, 1967 the Premiers of the Atlantic Provinces made a submission to the Minister of Transport on this matter. It has been provided to the Committee of the Maritimes Transportation Commission but I do want to impress on the Committee the seriousness of these changes and summarize the request we made to the Minister of Transport.

First, that the reduction in intra-Maritime rates referred to in the announcement of November 9, 1967 be implemented at once.

Second, that the so-called density rule be reduced from one cubic foot equalling ten pounds to one cubic foot equalling five pounds.

Third, that immediate steps be taken to extend the Maritime Freight Rates Act subsidies to other forms of transport.

We do not propose to deal at length with the matter of highway transport even though we are much concerned with it. The Maritime Motor Transport Association will be making a presentation to the Committee and we strongly endorse and support the recommendation of this Association. We are convinced of the necessity for improving the trucking services in this province and region. To this end we must assist in removing the obstacles presently faced by the trucking industry. We make five suggestions that we feel should be acted upon to improve this mode of transport. Two of these have been mentioned in another context.

1. The extension of the subsidy provisions of the Maritime Freight Rates Act to motor transport.

2. The early construction of the Northumberland Strait Crossing.

3. The establishment of uniform licensing, rules, regulations and tax for transport engaged in inter-provincial transport.

4. The provision of truck terminals in the larger centres of this region.

[*Interprétation*]

national de 192 livres par tête. Ce qui signifie que les provinces de l'Atlantique ont utilisé, en 1966, 89½ p. 100 de service de transport des marchandises par chargement incomplet de plus que le reste du Canada.

Le 13 décembre 1967, les premiers ministres des provinces de l'Atlantique ont présenté un mémoire au ministre des Transports à cet égard. Le comité de la Commission des transports des Maritimes en a reçu un exemplaire, mais je tiens à bien faire comprendre au Comité la gravité de ces modifications, et à lui donner un résumé de la demande que nous avons formulée auprès du ministre des Transports.

Tout d'abord que la diminution des tarifs du transport à l'intérieur des Maritimes annoncée le 9 novembre 1967 entre en vigueur immédiatement.

Deuxièmement, que la règle de la densité, comme on l'appelle, soit modifiée de sorte qu'un pied cube soit l'équivalent de cinq livres au lieu de dix.

Troisièmement, que l'on prenne immédiatement des dispositions en vue d'étendre les subventions octroyées en vertu de la Loi sur les taux de transport des marchandises dans les provinces Maritimes aux autres modes de transport.

Nous n'avons pas l'intention de traiter longuement de la question du transport routier, quoique cette question nous préoccupe beaucoup aussi. La *Maritime Motor Transport Association* va présenter un mémoire au Comité, et nous appuyons fortement les recommandations de cette association. Nous sommes convaincus de la nécessité qu'il y a d'améliorer les services de camionnage dans cette province et dans cette région. A cette fin, il nous faut aider à faire disparaître les obstacles qui se posent actuellement à l'industrie du camionnage. Nous formulons cinq propositions qui, à notre avis, devraient faire l'objet de dispositions en vue d'améliorer ce mode de transport. Deux de ces recommandations ont déjà été mentionnées dans un autre contexte.

1. Extension des subventions prévues dans la Loi sur les taux de transport des marchandises dans les provinces Maritimes aux transports routiers.

2. Construction dès que possible de l'ouvrage traversier du détroit de Northumberland.

3. Établissement de règles, licences, règlements et taxes uniformes pour les transporteurs interprovinciaux.

4. Aménagement de terminus routiers dans les grands centres de cette région.

[*Text*]

5. The extension of all-weather highways to provide a linkage with all rural arterial and main trunk highways in this province.

We wish especially to point out the need for advanced planning to ensure that adequate ferry facilities are available for the trucking industry in the future years. The recently proposed system of reserving space for five trucks per crossing during the summer season, while welcome, will not long be adequate. We can see the need within the next few years for a ferry primarily for trucks with roll on, roll off capacities.

It should be borne in mind that inadequate ferry service has had an adverse effect on the development of the trucking industry. Truckers operating costs are at a higher than normal level with a result that a competitive transportation environment does not exist to the same extent that it does in other parts of the Maritimes and the rest of Canada. Thus, island transportation users are not only denied the maximum efficiency and service of which trucks are capable, but are further penalized to higher railway rates due to the inability of trucks to be competitive in the movement of certain commodities.

The Maritime Freight Rates Act arose from certain obligations and commitments made to the Maritime Provinces at Confederation which were intended to afford Maritime shippers access to larger markets in other parts of the country. This commitment was honoured through various forms of assistance until the enactment of the Maritime Freight Rates Act in 1927.

Among other things this Act was intended:

> to afford to Maritime merchants, traders and manufacturers the larger markets of the whole Canadian people, instead of the restricted markets of the Maritimes themselves.

The objective of the Act was twofold, to maintain a statutory rate advantage in the Maritimes and to fulfil an obligation of Confederation by assisting Maritime interests to participate in wider markets than would otherwise be available. I do not propose to go into the historical or legal background or discuss in detail the changes in transportation or the economic forces that have prevailed since

[*Interpretation*]

5. Raccordement du réseau de routes tout temps à toutes les routes rurales de jonction et à toutes les routes principales de la province.

Nous désirons tout particulièrement signaler le besoin de planification pour assurer qu'un bon service de bac soit mis à la disposition de l'industrie du camionnage dans les années à venir. Le système que l'on a proposé récemment, et qui consisterait à réserver cinq places aux camions sur chaque traversée pendant la saison d'été, quoiqu'il soit bienvenu, ne sera pas longtemps suffisant. Nous pouvons très bien concevoir la nécessité d'avoir, d'ici quelques années, un bac prévu essentiellement pour les camions, avec possibilité de chargement et de déchargement rapides.

Il ne faut pas oublier qu'un service de bac inadéquat a eu des effets nuisibles pour le développement de l'industrie de camionnage. Les camionneurs ont des frais d'exploitation d'un niveau plus élevé que la normale, ce qui fait que la concurrence n'existe pas dans les mêmes proportions que dans les autres régions des Maritimes et dans le reste du Canada. Ainsi, ceux qui utilisent les services de transports de l'île non seulement ne bénéficient pas du service vraiment efficace que peuvent fournir les camions, mais de plus ont à payer le tarif ferroviaire, qui est plus élevé, du fait que les services de camionnage ne peuvent soutenir la concurrence pour le transport de certaines denrées.

La Loi sur les taux de transport des marchandises dans les provinces Maritimes découlent de certaines obligations et de certains engagements pris à l'égard des provinces Maritimes au moment de la Confédération, et qui avaient pour objet de faciliter aux expéditeurs des Maritimes l'accès à des marchés plus vastes et situés dans d'autres régions du pays. Cet engagement a été honoré sous différentes formes d'aide jusqu'à la promulgation, en 1927, de la Loi sur le transport des marchandises dans les provinces Maritimes.

Entre autres choses, cette loi avait pour objet:

> de permettre aux commerçants, négociants et fabricants des Maritimes d'accéder aux marchés plus vastes que constitue l'ensemble de la population canadienne plutôt qu'aux marchés restreints des Maritimes elles-mêmes.

La Loi avait un double objectif: maintenir l'avantage d'un tarif statutaire dans les provinces Maritimes, et remplir un engagement pris au moment de la Confédération en aidant les entreprises des Maritimes à avoir des

[*Texte*]

1927 which have caused the Maritime Freight Rates Act to fail in its objective.

The effectiveness of the Act has progressively deteriorated. The development of competitive transport facilities in other parts of Canada and the large and frequent horizontal rate increases, contrary to the purpose of the Act, have largely destroyed the rate relationship which the Maritime Freight Rates Act was designed to maintain.

Clearly, a major revision and updating of the Act is now necessary. This will require more thorough study than we have so far been able to give it.

However, there are certain very definite conclusions that we have already firmly adopted. First, it is imperative that the intent and the objective of the Maritime Freight Rates Act be retained and the Act amended so that new policies and machinery can be implemented to enable a return to the Maritime advantages which prevailed after the coming into force of the Act in 1927. Second, we urge that two changes be made in the new improved Act:

1. that the subsidy provision of the Act be extended to other public modes of transport;

2. that the subsidy benefits be payable to the shipper.

There are other changes that merit the most serious consideration. The present Act does not provide for any subsidy on shipments to the United States. We submit that such traffic should be included for subsidy payments. At the present time most of our fisheries production and a considerable quantity of agricultural products are dependent on markets in the United States. The extension of the subsidy provisions of the Maritime Freight Rates Act to include traffic to the United States would greatly improve our prospects of expanding our sales in this large market.

I would like to deal briefly with the whole question of air transport as it affects Prince

[*Interprétation*]

marchés plus vastes qu'elles ne pourraient en avoir autrement. Je n'ai pas l'intention de faire l'historique des événements ni l'historique juridique, ni d'expliquer en détail les modifications qui sont intervenues dans les transports ou les forces économiques qui ont agi depuis 1927, et qui ont empêché la Loi sur les taux de transport des marchandises dans les provinces Maritimes d'atteindre ses objectifs.

L'efficacité de la Loi s'est peu à peu amenuisée. La naissance de moyens de transport concurrentiels dans d'autres parties du Canada et les fortes augmentations horizontales des tarifs qui sont fréquemment intervenues, contrairement au but fixé par la loi, ont détruit les rapports de tarifs que la Loi sur les taux de transport des marchandises dans les provinces Maritimes était censée protéger.

Il est clair qu'il est nécessaire de procéder à une revision et à une mise à jour générales de la Loi. Cela nécessitera une étude plus approfondie que nous n'en avons fait jusqu'à présent.

Cependant, nous avons déjà adopté fermement un certain nombre de conclusions bien précises. Tout d'abord, il est essentiel de conserver la portée et l'objectif de la Loi sur les taux de transport des marchandises dans les provinces Maritimes, et de modifier celle-ci afin de permettre l'application d'une nouvelle politique et d'un nouveau système qui permettrait un retour aux avantages dont les Maritimes jouissaient après l'entrée en vigueur de la Loi en 1927. Ensuite, nous demandons que l'on apporte deux modifications à la nouvelle Loi améliorée:

1. Que la clause de la Loi qui concerne les subventions soit étendue à d'autres moyens de transports publics.

2. Que les subventions soient versées directement aux expéditeurs.

Il y a d'autres modifications qui méritent d'être envisagées très sérieusement. La Loi actuelle ne prévoit pas de subventions pour les expéditions faites vers les États-Unis. Nous estimons que ces expéditions devraient aussi faire l'objet de subventions. A l'heure actuelle, la plus grande partie de notre production de la pêche et une partie considérable de notre production agricole doivent compter sur les marchés américains. L'extension des dispositions sur les subventions de la Loi sur les taux de transport des marchandises dans les provinces Maritimes aux exportations à destination des États-Unis augmenterait beaucoup nos chances d'étendre nos ventes sur cet important marché.

Je voudrais vous parler brièvement de la question du transport aérien en autant que

[*Text*]

Edward Island. Perhaps many of the Committee feel that throughout this brief and in the context of the modern world too much attention has been given to the problems of land transport.

Upon close examination of our present air transport facilities, it will be found that Prince Edward Island has not yet been discovered by the jet set, to say nothing of the North Star, the DC-7 and the Viscount set. We have yet to emerge from the DC-3 era.

The size and capacity of the aircraft serving Prince Edward Island is an important consideration. However, if we were assured of efficient and convenient service throughout the Atlantic provinces with the smaller aircraft now in use, we would be somewhat less concerned. At the present time it is more difficult to fly to most Atlantic points from Prince Edward Island return than it is to fly to Europe. Today it is impossible to fly to Halifax, Fredericton, Saint John and Moncton, do whatever business is necessary and return the same day.

In addition, the Halifax to Charlottetown route does not function on Sunday. Apart from one direct flight a day, if we wish to travel to Montreal and points west we must be willing to waste endless hours to make the necessary connections.

Our experience, too, has been that Air Canada agents, regional carrier agents and travel agencies are quite often misinformed as to the schedule of airlines other than their own. A much greater effort must be made toward co-operative scheduling between Air Canada and the regional carriers. We believe that if the federal government is to implement a regional air transport policy in the Atlantic region, it must be ready to commit more funds to the development of an adequate service.

Concurrent with the needed improvement of schedules and other related matters is the proper development of the Charlottetown airport. In December of 1967 we were informed that long-range plans of the Department of Transport for the Charlottetown airport included provision of a new air terminal, maintenance garage, fire hall and power plant complex over the period 1970 to 1973.

[*Interpretation*]

cela concerne l'Île-du-Prince-Édouard. Peut-être bon nombre des membres du Comité sont-ils d'avis que tout au long de ce mémoire, et dans le contexte du monde moderne, on a attaché trop d'importance aux problèmes du transport terrestre.

Après une étude attentive de nos services actuels de transport aérien, on constatera que l'Île-du-Prince-Édouard n'a pas encore été découverte par l'avion à réaction, sans parler du «North Star», du «DC-7» et du «Viscount». Nous n'avons pas encore réussi à sortir de l'ère du «DC-3».

Les dimensions et le nombre de places de l'avion qui dessert l'Île-du-Prince-Édouard est une question importante. Toutefois, si nous étions du moins assurés d'un service efficace et commode dans toutes les provinces de l'Atlantique avec les petits avions que nous utilisons actuellement, nous ne serions pas tout à fait aussi inquiets. A l'heure actuelle il est plus difficile de faire l'aller-retour en avion entre l'Île-du-Prince-Édouard et la plupart des endroits dans les provinces de l'Atlantique que d'aller en Europe. Il est impossible aujourd'hui d'aller à Halifax, à Fredericton, à Saint-Jean ou à Moncton, d'y faire ce que l'on a à y faire, et de revenir le même jour.

De plus, le vol entre Halifax et Charlottetown n'existe pas le dimanche. A l'exception d'un vol direct par jour, si nous voulons aller à Montréal ou n'importe où à l'ouest, nous devons être prêts à gaspiller des heures et des heures à prendre les correspondances nécessaires.

Nous avons aussi remarqué que les agents d'Air Canada, les agents des compagnies de transport régionales ou les agences de voyage sont bien souvent mal renseignés quant aux horaires des lignes aériennes autres que les leurs. Il faut donc déployer beaucoup plus d'efforts pour parvenir à une collaboration, en matière d'horaires, entre Air Canada et les compagnies de transport régionales. Nous estimons que si le gouvernement fédéral veut appliquer une politique de transport aérien dans les provinces de l'Atlantique, il doit être prêt à fournir plus de fonds pour la mise au point d'un service adéquat.

De concert avec la nécessité d'améliorer les horaires et autres aspects connexes, il y a l'aménagement d'une façon adéquate de l'aéroport de Charlottetown. En décembre 1967, on nous a dit que les plans à long terme du ministère des Transports pour l'aéroport de Charlottetown prévoyaient une nouvelle aérogare, un hangar pour les réparations, une caserne de pompiers et une centrale d'énergie pour la période de 1970 à 1973.

Texte]

During the same period, runway improvements and the installation of an instrument nding system were scheduled. We now nderstand that the bulk of this work has een rescheduled for the period 1975 to 1980. 'e do not believe that this work should be ostponed forever or for even one more year. 'e strongly recommend that construction and stallation of the new facilities be comenced in the spring of this year.

One example of the lack of interest of the epartment of Transport in providing adeuate passage service at the Charlottetown rport can be seen in the fact that Commisonnaires are not employed as they are in very other Department of Transport airport assist in the operations of the airport. n addition, at the present time there is real- no effective air cargo service to look after he needs of island shippers.

We should also mention the excellent prosects for expanded trade between Prince dward Island and the Province of Newoundland. These two provinces will shortly e establishing a joint working group to etermine types of products which can most rofitably be trade. Effective implementation f trade will require a drastic improvement n the transport facilities between the two rovinces. A regular shipping service by odern vessel will be needed.

The prospects for increasing our trade with he Seven Islands and Northern Labrador reas are also bright and improved water ansport can be an effective means of mproving our trade with the Caribbean ountries. A great deal more study and planing must be brought to bear on these atters.

I understand that a series of rate changes n both the Borden and Wood Island ferries s being considered. For the Borden-Cape Tornentine service the proposal is to raise the er trip automobile rate by 50 per cent from 2 to $3. In balancing the possible additional evenue which the increase may produce we hould consider the additional hardship mposed on Islanders.

Although it would be possible by buying a ook of 10 tickets to cross at the present rate, t is not realistic to expect the great bulk of he residents of this province to be interested n paying for their passage on this basis. In ffect, we are being asked to agree to a 50 per ent increase in fares in order to help reduce he deficit involved in operating the economic ifeline of this province. Let me add that on he basis of recent experience the raise in are rates would reduce present operating

[*Interprétation*]

Pour la même période, on avait aussi prévu l'amélioration des pistes et l'installation d'un système de commande de l'atterrissage. Maintenant, la plupart de ces travaux ont été remis à la période de 1975 à 1980. Nous estimons que ces travaux ne doivent pas être remis indéfiniment, ni même à un an au plus tard. Nous recommandons vivement que la construction des nouvelles installations soit inaugurée au printemps de cette année.

On peut voir un exemple du manque d'intérêt que manifeste le ministère des Transports lorsqu'il s'agit d'assurer un service de passagers adéquat à l'aéroport de Charlottetown dans le fait que l'on n'emploie pas, comme dans tout autre aéroport du ministère des Transports, de commissionnaires chargés d'aider à la bonne marche des aéroports. De plus, il n'y a pas vraiment, à l'heure actuelle, de service aérien de transport des marchandises efficace pour répondre aux besoins des expéditeurs de l'Île.

Il faudrait aussi parler des excellentes perspectives d'expansion du commerce entre l'Île-du-Prince-Édouard et Terre-Neuve. Ces deux provinces établiront d'ici peu un groupe de travail conjoint qui décidera du genre de produits qui pourraient se prêter le mieux à des échanges. Pour une application efficace du commerce, il faudra une amélioration radicale des services de transport entre ces deux provinces. On aura besoin d'un service d'expédition régulier par navires modernes.

Nos perspectives de commerce accru avec Sept-Îles et avec le nord du Labrador sont elles aussi assez bonnes, et de meilleurs transports maritimes nous permettraient d'améliorer notre commerce avec les pays des Caraïbes. Il faut donc approfondir ces questions et en faire l'objet de plans bien pensés.

Si je comprends bien, on envisage une série de modifications des tarifs pour les transbordeurs de Borden et de l'île Wood. Pour le service de Borden-Cap-Tourmentine, l'augmentation serait de 50 p. 100, soit de $2 à $3, par trajet automobile. Eu égard aux revenus possibles qu'entraînera cette hausse, il faut tenir compte des difficultés qui en résulteront pour les gens de l'Île.

Même s'il est possible de verser le même prix qu'avant en achetant un carnet de 10 billets, on ne peut vraiment s'attendre que la plupart des habitants de la province se prévalent d'un tel avantage. En réalité, on leur demande d'accepter une augmentation de 50 p. 100 du tarif pour diminuer le déficit encouru par l'exploitation d'un service essentiel à l'économie de la province. Si l'on en juge par l'expérience récente à ce sujet, cette hausse de tarif ne diminuera le déficit d'ex-

[*Text*]

deficits of the CNR by no more than 5 per cent.

It is further proposed that the fare on the Wood Island-Caribou run be raised to $4 per automobile. This would produce a differential in the fare structure of the two ferry services and would seriously upset the pattern of tourist traffic. At present the tourists can enter Prince Edward Island at Borden and by the use of an interchangeable ticket leave by the Wood Island ferry.

Under this proposal you would have to pay extra to use the Wood Island service. This proposed change is alarming to our tourist industry and runs counter to the provisions of our development plan which is designed to encourage tourists to visit the eastern and western extremities of the province.

We also protest the proposal to withdraw the reduced rate privilege for trucks between 10 a.m. and 5 p.m. This type of proposal shows a lack of appreciation of how our economy works. For example, it is plainly not realistic to expect a shipper of livestock to delay his shipment beyond the normal hours in which a receiving plant on the mainland, for example, is in operation.

Mr. Chairman, please accept my thanks for allowing us to present our views, our opinions and suggestions to your Committee concerning the over-all transportation picture on Prince Edward Island. I sincerely hope that your Committee will give earnest and sincere consideration to these comments. And if there should be some questions, Mr. Chairman, that you would have directed to me following this presentation or later in the morning, I hold myself available to deal with them as best I can.

The Chairman: Mr. Prime Minister, my colleagues and I are proud to have you with us at this hearing this morning. We want to thank you very much for your well prepared brief. We hope you will stay part of the day with us. You said you would allow members to ask you questions. We thought of that too and I am going to give the floor, first, to Mr. Nesbitt.

Mr. Mahoney: On a point of order, I would like to inquire of you whether or not Eastern Provincial Airways have indicated any intention of appearing before this Committee. They were scheduled for St. John's. They did not appear. Have you had any further word from them?

The Chairman: I was informed, Mr. Mahoney, they would not appear, but if they

[*Interpretation*]

ploitation du National-Canadien que d'à peine 5 p. 100.

De plus, on a l'intention d'augmenter de $4 par trajet automobile le prix du passage Île Wood-Caribou. Il en résulterait un important écart de prix entre les deux services de transbordement, ce qui nuirait sensiblement à l'industrie touristique. A l'heure actuelle, les billets sont interchangeables, c'est-à-dire valides pour l'un ou l'autre des deux transbordeurs.

Désormais, il faudrait verser un montant additionnel à l'île Wood. Voilà ce qui préoccupe l'industrie touristique de l'Île, car une telle mesure irait à l'encontre des dispositions de son programme de développement, lequel est conçu en vue d'encourager les touristes à visiter tant l'est que l'ouest de la province.

Nous contestons aussi la proposition visant à abolir le tarif réduit pour les camions entre 10 et 17 heures. Il est clair qu'on ne se rend pas compte des véritables besoins de notre économie. Ainsi, il est irréaliste de s'attendre à ce qu'un expéditeur de bestiaux puisse retarder son chargement au delà des heures d'affaires normales de l'établissement où il livre sa marchandise.

Monsieur le président, je vous remercie de nous avoir permis d'exposer notre point de vue, nos opinions et nos propositions à votre comté quant à l'ensemble du secteur des transports à l'Île-du-Prince-Édouard. Nous espérons sincèrement que le comité donnera toute son attention à nos remarques et observations. Si les membres ont des questions à poser, monsieur le président, au terme de ma déclaration ou bien plus tard ce matin, je reste à leur disposition.

Le président: Monsieur le premier ministre, mes collègues et moi-même sommes très honorés de votre présence ici ce matin. Permettez-nous de vous remercier sincèrement pour ce mémoire si bien présenté. J'espère que vous pourrez passer une partie de la journée avec nous. Vous avez dit que vous étiez disposé à répondre à nos questions. Nous y avions déjà pensé. Alors, je laisse la parole à M. Nesbitt, qui entamera la discussion.

M. Mahoney: En me prévalant du règlement, je voudrais vous demander si la société *Eastern Provincial Airways* a manifesté l'intention de comparaître devant notre comité. Ses gens devaient témoigner à Saint-Jean (T.-N.), mais ils ne se sont pas présentés. Est-ce que vous avez eu de leurs nouvelles depuis?

Le président: Monsieur Mahoney, on m'a dit qu'ils ne viendraient pas. Toutefois, s'ils

[*Texte*]

are here today and would like to appear we will try to accommodate them.

Mr. McGrath: Mr. Chairman, I cannot see how we can realistically examine some of the serious transportation problems of the Island unless we can examine the principal regional carrier who maintains the only airlift with the mainland. I think they should be here. They should be called.

The Chairman: Is it agreed that if they are here today we will call on them?

Some hon. Members: Agreed.

Mr. Nesbitt: Mr. Chairman, if they are not here today I think we should request that they come.

The Chairman: Are Eastern Provincial Airways here this morning? We will call on them this afternoon. If they are here you can rest assured that we will take time to hear them.

Mr. Mahoney: We may, Mr. Chairman, have to consider calling them to Ottawa, because I am completely in agreement with Mr. McGrath. I do not know how on earth we can do a job without having an opportunity to examine as important a carrier as EPA.

Mr. Nesbitt: Mr. Chairman, would it be possible perhaps for the Secretary of the Committee to communicate with Eastern Provincial Airways this morning to see if they could have someone here this afternoon. They have presented us with a brief and I imagine they could probably get someone here this afternoon to answer some of the questions.

The Chairman: For your information, Mr. Nesbitt, I think there was one representative at St. John's and we called on him and he would not appear.

Mr. Nesbitt: Then I think we ought to request them to appear.

The Chairman: I may be wrong but this is the information I have. We will try again, Mr. Nesbitt.

Mr. Nesbitt: I have just one or two very brief questions relating to the air service which I would like to address to the Premier.

In your opinion, Mr. Premier would it be helpful if Air Canada were to return and provide service to the Island in view of your observation that it is quite apparent the present services are not adequate? Do you think this would be helpful?

[*Interprétation*]

sont ici aujourd'hui, nous essaierons de trouver le temps d'entendre leur témoignage.

M. McGrath: Monsieur le président, je ne vois pas du tout comment nous pouvons examiner de façon réaliste certains des problèmes graves de transport qui affligent l'Île, à moins que nous puissions interroger le principal transporteur régional par air dans l'Île. Je crois qu'on devrait convoquer cette société.

Le président: Êtes-vous d'accord pour que ces gens comparaissent s'ils sont ici aujourd'hui?

Des voix: D'accord.

M. Nesbitt: Monsieur le président, nous devrions peut-être les prier de venir ici, s'ils n'y sont pas aujourd'hui.

Le président: Est-ce que les représentants de la *Eastern Provincial Airways* seraient ici ce matin par hasard? Je vais les redemander cet après-midi; s'ils y sont, nous les entendrons, soyez-en sûrs.

M. Mahoney: Monsieur le président, nous devrions peut-être les convoquer à Ottawa, car, tout comme monsieur McGrath, j'estime que nous ne pourrons pas bien acquitter notre tâche, si nous omettons d'interroger un transporteur aussi important que celui-ci.

M. Nesbitt: Monsieur le président, le secrétaire du comité ne pourrait-il pas tenter de communiquer avec cette société, ce matin, pour qu'elle nous envoie un de ses représentants cet après-midi? Elle nous a présenté un mémoire, tout de même; j'imagine alors qu'elle pourrait déléguer un représentant cet après-midi pour répondre à nos questions.

Le président: Pour votre gouverne, monsieur Nesbitt, je crois qu'il y avait un représentant de cette société à Saint-Jean, mais que ce monsieur a refusé de comparaître lorsque nous lui avons demandé.

M. Nesbitt: Nous devrions alors faire connaître nos désirs à la société, je pense.

Le président: Sauf erreur, voilà tous les renseignements que j'ai. Nous reviendrons à la charge, monsieur Nesbitt.

M. Nesbitt: J'aurais une ou deux questions, très brèves, à poser au premier ministre au sujet du service aérien.

Selon vous, monsieur le premier ministre, est-ce qu'il serait utile qu'Air Canada desserve l'Île de nouveau, du moment qu'il vous semble fort évident que les services actuels sont insuffisants? Croyez-vous que cela vous aiderait vraiment?

[*Text*]

Mr. Campbell: I certainly believe for a number of reasons that very serious consideration should be given to the suggestion that the facilities and services of Air Canada be available to the travelling residents of the Island, to the potential tourist traffic to and from the Island, and to the shipping interests of the Island.

If I might make one point, Mr. Chairman, appreciating the point that was raised a moment ago by two members of your Committee, I think it is imperative that the regional air carrier submit itself for questioning by your Committee. And I do note the presence of two Members of Parliament who represent this province on your Committee and who are personally acquainted with the difficulties in travelling to and from the central parts of Canada. I think it is likely a common experience that when a regional carrier is inaugurating schedules of service that their own interests are first served.

There is one mitigating circumstance, of course, and that is that it is perhaps difficult to mesh the schedules of two different airlines together to the most convenient extent.

But we find that every time air schedules change that we have lost a connection, that a further lengthy delay is involved in making connections—most notably at the Moncton airport where the regional carrier connects with the national carrier. But in recent months we have been able to see the results of the direct flights which Eastern Provincial Airlines now operate into Montreal from Charlottetown. All other connections from our regional carrier to the central parts of Canada, connecting with the three or four daily flights of Air Canada, have disappeared.

I am not suggesting that this was deliberately arranged but it is no longer convenient for us to get to central Canada, into Toronto, according to the present air schedule by taking Eastern Provincial Airlines' flight from Charlottetown and Summerside to Moncton.

Therefore we have essentially one flight per day now to Montreal and that is via EPA. The service is given by a Dart Herald. It is certainly a more comfortable aircraft than the DC-3 but it is a far cry from what I would consider in this day and age a satisfactory and adequate facility service. The connections from Montreal either to Ottawa or via Toronto to western points are not very satisfactory at all.

I should think that our own Members of Parliament who are required to make trips more frequently than I to and from the capi-

[*Interpretation*]

M. Campbell: Pour un certain nombre d raisons, il me semble que l'on devrait envisa ger très sérieusement de donner suite à l proposition visant à mettre les aménagemen et les services d'Air Canada à la dispositio des habitants de l'Île des touristes qui la fr quentent et des transporteurs maritimes qui sont établis.

Si je puis maintenant revenir à la questio qui a été soulevée tantôt par deux membre du comité, je dirais qu'il importe que l transporteur régional en question se présent devant vous pour répondre à vos question Je constate que votre comité compte deu représentants de notre province; ils sont bie au courant, eux, des difficultés que posent le déplacemens entre notre province et l Canada central. Il est assez courant, je pense que le transporteur régional, lorsqu'il établi ses horaires, songe d'abord à ses propre intérêts.

Il y a évidemment des circonstances atté nuantes, notamment qu'il peut être difficile d coordonner au mieux les horaires de deu lignes aériennes.

Néanmoins, nous constatons qu'à chaqu modification de l'horaire, nous avons un correspondance en moins, que les période d'attente entre deux vols s'allongent, princi palement à Moncton, où le transporteu régional fait la correspondance avec la ligne nationale. Depuis quelques mois, nous avon pu voir le résultat des vols directs que l société *Eastern Provincial Airlines* offr maintenant de Charlottetown à Montréal. I est maintenant impossible de faire la corres pondance, à partir du transporteur régional avec les trois ou quatre vols quotidiens d'Ai Canada à destination du Canada central.

Je ne voudrais pas donner à entendre que cela s'est fait de propos délibéré, mais il n'es guère commode pour nous maintenant de nous rendre à Toronto, par exemple, en prenant l'avion de la *Eastern Provincial Airlines* qui part de Charlottetown à destination de Summerside et de Moncton.

Par conséquent, il ne nous reste qu'un seul vol par jour jusqu'à Montréal, celui de l'*Eastern Provincial Airlines*. L'avion est du type «Dart Herald»; il est certes plus confortable que le DC-3, mais c'est loin d'être ce que je considérerais un appareil satisfaisant et approprié à notre époque. Les correspondances vers Montréal, Ottawa ou, par Toronto, vers l'Ouest sont loin d'être satisfaisantes.

J'ai l'impression que nos propres députés, qui doivent se rendre plus souvent que moi, par exemple, à la capitale du pays, auraient

[*Texte*]

al of the nation would have some personal xperiences to relate to their fellow members f the Committee. It was not too long ago that he entire Cabinet of Prince Edward Island pent a good part of the night on the benches n the airport at Moncton because of the four r five hour wait between the Air Canada light arriving from Montreal to the New Brunswick hub city and the first early morning crossing of the regional carrier.

I am addressing myself at the moment to his problem of passenger traffic. I did mention in the brief the difficulty of getting around the Maritimes. This is a very real difficulty. We talk about greater co-operation here in the Maritime Provinces, many would urge us to unite economically and politically, but this is an area of Canada where we cannot even travel conveniently between the Maritime province centres by air.

I certainly think that the prospective service, the potential service that might be offered industries in Prince Edward Island by way of air cargo is one that presents Prince Edward Island with an opportunity of jumping 20 or 30 years ahead in the development of the economy here, but as long as we rely upon the present equipment, the present schedules and the present services, we are a long way from delivering on a regular basis our agricultural and fisheries products to potential markets.

I can refer to the northern markets, I can refer to the southern markets as well as the eastern markets, and there is just not at the present time available to us, nor is there any prospect over the next year or so, jet cargo or other air equipment which would serve this potential traffic. These are two areas which immediately come to mind, sir—the potential of air cargo traffic and the potential of better passenger transportation.

The Chairman: Mr. Nesbitt, would you allow Mr. Rose a supplementary question.

Mr. Nesbitt: Yes, if it is a brief one.

Mr. Rose: Thank you, Mr. Chairman. Mr. Premier, I was interested in following up with a supplementary, because the Committee got the general impression that in spite of the fact that five or six air cargo flights come into Halifax a day, since these flights often return completely empty that Nova Scotia was not making full use of the air cargo flights that they had. I was interested in your remark about air cargo and jumping ahead thirty years. Do you feel at this time that the products of Prince Edward Island are of a kind suitable for east-west air cargo return.

[*Interprétation*]

beaucoup de choses à nous raconter à ce sujet. Il n'y a pas si longtemps, tous les ministériels de l'Île-du-Prince-Édouard ont dû passer la majeure partie de la nuit sur les banquettes à l'aéroport de Moncton, en raison de la période d'attente de quatre à cinq heures entre le vol d'Air Canada en provenance de Montréal et le premier vol matinal du transporteur régional à partir de Moncton.

Pour le moment, je parle du problème du service-voyageurs. A ce propos, j'ai mentionné dans mon mémoire les difficultés que posent les déplacements dans les provinces Maritimes. Ces difficultés existent vraiment. On parle d'étroite collaboration entre les provinces Maritimes, certains préconisent l'union de ces provinces sur les plans économique et politique, mais voilà justement une région du Canada où les déplacements aériens se font difficilement.

Je suis persuadé que le service aérien que l'on pourrait offrir aux industries de l'Île-du-Prince-Édouard donnerait à la province l'occasion de faire progresser son économie de 20 ou 30 ans. Toutefois, aussi longtemps qu'il nous faudra compter sur le matériel, les horaires et les services actuels, nous ne pourrons jamais garantir à quiconque la livraison régulière de nos produits agricoles et de la pêche.

Qu'il s'agisse des marchés du nord, du sud ou de l'est, à l'heure actuelle, ni même dans un an, nous ne pouvons espérer obtenir les appareils à réaction ou autres qui nous permettraient de desservir ces marchés. Voilà deux choses qui me viennent immédiatement à l'esprit, soit la possibilité d'intensifier le trafic aérien des marchandises et celle d'améliorer le service-voyageurs.

Le président: Pourriez-vous, monsieur Nesbitt, laisser la parole à monsieur Rose, le temps d'une brève question supplémentaire?

M. Nesbitt: A la condition qu'il soit bref.

M. Rose: Merci, monsieur le président. Monsieur le premier ministre, si j'ai tenu à poser une question supplémentaire, c'est qu'on nous a donné à entendre que les cinq ou six avions de transport qui amènent des marchandises à Halifax chaque jour repartent souvent à vide: c'est donc que la Nouvelle-Écosse ne profite pas pleinement des moyens qu'elle a à sa disposition. Votre remarque au sujet d'un progrès de 20 ou 30 ans m'a donc fortement intéressé. Croyez-vous que les produits actuels de l'Île-du-Prince-Édouard se prêtent au transport aérien d'est en ouest?

[*Text*]

Mr. Campbell: Indeed yes. We have made some initial and successful efforts to process frozen agricultural products, and surely this product in the smaller and lighter containers could be moved by large jet cargo aircraft.

We have a strawberry industry which can be greatly expanded provided, however, we are able to move those strawberries in the most advantageous way into let us say the Boston market, for example. We are processing milk here in various forms and there is a demand for this product in Newfoundland, in the Labrador area and in the Southern Islands area.

Very small quantities at the moment do move by air and I believe that this is yet another example of the great potential in moving fresh and processed products into selective markets.

Mr. Nesbitt: That was one of the questions I had in mind, Mr. Premier. I presume also that lobster and other varieties of fish and sea food could be moved advantageously by air.

Mr. Campbell: I would concur naturally with the suggestion that fish products in various forms and processed in various ways can move. What we do observe is that while our national carriers are well financed and have the funds to develop new modes and new equipment, decisions are being made in central Canada, with recognized benefits to shipping concerns and to manufacturers, on how that new equipment can best serve their needs.

I would only want to suggest to the Committee that when these decisions for investments are being made, that when commitments of the CNR or of Air Canada or other national shipping interests over which the federal government does have some control are being made, that the potential service of Prince Edward Island and of the Atlantic Provinces be fully considered.

It was not too long ago that I learned that Canadian National Railways is investing rather substantial amounts of money in developing containerized equipment to carry beef from Ontario to Newfoundland.

Prince Edward Island is not today able to serve the Newfoundland market with its beef requirements. We hope that that day is not too far away. But we will find as we increase our beef production in Prince Edward Island, as we further develop our ability to deliver agricultural products—beef for example—to market areas that we will then be competing with very efficient containerized movements direct from Ontario to Newfoundland. This

[*Interpretation*]

M. Campbell: Oui, certes. Déjà, nous avons assez bien réussi à traiter des produits agricoles congelés. On pourrait assurément transporter ces produits par avion à réaction dans des containers légers et petits.

La culture de la fraise qui se fait dans la province pourrait prendre de l'expansion, à condition, évidemment, que nous puissions diriger ce produit aussi avantageusement que possible jusqu'au marché de Boston, par exemple. Les produits de notre industrie de transformation laitière sont en demande à Terre-Neuve, dans la région du Labrador et dans les îles du Sud.

A l'heure actuelle, on n'en transpporte qu'une très faible quantité par air. Voilà un autre exemple qui illustre bien, je pense, la possibilité qu'il y a de trouver les débouchés choisis pour nos produits frais et transformés.

M. Nesbitt: Voilà l'une des questions que j'avais à l'esprit, monsieur le premier ministre. Je suppose, en outre que le homard et les autres produits de la pêche se prêteraient avantageusement, à leur tour, au transport aérien.

M. Campbell: Évidemment, je suis d'accord que les produits de la pêche, sous toutes leurs formes, s'y prêteraient. Chose à noter, bien que nos transporteurs nationaux soient très bien financés et disposent des fonds voulus pour mettre au point de nouvelles méthodes ou infrastructures, c'est au Canada central qu'on prend les décisions quant à ce qui peut profiter aux expéditeurs et aux fabricants, mais aussi quant au matériel répondant le mieux à leurs besoins.

A mon sens, lorsqu'on prend des décisions au sujet des investissements, lorsque des engagements sont pris par le National-Canadien, Air Canada ou d'autres expéditeurs nationaux sur lesquels le gouvernement fédéral se conserve une certaine emprise, il faudrait que l'on tienne sérieusement compte de l'intérêt de l'Île-du-Prince-Édouard et des autres provinces de l'Atlantique.

Il n'y a pas tellement longtemps que j'ai appris que le National-Canadien avait dépensé beaucoup d'argent pour mettre au point des containers propres au transport du bœuf de l'Ontario à Terre-Neuve.

A l'heure actuelle, nous ne pouvons pas fournir en bœuf les marchés terre-neuviens, mais nous espérons être en mesure de le faire sous peu. Néanmoins, quand nous aurons accru notre production et amélioré nos services d'expédition, pour le bœuf ou les produits agricoles, nous aurons à livrer concurrence à un commerce par container déjà florissant entre l'Ontario et Terre-Neuve. Cela nous ramène au problème de l'absence de bons ser-

[*Texte*]

brings us back to the problem of the lack of adequate shipping services between Atlantic points and between this province and the Caribbean area as well.

Mr. Nesbitt: I have one or two very brief questions, Mr. Premier. How many airports at the moment on Prince Edward Island can accommodate aircraft the size of a Viscount? I know the Charlottetown airport can, but are there any others beside that and Summerside?

Mr. Campbell: The air base at Summerside, of course, is a military installation and Eastern Provincial Airways (1963) Limited is using that on its regular schedule, but these are the only two airports within the province that could accommodate Viscounts. I am not in a position, gentlemen, to suggest whether or not a DC-9 might conveniently use the facilities at Charlottetown, but I understand that extensions to runways must be made before landings of ships of the size of DC-9s can safely be made here.

Mr. Nesbitt: Thank you. There is another question I would like to ask. Are any other regional carriers attempting to make an effort to serve Prince Edward Island?

Mr. Campbell: Not to my knowledge, sir.

Mr. Nesbitt: You made a reference in your brief at page 13, I believe, concerning an instrument landing system. Do either of the existing airports in Prince Edward Island have trouble with atmospheric conditions to any large degree for any protracted period such as in Charlottetown or Summerside? I refer to fog in particular.

Mr. Campbell: We went into this matter in very careful detail when Prince Edward Island was expressing concern about the military base in Summerside closing. The base at Summerside is one of the most fog-free bases, I understand, in the Atlantic provinces. In fact, there were fewer incidents of fog here in Prince Edward Island than existed at other military bases on the mainland, as I recall.

The wind factor is the great problem, I think, here in Prince Edward Island, which requires alternate runway courses, but by and large the weather conditions are such that they should not discourage the expansion and the development of greater air services and facilities here in Prince Edward Island.

[*Interprétation*]

vices d'expédition entre divers points des provinces de l'Atlantique et cette province, ainsi qu'avec la région des Antilles.

M. Nesbitt: J'ai une ou deux questions très brèves à poser monsieur le premier ministre. A l'heure actuelle, combien d'aéroports de l'Île-du-Prince-Édouard peuvent-ils recevoir des avions de la taille du «Viscount»? Il y a évidemment l'aéroport de Charlottetown, mais y en a-t-il d'autres, à part celui-là et celui de Summerside?

M. Campbell: Le terrain d'aviation de Summerside est, bien entendu, une base militaire, que *l'Eastern Provincial Airways (1963) Limited* utilise pour son service régulier mais ce sont les deux seuls aéroports de la province qui puissent recevoir un «Viscount». Je ne suis pas en mesure, messieurs, de vous dire si un DC-9 pourrait ou non utiliser des installations de Charlettetown, mais je crois comprende qu'il faudrait prolonger les pistes avant que des avions de la taille du DC-9 puissent atterrir ici en toute sécurité.

M. Nesbitt: Merci. J'aimerais poser une autre question. Y a-t-il d'autres compagnies de transport régionales qui font un effort pour desservir l'Île-du-Prince-Édouard?

M. Campbell: Pas à ma connaissance, monsieur.

M. Nesbitt: Vous avez mentionné dans votre mémoire, à la page 13, je crois, un dispositif de commande de l'atterrissage. Est-ce que l'un ou l'autre des aéroports qui existent actuellement dans l'Île-du-Prince-Édouard a parfois des difficultés assez graves, et pendant une période de temps assez prolongée, en raison des conditions atmosphériques? Je veux parler en particulier du brouillard.

M. Campbell: Nous avons étudié cette question en détail et avec un soin extrême lorsque l'Île-du-Prince-Édouard exprimait son inquiétude au sujet de la fermeture de la base militaire de Summerside. La base militaire de Summerside est, je crois, l'un des aéroports des Provinces de l'Atlantique qui ait le moins de brouillard. En fait, si je me souviens bien, on a eu moins souvent du brouillard ici, à l'Île-du-Prince-Édouard, qu'aux autres bases militaires, sur le continent.

Le gros problème, dans l'Île-du-Prince-Édouard, c'est le vent, qui oblige à avoir des pistes d'envol alternées. Mais dans l'ensemble, les conditions atmosphériques ne sont pas propres à décourager l'expansion et la mise au point de meilleurs services aériens dans l'Île-du-Prince-Édouard.

[*Text*]

Mr. Nesbitt: I think that is all I have to ask, Mr. Chairman. Thank you, sir.

Mr. Thomas (Moncton): First of all I would like to compliment the Premier on this excellent presentation he has just made.

An hon. member: Hear! hear!

Mr. Thomas (Moncton): It is very comprehensive, it poses the problems and in most cases suggests the solutions. In fact, it is so informative that I find most of my questions have already been answered. It makes it difficult to ask questions on a brief of this type.

I have one or two short questions, though, Mr. Campbell. I notice on page 3 you referred to the haphazard phasing out of facilities and services to points across the Island. Are you referring here to both passenger and freight services? You may want to leave this to some future brief, from the Boards of Trade, or something, but briefly could you tell me what you are referring to here?

Mr. Campbell: Mr. Thomas, I thank you for that question. I believe that several of the shippers can be more precise in their response, but as a general observation let me say that there have been frequent closing ceremonies of CNR facilities certainly during the last two years. These closings have, I believe, been proposed to effect greater operating and budgetary efficiency and the CNR has justified them on that basis.

We, of course, are not in a very good position to argue with the CNR on the basis of profitability, but what we do see, however, is the continuous effort of the CNR to close stations, to retire services, and it is quite obvious to us, sir, that the CNR has spent very little money indeed in the last 10 or 15 years in maintaining rail lines. There are certain sections on main lines where the train must slow to 20 miles an hour for fear of rocking because of the deteriorated condition of the roadbed.

I do not present, nor do I propose to present, the case for maintaining passenger service in Prince Edward Island with the CNR. It is a service that has long lost any appeal to potential passengers. My last recollection concerning a passenger travelling from Summer-

[*Interpretation*]

M. Nesbitt: Je crois que c'est tout ce que j'ai à demander, monsieur le président. Merci, monsieur.

M. Thomas (Moncton): Tout d'abord, je voudrais féliciter le premier ministre de l'excellent exposé qu'il vient de faire.

Une voix: Bravo!

M. Thomas (Moncton): Il est très complet, il pose les problèmes, et, dans la plupart des cas, il propose des solutions à ces problèmes. En fait, cet exposé donnait tant de renseignements que j'ai l'impression que la plupart de mes questions ont déjà reçu réponse. Il est très difficile de poser des questions sur un mémoire de ce genre.

J'ai toutefois une ou deux brèves questions à poser, monsieur le président. A la page 3, vous avez parlé de la façon dont on supprime au hasard des services vers divers points de l'Île. Voulez-vous parler du service de passagers ainsi que du service de marchandise? Vous voudrez peut-être réserver cette question pour d'autres exposés, celui des Chambres de commerce, par exemple, mais pourriez-vous me dire brièvement ce dont vous voulez parler ici?

M. Campbell: Je vous remercie de cette question, monsieur Thomas. Je suppose que plusieurs des expéditeurs pourraient vous donner des réponses plus précises, mais, de façon générale, permettez-moi de dire que l'on a eu bon nombre de cérémonies de clôture de services du National-Canadien ces deux dernières années. On a proposé ces fermetures, je pense, en vue d'obtenir un meilleur rendement financier et une plus grande efficacité dans l'exploitation, et c'est ainsi que le National-Canadien les a justifiées.

Évidemment, nous ne sommes pas très bien placés pour discuter avec le National-Canadien sur les questions de rentabilité, mais ce que nous constatons, en tout cas, c'est l'effort continuel que fait le National-Canadien pour fermer des gares et pour annuler des services, et il nous est manifeste, monsieur, que le National-Canadien a dépensé vraiment très peu d'argent ces 10 ou 15 dernières années pour entretenir les voies ferrées. Il y a des sections, sur des lignes principales, où le train doit ralentir jusqu'à 20 milles à l'heure de crainte de balancer à cause de l'état de détérioration de la superstructure.

Je ne présente pas, et je ne me propose pas de présenter, une cause en faveur du maintien du service de voyageurs du National-Canadien dans l'Île-du-Prince-Édouard. C'est un service qui a perdu depuis longtemps tout attrait pour les voyageurs éventuels. Le der-

[*Texte*]

side to Borden on a passenger train, which is a distance of 20 miles, is that the trip required about five or six hours.

Therefore, CNR can effectively argue that there is no great demand for such a service. They are proposing exclusive traffic between the capital city and Borden by bus. I cannot argue against the improved bus service, because the passenger service between Charlottetown and the ferry terminal is such that only a very few people are using it today.

Mr. Thomas (Moncton): But there is still a passenger service provided?

Mr. Campbell: There is still a passenger car on that train, but it is a mixed train.

Mr. Thomas (Moncton): In these areas where the CNR has abandoned their freight service, has an alternative service been provided? Perhaps I should leave this for the shippers to answer.

Mr. Campbell: Certainly the truckers might answer that question. I know the CNR is prepared to provide CN trucks and will argue that they are offering better service than was formerly available by the rail service, but we still need the rail to move potatoes.

Until the day comes when potatoes can be moved in containers or by highway traffic, our life blood, our primary industry continues to depend upon the availability of a sufficient number of reefers, it depends upon the condition of those reefers and depends upon the ability of CNR to move those reefer cars out of the province on a regular basis.

The present service is unable to provide an adequate service in this respect. We find ourselves at the peak shipping period with perhaps a shortage of 300 reefer cars. We get pretty far behind in our orders. We are unable any longer to compete with those potato shippers from other regions, from Maine and New Brunswick and from other regions, who are able to get into the central market by truck, who are able to deliver to warehouses within two or three hours, when we in Prince Edward Island may be faced with a car shortage, may be faced with ice conditions in the strait which hamper movement of ferries, may be faced with a delay of two or three days in getting to market.

[*Interprétation*]

nier souvenir que j'aie d'un voyage en train entre Borden et Summerside, soit une distance de 20 milles, c'est que cela avait pris cinq ou six heures.

Ainsi, le National-Canadien peût en effet soutenir qu'il n'y a pas une très grande demande pour un tel service. Il propose un service exclusif entre la capitale et Borden par autobus. Je ne saurais m'opposer à une amélioration du service d'autobus, car le service de voyageurs entre Charlottetown et le terminus du bac est si mauvais que très peu de personnes seulement l'utilisent à l'heure actuelle.

M. Thomas (Moncton): Mais il y a toujours un service de voyageurs?

M. Campbell: Il y a encore un wagon de voyageurs dans ce train, mais c'est un train mixte.

M. Thomas (Moncton): Dans les régions, où le National-Canadien a abandonné son service de transport des marchandises, est-ce que l'on assure un autre service en remplacement? Je devrais peut-être réserver cette question pour les expéditeurs.

M. Campbell: Les camionneurs pourraient assurément vous répondre. Je sais que le National-Canadien est prêt à fournir des camions et prétendra qu'il offre ainsi un meilleur service que le service ferroviaire que l'on avait auparavant, mais nous avons toujours besoin des chemins de fer pour transporter les pommes de terre.

Jusqu'au jour où nous pourrons transporter les pommes de terre par cadres ou par transport routier, notre industrie primaire, notre subsistance, continuera de dépendre sur la disponibilité d'un nombre suffisant de wagons frigorifiques, de l'état de ces wagons, et de la capacité du National-Canadien à faire partir les wagons réfrigérés de la province de façon régulière.

Le service actuel n'est pas suffisant à cet égard. En période de pointe, il nous faudrait 300 wagons réfrigérés de plus. Nos commandes restent en suspens. Nous ne pouvons plus soutenir des expéditeurs de pommes de terre des autres régions, du Maine, du Nouveau-Brunswick et d'ailleurs, qui peuvent atteindre le centre du Canada par camion et livrer leurs produits aux entrepôts dans l'espace de deux ou trois heures, alors que nous, dans l'Île-du-Prince-Édouard, nous pouvons manquer de wagons, nous pouvons avoir des difficultés avec la glace dans le détroit, ce qui gêne le mouvement des bacs, et nous pouvons n'atteindre les marchés qu'avec deux ou trois jours de retard.

[*Text*]

The buyers of potatoes today and the market are becoming sufficiently sophisticated that Prince Edward Island is having some difficulty staying in the ball game when we can only deliver within two or three days compared to an hourly commitment by shippers elsewhere.

Mr. Thomas (Moncton): I have just one further question. I hesitate to ask this one, because it may open up a long discussion, but I will ask it at any rate. This is with reference to the causeway crossing. First of all I would like to state unequivocally that I have always been a firm proponent of a causeway crossing as a New Brunswick member. I have been disturbed at what is to me the growing tendency across Canada recently to laugh the Causeway off as a handout to 100,000 Islanders. This to me is unfair, because I feel that the benefits that will accrue from such a crossing will be as great to New Brunswick, Nova Scotia and to the other provinces as it will for Prince Edward Island. Therefore, we are talking about 2 million people instead of 100,000.

I have read your brief to the federal government some time ago, but I would just like to ask you whether you are suggesting a type of crossing that will also carry rail transportation, or are you at the stage now that you will take just the road without the rail if you can get it?

Mr. Campbell: The laugh you described is a pretty expensive laugh and those who are laughing are by implication quite prepared, apparently, to pick up the tab of $1 billion which will be the cost over 60 years of running the ferry service and providing additional ferries as required. I would hope that the Committee, when they have access to the Stanford Research Institute document, will look at the figures beyond the year 2,000. It is perhaps on the short term viable for the federal government to continue the ferry system at some considerable expense until the year 2,000, but take a look at what happens after that time.

Take a look at the cost of the new docking facilities and the additional ferries that are estimated to be required by that date. I have quoted a figure of $160 million. That is my latest information on the basis of design work. It is my understanding that a crossing costing $160 million does not make provision for rails on the crossing.

[*Interpretation*]

Aujourd'hui, les acheteurs de pommes de terre et le marché deviennent si sophistiqués que l'Île-du-Prince-Édouard a du mal à rester dans la course lorsque nous ne pouvons effectuer une livraison que deux ou trois jours plus tard alors que les autres expéditeurs, ailleurs, peuvent le faire en une heure.

M. Thomas (Moncton): J'ai une autre question. J'hésite à poser cette question, car elle peut donner lieu à un long débat, mais nous verrons bien. Il s'agit de la chaussée. Tout d'abord, je voudrais dire sans équivoque que j'ai toujours été tout à fait en faveur de la construction d'une chaussée, en tant que représentant du Nouveau-Brunswick. Je m'inquiète de la tendance de plus en plus grande que l'on a aujourd'hui, un peu partout au Canada, à ne pas prendre le projet de construction d'une chaussée au sérieux et à en rire, car on estime que ce serait un cadeau aux 100,000 habitants de l'Île. Cela est injuste, à mon avis, car une chaussée bénéficierait au Nouveau-Brunswick, à la Nouvelle-Écosse et aux autres provinces autant qu'à l'Île-du-Prince-Édouard. C'est donc d'environ 2 millions de personnes qu'il s'agit, et non de 100,000.

J'ai lu, il y a quelque temps, le mémoire que vous avez présenté au gouvernement fédéral, mais j'aimerais vous demander si vous proposez un genre de chaussée qui puisse aussi porter un chemin de fer, ou si vous en êtes maintenant arrivés au point où vous vous contenterez d'une route, sans chemin de fer, si vous pouvez en obtenir une?

M. Campbell: Le rire dont vous parlez coûte plutôt cher, et ceux qui rient sont, en conséquence, tout prêts, apparemment, à payer le milliard de dollars que coûteront, en soixante ans, l'exploitation du service de bac et la fourniture des bacs supplémentaires nécessaires. J'espère que le Comité, lorsqu'il aura l'occasion d'examiner le document du *Stanford Research Institute*, regardera les chiffres pour les années après l'an 2,000. Peut-être qu'à court terme c'est viable pour le gouvernement de maintenir le service de bac, à des frais considérables, jusqu'en l'an 2,000, mais voyez ce qui se produira après l'an 2,000.

Voyez ce que coûteront les nouvelles installations de bassin et les bassins supplémentaires qui, prévoit-on, seront nécessaires d'ici là. J'ai cité le chiffre de 160 millions de dollars. C'est là le dernier chiffre que j'aie pu obtenir d'après les plans et devis. Je crois comprendre qu'une chaussée qui coûterait 160 millions de dollars ne comporterait pas l'aménagement de voies de chemin de fer.

[*Texte*]

Mr. Thomas (Moncton): Have you any recent figure on a crossing that would provide rail facilities? Would it be another $100 million?

Mr. Campbell: One figure I heard one time was $40 or $50 million additional to place rails on the structure. I cannot verify whether or not that is a good or a close figure, but I do appreciate that the structure must be stronger; parts of the bridge must be shorter to withstand the additional weight going across. That adds considerably to the expense, but I understand that the additional cost is in the region of from $40 to $50 million.

Mr. Thomas (Moncton): That is all. Thank you, Mr. Chairman.

The Chairman: Mr. Pringle?

Mr. Pringle: Thank you, Mr. Chairman. Mr. Campbell, I too would like to compliment you on a very, very complete report, which could, I believe, act more or less as an overture for the briefs that we are going to receive today. It is very well prepared. I want to thank the honourable gentleman opposite for asking all my questions, too.

I have one point. The Canadian trucking industry is requesting that Part III of the Canadian Transportation Act be implemented which I believe would give some jurisdiction with regard to interprovincial trucking. It would place it in the hands of the federal government. As head of government of this province, have you people given consideration to this; if so, would you care to give your reaction to this possibility?

Mr. Campbell: Did you say inter or intra?

Mr. Pringle: Inter.

Mr. Campbell: Between the provinces?

Mr. Pringle: Yes.

Mr. Campbell: I think we have been quite successful in reaching reciprocal arrangements with other provinces, but it has been a very difficult process. Mr. Brennan from the Public Utilities Commission is here and I think the question might better be put to him. However, it was only this year that we arranged full reciprocity with the Province of Quebec. It takes a long time to work out these arrangements. I would say without giving the matter a great deal of prior thought and without committing the government, that

[*Interprétation*]

M. Thomas (Moncton): Est-ce que vous avez des chiffres récents pour une chaussée avec voies de chemin de fer? Est-ce que cela coûterait 100 millions de dollars de plus?

M. Campbell: A un moment donné, on avait parlé de 40 ou 50 millions de dollars de plus pour l'aménagement de voies de chemin de fer. Je ne saurais dire si c'est un chiffre exact, mais je me rends bien compte qu'il faudrait que la structure soit plus solide, et que certaines parties du pont soient plus courtes, pour supporter le poids supplémentaire. Cela ajoute beaucoup aux dépenses, mais je crois comprendre que les frais supplémentaires seraient de l'ordre de 40 ou 50 millions de dollars.

M. Thomas (Moncton): C'est tout. Merci, monsieur le président.

Le président: Monsieur Pringle?

M. Pringle: Merci, monsieur le président. Monsieur Campbell, je désire, moi aussi, vous féliciter de votre rapport très complet, qui pourrait, je pense, servir plus ou moins d'introduction aux autres mémoires que l'on va nous présenter aujourd'hui. Votre exposé était extrêmement bien préparé. Je veux aussi remercier l'honorable député qui me fait face, d'avoir posé toutes mes questions.

J'ai une observation à faire. L'industrie du camionnage du Canada demande que la Partie III de la Loi sur les transports du Canada soit mise à exécution. Cela, à mon avis, donnerait une certaine compétence pour ce qui est du camionnage interprovincial. Le gouvernement fédéral en aurait l'entière charge. En tant que chef de gouvernement de cette province, y avez-vous déjà songé; si c'est le cas pourriez-vous nous faire part de votre réaction à cet égard?

M. Campbell: Avez-vous dit inter ou intra?

M. Pringle: Inter.

M. Campbell: Entre les provinces?

M. Pringle: Oui.

M. Campbell: Je pense que nous avions bien réussi à en arriver à des arrangements réciproques avec les autres provinces, mais ce fut un processus très difficile. M. Brennan, de la Commission des services publics est ici et je pense que c'est à lui que l'on devrait plutôt poser la question. Cependant ce n'est que cette année que nous avons pu assurer l'entière réciprocité avec la province de Québec. Il m'a pris du temps pour en arriver à ces ententes. Je dirais, sans vraiment avoir à y songer longuement et sans engager le gouver-

[*Text*]

it seems to make good sense to have a national policy established here so that the flow of the trucking industry between the provinces and through the provinces would be expedited.

Mr. Pringle: Thank you. You mentioned the possibility of extending a subsidy on freight in respect of products shipped to the United States and I am wondering if this would have any effect upon our GATT arrangements with respect to dumping duties. This matter has been brought up several times at the hearings and I am very interested in knowing if anyone has a ruling or a suggestion in that regard.

Mr. Campbell: The Province does not have a ruling and I am not able to express an opinion on whether or not this would upset the GATT arrangement. I do suggest, however, that the population growth in the Boston-New York area will increase by some 5 million people by the early seventies. This might indicate to you how great our interest is in being able to serve that area—because this represents growth in the demand for agricultural products. The potential growth in that one area is equal to a very large preference demand in the entire Province of Ontario.

Mr. Pringle: Mr. Premier, would you suggest the possibility of a commodity free trading area north and south here?

Mr. Campbell: Oh yes, I think you would find a lot of support for that in this region of Canada.

Mr. Pringle: I would like to ask one other question which has to do with the navigational equipment for air transport on the Island. You touched upon ILS which to me is a very elementary requirement now in view of today's sophisticated air transports. Are navigational facilities restricting the use of equipment on the Island? I presume that if we have the opportunity of questioning the regional carrier, which I certainly hope we will have today, we will be able to find out about this, but I was wondering if you had any information on this. Do you have any omnihearing facilities or is it all low frequency here for navigational aids?

[*Interpretation*]

nement, qu'il serait censé, à mon avis, d'avoir ici une politique nationale pour que le débit et l'industrie du camionnage entre les provinces et à travers les provinces soit accéléré.

M. Pringle: Merci. Vous avez parlé de la possibilité de consentir des subventions au transport des marchandises pour ce qui est des produits expédiés vers les États-Unis, et je me demande si cela pourrait avoir des effets sur les dispositions du GATT à l'égard des droits de dumping. Cette question a déjà été soulevée plus d'une fois au cours des audiences et je voudrais bien savoir si quelqu'un a une décision à prendre ou une suggestion à faire à cet égard.

M. Campbell: La province n'a pas encore eu de décision à prendre là-dessus. Je ne suis pas en mesure d'exprimer mon avis si cela affectera ou non les dispositions du GATT. Cependant je ne dirais pas que la croissance démographique dans la région de Boston-New York, se trouvera à augmenter dans une proportion de 5 millions au début des années 1970. Cela prouve combien nous nous intéressons à pouvoir vraiment desservir cette région, parce que cela se traduira par une augmentation des besoins pour les produits agricoles. La croissance éventuelle dans ce secteur équivaut à une très grande demande préférentielle dans tout l'Ontario.

M. Pringle: Monsieur le premier ministre, croyez-vous en la possibilité d'établir une zone de libre échange pour les denrées dans les secteurs nord et sud d'ici?

M. Campbell: Oui. Je crois que vous trouverez beaucoup d'appui à cet égard dans cette région du Canada.

M. Pringle: J'aimerais poser une autre question qui porte sur les instruments de navigation pour le transport aérien dans cette île. Vous avez mentionné le système d'atterrissage téléguidé qui à mon avis, est une nécessité très élémentaire étant donné le caractère sophistiqué du transport aérien de nos jours. Les services de navigation restreignent-ils l'utilisation de l'équipement dans l'Île? J'imagine que si nous avons l'occasion de poser des questions aux transporteurs régionaux, et que j'espère vraiment que nous allons le faire aujourd'hui, nous serons en mesure de savoir ce qu'il en est, mais pouvez-vous nous renseigner là-dessus? Disposez-vous de quelque installation pour le relèvement de positions, ou utilisez-vous uniquement les bandes de basse fréquence pour ce qui est des appareils de navigation?

[*Texte*]

Mr. Campbell: Well we have the full facilities at the military base at Summerside. But there is some reluctance of course on the part of the military to have an aggressive commercial operation in landing and taking off there. There is certainly no provision for warehousing at the terminal in Summerside. The facilities in Charlottetown are non-existent. If for example, we might expect some regularity in commercial traffic, some regularity in trips to northern ports and to southern ports, then we just do not have the facilities here in Charlottetown or at any other point in the Province to assure and facilitate regularity.

Mr. Pringle: I have one final question. I too, even though I come from British Columbia, have had the opportunity of studying the requirements with regard to transportation on and off this Island, and having had some slight business connection I feel that the causeway is very vital.

Now do you feel that you are getting the support from the industrialists in connection with this type of a crossing, and is there any way that you think that we will be able to get a firm price? We hear anywhere from your figure of $160 million to $400 million. Also, we have read some briefs which are not entirely in support of this type of a crossing. I do not want to open up a long discussion on it but I did want to make that point.

Mr. Campbell: Thank you for that question, sir, because on that point the Province speaks with a clear voice. I rather doubt that the briefs which have failed to support the proposal have had their origins in Prince Edward Island. When the brief to the federal government was presented some 17 provincial organizations met in Charlottetown much in this fashion and presented their briefs in support

In addition and in direct response to the question about support of industrialists, the industrialists of Prince Edward Island have recently met with the Minister of Transport and with the Minister of Regional Affairs and they have presented their own specific views, from the benefits which would flow from a dry permanent crossing to the prospects of a greatly expanded secondary manufacturing industry within the Province.

With regard to the cost, for some reason or other when the original tenders were received in response to the first tender call—those tenders were over maybe 10 or 20 per cent of the total work—they were projected and the

[*Interprétation*]

M. Campbell: Nous avons tous les services à la base militaire de Summerside. Mais, bien entendu, l'autorité militaire a quelques hésitations d'avoir une entreprise commerciale d'envergure d'utiliser ces services. Il n'y a certainement pas d'installations pour l'entreposage au terminus à Summerside. Les aménagements à Charlottetown n'existent pas. Si, par exemple, on pouvait s'attendre un trafic aérien commercial assez régulier, des voyages assez réguliers vers les ports du nord et du sud, nous n'aurions pas les services et les aménagements nécessaires ici à Charlottetown ou ailleurs dans cette province pour assurer et faciliter la régularité du transport.

M. Pringle: Une dernière question, s'il vous plaît. Bien que je vienne de la Colombie-Britannique, j'ai eu aussi l'occasion d'étudier les exigences en ce qui concerne le transport à l'arrivée au départ de cette île, et ayant eu quelques rapports commerciaux, je trouve que la chaussée est un élément vital. Croyez-vous que vous avez l'appui des industriels pour un tel projet et croyez-vous que nous serons en mesure d'obtenir un prix ferme? Vous parlez de $160 à 400 millions; de même, dans certains mémoires, on voit qu'on n'appuie pas tout à fait un tel projet de chaussée. Je ne veux pas ouvrir une longue discussion, mais je voulais faire cette observation.

M. Campbell: Je vous remercie de m'avoir posé cette question, parce que le point de vue de la province est très clair là-dessus. Je doute que les mémoires qui n'ont pas appuyé cette proposition soient venus de l'Île-du-Prince-Édouard. Lorsque le mémoire fut présenté au gouvernement fédéral, quelque 17 organismes provinciaux se sont rencontrés à Charlottetown, tout comme ici, et ont présenté leurs mémoires en vue d'appuyer ce projet. De plus, et en réponse à la question de l'appui des industriels, les industriels de l'Île-du-Prince-Édouard se sont réunis récemment avec le ministre des Transports et le ministre des Affaires régionales, et ont présenté leurs propres points de vue pour ce qui est des avantages qui découleraient de l'aménagement d'une chaussée permanente sèche, par rapport aux perspectives de l'expansion très grande des industries secondaires de cette province.

Pour ce qui est du coût, pour une raison ou pour une autre, lorsque les soumissions originales furent reçues lors du premier appel d'offre, ces soumissions portaient peut-être sur quelque 10 ou 20 p. 100 du travail global;

[*Text*]

projection of the first tenders two years ago added up to some $300 million.

It is this figure that we have continued to hear and it is this figure which some officials in Ottawa have continued to reveal to the public or to publicize. But the federal government, since those first tenders were projected, then caused a more thorough investigation of the tendering practices, of the design concept, and it is the result of the last two years of work in these areas that has produced figures from $160 to $180 million. The $300 million figure is totally irrelevant today in light of the last two years' work in refining the procedures for calling tenders and refining the design work for the causeway.

The Chairman: Mr. Rock?

Mr. Rock: Mr. Premier, you mentioned that they were restudying the subject matter of the causeway.

Was there any study made of the possibility of a complete tunnel rather than a causeway? I do not know the make-up of the soil and rock formation under the sea. You may have more information than I on this. I would like to know whether there was a study made of an alternative, such as a tunnel like they are talking about in Newfoundland. Mind you, I must say that I would like to see a causeway or tunnel built also for Newfoundland at the same time. Have you any information on tunnel versus causeway?

Mr. Campbell: Yes, there is, sir. The original design which was projected at $300 million was a combined solid crossing, with a bridge high enough to allow large vessels to sail underneath and a section of tunnel as well. I believe that this design was pretty well rejected because of not being appropriate to the requirements here. I am personally aware of the analysis made of a solid tunnel from one side to the other, and the indicators for the cost factor very early discounted a tunnel across the Northumberland Strait as a possible economic solution to it—so the tunnel idea was rejected over a year ago.

Mr. Rock: Mr. Premier, if I recall correctly, some time ago they were speaking about moving in mountains or hills to build your causeway. Were they referring to rubble or solid rock which they would have to dynamite and bring in to build a causeway?

[*Interpretation*]

les projections des premières soumissions il y a deux ans représentaient quelque $300 millions.

Ce sont ces chiffres que nous avons toujours entendu mentionner et ce sont ces mêmes chiffres que certains hauts fonctionnaires à Ottawa ont toujours rendus publics, mais depuis lors, le gouvernement fédéral a entrepris une plus grande étude de ce système d'appels d'offres, de la conception du projet, et à la suite des travaux des deux dernières années, nous avons pu obtenir des chiffres allant de $160 à $180 millions. Le chiffre de $300 millions n'est pas du tout pertinent aujourd'hui à la lumière des études faites au cours des deux dernières années pour raffiner le processus des appels d'offres, ainsi que la mise au point des plans et devis de la chaussée.

Le président: Monsieur Rock?

M. Rock: Monsieur le premier ministre, vous avez dit qu'il allaient reprendre l'étude de la question. A-t-on considéré la possibilité de contruire un tunnel plutôt qu'une chaussée? Je ne sais pas quelle est la formation du sol sous-marin. Vous avez sans doute plus de renseignements que moi. Je voudrais savoir si l'on a étudié cette alternative d'aménager un tunnel, comme on en parle à Terre-Neuve. Remarquez bien, j'aimerais bien voir une chaussée ou un tunnel construit aussi pour Terre-Neuve. Avez-vous des renseignements quant aux avantages d'un tunnel par rapport à une chaussée?

M. Campbell: Oui. Le premier devis qui prévoyait $300 prévoyait une chaussée, un pont, un pont assez élevé pour permettre aux grands navires de naviguer sous le pont, ainsi qu'une section qui serait formée d'un tunnel. Je pense que ces plans et devis furent rejetés, n'étant pas conformes aux besoins. Je suis personnellement au courant de l'analyse quant à l'aménagement d'un tunnel, d'un bout à l'autre, et le facteur coût, les indices quant au coût dès le début ont fait qu'on a rejeté entièrement l'idée d'un tunnel sous le détroit de Northumberland comme étant une solution rentable. Donc, cette idée du tunnel fut rejetée il y a au moins un an.

M. Rock: Monsieur le premier ministre, si j'ai bien lu il y a quelques années, il était question de construire la chaussée en déplaçant des montagnes ou des collines. Voulaient-ils parler de rocaille ou de rochers solides qu'ils devraient dynamiter et s'en servir pour construire la chaussée?

[*Texte*]

Mr. Campbell: I think the mountain consisted of quite a number of bureaucrats in Ottawa.

Mr. Rock: You expressed your dissatisfaction over schedules of airlines, particularly in respect of businessmen who could not go, say, to Halifax and come back on the same day. Do you feel that there may be some collusion between travel agencies, air lines and hotel businessmen to keep the customer in their municipality and in their hotels for a longer period. Perhaps this is the reason that air lines schedule to the satisfaction of hotel owners and so on.

Mr. Campbell: No, I would discount any notion, sir, that that is the root cause of the problem. The problem is that the regional carrier has only limited equipment and it endeavours to serve as many of the point-to-point trips with a limited amount of equipment. So that you may find an aircraft travelling from Moncton to Charlottetown then going to the Magdalen Islands, coming back in and going over to Halifax, back to Charlottetown and over to Moncton. It is a problem of limited equipment, I am sure, and the economics of running regular flights between Charlottetown and Halifax—two or three trips a day—just would not make sense.

But what we talk about in the brief is this lack of co-ordinating the trips within the region so that it is convenient for businessmen to move around and to get from point A to point B without having to stay overnight or without having to waste a great deal of time. As a matter of fact, many, many businessmen have begun travelling by car in the inessmen have begun travelling by car in the last six months because of the impossibility of getting to Fredericton and back on the same day.

Mr. Rock: Do you feel that the benefits of MFRA should also apply to shipments coming into your province to reduce the cost of goods from central Canada, thereby reducing your cost of living?

Mr. Campbell: I believe that our submission from the four Atlantic provinces to the Minister will very clearly reflect the position of the province on that point, sir. You will find great similarity between the position of Newfoundland and the position of Prince Edward Island. One of our great concerns is that as an agricultural province we depend on the importation of quite substantial quantities of bulk materials: fertilizers, lime, seed

[*Interprétation*]

M. Campbell: Je pense que cette montagne consistait d'un bon nombre de bureaucrates d'Ottawa.

M. Rock: Vous nous avez parlé de votre mécontentement au sujet des horaires des lignes aériennes particulièrement pour ce qui est des hommes d'affaires qui ne peuvent pas se rendre à Halifax et être de retour le même jour. Croyez-vous qu'il y ait collusion entre les agences de voyage, les lignes aériennes et les propriétaires d'hôtels, pour que le client ait à rester dans cette municipalité pour une plus longue période? C'est peut-être la raison pour laquelle les lignes aériennes prévoient des horaires qui puissent satisfaire les propriétaires d'hôtels.

M. Campbell: Non, je rejette toute idée voulant que ce soit là la cause essentielle du problème. Le problème est que le transporteur régional n'a qu'un équipement limité et qu'il essaye de desservir le plus grand nombre d'itinéraires, avec le moins d'équipement possible. Ainsi, vous pouvez avoir un avion qui va de Moncton à Charlottetown puis se dirige vers les Îles-de-la-Madeleine, y revient, repart vers Halifax, puis vers Charlottetown, et enfin vers Moncton. Je suis sûr que c'est un problème d'insuffisance de matériel car il serait insensé et peu rentable d'organiser des vols réguliers, deux ou trois fois par jour entre Charlottetown et Halifax.

Mais ce dont nous parlons dans le mémoire, c'est ce manque de coordination des voyages dans la région pour qu'un homme d'affaires puisse se déplacer facilement et aller par exemple du point A à point B sans avoir à passer la nuit en cours de route ou encore sans avoir à perdre beaucoup de temps. Et je dirais que bon nombre d'hommes d'affaires ont commencé à voyager par automobile au cours des six derniers mois étant donné l'impossibilité de se rendre à Fredericton et d'y revenir la même journée.

M. Rock: Croyez-vous que les avantages de la Loi sur les taux de transport des marchandises dans les provinces Maritimes devraient s'appliquer aux expéditions de marchandises vers votre province afin de réduire le coût des produits provenant du Canada central?

M. Campbell: Je pense que notre mémoire venant des 4 provinces de l'Atlantique et présenté au ministre reflétera vraiment la position de la province sur ce point. Vous trouverez de très grandes similarités entre la ligne de conduite de Terre-Neuve et celle de l'Île du Prince-Édouard. Nous disons donc que toute l'agitation vient du fait que, en tant que province agricole, nous devons compter sur l'importation de grandes quantités de matiè-

[*Text*]

grains, of course at the present time, even gravel.

To build the airport at Summerside, I think it took 150 railway cars for three months to provide the gravel requirement that would meet the federal minimum standards for asphalt construction. We depend to a great extent on the import of bulk commodities and if the Maritime freight rates were adjusted upwards, this would have a very serious detrimental effect upon our primary industry of agriculture. I do believe that the subsidy today applying to the importation of fertilizer, for example, saves a potato farmer about $50 an acre, or something of that order, and you will appreciate that figure is approximate. However, to give you an idea of the importance of it the removal of such assistance would pretty well put us out of the game altogether.

Mr. Rock: Do you feel if we do extend MFRA that the consumer in the long run will benefit? Will things be reduced then or will the farmer, for example, if he gets fertilizer cheaper, just pocket that? Will he become richer, let us say, rather than pass this on in the form of cheaper goods by reducing the price of his product?

This is a thing that concerns me. Why I am saying is that, for instance, when we removed the 12 per cent tax from the manufacturer's price of drugs, there is evidence that the manufacturer did reduce his price to the druggist, but the druggist did not reduce his price. Therefore, I believe, the druggists across Canada were $20 million richer. The population did not receive that. Do you feel that the same thing may happen if we extend MFRA, and all we will do is give this benefit to the farmer himself who will become richer, or to anyone else who is going to benefit, but that the population itself will not benefit?

Mr. Campbell: I am not an expert in this field, but I would like to make an observation.

Prince Edward Island has a natural market for agricultural products in the Atlantic provinces and we enjoyed that market for some number of years, and perhaps because of the transportation costs between Ontario and the distribution points within the Maritime provinces, what I believe has happened is that the agricultural industry in Ontario and parts of Quebec has become so efficient and has

[*Interpretation*]

res en vrac, les engrais, la chaux, les graines de semence, et même en ce moment, le gravier.

Pour aménager l'aéroport de Summerside, je pense qu'il nous a fallu 150 wagons de chemins de fer en trois mois pour répondre aux exigences en gravier qui pourraient satisfaire aux exigences minimales établies par le gouvernement fédéral en matière de bitumage. Nous comptons aussi dans une grande mesure sur les importations de marchandises en vrac, et les tarifs marchandises des provinces Maritimes étaient haussés, la hausse nuirait considérablement à l'industrie primaire de l'agriculture. Je crois que, en ce moment, les subventions qui s'appliquent à l'importation d'engrais, par exemple, épargne aux cultivateurs de pommes de terre près de $50 l'acre ou quelque chose de ce genre. Évidemment, ce n'est qu'un chiffre approximatif, mais afin de vous donner une idée de l'importance de cette aide, son abolition nous ferait disparaître du tableau.

M. Rock: Croyez-vous que si nous étendons les dispositions de la Loi sur le transport des marchandises que le consommateur en bénéficiera à la longue? Est-ce qu'on baissera le prix des produits ou est-ce que si, par exemple, l'agriculteur obtient son engrais à un meilleur prix, il empochera tout simplement l'argent. Est-ce qu'il deviendra plus riche plutôt que de faire bénéficier les autres de ses avantages en baissant le prix de ses produits?

C'est une chose qui nous préoccupe. La raison pour laquelle je vous dis tout cela, c'est que, par exemple, lorsque nous avons enlevé la taxe de 12 p. 100 sur le prix de fabrication des médicaments, on a pu constater que le fabricant a baissé son prix de vente au pharmacien mais que celui-ci n'a pas baissé le sien. Je pense que les pharmaciens se sont enrichis de $20 millions, mais non pas la population. Croyez-vous que la même chose puisse se produire ici, si nous étendons les dispositions de la Loi, et que le seul qui en bénéficiera sera le cultivateur qui s'enrichira ou un autre, mais que la population n'en bénéficiera pas?

M. Campbell: Je ne suis pas un spécialiste dans ce domaine, mais je voudrais exprimer une opinion.

L'Île-du-Prince-Édouard a un marché naturel de produits agricoles dans les provinces de l'Atlantique, et nous avons joui de ce marché pendant un certain nombre d'années, peut-être à cause du coût de transport entre l'Ontario et les provinces Maritimes. Ce qui s'est produit, je pense, c'est que l'industrie agricole de l'Ontario et de certaines régions du Québec est devenue tellement efficace et s'est

[*Texte*]

nproved to such an extent that it is now ble to absorb whatever transportation costs here are and to compete with and beat our bility to match prices within the Maritime arket. I think that the consumer in this espect has been the beneficiary because ntario poultry, Ontario turkey, Ontario you-ame-it, is on the shelf here in the Maritime rovinces. The beef, the milk, is now in the laritime market at prices which our farmers laim are below their cost of production.

I am not suggesting that more subsidies in he hands of Prince Edward Island shippers n farmers through rails will have beneficial ffects on the consumer price. What I am uggesting is that unless we are able to get nto these markets and unless we have that ssistance, there is very little hope indeed for he agricultural industry in this province. hat, then, is the primary concern which I ee: the ability of Prince Edward Island to et into the market.

I think through the development plan we vill be inaugurating programs here that will ncourage and assist Prince Edward Island roducers and fishermen to produce more conomically. But without being able to get nto markets at reasonable prices, without eing able to buy their necessary materials, heir machinery, their limestone, their ferti-zer at reasonable cost, then there is very ittle hope for the agricultural industry in hese provinces and every prospect that we vill continue to depend more and more every ear upon the agricultural production of cen-ral Canada.

The Chairman: Mr. McGrath, do you have supplementary question?

Mr. McGrath: Yes, Mr. Chairman. Mr. Pre-nier, realizing the importance of the New-oundland market to P.E.I., Newfoundland eing agriculturally deficient, could you per-aps expand on the importance, or what role he causeway would play in helping you to nore effectively get into the Newfoundland narket?

Mr. Campbell: I do not really see the causeway enabling us to get into the New-oundland market more effectively. I think he Newfoundland market today can best be erved by water transport, by a system of ransport that can stop at various ports of call and can efficiently roll off containerized equipment at the various ports of call. However, I do expect that Newfoundland will vastly improve its highway system so that two or three points of call in five or ten years from now would enable a distribution system

[*Interprétation*]

tellement améliorée qu'elle peut maintenant absorber le coût de transport et concurrencer avec nous sur le marché des provinces Maritimes. Je pense que le consommateur, à cet égard, a été le plus avantagé parce que les poulets, les dindes et les autres produits de l'Ontario se trouvent dans les magasins des provinces Maritimes. Le bœuf, le lait se trouvent sur le marché des Maritimes à des prix qui, de l'avis de nos agriculteurs, sont inférieurs à leurs frais de production.

Je ne propose pas que si on versait plus de subventions aux expéditeurs ou aux agriculteurs de l'Île-du-Prince-Édouard par l'entremise des chemins de fer, on réduirait le prix au consommateur, mais à moins que nous soyons en mesure de pénétrer ces marchés et que nous obtenions cette aide, il y a très peu d'espoir pour l'industrie agricole de cette province. C'est donc la principale préoccupation et à mon avis, la possibilité pour notre île de pénétrer ce marché.

Je crois que le programme d'expansion aidera et encouragera les producteurs et les pêcheurs de l'Île du Prince-Édouard à produire à moins de frais. Mais s'ils ne peuvent pénétrer ce marché à un prix raisonnable, s'ils ne peuvent acheter de matériaux, l'équipement, la chaux, les engrais à un coût raisonnable, il y a très peu d'espoir pour l'industrie agricole de ces provinces, il est fort possible que l'on continuera de plus en plus chaque année de dépendre sur la production agricole du Canada central.

Le président: Monsieur McGrath, avez-vous une question complémentaire à poser?

M. McGrath: Oui, monsieur le président. Monsieur le premier ministre, compte tenu de l'importance du marché de Terre-Neuve pour l'Île du Prince-Édouard puisque sa production agricole est inadéquate, pourriez-vous donner une idée de l'importance du rôle que jouerait la chaussée pour vous permettre de pénétrer plus efficacement sur le marché de Terre-Neuve?

M. Campbell: Je ne vois pas comment la chaussée puisse nous permettre de pénétrer sur le marché de Terre-Neuve de façon plus efficace. Je pense que le marché de Terre-Neuve, aujourd'hui, serait mieux desservi par le transport maritime, par un système de transport qui peut s'arrêter à différents ports, décharger de l'équipement dans des cadres aux différents ports d'escale. Mais, je m'attends à ce que Terre-Neuve améliore son réseau routier pour que deux ou trois ports d'escale assurent un système de distri-

[*Text*]

in St. John's and at one or two more points to move these products then to the various consumers by road.

Mr. McGrath: This is what I was getting at, Mr. Premier. I realize it is more efficient to move root crops by ocean bottoms, but there is a great need in Newfoundland for fresh produce, the same as you can get in the Maritimes during the harvest season and this is what I was referring to. Would it be feasible with a causeway to ship fresh produce by truck to the Newfoundland market?

Mr. Campbell: If that causeway went directly to Newfoundland, I could see the direct relevance, but if we were to use the causeway in this context, our trucks would have some difficulty, I think, in driving to New Brunswick, up through New Brunswick, up along Seven Islands—is that it? How would it work?

Mr. McGrath: No, across the ferry at Sydney.

Mr. Campbell: It is my understanding that the trucking industry of Newfoundland had some difficulty in getting from Sydney to Newfoundland, and I would make a case for the trucking industry of Newfoundland in this respect, that if we are talking about moving potatoes by truck into Newfoundland there would be great difficulty today in moving the quantities of potatoes or fresh agricultural products efficiently through that service. This is my understanding.

Mr. Rock: You spoke about political and economic union: how serious are the provinces in this idea of political union? If there is any seriousness in this idea, do you not feel that your Island should be the site for the new capital? I am saying this in seriousness, Mr. Chairman. The reason is that years ago Vancouver Island was a province too, and it joined on the condition that the capital city was to remain on the island. So I am just asking this question now.

Mr. Campbell: I can say, Mr. Chairman and members of the Committee, that Prince Edward Island is quite serious as a partner to the study on Maritime union as it involves greater economic co-operation and as it touches upon the subject of political union as well. We are quite serious as a partner to that study. That study has begun already to reveal certain things to us. I only suggest, of course, that such a thing as the causeway, better transportation, brings our people closer together in a very direct way. It might

[*Interpretation*]

bution, d'ici cinq ou dix ans, de St-Jean et un ou deux autres ports et d'expédier ensuite ces produits aux concommateurs par route.

M. McGrath: C'est ce à quoi je voulais en arriver, monsieur le premier ministre. Je comprends que le transport de ces tubercules se fait plus efficacement par navire, mais nous avons besoin de produits frais à Terre-Neuve, tout comme vous pouvez les obtenir dans les Maritimes à la période de la récolte. Est-ce que vous pourriez expédier les produits frais par camions aux marchés de Terre-Neuve, s'il y avait une chaussée?

M. Campbell: Si la chaussée allait directement à Terre-Neuve, je verrais la pertinence de la question, mais si nous utilisions la chaussée dans ce contexte, nos camions éprouveraient de la difficulté, je pense, à se rendre au Nouveau-Brunswick, traverser cette province, vers Sept-Îles... Est-ce que c'est bien l'itinéraire?

M. McGrath: Non, en empruntant le transbordeur à Sydney.

M. Cambell: Si je comprends bien, l'industrie de Terre-Neuve éprouve des difficultés à traverser de Sydney à Terre-Neuve, et je reconnais la cause de l'industrie du camionnage de Terre-Neuve à cet égard, car si nous parlons du transport de pommes de terre par camion à Terre-Neuve, nous éprouverions beaucoup de difficultés, en ce moment, à acheminer la quantité de produits agricoles frais et de pommes de terre efficacement avec les moyens actuels.

M. Rock: Vous avez parlé de l'union politique et économique. Jusqu'à quel point les provinces sont-elles sérieuses quand elles parlent d'union politique? Est-ce qu'il y a vraiment un fonds de sérieux, ne croyez-vous pas que votre île serait l'emplacement logique de la nouvelle capitale? Je parle sérieusement, monsieur le président. La raison est qu'il y a des années, l'île de Vancouver était une province aussi, et elle s'est joint à la condition que la capitale demeure sur l'île. C'est pourquoi je pose cette question.

M. Campbell: Tout ce que je puis vous dire, monsieur le président et messieurs les députés, c'est que l'Île-du-Prince-Édouard est un partenaire assez sérieux à cette étude sur l'union éventuelle des Maritimes car elle comporte une plus grande collaboration sur le plan économique et qu'elle touche l'aspect de l'union politique également. Nous sommes un associé assez sérieux à cette étude. Elle nous a déjà révélé un certain nombre de choses. Je ne fais que proposer, bien entendu, qu'une chose comme la chaussée, des meilleurs

exte]

courage or assist in our efforts to -operate.

For example, I am thinking of the area of vernment services. Each of us has our own ghway sign department and each of us is aking signs. New Brunswick established a w plant in Fredericton last year that has e capacity to make sufficient signs for the tire Atlantic provinces, which would mean at signs would be turned out on a very icient basis. This is only one instance of ndreds of ways in which the provinces can -operate. But we also have transportation fficulties involved in this whole business of -operation.

Mr. Trudel: Mr. Chairman, I will be as ief as possible. I have two questions that I ould like to ask the Premier. First of all I ant to compliment him on brief.

The first question: I believe that the need s been established for markets for the oducts of your province. Have you at the esent time, sir, a coastal service to collect l of the goods, or some of the goods that are quired to export?

Mr. Campbell: Our coastal service for the port of goods, without considering the ood Islands ferry system which receives a deral subsidy, includes a North Shore ship- ng service which the province and the fed- al government together subsidize to the tent of about $80,000 a year. This is a eekly trip of a relatively small ship with latively limited freezing facilities aboard, om island ports to Seven Islands. It does ot operate in the wintertime because of ice nditions and because of the limited capacity the ship to operate under those rcumstances.

Then we have the Newfoundland run as ell, which operates, I believe, once a week, once every 10 days, and it receives a fed- al-provincial subsidy as well, but unfortu- ately we cannot assure regularity of ship- ents, with that service; we do not have the cilities in our market for stockpiling ship- ents of potatoes to be spread over the win- r season.

It is not a service which encourages regu- rity, continuity in the supply of our prod- cts to the market. We compete therefore, sir ith the regular trucking service from Mont- eal to Seven Islands for example, trucks oming in every day within hours of requests r goods, and this is the kind of service with

[*Interprétation*]

moyens de transport, nous rapproche davantage. Cela peut nous encourager à collaborer.

Ainsi, je songe aux services du gouvernement. Chacun d'entre nous à son propre service de pancartes indicatrices pour les routes. Le Nouveau-Brunswick a ouvert une nouvelle usine à Fredericton, l'an dernier, qui peut produire suffisamment de pancartes de signalisation pour toutes les provinces de l'Atlantique, ce qui veut dire que la production des pancartes y serait très efficace. Ce n'est qu'un exemple entre mille où les provinces pourraient collaborer. Mais la collaboration comporte également des problèmes de transport.

M. Trudel: Je vais être aussi bref que possible. J'ai deux questions que je voudrais poser. Je voudrais d'abord le féliciter de son mémoire.

Je crois qu'on a déjà établi la nécessité de trouver des marchés pour les produits de votre province. A l'heure actuelle, avez-vous un service de cabotage pour cueillir toutes les denrées destinées à l'exportation?

M. Campbell: Notre service de cabotage pour l'exportation des produits, sans tenir compte du service de transbordeur de Wood Islands qui reçoit une subvention de l'État, comprend un service de navigation de la Côte Nord subventionné conjointement par le gouvernement provincial et le gouvernement fédéral pour une somme de $80,000 par année. C'est un navire plutôt petit dont les installations de réfrigération sont limitées, qui offre un service hebdomadaire depuis les ports de l'île à Sept-Îles. Il ne fonctionne pas l'hiver, en raison des glaces, et en raison des possibilités très limitées pour le navire de naviguer dans ces conditions.

Nous avons aussi un service jusqu'à Terre-Neuve qui effectue le trajet une fois par semaine ou une fois tous les dix jours; ce service bénéficie également d'une subvention fédérale-provinciale, mais malheureusement, nous ne pouvons assurer une livraison régulière par ce service. Nous n'avons pas les installations voulues dans nos marchés pour pouvoir entreposer les pommes de terre dont les livraisons seraient réparties au cours de l'hiver.

Ce n'est pas un service qui nous encourage à assurer l'approvisionnement régulier de nos produits vers ce débouché. Nous faisons donc concurrence aux services de camionnage de Montréal jusqu'à Sept Îles, par exemple. Des camions qui arrivent chaque jour dans l'espace de quelques heures après qu'on a com-

[*Text*]

which we cannot compete with the present water shipments available to the province.

What I am talking about is a better ship, a bigger ship and I think that we can find the government has things to trade and private enterprise, and this could serve as a stimulant to private enterprise getting on a more regular basis and a better organized basis for trading as well.

Mr. Trudel: Mr. Premier, looking over the figures in your brief, you have mentioned, I believe, and I stand to be corrected, the ferry rates going from $2 to $3. You have also mentioned the projected figure of $1 billion over a 60 year period and I think you have used a 50 per cent increase on the rate and you also have used a 5 per cent decrease of the deficit now contemplated by the CNR. If I use the figures that you have mentioned, not having any of the others at my disposal at the present time, I would say that the rate on a self-sufficient basis to the users would have to be in the neighbourhood of $15 a crossing. Would that be correct?

Mr. Campbell: You speak on that subject with more authority than I can, sir, but I have indicated that the Stanford Research Institute's work was the basis upon which we came to the figure of $1 billion. There are quite a number of presumptions made in arriving at that figure.

Mr. Trudel: Have you any tables, sir, that you could present or add to your brief that would give us a factor on which we could base a judgment?

Mr. Campbell: Unfortunately that document is not a provincial document and therefore I am unable to offer the document to you, but I mentioned earlier that I hoped the Committee would have access to it and look beyond the year 2000 and the implications of the cost.

Mr. Trudel: Thank you, Mr. Chairman.

The Chairman: Mr. Rose.

Mr. Rose: Thank you, Mr. Chairman. Mr. Premier, although I am from British Columbia my father was born in Prince Edward Island and therefore I have some interest in your particular problems here. My ancestors moved from Prince Edward Island I suppose in search of greater opportunity. That is the story of the Island, is it not? You

[*Interpretation*]

mandé les denrées, et c'est le genre de concurrence que nous ne pouvons pas soutenir avec les services de transport maritime actuels.

Je veux dire qu'il nous faudrait un meilleur navire, un plus gros navire et je crois que nous constaterons que le gouvernement et les entreprises privées ont des marchandises à vendre, ce qui pourrait encourager les entreprises privées si nous avions un service plus régulier et si nous étions mieux organisés pour le commerce.

M. Trudel: Monsieur le premier ministre, en examinant les chiffres mentionnés dans votre mémoire, si je ne me trompe, vous avez mentionné que le tarif du transbordeur sera porté de $2 à $3. Vous avez aussi mentionné l'extrapolation d'un chiffre de $1 milliard sur une période de 60 ans, pour laquelle vous vous êtes servis d'une hausse de 50 p. 100 du tarif et d'une baisse de 5 p. 100 du déficit envisagé a l'heure actuelle par le CN. En me servant des chiffres que vous avez employés vous-même, n'en ayant pas d'autres à ma disposition à l'heure actuelle, je dirais qu'il faudrait que le tarif aux clients, si le service devait être autonome, soit d'environ $15 par traversée. Est-ce exact?

M. Campbell: Vous parlez avec plus de compétence que je ne le pourrais, monsieur, mais j'ai mentionné que nous nous étions basés sur les travaux du *Stanford Research Institute,* nous en étions arrivés au chiffre de 1 milliard de dollars. On a présumé de beaucoup de choses pour arriver à ce chiffre.

M. Trudel: Avez-vous des tableaux comparatifs que vous pourriez ajouter à votre mémoire et qui nous donneraient un facteur sur lequel baser notre décision?

M. Campbell: Malheureusement ce document n'est pas un document provincial et je ne puis donc vous l'offrir, toutefois, j'ai mentionné auparavant que j'espérais que le Comité aurait accès à ces documents et pourrait prévoir au-delà de l'année 2,000 en ce qui concerne les frais.

M. Trudel: Merci monsieur le président.

Le président: Monsieur Rose.

M. Rose: Merci, monsieur le président. M Campbell je me souviens, bien que je vienne de la Colombie-Britannique mon père est né à l'Île du Prince-Édouard et j'ai donc un certain intérêt envers votre province et ses problèmes. Mes ancêtres ont quitté l'île en cherchant probablement de meilleures occasions, mais n'est-ce pas justement là l'histoire de

[Texte]

ave relatively fewer people here now than ou had 50 years ago. Is that so?

Mr. Campbell: Relatively, yes. I believe the opulation at the time of Confederation was bout 96,000. It rose for some time and eached a peak and there have been very inor annual additions to the population. The end has been for approximately 1,000 young eople from this province leaving after eceiving their education here and seeking pportunities in the industrial centres of the ountry and travelling to the New England tates as well. We estimate the cost of educaion alone at $3 million a year for these young eople who are leaving the province.

We certainly hope that through develop- nent programs about to be initiated in the rovince we will be able to take greater dvantage of the resources which are here nd provide more jobs for these young people vho are so vital to the development of our rovince.

Mr. Rose: In spite of the enthusiasm locally or large families, still your population has ot gone up. Your argument is that you are roviding aid to the rest of Canada through he emigration of skilled young people.

Mr. Premier, I was very much interested in documentary I saw on television recently bout Prince Edward Island. I was also nterested in your brief that you presented his morning. In it you called for a compre- ensive plan of transportation and although you did not say so you indicated that trans- portation at this point had been proceeding on a sort of patchwork basis.

Could you go beyond that and suggest that you would be interested in a comprehensive plan for all forms of federal assistance to this area such as ARDA, FRED, equalization pay- ments?

Mr. Campbell: Very much so, yes.

Mr. Rose: You would agree, then?

Mr. Campbell: Very much so. We have been doing our best as a province to take advantage of federal aid schemes, and very often the schemes are national programs not designed with the special problems of this province or region in mind; very often we are unable to raise our share of the cost of those programs. The Trans-Canada Highway was a project of which we were responsible for 10 per cent of the cost, Prince Edward Island was one of the first provinces to complete

[*Interprétation*]

l'île? Vous avez moins de monde maintenant qu'il y en avait il y a cinquante ans, n'est-ce pas?

M. Campbell: Relativement oui, je crois que la population au moment de la Confédération était d'environ 96,000 personnes. Elle a augmenté pendant un certain temps et en est arrivée à un sommet; les additions annuelles à la population sont minimes. Mais la tendance actuelle est qu'environ 1,000 jeunes quittent la province après avoir été instruits ici et cherchent à s'établir dans les centres industriels du pays et même dans les états de la Nouvelle-Angleterre. Nous estimons à 3 millions de dollars par année le coût de l'instruction de ces jeunes qui quittent la province.

Nous espérons donc que, grâce aux programmes de développement d'expansion que l'on doit entreprendre dans la province, nous pourrons profiter plus des ressources qui sont les nôtres et assurer plus d'emplois à ces jeunes qui sont si nécessaires au développement de notre province.

M. Rose: Malgré l'enthousiasme local à l'égard des grandes familles, votre population n'a pas augmenté? Et alors vous prétendez que vous donnez de l'aide au reste du Canada par l'émigration de vos jeunes travailleurs qualifiés.

J'ai été très intéresssé par un documentaire que j'ai vu récemment sur l'Île du Prince-Édouard. Et votre mémoire ce matin m'a beaucoup intéressé aussi. Dans votre mémoire, vous demandez un programme d'ensemble sur le transport. Vous avez aussi laissé entendre que jusqu'à maintenant, les transports avaient été aménagés au hasard presque?

Est-ce que vous iriez plus loin et diriez que vous êtes intéressés à un programme d'ensemble pour toutes formes d'aide fédérale pour cette région, comme les programmes ARDA, FODER, les paiements de péréquation, etc.

M. Campbell: Oui, sûrement.

M. Rose: Vous êtes d'accord?

M. Campbell: Sûrement. Nous avons fait de notre mieux en tant que province pour profiter des programmes d'aide fédérale. Très souvent, il s'agit de programmes nationaux qui ne sont pas conçus en fonction des problèmes particuliers de cette province ou cette région et très souvent nous ne sommes pas en mesure de fournir notre part des coûts pour ces programmes. Par exemple, nous étions responsables du 10 p. 100 des coûts de construction de la route transcanadienne. L'Île du

[*Text*]

that project, but the 25 or 50 per cent of the cost of other road-building programs has been a cost of which we have found very great difficulty in meeting our share.

In ARDA programs and what have you, our use of that program has been limited indeed when we think of the great use which such provinces as Saskatchewan or Ontario have made of that program. It has involved on our part a 33⅓ or 50 per cent share and we have not in the past been able to take full advantage of these programs.

Mr. Allmand: A supplementary question, Mr. Chairman.

The Chairman: Mr. Allmand.

Mr. Allmand: Mr. Premier, do you therefore think that in making any proposals with respect to a new MFRA, or widespread amendments to MFRA, we should consult very closely with the new Minister of Regional Economic Expansion, who may have other plans for the total development of the area?

Mr. Campbell: Yes, I should hope this Committee would. I should hope that all departments would keep this in mind. I would suggest a warning that there are quite a number of federal departments actively involved in various programs and projects here in the Atlanic provinces and I believe that there will be a tendency for these departments to suggest, in response to a request coming from this province for some work, that they pass it over to Jean Marchand and ask him to do it through the development plans and I think we are going to have to be very careful about this.

The Department of Public Works has an obligation for maintaining wharves, for example. I would not want the Department of Public Works to be saying, "This is something we do not have to charge up to our budget; pass it over to Marchand and let him do that development plan and charge it up somehow."

Mr. Allmand: But you would like us to consult.

Mr. Campbell: But I should think that there must certainly be a greater degree of co-operation between federal departments and between provincial departments on these projects. Certainly we are aware of difficulties at Port Hawkesbury in Nova Scotia. Eleven departments of the federal government or agencies, I believe, were affected by the

[*Interpretation*]

Prince-Édouard a été l'une des premières provinces à terminer sa part de la route. Mais pour ce qui est des 25 ou 50 p. 100 des autres programmes de construction de routes, il est très difficile pour nous de payer notre part.

Pour les programmes de l'ARDA ou autres, nous n'avons profité que très peu de ces programmes quand on songe par exemple à la Saskatchewan et à l'Ontario qui ont su en profiter beaucoup plus. Mais notre apport a quand même été de 33⅓ ou de 50 p. 100 et, dans le passé, nous n'avons pas pu profiter pleinement de ces programmes.

M. Allmand: Une question supplémentaire, monsieur le président.

Le président: Monsieur Allmand.

M. Allmand: Monsieur le premier ministre, est-ce que vous croyez alors que pour formuler des propositions pour une nouvelle Loi sur les taux de transport des marchandises dans les provinces Maritimes que nous devrions consulter de très près le nouveau ministre du Développement économique régional qui aurait peut-être d'autres projets pour la région.

M. Campbell: Oui, j'espère que le Comité le fera. J'espère que tous les ministères en tiendront compte et j'aimerais toutefois formuler une mise en garde. Il y a certains ministères du gouvernement fédéral qui sont impliqués dans des programmes ici dans les provinces de l'Atlantique. J'ai l'impression que certains ministères auront peut-être tendance à suggérer, en réponse à une demande qui viendrait de cette province pour avoir certains travaux, que cela soit passé à M. Jean Marchand et qu'on lui demande de le faire en vertu du programme d'aménagement régional. Je crois qu'il faudra faire bien attention à cela.

Le ministère des Travaux publics doit entretenir les quais. Je ne voudrais donc pas que le ministère des Travaux publics dise «Voilà une chose qui n'est plus comprise dans notre budget; passons-la à M. Marchand qui la fera dans le cadre du programme de développement et la créditera quelque part.»

M. Allmand: Vous voudriez toutefois qu'il y ait consultation.

M. Campbell: Il doit certainement y avoir beaucoup plus de collaboration entre les ministères fédéraux et entre les ministères provinciaux pour ces projets. Je suis conscient des difficultés qui existent à Port Hawkesbury en Nouvelle-Écosse. Onze ministères du gouvernement fédéral ou agences du gouvernement fédéral ont été touchés par la pro-

[*Texte*]

proposal there, and 11 departments of government agreed that this was a wise move and that all departments and agencies would lend their support to the project. It took one year to cut through all the red tape of the willing partners to get the things jelled and agreements and arrangements worked out.

The Chairman: Mr. Rose.

Mr. Rose: Mr. Premier, although this Committee sits as a transportation committee I believe its justification is whatever it does, and the recommendation that is here is justified because it is vital to the whole economy of the particular area. Someone suggested a little earlier that some of the farmers were going to be getting rich on these transportation subsidies. Have you any evidence of this?

Mr. Campbell: We do not have very much evidence of this, no.

Mr. Rose: Also, would you agree that transportation is perhaps only one part of the cost factor that makes a farmer or a fisherman less than competitive in this particular area?

Mr. Campbell: In some instances, only a very small part—only 2 or 3 per cent of the cost of the package on the market.

Mr. Rose: Therefore, there are probably other factors that are much more important than transportation?

Mr. Campbell: There are other urgent areas as well, but accommodating all those other areas we could still fail if we are unable, through an efficient and reasonably costed transportation service, to move into those markets.

Mr. Rose: It would assist. But this is one of the problems—whether it actually does; whether a subsidy to a trucker or to a rail line actually trickles down to the people who need it most, and this has been of concern throughout the hearings. Could you tell me how much of the potato dollar gets back to the farmer?

Mr. Campbell: Of course the potato prices have ranged from one cent a pound to three cents a pound over the last four or five years and it has been mostly a cent a pound or less, but this is the market price. During the last three years the potato farmer has hardly been able to cover his cost of production when all other costs are taken out.

[*Interprétation*]

position là-bas, et onze ministères du gouvernement ont convenu qu'il s'agissait d'une bonne chose et que toutes les agences appuieraient le projet. Il a fallu un an pour éliminer toutes les difficultés et les complexités de la part de ceux qui voulaient être les partenaires et en arriver à des accords.

Le président: Monsieur Rose.

M. Rose: Monsieur le premier ministre, bien que le Comité soit le Comité des transports et communications, je crois que les recommandations qu'il entend à n'importe quel sujet sont justifiables en raison du fait que cela est nécessaire pour l'économie de la région dans son ensemble. Plus tôt quelqu'un a dit que les cultivateurs pourraient peut-être devenir riches en raison de ces subventions aux transports. Avez-vous des preuves à ce sujet?

M. Campbell: Non, nous n'avons pas de preuve à ce sujet.

M. Rose: Est-ce que vous seriez aussi d'accord que les transports sont un seul aspect du facteur coût qui fait que l'agriculteur ou le pêcheur est moins concurrentiel dans ce domaine?

M. Campbell: Dans certains cas une très petite partie, peut-être 2 ou 3 p. 100 des frais en cause pour le produit rendu sur le marché.

M. Rose: Il y a donc certains autres facteurs qui sont plus importants que les transports?

M. Campbell: Il y a d'autres besoins importants aussi, mais, même si nous réglions tous ces autres facteurs, nous échouerons si nous ne pouvons commercialiser le produit grâce à un service efficace et peu coûteux.

M. Rose: Cela pourrait aider. Mais voilà un des problèmes, est-ce que cela aide vraiment? Est-ce qu'une subvention à une compagnie de camionnage ou de chemins de fer aide finalement ceux qui en ont le plus besoin? C'est un problème qui a été exprimé durant toutes nos séances. Pourriez-vous nous dire quelle proportion du dollar pour les pommes de terre revient au cultivateur?

M. Campbell: Les prix pour les pommes de terre ont évolué entre un et trois cents la livre depuis quatre ou cinq ans, d'habitude c'est un cent la livre ou moins mais c'est le prix du marché. Depuis trois ans, le cultivateur de pommes de terre n'a presque pas pu récupérer ses frais de production lorsqu'on enlève tous les autres frais.

[*Text*]

Mr. Rose: Brokerage costs, shipping costs...

Mr. Campbell: The cost of bags, the cost of production.

Mr. Rose: You mentioned a mountain of bureaucracy when we were discussing the causeway. Does the potato industry suffer from a similar problem?

Mr. Campbell: There is an area of great improvement in the potato industry of Prince Edward Island and that of the Maritimes, but I think that we are talking about all areas and influences affecting the industry, from the selection of the seed to the method of growing, to the management of the farm, to the approach to marketing, to the marketing facilities available to the industry and to the way in which the industry will market the product. Transportation is, however, very vital to the potato industry and a very important factor.

Mr. Rose: Did the increase of the tariff rates, sir, in September 1967 affect the trucking rates?

Mr. Campbell: Would you address that question, sir, to the person giving the trucking brief?

Mr. Rose: Yes, I will hold it. As a matter of fact, I believe I read it in another brief and I have forgotten. Would you agree with the concept of an Atlantic free trade area because the line under Confederation has severely inhibited your natural markets?

Mr. Campbell: Naturally we would want to look very carefully at the implications. The idea of free trade with New England and other areas very attractive to us, but the suggestion made in response in Ottawa recently was that the tariff wall would be placed at the Quebec or Ontario border. Certainly we would want to look at this very carefully before we jumped from one situation into another.

Mr. Rose: Yes. This is my final question and perhaps it is facetious. You mentioned that one of your problems was the importation of gravel. It might be suggested, since we just came from Newfoundland, that they might be interested in some of your soil. You might be able to work out a reciprocal arrangement.

[*Interpretation*]

M. Rose: Les frais de courtage, d'expédition ...

M. Campbell: Le coût des sacs et de la production.

M. Rose: Vous avez mentionné une énorme machine bureaucratique tout à l'heure quand vous avez parlé de la chaussée. Est-ce que l'industrie de la pomme de terre souffre du même problème?

M. Campbell: L'industrie de la pomme de terre à l'île du Prince-Édouard et dans les provinces Maritimes, il y a certainement beaucoup d'améliorations à faire à cet égard mais je crois que nous parlons de tous les secteurs et toutes les influences qui jouent, à compter du choix de la semence jusqu'à la méthode de culture, l'administration même de la ferme, les débouchés accessibles à l'industrie, et la façon même dont l'industrie va commercialiser ou va mettre en marché son produit. Toutefois, dans l'industrie de la pomme de terre, les transports sont essentiels pour l'industrie et constituent un facteur très important.

M. Rose: Est-ce que l'augmentation du tarif en 1967 a affecté les taux de transport par camion?

M. Campbell: Est-ce que vous pourriez poser cette question, monsieur, à la personne qui va vous présenter le mémoire sur le camionnage.

M. Rose: Très bien, je vais attendre. De toute façon, je crois que je l'ai vu dans un autre mémoire mais j'ai oublié le chiffre. Est-ce que vous appuyez l'idée d'une zone d'échange libre dans les provinces de l'Atlantique parce que depuis la Confédération vos marchés naturels ont été restreints.

M. Campbell: Évidemment, il nous faudrait étudier sérieusement les effets, mais l'idée d'un commerce avec les États de la Nouvelle-Angleterre nous attire beaucoup, mais la réponse qu'on a reçue à Ottawa dernièrement, c'est que la barrière tarifaire serait établie à la frontière de l'Ontario ou du Québec. Nous voudrions alors examiner très attentivement ces possibilités avant de passer d'un état de choses à un autre.

M. Rose: Une dernière question. Vous avez dit qu'un de vos problèmes était l'importation du gravier. Comme nous venons tout juste d'arriver de Terre-Neuve il se pourrait que la province soit intéressée à obtenir un peu de votre sol. Vous pourriez peut-être en arriver à un accord réciproque avec eux à ce sujet.

[*Texte*]

Mr. Campbell: We can list quite a number of items which Newfoundland has to export, and gravel is one. Hardboard, lime, quite a number of things could serve as the basis of very effective trade between these provinces.

Mr. Rose: Thank you very much.

The Chairman: Mr. McCleave.

Mr. McCleave: First, Mr. Premier, I want to congratulate you on your comprehensive and lucid brief. I want also to confirm what you suggested from personal experience, that as far as the regional air carriers are concerned the connections to almost anywhere in Canada have become worse since the initiation of the direct flight from Charlottetown to Montreal.

I have a couple of questions which would more properly be addressed to the regional air carrier or to someone else, but perhaps you might be able to enlighten the Committee with regard to this. In your opinion if Air Canada had one of its flights originating in St. John's, Newfoundland—one of the many flights that go daily from St. John's to Montreal and Toronto—with the accent on air freight and were to make Charlottetown a regular stop, do you not agree that there would be quite a potential for air freight moving in both directions, to Newfoundland and to Montreal, as well as being a convenience in passenger service?

Mr. Campbell: I am not altogether convinced, sir, that our air freight requirements can best be served by a regular Air Canada run between St. John's stopping at Charlottetown and going to Montreal, because this is not really aimed directly at our markets.

It is the city of Boston that wants fresh berries. It is the City of St. John's or Stephenville or Labrador City or Churchill Falls that many want our agricultural products. I do not think we are answering the problem by the courtesy service which Air Canada would offer by stopping at Charlottetown on its way from St. John's to Montreal.

It would be helpful, but I doubt very much that it would be the pattern of traffic that we would seek to project Prince Edward Island shippers into the jet cargo age.

Mr. McCleave: Has it been argued that such a service would make the present direct flight from Charlottetown to Montreal noneconomic?

[*Interprétation*]

M. Campbell: Nous pourrions vous donner toute une liste de choses que Terre-Neuve doit exporter et le gravier en est une. Les planches murales, la chaux et toutes sortes de choses qui pourraient justement servir de base à un excellent commerce entre les deux provinces.

M. Rose: Merci beaucoup.

Le président: Monsieur McCleave.

M. McCleave: Tout d'abord, monsieur le premier ministre, je veux vous féliciter de votre mémoire très détaillé et lucide. Je veux dire que ce que vous avez suggéré d'après votre expérience personnelle en ce qui concerne les transporteurs aériens régionaux, les correspondances pour n'importe quel point au Canada ont empiré depuis l'introduction du vol direct entre Charlottetown et Montréal.

J'aurais quelques questions à poser et qui s'adresseraient peut-être mieux au transporteur aérien régional ou à quelqu'un d'autre, mais vous pourriez toutefois essayer d'informer le Comité à ce sujet. A votre avis, si un des vols d'Air Canada partait de St-Jean (Terre-Neuve), un des nombreux vols quotidiens entre St-Jean, Montréal et Toronto, transportant surtout des marchandises et arrêtait régulièrement à Charlottetown, ne croyez-vous pas qu'il y aurait de grandes possibilités pour le transport aérien des marchandises entre Terre-Neuve et Montréal, dans les deux sens et que cela serait évidemment utile au service voyageurs?

M. Campbell: Je ne suis pas tout à fait convaincu que nos besoins en matière de service marchandises aérien soient mieux comblés par un service régulier d'Air Canada qui s'arrêterait à Charlottetown en route pour Montréal, car cela ne s'adresse pas directement à nos marchés.

C'est la ville de Boston qui veut obtenir nos fruits frais. Ce pourrait être les villes de St-Jean, Stephenville, Labrador City ou Churchill Falls qui voudront nos produits agricoles. Je ne crois pas qu'on résolve grâce au service de courtoisie qu'Air Canada offrirait en s'arrêtant à Charlottetown en route pour Montréal et en provenance de St-Jean (Terre-Neuve).

Cela aiderait, mais je doute que cela soit le genre de trafic que nous voudrions avoir pour projeter les expéditeurs de l'Île du Prince-Édouard dans l'ère des réactés.

M. McCleave: Est-ce qu'on a déjà dit qu'un tel service rendrait le vol direct actuel de Charlottetown à Montréal non rentable?

[*Text*]

Mr. Campbell: We have not studied in any great detail Air Canada air cargo service between Charlottetown and Montreal. We did, however, make inquiries of Air Canada as to whether or not one of its three daily return flights between Halifax and Montreal might stop here in Charlottetown. They were concerned first about the effect that service might have on the regional carrier and the business it would draw from the regional carrier. It was also concerned about the minimal traffic that would offer such a passenger service.

Mr. McCleave: It is said that the regional carrier intends to introduce DC-9 service on this route to Montreal in the near future.

Mr. Campbell: Yes.

Mr. McCleave: I understand that has been delayed. Is that correct?

Mr. Campbell: I think the brief suggested that the work on the airport is being delayed, and that suggests to me that the regional carrier would have very real difficulty in bringing its DC-9 service into Prince Edward Island if the runway is not there and if the navigational aids are not there.

Mr. McCleave: Thank you.

The Chairman: Mr. Perrault.

Mr. Perrault: Mr. Chairman, as others have said, the Premier is to be congratulated for the excellence of the brief which he has brought to our Committee this morning and for the durability he has demonstrated this morning under long questioning. I know that certainly, together with most Canadians, I feel Prince Edward Island has contributed to this country well beyond the number of people who have been born here, and it is a pleasure for me to be here for the first time.

I am going to try to keep my questions as to the point as possible because time is moving along. Mr. Premier, in your brief you were very critical of the Canadian National Railways and I am sure members of the Committee would appreciate a particularization of the alleged deficiencies of the Canadian National Railways.

You could not do it this morning, but I wonder, in view of the fact, Mr. Chairman, that we are going to have CN representatives testify before the Committee in Ottawa, whether it would be possible to obtain from you a detailed account, a factual summary, which we could study in Ottawa and perhaps confront CN representatives with that sum-

[*Interpretation*]

M. Campbell: Nous n'avons pas étudié en détail le service marchandises d'Air Canada entre Charlottetown et Montréal. Toutefois, nous avons demandé à Air Canada si l'un de ces trois vols quotidiens aller et retour entre Halifax et Montréal ne pourrait pas s'arrêter ici à Charlottetown. Air Canada se préoccupait tout d'abord des effets que ce service aurait sur le transporteur régional qui verrait diminuer sa clientèle, ainsi que le trafic minimum qu'offrirait un tel service voyageurs.

M. McCleave: On dit que le transporteur régional a l'intention d'introduire sous peu un service par DC-9 sur le parcours de Montréal.

M. Campbell: Oui.

M. McCleave: Et j'ai cru comprendre que cela a été retardé? Est-ce exact?

M. Campbell: Je crois que le mémoire suggère que le travail d'aménagement de l'aéroport a été retardé, ce qui me fait penser que le transbordeur régional aurait beaucoup de difficultés à introduire un service par le DC-9 à l'Île du Prince-Édouard où les instruments de navigation de la piste n'existent pas.

M. MacLean: Merci.

Le président: Monsieur Perrault.

M. Perrault: Monsieur le président, comme les autres l'ont dit, on doit féliciter le premier ministre de l'excellence du mémoire qu'il a présenté au Comité ce matin ainsi que de l'endurance dont il a fait preuve en face de toutes les questions qui lui ont été posées. Je sais que l'Île du Prince-Édouard a contribué à notre pays dans une mesure bien supérieure au nombre de personnes qui y sont nées, et c'est un plaisir pour moi de visiter l'Île pour la première fois.

Je vais essayer de poser des questions aussi pertinentes que possible car le temps passe. Monsieur le premier ministre, dans votre mémoire vous avez fortement critiqué les Chemins de fer nationaux du Canada et je sais que les membres du Comité aimeraient avoir des détails sur les déficiences qui existent selon vous au National-Canadien.

Vous ne pouvez pas le faire ce matin, mais vu le fait que les représentants du National-Canadien vont témoigner devant le Comité à Ottawa, ne serait-il pas possible d'obtenir de votre part un résumé des faits que nous pourrions étudier et qui nous aiderait lorsque les fonctionnaires du National-Canadien seront devant nous à ce moment-là. Je crois que cela

[*Texte*]

mary at that time. It would be helpful to us, I think, Mr. Chairman, if that were made available.

Mr. Campbell: Mr. Chairman, I would be very happy to provide a summary of the list of items and complaints that would more specifically back up and support the generalization that the brief offers.

I want to tell the members of your Committee, Mr. Chairman, that I have personally noted and I have recognized publicly on three different occasions the gratification of the government of Prince Edward Island with the new attitude of the CNR in the last several months, and I would say, gentlemen, that the appointment of Mr. Graham Macdougall as a Vice-President of the railway in charge of the Atlantic provinces services has been central to a new approach which the railway appears to be taking here in the Atlantic provinces.

As a secretary of a board of trade quite a few years ago in Prince Edward Island trying to get a railway station painted or the restaurant services opened on the ferry before the ship left, as a member of the Legislature, as a member of the government, I found until recently that there was a very fixed attitude taken by CNR—that we could not afford it or that we did not have the money or what have you. I believe that that attitude is changing, and we welcome the approach, which appears to be taken today by the officials of the CNR, of indicating a willingness to sit down with us to look at long-range requirements for the region and to work out as best they can a transportation service appropriate to the needs here. Mr. Macdougall and his regional officers will require a good deal of support from the decision-makers in his head office. It will have to be well understood by those who are in a position to commit the funds of the CNR that the Atlantic Provinces are not presently well served, and that it will cost that Company some money and cost the country some money to upgrade the services to meet the needs of the Atlantic region.

Although I have talked about a haphazard approach I want to place on record recognition of the more forward-looking approach that seems to be the order of the day today, but even in his best efforts he will require the support of the national executive.

Mr. Perrault: Mr. Chairman, presumably the suggestions contained on pages 9 and 11 of this brief constitute what Prince Edward Island feels should be the package of federal assistance which may be required. I would like to ask some questions on their proposals.

[*Interprétation*]

nous aiderait, monsieur le président, si nous pouvons obtenir ce résumé.

M. Campbell: Monsieur le président, je serais très heureux de vous fournir un résumé des choses ou des plaintes que nous avons et qui seraient à l'appui du commentaire général contenu dans le mémoire.

Je voudrais dire aux membres du Comité, monsieur le président, que personnellement j'ai constaté et j'ai reconnu en public à trois occasions différentes la reconnaissance du gouvernement de l'Île du Prince-Édouard envers la nouvelle attitude du CN depuis quelques mois. Je vous dirais messieurs que la nomination de M. Graham MacDougall comme vice-président responsable du service pour les provinces de l'Atlantique est la base de cette nouvelle attitude de la part des Chemins de fer vis-à-vis des provinces de l'Atlantique.

Comme le secrétaire d'une chambre de commerce de l'Île du Prince-Édouard qui essayait d'obtenir qu'une gare soit peinturée ou qu'on ouvre les services d'un restaurant sur le traversier avant les départs de navire, comme membre de la législature, comme membre du gouvernement, j'ai constaté que, jusqu'à très récemment le CN avait adopté une atttiude rigide en disant qu'on n'avait pas les fonds voulus pour le faire et qu'il était impossible de le faire.

Je crois que cette attitude change maintenant. Nous sommes très heureux de l'attitude que semblent prendre aujourd'hui les fonctionnaires du CN. Ils semblent disposés à examiner avec nous les besoins à long terme de la région et à essayer d'en arriver, le plus possible, à un service de transport qui serait approprié à nos besoins. M. MacDougall et ses fonctionnaires régionaux auront besoin d'un très grand appui de la part de ceux qui prennent les décisions au siège social. Ceux qui engagent les fonds du CN devront bien comprendre que les provinces de l'Atlantique ne sont pas bien desservies à l'heure actuelle et que cela va coûter à la compagnie et au pays pour améliorer les services, afin de répondre aux besoins des provinces de l'Atlantique. Même si j'ai parlé d'une approche au hasard, je voulais insister sur l'attitude plus progressive qui semble exister aujourd'hui. Même dans ses meilleurs efforts, il aura besoin de l'appui des fonctionnaires nationaux.

M. Perrault: Monsieur le président, les suggestions que l'on trouve aux pages 9 et 11 du mémoire constituent ce qui, selon l'Île-du-Prince-Édouard, devrait être le projet d'ensemble pour l'aide fédérale. Je voudrais donc poser des questions au sujet des propositions.

[*Text*]

You have suggested the extension of the subsidy provisions of the Maritime Freight Rates Act to motor transport. The suggestion is that subsidy benefits be payable to the shipper.

I would like to ask the Premier whether he would dispute another view expressed in this maritime tour, that a shipper subsidy would merely be an additional increment to operating revenues and that a shipper's needs could be better supplied in other ways, either through capital loans or the establishment of co-operative distribution facilities of some type?

This has been another view expressed in the Maritimes—that there is no way of assuring that this is really going to improve the competitive situation of industry on the Island.

Mr. Campbell: This is a very good question. What we are anticipating is the withdrawal, under federal policy, of established, fixed rates assistance, and this is what we are trying to respond to by, first of all, insisting on the need for some continued assistance. Perhaps not all of our industries, or not all of our shippers, require this assistance and they are just simply taking advantage of it because it is there, but I have illustrated the need for continuing assistance on bulk commodities moving.

Many of our shippers are very small shippers indeed, and the rates imposed have affected them adversely. They are not shipping out regular carlots of canned chicken to central distribution points. The nature of their business is to ship a few cases here and there and the rates have very seriously affected the nature of their operations.

Mr. Perrault: It might be difficult to apply such a subsidy, though. Do you see any possibility of a carrier, aware of a government contribution to the shippers' transportation costs, reacting by applying an appropriate increase in the rate? And should there be universal application of the shipping subsidy to both deserving and inefficient operators? This is a problem you have touched on.

Mr. Campbell: Yes. I was just going to add sir, that you will be hearing from the Maritime Motor Transport Association and from the Prince Edward Island truckers. I do not think they will argue that they are today

[*Interpretation*]

Vous avez proposé l'extension au transport routier des dispositions de subvention de la Loi sur les taux de transport des marchandises dans les provinces Maritimes. Nous avons entendu dire que les subventions C devraient être payées aux expéditeurs. Je voudrais donc demander au premier ministre, s'il est aussi d'avis que cette subvention ne constituerait qu'une augmentation des revenus d'exploitation et que les besoins de l'expéditeur pourraient être mieux satisfaits d'une autre façon, soit au moyen de prêts de capital ou par l'établissement de services coopératifs?

On a entendu dire dans les provinces Maritimes, qu'il n'y a aucun moyen d'assurer que cela améliorera la situation concurrentielle de l'industrie dans l'île.

M. Campbell: Excellente question. Ce que nous prévoyons, c'est le retrait, en fonction de la politique fédérale, des subventions fixes pour les tarifs de transport, et nous nous efforçons de l'empêcher en insistant d'abord sur la nécessité de maintenir une forme d'aide. Peut-être que ce ne sont pas toutes les industries ni tous les expéditeurs qui en ont besoin, mais ils en profitent simplement parce qu'elle existe; j'ai toutefois essayé de vous montrer la nécessité de continuer à subventionner le transport en vrac.

Plusieurs de nos expéditeurs sont de très petits expéditeurs et les tarifs imposés ont eu des résultats néfastes pour eux. Ils n'expédient pas des chargements complets de poulet en boîtes à des points centraux de distribution. La nature de leur commerce est telle qu'ils expédient quelques boîtes seulement à la fois, ici ou là, et les tarifs ont nui sérieusement à leur exploitation.

M. Perrault: Il serait peut-être impossible d'appliquer une subvention de ce genre. Est-ce que le transporteur, conscient de la contribution de l'État aux frais de transport de l'expéditeur, réagirait en haussant son tarif d'autant? Est-ce qu'on devrait accorder la subvention à tous les expéditeurs, à ceux qui la méritent et aux entreprises inefficaces aussi? C'est un problème auquel on ne s'est pas arrêté.

M. Campbell: Oui, j'allais justement ajouter, monsieur, que vous recevrez un mémoire de l'Association des camionneurs des provinces Maritimes et de l'Association des camionneurs de l'Île-du-Prince-Édouard. Je ne crois

[*Texte*]

competitive with the CNR. They have very real difficulty in providing competitive services, especially because of the bottleneck on the Northumberland Strait.

Then the suggestion that our truckers, or the trucking industry, begin to move their goods at some time later, or after midnight, or something like that, suggests again another element of discrimination.

We do not enjoy a competitive trucking industry in Prince Edward Island. There is no great rush by large national trucking firms to establish regular shipments here, and our own industry has had very real difficulty in competing. This is why we feel that if some measure were possible to allow a shipper to decide which mode he would choose, and if the truckers were given a fair opportunity relative to the Northumberland crossing, and if assistance presently available to the railways was also available to the trucking industry, we would find a more competitive atmosphere between the CNR and the truckers.

Mr. Perrault: Mr. Premier, may I ask, very briefly, whether you believe that this should be a complete package? Is it a matter of causeway construction and extended subsidies, or causeway in place of extended subsidies? In other words, are you asking for full federal support for the Northumberland Strait crossing, provision of truck terminals in the larger centres of the region, and extension of all other highways to provide a linkage with all rural arterial and main truck highways in this province? Is this to be a complete federal involvement on the points you have set forth?

Mr. Campbell: We are not in a position today to suggest such a package. If the causeway were to become a fact—and this is away up in the air right now—I would expect that the trucking industry would become more interested in trading in Prince Edward Island, would provide additional facilities to carry commodities to Prince Edward Island and that our reliance upon subsidy aids might be lessened...

Mr. Perrault: It could considerably reduce your need for subsidies?

Mr. Campbell: Yes.

Mr. Perrault: I have just one further question. Do you regard transportation subsidies to this province, or the shipper subsidies to

[*Interprétation*]

pas qu'ils vous diront qu'ils peuvent concurrencer avec le CN à l'heure actuelle. Ils éprouvent beaucoup de difficultés à offrir un service concurrentiel, particulièrement, en raison de l'embouteillage du détroit de Northumberland.

La proposition faite aux camionneurs, ou à l'industrie du camionnage, pour qu'ils commencent à transporter leurs marchandises beaucoup plus tard, après minuit, par exemple, est un autre élément de discrimination.

Nous n'avons pas une industrie de camionnage concurrentielle dans l'Île du Prince-Édouard. Et les grandes entreprises nationales de camionnage ne sont pas tellement pressées à établir un service régulier ici, et nos propres camionneurs ont donc beaucoup de difficultés à concurrencer. C'est pourquoi nous trouvons que s'il y avait moyen de laisser à l'expéditeur le choix du mode de transport et de donner aux camionneurs une chance à l'égar de la traversée du détroit de Northumberland, et que les subventions présentement versées aux chemins de fer étaient étendues aux camionneurs, il y aurait plus de concurrence entre eux et le CN.

M. Perrault: Je voudrais vous demander brièvement si vous croyez que ce devrait être un tout. Est-ce une question d'aménagement de la chaussée et d'extension des subventions ou la construction d'une chaussée au lieu d'étendre les subventions? Autrement dit, est-ce que vous demandez l'appui total du fédéral pour la traversée du détroit de Northumberland, la construction de terminus pour le transport routier dans les grands centres urbains de la région, le prolongement de toutes les routes afin d'assurer un lien avec toutes les routes principales ou secondaires de cette province? Est-ce que le gouvernement fédéral doit participer d'emblée aux points que vous avez énumérés?

M. Campbell: Nous ne sommes pas en mesure aujourd'hui de proposer un tel arrangement global. Si la chaussée devait se réaliser, et il n'y a rien de bien arrêté encore, l'industrie du camionnage serait beaucoup plus intéressée à faire le commerce avec l'Île du Prince-Édouard, à assurer des services additionnels pour le transport des marchandises à l'Île du Prince-Édouard et nous compterions moins sur les subventions...

M. Perrault: Vous auriez possiblement moins besoin de subventions?

M. Campbell: Oui.

M. Perrault: Une autre question. Considérez-vous que les subventions accordées au transport dans cette province ou aux expédi-

[*Text*]

the province and the Maritimes, as a right to be extended in perpetuity, as a condition of Confederation, or do you contemplate a time when subsidies can be discontinued? And is it a realistic national policy to subsidize shippers in one part of Canada and not in others?

Mr. Campbell: I think it can become sufficiently efficient. I think that there will be a day when we do not rely upon these subsidies, but until there is a good-risk, competitive transportation system available to us our reliance upon subsidies will not diminish.

Mr. Perrault: And you are including subsidies, of course, for shipments to the United States. Do you think that that right should be extended to other sections of agriculture in Canada which may be in trouble and having difficulty shipping, or should it be confined just to the Maritimes?

Mr. Campbell: We are trying to get on our feet, sir, and there are many mitigating factors. There is no commitment at the moment from the present government to build the causeway, and without that we are being asked to consider the withdrawal of subsidies.

There are no modes of effective competitive transportation available, where the carriers are competing in price, and we are therefore left in the very difficult position of being asked to entertain the withdrawal of certain forms of subsidy without really knowing what the alternatives are and of only being able to speculate that the conditions will worsen unless some of these problems are solved.

Mr. Perrault: Thank you, Mr. Chairman.

Mr. Macquarrie: Mr. Chairman, I am not at the moment sure whether or not the process of ordination and induction of Mr. MacLean and I has been completed, and we are fully endorsed as members of this august body, but I would like to begin by saying a word of welcome to this province and to this constituency to my colleagues who are not from this province.

I would like to say, too, that I share the general opinion which has been expressed about the Premier's brief. There is only one thing I might take exception to, and it is a technical one. I cannot believe that a flight which commences in Charlottetown and stops at Charlo is in fact a direct flight. If one finds it impossible to complete the Charlo-Montreal

[*Interpretation*]

teurs vers la province et les Maritimes, un droit qu'il faut perpétuer, comme une condition d'entrée en Confédération ou est-ce que vous envisagez qu'à un moment les subventions seront discontinuées? De plus, est-ce une politique nationale réaliste que de subventionner les expéditeurs dans une région du Canada et non pas dans les autres?

M. Campbell: Je crois que ce pourrait être efficace. Je pense que le jour viendra où l'on ne comptera plus sur ces subventions, mais jusqu'à ce que nous ayons un système de transport concurrentiel et qui ne comporte pas trop de risques, il nous faudra encore compter sur les subventions.

M. Perrault: Ceci comprend les subventions pour les expéditions aux États-Unis, n'est-ce pas? Croyez-vous qu'il faudra l'étendre aux autres secteurs agricoles du Canada qui éprouvent des difficultés à expédier leurs marchandises, ou qu'il faut le restreindre aux Maritimes?

M. Campbell: Nous essayons de nous remettre sur pied, et il y a tellement de facteurs qui entrent en jeu. Le gouvernement actuel ne s'est pas engagé à aménager la chaussée, et sans cet engagement on nous demande de songer au retrait des subventions.

Il n'y a pas de modes de transport concurrentiels efficaces à l'heure actuelle, où les transporteurs se font la concurrence tarifaire, et par conséquent, nous nous trouvons dans la situation vraiment difficile où on nous demande de songer au retrait de certaines formes de subventions sans connaître les solutions de rechange et nous ne pouvons que prévoir que les conditions vont se détériorer à moins de trouver une réponse à ces problèmes.

M. Perrault: Merci beaucoup, monsieur le président.

M. Macquarrie: Monsieur le président, je ne suis pas tout à fait sûr en ce moment si le processus de classification et d'induction de M. MacLean et moi-même est terminé, et que nous sommes membres attitrés de cette auguste assemblée, mais je voudrais, tout d'abord accueillir dans cette province et cette circonscription, mes collègues qui ne sont pas de la province.

Je voudrais vous dire aussi que je partage l'opinion générale formulée à l'égard du mémoire du premier ministre. La seule chose auquelle je puis m'en prendre, est une question technique. Je ne crois vraiment pas qu'un vol qui part de Charlottetown et qui arrête à Charlo est un vol direct. Si l'on se voit dans l'impossibilité de poursuivre le

[*Texte*]

eg and remains in Charlo one would wish hat one were in Moncton, in terms of making ome other arrangements.

Can the Premier elaborate a bit on the listurbing item at the top of page 15? For ears I have heard rumours, emanating from he Canadian National Railways affecting our ervice, and nearly always the unfortunate nes prove to be borne out in fact. Is this roposal anywhere close to a formal propos-l? It surely is not before the Commission. Have you received definite indication, or is his in fact a rumour?

Mr. Campbell: It is more than rumour, sir. t is information that has come to me very ecently from the Minister of Transport. It vas therefore felt important enough to nclude in the brief.

There has been some speculation that this kind of rate increase would be applied, but I am afraid that the rumour has now jelled into something more specific and more definite.

Mr. Macquarrie: The last time the rates were increased there were indications that the Commission would hold hearings here, and they did not eventuate. I would hope that we might be forewarned this time.

I was for a moment frightened, when I read this and heard it from you, that my good friend, Mr. Kierans, may have taken over the Department of Transport. He and I have been arguing about other rates.

I was wondering, too, about your definition of the bureaucratic mountain. I agree with what you say about the bureaucratic mountain, but I would say that a bureaucrat is anyone who works in an office, not just in the back office; it could be in the front, as well.

You invited me, in particular, I think, to testify about the air service. I can do that with great brevity but with immense sincerity. I left Ottawa at midnight to be here for these sessions. That I wanted to come only for the afternoon session I would still have had to leave Ottawa at midnight to make it, and had I wanted to be here to have dinner with you at 6 o'clock I would still have had to leave Ottawa at midnight last night to make it. So we have certain reservations and inhibitions about our participation in the jet age. And I underscore exactly what you say.

[*Interprétation*]

voyage de Charlo à Montréal et qu'on doive rester à Charlo, on préférerait se trouver à Moncton où on peut prendre d'autres dispositions.

Je me demandais si le premier ministre ne pouvait pas élaborer un peu plus quant au point inquiétant qui figure au haut de la page 15? Pendant des années, j'ai entendu des rumeurs venant du National Canadien à l'égard de notre service et presque toujours ce sont les rumeurs désavantageuses qui se sont matérialisées. Est-ce que cette proposition est une proposition en bonne et due forme? La Commission n'en est certainement pas saisie. Est-ce qu'on vous a indiqué de façon précise ce qu'il en serait ou est-ce simplement une rumeur?

M. Campbell: C'est plus qu'une rumeur, monsieur. Ce sont des renseignements qui nous ont été fournis il y a quelque temps par le ministre des Transports. C'est pourquoi, nous avons jugé qu'il était assez important pour le mentionner dans le mémoire.

Il y a eu certaines rumeurs selon lesquelles une telle augmentation serait mise en vigueur, mais je crains fort que la rumeur se matérialise de plus en plus.

M. Macquarrie: La dernière fois qu'on a haussé le tarif, il semblait que la Commission tiendrait des audiences ici, ce qui ne s'est pas fait. J'espère donc qu'on sera averti d'avance cette fois.

J'ai eu un moment de crainte, lorsque j'ai lu et que je vous ai entendu dire que M. Kierans allait peut-être assumer la responsabilité du ministère des Transports. Car nous avons déjà eu une querelle au sujet d'autres tarifs.

Je me demandais aussi ce que vous entendiez par la montagne de bureaucratie. Je tombe d'accord avec ce que vous dites au sujet de cette montagne de bureaucratie, mais selon moi un bureaucrate est quiconque travaille dans un bureau, et pas seulement dans l'arrière-boutique, car ce peut tout aussi bien être dans le bureau principal.

Je crois que vous m'avez demandé de témoigner quant au service aérien. Je peux le faire très brièvement avec grande sincérité. J'ai quitté Ottawa à minuit pour être ici pour cette séance. Si j'avais voulu venir simplement pour la séance de l'après-midi, j'aurais dû quitté Ottawa à minuit de toute façon. Même si j'avais voulu venir seulement dîner avec vous à 18 heures, j'aurais dû quitter sur le même vol. De sorte que nous avons certaines réserves à formuler quant à notre participation à l'ère des réactés. J'appuie donc tout à fait ce que vous avez dit. Lorsque, hier soir,

[*Text*]

When I was in the Moncton airport last night I did not have the good company of the Prince Edward Island Cabinet, but I did have what has to be the most vigorous snorer in the Dominion of Canada. He certainly blew my rest, if I may use that expression.

I am wondering, Mr. Premier, if you and your government have been making representations about the fuller utilization of one of our links, which is the Wood Island car ferry run? I have often been impressed by the fact that this runs only in the daylight hours, and only in part of them. I have tried to suggest that navigational aides might make possible night navigation which would be very, very helpful. Are you, too, interested in this development?

Mr. Campbell: Mr. Chairman, we have made various representations to the Canadian Transport Commissioner, Mr. Pickersgill, as well as to federal ministers more directly involved, to assist in the expansion of the services between Caribou and Wood Island. There are two ships presently travelling back and forth there. They run, I think, from 7 o'clock in the morning until—what is it, Mr. Macquarrie?—9 o'clock, or 10 o'clock in the evening?

Mr. Macquarrie: Nine, I believe.

Mr. Campbell: Nine in the evening perhaps; and last summer the situation became so accute that at 8 o'clock in the morning tourists, visitors who were on the Caribou side, were being told that they could not be accommodated that day, and at 8 o'clock in the morning they were being asked to go to Tormentine and try to come over to the island. I do not know what percentage of those persons turned away actually tried again at the other terminal, but this has been a very real inhibiting factor in the growth of the tourist industry in Prince Edward Island.

We have made these representations and I believe that there is a prospect in 1970 or 1971 of making some additional vessel capacity available there, but even that, if carried out, will not meet the requirements of the next year or so.

Mr. Macquarrie: Thank you.

The Chairman: Mr. Corbin, I think you will be the last speaker.

Mr. Corbin: Thank you very much, Mr. Chairman.

The Chairman: Gentlemen, I think we have to be fair to the Premier and the other people

[*Interpretation*]

je me trouvais à l'aéroport de Moncton, je n'étais pas dans la gracieuse compagnie du Cabinet de l'Île-du-Prince-Édouard, mais il y avait ce qui est sûrement le plus fort ronflement de tout le Canada. Il m'a certainement empêché de me reposer.

Je me demande si vous et votre gouvernement avez fait des instances au sujet d'une plus grande utilisation d'un de nos liens, soit le transbordeur d'automobiles de Wood Island? J'ai toujours été étonné que ce service n'est offert que de jour, et seulement une partie du jour. J'ai tenté de proposer que les instruments de navigation pourraient nous permettre d'offrir ce service la nuit, ce qui serait des plus utile. Est-ce que vous seriez aussi intéressé à un tel événement?

M. Campbell: Monsieur le président, nous avons fait différentes instances à la Commission canadienne des transports, à M. Pickersgill, et aussi aux ministres fédéraux en cause, afin d'aider à l'expansion des services entre Caribou et Wood Island. Il y a deux navires qui, en ce moment, voyagent entre ces points. Ils sont de service, je crois, de 7 heures du matin à 21 heures ou 22 heures, n'est-ce pas, monsieur Macquarrie?

M. Macquarrie: 21 heures, je crois.

M. Campbell: 21 heures, peut-être. L'été dernier la situation était tellement grave, qu'à 8 heures le matin, les touristes, les visiteurs qui étaient à Caribou, se faisaient dire qu'on ne pouvait pas les traverser ce jour-là. Donc, dès 8 heures le matin, on leur demandait de passer par Tormentine, et d'essayer de se rendre dans l'île ainsi. Je ne sais pas quel est le pourcentage de ces personnes ainsi refusées, qui ont essayé de se rendre à l'île de nouveau par l'autre terminus, mais c'est là un facteur qui a vraiment nui à la croissance de l'industrie touristique de l'Île-du-Prince-Édouard.

Nous avons formulé des instances, et je crois sincèrement qu'il y a lieu d'espérer qu'en 1970 ou 1971 on pourra mettre en service d'autres navires, mais même à cela, on ne répondrait pas aux besoins pour un an ou deux.

M. Macquarrie: Merci.

Le président: Monsieur Corbin, je pense que vous serez le dernier à poser des questions.

M. Corbin: Merci beaucoup, monsieur le président.

Le président: Messieurs, je crois qu'il nous faut être justes envers le premier ministre et

[*Texte*]

in the audience. Some of them have been waiting since 9:30 this morning to present their briefs. I would ask members to try to be as brief as possible.

Mr. Corbin: Mr. Premier, I have noticed a few minor changes in the brief you have presented this year compared to the one you presented last year, and especially on page 9 where you make five suggestions. Item No. 5 last year referred to the construction of the corridor road through Maine. I guess a lot of members expected me to bring up this matter. Now you favour, instead the extension of all-weather highways to provide linkage, and so on. In other words, you give a priority to your road building programs in the province. Why this change of attitude all of a sudden?

Mr. Campbell: It is just a question of priority, sir. The corridor road is certainly a very desirable link running from south of Montreal into New Brunswick, but Prince Edward Island can take little advantage of that unless the problems with the Northumberland Strait and our own highway system are resolved to the extent that we can take that advantage.

Mr. Mahoney: I have a supplementary, Mr. Chairman. Referring specifically to Item 5 on page 9, sir, has the provincial government a set of priorities for, and an estimate of the costs of, the all-weather highway program envisaged there and, if so, could that be made available to the Committee?

Mr. Campbell: Yes; through the development plan we have worked out a 15-year road program for Prince Edward Island.

Mr. Mahoney: Could you make a copy of that available?

Mr. Campbell: Very shortly, sir, yes.

Mr. Mahoney: Could the Committee consent to its being appended to the report of our proceedings?

The Chairman: Is it agreed?

Some hon. Members: Agreed.

Mr. Corbin: I will follow up with my final question, Mr. Premier. Why will a corridor road be advantageous to you? Is it to get to Montreal, or to Toronto? Is that the only reason for your favouring such a project?

[*Interprétation*]

les autres ici présents. Certains d'entre eux, sont ici depuis 9h. 30 ce matin, pour présenter leurs mémoires. Je demanderais donc aux députés d'être le plus bref possible.

M. Corbin: Monsieur le premier ministre, j'ai remarqué quelques modifications dans le mémoire que vous avez présenté cette année par rapport au mémoire que vous aviez présenté l'année dernière, tout particulièrement à la page 9 où vous faites cinq propositions. L'année dernière, le poste 5 traitait de la construction de la route-corridor via le Maine. J'imagine que bon nombre de députés s'attendaient à ce que je soulève la question. Maintenant vous êtes plutôt en faveur de la construction de routes tous-temps pour assurer un réseau de transport, et ainsi de suite. Autrement dit, vous donnez la priorité à votre programme de construction de routes dans la province. Pourquoi un tel changement d'attitude tout à coup?

M. Campbell: C'est simplement une question de priorités. La route-corridor est sûrement un lien souhaitable au sud de Montréal au Nouveau-Brunswick, mais l'Île du Prince-Édouard ne peut vraiment pas bénéficier de cette route à moins que les problèmes du Détroit de Northumberland ne soient réglés et que notre propre réseau de routes ne soit amélioré de façon à nous permettre d'en profiter vraiment.

M. Mahoney: Une question complémentaire, monsieur le président. Au sujet du poste 5 à la page 9, est-ce que le gouvernement provincial a établi un ordre de priorités et établit les coûts de ce programme de routes tous-temps et, dans ce cas, est-ce que nous pourrions avoir les résultats?

M. Campbell: Oui, dans le programme d'expansion, nous avons mis au point un programme de 15 ans pour l'aménagement de routes dans l'Île du Prince-Édouard.

M. Mahoney: Est-ce que nous pourrions en avoir un exemplaire?

M. Campbell: D'ici peu, oui.

M. Mahoney: Est-ce qu'on pourait l'annexer au compte rendu des délibérations?

Le président: Est-ce convenu?

Des voix: Convenu.

M. Corbin: Une dernière question, monsieur le premier ministre. Pourquoi une route-corridor serait-elle avantageuse pour vous? Est-ce pour vous rendre à Montréal ou à Toronto? Est-ce la seule raison pour laquelle vous seriez en faveur d'un tel projet?

[*Text*]

Mr. Campbell: We would have two-way traffic on the highways, and certainly again the tourist traffic coming into the Atlantic Provinces. I think that the main roads are feeder roads, and that the Atlantic Province would greatly benefit by this.

We are certainly looking at the round trip which the trucking industry would make and the number of hours it would cut off the travelling time, but if they were asked to wait eight hours on the Borden dock you can see that the question of priority would place the greatest emphasis of this province on sorting out the problem here and of building up the road system so that these trucks can serve the various communities and the various warehouses which are distributed across the province.

Mr. Corbin: Are you aware, Mr. Premier, that there is an easy access road through to central Canada if you were to cut across New Brunswick from Newcastle and on to Edmunston, and so on? You would not be travelling any greater distance than on a corridor road.

Have you discussed this with the Premier of New Brunswick?

Mr. Campbell: Certainly and with the Governor of Maine and with the Premier of Nova Scotia as well, and with the federal ministers who from time to time have indicated interest. I would like you to ask one of our truckers who will be giving evidence here today what his opinion is about the present road connection.

Mr. Corbin: Lastly, are you not afraid that this easy access for us into Montreal and for the tourist back to the island and so on would not open the door to serious competition in the sale of our agricultural products as well? In other words, do you not see a very real danger of dumping into the Maritimes of agricultural products from the farms and gardens of Montreal and the Ontario region?

Mr. Campbell: That danger exists as long as we are unable to respond effectively and competitively, and we are going to bet our dollars that we will be able to respond. Thank you, sir.

The Chairman: You have another question, Mr. Allmand?

Mr. Allmand: Yes, I do. My question is related to your harbour facilities because on page 14 are stated the possibilities of shipping services to Newfoundland, Magdalen Islands,

[*Interpretation*]

M. Campbell: Il y aurait une circulation dans les deux sens, sur cette route, et elle attirerait aussi les touristes vers les provinces de l'Atlantique. Je pense que les routes principales sont des embranchements et que les provinces de l'Atlantique pourraient en bénéficier énormément.

Mais nous songeons évidemment aux voyages aller-retour que feraient les camions, le nombre d'heures en moins qu'il faudrait pour faire le voyage, mais s'il faut attendre huit heures sur les quais de Borden, vous pouvez vous rendre compte que la priorité dans cette province, serait tout d'abord de régler nos propres problèmes, et d'aménager notre réseau routier pour que ces camions puissent desservir ces différents centres et les différents entrepôts qui sont répartis dans toutes les parties de la province.

M. Corbin: Êtes-vous au courant, monsieur le premier ministre, qu'il y a une voie d'accès facile vers le Canada central, si vous traversez le Nouveau-Brunswick de Newcastle à Edmunston, et ainsi de suite? Vous n'auriez pas à parcourir une distance plus longue que par la route-corridor.

Est-ce que vous en avez parlé avec le premier ministre du Nouveau-Brunswick?

M. Campbell: Oui, ainsi qu'avec le gouverneur du Maine, le premier ministre de la Nouvelle-Écosse, et les ministres fédéraux qui, de temps à autre, ont démontré un certain intérêt à cet égard. Je voudrais que vous demandiez à l'un de ceux de nos camionneurs qui témoigneront ici aujourd'hui ce qu'il pense de la jonction actuelle des routes.

M. Corbin: Enfin, ne craignez-vous pas que cet accès à Montréal facile pour nous, et ce retour à l'île facile pour les touristes, n'ouvrent la porte à une concurrence sérieuse pour la vente de nos produits agricoles aussi. En d'autres termes, ne voyez-vous pas un danger véritable de «dumping» dans les Maritimes de produits agricoles venant des fermes et des jardins de Montréal et des diverses régions de l'Ontario?

M. Campbell: Ce danger existera toujours, tant que nous ne serons pas en mesure de procéder d'une façon efficace et concurrentielle, et nous allons parier que nous serons en mesure de faire face aux circonstances. Merci, monsieur.

Le président: Vous avez une autre question, monsieur Allmand?

M. Allmand: Oui. Il s'agit de vos installations portuaires, car, à la page 14, on parle de la possibilité d'avoir des services d'expédition vers Terre-Neuve, vers les Îles-de-la-Made-

[*Texte*]

Seven Islands and to the Caribbean. I was wondering what sort of harbour facilities you have now not considering the ferry terminals and are these harbours adequate?

I do not think they are under the National Harbours Board; are they under local control, under municipal control or provincial control, or what?

Mr. Campbell: The Department of Transport, I believe, is the controlling authority; it is not Public Works, but one of those two departments.

Mr. Allmand: And in the main, where are those harbours, Mr. Premier?

Mr. Campbell: At Summerside and Charlottetown with limited facilities at Georgetown and Surrey. At these ports we have the Marine wharfs, so called, which are the federal government wharfs, and you will find a warehouse facility on that wharf. There is one at Alberton as well, and here potatoes are stored, for example. The water is deep enough to accommodate large ocean-going vessels which will take our seed potatoes to the world markets. This is about the limit, however. For example, there are no facilities for loading in adverse weather conditions and it is the old boom and the rack.

We see the need to develop our harbour facilities so that we can take advantage of changes and improvements in transport services such as the containerized or the roll-on, roll-off equipment. In the Caribbean area for example, there is very little warehousing available and if for example we were able to move refrigerated cars into that area, our product might be held for distribution for several more days than is presently the case.

We do run into problems of entire shiploads of potatoes rotting on the wharf or in inadequate warehousing facilities there, because there are no holding or receiving facilities.

Mr. Allmand: Have you as a province made any recommendations regarding the upgrading of any one of the ports on the island with better loading facilities for containerization and for warehousing? Have you decided that one of your ports should be upgraded by the federal government to do this sort of thing?

Mr. Campbell: Yes, and I think these recommendations are frequently made. I do

[*Interprétation*]

leine, vers Sept-Îles et vers les Caraïbes. Je me demandais de quel genre d'installations portuaires vous disposiez actuellement, sans tenir compte des terminus du service de bac, et si ces installations étaient suffisantes. Je ne pense pas qu'ils relèvent du Conseil des ports nationaux. Est-ce qu'ils sont sous l'autorité locale, municipale, provinciale, ou quoi?

M. Campbell: Je pense qu'ils relèvent de l'autorité du ministère des Transports, et non du ministère des Travaux publics, c'est l'un de ces deux ministères, en tout cas.

M. Allmand: Et où sont situés la plupart de ces ports, monsieur le ministre?

M. Campbell: A Summerside et à Charlottetown, et, avec des installations limitées, à Georgetown et à Surrey. A ces ports, nous avons les quais maritimes du gouvernement fédéral, et il y a un entrepôt sur ces quais. Il y en a aussi un à Alberton, où l'on entrepose les pommes de terre, par exemple. L'eau est assez profonde pour recevoir les grands navires au long cours, qui transportent nos pommes de terre à semence vers les marchés du monde. C'est à peu près tout, cependant. Par exemple, il n'y a pas d'installations qui permettent de faire le chargement dans de mauvaises conditions atmosphériques; nous en sommes encore aux vieilles méthodes.

Nous nous rendons compte de la nécessité qu'il y a d'améliorer nos installations portuaires pour pouvoir profiter des modifications et des améliorations apportées aux services de transports, comme le transport par cadres ou le chargement et déchargement par roulement. Dans les Caraïbes, par exemple, il y a très peu d'entrepôts disponibles, et si, par exemple, nous étions en mesure d'avoir des wagons frigorifiques dans cette région, nos produits pourraient être conservés pendant un plus grand nombre de jours qu'à l'heure actuelle.

Il nous arrive que des cargaisons entières de pommes de terre pourrissent sur le quai ou dans des installations inadéquates d'entreposage là-bas, car il n'y a pas de service d'entreposage ou de réception des marchandises.

M. Allmand: Avez-vous, en tant que province, fait des recommandations quant à l'amélioration des installations de l'un des ports de l'île, grâce à de meilleures installations pour le transport par cadres et pour l'entreposage? Avez-vous décidé que l'un de vos ports devrait être amélioré par le gouvernement fédéral pour faire ce genre de choses?

M. Campbell: Oui, et je pense que l'on fait souvent ces recommandations. Je ne crois pas

[*Text*]

not think that the province has ambitiously promoted the kind of roll-on, roll-off or containerized movement that I am talking about, and there are possibilities of hooking into the Halifax port, given certain changes in the CNR operation and perhaps an assembling point over in Moncton.

We have had initial discussions with the CNR and two shipping companies have indicated an interest in exploring with us the prospect of developing this kind of trade, but it is only jelling at the moment. The shipping industry is only getting serious, I think, in this part of the world on this kind of service. They are running into union problems ad strikes down the Atlantic seaboard, but our presentation to the minister later this month will indicate our interest in this kind of approach.

The Chairman: Well, Mr. Premier, we want to thank you for your kind brief and we want to thank you for allowing us so much of your time to discuss your brief. Thank you, very much.

Mr. Campbell: Well, Mr. Chairman, again I sincerely hope that the remainder of your visit and of the members of your Committee will be enjoyable and we want to see you all back this summer for two or three weeks in the sun. Thank you very much for the interest you have indicated in your questions, and I am certain that you will benefit from the briefs that are yet to be given and the more detailed information which our businessmen, our truckers and other persons more directly involved in transportaton will have to offer to this meeting.

The Chairman: Thank you very much, Mr. Premier.

Mr. Campbell: Thank you again, sir.

The Chairman: Our next brief will be the Prince Edward Island Frosted Foods Limited.

Mr. Allmand: Mr. Chairman, may I raise a point of order at this time? Before starting on the trip we had agreed that each questioner would be limited to 10 minutes. If we are going to get through I think we should follow that. If a man does not finish his questioning in 10 minutes he should go to the bottom of the list; if he wants to pursue it later, he could, but I suggest very strongly that we have this limitation.

[*Interpretation*]

que la province ait ambitieusement encourager le genre de service de chargement et de déchargement rapides, ou de transport par cadres, dont je parle, et il serait possible de se tourner du côté du port d'Halifax, si l'on modifiait quelque peu le service du National-Canadien et si, peut-être, on avait un point d'assemblage à Moncton.

Nous avons eu des entretiens préliminaires avec le National-Canadien et deux sociétés d'expéditeurs se sont montrées intéressées à explorer avec nous la possibilité de mettre au point ce genre de commerce, mais ce n'est qu'un début. L'industrie d'expédition dans ce coin-ci du monde commence à peine à s'intéresser sérieusement à ce genre de service. Elle éprouve des difficultés sur le plan syndical, et il y a des grèves le long du littoral de l'Atlantique, mais nous indiquerons, dans le mémoire que nous présenterons au ministre plus tard ce mois-ci, l'intérêt que nous portons à ce genre de méthode.

Le président: Monsieur le premier ministre, nous désirons vous remercier de votre excellent mémoire, et merci de nous avoir donné une si grande partie de votre temps. Merci infiniment.

M. Campbell: Monsieur le président, une fois encore, j'espère sincèrement que le reste de votre séjour et de celui des membres de votre Comité sera agréable, et nous voulons vous voir tous de retour ici cet été pour profiter de deux ou trois semaines au soleil. Merci beaucoup de l'intérêt que vous avez manifesté dans vos questions. Je suis certain que vous tirerez beaucoup des mémoires qui vont encore vous être présentés et des renseignements plus détaillés que vont vous donner nos hommes d'affaires, nos camionneurs, et d'autres personnes directement intéressées aux transports.

Le président: Merci beaucoup, monsieur le premier ministre.

M. Campbell: Merci encore, monsieur.

Le président: Notre prochain mémoire sera celui de la *Province Edward Island Frosted Foods Limited.*

M. Allmand: Monsieur le président, puis-je invoquer le Règlement? Avant de commencer notre voyage, nous étions convenus que chaque membre du Comité qui poserait des questions n'aurait droit qu'à 10 minutes. Je pense que si nous tenons à terminer notre travail, nous devrions suivre cette ligne de conduite. Si quelqu'un ne termine pas ses questions en 10 minutes, son nom devrait être apposé au bas de liste; s'il voulait reprendre plus tard, il

[*Texte*]

The Chairman: I do not think any member used his 10 minutes this morning, for your information, Mr. Allmand.

Mr. Allmand: That is good; I thought two or three of them had 15 or 20 minutes.

The Chairman: Are representatives of the Prince Edward Island Frosted Foods Limited here this morning? Their brief will stand.

The Charlottetown Board of Trade? The gentleman on my right is Mr. W. R. Brennan, Chairman of the Transportation and Communications Committee; and Mr. R. W. Smith, President, and C. W. Moffatt, General Manager. I would ask Mr. Brennan to give us a summary of his brief and I know he will do so quickly to give more time for our members to ask questions. Mr. Brennan?

Mr. Brennan: Mr. Chairman, members of the Standing Committee on Transport and Communications, it is indeed a pleasure to have been selected to make the presentation of the Charlottetown Board of Trade on Transportation.

This brief was filed originally when the first committee came forward and we sincerely trust that copies of the brief have been distributed among the members of the Committee. In the interest of brevity, we are going to extract the various sections of the brief as originally presented. The brief as originally presented was divided into several sections, the first of which was "Freight Rates Structure". At this point we are going to do a masterpiece of abbreviation. We are going to go to the summary at the very end and I will read:

> We unamimously endorse the submission of the Maritime Transportation Commission to the Minister of Transport, which in summary stated:
>
> (1) That the reduction in intra Maritime rates referred to in the Minister's announcement of 9 November be implemented at once;
>
> (2) That the railways be required to withhold their application to cancel the existing less-than-carload freight rates, at least until a new regional transportation policy is developed and implemented;

[*Interprétation*]

le pourrait, mais je pense qu'il serait bon que nous imposions cette limite.

Le président: Pour votre gouverne, monsieur Allmand, je crois qu'aucun membre du Comité n'a utilisé ses 10 minutes en entier, ce matin.

M. Allmand: Très bien. Je croyais que deux ou trois d'entre eux avaient eu 15 ou 20 minutes.

Le président: Les représentants de la *Prince Edward Island Frosted Foods Limited* sont-ils ici ce matin? Leur mémoire est réservé.

La Chambre de commerce de Charlottetown? A ma droite, M. W. R. Brennan, président du comité des transports et des communications; M. R. W. Smith, président, et M. C. W. Moffatt, directeur général. Je vais demander à M. Brennan de nous donner un résumé de son mémoire, et je sais qu'il va faire vite, pour donner aux membres du Comité plus de temps pour poser des questions. Monsieur Brennan?

M. Brennan: Monsieur le président, messieurs les membres du Comité permanent des transports et des communications, c'est un véritable plaisir pour moi que d'avoir été choisi pour présenter le mémoire relatif aux transports de la Chambre de commerce de Charlottetown.

Ce mémoire a été déposé, à l'origine, lorsque le premier comité a été constitué, et nous espérons que l'on en a distribué des exemplaires aux membres du Comité. Dans l'intérêt de la brièveté, nous allons extraire les diverses sections du mémoire sous sa forme originale. A l'origine, le mémoire se divisait en plusieurs sections, dont la première s'intitulait: «Le régime des tarifs-marchandises». Là, nous allons abréger au maximum. Nous allons passer directement au résumé, à la fin de la section. Je vous le lis:

> Nous faisons unanimement nôtres les vues exprimées dans le mémoire adressé au ministre par la *Maritime Transportation Commission* et qui peuvent se résumer ainsi qu'il suit:
>
> (1) Que soit appliquée immédiatement la diminution des tarifs intérieurs pour les Maritimes dont il est question dans la déclaration du ministre du 9 novembre;
>
> (2) Qu'il soit ordonné aux chemins de fer de surseoir à la demande qu'ils ont faite en vue de la suppression des tarifs dits *L.C.L.*, tout au moins jusqu'à ce qu'ait été mise au point et appliquée une nouvelle politique générale en ce qui concerne les transports régionaux;

[*Text*]

(3) That the so-called density rule be reduced from one cubic foot equalling ten pounds to one cubic foot equalling five pounds; and

(4) That immediate steps be taken to extend the Maritime Freight Rates Act subsidies to other forms of transport.

Gentlemen, that summarizes three pages.

The second section is entitled "Miscellaneous Problems Relative to Freight."

Since the advent of the establishment of Express Freight service by the Canadian National Railways, the number of delayed, lost and/or misplaced shipments has increased to an alarming degree. In general, L.C.L. out of Toronto and Montreal areas have been routed into Moncton and are "exploded" there with the result that multiple parcel shipments which had been originally shipped together became separated and are liable to be placed in two separate railway cars or in some cases in railway cars and highway freight trucks. This is a situation which is extremely frustrating to the individual who has ordered the materials for a job, part of which arrive one day, the other part of which could arrive as much as a week later, and in some cases, become completely misdirected.

On goods as vulnerable as most commodities shipped from P.E.I., i.e. food, it is essential that shipments be handled in the fastest possible manner. Delays for whatsoever reason effect to some degree the quality of the product at the other end. This, in addition to the fact that if the customer finds that he cannot rely upon this source of supply, he will almost invariably seek another. These delays are brought about by many different situations such as lack of equipment, priority, at the ferry terminals, lack of ferry capacity, unduly bad weather, and extremely heavy ice conditions.

There is no doubt about the fact that with the ever-increasing volume of shipments both into and out of the Province, those carriers handling the goods have had to carry on a continuing program of changing and adapting their facilities as

[*Interpretation*]

(3) Que la formule dite «de densité» soit modifiée de façon à ne plus se lire «un pied cube est tenu pour être égal à dix livres», mais au contraire à se lire «un pied cube est tenu pour être égal à cinq livres» et enfin...

(4) Que l'on prenne immédiatement des mesures en vue d'étendre les subventions prévues par la loi sur les taux de transport des marchandises dans les provinces Maritimes à d'autres moyens de transport.

Messieurs, cela résume trois pages.

La deuxième section s'intitule: «Transport des marchandises—problèmes divers».

Depuis la création par les chemins de fer nationaux d'un service de *messageries-fret*, on ne compte plus les retards, les pertes ou les disparitions provisoires des envois. En général, les expéditions *L.C.L.* en provenance des régions de Toronto ou de Montréal sont acheminées sur Moncton où il y a rupture de charge. Il résulte de cette dispersion des envois que certains envois groupés, par exemple, comportant un certain nombre de colis, se dispersent. Il arrive que plusieurs parties en soient réparties sur deux wagons, voire sur des wagons et des camions. On conçoit l'inconvénient qui en résulte pour l'usager qui a passé la commande. Il se trouve souvent dans l'impossibilité de commencer tel ou tel travail du fait qu'une partie de ce qu'il lui faut arrive une journée, le reste huit jours plus tard, mettons, ou pas du tout.

Si on songe au caractère plus ou moins périssable de la plupart des denrées expédiées de l'Île du Prince-Édouard (denrées alimentaires essentiellement), on conçoit que l'on tienne à ce que les expéditions se fassent dans les meilleures conditions de rapidité. Quels que soient les motifs des retards, la qualité du produit livré au destinataire risque d'en être altérée. Ajoutons à cela le fait que si le client ne peut compter sur tel ou tel fournisseur, il s'en cherchera presque toujours un autre. Ces retards tiennent du reste à toutes sortes de raisons: défaut de matériel, priorités aux quais des transbordeurs, manque de place dans les transbordeurs, mauvais temps, glaces flottantes, etc....

Il n'est pas douteux, pour quiconque songe à l'augmentation continue du volume des expéditions vers l'Île du Prince-Édouard ou en provenance de l'Île du Prince-Édouard, que les transbordeurs ont eu à réaliser constamment toutes sor-

[*Texte*]

technological improvements become available to the transportation industry. Such improvements, of course, are always far more beneficial in areas of more dense population. In an area such as this, some of these changes have meant little to us, and their adaptation to our particular problems have not always resulted in an improvement in service. There has been some discussion in recent times that it might be well to give consideration to the phasing of railway service out of Prince Edward Island. This, we submit, would serve only to increase our problems beyond what they are now. To raise only one question in this regard, I would bring to your attention that there are approximately 10,000 reefer cars of potatoes shppped out of Prince Edward Island each year. If this service was going to be discontinued, it could only be replaced by temperature-controlled highway vehicles .

r container type rail shipments of one type r another.

which would represent a tremendous capital investment for someone for a few weeks use in the fall and winters months. As it stands now, the reefer cars used by the potato industry of Prince Edward Island are used at other seasons of the year for the California and Florida citrus fruits business and the Niagara peach business. The mere fact that they are somewhat off-season at a time when required here makes this a very beneficial situation to our potato market. If such a transition in carrying carload lots of potatoes was to come about, it would serve only to discriminate against the sale of our product by increasing its cost in a market which is increasingly competitive. It might be well to point out something that I am sure every member of your Committee is well aware of, and that is the fact that the normal markets and trading areas of the Atlantic Provinces would be in the New England States. These markets in general, are closed off to us by restrictive requirements and customs duties as far as our sales are concerned. Insofar as our purchases are concerned, we are compelled to buy from the various manufacturing areas of Canada, whose goods are protected by import duties coming into Canada, which means we pay a higher price than we normally would in our natural markets, while at the same time

[*Interprétation*]

tes de changements, ont dû s'adapter aux conditions nouvelles qui ont exigé d'eux la transformation de leurs moyens techniques au fur et à mesure que le progrès s'installait dans les techniques de transport. Il va de soi que des changements de ce genre sont particulièrement intéressants dans les régions à population plus dense. Mais dans une région comme la nôtre, certains de ces changements n'ont guère de sens, leur adaptation à nos circonstances propres n'ayant pas toujours provoqué une amélioration du service. On s'est demandé, depuis peu, s'il n'y aurait pas avantage à supprimer progressivement le service ferroviaire dans l'Île du Prince-Édouard. On nous permettra de faire observer que cela aurait pour effet d'aggraver nos difficultés. Ne considérons la chose que d'un seul point de vue. L'Île expédie chaque année environ 10,000 wagons frigorifiques de pommes de terre. Si on allait supprimer ce service, il faudrait remplacer ces wagons par des camions frigorifiques...

ou des expéditions par chemin de fer, du type transport par cadres,

... ce qui supposerait d'énormes investissements, eu égard surtout au fait que ces camions ne serviraient guère que pendant quelques semaines, en automne ou en hiver. A l'heure actuelle les wagons frigorifiques qui servent à transporter les pommes de terre de l'Île du Prince-Édouard servent, à d'autres époques de l'année, pour le transport des agrumes de la Californie ou de la Floride ou des pêches de la vallée du Niagara. Le fait, justement, que c'est pour eux, en quelque sorte, la morte-saison au moment où nous en avons besoin représente un avantage incontestable en ce qui nous concerne. Si donc on allait transformer cette méthode de transport de nos pommes de terre cela ne saurait avoir qu'un seul résultat, savoir l'augmentation du prix de nos produits dans des marchés où nous avons déjà à compter avec une très vive concurrence, d'où de plus grosses difficultés pour nous. Tous les membres de votre comité savent sans doute—mais il est bon de le rappeler—que nos marchés naturels—ceux des Provinces atlantiques sans doute—se trouvent dans les États de la Nouvelle Angleterre avec lesquels nous commerçons. Ces marchés nous sont en général fermés, du point de vue des ventes, par certaines restrictions ou par les tarifs douaniers. Nous devons d'autre part acheter ce dont nous avons besoin dans les diverses régions industrielles du

[*Text*]

having to pay shipping charges both on our goods sent to market and on all products purchased from Central Canada. Normally, there is some compensation in these matters. If you lose on one end, you make it upon the other. This is a case where we lose both ways.

I have a short section here with regard to Additional Ferry Service. There has recently been completed for the Borden-Tormentine ferry route an additional ferry. This ferry, the *John Hamilton Gray* went into service in October, 1968. Bearing in mind the tourist traffic between these two points between Dominion Day and Labour Day, we are compelled to arrive at the conclusion that no single factor could contribute more in the way of service to the tourists, as well as to assist measurably in the economy of this province, than to provide adequate accommodation for all tourist vehicles which offer before they turn away. Because of the fact our tourist season lasts for such a short period, we must make the most of it.

While ferry capacity has increased, which is encouraging, this can in no way be looked upon as an adequate solution to the ever-present traffic problem.

The next section is on a continuous link to the mainland. There is no matter that has received more consideration or has been used more as a political football in Prince Edward Island than the matter of a continuous link to the mainland. This is something that every Islander has become intimately acquainted with over the last several years. Such a link, generally, is essential to the welfare of not only this province but to the whole of Canada. The amount of money that is paid out annually in subsidies for the present operations, plus the additional capital costs of ever-expanding and increasing facilities, in a few years would carry the total cost of such a link.

At the present time there are three basic sources of money coming into Prince Edward Island. The money the farmer brings in, the money the fisherman brings in and the money the tourist brings in. For these reasons it is imperative that we look out for the farmer

[*Interpretation*]

Canada, dont la production est elle-même protégée par des droits douaniers. Bref, nous payons plus cher que ce ne serait le cas si nous pouvions acheter dans nos marchés naturels alors qu'en même temps nous avons à payer des frais de transport plus considérables, à la fois en ce qui concerne nos propres expéditions et en ce qui concerne tout ce que nous faisons venir du Canada central. Normalement, en pareilles circonstances, on peut gagner sur un tableau ce qu'on a perdu sur l'autre, mais ici on perd deux fois.

J'ai ici une brève section qui s'intitule: «Nouveaux services de bacs-transbordeurs». On a récemment terminé la construction d'un nouveau bac pour la liaison Borden-Tormentine. Ce bac, le *John Hamilton Gray*, est entré en service en octobre 1968. Si l'on songe au grand nombre de touristes qui circulent entre ces deux points entre la Fête de la Confédération et la Fête du travail, nous devons conclure que rien ne saurait davantage assurer le succès de la saison touristique dans la province cette année que la livraison anticipée du bâtiment en question. Notre saison, de ce point de vue, est très courte, de sorte que la mise en service de celui-ci en septembre ne servirait à peu près à rien de ce point de vue. A cette époque de l'année, à toutes fins pratiques, il n'y a plus de tourisme chez nous.

Bien que la capacité de traversiers ait augmenté, ce qui est encourageant, on ne peut considérer cela comme une solution au problème toujours présent de la circulation.

Rubrique suivante: liaison continue avec le continent.

Rien n'a davantage défrayé la chronique de l'Île du Prince-Édouard, rien n'a fait l'objet de marchandages politiques tant que la construction éventuelle d'un ouvrage reliant en permanence l'Île au continent. Tous les insulaires ont appris à connaître cette question sous tous ses aspects depuis quelques années. Un ouvrage de ce genre est essentiel, non seulement du point de vue de la province, mais encore de celui du Canada tout entier. Si on songe à ce qu'on verse tous les ans comme subventions aux services actuels et à l'argent que l'on doit consacrer sous forme d'investissements à leur extension et à leur amélioration, on conçoit qu'il serait probablement possible de couvrir ainsi la dette totale que l'on contracterait éventuellement au titre d'un ouvrage de ce genre.

L'Île du Prince-Édouard a, à l'heure actuelle, trois grandes sources de revenus: l'argent qu'y fait venir le pêcheur, l'argent qu'y fait venir le cultivateur, l'argent enfin qu'y apporte le touriste. Même si les services actuels sont infiniment supérieurs à ce qu'ils

[*Texte*]

and his products, the fishermen and his products and the toursist and his interests.

The present facility, even through it is a vast improvement over what we have had in years past, is far from adequate for today's requirements. The number of occasions on which shipments of potatoes have been delayed by the unvailability of reefer cars in without number. The number of occasions on which shipments of fish by truck have been delayed at the ferry terminals are too numerous to mention.

In such cases, even through the shipment ultimately gets through, there is some deterioration in the quality of the product. Every one of us who travels to and from Prince Edward Island during the summer months has seen the situation where tourists were lined up to and from the ferries as far as three miles back and more. Tourists in general will not put up with this. They wait so long and then they leave to carry on their holiday somewhere else.

Such a link should provide continuous service, not intermittent or broken service such as could result from heavy storms, snow, ice or wind conditions. Even on the one-mile causeway to Cape Breton Island, there are times in the winter when traffic is help up. If this is so on a one-mile causeway, how much more often and more grievous would the situation be on a seven-mile link under much more exposed conditions. If such a link were to be established it should provide the best possible travelling conditions throughout the 12-month period each year. Any link which is only slightly above the water level and covering a distance such as this would be almost impossible to keep open in the snow, ice and wind conditions which prevail in this area.

I recommend that I leave out the next section, but I respectfully request that the members of the Committee look at in in the brief that has been filed. I am leaving it out in the interests of brevity.

The next section is on the Magdalen Islands service. The Charlottetown Board of Trade strongly supports the Magdalen Islands Chamber of Commerce in their endeavour to obtain a regular daily ferry service between Souris, Prince Edward Island, and the Magdalen Islands. This service is well warranted on the basis that these people are poorly served under present arrangements. Everything that is shipped to the Magdalen Islands has to be off-loaded, put aboard another ferry and unloaded at the Magdalen Islands for distribution by truck. This is awkward, time-consuming and restricts to an extremely

[*Interprétation*]

étaient autrefois, ils sont encore loin d'être satisfaisants. On ne compte plus le nombre de fois où les acheminements de pommes de terre ont été retardés par le manque de wagons frigorifiques. Il en va de même des expéditions de poisson par camions, à cause des embarras de circulation aux docks.

Même si les expéditions finissent toujours par se faire, dans le dernier cas, cela n'améliore pas la qualité du produit, bien au contraire. Tous ceux d'entre nous qui ont à quitter l'île ou à y entrer pendant l'été ont pu voir les voitures des touristes s'allonger en queues interminables aux accès des quais du bac, sur trois milles ou plus. En général le touriste ne s'y résigne pas. Il attend un moment, puis s'en va finir ses vacances ailleurs.

Il s'agirait tout d'abord d'une liaison continue, non point épisodique ou intermittente, comme cela peut être actuellement le cas à cause des tempêtes, de la neige, des glaces ou du vent. Même sur la chaussée d'un mille qui relie la Nouvelle-Écosse continentale au Cap-Breton il arrive que la circulation ne puisse se faire. S'il en est ainsi d'une chaussée d'un mille combien plus grave ce serait sur une chaussée de sept milles, autrement plus exposée aux éléments. L'ouvrage éventuellement mis en place devrait permettre une circulation ininterrompue toute l'année. S'il n'était élevé que de quelques pieds au-dessus du niveau de la mer il serait impossible de le garder ouvert par temps de neige, de glace ou de vent, ce qui est très souvent le cas dans nos régions.

J'aimerais maintenant dire que je saute la prochaine section, mais je demanderais aux membres du Comité de tenir compte de ceci et de l'examiner bien attentivement dans le mémoire qui a été déposé. Pour être plus bref, je laisserai tomber cette section.

La section suivante porte sur le service aux Îles-de-la-Madeleine. La Chambre de Commerce des Îles-de-la-Madeleine cherche actuellement à obtenir une liaison régulière et quotidienne, par bac-transbordeur entre Souris (Î. P.-É.) et ces îles. Elle bénéficie à cet égard de l'appui entier de la Chambre de Commerce de Charlottetown. Ce service présente un incontestable intérêt, les Madelinots étant actuellement très mal servis de ce point de vue. Tout ce qui est expédié de la Province doit être transbordé, embarqué sur le bac actuellement en service et déchargé dans les Îles pour y être ensuite livré par camion.

[*Text*]

heavy degree the types of commodities that can be shipped, and to an even greater degree the condition in which many of the commodities arrive, even through they might have been in prime condition at the time of shipment.

It is our strong recommendation that a drive on-drive off ferry service be provided from Souris, Prince Edward Island, to the most advantageous point on the Magdalen Islands on a daily service basis. This would offer considerably more security to the Magdalen Islands in the way of emergency and hospital services, and would most assuredly make a greater variety of products in better condition and at lower cost available to them. The reasons for recommending the proposed route so strongly is that Souris is by far the nearest port facility to the Magdalens and service from any other port would only serve to increase the amount of sailing time required to give the service, thereby reducing its frequency.

The next section deals with air transport. The fact that we are an island province puts us in the position of realizing just what a valuable asset we have in air transport. Prince Edward Island has had air transport on an intermittent basis since the middle 1920's and on a regular basis since approximately 1933. This has meant a great deal to the province, particularly with regard to emergency travelling and mail service. As air routes have been expanded over the years the scheduling of aircraft, which used to be tied in with rail service, is now of course tied in with national and international air flights. The scheduling is now dependent upon many variables, and we are well aware we cannot reasonably expect national and international flights to do anything other than to serve in a manner which will do the greatest good to the greatest number. However, in many cases this shows up in poor service and poor connections insofar as we are concerned.

Scheduling for mail service in an area such as this is in direct conflict with scheduling for air passenger service. To date we have had to choose in favour of the mail service. Anything which can be done to improve this would be appreciated.

The next section is on the subject of corridor roads. I feel the benefits of corridor roads are very, very outstanding to the Maritime Provinces in general and to Prince Edward Island in particular. I would like to make one very short comment. As a member of the

[*Interpretation*]

Tout ceci est très compliqué, très long et limite dans une grande mesure le nombre des marchandises qu'il est possible d'acheminer de cette façon. C'est d'autant plus grave que la qualité des produits ainsi livrés est très souvent compromise, même s'ils étaient en parfait état au moment du départ.

Nous sommes persuadés qu'il y aurait avantage à mettre en service un bac pour les automobiles devant circuler de Souris (Î. P.-É.) jusqu'à celui des ports des Îles-de-la-Madeleine qui réponde le mieux à toutes les exigences des intéressés. Ce service devrait être quotidien. Ce serait infiniment avantageux pour les Madelinots du point de vue interventions médicales, d'urgence ou de l'hospitalisation, par exemple. Il est incontestable aussi qu'ils pourraient ainsi bénéficier d'une quantité plus grande de marchandises, plus variées et à meilleur marché. Si nous insistons tant sur ce point c'est que Souris est le port le plus rapproché des Îles-de-la-Madeleine, de loin. Assurer ce service d'un autre port ce serait simplement allonger le temps de la traversée et diminuer sa fréquence.

Province insulaire, l'Île du Prince-Édouard est mieux placée qu'une autre pour mesurer les effets heureux des transports aériens. Elle bénéficie du reste de laisons aériennes intermittentes depuis le milieu des années vingt, et de liaisons régulières depuis 1933 à peu près. Cela a rapporté d'immenses avantages à la province, notamment en ce qui concerne les déplacements hâtifs ou le courrier. Au fur et à mesure que s'est développé le trafic aérien les horaires qui correspondaient autrefois aux horaires des chemins de fer doivent actuellement tenir compte des vols nationaux ou internationaux. Ils sont actuellement fonction de divers éléments et nous nous rendons parfaitement compte que nous ne saurions attendre des vols nationaux ou internationaux qu'ils soient prévus autrement que de manière à servir au mieux les intérêts du plus grand nombre possible de clients éventuels. Mais il n'en résulte pas moins pour nous certaines insuffisances de service et des mauvaises correspondances.

La préparation des horaires pour le service postal dans un secteur comme celui-ci entre directement en conflit avec l'horaire du service aérien pour passagers. Jusqu'ici, nous avons dû opter pour le service postal. Tout ce qui pourrait être fait pour améliorer cette situation serait grandement apprécié.

L'article qui suit porte sur le corridor routier. J'estime que les avantages du corridor routier peuvent être extrêmement intéressants pour les provinces des Maritimes en général et pour l'Île du Prince-Édouard en particulier. J'aimerais vous faire un commentaire très

[*Texte*]

Corridor Road Committee, and the originator of the idea back in 1947, at no time has any member of the Corridor Road Committee been under the impression that the Government of Canada should put one dollar into the construction of a highway in any portion of the United States. The only thing that the Corridor Road Committee is looking for is an improvement in the facility between the present Trans-Canada Highway in New Brunswick and McAdam, and between the port of entry in Quebec and where the four-lane highway begins at Sherbrooke, Quebec.

Thank you, gentlemen. That concludes the abbreviated brief.

The Vice-Chairman: Thank you, sir. Mr. Allmand.

Mr. Allmand: Sir, I was interested in your suggestions regarding the Magdalen Islands. Is the steamship link between Souris and the Magdalen Islands the only means of transportation to those Islands at present, or is there another link with Quebec?

Mr. Brennan: When the Gulf of St. Lawrence is not frozen up there is an intermittent link with Quebec by a service that comes down and serves the Magdalen Islands and the Maritime Provinces, but it is very intermittent. There is also a daily air service from Charlottetown to the Magdalen Islands.

Mr. Allmand: Do I understand correctly that Prince Edward Island is the main source of trade or materials? Do they go on the steamer from P.E.I. to the Magdalen Islands?

Mr. Brennan: This is correct, and also the place from which they receive their mail service.

Mr. Allmand: What do you provide them with generally, agricultural products, manufactured goods, and so forth?

Mr. Brennan: Practically everything, because if it is not purchased here—and a good deal of it is not—it is shipped through here.

Mr. Allmand: I notice on the map we had that the steamship run seems to originate in Charlottetown and goes around to Souris and then goes on to the Magdalen Islands. Does it in fact originate in Charlottetown or does it start in New Brunswick or some other place?

Mr. Brennan: The present scheduling of the ship provides more frequent service from Souris to the Magdalen Islands, but on one

[*Interprétation*]

bref. A titre de membre du Comité du corridor routier, et d'initiateur de l'idée en 1947, jamais un membre du Comité du corridor routier n'a eu l'impression que le gouvernement du Canada devrait débourser un seul dollar pour la construction d'une route à n'importe quel endroit aux États-Unis. La seule chose que le Comité du corridor routier cherche, c'est une amélioration des installations, des aménagements entre la route transcanadienne actuelle au Nouveau-Brunswick et McAdam, et entre le port d'entrée à Québec et l'emplacement où la route à quatre voies commence à Sherbrooke (Québec). Je vous remercie messieurs. Ceci termine le résumé de notre mémoire.

Le vice-président: Merci monsieur. Monsieur Allmand.

M. Allmand: J'ai été intéressé par votre suggestion au sujet des Îles-de-la-Madeleine, monsieur. Le lien maritime actuel qui se fait par bateau entre Souris et les Îles-de-la-Madeleine, est-il le seul moyen de transport vers ces îles ou existe-t-il un autre lien avec le Québec?

M. Brennan: Il y a une liaison intermittente avec le Québec par un service qui, lorsque le Golfe du Saint-Laurent n'est pas gelé, dessert les Iles-de-la-Madeleine et les provinces Maritimes, mais c'est un service intermittent. Il existe également un service aérien journalier de Charlottetown aux Îles-de-la-Madeleine.

M. Allmand: Est-ce que je dois comprendre que l'Île du Prince-Édouard se trouve à être la source principale d'échanges? Est-ce qu'on les transporte par bateau de l'Île-du-Prince-Édouard vers les Îles-de-la-Madeleine?

M. Brennan: C'est exact, et aussi c'est de là qu'ils reçoivent leur courrier.

M. Allmand: Et qu'est-ce que vous leur fournissez d'habitude, des produits agricoles, des produits manufacturés, etc . . . ?

M. Brennan: Presque tout, car même si ce n'est pas acheté ici, et une bonne part ne l'est pas, c'est au moins expédié par cette région.

M. Allmand: Je remarque sur la carte que nous avions que l'itinéraire du bateau semble commencer à Charlottetown et passe par Souris et se dirige ensuite vers les Îles-de-la-Madeleine. Le départ a-t-il lieu de Charlottetown, du Nouveau-Brunswick ou d'une autre place?

M. Brennan: Les horaires actuels des bateaux prévoient des services plus fréquents de Souris vers les Îles-de-la-Madeleine, mais

[*Text*]

trip a week it goes into Pictou, Nova Scotia, and on one trip a week, which is the Saturday trip, it comes into Charlottetown, P.E.I. It is essential that the boat must put into a bigger port for servicing at least once a week. The normal service should be basically from Souris to the Magdalen Islands, but it would have to make at least one trip a week into a larger port for servicing.

Mr. Allmand: You say that is on a daily basis in the summertime?

Mr. Brennan: They try to hit a daily basis but with the situation as it is now they do not quite make a daily basis. I think they call at Souris about three times a week and at Pictou and Charlottetown once a week.

Mr. Allmand: What do they do for supplies in the wintertime?

Mr. Brennan: They use air transportation.

Mr. Allmand: What is the population of the Magdalen Islands? Is it approximately 10,000?

Mr. Brennan: It is about 17,000.

Mr. Allmand: Thank you.

Mr. Rose: Mr. Brennan, I was interested in something which appears in the last paragraph of your brief at the bottom of page 848. It reads:

> The replacement of the less-than-carload rail rates put in effect to meet motor carrier and water competition was countered by higher rates, by both rail and motor carrier.

Mr. Brennan: May I summarize that?

Mr. Rose: I have not asked my question yet, sir. The cancellation of the competitive non-carload rates constituted an increase in rail rates which was followed by an increase in motor carrier rates. Are you suggesting that the truckers took advantage of the higher rail rates for less-than-carload lots? It seems to me that this is competition in reverse.

Mr. Brennan: I am not an expert in motor carrier transport but I would put it this way. I think their rates came up more nearly in line with the cost of operation at this point. This is why we are looking for the 20 per cent on subsidies within the select territory and 30 per cent subsidy on shipments moving outside the Maritimes.

[*Interpretation*]

une fois par semaine, un bateau se rend jusqu'à Pictou en Nouvelle-Écosse, et une fois par semaine, le samedi, il dessert Charlottetown. Au moins une fois par semaine, le bateau doit toucher un grand port pour se ravitailler. Le service normal devrait se faire généralement de Souris aux Îles-de-la-Madeleine, mais il faudrait que le bateau touche un grand port au moins une fois par semaine.

M. Allmand: Vous dites que ce voyage se fait tous les jours l'été?

M. Brennan: Ils essaient de le faire tous les jours, mais étant donné la situation actuelle, ils n'arrivent pas à le faire. Je crois qu'ils desservent Souris environ trois fois par semaine, et Pictou et Charlottetown, une fois par semaine.

M. Allmand: Comment le ravitaillement est-il assuré en hiver?

M. Brennan: Ils utilisent le transport aérien.

M. Allmand: Quelle est la population des Îles-de-la-Madeleine? Environ 10,000?

M. Brennan: Environ 17,000.

M. Allmand: Je vous remercie.

M. Rose: Monsieur Brennan, j'ai vu quelque chose dans le dernier alinéa de votre mémoire, au bas de la page 848, et je cite:

> La suppression du tarif du *L.C.L.* dont on pensait qu'elle permettrait aux chemins de fer de faire concurrence aux transports routiers, maritimes ou fluviaux a provoqué une hausse des tarifs, tant ferroviaires que routiers.

M. Brennan: Puis-je résumer cela?

M. Rose: Je n'ai pas encore posé ma question, monsieur. La suppression des tarifs compétitifs pour les chargements incomplets s'est traduite par une augmentation des tarifs ferroviaires suivie par une autre augmentation des tarifs routiers. Voulez-vous dire par là que les camionneurs ont profité des taux ferroviaires pour les chargements incomplets? Il me semble que c'est de la concurrence en sens inverse.

M. Brennan: Je ne suis pas un expert dans le camionnage, mais je dirais que leurs taux ont été augmentés pour être plus conformes à leurs frais d'exploitation. C'est la raison pour laquelle nous essayons d'obtenir les 20 p. 100 des subventions dans les régions choisies et 30 p. 100 pour les expéditions vers l'extérieur des Maritimes.

[*Texte*]

Mr. Rose: If they were just catching up to the cost of operation then, they must have been losing money before that.

Mr. Brennan: Most of them were.

Mr. Rose: I see. There was a suggestion made earlier by Premier Campbell that the CNR should reveal its long-term plan so that commerce and industry would have an opportunity to adjust to it more easily. So you support that suggestion?

Mr. Brennan: I certainly do.

Mr. Rose: There is another point I want to cover, and this was also suggested in a previous brief. This is that the intensity of the less-than-carloads lots was perhaps greater in the Maritimes than it was anywhere else in Canada, and it compared very unfavourably with that of central Canada. I suggest to you, sir, that the intensity of it is approximately the same in my province, which is B.C., and we suffer from a similar type of isolation. I think the comparison is because of the amount of less-than-carload transportation carried on in central Canada.

Mr. Brennan: I would agree with that.

Mr. Rose: We have seen the suggestion in a number of briefs that the density rule be changed from 10 pounds per cubic foot to 5 pounds per cubic foot. It has also been suggested that perhaps shippers, while complaining about this density rule, have not looked diligently enough for ways of compressing their products so that the weight more nearly conforms to the rules. Is there any type of product that you either import or export where it is possible to do this?

Mr. Brennan: What has brought this to our attention is that because we are not a manufacturing area we have to import all our products, and I have one specific case in mind where an individual brought in a shipment of 400 chairs which were very similar to the ones we are sitting on in this room today and before the application of this rate system it cost him one price and after the application of this rate system the price went up 320 per cent. This is the type of thing that prompted the presentation of this in our brief.

Mr. Rose: But there are products that can be compressed, such as underwear, for instance.

Mr. Brennan: Oh, yes.

Mr. Rose: That is all, Mr. Chairman. Thank you.

[*Interprétation*]

M. Rose: S'ils essayaient de couvrir les frais d'exploitation, ils devaient donc perdre de l'argent avant cela.

M. Brennan: Oui, la plupart.

M. Rose: Le premier ministre Campbell a suggéré plus tôt que le National-Canadien devrait révéler ses projets à long terme afin que les commerçants et les hommes d'affaires et l'industrie soient en mesure de s'y adapter plus facilement. Êtes-vous en faveur de cela?

M. Brennan: Oui, certainement.

M. Rose: Un autre point que je voulais soulever et qui a été soulevé aussi dans un autre mémoire. C'est que l'intensité des chargements incomplets était plus forte dans les Maritimes qu'ailleurs au Canada, et qu'elle ne se comparait pas favorablement avec le Canada central. J'oserais vous dire, monsieur, que cette densité est presque la même dans notre province, en Colombie-Britannique, et que nous ressentons les effets d'un isolement similaire. Je crois que la comparaison est en raison du transport des chargements incomplets effectué au Canada central.

M. Brennan: Oui, je suis tout à fait du même avis.

M. Rose: On avait proposé dans certains mémoires, que la règle de densité ou de volume soit changée de 10 livres à 5 livres par pied cube. On a également indiqué que plutôt que de se plaindre de cette règle de densité, les expéditeurs devraient s'efforcer de trouver des moyens de comprimer leurs produits afin que le poids soit plus conforme aux règles. Des produits que vous importez ou exportez, y en a-t-il qui pourraient se prêter à ce genre de compression?

M. Brennan: Ce qui a attiré notre attention c'est le fait que, n'étant pas dans un secteur manufacturier, nous sommes forcés d'importer tous nos produits et je me souviens d'un cas particulier où quelqu'un a importé un lot de 400 chaises semblables à celles que nous avons dans cette pièce et qui, avant l'application de ce système, avait payé un certain prix qui a été majoré de 320 p. 100 après l'application de ce même système. C'est ce genre de chose qui nous a obligés d'en faire mention dans notre mémoire.

M. Rose: Oui, mais il y a des produits, par exemple, comme les sous-vêtements, qui peuvent être comprimés.

M. Brennan: Oui, certainement.

M. Rose: C'est tout, monsieur le président. Merci.

[*Text*]

Mr. Thomas (Moncton): Mr. Brennan, referring to your remarks concerning the Northumberland Strait crossing, I am a little confused about just what you are referring to.

You mention the necessity for having a continuous permanent link, which seems to indicate strong support of the crossing, and then you go on to say that you might run into problems respecting tidal conditions and problems of snow and problems of crossing the causeway or whatever it is. What type of crossing do you envisage to eliminate these?

Mr. Brennan: Quite bluntly I envisage a tunnel as being the most satisfactory means of crossing.

Mr. Thomas (Moncton): But do you feel that maybe the cost of a tunnel, as the Premier has just mentioned, would be too prohibitive? It would be most desirable but apparently, as the Premier indicated, they reviewed the costing and decided it was out of the question.

Mr. Brennan: I am aware of the studies. I am aware of the situation relative to this. I have not a doubt in my mind that the estimates that have been received on the construction of this causeway are more likely guesstimates than estimates because the degree to which fill and so on will sink into the soft bottom makes this a very great variable. It is my opinion that the cost of establishing a tunnel could be estimated much more closely than the cost of establishing a causeway.

Mr. Thomas (Moncton): I notice the designation after your name. You are a professional engineer, I take it?

Mr. Brennan: That is correct.

Mr. Thomas (Moncton): I was also interested in your remark about the corridor road and your close connection with that project. Are you aware of the statement made by a representative of the State of Maine legislature this week that he had listened to our discussions down here in reference to the corridor road and he made the statement that there is presently a bill before the Maine legislature to provide $30 million to complete that link across the State of Maine? Is this correct?

Mr. Brennan: That is perfectly correct. Every year since this has been up, and I have been on the committee since its inception, we have never had less than $300,000 out of the State of Maine for this road. There is some discussion that representation be made to

[*Interpretation*]

M. Thomas (Moncton): Monsieur Brennan, dans vos commentaires au sujet de la traversée du Détroit de Northumberland, je ne comprends pas bien ce que vous voulez dire.

Vous avez mentionné la nécessité d'avoir une liaison permanente, ce qui semble être à l'appui de la chaussée, puis vous dites que vous ferez peut-être face à des problèmes au sujet des marées, les problèmes des glaces, de la neige et les problèmes de la traversée, aussi je me demande quel genre de traversiers vous avez en vue pour éliminer ces problèmes.

M. Brennan: Je dirais que je trouve qu'un tunnel serait le moyen le plus satisfaisant d'effectuer la traversée.

M. Thomas Moncton: Mais croyez-vous que le coût du tunnel, comme l'a dit le premier ministre, serait beaucoup trop élevé, ce serait évidemment le plus souhaitable mais comme le premier ministre l'a mentionné, une étude des coûts a révélé que c'était absolument impossible.

M. Brennan: Je suis au courant des études qui ont été faites. Je connais la situation. A cet égard, je n'ai aucun doute. Les estimations qu'on a reçues au sujet de la construction de cette chaussée sont plutôt des estimations que des calculs, car, jusqu'à quel point le remplissage disparaîtra dans le fond mou rend la chose très imprécise. Le coût de construction imprécise d'un tunnel peut être prévu beaucoup plus facilement que celui de la construction d'une chaussée.

M. Thomas (Moncton): D'après le titre qu'il y a ici, vous êtes ingénieur professionnel, n'est-ce pas?

M. Brennan: C'est exact.

M. Thomas (Moncton): Je m'intéresse aussi à la route corridor et à vos rapports étroits avec ce projet. Êtes-vous au courant de la déclaration faite par un représentant de l'assemblée législative du Maine selon laquelle il avait écouté nos discussions sur le corridor routier et que l'assemblée législative du Maine est présentement saisie d'un projet de loi visant à trouver 30 millions pour terminer cette route à travers le Maine. Est-ce exact?

M. Brennan: Oui, c'est parfaitement exact. Chaque année depuis qu'on a étudié la question, et je fais partie du Comité depuis le début, nous n'avons jamais eu moins de $300,000 de l'état du Maine pour la construction de cette route. Nous avons étudié la possibilité

[*Texte*]

Washington to treat this as an interstate highway.

Mr. Thomas (Moncton): If this bill to provide $30 million passes the legislature it will provide, apparently, for the cost of that link between Quebec and New Brunswick.

Mr. Brennan: This is so. I saw this report to the federal government on the corridor road and it absolutely shattered us because it intimated that all expenses would be paid by the federal government. This means one thing: that whoever made that report certainly at no time contacted any member of the committee because at no time has the committee even intimated that the federal government should contribute a penny for a road outside of the provinces of Canada.

Mr. Thomas (Moncton): That is all, Mr. Chairman.

The Chairman: Mr. Corbin.

Mr. Corbin: Mr. Chairman, could we have the name of that report that the gentleman referred to.

The Chairman: Would you repeat the question, please?

Mr. Corbin: Could we have the correct name of the report that the gentleman has just referred to? Would that be the Intelligence Unit Report?

Mr. Brennan: It is the 11 or 12 volume report.

Mr. Corbin: That is what it is.

Mr. Brennan: Yes.

The Chairman: Mr. Rock.

Mr. Rock: Yes, Mr. Chairman. You were speaking before about the corridor road. Which plan do you prefer, the one that goes from Calais, Bangor, this east-west highway that the Americans were proposing, or the one that is further north?

Mr. Brennan: Well this has been a very contentious subject in the State of Maine as well as in the Maritime Provinces, particularly for those people in the northern part of New Brunswick. But the situation under which the State of Maine is prepared to pay for this is to open up an area which presently is one of the best holiday resort areas.

Originally when we were thinking of this, strictly from the standpoint of the Maritimes,

[*Interprétation*]

de présenter des instances à Washington pour considérer cette route comme étant une route inter-états.

M. Thomas (Moncton): Mais si le bill qui prévoit 30 millions de dollars est accepté, cela couvrirait les frais de la construction entre le Québec et le Nouveau-Brunswick?

M. Brennan: C'est exact. J'ai vu le rapport présenté au gouvernement fédéral sur le corridor routier et cela nous a terriblement surpris car cela semblait dire que tous les frais de construction seraient payés par le gouvernement fédéral. Cela ne veut dire qu'une chose: celui qui a présenté le rapport n'a certainement jamais communiqué avec les membres du Comité, car le Comité n'a jamais laissé entrevoir que le gouvernement fédéral doive verser un seul sou pour la construction de routes à l'extérieur des provinces du Canada.

M. Thomas (Moncton): C'est tout.

Le président: Monsieur Corbin.

M. Corbin: Pourriez-vous nous indiquer le nom du rapport dont on a parlé?

Le président: Pourriez-vous répéter votre question?

M. Corbin: Pourriez-vous nous indiquer le nom exact du rapport mentionné par Monsieur Brennan. Est-ce qu'il s'agit du *Intelligence Unit Report?*

M. Brennan: Il s'agit du rapport de 11 ou 12 volumes.

M. Corbin: Voilà ce que c'est.

M. Brennan: Oui.

Le président: Monsieur Rock.

M. Rock: Monsieur le président, vous parliez tout à l'heure du corridor routier. Quel projet préférez-vous? Celui qui va de Calais à Banger, de l'est à l'ouest, proposé par les Américains ou la route qui est plus au nord?

M. Brennan: Le sujet a porté à controverse dans l'état du Maine ainsi que dans les provinces Maritimes, surtout pour ce qui est de ces gens qui se trouvent dans le nord du Nouveau-Brunswick. L'état du Maine est prêt à payer seulement pour ouvrir une des régions qui se trouvent une des meilleures régions de tourisme à l'heure actuelle.

A l'origine, quand nous songions à ce projet, strictement du point de vue des Mariti-

[*Text*]

yes, we were thinking of the lower road entering from St. Stephen, Calais and going right straight across the state and coming in on the far side as close to the southern border of the Province of Quebec at that point as reasonably possible. But the State of Maine could not raise or could not talk the legislature into paying for a road at that point, whereas they could talk them into opening the northern route known as the Corridor Road—Route 6, beginning at McAdam and going across the Vanceboro, going down through Lee, Lincoln, Dover-Foxcroft, Greenville and Jackman.

There is a situation there which, when this corridor road is developed, that route that I have indicated to you, takes the road north of Lake Mégantic in the Province of Quebec, but the most desirable route for the corridor road would be south of Lake Mégantic and it is the intention to redirect this road at a later date at a place just after it leaves Dover-Foxcroft and take it through a lake system and hill system and bring it in south of Lake Mégantic and into Sherbrooke that way.

Mr. Rock: We have in our printed Minutes from last year a map of that southern route but we have no map in evidence of the northern route. Would you be able to supply us with a map of this northern route—the main corridor road that you are talking about?

Mr. Brennan: It will be supplied this afternoon.

Mr. Rock: And we can attach that to your part of the Minutes. Is that all right, Mr. Chairman?

The Chairman: Agreed?

Some hon. Members: Agreed.

The Chairman: Mr. Perrault.

Mr. Perrault: Mr. Chairman, the committee will be glad to know that all of my questions have been answered very well and I pass.

The Chairman: Any other questions, gentlemen? Mr. Corbin.

Mr. Corbin: If I may, sir. I am sorry I missed the first part of your presentation; I had to be out. I am naturally most concerned about the Maine corridor road although I have stated on a few occasions through the press that I am not in principle opposed to it. I am mainly concerned with priorities from

[*Interpretation*]

mes, oui, nous songions à la route plus au sud, qui entrait à partir de St Stephen, et Calais et qui se rendait à travers l'état et qui suivait d'aussi près que possible la frontière sud de la province du Québec. Mais l'état du Maine n'a pas pu persuader la législature d'accorder les subsides voulus pour la construction de cette route. On a cependant persuadé la législature d'approuver la route du nord, qu'on désigne sous le nom de route-corridor No. 6 qui commence à McAdam, traverse à Vanceboro et passe par Lee, Lincoln, Dover-Foxcroft, Greenville et Jackman.

La situation est telle là-bas que lorsqu'on ouvrira la route corridor, cette route que je viens de mentionner plus tôt, suivra la route tout près de Lac Mégantic dans la province de Québec, mais la route la plus souhaitable pour le corridor routier serait au sud du lac Mégantic et alors, on a l'intention de déplacer la route un peu plus tard à un endroit juste après sa sortie de Dover-Foxcroft et lui faire traverser tout un réseau de lacs et de collines pour en arriver au sud de lac Mégantic et l'amener à Sherbrooke de cette façon.

M. Rock: Dans notre compte rendu de l'an dernier, nous avons une carte de cette route du sud mais nous n'avons rien du tout en ce qui concerne la route nord. Pourriez-vous nous donner une carte indiquant plutôt la route du nord, le corridor routier principal dont vous parlez?

M. Brennan: On vous la fournira cet après-midi.

M. Rock: Et nous l'annexerons à votre partie du compte rendu. Ça va, monsieur le Président?

Le président: D'accord?

Quelques voix: D'accord.

Le président: Monsieur Perrault.

M. Perrault: Le Comité sera heureux de savoir que toutes mes questions ont trouvé réponse, et de très bonnes réponses. Je cède donc la parole à un autre.

Le président: Y a-t-il d'autres questions, messieurs? Monsieur Corbin.

M. Corbin: Merci. Je regrette de n'avoir pas entendu la première partie de votre présentation, j'ai dû m'absenter. Naturellement, je suis très préoccupé de cette question du corridor routier du Maine et même si j'ai déjà dit à certaines occasions qu'en principe je ne suis pas contre, je me préoccupe surtout des prio-

[*Texte*]

the provincial points of view of New Brunswick, P.E.I., Nova Scotia and Newfoundland, although Newfoundland is not very much affected by this proposed corridor route.

I have reached the stage now, after hearing many witnesses, where I am mainly concerned with the double-edge effect that this corridor route may have on the Maritimes. The witness previous to you, the Premier, although I respect him very much, I cannot quite agree with him when he said that the Maritimes, if competition does come down here from central Canada, will be able to deal with it quite well. This concerns me an awful lot because actually—and this is a warning—what I anticipate could happen to the economy of the Maritimes, and I mentioned this to the previous witness, is that we will be opening ourselves to internal dumping from the markets, the farms, the industrialists of Upper Canada. Would you have any comments in that respect, sir?

Mr. Brennan: Well, of course, a question like that is strictly an opinion question and I have my opinions and my opinions go like this: I feel as the development of this country is growing that the southern part of the Province of Quebec and most of the southern part of Ontario are the industrial areas of Canada, and that areas such as the West growing wheat and the East growing general food products, will be the most economically viable situation that we can have.

As far as I am concerned, I do know that in the products that we have, that are properly handled, there is sufficient quality in these products so that people will pay premium prices. But quite apart from that, I am very, very convinced that this is an economically viable situation and that what we need are those things to better connect us with our markets. Admittedly, these markets are artificially brought about, but if we bring about those things which will put us in the position to best serve these markets in the most economical way I do not think there is a single doubt in the world that we can do it and make money doing it.

Mr. Corbin: Have you made an in-depth economic study of this very problem, sir? Or has anyone done it?

Mr. Brennan: No-one that I know of, and most assuredly I have not.

Mr. Corbin: Have you in any way studied the quite possible detrimental effects the corridor road—easy access road to central Cana-

[*Interprétation*]

rités du point de vue des provinces du Nouveau Brunswick, de l'Île-du-Prince-Édouard, de Nouvelle-Écosse et de Terre-Neuve, bien que Terre-Neuve ne soit pas tellement affecté par cette question de corridor routier.

Mais là j'en suis arrivé au point où, après avoir entendu plusieurs témoins, ce qui me préoccupe le plus, ce sont les effets à double sens que cela pourrait avoir dans les Maritimes. Même si j'ai beaucoup d'estime pour lui, je ne suis pas tout à fait d'accord avec le premier ministre même de votre province, quand il dit que, si la concurrence arrive ici du centre du Canada, les Maritimes pourront très bien répondre à cette concurrence. Cette question me préoccupe beaucoup car en fait—et c'est un avertissement que je voudrais vous donner—ce qui pourrait produire pour l'économie des Maritimes et je l'ai mentionné, aux témoins précédents, c'est que nous allons servir de dépotoir aux marchés, aux agriculteurs et aux industriels du Canada central. Est-ce que vous auriez des commentaires à ce sujet?

M. Brennan: Évidemment, il s'agit d'une question d'opinions dans ce cas et voici mon opinion à ce sujet. J'ai l'impression, au fur et à mesure que notre pays se développe, que la partie sud de la province de Québec et la partie sud de l'Ontario se trouvent à être les centres industriels du Canada et il y a des régions comme l'ouest où on cultive le blé et l'est où on cultive les produits agricoles pour la consommation se trouveront à établir la situation la plus viable du point de vue économique que nous puissions connaître.

Dans la province, il y a suffisamment de qualité dans les produits que nous cultivons pour que les gens nous payent les meilleurs prix possibles. Mais à part cela, je suis tout à fait convaincu du fait que nous sommes dans une situation économique viable et que ce dont nous avons besoin, ce sont de meilleures liaisons avec nos débouchés. Évidemment, ce sont des marchés artificiels, mais si nous réussissons à aménager les services qui nous permettront de desservir ces marchés de la façon la plus économique possible, je n'ai aucun doute que nous réussirons. Et que nous ferons de l'argent en le faisant.

M. Corbin: Avez-vous, ou quelqu'un d'autre a-t-il déjà fait une étude économique en profondeur de ce problème?

M. Brennan: Je ne l'ai pas fait moi-même et je ne connais personne qui l'ait fait.

M. Corbin: Est-ce que vous auriez étudié les effets nuisibles que pourrait avoir le corridor routier—route d'accès facile au centre du

[*Text*]

da—if it were to go through Maine, would have on all this part north of New Brunswick? When I speak of north of New Brunswick I do not only refer to the coastal area which begins from Chatham-Newcastle to Campbellton to Edmundston, but I include as well all the shore area of the lower St. Lawrence River up to Quebec and on to Montreal, whose economy at this time—let us be realistic—depends to a very great degree on traffic going through those areas.

In my opinion, if Maine were to build its corridor road at this time, there would be a very detrimental effect and this is an opinion, this is a feeling I have, but I think I could justify it if I were given time. It would have a very detrimental effect on the economy of all that area especially from Woodstock to Montreal.

Mr. Brennan: Well, like yours, mine can only be an opinion. But today with the type of truck that we are using, these heavy tractor-trailers with saddle tanks and everything else, the most the trucker ever stops for is a snack and very seldom a real meal until he gets to his destination. I do not think that the total drop-out of the total transportation through that area would mean very much to it.

Mr. Corbin: That is fine for the truckers but let us not kid ourselves: other people will be travelling and spending loads of money in Maine that Canada will never see again.

Mr. McGrath: Mr. Chairman, I would like to raise a point.

The Chairman: Mr. McGrath.

Mr. McGrath: I would just like to raise a point of order. It seems to me that we are drifting away from the established procedure that we laid down. This is argument that we are hearing from the hon. member. This is not a question. I think it would expedite our procedure if we stuck to our established procedure.

Mr. Corbin: I respect that, Mr. Chairman. I will ask one final question. In your opinion, should not the Government of Canada, jointly with the provinces, before pushing ahead any idea of the Maine corridor route, study as well—and this is what the London Intelligence Unit did not do—what would be the detrimental effects on the existing traditional routes into central Canada. Would you agree that this should be studied as well? Should that not be recommended?

[*Interpretation*]

Canada—s'il devait passer par le Maine, sur le nord du Nouveau Brunswick? Quand je parle du nord du Nouveau Brunswick, je ne parle pas simplement de la région cotière qui commence à Chatham et Newcastle et qui va à Campbellton et Edmundston, mais je parle de toute cette région du bas St-Laurent jusqu'à Québec et Montréal même, dont l'économie à ce moment-ci—et soyons réalistes—dépend dans une très grande mesure de la circulation qui passe.

A mon sens, si le Maine devait construire ce corridor routier à ce moment-ci cela aurait un effet nuisible. C'est une opinion, mais je crois que je pourrais la justifier si on me donnait suffisamment de temps. Cela aurait un effet nuisible très considérable sur l'économie pour toute la région, surtout à partir de Woodstock jusqu'à Montréal.

M. Brennan: Tout comme vous, je ne puis avoir qu'une opinion. Mais aujourd'hui, avec les genres de camions que nous employons, les gros camions à remorque avec des réservoirs supplémentaires etc., le plus souvent le camionneur n'arrête que pour prendre un petit repas léger, il ne prend que rarement un gros repas avant d'en être à son point d'arrivée. Et je ne crois pas que la baisse que connaîtrait le transport à travers cette région ait une grande importance.

M. Corbin: Très bien pour les camionneurs, mais ne nous illusionnons pas. D'autres voyageurs voyageront aussi, et dépenseront au Maine de l'argent que le Canada ne reverra plus.

M. McGrath: J'aimerais soulever une question ici.

Le président: Monsieur McGrath.

M. McGrath: J'invoque le règlement. Il me semble que nous nous éloignons justement de la procédure établie. L'argument soulevé à l'heure actuelle n'est pas vraiment une question. Si nous voulions nous en tenir à la procédure normale, nous avancerions beaucoup plus vite.

M. Corbin: Oui, et je vais m'en tenir à cela. Monsieur le président, je vais poser une dernière question. A votre avis, est-ce que le gouvernement du Canada, conjointement avec les provinces, avant d'avancer l'idée du corridor routier du Maine, est-ce que le gouvernement ne devrait pas étudier ce que seraient les effets nuisibles sur les routes actuelles vers le Canada central? Est-ce qu'on ne devrait pas formuler une recommandation à cet égard?

[*Texte*]

Mr. Brennan: I feel this way about that question, that if we in the Maritimes are going to survive on an economically sound basis, then we have got to do those things which are economically sound. The ultimate development of the corridor road, as distinct from the present routing which Canadian truckers now use, will save approximately 180 miles in one direction, which is 360 miles on a return trip, for anything basically south of the Fredericton area.

Now, if we are going to continue to cheat ourselves out of the very things that will make us economically viable, then I do not think we are playing fair with ourselves.

Mr. Corbin: Thank you for not answering my question but you are as well...

The Chairman: Order, please. He does not have to, Mr. Corbin. Mr. Nesbitt.

Mr. Nesbitt: One very brief question, Mr. Chairman, perhaps by way of a very brief observation. It has been brought to my attention a number of times that the southern part of Ontario where it is pretty large as far as markets and population are concerned, that there would be much greater sale of fresh seafood products could they be obtained quickly and in good condition. The frozen seafood products lose a great deal of their flavour in the process. I was going to direct this question to one of the commercial companies but I do not see any other brief so perhaps I could direct it to you or one of the other witnesses. Has there been any sort of survey or any investigation into the prospects of using air traffic for getting fresh seafood products such as lobsters in particular, fresh fish and other products of this area into the central Canadian market, Toronto, London and that area?

Mr. Brennan: I do not know that there has been an in-depth study but there are certain exclusive restaurants up there who avail themselves of this service now and actually receive regular shipments by air.

Mr. Nesbitt: From this would you think that while this goes to exclusive restaurants at the moment, there might be a very large general demand if your product were promoted?

Mr. Brennan: I think as far as we are concerned in the Maritimes, that the quicker we get first-class transportation facilities the quicker our products will be accepted in these areas and that people will have them. One of the great things that is happening—mentioned in that part of the brief that I left

[*Interprétation*]

M. Brennan: Voici ce que je pense, si nous des Maritimes voulons survivre au point de vue économique, nous devons faire des choses censées du point de vue économique. Le développement du corridor routier, par rapport à la route actuelle qu'on emprunte actuellement épargnerait 180 milles dans un sens, ce qui veut dire 360 milles aller et retour pour tout ce qui est au sud de la région de Frédéricton.

Si nous continuons à nous laisser enlever ces choses qui nous rendraient viables du point de vue économique, nous ne sommes pas justes envers nous-mêmes.

M. Corbin: Merci de n'avoir pas répondu à ma question, mais vous...

Le président: A l'ordre, s'il vous plaît. Il n'a pas besoin de le faire, Monsieur Corbin. Monsieur Nesbitt.

M. Nesbitt: Une question très brève, monsieur le président, ou plutôt une observation très bève. On a attiré plusieurs fois mon attention sur le fait que, dans le sud de l'Ontario où on a de vastes marchés et une importante population, il y aurait beaucoup plus de ventes de produits de mer si on pouvait les y expédier rapidement et une bonne condition. Les produits de mer congelés perdent une bonne partie de leur saveur. J'allais poser cette question à l'une des entreprises commerciales, mais je ne vois pas d'autre mémoire, alors je pourrais peut-être vous poser la question. Est-ce qu'il y eu une étude ou une enquête sur les possibilités d'utiliser le transport aérien pour obtenir des produits de la mer frais comme le homard en particulier, le poisson frais, etc .. de cette région pour les amener au marché du Canada central, dans la région de Toronto et London.

M. Brennan: Je ne crois pas qu'il y ait de telles études détaillées de faites, mais il y a des citoyens qui ont déjà recours à ce service et qui se font expédier régulièrement par air de telles denrées.

M. Nesbitt: Croyez-vous que, même si cela est acheminé vers des restaurants exclusifs maintenant, il pourrait y avoir une demande très grande si l'on faisait la promotion du produit?

M. Brennan: Je crois qu'en ce qui nous concerne, nous des Maritimes, plus rapidement nous pourrons obtenir un service de première classe en matière de transport, plus vite nos produits seront acceptés dans ces régions. Un des grands problèmes et cela a été mentionné dans mon mémoire, c'est que les retards dans

[*Text*]

out—is that shipments delayed en route, shipments held up, is damaging the quality of our products in many cases. We need direct shipments and improvement of service by shipment in smaller lots because of the type of commodity. Lobster, oysters, berries, are all small lot shipments and we have got to get improved service for the small lot shipment so that the customer will get a better product.

The Chairman: Well, gentlemen, this concludes the questioning period of your brief, and I would like to thank these gentlemen for being here. Thank you very much, sir.

Mr. Brennan: I would like to say a very sincere thank you to members of the Committee for hearing our brief.

The Chairman: I will now call upon the T. H. Fraser Company, Boneless Chicken Canner, Murray Harbour. Are they here? The T. H. Fraser brief will stand.

The Prince Edward Island Potato Marketing Board.

Mr. Rose: Mr. Chairman, on that, it is now 12.30 and we have to be back here at 2.00 o'clock. Do you think it is really fair to this witness, and to this brief, to hear the man at this time when we are all starving?

The Chairman: Would you prefer to appear at 2.00 o'clock? Very well, we will adjourn until 2.00 o'clock.

The meeting is adjourned.

AFTERNOON SITTING

The Chairman: Gentleman, we have with us today the Potato Marketing Board. On my right are Mr. Donald MacKenzie; Mr. Robert Farquharson and Mr. George MacMurdo. I would ask Mr. MacKenzie to summarize their brief.

Mr. Donald MacKenzie (Member, P.E.I. Potato Marketing Board): Thank you, Mr. Chairman and members of the Standing Committee on Transport and Communications.

I wish to present this brief today on behalf of the potato industry of Prince Edward Island.

The potato Industry is very important to the economy of Prince Edward Island. Potatoes being a bulk commodity, transpor-

[*Interpretation*]

les expéditions détériorent la qualité de notre produit dans bien des cas. Nous avons besoin d'un service d'expédition directe et une amélioration du transport en lots plus petits à cause de la nature du produit. Les huîtres, le homard, les baies, ne sont pas des denrées qui sont envoyées en grande quantité. Il nous faut donc avoir une amélioration du service pour les expéditions de moins d'importance afin que le client reçoive un meilleur produit.

Le président: Voici la fin de la période des questions, à la suite de la présentation de ce mémoire. Je remercie les deux témoins.

M. Brennan: Je remercie les membres du Comité d'avoir bien voulu entendre notre mémoire.

Le président: Je demanderais donc à la T. H. Fraser Company, conserverie de poulet désossé, de Murray Harbour, de bien vouloir se présenter. Messieurs, êtes-vous ici? Le mémoire de la T. H. Fraser est donc réservé.

L'Office de commercialisation de la pomme de terre de Île-du-Prince-Édouard.

M. Rose: Monsieur le Président, il est maintenant 12h30. Si je comprends bien, il nous faut être de retour ici à 2 heures. Croyez-vous qu'il soit juste et équitable pour ce témoin de l'entendre maintenant alors que nous sommes affamés?

Le président: Aimerez-vous mieux revenir à 2 heures? Très bien, nous ajournerons la séance jusqu'à 2 heures.

La séance est levée.

SÉANCE DE L'APRÈS-MIDI

Le président: Messieurs, nous avons avec nous aujourd'hui les représentants de l'Office de commercialisation des pommes de terre; j'ai, à ma droite, MM. Donald MacKenzie, Robert Farquharson, et George MacMurdo. Je demanderais donc à M. MacKenzie de nous donner un résumé du mémoire qu'ils ont préparé.

M. Donald MacKenzie (membre de l'Office de commercialisation des pommes de terre de l'Île-du-Prince-Édouard): Merci beaucoup, monsieur le président et messieurs les membres du Comité permanent des Transports et des Communications.

Je désire présenter ce mémoire au nom de l'industrie de la pomme de terre de l'Île-du-Prince-Édouard.

L'industrie de la pomme de terre est très importante pour l'économie de ma province. La pomme de terre étant une denrée pondé-

[*Texte*]

tation by water and rail is the most economical means. The markets for our crops, are a considerable distance from the producing area and for this reason we feel that potatoes from Prince Edward Island should be considered the same as wheat in the West. If we are to progress we require a reasonably low rate of transportation coupled with speedy delivery.

In the past five years production has increased by approximately 25 per cent and all indications are that it will continue at this rate in the future. We have in this province approximately 500,000 to 600,000 acres of land suitable for growing potatoes; the soil and climate we more suitable than any other place in North America. Up to the present time only 52,000 acres are being used for potato growing.

At the time Prince Edward Island joined Confederation the area included agriculture, fisheries, manufacturing and shipbuilding, having a population of approximately 113,000 people. Since that time we have contributed greatly to the development of other areas in Canada but comparatively very little to our own. For example, we purchase annually from Ontario and Quebec $80 million worth and upwards of their production. We feel that a causeway should provide us with up to date transportation both ways but definitely a causeway with rails.

We would be surprised and disappointed if we did not have the full support of the other provinces in the building of such a causeway as we are a very valuable market for the many supplies. Rail service must be maintained from our arm shipping points to mainland destinations and included in the plan for the causeway across the Strait.

Since the policy of the CNR seems to include the closing of some billing stations and others are closed on Saturdays and mail service is not always the best, it is suggested that the CNR be requested to accept billing at any billing station for cars loaded at any station on the Island. In many cases this would save the CNR considerable money since cars could be moving from one to several days earlier than is now the case.

[*Interprétation*]

reuse, on la transporte le plus économiquement par rail ou par voie maritime. Les marchés où nous écoulons nos récoltes sont très éloignés des régions de production et c'est pourquoi, nous sommes d'avis que les pommes de terre de l'Île-du-Prince-Édouard devraient être considérées au même titre que le blé de l'Ouest. Il nous faut, pour nous développer, des tarifs de transport raisonnablement bas et la garantie d'une livraison rapide.

Au cours des cinq dernières années, la production a augmenté dans une proportion de 25 p. 100 et tout semble indiquer qu'il en sera ainsi dans les années qui viennent. Nous avons, dans cette province, de 500,000 à 600,000 acres de terre environ qui se prêtent à la culture de la pomme de terre; le sol et le climat sont plus favorables ici que partout ailleurs en Amérique du Nord. Jusqu'ici, seulement 52,000 acres ont été utilisées pour la culture de la pomme de terre.

Au moment où l'Île-du-Prince-Édouard est entrée dans la Confédération, l'économie de l'île reposait sur l'agriculture, les pêcheries, quelques industries et la construction de navires; la population était d'environ 113,000 âmes. Depuis lors, nous avons contribué activement au développement des autres régions du Canada mais relativement peu au développement de la nôtre. Ainsi, nous achetons annuellement de l'Ontario et du Québec pour $80 millions et plus de leurs produits. Nous sommes d'avis que la chaussée projetée devrait nous donner un mode adéquat de transport de part et d'autre, mais il faudrait que cette chaussée comprenne une voie ferrée.

Nous serions surpris et même déçus si nous n'avions pas l'appui total des autres provinces pour l'aménagement d'une telle chaussée, étant donné que nous sommes un marché très important pour ces différents producteurs. Le service ferroviaire doit être maintenu à partir des centres d'expédition de l'île vers le continent et inclus dans le programme d'aménagement de la chaussée traversant le détroit. Puisque la politique du National-Canadien semble inclure la fermeture de certaines gares d'expédition, que d'autres gares sont fermées le samedi et que le service postal n'est pas toujours à son meilleur, nous proposons que le National-Canadien soit obligé d'accepter la facturation à toute gare désignée à cette fin pour les wagons chargés à l'une quelconque des gares de l'île. Dans bien des cas, cela pourrait épargner beaucoup d'argent au National-Canadien car ses wagons pourraient être acheminés vers leur destination plutôt que dans le cas présent.

[*Text*]

Referring to the Charlottetown St. John's Newfoundland water service which was served last year by the M. V. Gaspesian, this service has to be subsidized provincially and federally, should be extended to include the major island shipping port of Summerside, especially since this port serves a much larger potato acreage than Charlottetown.

It is considered that 50 per cent of the space should be reserved for loaders in the Summerside area. The P.E.I. to Seven Island water service was serviced by the M. V. *Souris Trader*. This service is also subsidized by the provincial and federal governments. While the volume of Island produce shipped on this boat for the last few years does not seem to warrant its continuation, it is nevertheless recommended that it be continued for the coming season, after which it should be reviewed again.

The reasons for supporting these suggestions are:

(a) it is the most economical method of supplying Island produce to the north shore markets and without it we would be unable even to quote on this business;

(b) not enough time has elapsed since the meeting with the P.E.I. sponsored government trade mission to this area last fall, when a number of good contacts were made and considerable optimism developed that our volume could be improved.

(c) the possibility—and I must add here that this trade mission is coming here on March 2 or 3—that a return trade mission will be invited before or soon after the opening of navigation with the hope that this business can be really tested during 1969.

In order properly to develop these north shore markets, it is essential that the Department of Transport build on the docks at Seven Islands and Baie Comeau controlled storages for receiving perishable goods such as potatoes, meat, eggs, and so on on arrival.

This is respectfully submitted on behalf of the Prince Edward Island Potato Marketing Board. Mr. Chairman and gentlemen, this is our brief.

The Chairman: Thank you, very much. Mr. Pringle?

Mr. Pringle: Thank you, Mr. Chairman. I would like to ask whether you feel there is

[*Interpretation*]

A propos du service de traversier qui relie Charlottetown à Saint-Jean (Terre-Neuve), service qui doit être subventionné par les gouvernements provincial et fédéral et qui était assuré l'an passé par le *M.V. Gaspé*, il devrait desservir le port d'expédition de Summerside, puisque ce port sert de lieu d'expédition pour une région agricole beaucoup plus vaste que dans le cas de Charlottetown.

On considère que 50 p. 100 de l'espace à Summerside devraient être réservés aux chargeurs. Le service de traversier reliant l'Île-du-Prince-Édouard à Sept-Îles a été assuré par le *M.V. Souris Trader* et il est aussi subventionné par les gouvernements provincial et fédéral. Bien que le volume de produits de l'Île-du-Prince-Édouard qui ont été expédiés par ce navire au cours des dernières années ne semble pas motiver sa continuation, on recommande tout de même de maintenir ce service pour l'année qui suit, après quoi il conviendra de revoir cette décision.

Les raisons évoquées à l'appui de ces suggestions sont les suivantes:

a) C'est la méthode la plus économique pour expédier les produits de l'Île à la côte Nord et sans ce service, nous ne pourrions même pas tenter d'obtenir ce marché.

b) Il s'est passé trop peu de temps depuis la réunion avec la mission commerciale commanditée par le gouvernement de l'Île-du-Prince-Édouard: cette mission s'est précisément rendue dans cette région et a établi à cette occasion de nombreux contacts qui présagent bien pour l'avenir.

c) Il est possible, et je dois mentionner à ce moment-ci que cette mission commerciale vient à Charlottetown le 2 ou le 3 mars, il est possible donc qu'une autre mission commerciale soit invitée avant ou un peu après l'ouverture de la navigation, dans l'espoir qu'on explorera vraiment ces possibilités commerciales au cours de 1969.

Pour avoir vraiment accès à ces marchés de la côte Nord, il est essentiel que le ministère des Transports construise sur les quais de Sept-Îles et de Baie-Comeau des entrepôts adéquats pour les denrées périssables comme les œufs, les pommes de terre, la viande, etc.

Nous vous présentons respectueusement le tout au nom de l'Office de commercialisation des pommes de terre de l'Île-du-Prince-Édouard.

Monsieur le président, messieurs, voilà donc notre mémoire.

Le président: Merci beaucoup. Monsieur Pringle?

M. Pringle: Merci beaucoup, monsieur le président. Je voudrais poser une question:

[*Texte*]

ample potato storage on Prince Edward Island, and I am referring to processed potatoes? If you process a product on the Island it becomes a more valuable product and should help the general economy a little more. Do you have adequate potato storage to service properly the processing plants on the Island?

Mr. MacKenzie: Do you mean at the farm level?

Mr. Pringle: I am talking about the level just prior to secondary industry.

Mr. MacKenzie: I would have to say, yes, in answer to your question. I think we have enough storage on Prince Edward Island.

Mr. Pringle: That was my question, Mr. Chairman.

The Chairman: Are there any other questions, gentlemen? Mr. Skoberg?

Mr. Skoberg: Mr. Chairman, do you have sufficient railway cars now to handle your market demand?

Mr. MacKenzie: Right at the moment, yes. In past years we have encountered great difficulty, particularly during the months of March and April. I think the CNR for this past season, at least from October on, have given us better service this particular year than they have for the past number of years. With the end of March and April being upon us, and again with ice conditions as they are, we are hoping we will not have this problem this year, but this has been a real problem in the past.

Mr. Thomas (Moncton): Mr. MacKenzie, could you clarify your statement on page 2 of your brief? Apparently there seems to be some problem with billing. Do I understand correctly from this because the CNR closed some billing stations and some are not open Saturdays, that if a particular way station is not open where the shipper wants to ship something the shipment is held up because they cannot get the bills?

Mr. MacKenzie: This is true. Let us take as an example a shipper in Summerside who has a car loading at Souris, which is at the east end of the Island. Let us assume that the

[*Interprétation*]

croyez-vous qu'il y ait un espace d'entreposage suffisant pour les pommes de terre sur l'Île-du-Prince-Édouard: je veux parler des pommes de terre ayant subi une transformation. Si vous apprêtez des pommes de terre dans l'Île, elles acquerront ainsi une plus grande valeur; c'est une mesure qui pourrait aider l'économie de la région. Est-ce que vous avez assez d'espace d'entreposage des pommes de terre pour alimenter en matières premières les usines de transformation situées dans l'île?

M. MacKenzie: Est-ce que vous voulez dire au niveau de la ferme?

M. Pringle: Je situe ma question au niveau qui précède immédiatement l'industrie secondaire.

M. MacKenzie: Je dois répondre oui à cette question. Il y a suffisamment d'espace d'entreposage sur l'île.

M. Pringle: C'était tout ce que j'avais à demander, monsieur le président.

Le président: Auriez-vous d'autres questions à poser. Monsieur Skoberg?

M. Skoberg: Monsieur le président, est-ce que vous avez suffisamment de wagons ferroviaires pour effectuer toutes vos livraisons?

M. MacKenzie: En ce moment, oui. Toutefois, au cours des dernières années, nous avons éprouvé beaucoup de difficultés surtout pendant les mois de mars et d'avril. Le National-Canadien, à partir d'octobre au moins, nous a donné un meilleur service qu'au cours des années précédentes. Mars et avril approchent rapidement et, préoccupés comme nous le sommes par les conditions de la navigation, nous espérons que nous n'aurons pas ce problème cette année. Mais ce fut, par le passé, de véritables problèmes.

M. Thomas (Moncton): Monsieur MacKenzie, pourriez-vous préciser la déclaration que vous faites à la page 2 de votre mémoire? Il semble y avoir un certain problème your la remise des feuilles d'expédition. Est-ce que vous voulez dire que la fermeture de certaines gares d'expédition par le National-Canadien, ajoutée au fait que certaines gares ne sont pas ouvertes le dimanche, causent des ennuis aux expéditeurs et que la livraison de leurs produits est retardée parce qu'ils ne peuvent obtenir leurs feuilles d'expédition?

M. MacKenzie: Oui, c'est juste. Prenons, par exemple, le cas d'un expéditeur de Summerside qui a un chargement à Souris, localité située dans la partie est de l'Île.

[*Text*]

farmer who is loading this particular car comes in on Friday evening and he is prepared to load it on Saturday. If this shipper in Summerside mails the bills to Souris it is quite conceivable that they will not get down there until Monday morning or perhaps Tuesday morning.

Mr. Thomas (Moncton): And the car cannot go?

Mr. MacKenzie: If the car is loaded on Friday the car cannot go.

Mr. Thomas (Moncton): You mean the car could be sitting there from Saturday until Monday or Tuesday?

Mr. MacKenzie: That is right, and it happens very frequently.

Mr. Thomas (Moncton): Has your Board made representations to the Canadian National Railways about this? Is there some way they can correct it?

Mr. MacKenzie: This request was made to the CNR a year ago last fall. I do not know what clerical difficulties they could see in it, but they apparently had some clerical differences. Our contention is that if that bill were presented to CNR say in Summerside, then they would process that bill and start that car rolling.

Mr. Thomas (Moncton): Do you have many small way stations of this type?

Mr. MacKenzie: Yes, there are 33 way stations on the Island. There are many more loading points than there are way stations and then again there are many stations closed on Saturdays.

Mr. Thomas (Moncton): So if a shipping point has no way station they have to make out the bill of lading and mail it to the nearest way station before the car can move.

Mr. MacKenzie: Yes, that is right.

Mr. Trudel: Mr. MacKenzie, I understand the bulk of your shipments are by rail?

Mr. MacKenzie: Yes.

Mr. Trudel: You have indicated in your brief, sir, that there has been a growth of 25 per cent, I believe, over a five-year period in the potato industry in the province. Did I get that correctly?

[*Interpretation*]

Disons que le fermier qui a ce wagon en particulier arrive le vendredi soir et qu'il est prêt à faire le chargement le samedi si cet expéditeur poste ses feuilles d'expédition pour Souris, il se peut fort bien que cette feuille de route n'y parvienne pas avant lundi matin ou même mardi matin.

M. Thomas (Moncton): Et le wagon ne peut partir?

M. MacKenzie: Si le wagon est chargé le vendredi, il ne pourra partir.

M. Thomas (Moncton): Vous voulez dire que le wagon pourrait être immobilisé du samedi au lundi ou même mardi?

M. MacKenzie: C'est exact. Et cela se produit souvent.

M. Thomas (Moncton): Est-ce que votre Office a fait des démarches auprès du National-Canadien pour corriger cette situation?

M. MacKenzie: La demande a été faite au National-Canadien, il y a un an l'automne dernier. Je ne sais pas quelles sont les difficultés administratives qu'ils y voyaient, mais, apparemment, ils voyaient des désavantages à cette nouvelle procédure. Nous prétendons que si cette feuille d'expédition était présentée au National-Canadien, disons à Summerside, alors, le chargement pourrait être inscrit et le wagon pourrait être acheminé.

M. Thomas (Moncton): Est-ce qu'il y a bon nombre de petites gares de ce genre?

M. MacKenzie: Oui, il y en a 33 sur cet île. Il y a beaucoup plus de centres de chargement que de petites gares et plusieurs gares sont fermées le samedi.

M. Thomas (Moncton): Ainsi, si un centre d'expedition n'a pas de petite gare qui y est juxtaposée, alors il faut faire la feuille d'expédition et l'envoyer à la gare la plus rapproché avant que ces wagons puissent être acheminés.

M. MacKenzie: C'est juste.

M. Trudel: Monsieur MacKenzie, je crois comprendre que la majorité de vos expéditions se font par rail.

M. MacKenzie: Oui.

M. Trudel: Vous avez indiqué, dans votre mémoire, que vous avez eu une augmentation de 25 p. 100 sur une période de cinq ans pour la production des pommes de terre dans la province. Est-ce que j'ai bien compris?

[*Texte*]

Mr. MacKenzie: Yes.

Mr. Trudel: Could you relate this, sir, to the growth of the potential Canadian market?

Mr. MacKenzie: The real potential market is to the south of us. Again, if you bring in water shipment I feel this is a real potential growth area. This may depend on containerized water shipment. I do not know just how much real potential growth we have in our Quebec and Ontario markets. But certainly I think our real growth is south.

Our exports are up this year. We export particularly seed. We export seed to Greece, Venezuela and enjoy quite a table export business in Puerto Rico along with the West Indies area in general—the Caribbean area.

Mr. Trudel: Would you care to put a percentage sir, on the export as compared to the domestic market?

Mr. MacKenzie: Our exports have shown the greater percentage of increase.

Mr. Trudel: It would be what—60 per cent?

Mr. MacKenzie: Over the last year, you mean?

Mr. Trudel: Yes.

Mr. MacKenzie: I would say this year roughly 60 per cent, yes.

Mr. Trudel: Now, you have also indicated your endorsement of the causeway with rail facilities and I would like to relate this to the figure that you used of $80 million that are being imported to the province from the Ontario and Quebec markets, the overall importation. Could you, sir, by the same token give us an idea of the export market in the over-all market that is going out from here towards either the southern market that you have mentioned or the Canadian market?

Mr. MacKenzie: You mean, dollar-wise?

Mr. Trudel: Dollar-wise.

Mr. MacKenzie: This varies greatly from year to year. I would judge this year the total value would not exceed $10 million, although two years ago I think DBS figures show that it was to the value of $24 million.

[*Interprétation*]

M. MacKenzie: Oui.

M. Trudel: Pourriez-vous rattacher cela à la croissance du marché éventuel au Canada?

M. MacKenzie: La véritable possibilité d'expansion du marché se trouve au sud. Une fois de plus, si vous tenez compte du transport maritime, je trouve que le sud présente une véritable possibilité d'expansion de marché. Tout dépendra des avantages que pourra apporter l'utilisation des conteneurs dans les expéditions maritimes. Je ne pourrais vous dire quelles sont les possibilités d'expansion éventuelle sur les marchés de Québec et d'Ontario. C'est au sud, je crois, que notre marché peut prendre le plus d'expansion. Nos exportations sont à la hausse cette année. Nous exportons surtout des semences vers la Grèce et le Venezuela, mais nous avons un bon marché à Porto-Rico, ainsi que dans la région des Antilles en général.

M. Trudel: Pourriez-vous nous donner le pourcentage des exportations en comparaison avec le marché intérieur?

M. MacKenzie: Ce sont nos exportations qui ont connu la plus forte augmentation.

M. Trudel: De l'ordre de combien? Soixante pour cent?

M. MacKenzie: Par rapport à l'an passé?

M. Trudel: Oui.

M. MacKenzie: Je dirais que l'augmentation est d'à peu près 60 p. 100.

M. Trudel: Vous avez aussi indiqué que vous étiez en faveur du projet de construction d'une chaussée avec voie ferrée et j'aimerais rattacher cette question aux chiffres que vous avez utilisés, soit 80 millions de dollars d'importations dans votre province de marchandises provenant de l'Ontario et du Québec. Pourriez-vous nous donner, par la même occasion, des détails sur les marchés d'exportation de vos marchandises, soit vers le sud, soit dans les autres provinces du Canada.

M. MacKenzie: Vous voulez dire en dollars?

M. Trudel: En dollars.

M. MacKenzie: Les chiffres varient d'une année à l'autre. Je dirais que cette année, que la valeur totale ne dépasse pas 10 millions de dollars, bien qu'il y a deux ans, le Bureau fédéral de la statistique nous indiquait que nos exportations étaient de l'ordre de 24 millions.

[*Text*]

Mr. Trudel: The reason I asked the question, Mr. MacKenzie, is because we have been told by various people that 90 per cent of the time some of the facilities going one way or the other are not being used, and that was my reason for trying to establish a relationship between the two.

Thank you, Mr. Chairman.

Mr. Rock: You were speaking about the quantity of potatoes you sell, but could you tell me what the price is of a 50-pound bag before it leaves the Island?

Mr. MacKenzie: What is the price? To the producer today?

Mr. Rock: Yes, that is right; to the producer? No, No. What is the market price of a 50-pound bag of potatoes before it leaves the Island?

Mr. MacKenzie: Do you mean what is the value of a carload when it is loaded ready to ship off the Island? Is that your question? I do not quite follow you.

Mr. Rock: No. You see, as a consumer I know what we have to pay in Montreal for a 50-pound bag of potatoes. I would be interested to know, before it leaves the Island, what price do you get for that 50-pound bag of potatoes.

Mr. MacKenzie: Basically on 75 cents on today's market.

Mr. Rock: Before it leaves?

Mr. MacKenzie: Right.

Mr. Rock: Thank you. Do you find any difficulty in finding shipping space on ships going to the Caribbean?

Mr. MacKenzie: It has been very rough this winter, particularly due to the strike on the U.S. coast, but basically space is usually available from Halifax or Saint John.

Mr. Rock: There are no ships discontinuing their routes? You do not find any ships discontinuing their routes to the Caribbean?

Mr. MacKenzie: Quite a number of lines have dropped out of the Caribbean, but the Saguenay Shipping in particular—maybe I should not name names here...

Mr. Rock: I think you should.

Mr. MacKenzie: I should not, I am sorry.

[*Interpretation*]

M. Trudel: Je vous en parle parce que différents témoins nous ont dit que, la plupart du temps, certaines installations allant dans un sens ou dans l'autre ne sont pas utilisées et j'aimerais établir la relation qui existe entre les deux. Merci beaucoup, monsieur le président.

M. Rock: Vous parliez de vos ventes de pommes de terre pourriez-vous me dire quel est le prix d'un sac de 50 livres avant qu'il quitte l'Île?

M. MacKenzie: Le prix pour le producteur?

M. Rock: Oui, c'est juste, pour le producteur. Non, non. Quel est le prix sur le marché pour un sac de 50 livres de pommes de terre avant qu'il ne quitte l'Île.

M. MacKenzie: Vous voulez dire quelle est la valeur d'un wagon rempli de pommes de terre alors qu'on est prêt à l'expédier à l'extérieur? Est-ce là votre question? J'ai du mal à comprendre où vous voulez en venir.

M. Rock: Non. Voici: en tant que consommateur, je sais ce que nous devons payer à Montréal pour un sac de 50 livres de pommes de terre. Je voudrais savoir le prix que vous obtenez pour un sac de 50 livres avant qu'il ne quitte l'Île?

M. MacKenzie: A peu près 75 cents sur le marché d'aujourd'hui.

M. Rock: Avant son départ?

M. MacKenzie: C'est juste.

M. Rock: Merci. Avez-vous déjà eu des difficultés à trouver de l'espace à bord des navires à destination des Caraïbes?

M. MacKenzie: Oui, ce fut très difficile cette année, à cause surtout de la grève sur la côte est des États-Unis; mais, généralement, on peut trouver de l'espace à Saint-Jean ou à Halifax.

M. Rock: Il n'y a pas de navires qui abandonnent leur trajet? Est-ce qu'il y a des navires qui abandonnent le trajet vers les Caraïbes?

M. MacKenzie: En effet, plusieurs sociétés de navigation ont abandonné la route maritime des Caraïbes, mais la Saguenay Shipping, en particulier— ; peut-être vaudrait-il mieux ne pas donner de noms ici.

M. Rock: Je crois que vous pouvez.

M. MacKenzie: Je ne devrais pas, je m'excuse.

[*Texte*]

Mr. Rock: You should.

Mr. MacKenzie: There is still service into the Caribbean that has met our requirements.

Mr. Rock: The reason I was asking that question about the ships to the Caribbean is because we have had, I believe, one complaint that when a ship does drop out of service you have no recourse. You cannot make a complaint to anyone. There is no board to govern such a case as there is if you want to drop out of the freight services, and things like that. This is the reason I was asking that question.

Are you concerned that there is no board to appeal to in case a shipping firm wants to discontinue shipping service in the area going to the Caribbean or anywhere else?

Mr. MacKenzie: This is a very, very real and very true problem. If one line dropped out of Halifax we have had the course when it comes to the Caribbean.

The Chairman: Mr. McGrath?

Mr. McGrath: Mr. Chairman, could the witness tell us approximately what percentage of the potato production of Prince Edward Island goes to Newfoundland?

Mr. MacKenzie: I believe it would be somewhere around 12 per cent.

Mr. McGrath: Are you including Labrador in that figure?

Mr. MacKenzie: I would think that figure would be generous enough to include both Labrador and Newfoundland.

Mr. McGrath: I realize, Mr. Chairman, that this is a matter of record but I asked the question to facilitate the study of our evidence and the drafting of our report. What is the subsidy, both federal and provincial, on the M. V. Gaspesien which goes to St. John's, Newfoundland?

Mr. MacKenzie: I do not have that information.

An hon. Member: It is roughly $100,000.

Mr. McGrath: I thought it was $80,000 federal and $20,000 provincial. Is that approximately it?

Mr. MacKenzie: Yes.

[*Interprétation*]

M. Rock: Vous devriez.

M. MacKenzie: Il y a toujours un service de transport maritime pour les Caraïbes et il satisfait à nos besoins.

M. Rock: La raison pour laquelle je posais la question au sujet des navires à destination des Caraïbes, c'est qu'il y a un grief qui a été formulé à l'effet qu'advenant la discontinuation du service par un navire, vous n'avez plus aucun recours, vous ne pouvez formuler de grief à quiconque. Il n'y a pas d'organisme de régie pour régler de tels cas comme il y en a si vous discontinuez un service de transport de marchandises ou autre service du genre. Voilà pourquoi je pose cette question. Est-ce que vous vous inquiétez du fait qu'il n'y ait pas d'organisme de régie à laquelle vous pourriez en appeler si une société désire interrompre son service dans une région donnée, dans les Caraïbes ou ailleurs.

M. MacKenzie: C'est sans doute un grave problème. Ainsi, lorsqu'une société maritime a discontinué son service à Halifax, nous avons eu des difficultés pour l'expédition aux Caraïbes.

Le président: Monsieur McGrath.

M. McGrath: Monsieur le président, le témoin pourrait-il nous dire quel pourcentage de la production de pommes de terre de l'Île-du-Prince-Édouard est dirigée vers Terre-Neuve?

M. MacKenzie: Environ 12 p. 100.

M. McGrath: Incluez-vous le Labrador dans ce chiffre?

M. MacKenzie: Je crois que cela serait assez important pour comprendre le Labrador et Terre-Neuve.

M. McGrath: Je sais, monsieur le président, que c'est une question pour le compte rendu, mais j'ai posé la question pour faciliter l'étude de notre témoignage et pour nous aider aussi à rédiger notre rapport. Quelle subvention, fédérale et provinciale, est accordée au *M. V. Gaspésien* qui va à Saint-Jean (Terre-Neuve)?

M. MacKenzie: Je n'ai pas ces renseignements.

Une voix: C'est environ $100,000.

M. McGrath: Je croyais que c'était $80,000, du fédéral et $20,000 du provincial. Est-ce à peu près ce qu'il en est?

M. MacKenzie: Oui.

[*Text*]

Mr. McGrath: I asked that question to get it on the record, Mr. Chairman.

What is the subsidy on the P.E.I.-Seven Islands route on the M. V. Souris Trader?

Mr. MacKenzie: I believe it is around $80,000.

Mr. McGrath: Would that be the same provincial-federal proportion—$60,000 federal and $20,000 provincial?

Mr. MacKenzie: I believe it is $40,000 federal and $38,000 provincial.

Mr. McGrath: Would the produce in connection with the service going to Seven Islands be destined for the Labrador market?

Mr. MacKenzie: Going to Seven Islands?

Mr. McGrath: Seven Islands, for example, is the shipping point for Labrador City and Wabush.

Mr. MacKenzie: I think Mr. Farquharson is more familiar with this particular part of it than I am.

Mr. Robert Farquharson (Prince Edward Island Potato Marketing Board, Charlottetown, Prince Edward Island): I doubt if there is very much goes by way of Seven Islands to Labrador. Normally it goes by rail to North Sydney, steamship to Port aux Basques, Port aux Basques to a point north of Corner Brook and thence steamer across to Labrador City.

Mr. McGrath: How can you get to Labrador City, which is in western Labrador, by steamer?

Mr. Farquharson: There is a steamship service from northern Newfoundland across to Labrador.

Mr. McGrath: To Seven Islands.

Mr. Farquharson: I thought you were asking me...

Mr. McGrath: No, no. The point I am making is that this appears to me to be a very inefficient way to get your produce into western Labrador. I assumed that this P.E.I.-Seven Islands service was going into western Labrador, but if you are shipping it to Newfoundland and then shipping it back to Labrador this is about the most inefficient way you have of getting your produce into Labrador.

[*Interpretation*]

M. McGrath: J'ai posé la question pour la consigner au compte rendu, monsieur le président. Quelle est la subvention accordée pour la route Î.-P.É.-Sept-Îles le *M.V. Souris Trader*?

M. MacKenzie: Environ $80,000.

M. McGrath: Est-ce que ce serait la même proportion fédérale-provinciale, soit $60,000 et $20,000?

M. MacKenzie: Je pense que c'est $40,000, pour le fédéral et $38,000 pour le provincial.

M. McGrath: Est-ce que le produit relié au service allant à Sept-Îles serait destiné au Labrador?

M. MacKenzie: Allant à Sept-Îles?

M. McGrath: Disons, s'il va à Sept-Îles. Est-ce que le point d'expédition est Labrador City et Wabush?

M. MacKenzie: Je vais laisser le soin de répondre à M. Farquharson.

M. R. Farquharson (Office de commercialisation des pommes de terre de l'Île-du-Prince-Édouard, Charlottetown (Î.-P.-É.): Je ne crois pas qu'il y ait tellement d'expéditions au Labrador par Sept-Îles. Habituellement, tout se fait par chemin de fer jusqu'à North Sydney, et ensuite par bateau jusqu'à Port-aux-Basques, de là jusqu'à un endroit au nord de Corner Brook, et ensuite par navire jusqu'à Labrador City.

M. McGrath: Comment pouvez-vous aller à Labrador City, par navire, alors que cette ville est dans la partie ouest?

M. Farquharson: Il y a un service maritime de la partie nord de Terre-Neuve jusqu'au Labrador.

M. McGrath: Jusqu'à Sept-Îles.

M. Farquharson: Je croyais que vous me demandiez...

M. McGrath: Non, non. Ce à quoi je veux en venir, c'est qu'il me semble que ce soit une méthode très inefficace d'acheminer votre produit vers l'ouest du Labrador. Je supposais que ce service de l'Île-du-Prince-Édouard à Sept-Îles allait dans la partie ouest du Labrador, mais si vous l'expédiez à Terre-Neuve pour ensuite le renvoyer au Labrador c'est, à mon avis, une méthode très peu efficace d'acheminer votre produit au Labrador.

[*Texte*]

Mr. Farquharson: I mentioned Labrador City, but I was wrong. There is another town out there.

Mr. McGrath: Churchill Falls?

Mr. Farquharson: No.

Mr. McGrath: The North West River?

An hon. Member: Happy Valley?

Mr. Farquharson: Yes, Happy Valley.

Mr. McGrath: Yes, but this does not get you into the western Labrador market of Labrador City and Wabush.

Mr. Farquharson: We have not shipped to Labrador City or Wabush so I cannot really answer that, but I doubt very much if very much goes by way of Seven Islands from P.E.I.

Mr. McGrath: Is it a fact that in connection with this subsidized service on the M.V. Gaspesien to St. John's, Newfoundland, that this vessel comes back empty?

Mr. Farquharson: Yes.

Mr. McGrath: Of course you could not answer this but I was going to pose the question whether there has been any attempt made to have return cargoes on the vessel and hence, I would suggest, help reduce the subsidy?

My last question, Mr. Chairman, is one that rather intrigues me. Realizing the importance of the Newfoundland market to P.E.I., being agriculturally deficient as we are, would it not be in the interest of the P.E.I. Potato Marketing Board to establish warehouse facilities and an office in Newfoundland to ensure that you are getting good products there—because there have been a number of complaints about the quality of P.E.I. potatoes going into Newfoundland. Of course everybody recognizes that P.E.I. potatoes are the best in the world, but the fact remains that less than the best are getting into Newfoundland. Do you have any comment on that?

Mr. Farquharson: There again, maybe transportation can really gum up a good product before it gets in there if it is handled a great number of times. We have heard complaints and we fell that they are justified on behalf of Newfoundlanders, but I think a great deal of it can be traced back to transportation and transportation problems—be-

[*Interprétation*]

M. Farquharson: J'ai mentionné Labrador City, mais j'avais tort. C'est une autre ville dans cette partie-là.

M. McGrath: Churchill Falls?

M. Farquharson: Non.

M. McGrath: North West River?

Une voix: Happy Valley?

M. Farquharson: Oui, Happy Valley.

M. McGrath: Ce qui fait que vous n'allez pas au marché de l'ouest du Labrador, de Labrador City et de Wabush.

M. Farquharson: Nous n'avons pas expédié à Labrador City ou Wabush; je ne peux donc vous répondre, mais je doute fort qu'il y ait beaucoup de produit provenant de l'Île-du-Prince-Édouard qui passe par Sept-Îles.

M. McGrath: Est-ce vrai que dans ce service subventionné sur le *M.V. Gaspésien*, qui va à Saint-Jean (Terre-Neuve), ce navire revient à vide?

M. Farquharson: Oui.

M. McGrath: Naturellement vous ne pourriez pas répondre à ma question, mais enfin je voulais savoir s'il a vraiment essayé d'avoir une cargaison pour le retour et cela aiderait à diminuer la proportion des subventions.

Une dernière question, monsieur le président. Une question qui m'intrigue un peu parce que je me rends compte de l'importance du marché de Terre-Neuve pour l'Île-du-Prince-Édouard, vu notre carence de produits agricoles. Est-ce qu'il ne serait pas dans l'intérêt de l'Office de commercialisation des pommes de terre de l'Î.-P.-É. d'avoir des entrepôts à Terre-Neuve et un bureau pour vous assurer que vous aurez de bons produits, parce qu'il y a eu un certain nombre de plaintes formulées sur la qualité des pommes de terre de l'Île-du-Prince-Édouard allant à Terre-Neuve. Tout le monde sait très bien que ces pommes de terre sont les meilleures au monde, mais, enfin, le fait demeure que, du moins, une qualité inférieure nous arrive à Terre-Neuve. Avez-vous des commentaires à ce sujet?

M. Farquharson: Une fois de plus, le transport peut vraiment coller un bon produit avant qu'il n'arrive à destination. S'il est manipulé plusieurs fois. Nous avons entendu ces plaintes de la part des Terre-Neuviens et nous sommes d'avis qu'elles sont justifiées. Mais, je pense qu'on peut rattacher cela au transport et aux problèmes de transport, car

[*Text*]

cause every time you handle potatoes you are not helping the product, you are harming it.

Mr. McGrath: What, in your opinion, is the best way to get your produce to the Newfoundland market?

Mr. Farquharson: I think I would have to go along with the Premier's remarks this morning when he was talking about roll-on and roll-off service. In other words, we as growers can pack this material and roll it on to the boat and then you, as receiver, are the next man that handles it. Then, as a grower, I have a certain responsibility which can be traced back to me, and if I am not doing the right job you can try somebody else along the line. As it is now, you lose control and it is very difficult to ascertain just who is at fault here. Is it the grower, the shipper, or the transporter. The more people that you get involved in it the more difficult the problem becomes.

Mr. McGrath: You maintain that transportation is at fault here.

Mr. Farquharson: It is one of the factors, and perhaps the big factor.

Mr. McGrath: I just have one comment, if I may, Mr. Chairman. There is a very interesting geological theory that when the Great Ice Cap swept down the North American continent and separate Newfoundland from the mainland it dumped all the top soil off Newfoundland into the Gulf and here we have Prince Edward Island. Consequently they grow the potatoes and we cannot.

Mr. Corbin: Mr. Chairman, I would like to raise a question of privilege, please. I take strong exception to Mr. McGrath's remarks to the effect that Prince Edward Island produces the best potatoes. Coming from the upper Saint John Rivr Valley, I think we compete equally well in this market.

The Chairman: Order, please.

Mr. Turner (London East): Mr. MacKenzie, could you tell the Committee whether the CNR made application for a trucking licence on the Island?

Mr. MacKenzie: Do you mean concerning potato movement or LCL shipments?

[*Interpretation*]

chaque fois que vous manipulez les pommes de terre, vous n'aidez pas le produit, vous l'abîmez.

M. McGrath: Quelle est la meilleure façon d'acheminer votre produit vers le marché de Terre-Neuve?

M. Farquharson: Il nous faut convenir avec le premier ministre de l'île, dans ses observations de ce matin, lorsqu'il parlait de chargement et de déchargement automatiques. En tant que producteurs, on peut empaqueter le produit et le charger automatiquement à bord des navires et ensuite, vous, en tant que récipiendaire, vous êtres le prochain à le manipuler. En tant que producteur, j'ai une certaine responsabilité qui peut m'être imputée, et si je ne fais pas un bon travail, on va essayer quelqu'un d'autre. De la façon dont cela se fait maintenant, vous pouvez finir par perdre le contrôle, et il est très difficile de savoir de façon certaine qui est responsable, l'expéditeur, le producteur, ou le transporteur. Plus il y a de personnes qui sont des intermédiaires, plus le problème est grand.

M. McGrath: Vous soutenez que c'est le transport qui est responsable?

M. Farquharson: C'est sans doute un des facteurs. Peut-être le grand facteur.

M. McGrath: J'aurais ainsi une observation à faire, si on veut bien me le permettre, monsieur le président. C'est une théorie géologique très intéressante, savoir, lorsque le Grand glacier blanc a balayé le continent nord-américain et a séparé Terre-Neuve du continent, toute la bonne terre est tombée dans le golfe et été poussée pour former l'Île-du-Prince-Édouard. Maintenant, celle-ci cultive les pommes de terre, et nous, nous ne le pouvons pas.

M. Corbin: Monsieur le président, je voudrais soulever une question de principe, et je m'en prends aux observations de M. McGrath portant que l'Île-du-Prince-Édouard produit les meilleures pommes de terre. Comme je viens du haut de la vallée de la rivière Saint-Jean, je crois que nous pouvons très bien lui faire une concurrence égale dans ce domaine.

Le président: A l'ordre, s'il vous plaît.

M. Turner (London-Est): Monsieur MacKenzie, pourriez-vous dire au Comité si le National Canadien a présenté une demande de permis de camionnage sur cette île.

M. MacKenzie: Vous voulez dire au sujet du transport des pommes de terre ou des envois en lots brisés?

[*Texte*]

Mr. Turner (London East): Potato movement or LCL shipments.

Mr. MacKenzie: Again, I do not want to speak out of turn here, but I understand they made application for trucking LCL but not for potato movement.

Mr. Turner (London East): If they did make an application would your industry oppose it?

Mr. MacKenzie: No, our industry would not oppose it, but we are led to believe that it is more economical to move straight carloads rather than, say, piggyback service.

Mr. Turner (London East): Does your industry use any of your own trucks?

Mr. MacKenzie: Do you mean for interprovincial transportation?

Mr. Turner (London East): Yes.

Mr. MacKenzie: I would say no to that.

Mr. Turner (London East): Could you use piggyback service out of the Island to the mainland if the railroad provided a piggyback service on the mainland?

Mr. MacKenzie: We could use it, yes.

Mr. Turner (London East): Thank you.

The Chairman: Mr. Nesbitt?

Mr. Nesbitt: I have a few brief questions, Mr. Chairman. What is the price per bag at the present time that the average farmer here on the Island receives for a bag of No. 1 quality potatoes?

Mr. MacKenzie: As of today?

Mr. Nesbitt: Yes.

Mr. MacKenzie: I would say basically one cent a pound.

Mr. Nesbitt: Yes.

Mr. MacKenzie: A 100 pound bag would be $1 a bag today.

Mr. Nesbitt: What percentage of your crop normally goes to the Province of Ontario?

Mr. MacKenzie: I would say that 40 per cent goes to the Province of Ontario.

Mr. Nesbitt: Forty per cent?

Mr. MacKenzie: From 40 to 50 per cent.

[*Interprétation*]

M. Turner (London-Est): Soit pour l'un ou l'autre.

M. MacKenzie: Je ne veux voler le tour de personne, mais je pense qu'ils ont demandé un permis de camionnage, un permis de camionnage pour les envois en lots brisés, mais non pour les pommes de terre.

M. Turner (London-Est): Est-ce que votre industrie s'y opposerait si le CN en faisait la demande?

M. MacKenzie: Non, on ne s'y opposerait pas. Mais nous sommes portés à croire que c'est plus rentable de faire des chargements complets que le service de remorque rail-route.

M. Turner (London-Est): Est-ce que vous êtes propriétaire de certains camions?

M. MacKenzie: Voulez-vous dire pour le transport interprovincial?

M. Turner (London-Est): Oui.

M. MacKenzie: C'est non, dans ce cas.

M. Turner (London-Est): Est-ce que vous pourriez avoir recours au service de remorque rail-route à partir de l'île vers le continent, les chemins de fer fournissant un service de remorque rail-route sur le continent?

M. MacKenzie: Oui, on pourrait s'en servir.

M. Turner (London-Est: Merci.

Le président: Monsieur Nesbitt?

M. Nesbitt: J'aurais quelques questions très brèves à poser, monsieur le président. Quel est le prix que l'agriculteur moyen de l'île reçoit pour un sac de pommes de terre n° 1?

M. MacKenzie: Aujourd'hui?

M. Nesbitt: Oui.

M. MacKenzie: Fondamentalement, je dirais 1 cent par livre.

M. Nesbitt: Excusez-moi?

M. MacKenzie: Un sac de 100 livres serait 1 dollar aujourd'hui.

M. Nesbitt: Quel pourcentage de votre récolte est ordinairement acheminé vers la province de l'Ontario?

M. MacKenzie: En Ontario, je dirais 40 p. 100.

M. Nesbitt: 40 p. 100?

M. MacKenzie: De 40 à 50 p. 100.

[*Text*]

Mr. Nesbitt: That is good enough. Is there any special rate per bag?

Mr. MacKenzie: There is an agreed freight rate, yes.

Mr. Nesbitt: Could you tell us what it is?

Mr. MacKenzie: Into Toronto it is 65 cents a hundred.

Mr. Nesbitt: Sixty-five cents a hundred.

Mr. MacKenzie: Plus your heating charge which represents about 7 cents a hundred at the moment.

Mr. Nesbitt: Do you have any idea of what Island potatoes retail for in Ontario?

Mr. MacKenzie: I cannot answer too specifically, I can give you an experience of a couple of years ago. I bought in one of your leading chain stores two 10-pound bags of our own potatoes. I paid 59 cents for them and the most that they could have paid for them would be 28 cents because our company sold them in cars at 28, 29 and 30 cents.

Mr. Nesbitt: Thank you. Do you think there is any likelihood or prospect of improvement of sales of your very excellent quality potatoes? I will not say they are the best in the world because, like Mr. Corbin, I grow potatoes too. But they are as good as anybody else's. We will put it that way.

Mr. MacKenzie: Thank you.

Mr. Nesbitt: Do you think there is a prospect of improving sales in Ontario?

Mr. MacKenzie: Yes, we hope so. I think we have been holding our own and gaining a little larger percentage of the Ontario market.

Mr. MacKenzie: Who is your chief competitor in the Ontario market?

Mr. MacKenzie: Today, Ontario would probably be our chief competitor.

Mr. Nesbitt: Fine, thank you.

Mr. Perrault: A supplementary, Mr. Chairman. What is your effective marketing area? Do you go beyond Ontario borders?

[*Interpretation*]

M. Nesbitt: C'est assez bon. Est-ce qu'il y a un tarif spécial par sac?

M. MacKenzie: Oui, un tarif sur lequel nous nous sommes entendus.

M. Nesbitt: Pourriez-vous nous dire combien il est?

M. MacKenzie: A Toronto, 65 cents les cent livres.

M. Nesbitt: 65 cents les cent livres.

M. MacKenzie: Plus les frais de chauffage qui représentent environ 7 cents par 100 livres dans le moment.

M. Nesbitt: Savez-vous quel est le prix de détail des pommes de terre de l'île, en Ontario?

M. MacKenzie: Je ne pourrais pas répondre trop précisément. Je pourrais dire qu'il y a quelques années, dans un de nos grands magasins à chaine, j'ai payé 59 cents pour deux sacs de nos pommes de terre et le plus qu'ils pourraient avoir payé serait 28 cents, parce que notre société les a vendues au char 28, 29 ou 30 cents.

M. Nesbitt: Je vous remercie. Croiriez-vous maintenant qu'il y a de bonnes perspectives d'amélioration dans la vente de vos pommes de terre d'excellente qualité? Je ne dirai pas qu'elles sont les meilleures au monde parce que comme M. Corbin, je cultive aussi des pommes de terre et qui sont aussi bonnes que celles de n'importe qui, laissez-moi vous le dire.

M. MacKenzie: Merci.

M. Nesbitt: Croyez-vous qu'il y a des perspectives d'améliorer les ventes en Ontario?

M. MacKenzie: Oui, nous l'espérons. Au fait, nous avons au moins gardé le même pourcentage, et avons gagné un plus fort pourcentage sur le marché ontarien.

M. Nesbitt: Quel est votre principal concurrent dans l'Ontario?

M. MacKenzie: A l'heure actuelle, c'est la province elle-même qui le serait.

M. Nesbitt: Bien, merci beaucoup.

M. Perrault: Une question supplémentaire, monsieur le président, s'il vous plaît? Quel serait votre débouché normal actuel? Est-ce que vous allez au-delà des frontières de l'Ontario?

[*Texte*]

Mr. MacKenzie: No. I would say as far as Fort William. There are exceptions sometimes, when go west.

The Chairman: Mr. MacLean?

Mr. MacLean: Mr. MacKenzie, when the retail price of potatoes drops on the market does the grower take the whole decrease in price? Is it correct that although the freight cost is the same and other distribution costs are the same, when there is a fluctuation in the retail price of potatoes either up or down the grower is subject to almost the entire amount of that fluctuation?

Mr. MacKenzie: That is right, 99 per cent of it.

Mr. MacLean: In other words, nobody handling the crop between the producer and the consumer is interested in what the price is because it does not matter to him—he gets the same amount of business whether the price is low or high.

Mr. MacKenzie: That is true.

Mr. MacLean: Thank you.

Mr. Carter: Mr. Chairman, the Jenkins Brothers' brief says that the service presently being subsidized should be extended to include the major island shipping port of Summerside. I am wondering why it does not. Have representations been made to the federal and provincial government to have this port included?

Mr. MacKenzie: Yes, I understand there have been representations made.

Mr. Carter: Is the shipper responsible for designating ports of call?

Mr. MacIenzie: No, the shipper is not responsible.

Mr. Carter: But representation has been made to the federal government, I presume, to have this port included.

Mr. MacKenzie: Yes, there has been. I cannot say whether representation has been made within the past year, but it has been made in the past.

Mr. McGrath: A supplementary, Mr. Chairman.

Mr. Chairman: Mr. McGrath.

[*Interprétation*]

M. MacKenzie: Non, je dirais jusqu'à Fort William, seulement. Il y a parfois des exceptions évidemment, quand nous allons dans l'Ouest.

Le président: Monsieur MacLean.

M. MacLean: Monsieur MacKenzie, lorsque le prix de détail des pommes de terre baisse sur le marché est-ce que c'est le producteur qui subit la diminution entière? Est-ce exact que, bien que le tarif marchandises soit le même et que les autres frais de distribution soient les mêmes, lorsqu'il y a une fluctuation dans le prix de détail des pommes de terre, que ce soit augmentation ou diminution, le producteur doit absorber presque tout le montant de cette fluctuation? Est-ce exact?

M. MacKenzie: Oui, vous avez raison, il doit en absorber 99 p. 100.

M. MacLean: En d'autres termes, personne, parmi les intermédiaires entre le producteur et le consommateur, n'est intéressé au prix, car peu lui importe, il a le même chiffre d'affaires que le prix soit bas ou élevé.

M. MacKenzie: C'est vrai.

M. MacLean: Merci.

M. Carter: Monsieur le président, le mémoire *Jenkins Brothers* dit que le service subventionné à l'heure actuelle devrait être étendu pour inclure le plus grand port d'expédition de l'île, soit Summerside. Je me demande pourquoi il ne l'est pas. Est-ce qu'on a présenté des instances aux gouvernements fédéral et provincial pour inclure ce port?

M. MacKenzie: Oui. Je crois comprendre qu'il y a eu des instances.

M. Carter: Est-ce que l'expéditeur est chargé de désigner les ports?

M. MacKenzie: Non, ce n'est pas l'expéditeur.

M. Carter: Mais je suppose qu'on a présenté des instances pour que ce port soit inclus?

M. MacKenzie: Oui, il y en a eu. Je ne saurais dire si cela s'est fait depuis un an, mais cela s'est fait dans le passé.

M. McGrath: Une question supplémentaire, monsieur le président.

Le président: Monsieur McGrath.

[*Text*]

Mr. McGrath: Would it make any sense to have this vessel loaded with gravel coming back?

Mr. MacKenzie: I think it would be at a fair premium. I know that a number of years ago they were bringing back cement. Just what happened in that particular trade I cannot say, but about five or six years ago they brought cement back.

Mr. McGrath: Mr. Chairman, that was a serious question, because we are concerned with the fact that this is a one-way trade; we do not seem to be able to sell anything to P.E.I.

Mr. MacKenzie: I think all soil from Newfoundland is more or less quarantined because of the potato wart. So I am afraid we would not move in their gravel.

Mr. Rock: Does the farmer bring his potatoes to a central point or do you pick up the potatoes? You said the growers receive a cent a pound for their potatoes. For that price, do they have to ship their potatoes, to a central point?

Mr. MacKenzie: Yes. Actually, if you look at the map of P.E.I., we have about 33 or 34 central points with the CNR passing right down through the middle of the Island.

Mr. Rock: You mentioned that before they leave the Island you receive 75 cents for 50 pounds, which is $1.50 per 100 pounds. There is a 50 per cent differential between what the farmer gets for his potatoes and what you people receive for the potatoes before it leaves the Island. Why is there that 50 per cent differential?

Mr. MacKenzie: From the farmers and what they receive?

Mr. Rock: That is right. The question I asked you previously was, how much does it cost for a 50-pound bag of potatoes before it leaves the Island? And you said 75 cents.

Mr. MacKenzie: Yes.

Mr. Rock: This means you receive 75 cents for that. Someone else asked a question. How much does the farmer get for the potatoes? You said $1 per 100 pounds. There is a 50 per cent differential. You sell it for 1 cent a pound before it gets off the Island. Therefore, there is a 50 per cent differential, and I want to know why.

[*Interpretation*]

M. McGrath: Cela aurait-il du sens de faire charger ce navire de gravier pour le retour?

M. MacKenzie: Je pense que cela pourrait se faire à bon prix. Il y a des années, on rapportait du ciment. Je ne saurais dire ce qui est arrivé à ce commerce, mais on le faisait il y a 5 ou 6 ans.

M. McGrath: Monsieur le président, cela n'était pas une question sérieuse car ce qui nous préoccupe, c'est le fait que ce soit un commerce à sens unique seulement: il nous semble impossible de vendre quoi que ce soit à l'Île-du-Prince-Édouard.

M. MacKenzie: Je pense que tous les sols de Terre-Neuve sont plus ou moins mis en quarantaine à cause de la verrue de la pomme de terre. J'ai donc bien peur que nous n'acceptions pas leur gravier.

M. Rock: Est-ce que le cultivateur livre ses pommes de terre à un point central ou est-ce que vous les recueillez chez chaque cultivateur? Vous avez dit que les producteurs reçoivent un cent la livre pour leurs pommes de terre. Est-ce qu'il doit lui-même, à ce prix, expéditer ses produits à un endroit central?

M. MacKenzie: Oui. Si vous examinez la carte, vous verrez que nous avons 33 ou 34 points centraux, où passe le CN si vous passez par le milieu de l'Île.

M. Rock: Très bien. Et alors vous avez mentionné qu' avant que les pommes de terre quittent l'île, vous recevez 75 cents pour 50 livres, ce qui fait $1.50 par cent livre. Il y a donc une différence de 50 p. 100 entre ce que reçoit le cultivateur pour ses pommes de terre, et ce que vous recevez avant que les pommes de terre quittent l'Île? Pourquoi cette différence de 50 p. 100?

M. MacKenzie: Entre les fermiers et ce qu'ils reçoivent?

M. Rock: Oui. La question que je vous avait posée tout à l'heure, c'est combien coûte le sac de 50 livres de pommes de terre avant qu'il quitte l'Île? Vous avez répondu 75 cents.

M. MacKenzie: Oui.

M. Rock: Cela veut dire que vous recevez 75 cents pour cela. Quelqu'un d'autre vous a posé une question. Combien le cultivateur reçoit-il pour les pommes de terre? Vous avez dit $1 les 100 livres. Il y a une différence de 50 p. 100. Vous le vendez 1½ cent la livre. Il y a donc une différence de 50 p. 100 et je veux savoir pourquoi.

[*Texte*]

Mr. MacKenzie: We are dealing with 100 pounds of potatoes, so I as a farmer have got 100 pounds of potatoes to offer, so I have $1 coming. Involved there is 27 cents for a 100-pound bag. You may have a dime to 15 cents trucking charge from farmer A to this particular central point.

Mr. Rock: No, you said before he delivers that for that price to the central point.

Mr. MacKenzie: If I did, I excuse myself for that. You are using a price as to what you would get for a carload, and I gave you 75 cents for a carload loaded, which includes the container, trucking, inspection fees, and the whole bit. When I answered over here I was thinking about what the farmer receives for 100 pounds of potatoes. That is why I used the price of $1.

The Chairman: Gentlemen, this completes the question period. I want to thank you gentlemen for a very good brief.

I will call upon Douglas Brothers and Jones Incorporated. Shall it stand?

Some hon. Members: Agreed.

The Chairman: I will call upon the City of Charlottetown. Shall it stand?

Some hon. Members: Agreed.

The Chairman: Jenkins Brothers Limited. There is no brief from Jenkins Brothers Limited.

Gentlemen, I have on my right here, Mr. Phaneuf, and he will give us a resume of his brief. Will you go ahead, Mr. Phaneuf?

Mr. J. R. Phaneuf (Jenkins Brothers Limited): Mr. Chairman, members of the Standing Committee on Transport and Communications, gentlemen. This submission is made by Jenkins Brothers Limited, who are one of the larger shippers of LCL freight by Canadian National Railways from Summerside, P.E.I.

Since the implementation of Tariff Schedule No. 100 on September 5, 1967, shipping costs have increased anywhere from 33 per cent to 160 per cent. To substantiate this statement, attached is Schedule One which outlines a cost comparison on actual shipments. These charges can be verified by freight bills that I have in my possession.

Attached to the brief is Schedule Two which outlines the new freight schedule on 300, 500, 1,000, 2,000 and 5,000 pound ship-

[*Interprétation*]

M. MacKenzie: Nous parlons de 100 livres de pommes de terre, et moi, en tant que fermier, j'ai 100 livres de pommes de terre à offrir alors je reçois $1. Il y a là 27 cents pour un sac de 100 livres. Il y a peut-être de 10 à 15 cents en frais de camionnage du premier fermier jusqu'à ce point central.

M. Rock: Non, vous avez dit avant qu'il le livre à ce prix-là jusqu'au point central.

M. MacKenzie: Si je l'ai fait, je m'en excuse. Vous utilisez un prix pour ce que vous auriez pour une wagonnée, et je vous ai dit 75 cents pour une wagonnée chargée, ce qui comprend le contenant, le camionnage, les frais d'inspection etc...Quand j'ai répondu tout à l'heure, je pensais à ce que le cultivateur reçoit pour 100 livres de pommes de terre. C'est la raison pour laquelle, j'ai dit $1.

Le président: Messieurs, voilà la fin de la période de questions. Je tiens à vous remercier pour votre excellent mémoire.

Je demanderais maintenant à *Douglas Brothers and Jones, Inc.* de Charlottetown de présenter leur mémoire. Réservé?

Des voix: D'accord.

Le président: Je demanderais maintenant à la Ville de Charlottetown de présenter son mémoire.

La Ville de Charlottetown. Réservé?

Des voix: D'accord.

Le président : *Jenkins Brothers Limited.* Cette société n'a pas de mémoire.

Messieurs, à ma droite se trouve M. Phaneuf qui va nous donner un résumé de son mémoire. Monsieur Phaneuf.

M. J. R. Phaneuf (Jenkins Brothers Limited): Monsieur le président, messieurs les membres du Comité permanent des transports et des communications. Cette présentation est faite par *Jenkins Brothers Limited,* l'un des plus important expéditeurs de chargements de moins d'une wagonnée par le CNR à partir de Summerside (Î. P.-É.).

Depuis la mise en vigueur du tarif 100, le 5 septembre 1967, les frais d'expédition ont augmenté d'entre 33 et 160 p. 100. Pour vous en donner la preuve, nous avons l'annexe 1 qui vous donne une comparaison des prix sur les expéditions effectivement réalisées. Ces frais peuvent être vérifiés d'après les factures que j'ai en ma possession.

Nous avons joint au mémoire l'annexe n° 2 qui nous donne les nouveaux tarifs de fret sur les expéditions de 300, 500, 1,000, 2,000 et 5,000

[*Text*]

ments as compared to the old rate structure. These figures have been supplied to me by the Canadian National Railways. A quick comparison indicates a direct freight increase from 60 per cent to 160 per cent, depending on the freight weight classification that would apply on individual shipments.

As the Maritimes have not a heavy concentration of population like Ontario and Quebec, customers cannot handle large shipments which means a good number of shipments are in the 300-pound minimum category. As a result we are faced with an extremely high delivery cost.

Even though the old LCL freight rates are still available it is impossible for us to take advantage of them as many of our customers have not the vehicles to pick up shipments from the freight shed, and I refer specifically to the large chain stores.

The freight cost is an item that figures into our cost of doing business, and all shipments are on a prepaid basis. Last year freight costs were slightly over $7,000. As a matter of estimation, our calculated cost will soar to approximately $12,000 on our next year's operation. We do not feel we can absorb this extra burden, and therefore we will have to pass it on to the consumer. This in effect will increase the living cost in the Maritimes approximately 10 per cent if all manufacturing falls in line.

In regard to that statement in the last paragraph, gentlemen, our fiscal year ends on April 30 of each year, and at the end of 1968 our freight costs were $14,000. I took a quick look at our record before coming down here today, and as of January 31, 1969, we have already expended in freight rates $14,000.

The provinces of Prince Edward Island, Nova Scotia and New Brunswick are spending large sums of money to attract new industries. The new freight schedule now in effect will be a hindrance, and in fact it will discourage expansion in the Atlantic provinces.

It is our recommendation that the Canadian National Railways give careful consideration to reverting to the old freight rate schedule that was in effect prior to September 5, 1967.

The Chairman: Thank you, Mr. Phaneuf. Mr. Trudel.

Mr. Trudel: Mr. Chairman and Mr. Phaneuf, could you tell us the extent of the market that you cover?

[*Interpretation*]

livres comparativement à l'ancien barème. Ces chiffres m'ont été donnés par les Chemins de fer Nationaux du Canada. Une comparaison rapide révèle une augmentation directe du tarif-marchandise de 60 à 160 p. 100, selon la classification de poids qui s'appliquerait aux expéditions individuelles.

Comme les Maritimes n'ont pas de fortes concentrations démographiques, comme l'Ontario et le Québec, les clients ne peuvent prendre de fortes expéditions ce qui veut dire qu'un grand nombre d'expéditions sont dans la catégorie minimum de 300 livres. Il s'ensuit que nous devons faire face à des frais de livraison énormes.

Même si les anciens taux s'appliquant à moins d'une wagonnée existent toujours, il nous est impossible d'en profiter étant donné que plusieurs de nos clients n'ont pas les véhicules voulus pour cueillir les expéditions aux hangars de fret et je pense spécialement aux grands magasins de détail.

Les frais de transport des marchandises comptent dans nos frais d'exploitation et toutes les expéditions sont payées à l'avance. L'an dernier, les frais se sont élevés à un peu plus de $7,000. Comme estimation, notre coût calculé montera à environ $12,000 l'an prochain. Nous ne pensons pas pouvoir supporter ce fardeau additionnel, et nous devrons alors le faire supporter par le consommateur. Cela augmentera le coût de la vie d'environ 10 p. 100 dans les Maritimes, si toute l'industrie manufacturière suit notre exemple.

En ce qui concerne cette déclaration au dernier paragraphe, notre année financière se termine le 30 avril de chaque année, et à la fin de 1968, nos frais d'expédition étaient de $14,000. J'ai rapidement examiné nos livres avant de venir ici aujourd'hui, et au 31 janvier 1969, et nous avons déjà dépensé $14,000 en frais de transport des marchandises.

Les provinces des Maritimes dépensent beaucoup d'argent pour attirer de nouvelles industries. Le nouveau tarif-marchandises maintenant en vigueur sera un élément dissuasif, et en fait il découragera l'expansion dans les provinces de l'Atlantique.

Nous recommandons que les Chemins de fer Nationaux du Canada étudient sérieusement la possibilité de revenir à l'ancien tarif-marchandises qui était en vigueur avant le 5 septembre 1967.

Le président: Merci beaucoup, monsieur Phaneuf. Monsieur Trudel.

M. Trudel: Monsieur le président, monsieur Phaneuf, pourriez-vous nous dire quelle est l'étendue de votre marché?

[*Texte*]

Mr. Phaneuf: The central market that we cover?

Mr. Trudel: Yes.

Mr. Phaneuf: We cover the entire Maritime provinces, including Newfoundland. We cover Winnipeg west to British Columbia. We do a small amount of business in Ontario, and no business in Quebec.

Mr. Trudel: Would you rely completely on rail transportation?

Mr. Phaneuf: Definitely so.

Mr. Trudel: Do you have a door-to-door policy in your company, a delivery policy?

Mr. Phaneuf: What do you mean by door-to-door?

Mr. Trudel: I mean, do you deal through wholesalers, or do you handle your goods directly to the ultimate end, to the store?

Mr. Phaneuf: No, we ship to wholesalers, and we ship also the chain stores, direct.

Mr. Trudel: On a direct basis.

Mr. Phaneuf: Yes, sir.

Mr. Trudel: Have you considered wholesalers exclusively at any time for you goods?

Mr. Phaneuf: Impossibility.

Mr. Trudel: None of these goods, from what I understand, are refrigerated.

Mr. Phaneuf: No, sir.

Mr. Trudel: They are all canned goods.

Mr. Phaneuf: All canned goods. You are getting into another subject there when you get into refrigeration.

Mr. Trudel: Yes, that is the reason why I asked the question.

Could you relate the cost of your transportation, the transportation factor in the over-all cost of your goods?

Mr. Phaneuf: How do you mean that?

Mr. Trudel: Your total transportation cost related to your over-all costs. For example, your item costs $1. Would it be 7 cents, 12 cents involving transportation, 19 cents, 50 cents?

[*Interprétation*]

M. Phaneuf: Le marché central que nous desservons?

M. Trudel: Oui.

M. Phaneuf: Nous couvrons toutes les provinces des Maritimes, y compris Terre-Neuve, ainsi que de Winnipeg jusqu'à la Colombie-Britannique. Nous faisons de petites affaires en Ontario et nous n'avons aucun commerce au Québec.

M. Trudel: Vous fiez-vous uniquement au transport ferroviaire?

M. Phaneuf: Absolument.

M. Trudel: Avez-vous une politique de livraison de porte à porte?

M. Phaneuf: Qu'est-ce que vous voulez dire par là?

M. Trudel: Est-ce que vous faites affaires par l'entremise des grossistes ou est-ce que vous livrez directement aux magasins?

M. Phaneuf: Non, nous faisons la livraison aux grossistes et directement aux détaillants aussi.

M. Trudel: Directement.

M. Phaneuf: Oui.

M. Trudel: Avez-vous songé exclusivement aux grossistes à un moment donné pour vos marchandises?

M. Phaneuf: Cela est impossible.

M. Trudel: Si j'ai bien compris, aucun de ces produits n'est réfrigéré.

M. Phaneuf: Non, monsieur.

M. Trudel: Il s'agit de marchandises en boîte?

M. Phaneuf: Toutes. Vous vous attaquez à autre chose lorsque vous vous lancez dans la réfrigération.

M. Trudel: Oui. C'est la raison pour laquelle j'ai posé cette question. Pourriez-vous faire le rapport des frais de transport le coût total de vos marchandises?

M. Phaneuf: Qu'est-ce que vous voulez dire?

M. Trudel: Votre coût total de transport par rapport à votre coût total. Par exemple, votre article coûte $1, est-ce qu'il s'agirait de 7, 12, 19, 50 cents pour le transport?

[*Text*]

Mr. Phaneuf: If you look at Schedule One, you will see the rate structure here, and the costs as they pertain to the various shipments. I will just pick a few at random; I did not want to cover them all or I would have pages and pages of it. They are only a few of the points that we ship to.

Mr. Trudel: This is not the question that I am asking. I have that chart, but what I am thinking is that you have given us some figures. You quoted $5,000, $12,000 and $14,000 regarding the over-all freight cost.

Mr. Phaneuf: That is right.

Mr. Trudel: This, in your operation—I am trying to relate this. I know that you have specific points because you have mentioned that in your chart. But you still have an over-all cost of transportation.

Mr. Phaneuf: You wish to relate that to the over-all sales?

Mr. Trudel: Yes, that is what I am trying to get.

Mr. Phaneuf: About 2½ per cent.

Mr. Trudel: Two and a half per cent, with the new rates.

Mr. Phaneuf: Yes,with the new LCL rates. I am referring to new LCL rates now.

Mr. Trudel: This is reflecting into the operations, progressing into 1969. What were they before?

Mr. Phaneuf: They would be about 50 per cent less. Our freight rates are approximately double what they were. They were 1¼ before, and 2½ now. That would be close enough.

The Chairman: Mr. Allmand.

Mr. Allmand: Mr. Phaneuf, you said that in marketing your products you sell nothing in Quebec and a small part in Ontario. Is this because the competition is too stiff there, or what is the reason?

Mr. Phaneuf: There are a number of packers there who are packing the same type of items as we are, and competition is stiff. There are no two ways about that. We are slowly but surely trying to correct this, but it is a long hard road.

[*Interpretation*]

M. Phaneuf: Si vous examinez l'annexe 1, vous verrez les taux de transport et les coûts s'appliquent aux diverses expéditions. J'en choisirai quelques-uns au hasard, car j'en aurai des pages et des pages. Ce ne sont que quelques-uns des endroits où nous faisons des expéditions.

M. Trudel: Ce n'est pas là ma question? Je vois bien la carte, mais ce que je pense, c'est que vous nous avez donné des chiffres. Vous avez dit $5,000, $12,000 et $14,000 en ce qui concerne tous les frais totaux de transport.

M. Phaneuf: C'est exact.

M. Trudel: J'essaie d'établir la relation. Je sais que vous allez à des points déterminés car vous l'avez mentionné dans votre tableau. Mais vous avez tout de même un total de frais de transport.

M. Phaneuf: Est-ce que vous voulez le rapport avec la totalité des ventes?

M. Trudel: Oui, exactement.

M. Phaneuf: Environ 2½ p. 100.

M. Trudel: 2½ p. 100, avec les nouveaux tarifs.

M. Phaneuf: Oui, avec les nouveaux tarifs pour les chargements de moins d'une wagonnée. Je parle des nouveaux tarifs maintenant.

M. Trudel: Cela se voit dans les opérations, à mesure que 1969 avance. Qu'étaient-ils auparavant?

M. Phaneuf: Environ 50 p. 100 de moins. Nos frais de transport sont à peu près le double de ce qu'ils étaient. Ils étaient de 1¼ auparavant et ils sont maintenant de 2½. Ce serait à peu près ça.

Le président: Monsieur Allmand.

M. Allmand: Monsieur Phaneuf, vous avez dit que pour la mise en marché de vos produits, vous ne vendez rien dans le Québec et seulement une petite partie dans l'Ontario. Est-ce parce que la concurrence est trop forte là-bas, ou quelle en est la raison?

M. Phaneuf: Il y a un certain nombre de raisons. Nous avons beaucoup de concurrence là-bas. Il y a un certain nombre de conserveries qui mettent en boîte les mêmes articles que nous et la concurrenc est forte. Il n'y a pas de doute à ce sujet. Nous essayons lentement mais sûrement de corriger la situation, mais c'est un travail de longue haleine.

[*Texte*]

Mr. Allmand: I do not know if Mr. Trudel asked this question, but do you do any shipping by truck, especially in the Maritimes?

Mr. Phaneuf: Trucks in the Maritimes?

Mr. Allmand: Yes.

Mr. Phaneuf: We ship some by truck.

Mr. Allmand: I suppose if you had the causeway, you would ship a greater amount.

Mr. Phaneuf: Definitely.

Mr. Allmand: That is all, Mr. Chairman.

The Chairman: Mr. Perrault.

Mr. Perrault: A point of information, Mr. Chairman. On your list of products you have a quahaug listed. I confess I do not know what that is. We do not call them quahaugs on the Pacific coast.

Mr. Phaneuf: We have quahaugs. It is a shellfish, something like a clam.

The Chairman: Do you have a question, Mr. Pringle?

Mr. Pringle: From mid-1959 until around the end of 1967 the transportation costs have been pretty well frozen. Could you give us an idea of the percentage of increase in the other costs of your operation? Have they gone up in relation to transportation? What would be the relationship between this and the normal increase in other costs of your operations?

Mr. Phaneuf: I suppose you are referring to cans, cartons and things of this nature? The costs have gone up proportionately. Metal, for example, has increased in price, and we have been faced with increases in the cost of cans. Sometimes there is no increase, sometimes it is 1 per cent, last year a 2 per cent increase. On the first of April this year there will be another increase of 2 per cent. Cartons went up 4 per cent last September, or somewhere around that time. This was not exactly related to freight rates. It more or less relates to labour costs.

Mr. Pringle: Labour costs have gone up in the railway industry too, so they are searching, I presume, to try to recover some of this. You mentioned 2½ per cent as your transportation costs as related to sales. How would

[*Interprétation*]

M. Allmand: J'ignore si M. Trudel vous a posé la question, mais est-ce que vous faites du transport par camion, particulièrement dans les Maritimes?

M. Phaneuf: Des camions dans les Maritimes?

M. Allmand: Oui.

M. Phaneuf: Nous expédions une partie par camion.

M. Allmand: Je suppose que si vous aviez la chaussée, vous pourriez en expédier davantage.

M. Phaneuf: Certainement, oui.

M. Allmand: C'est tout, monsieur le président.

Le président: Monsieur Perrault.

M. Perrault: Je voudrais avoir un renseignement. Vous avez des «quahaugs» sur votre liste de produits. J'avoue ignorer ce que c'est. Sur la côte du Pacifique, nous ne les appelons pas «quahaugs».

M. Phaneuf: Nous en avons. C'est un genre de crustacé, un peu comme une «clam».

Le président: Monsieur Pringle, avez-vous une question?

M. Pringle: Depuis la moitié de 1959 jusqu'à la fin de 1967, les frais de transport ont été plutôt gelés. Pourriez-vous nous donner une idée du pourcentage d'augmentation dans vos autres frais d'exploitation? Ont-ils augmenté par rapport au transport? Quelle serait la proportion entre cela et l'augmentation normale des autres frais d'exploitation?

M. Phaneuf: J'imagine que vous voulez parler des boîtes de conserve, des cartons, etc.? Les frais ont augmenté en proportion. Le prix du métal, par exemple, a augmenté et nous avons eu à subir des augmentations dans les prix de nos boîtes. Parfois, il n'y a pas d'augmentation, parfois elle est de 1 p. 100; l'an dernier, elle était de 2 p. 100. le 1er avril de cette année, il y aura une autre augmentation de 2 p. 100. Les cartons ont monté de 4 p. 100 en septembre dernier, ou vers le mois de septembre. Cela n'avait pas exactement de rapport avec les taux de transport. Cela a un certain rapport avec les coûts et de la main-d'œuvre.

M. Pringle: Le coût de la main-d'œuvre a augmenté dans l'industrie ferroviaire aussi et je suppose qu'ils cherchent à compenser. Vous avez mentionné 2½ p. 100 comme frais de transport par rapport à vos ventes. Comment

[*Text*]

this compare with the transportation costs percentagewise to your competitors in the same field in which you are selling your products?

Mr. Phaneuf: You are probably referring to shipments coming out of Ontario. You must remember that if you ship in carload lots, things move at a lot better price. We can ship a carload of canned goods into Ontario for $1.10 a hundredweight.

If you look at your classifications here, with regard to the Maritimes, with regard to small shipments, we pay $3 per six cartons. That is 50 cents a case. That is over two cents a can. That is a lot of money, and on top of that there is a parcel charge involved, which brings the costs—there is one item here, $3.45 and $1.20, which makes $4.65 for a small shipment to Fredericton, New Brunswick.

Mr. Pringle: It is the LCL increase that is creating your problem, and as you suggest could very well increase the cost of living by 10 percent in the Maritimes if it is reflected through the other manufacturers.

Mr. Phaneuf: Exactly.

Mr. Pringle: That is your point on LCL if it is not carload lot.

Mr. Phaneuf: The point that we are very serious about and very worried about is the LCL parcel directly here in the Maritimes. You must remember, and it is specified right here, that we have got a very small population in the Maritimes. We have Halifax with probably 100,000 people, Saint John, Moncton and Sydney. What do you have after that? They are small cities.

These central points will not consume as much canned goods as a city such as Montreal, Hamilton, Windsor, Kitchener, or other large centres. If you have a bigger influx of canned goods, this will lower your rates.

Mr. Pringle: So they really have the advantage of a volume...

Mr. Phaneuf: They certainly have.

Mr. Pringle:...on transportation, rather than you.

The Chairman: Mr. Skoberg.

Mr. Skoberg: Mr. Chairman, do you have any problem with obtaining a sufficient number of cars for your business?

[*Interpretation*]

cela se compare-t-il au pourcentage des frais de transport de vos concurrents dans le même domaine où vous vendez vos produits?

M. Phaneuf: Vous parlez sans doute des expéditions provenant de l'Ontario. Il faut se souvenir que si nos expéditions en un chargement complet de wagonnée, le prix est de beaucoup meilleur. Nous pourrions expédier toute une wagonnée de conserves vers l'Ontario pour $1.10 le quintal.

Si vous examinez vos classifications pour les Maritimes, à l'égard des petites expéditions, nous payons $3 pour six cartons. Il s'agit de 50 cents la caisse. C'est plus de deux cents la boîte, ce qui est beaucoup et en plus, il y a des frais pour le colis, ce qui porte les coûts... Il y a un article ici, $3.45 et $1.20, ce qui fait $4.65 pour une petite expédition vers Fredericton (Nouveau-Brunswick).

M. Pringle: C'est le taux de moins d'une wagonnée qui cause votre problème, ce qui pourrait, comme vous le dites, fort bien augmenter le coût de la vie de 10 p. 100 dans les Maritimes, si cela se reflète chez les autres fabricants.

M. Phaneuf: Exactement.

M. Pringle: C'est ce que vous voulez dire pour les chargements de moins d'une wagonnée, si ce n'est pas un chargement complet.

M. Phaneuf: Ce qui nous préoccupe beaucoup, c'est les taux de moins d'une wagonnée directement ici dans les Maritimes. Souvenez-vous, et nous l'avons précisé, que la population est très petite dans les Maritimes. Nous avons Halifax, avec peut-être 100,000 personnes, Saint-Jean, Moncton et Sydney. Qu'y a-t-il à part cela? Ce sont des petites villes.

Ces points centraux ne consommeront pas autant de conserves que des villes comme Montréal, Hamilton, Windsor, Kitchener ou autres grands centres. Si vous avez beaucoup plus de produits en conserve, cela baissera les taux.

M. Pringle: Alors, ils ont vraiment l'avantage d'un volume...

M. Phaneuf: Et comment.

M. Pringle: ... au transport, plutôt que vous.

Le président: Monsieur Skoberg.

M. Skoberg: Monsieur le président, est-ce que vous avez de la difficulté à obtenir suffisamment de wagons pour votre commerce?

[*Texte*]

Mr. Phaneuf: Occasionally we do. Not very often, but during the season when the potatoes are moving very readily, there are problems. We sometimes have to wait three or four days.

Mr. Skoberg: Do you use air cargo at all to ship anything?

Mr. Phaneuf: No, sir.

The Chairman: Mr. Trudel.

Mr. Trudel: Mr. Chairman, one more question to the witness, please. Would you give us your opinion on this new density rule that has been brought into effect, and we have heard a lot about by other witnesses, as to 10 pounds to the cubic foot, or rather against five pounds. It has been suggested to us that it interfered with several businesses.

Mr. Phaneuf: I have not looked to see just how that would affect us as far as density is concerned. Our packaging is very small. A carton, with contens, is 14 pounds, 14 to 15 pounds, and there could be some relation between the rate and density.

Mr. Trudel: This is not your prime concern?

Mr. Phaneuf: No.

The Chairman: Mr. Thomas.

Mr. Thomas (Moncton): Mr. Chairman, one short question for Mr. Phaneuf. I think you said that practically all your shipments are made by rail. Are there no alternatives? Do you find you cannot ship by highway transport satisfactorily? Why do you use rail entirely?

Mr. Phaneuf: Well as far as truck transportation is concerned, we will say for the Ontario market or the western market, their freight rates are out of the question.

Mr. Thomas (Moncton): I am thinking more of the intra-Maritime market.

Mr. Phaneuf: We do utilize some transfers in the Maritimes, but they do not get to all points. What happens is that if you want to make a shipment from here to Fredericton by transfer, it leaves our place of business on a transfer and goes as far as Moncton or Saint John. Then there is the transfer and it is picked up by another one at Fredericton and there is a delay. By the time they both pick up their rates for these minimum shipments

[*Interprétation*]

M. Phaneuf: De temps à autre. Pas souvent, mais au cours de la saison, lorsque les expéditions de pommes de terre sont faites rapidement, il y a des problèmes. Parfois, il nous faut attendre trois ou quatre jours.

M. Skoberg: Est-ce que vous employez le fret aérien pour vos expéditions?

M. Phaneuf: Non, monsieur.

Le président: Monsieur Trudel.

M. Trudel: Monsieur le président, une dernière question au témoin, s'il vous plaît. Voulez-vous nous donner votre opinion sur la nouvelle règle de densité qui vient d'être mise en vigueur, et d'autres témoins nous en ont beaucoup parlé, c'est-à-dire 10 livres au pied cube, par opposition à 5. On nous a dit que cela nuisait à plusieurs entreprises.

M. Phaneuf: Je n'ai pas examiné la question pour savoir comment cela nous touchait quant à la densité. Nos emballages sont très petits. Un carton avec son contenu pèse 14 livres, 14 ou 15 livres, et il pourrait y avoir un certain rapport entre le taux et la densité.

M. Trudel: Cela n'est pas votre première préoccupation?

M. Phaneuf: Non, monsieur.

Le président: Monsieur Thomas.

M. Thomas (Moncton): Monsieur le président, j'ai une brève question à poser à M. Phaneuf. Vous avez dit, je crois, que pratiquement toutes vos expéditions se faisaient par chemin de fer. Est-ce qu'il n'y a pas d'autres modes de transport? Est-ce que vous n'êtes pas capables d'expédier par transport routier, est-ce que ce n'est pas satisfaisant ou pourquoi employez-vous les chemins de fer exclusivement?

M. Phaneuf: En ce qui concerne le camionnage pour le marché de l'Ontario ou de l'Ouest, les tarifs sont hors de question.

M. Thomas (Moncton): Je songeais plutôt aux expéditions intra-maritimes.

M. Phaneuf: Nous utilisons certaines correspondances, mais elles ne parviennent pas à tous les endroits. Et alors, ce qui arrive c'est que si vous avez, par exemple, une livraison destinée à Fredericton par correspondance, la cargaison quitte notre entreprise et se rend à Moncton ou à Saint-Jean. Il y a ensuite la correspondance. Le chargement est pris par quelqu'un d'autre jusqu'à Fredericton. Après que chacun a perçu ses frais de transport

[*Text*]

this is pretty costly too and is practically the same as the CNR rate.

Mr. Thomas (Moncton): We have heard from the Premier of the province and he is suggesting a Northumberland Strait crossing without rail facilities. I think we will be hearing a brief from the trucking industry shortly, but if we build a crossing with no rail facilities on it, what position would that put a firm like yours in when you are using all rail now? You would have to go to another form of transportation.

Mr. Phaneuf: I cannot speak for the Causeway, or the Causeway committee, because that is not in my line.

Mr. Thomas (Moncton): No.

Mr. Phaneuf: I was thinking along the line of a Causeway with no rails on it, and I presumed they were going to have a ferry service or a shuttle service like the one between Detroit and Windsor for example.

Mr. Thomas (Moncton): That is what I am getting at. In other words, in your present position it is almost essential to retain rail services on Prince Edward Island.

Mr. Phaneuf: Until we find a better mode of transportation. Let us put it that way.

Mr. Thomas (Moncton): Thank you.

The Chairman: Are there other questions, gentlemen? Yes, Mr. Macquarrie.

Mr. Macquarrie: Mr. Chairman, apart from the cost and looking just for a moment at the quality of the movement of your goods out and I suppose your supplies coming such as cans have you formed over the last five years that goods are moving more quickly, less quickly, or do you see any difference?

Mr. Phaneuf: Do you mean the products and shipments moving—

Mr. Macquarrie: Both ways.

Mr. Phaneuf: I know as far as we are concerned on our shipments moving out—and I can speak about CNR because we utilize them quite a bit of the time—the service we have been getting from them in the past few years has been excellent. There was a time when it used to take two or three weeks to get a small shipment up to Sydney, Nova Scotia. You now deliver it two or three days. Today

[*Interpretation*]

pour ces petits chargements, cela fait un montant assez élevé qui équivaut à peu près aux taux du CN.

M. Thomas (Moncton): Le premier ministre de la province nous a dit qu'il proposait une chaussée pour traverser le détroit de Northumberland sans voie ferroviaire. L'industrie du camionnage va nous présenter sous peu un mémoire à ce sujet, mais si on construit une chaussée sans voie ferrée, dans quelle position cela mettra-t-il une entreprise comme la vôtre alors que vous utilisez uniquement le transport ferroviaire actuellement? Il faudra nécessairement que vous songiez à un autre mode de transport.

M. Phaneuf: Je ne peux pas parler au nom du comité de la chaussée, car je n'ai pas la compétence voulue.

M. Thomas (Moncton): Non.

M. Phaneuf: Mais quand je parle de chaussée sans voie ferrée, j'imagine qu'on va conserver le service de transbordeur ou un service de navette comme celui qu'il y a entre Détroit et Windsor, par exemple.

M. Thomas (Moncton): Dans votre situation actuelle, c'est presque nécessaire de garder le service ferroviaire dans l'Île du Prince-Édouard.

M. Phaneuf: Disons plutôt jusqu'à ce que nous trouvions un meilleur mode de transport.

M. Thomas (Moncton): Merci.

Le président: Pas d'autres questions? Monsieur Macquarrie.

M. Macquarrie: J'aurais une brève question à poser. Oublions un instant les prix et considérons la qualité du transport de vos exportations et celle de vos importations comme les conserves, avez-vous trouvé depuis quatre ou cinq ans que les produits étaient expédiés plus rapidement, moins rapidement ou voyez-vous une différence?

M. Phaneuf: Vous voulez dire pour les produits qui entrent...

M. Macquarrie: Dans les deux sens.

M. Phaneuf: En ce qui concerne nos produits qui sont exportés—et comme nous employons beaucoup les services du National-Canadien je peux parler à ce sujet—le service que nous avons depuis quelques années est excellent. Autrefois il fallait jusqu'à trois semaines pour expédier un petit chargement jusqu'à Sydney (Nouvelle-Écosse) mais maintenant cela prend deux ou trois jours. Au-

[*Texte*]

the CNR has a large van and our shipment goes on this van as far as Moncton, where it is transferred to rail cars, I presume. But it has speeded up the service considerably.

Mr. Macquarrie: It is good to hear that, thank you.

The Chairman: Mr. Trudel.

Mr. Trudel: I have a supplementary to Mr. Thomas' question. You mentioned the Causeway: would this be a fair assumption, sir, that whether the Causeway is built or not, this is not your main concern regarding your competitiors, because most of them are coming into some of the central markets now via water transportation.

Mr. Phaneuf: I must stop you, sir, right at this particular point when you are talking about the Causeway and transportation. I am simply talking now about canned goods, shipments within the Maritime provinces and also carloads, let us say, to western Canada or central Canada. But you must also take into consideration, sir, that besides that there is such a thing as the fish business for example. It is very important to remember that with frozen goods for fresh fish being transferred from this market, and most of it goes into the U. S. market, time is of the essence. This is where a transportation system such as a Causeway would be a great asset. You take a load of fresh fish or fresh lobster, for example, they are brought down to wharf and are held up seven, eight, nine or ten hours sometimes.

This is not impossible, because we have trucks doing this ourselves and we know from experience. It is only about 22 hours direct driving from Summerside to the Bostom market. When you waste 8 to 12 hours going across and the same thing coming back, you have lost a day. This is expensive. The man driving that truck has to be paid and there are a lot of trucks going back and forth.

Mr. Trudel: If I may, Mr. Chairman, I do not believe, sir, that you got the intent of my question. I was not trying here to be for or against the Causeway. I was just relating my question to your business. I believe you stated on previous questions that most of your goods are canned goods. I believe that is what you said.

Mr. Phaneuf: All are cans.

[*Interprétation*]

jourd'hui le National-Canadien a un très gros camion qui rend notre cargaison jusqu'à Moncton, et ensuite j'imagine qu'elle est transférée dans un wagon de chemin de fer. Cela a accéléré le service de façon appréciable.

M. Macquarrie: C'est bon d'entendre dire cela.

Le président: Monsieur Trudel.

M. Trudel: Une question supplémentaire à celle de M. Thomas. Vous avez mentionné la chaussée. Est-ce qu'on pourrait présumer, monsieur, que la chaussée soit construite ou non, que cela n'est pas votre principal préoccupation quant à vos concurrents, car la plupart se rendent aux marchés centraux par eau, de toute façon.

M. Phaneuf: Il faut que je vous arrête immédiatement quand vous parlez de transport et de chaussée. A l'heure actuelle, je parle tout simplement des produits en boîte, des expéditions à l'intérieur des provinces des Maritimes en plus de cela, des chargements complets de l'ouest ou le centre du Canada. Mais il faut aussi songer à l'industrie de la pêche, par exemple, il est très important de se rappeler qu'avec les marchandises congelées qui partent de notre marché, et la majorité de nos produits est destinée aux États-Unis, le temps est un facteur d'importance capitale. C'est dans une situation comme celle-là qu'une chaussée constituerait un grand avantage. Prenons par exemple un chargement de poisson ou de homard frais. On l'apporte au quai et il peut y rester jusqu'à sept, huit ou dix heures.

Ce n'est pas impossible car nous avons des camions qui le font, et nous en avons l'expérience. Cela prend seulement vingt-deux heures pour se rendre de Summerside jusqu'au marché de Boston, si on y va directement. Mais si vous perdez dix ou douze heures pour la traversée et la même chose pour revenir, vous avez déjà perdu vingt-quatre heures soit une journée. Ce qui coûte de l'argent, car il faut payer le chauffeur du camion. Il y a beaucoup de camions qui font la navette.

M. Trudel: Je ne crois pas que vous ayez compris ma question. Je n'essayais pas d'être pour ou contre la chaussée. J'essayais tout simplement d'établir le rapport avec votre entreprise. Je crois que vous avez dit, en réponse à une question précédente, que la plus grande partie de votre production se fait en boîte, n'est-ce pas?

M. Phaneuf: Tout.

[*Text*]

Mr. Trudel: Therefore, we are not talking about fresh fish at the present time. I was just trying to obtain some information regarding your main competitors who do come from far afield, if I understand your business correctly—and I do not pretend to be an expert on it—and therefore what you are concerned about here is water transportation more than overland transportation at the present time, other than the existing facilities, because you have some of your competitors who come from wide areas that are competing in central Canada using water transportation. Would I be right in saying that?

Mr. Phaneuf: This could be quite possible. They could be using the St. Lawrence Seaway and I suppose they could be shipping by boat from Toronto, Montreal, any of these places, landing in Halifax and warehousing in Halifax.

Mr. Trudel: Yes.

Mr. Phaneuf: This is not impossible. They could be doing it in Saint John as well.

Mr. Trudel: Thank you, Mr. Chairman.

The Chairman: Are there other questions, gentlemen.

If not, I would now call on Hawker Siddeley of Canada. This firm is from Trenton, Nova Scotia. I will introduce Mr. Owen, who is Traffic Manager, and ask him to give us a short resume of his brief.

Mr. A. W. Owen (Traffic Manager, Hawker Siddeley Canada Ltd.): My original brief was made up very quickly and only from my assessment of the entire situation. My second brief, or treatise, is not a brief: it just analyses what I figure is the situation. I am primarily a transportation man. You will notice that it is devoid of all statistics in regard to anything to do with the economics or the whole structure of our plant. We have a plant in Trenton which manufactures railway cars, which is our prime product, and we also manufacture all the railway car axles in Canada that are used on rail cars in Canada. We employ about 1,800 people when we are running at full strength. We have averaged about 900 to 1,000 people under normal conditions.

The brief or the treatise that I have presented just looks at the Maritime situation on transportation and the logistic position we are in. I believe something has to be done. We are a long way from our markets and I know

[*Interpretation*]

M. Trudel: Et alors, nous ne parlons pas du poisson frais à l'heure actuelle. J'essaie tout simplement d'avoir des renseignements quant à vos principaux concurrents qui viennent de loin, si je vous ai bien compris. Je ne prétends pas être expert dans ce domaine. Votre principale préoccupation c'est vraiment le transport par eau plutôt que par terre, à part les aménagements actuels, car vous avez des concurrents qui viennent de loin et qui font la concurrence dans le centre du Canada en employant le transport par eau. Ai-je raison de le dire?

M. Phaneuf: C'est fort possible. Ils pourraient emprunter la Voie maritime du Saint-Laurent et j'imagine qu'ils pourraient expédier leurs produits par navire de Toronto, Montréal et y venir jusqu'à Halifax où ils entreposeraient leurs propres produits.

M. Trudel: Oui.

M. Phaneuf: Ce n'est pas impossible. Ils pourraient le faire à Saint-Jean également.

M. Trudel: Merci beaucoup.

Le président: Vous n'avez pas d'autres questions?

Sinon, j'aimerais bien demander à la *Hawker-Siddeley of Canada* de venir se présenter à l'avant pour un mémoire. C'est une entreprise de Trenton (Nouvelle-Écosse). J'ai à ma droite M. Owen, directeur du transport. Je demanderais donc au témoin de nous faire un résumé de son mémoire.

M. A. W. Owen (Directeur du transport, Hawker-Siddeley Canada Ltd.): Le premier mémoire fut préparé très rapidement à partir de l'évaluation personnelle que j'ai faite de la situation. Mon deuxième mémoire, ou plutôt traité, n'est qu'une simple analyse de ce qui, à mon avis, représente la situation sur le marché en ce moment. Je m'intéresse avant tout au transport. Vous remarquerez qu'il n'y a aucune statistique ayant trait à quoi que ce soit de l'économie ou de la structure de notre usine. Nous avons une usine à Trenton qui fabrique des wagons de chemin de fer, notre principal produit, mais aussi des essieux de wagons qui servent au Canada. Nous avons environ 1,800 personnes lorsque nous produisons à pleine capacité, mais dans les conditions normales, c'est de 900 à 1,000 personnes.

Ce traité que je vous ai présenté ne traite que de la situation dans les Maritimes en matière de transport et du contexte logistique où nous nous trouvons. Je pense qu'il faut faire quelque chose. Nous sommes très éloi-

[*Texte*]

that most of us have competition in central Canada. We have problems in this regard and I think my treatise explains that full well. Our unit cost is quite high as opposed to our competition and anything else is irrelevant as far as I am concerned, or as far as my company is concerned, in that this unit cost and freight is a big subject, expecially where the labour costs are going up, rates, taxation and various other aspects of running a plant in Nova Scotia. I think that you will probably look at a lot of the sentences in here and realise they will have to be qualified. Therefore, I can only ask you to ask me questions.

The Chairman: Mr. Mahoney.

Mr. Mahoney: Mr. Owen, I am a little bit confused at your whole brief and perhaps you might clean up what I think is an ambiguity. Is this a personal brief by you, or is this a brief on behalf of Hawker Siddeley Canada Ltd.?

Mr. Owen: No, I presented the brief to our management and they could not add any more than what I had added to this brief.

Mr. Mahoney: Throughout the brief you related to experience in the company and yet recommendations and conclusions are certainly expressed in the first person.

Mr. Owen: I believe every area I state here is an area of discussion. Each area of discussion is of a complex nature. We could go into trucking, we could go into rails, we could go into every aspect of transportation.

Mr. Mahoney: I think you can answer this either "yes" or "no". Is this a brief on behalf of Hawker Siddeley Canada Ltd.?

Mr. Owen: Yes, I believe it is.

Mr. Mahoney: Thank you. The next point then is: could you give just a brief description of this course in traffic and transportation that you discuss on page 4. Certainly I do not think that too many of us here are familiar with the operations of the institute so that some idea of the course and its value would be helpful to me.

Mr. Owen: They have a two year course which they call a graduate course, and this covers all aspects of transportation.

Mr. Mahoney: What is involved in terms of time, study and so on?

[*Interprétation*]

gnés de nos débouchés et je sais que la plupart d'entre nous avons de la concurrence au Canada central. Nous avons des problèmes à résoudre, et je pense que mon traité vous explique très bien la situation. Nos coûts unitaires sont très élevés par rapport à ceux de nos concurrents et tout le reste n'a pas d'importance, ou du moins en ce qui concerne ma compagnie, parce que les coûts unitaires et le transport constituent les faits principaux, là où le coût de la main-d'œuvre augmente de même que les taux des impôts et les divers autres aspects de l'exploitation d'une usine en Nouvelle-Écosse. Je pense que vous verrez qu'il y a plusieurs éconcés de mon exposé qui auront besoin d'explication. Vous n'aurez qu'à me poser des questions.

Le président: Monsieur Mahoney.

M. Mahoney: Monsieur Owen, je ne comprends pas très bien votre mémoire et vous pourriez peut-être clarifier ce que je considère comme une ambiguïté. Ce mémoire, le présentez-vous en votre nom propre ou en celui de la compagnie que vous représentez?

M. Owen: Non, j'ai présenté le mémoire à l'administration qui n'a rien eu à ajouter.

M. Mahoney: Tout au long du mémoire vous parlez de l'expérience de la compagnie et les recommandations et conclusions sont formulées à la première personne.

M. Owen: Je pense que chaque secteur dont j'ai parlé peut prêter à discussion. Chaque secteur de discussion est de nature complexe. On pourrait parler de camionnage, de transport ferroviaire, enfin de tous les aspects du transport.

M. Mahoney: Je pense que vous pouvez répondre par un oui par un non. Est-ce là un mémoire présenté au nom de la *Hawker Siddeley Canada Ltd.*?

M. Owen: Oui, je le crois.

M. Mahoney: Merci. Alors, j'en arrive au point suivant: pourriez-vous décrire brièvement ce cours de trafic et de transport dont vous parlez à la page 4. Je ne crois pas qu'il y en ait beaucoup ici qui connaissent cet institut, et il nous devient utile d'avoir une certaine idée du cours et de sa valeur.

M. Owen: Il y a un cours de deux ans conduisant au diplôme et portant sur tous les aspects du transport.

M. Mahoney: Qu'est-ce que cela comprend en fait de temps, d'étude, etc?

[*Text*]

Mr. Owen: It is one year and this is up to the individual themselves,—on the two year course.

Mr. Mahoney: Is this a year away at college or university or is it three nights a week at night school or what?

Mr. Owen: Transportation courses are not available in Canada. They do not have one in any college, and yet in the States they have two or three colleges which have specific transportation courses which are from three to four years of study.

Mr. Mahoney: There are university courses in Manitoba and British Columbia.

Mr. Owen: This two year course is a prerequisite to a course which is a three year course and it is on college level and is put out by the University of Toronto and is the only one we have in Canada. It goes into economics and it is equivalent to a commerce course—or they are trying to make it equivalent to a commerce course.

Mr. Mahoney: It is evident from your brief that the Maritimes are very short of people with this type of training.

Mr. Owen: In this field? In every aspect, even into the trucking or any aspect, I could give you good examples, just brief examples, of why this is so. From Montreal to Vancouver, for instance, the class rate, I would say, is somewhere in the vicinity of $9 by rail on a Class 85 car on a certain class of product The pool car people run in there for approximately $6. I would say, and the pool truck, right after the Trans-Canada Highway was implemented and put through about five years ago, has run in from Montreal to Vancouver at the same rate as the pool car, so that pool truck and pool car are competitive one with the other. This is approximtaely $6.

We pay into Trenton, a distance of 800 miles—and I might add that the distance from Montreal to Vancouver is approximately 3,000—approximately $3.25. One apsect of the thing is that the trucking people work on a regular truck mile; they are not on the mileage of short haul versus long haul or anything; they have to make this definite. They operate from one point to another point. They operate out of Toronto into Vanocuver solely, and cannot stop on the way to pick up or deliver at any point between if they are going to one point. These are only examples of what I believe.

[*Interpretation*]

M. Owen: Le cours est d'un an, et tout dépend des étudiants eux-mêmes.

M. Mahoney: Est-ce que cela comprend toute une année au collège ou à l'université ou trois soirs par semaine à l'école du soir?

M. Owen: Les cours de transport ne sont pas offerts au Canada. Il n'y en a pas dans un seul collège et aux États-Unis il n'y en a que deux ou trois qui offrent un tel cours de transport qui dure trois ou quatre ans.

M. Mahoney: Il y a des cours de niveau universitaire au Manitoba, et en Colombie-Britannique.

M. Owen: Ce cours de deux ans est un pré-requis à un cours de trois ans au niveau collégial qui est offert par l'Université de Toronto et c'est le seul que nous ayons au Canada. On y étudie l'économique et c'est l'équivalent du cours en commerce, ou du moins on essaie d'en faire un équivalent.

M. Mahoney: D'après votre mémoire, il est bien évident que les Maritimes n'ont pas suffisamment de personnes avec une telle formation.

M. Owen: Dans ce domaine? Même pour ce qui est du camionnage ou de tout autre aspect, je peux vous fournir d'excellents exemples très brefs, des raisons de cet état de choses. De Montréal à Vancouver, par exemple, le tarif de catégorie est d'environ $9. par chemin de fer dans un wagon de classe 85, pour une certaine catégorie de produits. Il en coûtait environ $6 par wagon mis en commun et, après la fin des travaux et l'inauguration de la route Transcanadienne il y a cinq ans, le taux de transport par camion mis en commun a été à peu près le même ce qui établit une concurrence entre les deux modes de transport.

A partir de Trenton, sur un parcours de 800 milles—je dois ajouter que la distance de Montréal à Vancouver est d'environ 3,000, nous payons environ $3.25. Un aspect de la chose, c'est que les camionneurs fonctionnent en vertu du mille régulier de route, non pas en vertu des courts trajets par rapport aux longs trajets. Il faut que ce soit précis. Ils vont d'un endroit à un autre, disons de Toronto à Vancouver uniquement, et n'arrêtent pas en cours de route pour livrer ou prendre de la marchandise. Ce ne sont que des exemples.

[*Texte*]

Mr. Mahoney: Yes, I think we were discussing the transportation course at one point earlier on in your answer and I would like, if possible, to get back to that. Do I take it perhaps from your answer that the type of transportation education you are speaking of here involves a person becoming very knowledgeable in the existing transportation, in tariff structures and so on, so that he can get the best deal for the company, as opposed to a person who designs systems and so on?

Mr. Owen: I believe there is house cleaning to be done, but I do not say it is within the jurisdiction of this committee to say.

Mr. Mahoney: All right

The Chairman: Mr. Breau.

Mr. Breau: Yes, Mr. Chairman. Where do you deliver most of your products to?

Mr. Owen: We have no problem with delivery. We deliver right on the track of the CNR. Our big problem is on the eastbound move.

Mr. Breau: Eastbound?

Mr. Owen: Eastbound shipments. We purchase all our materials from Ontario and Quebec.

Mr. Breau: For example, you do not have a problem of delivery price?

Mr. Owen: We have the same problem that Sydney related in their brief of OCS shipments in distance being the point here as opposed to rates. This is relevant in this case.

Mr. Breau: Yes, but what I mean is that one of your competitors in central Canada has an advantage because he is closer to another market, and you say that you deliver right on the rail at your mill?

Mr. Owen: That is correct.

Mr. Breau: You deliver it right there but if your buyer would buy in central Canada would he buy cheaper? Do you get the same price? If you do not have to pay the freight somebody has to pick it up.

Mr. Owen: We have to go on price: they are purchasing the rail car and they will not take into any consideration—there is a lot of consideration to be taken in here because of the freight charges that we go back go right into the railroad, but they still do not consider this. It is not a consideration. It is strictly

[*Interprétation*]

M. Mahoney: Oui, je pense que nous parlions du cours de transport à un moment donné, et je voudrais, si vous le voulez bien, y revenir. Est-ce que je peux en conclure à la suite de votre réponse que ce genre de cours dont vous parlez ici donne à une personne la formation nécessaire pour bien connaître les systèmes de transport existants, les structures tarifaires et ainsi de suite, ce qui lui permettra d'obtenir les meilleurs conditions possibles pour la compagnie, comparativement à une personne qui conçoit des systèmes, etc.?

M. Owen: Je pense qu'il faut mettre un peu d'ordre mais je ne dis pas que c'est de la compétence du comité.

M. Mahoney: Très bien.

Le président: Monsieur Breau?

M. Breau: Où se font la plupart de vos livraisons?

M. Owen: Nous n'avons pas de problème pour ce qui est de la livraison. Nous livrons directement à la voie du CN. Notre gros problème réside dans le transport vers l'est.

M. Breau: Vers l'est?

M. Owen: Vers l'est. Nous achetons tous nos matériaux de l'Ontario et du Québec.

M. Breau: Ainsi, vous n'avez pas de problème à l'égard des prix de livraison?

M. Owen: Nous avons les mêmes problèmes qui ont été exposés dans le mémoire de Sydney en matière d'expéditions à longue distance. Ceci est pertinent par rapport aux tarifs. Ce qui est pertinent ici.

M. Breau: Mais ce que je veux dire c'est qu'un de vos concurrents du Canada central a un avantage parce qu'il se trouve plus près d'un autre marché? Vous dites que vous faites la livraison directement par rail à l'usine.

M. Owen: C'est juste.

M. Breau: Vous faites la livraison là directement, mais si votre acheteur achetait au Canada central, est-ce que le prix serait moins élevé? Avez-vous le même prix? Si vous ne payez pas le transport, quelqu'un doit le faire.

M. Owen: Nous devons nous fier au prix. Ils font l'achat du wagon, mais ils ne tiennent pas du tout compte du fait qu'il faut vraiment penser ici aux frais de messagerie qui reviennent directement au chemin de fer. On oublie cela, on n'en tient pas compte. Il s'agit simplement du coût, et si la concurrence demande

[*Text*]

a case of cost and if the competition is $200 less per car then this is the point at which they buy in. No consideration; that is it.

Mr. Breau: But this $200 difference; is it because of your raw materials that you have to pay the freight on? Only that?

Mr. Owen: Definitely; we are building at this moment refrigerator cars for the CNR. These refrigerator cars are costing us $850 per unit in freight. Our competition, and this is just looking at tariffs and comparing the points that they are buying from into their plant and the modes of transportation that I can see existing in the tariffs, are paying $250. In other words, we are $600 out on the cost in these cases. So we have to bring this up through labour and through our other charges pertinent to cost.

The Chairman: Mr. Allmand?

Mr. Allmand: My question are supplementary to those asked by Mr. Breau.

Do you not take any of your raw materials from the Sydney steel mill?

Mr. Owen: Definitely; what we can.

Mr. Allmand: What percentage of those materials would come from Sydney?

Mr. Owen: What percentage? Well all our axle billets. We complement Sydney on this basis. We complement one another in a lot of cases. We have the billets which we buy from them, something like about 15,000 tons a year of billets from Sydney, and this raw material we have but this is just a small section of our business. We also import 30,000 tons of steel from Hamilton and Algoma.

Mr. Allmand: This is a type of steel they do not make at Sydney, I presume.

Mr. Owen: Well, this is just plate steel alone and then we have angles and various other things that they do not make at Sydney.

Mr. Allmand: What percentage of your business is with the CNR? Is it mostly CNR business?

Mr. Owen: No; over the last three years we have built some 100 caboose cars for the CNR and we have an order at the present moment of 300 refrigerator cars. These are the last two orders in the last three years that we have had.

[*Interpretation*]

200 dollars de moins par wagon, alors c'est motivable pour faire l'achat. Aucune considération, c'est cela.

M. Breau: Mais ces 200 dollars sont-ils dus aux matières premières pour lesquelles vous devez payer le transport? S'agit-il uniquement de cela?

M. Owen: Précisément; nous sommes en train de construire des wagons réfrigérés pour le National-Canadien. Ces wagons réfrigérés nous coûtent 850 dollars de transport l'unité. Nos concurrents, et je ne parle que des tarifs comparant seulement les endroits d'où ils achètent pour leurs usines et les modes de transport à ces tarifs ne paient que 250 dollars. En d'autres mots, nous payons 600 dollars de plus dans ces cas. Il nous faut donc tenir compte de cette situation en ce qui a trait à la main-d'œuvre et aux autres frais relatifs au coût.

Le président: Monsieur Allmand?

M. Allmand: Mes questions complètent celles qui ont été posées par M. Breau. N'achetez-vous pas certaines de vos matières premières de l'usine de Sydney?

M. Owen: Oui, dans la mesure du possible.

M. Allmand: Quel pourcentage viendrait de Sydney?

M. Owen: Quel pourcentage? Tous nos billettes d'essieu. Nous sommes le complément de l'usine de Sydney dans ce domaine. Nous nous complétons l'un l'autre pour plusieurs choses. Il y a les billettes que nous achetons, peut-être 15 mille tonnes par année. C'est une matière première. Ce n'est qu'une petite partie de notre entreprise. Nous importons aussi 30,000 tonnes d'acier d'Hamilton et d'Algoma.

M. Allmand: C'est le genre d'acier qu'on ne trouve pas à Sydney, j'imagine.

M. Owen: Cela ne comprend que la tôle. Il y a aussi les équerres et les autres produits qui ne sont pas faits à Sydney.

M. Allmand: Dans quelle mesure faites-vous des affaires avec le National-Canadien? Traitez-vous essentiellement avec le National-Canadien?

M. Owen: Non. Nous avons construit, au cours des trois dernières années 100 wagons de queue pour le National-Canadien. Nous avons actuellement une commande pour 300 wagons réfrigérés. Ce sont les deux seules commandes que nous avons eues au cours des trois dernières années.

[*Texte*]

Mr. Allmand: If you sell to the other Canadian railways, such as Canadian Pacific and the other smaller ones, do you also deliver to them right at the plant?

Mr. Owen: No; we have a penalty of $55. In other words, we have to pay mileage to any other customer outside of the CNR. We have to pay the mileage rate to these people; over to Saint John where we deliver these cars to the CPR costs us $55.

Mr. Allmand: Do you have any export market to the United States or overseas?

Mr. Owen: We have a very small export market. We have just delivered 20 cars to Anaconda in Chile. This was an order we just had and this is very marginal business.

Mr. Allmand: Do you make buses at your plant? You do not make buses in Nova Scotia.

Mr. Owen: Port Arthur and Fort William.

Mr. Allmand: Thank you. That is all.

The Chairman: Mr. Thomas?

Mr. Thomas (Moncton): Mr. Owen, I understand your major problem is with eastward bound shipments. In other words, raw materials coming in.

Mr. Owen: Right.

Mr. Thomas (Moncton): Do you come under competitive or non-competitive tariffs? What I am trying to get at is for your carload lots, does the increase in carload rates apply to them; that is, the increase that has been frozen until March 23 this year?

Mr. Owen: On carload rates?

Mr. Thomas (Moncton): Yes, on carload lots.

Mr. Owen: Because of volume, most of our carload rates are on what they call commodity rates. There is no competition involved here because we have no competition. I do not believe there are any competitive rates. We have these commodity rates just based on volume alone.

Mr. Thomas (Moncton): That is what I am trying to get at. If the freeze on carload freight rates is lifted on March 23 as the Act

[*Interprétation*]

M. Allmand: Si vous vendez aux autres sociétés ferroviaires, tel le Pacifique-Canadien ou d'autres petites sociétés, est-ce que vous leur faites aussi la livraison à l'usine?

M. Owen: Non, il y a une surcharge de 55 dollars. En d'autres termes, il nous faut payer le millage pour tout autre client que le National-Canadien. Il nous faut payer le tarif au millage à ces gens; pour faire la livraison à St-Jean, où nous devons livrer ces wagons au Pacifique-Canadien, il nous en coûte $55.

M. Allmand: Est-ce que vous avez des marchés d'exportation, vers les États-Unis ou outre-mer?

M. Owen: Il y a un faible marché d'exportation. Nous venons à peine de faire la livraison de 20 wagons à Anaconda, au Chili, une commande que nous venons de recevoir et plutôt marginale.

M. Allmand: Est-ce que vous faites des autobus à votre usine? Vous n'en faites pas en Nouvelle-Écosse?

M. Owen: A Port Arthur et Fort William.

M. Allmand: Merci, c'est tout.

Le président: Monsieur Thomas?

M. Thomas (Moncton): Monsieur Owen, si je comprends bien, votre principal problème est pour le matériel venant de l'est. En d'autres termes, pour les matières premières.

M. Owen: En effet.

M. Thomas (Moncton): Le tarif est-il concurrentiel ou non concurrentiel? Ce à quoi je veux en venir, c'est que, pour ce qui est des chargements de wagonnées, est-ce que l'augmentation s'applique dans votre cas, c'est-à-dire l'augmentation limitée jusqu'au 23 mars de cette année?

M. Owen: Pour ce qui est des taux de wagonnées?

M. Thomas (Moncton): Oui.

M. Owen: A cause du volume, la plupart de nos tarifs sont ce qu'on appelle des tarifs compétitifs des denrées d'usage journalier. Il n'est pas question de concurrence ici parce que nous n'avons pas de concurrence, je ne crois pas qu'il y ait des tarifs compétitifs. Les taux que nous avons sont fondés exclusivement sur le volume.

M. Thomas (Moncton): Voici ce à quoi je veux en venir. Si la fixation des tarifs-marchandises est abolie le 23 mars tel que le veut

[*Text*]

at present reads, will this affect you favourably or will your carload rates then go up?

Mr. Owen: I have no arguments with the railroad. My communications with the railroads are very good; it is their business. We do it strictly on a bargaining basis and I believe that we have an understanding one with the other. We understand what we are talking about; I understand their position and they understand ours.

Mr. Thomas (Moncton): What I am trying to get at is whether you will be affected if the freeze in carload rates is lifted? Does this not apply to the type of commodity you are bringing in?

Mr. Owen: I believe that we could look for other competition. I have means of other competition.

Mr. Thomas (Moncton): Perhaps I am not phrasing the question right, but I mean . . .

Mr. Owen: I know what you mean; The freeze.

Mr. Thomas (Moncton): That is what I am trying to get at.

Mr. Owen: Are you talking about taking off the MFRA subsidy?

Mr. Thomas (Moncton): As you know, the carload rates were raised on certain commodity items, but a two-year freeze would prolong this which is due to start on March 23. Now, what I am trying to get is if this freeze expires on March 23 will this affect your carload rates?

Mr. Owen: This could; this is a matter for me to decide and to negotiate.

Mr. Thomas (Moncton): The LCL rates have already gone up.

Mr. Owen: Well, ETA 100 to me is not as serious as it is to you because they have an item in ETA 100 that was never ever put in in the beginning and I had this all set up before for my own opinion. Now, I do not say this is going to benefit everybody, but from the volume we use and from the setup we have, we have overcome this particular rate and we would have been right back where we started before. But this was a matter of negotiation between us and the railway.

Mr. Thomas (Moncton): In other words, you have been able to negotiate with the railway to get. . .

[*Interpretation*]

la loi en ce moment, est-ce que cela aura un effet favorable pour vous ou est-ce que vos taux seront augmentés?

M. Owen: Je n'ai rien contre la société ferroviaire. Nos relations sont excellentes; c'est leur affaire. Nous nous fondons sur les négociations et je crois qu'il y a une entente entre nous. Nous savons de quoi nous parlons; je comprends leur position et ils comprennent la nôtre.

M. Thomas (Moncton): Ce à quoi je veux en venir, c'est ceci: est-ce que vous serez affectés si le gel est aboli? Est-ce que cela ne s'applique pas au genre de marchandise que vous expédiez?

M. Owen: Je pense que nous pourrions essayer de trouver d'autres concurrents. Il y a d'autres ressources.

M. Thomas (Moncton): Peut-être que je n'ai pas bien posé ma question.

M. Owen: Je vois très bien ce à quoi vous voulez en venir. Vous parlez de la fixation des tarifs.

M. Thomas (Moncton): C'est ce à quoi j'essaie d'en arriver.

M. Owen: Vous voulez parlez des subventions prévues par la Loi sur les transports des marchandises dans les Maritimes?

M. Thomas (Moncton): Comme vous le savez, il y a eu augmentation des taux pour certaines denrées d'usage journalier, mais un gel de deux ans prolongerait cette période qui doit commencer le 23 mars. Si ce gel prend fin le 23 mars, est-ce que cela affectera vos taux de wagonnées?

M. Owen: Il se pourrait qu'il en soit ainsi; ce sera à moi de négocier alors.

M. Thomas (Moncton): Les taux du trafic de détail ont déjà augmenté.

M. Owen: ETA 100 n'est pas aussi grave pour moi que pour vous parce qu'il y a un poste qui n'a jamais été inclus dans ETA 100 au début. Et j'avais tout prévu. Je ne crois pas que ce soit à l'avantage de tout le monde, mais d'après le volume que nous avons, d'après nos opérations, nous avons pu parer à cet inconvénient. Et nous nous retrouverons là où nous en étions. Mais enfin, il s'agit d'un sujet de négociations entre nous et le chemin de fer.

M. Thomas (Moncton): En d'autres mots, vous avez pu négocier avec le chemin de fer.

[*Texte*]

Mr. Owen: Today ETA 100 is open to that.

Mr. Thomas (Moncton): Thank you.

The Chairman: Mr. Perrault?

Mr. Perrault: Mr. Chairman. A statement is made in the amendment to the original brief dated February 12, 1969 and I quote from page 1 of the brief

> The federal government contributes approximately $14 million annually to the Maritime Freight Rates Act subsidy without any knowledge of the benefits accruing to the provinces.

and then you go on to say:

> I am reasonably sure it is true that 75 per cent of this subsidy is wasted and if it were removed only 25 per cent of the recipients would suffer.

That is an interesting and startling statement, Mr. Chairman. I just wonder if Mr. Owen would be prepared to provide any additional background material for consideration by the Committee in Ottawa that might serve to advance this case or substantiate that statement which is quite a startling statement, as I have stated. What comment would you have on that?

Mr. Owen: This is strictly hearsay. I have tried to find out and I cannot find out. It is hearsay and I do not believe it is up to me to find out what hearsay is. I am just stating a fact, sir, that I know.

Mr. Perrault: Well, if you do have any additional material I am sure we would like to have it. I am not challenging the private of interest and I think that . .

Mr. Owen: I would like to get it for you.

Mr. Perrault: The second part, Mr. Chairman, is this. The brief states that railway cars are delivered by rail along the track, in effect, but I see the statement on page 2:

> When bidding for cars for the Pacific Great Eastern Railway in British Columbia, it costs them approximately $1,200 per car to deliver, approximately $400 per car more than their main competition.

It costs $1,200 per car to get a railway car to British Columbia?

Mr. Owen: That is right; that is on mileage. It is an empty car.

Mr. Perrault: Tagging it on to the end of an existing train at some point?

[*Interprétation*]

M. Owen: Actuellement, ETA 100 permet de le faire.

M. Thomas (Moncton): Merci.

Le président: Monsieur Perrault?

M. Perrault: Monsieur le président. Dans l'amendement apporté au mémoire le 12 février 1969, et là je cite la première page du mémoire: «Le gouvernement fédéral a contribué pour environ 14 millions de dollars annuellement aux subventions faites au titre de la Loi sur les transports des marchandises dans les Maritimes sans savoir quel avantage les provinces en retireraient.» Et vous poursuivez en disant: «Je suis à peu près certain que 75 p. 100 de ces subventions ne servent à rien et que, si elles disparaissaient, seulement 25 p. 100 des destinataires en souffriraient.» C'est une déclaration des plus intéressante, monsieur le président. Je me demande si M. Owen serait prêt à nous fournir d'autres données de base pour que le Comité puisse les étudier à Ottawa, et qui pourraient aider à prouver ces déclarations qui sont vraiment des plus étonnantes, comme je l'ai déjà dit. Quels commentaires auriez-vous à faire là-dessus?

M. Owen: C'est du ouï-dire. J'ai essayé de savoir, mais je n'ai pu. C'est du ouï-dire et je ne crois pas que ce soit à moi de le vérifier. Je mentionne seulement le fait, monsieur, voilà ce que je sais.

M. Perrault: Si vous avez d'autres données, nous nous ferions un plaisir de les entendre. Je ne conteste pas les intérêts, mais je crois que. . .

M. Owen: J'aimerais bien obtenir ces renseignements pour vous.

M. Perrault: Deuxième point, monsieur le président. Le mémoire déclare que les wagons sont livrés en les mettant sur les rails. A la page 2, on dit:

«Quand ils présentent des soumissions pour des wagons destinés au *Pacific Great Eastern Railway*, il leur en coûte environ 1,200 dollars par wagon pour la livraison, soit environ 400 dollars de plus qu'à leur principal concurrent.» Il en coûte 1,200 dollars pour acheminer un wagon en Colombie-Birtannique?

M. Owen: En effet; c'est basé sur le millage. Il s'agit d'un wagon vide.

M. Perrault: Même s'il est remorqué quelque part par un train existant déjà?

[*Text*]

Mr. Owen: Right.

Mr. Perrault: What would it cost to ship by water around the Panama Canal?

Mr. Owen: Much more, because the cubics are very high in price.

Mr. Perrault: It just would not be feasible then?

Mr. Owen: That is right.

Mr. Trudel: A supplementary please, Mr. Chairman.

The Chairman: Mr. Trudel?

Mr. Trudel: Did I understand the witness correctly when he said that it would be much higher by water?

Mr. Owen: Yes.

Mr. Trudel: To Vancouver?

Mr. Owen: To Vancouver; how would you get to Vancouver in the first place? There is no scheduled service to Vancouver. We would have to charter and it is a matter of production and customers demands. These are all taken into consideration, but the cubic content of a car is approximately two or three to one over the weight.

Mr. Perrault: Mr. Chairman, there is a statement concerning truckers, made in this brief as well, I quote from page 3:

> This monopoly of intra provincial and interprovincial trucking is taking its toll from industry in areas struggling for existence with rates that are far too high.

I take it, then, that you are opposed to any subsidy to the trucking industry in the Maritime industry.

Mr. Owen: No.

Mr. Perrault: Would you explain?

Mr. Owen: I can explain my position mainly from a traffic point of view. You have to take it as from a transportation point of view and that of an industrial traffic manager. We are dealing with the trucking people on a much lower level—or right at the basic level—than anyone else. You can have all the consultants in the world but they cannot tell you the basic fundamentals of the problem. We find this. I have had experience in Montreal and all across the country in dealing with trucking people and I have nothing against the trucking people. This is a business and they have to operate and they will charge what the traffic will bear.

[*Interpretation*]

M. Owen: Oui.

M. Perrault: Qu'est-ce qu'il en coûterait pour expédier par bateau, en passant par le Canal de Panama?

M. Owen: Beaucoup plus, parce que le cubage coûte très cher.

M. Perrault: Ce ne serait donc pas réalisable?

M. Owen: C'est juste.

M. Trudel: Une question supplémentaire, monsieur le président.

Le président: Monsieur Trudel?

M. Trudel: Est-ce que j'ai bien compris le témoin lorsqu'il a dit que ce serait beaucoup plus coûteux par mer?

M. Owen: Oui.

M. Trudel: Pour Vancouver?

M. Owen: Comment pouvez-vous vous rendre à Vancouver? Il n'y a pas de service prévu pour Vancouver. Il nous faudrait noliser et c'est une question de production et de demande. Tout cela entre en ligne de compte, mais le cubage d'un wagon est d'environ 2 ou 3 contre un au-dessus du poids.

M. Perrault: Monsieur le président, au sujet des camionneurs, on déclare aussi, à la page 3 dans ce mémoire, et je cite: «Ce monopole du camionnage à l'intérieur des provinces et entre les provinces nuit à l'industrie qui essaie de faire face à des tarifs qui sont beaucoup trop élevés». Dois-je en conclure que vous vous opposez à ce que des subventions soient payées à l'industrie du camionnage dans les Maritimes?

M. Owen: Non.

M. Perrault: Pouvez-vous préciser?

M. Owen: Je pourrais vous expliquer mon attitude simplement du point de vue du trafic. Prenons-le suivant l'aspect du transport, et comme le verrait un directeur du service de transport industriel. Nos relations avec l'industrie du camionnage se situent à un niveau inférieur ou plus fondamental. Vous pouvez avoir tous les conseillers, ils ne peuvent vous donner les éléments fondamentaux de ces problèmes. Nous en avons l'expérience. A Montréal, et partout au pays, j'ai rencontré les représentants des camionneurs, je ne leur en veux pas. C'est une entreprise, et il lui faut fonctionner. Les taux sont selon ce que le trafic permet.

[*Texte*]

Mr. Perrault: Do you think they are charging too much?

Mr. Owen: I think so; maybe it is because of their operating expenses. I have not got a clue; they have to prove this to me.

Mr. Perrault: Then you are not suggesting they be subsidized when you already state that they are charging too much.

Mr. Owen: Well, if you read the brief, what I am trying to imply is that that this is merely housecleaning and there is one hell of a lot of housecleaning to go on and I think this is apart from what the Committee wants. There is a problem. The only thing I want is a bridging subsidy. I was talking to somebody before on this. You were asking why the rest of the shippers in Canada were not; how would they feel about you getting a subsidy. Well there was a subsidy put on which did not affect the Maritimes, and I do not think anybody complained about that. It brought both Eastern and Western Canada closer together.

Mr. Perrault: Again, Mr. Chairman, if you have any information which would be of interest to the Committee relating to the cost of shipping by truck, any information relating to rates, I know the Committee would be pleased to hear from you.

Mr. Owen: Fine; any time.

Mr. Rose: Mr. Owen, I too was startled by the remarks in your brief. Were you here this morning, sir? I raised the question about the Charlottetown Board of Trade brief where the truckers responded to a raise in rail rates by immediately raising their own rates in this particular area; higher rates here for less than carload lots.

Mr. Owen: I will not argue with the trucker implication there; I cannot say.

Mr. Rose: It relates to the whole question of where assistance to this particular area might best be put, because there have been suggestions that any M.F.R.A. rate or any extension should go to the shipper rather than the carrier because at the problem that it might not be passed on by the carrier.

Mr. Owen: No; I did not imply that there.

[*Interprétation*]

M. Perrault: Ils exigent trop, selon vous?

M. Owen: C'est bien ce que je crois. C'est peut-être dû à leurs dépenses d'exploitation, je n'en sais rien. Ils doivent me le prouver.

M. Perrault: Alors vous ne proposez pas qu'ils doivent être subventionnés lorsque vous dites qu'ils exigent déjà beaucoup trop?

M. Owen: Si vous lisez le mémoire vous verrez que je suggère simplement de mettre un peu d'ordre. Il y a beaucoup d'ordre à mettre. Je pense que ce n'est pas ce que désire le Comité. Il y a un problème. Tout ce que je veux c'est une subvention d'appoint. J'en faisais part à quelqu'un auparavant. Vous demandez pourquoi les autres expéditeurs ne le font pas; quelle serait leur réaction si vous obteniez une subvention. Il y a eu une subvention qui ne touchait pas les Maritimes et je crois que personne ne s'est plaint. Cela a réussi à nous rapprocher, l'est et l'ouest.

M. Perrault: Si, une fois de plus monsieur le président, vous avez des renseignements qui puissent intéresser le Comité, qui se rattachent au coût d'expédition par camion, et des renseignements quant aux taux, je sais que le Comité se fera un plaisir de les entendre.

M. Owen: Excellent. En n'importe quel temps.

M. Rose: Monsieur Owen, moi aussi je suis étonné par les observations que vous avez énoncées dans votre mémoire. Est-ce que vous étiez là ce matin? J'ai abordé la question au sujet de la présentation du *Board of Trade* de Charlottetown, des camionneurs qui ont réagi en augmentant leurs tarifs dans cette région eux aussi par suite d'une augmentation du tarif ferroviaire; des taux plus élevés ici pour moins qu'une wagonnée.

M. Owen: Je ne veux pas m'en prendre aux camionneurs à ce sujet. Je ne suis pas en mesure de vous en parler.

M. Rose: Cela se rattache à toute cette question de savoir où l'aide à cette région serait la plus efficace parce qu'on a dit que tout tarif rattaché à la Loi sur les transports des marchandises dans les Maritimes, ou toute extension, devrait être donné à l'expéditeur plutôt qu'au transporteur au cas où celui-ci n'en ferait pas bénéficier le premier.

M. Owen: Ce n'est pas ce que j'ai dit.

[*Text*]

Mr. Rose: No, no; I did not say you did.

Mr. Owen: The carrier has his own problems. I am talking about industry. The whole object of the M.F.R.A. here was to bring industry into the Maritime Provinces.

To me it has not been done. I have looked at the situation. I have talked to people, I have talked to individuals who are presidents of companies and asked them how the freight rate affected them or what they knew about the M.F.R.A., what they knew about any aspect of transportation, and they could not answer this question. They could not even give me—they had no idea.

Mr. Rose: To paraphrase it for clarification—I am not attempting to put words in your mouth—you are suggesting that favourable attitudes and subsidies and this sort of thing have not developed indstry in the Maritimes.

Mr. Owen: No. That is right.

Mr. Rose: Is your own industry, sir, Hawker Siddeley Canada Limited, a British-owned firm?

Mr. Owen: It is a British-owned firm, yes.

Mr. Rose: Your company has been established here for some time?

Mr. Owen: Yes, I imagine so. If you have heard about Sydney, I believe you...

Mr. Rose: Right. I was interested in the business about the Sydney Steel Corporation because they had a problem in shipping their products too and you try to co-ordinate and use as much of the material there as possible.

Mr. Owen: Then again, the transportation department of Sydney Steel Corporation and my transportation department work very well together and this has no bearing on Hawker Siddeley Canada Limited or anything. We are a fraternity by ourselves and we work this way, and we have very good relations.

Mr. Rose: Can you tell me, sir, how much of an advantage your lower wages give you in your manufacturing here in the Maritimes?

Mr. Owen: Our lower wages at this moment, so I believe, I am no—that is why I stayed away from statistics and if anybody wanted to ask me what statistics they

[*Interpretation*]

M. Rose: Non, je ne prétends pas que c'est vous qui l'avez dit.

M. Owen: Le transporteur a ses propres problèmes. Je parle de l'industrie. Tout le but de la Loi sur les taux de transport des marchandises dans les province maritimes était d'amener des industries dans les Maritimes.

Pour moi, on n'y est pas parvenu. J'ai examiné la situation, je me suis entretenu avec des personnes, des présidents de compagnies afin de voir comment ces tarifs-marchandises les avaient affectés, ce qu'ils connaissaient de la Loi sur les taux de transport des marchandises dans les provinces maritimes ou tout autre aspect des transports, mais ils ne pouvaient répondre à cette question. Ils ne pouvaient même pas me donner... enfin ils n'avaient pas la moindre idée.

M. Rose: Pour paraphraser un peu, à des fins de précision, je n'essaie pas de vous prêter des paroles, vous proposez qu'une attitude favorable, des subventions et des choses de ce genre n'ont pas réussi à développer l'industrie dans les Maritimes.

M. Owen: Non, c'est vrai.

M. Rose: Votre propre industrie, Monsieur, *Hawker Siddeley Canada Limited,* est-t-elle une société britannique?

M. Owen: Oui, c'est une société britannique.

M. Rose: Êtes-vous établis ici depuis un certain temps?

M. Owen: Oui, j'imagine. Si vous en avez déjà entendu parler, je crois que vous...

M. Rose: C'est vrai. Je me suis intéressé aux affaires de la *Sydney Steel Corporation* parce qu'ils ont aussi eu un problème d'expédition de leurs produits et vous essayer de coordonner et d'utiliser le plus de matériel possible qui s'y trouve.

M. Owen: Alors, le service de transport de la *Sydney Steel Corporation,* et le mien collaborent très bien en eux et cela n'a rien à voir avec la *Hawker Siddeley Company Limited.* Nous sommes une fraternité par nous-mêmes et c'est ainsi que nous travaillons, nous avons d'excellents rapports.

M. Rose: Pouvez-vous me dire, monsieur, quel avantage vous procurent vos salaires inférieurs pour ce qui est de votre fabrication ici dans les Maritimes?

M. Owen: Nos salaires inférieurs, en ce moment, je crois, c'est la raison pour laquelle je me suis tenu éloigné de la statistique et si quelqu'un veut me demander de quelle statis-

[*Texte*]

require—our wages, I understand, are on a par with Quebec wages.

Mr. Rose: Your competitors' wages?

Mr. Owen: Our competitors? We have competitors in Quebec. Our competitors' wages are somewhat higher and, as I say, this is narrowing. It is narrowing the margin of profit and it is becoming very marginal in our cost.

Mr. Rose: Do you feel that perhaps the wages subsidize your industry less than they did in the past?

Mr. Owen: Yes, definitely. I think I can make this statement, that we accepted this reefer carrier just on the cost and we knocked off our profit just to keep going.

Mr. Rose: Is your plant organized, sir?

Mr. Owen: It is very well organized.

Mr. Rose: Is it organized by a trade union?

Mr. Owen: Yes, it is.

The Chairman: Have you other questions, gentlemen?

Mr. Perrault: Did Hawker Siddeley receive any kind of government incentive when it first came?

Mr. Owen: This I am not prepared to say. I know I have been there four, and I am going back five years now. We have not received any tax concessions. We have received no subventions and no subsidies and, as I say, as far as subsidies are concerned, the only one is the M.F.R.A. from which we derive about 5 per cent.

Mr. Perrault: It is your view that there is a more acceptable way to extend subsidy aid than merely this application of freight rates to the trucking industry and the rest. You would like to extend aid to industry where this aid is required?

Mr. Owen: Industry itself would have to prove that it is qualified. In order to qualify, with the qualification set up—this is just off the top of my head—the industry would require a transportation consultant in order to apply for those...

Mr. Perrault: I understand.

[*Interprétation*]

tique ils ont besoin, que nos salaires sont égaux à ceux du Québec.

M. Rose: Les salaires de vos concurrents?

M. Owen: Nos concurrents? Nous avons des concurrents au Québec. Leurs salaires sont quelque peu plus élevés, comme je l'ai dit, mais nous rapprochons. Cela diminue la marge de profit et devient un secteur tout à fait marginal dans nos frais.

M. Rose: Croyez-vous que les salaires subventionnent votre industrie moins que dans le passé?

M. Owen: Oui, sûrement. Je pense pouvoir faire cette déclaration que nous avons accepté cette commande de wagons frigorifiques simplement pour le coût et nous avons fait disparaître nos bénéfices simplement pour maintenir notre usine.

M. Rose: Est-ce que vous êtes organisés?

M. Owen: Oui, c'est très bien organisé.

M. Rose: Est-ce organisé par un syndicat?

M. Owen: Oui.

Le président: Messieurs, avez-vous d'autres questions à poser?

M. Perrault: Est-ce que vous avez reçu des encouragements du gouvernement lorsque vous êtes venus vous établir?

M. Owen: Je ne suis pas prêt à vous donner la réponse. Je suis là depuis cinq ans, et depuis ce temps, nous n'avons pas reçu de concessions en matière d'impôt. Nous n'avons jamais reçu de subventions, de subsides, et comme je vous dis, pour ce qui est des subventions, la seule à laquelle je peux songer est celle en vertu de la Loi sur les taux de transport des marchandises dans les provinces maritimes dont nous touchons environ 5 p. 100.

M. Perrault: Vous croyez qu'il y a une meilleure façon de procéder que cette simple application des tarifs-marchandises au camionnage et autres industries de transport. Vous aimeriez donner l'aide à l'industrie là où il le faut.

M. Owen: Il faudrait que l'industrie puisse prouver alors son admissibilité. Pour être admissible suivant les exigences qu'on prévoit, et là je vous donne simplement cela, l'industrie aurait besoin d'un expert-conseil en matière de transport pour pouvoir présenter une telle demande.

M. Perrault: Je comprends.

[*Text*]

Mr. Owen: You would also get the transportation people in there with them and say, "This is what you need."

Mr. Perrault: I understand.

Mr. Owen: On a very technical basis or sophisticated basis.

Mr. Perrault: Thank you, Mr. Chairman.

The Chairman: If there are no other questions, thank you, gentlemen, for submitting your brief.

Now I would like to call upon Major D. A. MacDonald, from the Brunswick Hotel in Moncton, New Brunswick, who will give a short resume of his brief.

Major D. A. MacDonald (Private Citizen, Moncton, New Brunswick): Mr. Chairman, gentlemen of the Committee, I am not going to read my first brief which I wrote a year ago. At that time the causeway was under construction and I was very glad to see that, but since that time it has been somewhat delayed. However, I wrote this short brief since—the other day.

Further to the brief I have submitted, I would like to say I had written to all the Governors of the New England States when I prepared the brief that I have read here. I also submitted a copy of the brief and a letter covering my ideas.

I would like to go into the project of the causeway crossing the Northumberland Straits. I made quite a study of this, taking everything into consideration, as I did of the causeway that crossed the Petitcodiac River which is now almost completed. This was in the early fifties. This causeway will be the greatest uplift to that section of the country. I wrote an article in the Moncton papers outlining my proposals. I will attach a copy of this article to my other letters which I have given you. I also spoke to the Board of Trade in Amherst on this subject. I was quite confident that it was feasible and I asked my good friend Neil Matheson to bring it up in the House, which he did.

It soon became an interesting subject. I was extremely pleased when a start was made on the approaches, although I was not pleased with the design. A causeway, a bridge, an island and a tunnel, I do not see or understand such a plan. I have not changed my mind on my plan; that a concrete structure solid across with a lock for summer shipping is sound. These concrete casements could be made on the beaches and floated out. There

[*Interpretation*]

M. Owen: Vous amèneriez également les gens des transports avec eux et il faudrait leur dire: «voilà ce dont vous avez besoin».

M. Perrault: Je comprends.

M. Owen: Il faut donc faire une étude technique ou sophistiquée.

M. Perrault: Merci beaucoup, monsieur le président.

Le président: S'il n'y a pas d'autres questions, j'aimerais bien pouvoir demander au Major D. A. MacDonald, de l'Hôtel Brunswick, à Moncton (N.-B.), de présenter son mémoire.

Major D. A. MacDonald (simple citoyen, Moncton, Nouveau-Brunswick): Monsieur le président, messieurs les membres du Comité, je n'ai pas l'intention de vous lire mon premier mémoire qui avait été présenté, il y a un an. A ce moment-là, la chaussée était en construction et j'étais très heureux de le constater, mais, depuis ce temps, la construction a été quelque peu retardée. Toutefois, j'ai écrit le bref mémoire depuis, l'autre jour.

En plus du mémoire que j'ai présenté, j'aimerais dire que j'avais écrit à tous les gouverneurs des États de la Nouvelle-Angleterre, quand j'ai préparé le mémoire que j'ai lu ici. J'ai aussi présenté un exemplaire du mémoire et une lettre exprimant mes idées.

J'aimerais maintenant vous parler du projet de la chaussée du détroit de Northumberland. J'ai étudié la question en détail, tenant compte de tous les aspects, comme je l'avais fait pour la chaussée traversant la rivière Petitcodiac, qui est maintenant presque terminée. Cela se passait au début des années 50. Cette chaussée sera la plus grande amélioration dans cette section du pays. J'ai écrit un article pour les journaux de Moncton, y exposant mes propositions. Je vais annexer une copie de cet article aux autres lettres que je vous ai déjà données. J'ai aussi parlé au Board of Trade de Amhest à ce sujet. J'étais très confiant que c'était pratique de le faire et j'ai demandé à mon bon ami M. Neil Matheson, d'en parler à la Chambre, ce qu'il a fait.

Le sujet est bientôt devenu des plus intéressants. J'ai été très heureux de voir les travaux qui s'effectuaient sur les voies d'accès, quoique je n'étais pas du tout heureux du dessin. Une chaussée, un pont, une île et un tunnel; je ne comprends pas du tout la raison d'être d'un tel projet. Je n'ai pas changé d'idée sur mon propre projet, à l'effet qu'une structure solide en béton, en largeur, avec une écluse pour la navigation en été est une

[*Texte*]

would have to be a canopy enclosure to protect the roadway from ice. It would be similar to the old-fashioned convered bridges. Another great thing in this construction is that 95 per cent of all the materials used would be purchased in the Maritime Provinces. The proof of my plan being sound is the construction of the Canso Causeway, and you know what this causeway has done for Cape Breton and the surrounding country.

The causeway to Prince Edward Island will be an asset to all Canada and Canada owes this to the people of the Maritime Provinces and a great deal more. We have given Canada and the world some of the greatest men and women in all walks of life.

Gentlemen, the smallest province in Canada, Prince Edward Island, in this great country, led second to the largest park in the world in Alberta as a tourist attraction. It is second as a tourist attraction all over this continent. The causeway must be built. These ships can be utilized on other parts of the Island to a great advantage. Wood Island's ferry is developing very rapidly. It needs two more boats there now. To build this causeway you can deduct—and I might say here the great dicffiulty in building this causeway seems to be money—$150 million that is wasted on the CBC. This is a scandalous waste. It should be turned into a private enterprise and left to pay its own way. The government should not be in the show business. Many of the programs are a disgrace and indecent.

Urban renewal is a public monster in a country like Canada where we have beautiful virgin land to build on. Purchasing land at an extravagant price because certain people with money want the public to hug the centre of the cities. Other properties have been left to waste. Ninety per cent of these properties have been condemned by the health department, are owned by the richest people in the country.

Too much emphasis is placed on house building. Any man who wants a $15,000 home or more should not be asking any favours. I am thinking about the man with a family that earns less than $100 a week. I am sure that comfortables homes could be built for these people. Fortunes have been made out of this national housing. A $10,000 home, deducting all taxes, could be built for approximately $7,200. Therefore it is 28 per cent taxes on a

[*Interprétation*]

bonne idée. On pourrait construire les battants en béton sur la rive et les faire flotter en place.

Il faudrait une voûte pour protéger la chaussée de la glace. Cela ressemblerait aux anciens ponts couvers. Un autre aspect important de cette construction est que 95 p. 100 de tous les matériaux employés seraient achetés dans les provinces maritimes. La preuve que mon projet est solide, est la construction de la chaussée Canso. Vous savez ce qu'à fait cette chaussée pour le Cap Breton et le milieu environnant.

La chaussée jusqu'à l'Île-du-Prince-Édouard serait certainement un avantage pour tout le Canada et le Canada doit cela aux gens des provinces maritimes, et beaucoup plus encore. Nous avons donné au Canada et au monde certains des plus grands hommes dans tous les domaines.

Messieurs, la plus petite province du Canada, l'Île-du-Prince-Édouard dans ce beau et vaste pays, s'est classée au deuxième rang, après le plus grand parc au monde en Alberta, comme parc d'attraction pour le tourisme. La chaussée doit être construite. On pourrait utiliser avantageusement ces navires pour les autres secteurs de la province. La traversée à Wood Island's se développe très rapidement et elle a besoin de deux autres navires. Pour la construction de la chaussée, et je dois dire ici, que la grande difficulté, vous pourriez déduire 150 millions de dollars qui sont gaspillés pour Radio-Canada. C'est un gaspillage scandaleux. On devrait transformer Radio-Canada en entreprise privée et la laisser se subvenir à elle-même. Le gouvernement ne devrait pas se mêler de théâtre. Plusieurs des émissions sont disgracieuses et indécentes.

La rénovation urbaine est un monstre public dans un pays comme le Canada où nous avons de beaux terrains vierges où l'on pourrait construire. Achetant le terrain à des prix extravagants parce que certaines personnes avec de l'argent veulent que le public s'entasse au centre des grandes villes. D'autres propriétés sont abandonnées à la ruine. 90 p. 100 de ces propriétés, qui ont été condamnées par le ministère de la Santé, sont la propriété des plus riches du pays.

On a trop insisté sur la construction de résidences. N'importe lequel homme qui veut une maison de $15,000 ou plus, ne devait pas quémander de faveurs. Je songe à celui qui a une famille et qui gagne moins de $100. par semaine. Je suis sûr que des maisons confortables pourraient être construites à l'intention de ces gens. On a fait des fortunes dans ce projet de logement. Une maison de $10,000, si on déduit toutes les taxes, pourrait certaine-

[*Text*]

house. The other people I am not worried about. If they want to call the tune they can pay for it.

The railway must not be paying taxes to the municipalities. The municipalities contribute very little to it. The backbone of the railway and the country at large is the farmers, the fishermen, the lumbermen, the miners and all producers of raw materials and they are the last to be considered.

Why should a miner contribute to a railway that pays taxes to a city and the taxes are used to illuminate the city? A city is fortunate to have a railway running through it. It has all the convenience at no cost whereby the farmer must haul his produce to a railway station at his own expense. They are building too close to the railway tracks now and they are asking the railway to move them.

There is only one way of remedying traffic problems of trains and other conveyances, and that is by underpasses and overpasses.

My final subject is interest rates. If something is not done and interest rates are not pegged, we will have a third world war.

There is no reason why the United States and Canada could not peg interest rates. They are both self-supporting nations with all the commodities of life. In the thirties Canada established the greatest banking system in the world. The United States copied it, but it is starting to break up. Thank you.

The Chairman: Thank you very much. Are there any questions, gentlemen?

Gentlemen, I have two further short briefs. These briefs are not on the agenda but the people are here and they would like to be heard. I think it is the duty of the Committee to hear them if it is possible. We will now call upon the Maritime Motor Transport Association.

Mr. McGrath: The only objection I make, Mr. Chairman, is that we had a long examination of the parent organization in Fredericton and I think we should bear that in mind.

The Chairman: We are just going to have a summary of the brief, Mr. McGrath.

Mr. J. Lowell Hogg (Vice-President, Maritime Motor Transport Association): Gentle-

[*Interpretation*]

ment être construite pour $7,200. Par conséquent, il y a 28 p. 100 de taxes sur une maison. Je ne me péoccupe pas des autres. S'ils veulent choisir, qu'ils paient.

Le chemin de fer ne doit pas verser des impôts aux municipalités. Les municipalités y contribuent très peu. La force des chemins de fer et du pays dans l'ensemble, ce sont les pêcheurs, les agriculteurs, les bûcherons, les mineurs et tous les producteurs de matière brute, et malheureusement, ce sont les derniers à être pris en considération.

Pourquoi le mineur doit-il contribuer à un chemin de fer qui paie des taxes à une municipalité et que les taxes servent à illuminer la ville? Le chemin de fer est un avantage pour une ville. Il a toutes les commodités sans aucun frais, tandis que le cultivateur doit transporter ses propres produits à ses propres frais, jusqu'à une gare de chemin de fer. On construit trop proche des voies ferrées à l'heure actuelle et on demande au chemin de fer de déplacer ses lignes.

Il n'y a qu'un seul moyen de remédier aux problèmes de la circulation et à d'autres moyens de transports c'est-à-dire par des passages inférieurs et supérieurs. Mon dernier sujet est les taux d'intérêt; si on ne fait pas quelque chose et si les taux d'intérêt ne sont pas baissés, nous aurons une troisième guerre mondiale. Il n'y a pas de raison pour laquelle le Canada et les États-Unis ne pourraient pas payer des intérêts. Les deux pays se suffisent à eux-mêmes. Ils ont tous les avantages matériels de la vie; dans les années trente, le Canada établit le meilleur système banquaire au monde, et les États-Unis l'ont approprié; mais il commence à se détériorer. C'est tout, messieurs, je vous remercie.

Le président: Merci, y a-t-il d'autres question à poser, messieurs?

Messieurs, j'ai deux autres petits mémoires, sur ma liste, qui ne se trouvaient pas sur notre programme, mais étant donné que les gens sont ici et aimeraient bien être entendus. Je crois que c'est le devoir du Comité de les entendre, si c'est possible. Et je demanderais donc au *Maritime Motor Transport Association* de présenter son mémoire.

M. McGrath: Monsieur le président, la seule objection que je fais est que nous avons longuement étudié l'organisme-mère à Fredericton et je pense qu'il faudrait en tenir compte.

Le président: Il va tout simplement résumer le mémoire, M. McGrath.

M. J. Lowell Hogg (Vice-président, Maritime Motor Transport Association): J'essayerai de

[*Texte*]

men, I hope I will not bore you. This brief deals practically in total with Prince Edward Island problems. I understand that the brief presented at Fredericton was, in the main, on the Maritime Freight Rates Act, but we do not plan to go into any detail on that subject.

The Prince Edward Island directors of MMTA appreciate the opportunity of appearing before this Transport Committee to answer questions and present some facts about truck transportation on Prince Edward Island and between that province and the rest of Canada.

Because of our insular position and lack of contact with our sister provinces, truck transportation is slow in coming to this province. Highways were paved in the 1940s but it was only with the re-building of the Trans-Canada Highway to all-weather standards in 1965 that trucks were able to carry payloads 12 months of the year. With this exception and a few trunk highways, heavy traffic is severely curtailed during the than-out period of approximately six weeks each spring. We have reviewed Walter Gordon's Report on the Royal Commission on Canada's Economic Prospects and a submission by Mr. Lessard entitled *Canadian Transportation*, which was published nearly 15 years ago, and we have found that of the many suggestions recommended to improve transportation in the Maritimes the only one nearing implementation is adequate highways.

The railways have had a virtual monopoly on freight and passenger traffic on Prince Edward Island, as they have had in other provinces. Truck transportation began interprovincially in 1941 with the opening of the Wood Island ferries for summer traffic. It was 1950 before rates were reduced and the decks were planked for trucks at Borden and Cape Tormentine, and Prince Edward Island began to enjoy modern transportation. However, trucks are still hampered by lack of crossing facilities over the Northumberland Strait and by the fact that their competitors, the railways, under the Maritime Freight Rates Act have the advantage of a 20 per cent or a 30 per cent subsidy plus a $2 freight car charge on the ferry as aganst a $6 to $8 rate for trucks.

The truck operators of Prince Edward Island fully endorse the presentation made by MMTA at your sittings in Fredericton with relation to the building of a Maine corridor road that will shorten the distance to central Canadian markets. We also give our strong support to the presentations in favour of the

[*Interprétation*]

ne pas être trop long: nous discutons presque au complet les problèmes d l'Île-du-Prince-Édouard. Le mémoire que nous avons présenté à Fredericton concernait principalement la Loi sur les taux de transport de marchandises des maritimes, et nous n'avons pas l'intention d'en parler en détail. Les directeurs apprécient l'occasion de se présenter devant ce comité de transports pour répondre aux questions et de vous présenter certains faits au sujet du transport par camion sur l'Île-du-Prince-Édouard et entre cette province et le reste du Canada.

En raison de notre situation insulaire, et du manque de contact avec nos provinces sœurs, le transport par camion se fait lentement en direction de la province. Dans les années 40 les autoroutes ont été bitumées, mais ce n'est qu'à la fin de la construction de la route transcanadienne, en 1965, conformes aux normes de toute saison que les camions ont pu faire le transport douze mois par année. Avec cette exception et certaines routes pour camions—ne pouvons en faire le transport par camion pendant six semaines au printemps seulement. Nous avons examiné les rapports de la Commission Gordon et de M. Lessard, intitulé *Canadian Transportation* publiées il y a tout près de quinze ans, et nous trouvons qu'une grande partie des recommandations faites pour améliorer les transports aux maritimes, la seule valable est de construire des autoroutes.

Les chemins de fer ont réellement eu un monopole sur le transport de marchandises et de passagers vers l'Île-du-Prince-Édouard comme cela existait dans les autres provinces. Le camionnage a commencé de façon interprovinciale en 1941 avec l'ouverture du service des transbordeurs de Wood Island pour l'été. En 1950, on a réduit les taux, et on a pu accepter les camions à Borden et à Cape Tormentine et l'Île-du-Prince-Édouard a donc commencé à profiter d'un moyen de transport moderne. Toutefois, les camions ont toujours de la difficulté de la traversée sur le détroit de Nord Cumberland. De plus, leurs concurrents, les chemins de fer, ont une subvention de 20 ou 30 p. 100, en vertu de la Loi sur les taux de transport de marchandises des provinces maritimes en plus de deux dollars pour chaque wagon pour les traversiers, comparativement à six ou huit dollars pour automobiles ou les camions.

Les camionneurs de l'Île-du-Prince-Édouard sont pleinement d'accord avec les recommandations formulées lors de la réunion de Fredericton par notre association: la construction de la route corridor du Maine qui abrégerait la distance des principaux marchés canadiens. Nous appuyons aussi les présenta-

[*Text*]

Northumberland Strait crossing that you will be considering as a result of these hearings in the Maritimes.

We cannot stress too strongly the advantages of a dry land crossing for Prince Edward Island residents. Despite the many difficulties which confront motor transport, it has made a notable contribution to the economy of Prince Edward Island. It has opened up a profitable fish market in the eastern port of the United States and it is now carrying on a valuable two-way trade between Prince Edward Island and the Central Canadian markets, as well as operating a daily service between Maritime points. With the implementation of the development plan on Prince Edward Island our farm and fishery products are expected to triple in volume, with the resulting increase in interprovincial trade. Truck transport will welcome this increased tade and prosperity and we are prepared to increase its capacity to handle this heavy traffic. We hasten to point out that notwithstanding planned increases in ferries and facilities at Borden-Tormentine, a hug bottleneck will result and there will be an increase in ferry costs, delays and inconvenience that will seriously curtail the benefits of the plan.

A dry land crossing would practically double the capacity of Maritime truck operators using the Prince Edward Island causeway service through the elimination of waiting and crossing time and faster turnaround, without increased spending on capital motor equipment. Heavy diesel equipment could operate 20 hours a day, whereas at present Island operators can only operate effectively 10 hours a day.

Low value products and bulk materials, such as oil, coal, rock, limestone, cement, salt, fertilizer, brick and building materials that are now uneconomic to haul by truck, will become practical by operating two trips daily instead of one. Livestock in temperature-controlled vehicles would represent a decided advantage by the elimination of shrinkage and loss of livestock. Highly priced perishable meats, fish, potato products and fruit would arrive in their original prime condition at the consumer area. Prince Edward Island-produced products would be within overnight shipping distance of the Montreal and Boston markets and second-day delivery in Toronto and New York. Labour and driver problems would be greatly improved, the present three-hour minimum delay per round trip would be eliminated and Prince Edward Island operators would have comparable working conditions to other Canadian transport operators under the Canada Labour

[*Interpretation*]

tions du détroit de Northumberland que vous devrez envisager en raison des audiences ici aux Maritimes.

Nous ne saurions trop insister sur la chaussée pour les résidents de l'Île-du-Prince-Édouard. Malgré les nombreuses difficultés pour le camionnage, cette industrie a fait un grand apport à l'économie de cette province. Nous avons pu trouver d'autres débouchés pour le poisson à l'est des États-Unis, et nous avons maintenant un commerce très profitable dans les deux sens, entre l'Île-du-Prince-Édouard et les principaux marchés du Canada, ainsi qu'un service quotidien entre les points des maritimes eux-mêmes. Avec la réalisation du projet d'aménagement de l'Île-du-Prince-Édouard, nos produits agricoles et de la pêche pourront tripler leur volume avec une augmentation du commerce interprovincial. Le transport par camions sera heureux de voir cette expansion et cette prospérité et nous sommes prêts à augmenter cette capacité pour manutentionner ce trafic. Mais nous nous empressons d'ajouter que, nonobstant les augmentations prévues pour le servicee de transbordeurs à Borden et Tormentine il y aura toujours du retard et des inconvénients qui réduiront considérablement les profits de ce projet.

Une traversée à pieds secs pourra doubler la capacité des opérations des camionneurs en utilisant le service de cette chaussée, grâce à l'élimination d'un temps d'attente, et à un aller-retour plus rapide, sans augmentation de dépenses pour l'équipement. L'équipement diesel pourrait fonctionner vingt heures par jours, alors qu'en ce moment les exploitants de l'Île ne peuvent fonctionner vraiment que pendant dix heures.

Des produits d'une faible valeur et des matériaux en vrac comme le pétrole, le charbon, le ciment, le sel des engrais, la brique et les matériaux de construction qui maintenant ne sont pas transportés par camion de façon rentable, pourraient facilement être transportés deux fois par jour, plutôt qu'une seule fois. Les véhicules pour bestiaux auront un avantage de marqué, en faisant disparaître toute perte et tout gaspillage de viande, de poisson, de pommes de terre, de fruits, pourront arriver dans leur état original dans les centres de distribution des consommateurs. L'Île-du-Prince-Édouard produit des denrées qui se trouveront à peine quelques heures des marchés de Montréal et de Boston, et de deux jours de Toronto et de New-York. La situation du travail et du conducteur sera largement améliorée. Maintenant, il y a un minimum de trois heures de retard par voyage aller-retour, et des exploitants de l'Île-du-Prince-Édouard auraient donc des conditions

[*Texte*]

(Standards) Code, and this is causing serious difficulties at present.

We favour immediate enactment of Part III of the National Transportation Act. This would give transport operators stabilized rates and uniform operating regulations in the Atlantic provinces.

Most extraprovincial Prince Edward Island operators have at least three provincial and, I may add, state authorities to deal with, and a simplification and standardization of regulations is much to be desired.

The relatively short time that Island operators have been in business and the high cost of operations has been responsible for a shortage of terminal facilities, communication media and working capital. With the present curtailment of rail services and the prospect of greatly increased traffic which will be generated by the development plan, the Island motor transport needs greatly increased facilities to give the service that will be required. Some form of financial assistance and reasonable financing would be beneficial.

Your Committee has been favoured this year, as have the transport operators, by very mild and unseasonable weather. The one solid fact that your Committee brought back to Ottawa last year was that travelling conditions in the wintertime on and to Prince Edward Island can be very disagreeable. We hope that your full attention will be given to our transportation problems and that you will not be distracted by weather or outside events.

The Chairman: Thank you very much. Mr. Perrault.

Mr. Perrault: Mr. Chairman, I think we have listened with interest to this brief. I would like to ask this question. The traffic manager of Hawker-Siddeley Canada Limited said earlier today that the monopoly of intraprovincial and interprovincial trucking was taking its toll from industry in areas struggling for existence with rates that are far too high, and when negotiating for lower rates and making rate comparisons with other areas of the country the transportation people say the deplorable condition of the roads which these companies are faced with makes for higher rates due to lost time and higher maintenance costs, but over the past two years the Trans-Canada Highway has connected most areas of the province through to

[*Interprétation*]

de travail comparables à celles des autres exploitants canadiens, en vertu du Code du travail du Canada que présente un difficulté très grande en ce moment.

Nous serions en faveur d'une mise en vigueur immédiate de la partie trois de la Loi canadienne sur le transport pour donner aux exploitants des taux stabilisés et des règlements uniformes pour les provinces de l'Atlantique.

La plupart des exploitants de l'Île-du-Prince-Édouard ont au moins trois cas avec qui ils doivent faire affaire; une simplification et une normalisation des règlements est vraiment souhaitable d'après une période depuis laquelle les exploitants de l'Île ont exploité et le coût d'exploitation était responsable de l'insuffisance des services d'aménagement, de moyens de communication et du capital d'exploitation. La diminution actuelle des services ferroviaires et la perspective d'un trafic engendré par les projets de développement, le transport de l'île a besoin de services accrus pour assurer le rendement requis, il faudrait donc une aide financière, un financement juste et adéquat.

Votre comité comme les camionneurs cette année ont été favorisés par une température très douce, mais le seul fait que votre comité a rapporté à Ottawa l'année dernière était que les conditions de transport en hiver vers l'Île-du-Prince-Édouard peuvent être très désagréables.

Nous espérons que vous apporterez toute votre attention à notre problème des transports, sans être distraits par des conditions climatiques ou d'autres événements extérieurs.

Le président: Merci beaucoup. Monsieur Perrault.

M. Perrault: Monsieur le président, je pense que vous avez écouté avec un vif intérêt ce mémoire; je voudrais vous poser la question suivante. Le directeur de la *Hawker-Siddeley Canada Ltd.* a dit aujourd'hui que le monopole du camionnage intraprovincial et interprovincial exige des taux beaucoup trop élevés dans les régions qui luttent pour leur existence, et que lorsqu'ils négocient des taux moins élevés et établissent de nouveaux tarifs comparables à d'autres régions du pays, les responsables du secteur du transport disent que l'état déplorable des routes que ces sociétés doivent faire face entraînent des taux plus élevés aussi dû au fait que le coût d'entretien est plus élevé; et dû aux retards apportés au cours des deux dernières années, la route

[*Text*]

the Quebec border but this has not been reflected in lower rates. If the corridor road becomes a reality, said the traffic manager of Hawker-Siddeley, with the present environment there will be no change unless the industry in this province hires transportation men, who know the makeup of rates, to protect their interests.

There is a clear allegation here that you are charging too much for trucking and the Maine corridor will not change the situation. Would you like to reply to that allegation?

Mr. Hogg: Mr. Chairman, I think that is a very large subject. It covers quite a number of aspects of trucking conditions. With respect to the Maine corridor road, by taking 160 miles off the total mileage to Montreal or Toronto there certainly should be some saving. I think the greatest saving would be in the ability to put products on those markets, which is now uneconomical and cannot be done by trucks.

Mr. Perrault: The suggestion is that the saving is not going to be passed along.

Mr. Hogg: The saving would be in the way of increased markets.

Mr. Perrault: And you are prepared to give that assurance?

Mr. Hogg: I would say so, yes.

Mr. Perrault: You say on page four of your brief:

> Some form of financial assistance and reasonable financing would be beneficial...

Presumably you mean to the industry. What form of financial assistance do you seek, what kind of so-called reasonable financing?

Mr. Hogg: Most small operators are just operating through a finance company, and we all have an idea what those interest rates are. I think assistance in terms of possibly more loans to small businesses, and I might mention on that topic that I believe the trucking industry is the only industry that is not included in the Small Businesses Loans Act.

Mr. Perrault: Have you estimated the cost to the federal treasury of this loan program?

Mr. Hogg: I do not think that direct loans would be the answer.

[*Interpretation*]

transcanadienne a rattaché la plupart des régions de la province par la frontière du Québec. Sans que cela se traduit en taux plus élevés. Si cette route corridor se réalise, a dit le directeur du transport de la *Hawker-Siddeley* il n'y aura aucune modification si l'industrie de cette province n'ait pas recours à des spécialistes qui savent comment établir les taux pour protéger les intérêts.

Donc ici on vous accuse de charger trop pour le camionnage et le corridor du Maine ne remédie pas à la situation. Voudriez-vous répondre à ces accusations?

M. Hogg: Monsieur le président, c'est un sujet très vaste qui tient compte de différents aspects des opérations du camionnage. Prenons le corridor du Maine. Si, disons, on enlève cent soixante milles du total vers Montréal ou Toronto, il doit y avoir un gain de temps. Le plus grand épargne viendrait du fait que nous serions en mesure d'acheminer des produits vers ces marchés qui maintenant ne peut être fait de façon rentable par les camions.

M. Perrault: Vous proposez alors qu'on ne bénéficiera pas de cette épargne.

M. Hogg: Oui, l'épargne est dans l'expansion des marchés.

M. Perrault: Vous nous donnerez cette assurance?

M. Hogg: Je dirais que oui.

M. Perrault: Vous dites à la page quatre de votre mémoire, et je cite:

> Une certaine aide financière et un financement raisonnable seraient avantageux.

Probablement pour l'industrie. Quel genre d'aide financière recherchez-vous, quel genre de soi-disant financement raisonnable?

M. Hogg: La plupart des petites entreprises fonctionnent sur la base d'une société de financement et nous savons tous quels sont leurs taux d'intérêts. Je veux dire qu'il faut accorder une aide par plus de prêts à des petites entreprises et je voudrais mentionner que le camionnage est la seule industrie qui ne soit pas incluse dans les dispositions de cette Loi sur les prêts aux petites entreprises.

M. Perrault: Est-ce que vous avez prévu le coût de ce programme au gouvernement fédéral et au trésor fédéral?

M. Hogg: Je ne crois pas que les prêts directs soient la réponse.

[*Texte*]

Mr. Perrault: You say "Some form of financial assistance and reasonable financing". In other words, there would be an outright grant. Are you thinking in terms of subsidies?

Mr. Hogg: No, I do not think subsidies are necessary.

Mr. Perrault: You are not asking for an extension of...

Mr. Hogg: All that the Maritime Motor Transport Association has asked for is equal treatment with the railway. It is a matter of government policy or negotiation between the federal government and the provinces whether there is a subsidy or not.

Mr. Perrault: Does your definition of equal treatment include subsidies, in view of what you say on page two? You say that the railways have the advantage of a 20 per cent or a 30 per cent subsidy under the Maritime Freight Rates Act. You want equal treatment. it suggests that you want a subsidy as well.

Mr. Hogg: If the railway subsidy is retained we feel that it should be extended to trucks as well, to other forms of transportation.

Mr. Perrault: In your view should the subsidy be paid directly to the trucker or to the shipper?

Mr. Hogg: I think that is just a matter of convenience. We have not taken a direct stand on that. One suggestion has been made that licensed carriers which, under the National Transportation Act, would come within the jurisdiction of the federal government, might be allowed to receive subsidies and their books would be open to inspection.

Mr. Perrault: Should shippers who operate their own private mode of transport receive the subsidies to which you refer?

Mr. Hogg: That is something that I would not...

Mr. Perrault: You are not prepared to take a position on that.

Mr. Hogg: I am not prepared to answer that.

Mr. Perrault: Thank you, Mr. Chairman.

Mr. Breau: Do the truckers not qualify under the Industrial Development Bank?

[*Interprétation*]

M. Perrault: Vous parlez d'une certaine aide financière et d'un financement juste et adéquat. En d'autres mots, il y aura une subvention forfaitaire. Pensez-vous à la possibilité d'une subvention.

M. Hogg: Non, je ne crois pas. Nous n'avons pas besoin d'une subvention.

M. Perrault: Vous ne demandez pas un prolongement de...

M. Hogg: Notre association a tout simplement demandé un traitement égal à celui qui est accordé aux chemins de fer; c'est une politique du gouvernement ou une négociation entre le gouvernement fédéral et les provinces de savoir s'il y a une subvention ou non.

M. Perrault: Est-ce que votre définition d'un traitement équitable comprend des subventions, vu ce que vous dites à la page deux? Vous dites que les chemins de fer ont l'avantage d'avoir une subvention de 20 ou 30 p. 100, en vertu de la Loi sur le taux de transport des marchandises dans les maritimes. Vous voulez un traitement égal, cela implique également une subvention.

M. Hogg: Si on maintient cette subvention aux chemins de fer, nous sommes d'avis que ce devrait être accordé aux camions et à d'autres moyens de transport.

M. Perrault: A votre avis, cette subvention devrait être payée directement aux camionneurs ou à l'expéditeur?

M. Hogg: Il s'agit tout simplement de voir ce qui serait plus approprié; nous n'avons pas établi de ligne de conduite à cet égard; on a proposé que les camionneurs autorisés en vertu de la Loi nationale des transports, relèveraient du gouvernement fédéral, et qu'ils pourraient peut-être recevoir une subvention, et leurs comptabilités seraient soumises à l'inspection.

M. Perrault: Est-ce que les expéditeurs, qui exploitent leur propre moyen de transport recevraient cette subvention dont vous parlez?

M. Hogg: Je ne suis pas prêt à répondre?

M. Perrault: Non, vous n'êtes pas prêt à répondre.

M. Hogg: Je ne saurais vous répondre.

M. Perrault: Merci, monsieur le président.

M. Breau: Est-ce que les camionneurs ne sont pas admissibles, en vertu des dispositions de la Loi sur le développement industriel?

[*Text*]

Mr. Hogg: Some of them do, yes.

Mr. Breau: So, they would not necessarily have to pay the high finance rates if they could qualify.

Mr. Hogg: That would be one way of doing it.

The Chairman: Mr. Macquarrie.

Mr. Macquarrie: Mr. Chairman, I would like to ask Mr. MacKinnon a question. This stems from where he refers at the beginning of page two to the railways having an advantage in reference to subsidies and rates. This gets to a very important question which is indeed fundamental and one of principle, that this vital interprovincial transport facility provided by the Government of Canada is operated and managed by the Canadian National Railways, which is a competitor of the trucking industry. I would like to ask if, in addition to this advantage in subsidies and in rates, which you set out, there are other advantages given to your competitor: namely, the railways? Do you find that your trucks are told to wait while the ferries carry your competitors' goods?

Mr. Hogg: In fairness to the railways, I think in recent years trucks have had very good treatment. As you know there are unscheduled crossings through the night, possibly the ferries will take a full load of freight cars and the trucks will be unable to get on.

Just last year I contacted the shore captain, and other officials from Moncton, at Borden with regard to a small number of trucks that cross every day being assured of crossings on the boat. This is where the five trucks per trip that the Premier mentioned came up. These two officials, who were very close to the operation, agreed and went along with us on that. However, we found out later that the suggestion was turned down completely at Moncton, that they would not give it any consideration, and really we had no business talking about it.

Mr. Macquarrie: Would you say at the present time that, while conditions have improved, your part of the industry does suffer because the facilities which you both must use are, in fact, operated and managed by your competitors?

[*Interpretation*]

M. Hogg: Oui, quelques-uns.

M. Breau: Ils n'ont pas nécessairement besoin de payer ces taux élevés de financement s'ils sont admissibles.

M. Hogg: Ce serait une façon d'y remédier.

Le président: Monsieur Macquarrie.

M. Macquarrie: Monsieur le président, je voudrais poser à M. MacKinnon une question. Une fois adopté au début de la page deux, on parle des chemins de fer qui bénéficieraient davantage pour ce qui est des subventions et aussi des taux. Alors nous en arrivons à une question très importante, même fondamentale, une question de principe. Ce service interprovincial, vital, assuré par le gouvernement du Canada, est exploité et administré par le National-Canadien, qui est un concurrent du camionnage. Je voudrais donc demander si, en plus de ces avantages des subventions et des tarifs que vous mentionnez, il y a d'autres avantages qui sont accordés à vos concurrents, et les chemins de fer en particulier? Est-ce que vous trouvez que vos camions doivent attendre sur le quai alors que le transbordeur transporte les marchandises de vos concurrents?

M. Hogg: Je dois dire, en toute justice à l'égard des chemins de fer, qu'au cours des dernières années, les camions ont été très bien traités. Comme vous le savez, la nuit, il y a des traversées qui ne sont pas prévues à l'horaire. Il arrive que le transbordeur prenne à son bord sa capacité de wagons marchandises et les camions ne pourront pas le prendre.

Ainsi l'année dernière, j'ai communiqué avec le capitaine et les autres représentants de Moncton, à Borden, pour ce qui est de leur assurer un certain nombre de camions qui traverseraient tous les jours, pour qu'on leur donne l'assurance de pouvoir traverser sur le transbordeur. Ce sont les cinq camions par traversée dont le premier ministre a parlé et deux des fonctionnaires qui connaissaient très bien le service en ont convenu ainsi avec nous. Mais nous avons constaté plus tard que la proposition fut rejeté complètement à Moncton, qu'on n'en tiendrait pas du tout compte, et que cela ne nous regardait pas du tout.

M. Macquarrie: Diriez-vous donc, à l'heure actuelle, que, bien que les conditions soient améliorées, votre secteur de l'industrie souffre parce que les installations que vous devez utiliser tous les deux sont exploités et administrés en réalité par vos concurrents?

[*Texte*]

Mr. Hogg: Well, we would like to have a little closer contact with the officials who handle the daily operation of the boat.

Mr. Macquarrie: There is room for improvement?

Mr. Hogg: There certainly is room for improvement.

Mr. Macquarrie: Thank you.

Mr. Thomas (Moncton): Mr. Chairman, and Mr. MacKinnon, this is possibly a supplementary to Mr. Macquarrie's question following along the line of thinking on rates. In the past few days, after listening to various briefs, I have gained the impression that there is some discrepancy in rates as between rail vehicles and highway transport vehicles using the Borden—Tormentine ferry. Let us compare, for example, a rail car of feed shipping out of Moncton to Charlottetown with one of your trucks carrying a carload of feed. Do you pay the same rates to cross the Northumberland Strait?

Mr. Hogg: No, to cross at Borden the railway pays the ferry authority $2 for a loaded boxcar. The boxcar on return, if it is empty, goes free. We pay an average of $8 each way for a tractor-trailer truck. So a truck that was going for a load of feed, or has a load of feed one way returning empty, would pay $16 against $2 for the same car of feed.

Mr. Thomas (Moncton): We have heard also that in some cases where the railway is using CN transport, if the shipment is billed on a railroad bill of lading then the truck transport qualifies for the 20 per cent subsidy. Does this still apply? Let us say they bill that out of Moncton on a railroad bill of lading but they ship by highway transport all the way; do they get the 20 per cent subsidy for that?

Mr. Hogg: Yes, it is our understanding that for a shipment on which $1 a hundred is paid by the customer to the railway, they get a dollar plus the 20 cents subsidy. Supposing we met that competition and charged a dollar, the railway would be ahead because they would get $1.20 for the same shipment.

Mr. Thomas (Moncton): Would this apply even though the railway trucked back into a warehouse in Moncton, loaded the feed on

[*Interprétation*]

M. Hogg: Nous aimerions avoir des contacts plus étroits avec les fonctionnaires chargés du service quotidien du navire.

M. Macquarrie: Il y a donc possibilité d'apporter des améliorations?

M. Hogg: Oui, certainement.

M. Macquarrie: Merci.

M. Thomas (Moncton): Monsieur le président, monsieur MacKinnon, c'est peut-être une question complémentaire à la question posée par M. Macquarrie. Dans le même ordre d'idée, sur les tarifs. Au cours des derniers jours, après avoir entendu différents mémoires, j'ai l'impression qu'il y a un écart dans les tarifs des chemins de fer et les camions qui utilisent le traversier entre Borden et Tormentine. Comparons, par exemple, un wagon plein de denrées animales expédié de Moncton à Charlottetown avec un de vos camions qui transporte la même marchandise. Est-ce que vous payez le même tarif pour traverser le détroit de Northumberland?

M. Hogg: Non, pour prendre le transbordeur Borden les chemins de fer paient $2 pour un wagon marchandises chargé; à son retour, si le wagon est vide, il traverse gratuitement. Nous payons, en moyenne, $8 par traversée pour un camion-remorque. Donc, un camion qui va chercher un chargement de denrées animales, ou qui transporte un chargement de denrées animales et revient vide, paierait $16 contre $2 pour un wagon transportant la même marchandise.

M. Thomas (Moncton): Nous avons également entendu dire que dans certains cas lorsque le chemin de fer a recours au service de transport du National-Canadien, si l'expédition se fait d'après un connaissement de chemin de fer, le camionneur est admissible à la subvention de 20 p. 100. Est-ce toujours le cas? Supposons qu'ils expédient de Moncton avec un connaissement de chemin de fer mais que tout le transport se fait par camion; est-ce qu'ils obtiennent la subvention de 20 p. 100?

M. Hogg: Oui, je crois comprendre que pour une expédition pour laquelle le client paie $1 le cent au chemin de fer, ils obtiennent $1 plus une subvention de 20c. Supposons que pour concurrencer nous établissons notre tarif à $1, le chemin de fer serait encore gagnant parce qu'il recevrait $1.20 pour la même expédition.

M. Thomas (Moncton): Est-ce que cela s'applique même si le chemin de fer transporte par camion jusqu'à un entrepôt à Moncton et

[*Text*]

there and delivered it right to the customer, and, in other words, did not see railway tracks or railway sheds at all? Would they qualify for this 20 per cent subsidy?

Mr. Hogg: It is our understanding that carried on a railway bill of lading it would be eligible for subsidy.

Mr. Thomas (Moncton): I have just one other short question, Mr. MacKinnon. In one of the briefs, I think from the Charlottetown Board of Trade, it was inferred that the highway transport does not have the refrigerated cars to handle the movement of potatoes; I think we are talking about 10,000 carloads of potatoes or something like that. They suggest that for this reason they have to use the railway because it would be too expensive for truck transport to provide the refrigerated cars. Is this true now, and, if so, in the foreseeable future could you get in on this movement of potatoes?

Mr. Hogg: It would be my personal opinion that if they started to build the causeway now, without rails, by the time it was completed the railway question would take care of itself. With the new containers coming in and the leasing of containers, it would be possible to have a stockpile or have containers available. If the total crop of potatoes of 10,000 cars could be spread over the full year, which probably is not possible, it would take approximately 50 semitrailers a day to handle it, and that is not too much out of the way.

Now, the third thing is that in other places, in Maine, in Florida and in other producing areas crop hauling is not done by regular, daily scheduled transport trucks. There is a pool of leased vehicles and a leasing agent in the vicinity who can call vehicles in from quite a distance—500 miles or more—to be available for these shipments. Also, vehicles coming in with other loads would be engaged to take out loads of the crop. This is working in other places.

Mr. Thomas (Moncton): Thank you.

The Chairman: Mr. Allmand?

Mr. Allmand: What routes do you use to the eastern United States at the present time? You said you have opened up a profitable fish

[*Interpretation*]

fait la livraison directement au client, sans que, autrement dit, la marchandise passe par les entrepôts ou les wagons du chemin de fer? Est-ce qu'ils sont admissibles à la subvention de 20 p. 100?

M. Hogg: Je crois comprendre que si la marchandise est inscrite sur un connaissement de chemin de fer, ils sont admissibles à la subvention.

M. Thomas (Moncton): Une dernière question monsieur MacKinnon. Dans un des mémoires, celui de la Chambre de Commerce de Charlottetown, on a plus ou moins laissé entendre que le transport par route n'a pas suffisamment de camions réfrigérés adéquats pour le transport des pommes de terre. Je crois qu'il s'agit de quelques 10,000 chargements de pommes de terre. Ils laissent entendre qu'ils doivent avoir recours aux services ferroviaires parce qu'il serait trop coûteux d'obtenir les camions réfrigérés. Est-ce que c'est juste, à l'heure actuelle, et prévoyez-vous que vous pourrez vous occuper du transport des pommes de terre avant longtemps?

M. Hogg: A mon avis, si on commence à construire la chaussée dès maintenant sans voie ferrée, qu'au moment où ce sera terminé, le problème ferroviaire se règlera de lui-même. Avec le nouveau système de cadres qu'on introduit et la location de cadres, il sera possible alors de constituer des stocks ou d'avoir des cadres en disponibilité. Si toute la récolte de pommes de terre de 10,000 wagons était répartie sur toute l'année, ce qui est pratiquement impossible, il faudrait à peu près 50 camions-remorques par jour pour la transporter, à condition que ce ne soit pas trop loin.

Mon troisième point est que dans quelques endroits du Maine, en Floride et dans d'autres régions de production, le transport des récoltes ne se fait pas par camion de transport ayant un horaire quotidien fixe. Il y a une mise en commun de camions, de location et un agent de location dans la localité qui peut faire venir les camions d'assez loin, d'une distance de 500 milles et même plus, de façon à ce qu'ils soient disponibles pour ces expéditions. De plus, les camions qui arrivent avec d'autres chargements sont utilisés pour transporter la récolte. Ce système fonctionne ailleurs.

M. Thomas (Moncton): Merci beaucoup.

Le président: Monsieur Allmand?

M. Allmand: De quelles routes vous servez-vous vers l'est des États-Unis à l'heure actuelle? Vous avez dit que vous avez découvert

[*Texte*]

market in the eastern United States. Do you go through St. Stephen or through McAdam-Vanceboro over to the interstate highway or what route do you use?

Mr. Hogg: The trucks travel to St. Stephen, up to Woodstock and Houlton and across in that way.

Mr. Allmand: Can large trucks go on the road that runs down to Bangor?

Mr. Hogg: That is the skyline—Route 9. I do not know whether trucks . .

Mr. Allmand: Do your trucks go on that road?

Mr. Hogg: I do not travel out of the Maritimes.

Mr. Allmand: I see. When going into Upper Canada, do you go by way of the Trans-Canada Highway?

Mr. Hogg: I think, sir, most of the trucks travel by the Trans-Canada Highway. There is a new short cut across—I have not travelled it myself—but I understand that there is a new route that has shortened the distance somewhat.

Mr. Allmand: Is that the route that goes through Plaster Rock that my friend from Edmunston favours so much?

Mr. Hogg: You are speaking of Route 51, I think.

Mr. Allmand: Yes, I think that is Route 51. Thank you; that is all.

The Chairman: Gentlemen I want to thank you for your brief. I would like to call upon Mr. Bergasse at this time who is the Assistant Manager of Industrial Enterprises Incorporated. He does not have a brief, but he has a few remarks to make.

Mr. Joseph A. Bergasse (Assistant Manager, Industrial Enterprises Incorporated): Mr. Chairman, members of the Standing Committee and gentlemen, before making my few remarks I would like to tell you who and what Industrial Enterprises is so you will know why I am here.

Industrial Enterprises Incorporated is a provincial Crown corporation established to promote the industrial development of the Province of Prince Edward Island, not only from the point of view of attracting new industries, but also to assist existing industries to expand and diversify. As such, we are closely in touch with the industrial and bus-

[*Interprétation*]

des marchés pour le poisson dans l'est des États-Unis. Par où passez-vous? Par St. Stephen ou par Adom-Vanceboro pour prendre la route inter-état?

M. Hogg: Les camions se rendent à St. Stephen, à Woodstock et à Houlton, et ainsi de suite.

M. Allmand: Est-ce que de gros camions peuvent emprunter la route qui descend à Bangor?

M. Hogg: C'est le «Skyline»—c'est la route 9. Je ne sais pas si les camions. . .

M. Allmand: Est-ce que vos camions prennent cette route?

M. Hogg: Je ne voyage pas hors des Maritimes moi-même.

M. Allmand: Je vois. Pour aller au Haut-Canada—est-ce que vous passez par la route transcanadienne?

M. Hogg: Oui, je pense que la plupart des camions prennent la route transcanadienne. Il y a un nouveau raccourci, que je n'ai pas pris moi-même, mais il y a une route qui abrège la distance quelque peu.

M. Allmand: Est-ce la route qui passe par Plaster Rock que mon ami d'Edmunston aime tant?

M. Hogg: C'est la route 51, je pense.

M. Allmand: Oui, je pense que c'est la route 51. Merci beaucoup, c'est tout.

Le président: Messieurs, merci beaucoup de votre mémoire. J'aimerais maintenant demander à M. Bergasse le directeur adjoint de *Industrial Enterprises Incorported* de faire la présentation de son bref mémoire.

M. Joseph A. Bergasse (Directeur adjoint, Industrial Enterprises Incorporated): Monsieur le président, messieurs les membres du Comité, avant de vous faire quelques observations, j'aimerais tout simplement vous dire ce qu'est *Industriel Enterprises* afin que vous sachiez pourquoi je suis ici.

L'*Industrial Enterprises Incorporated* est une société provinciale établie afin de promouvoir l'expansion industrielle de la province de l'Île du Prince-Édouard, non seulement en attirant de nouvelles industries, mais aussi pour aider les industries existantes à se développer et à se diversifier. Nous sommes ainsi très près de la collectivité industrielle et

[*Text*]

iness community of this province. The opinion of the community as a whole is that they are sick and tired of always being accused of looking for hand-outs, so much so that the members of the industrial and business community recently presented a private brief to the federal government expressing their concern over the delay in the construction of the Northumberland crossing.

I will quote one of the statements made in this brief:

> "Give us the causeway and we will take care of the disparity."

Our corporation in conjunction with the industrial community has prepared a financial feasibility study on the viability of the Northumberland Strait crossing.

This was prepared on the basis of how a businessman would look at such an investment and if he had to invest his dollars in a crossing of this type, would he do it? It was done—I would like to emphasize this—strictly on what we considered sound business principles and not based on—for want of better words as the Premier said this morning—the way the bureaucrats would look at it. This feasibility study, gentlemen, we propose to forward to your Committee together with a formal brief which we are now in the process of preparing.

I also would like to mention in connection with this Northumberland crossing—maybe because I am not an Islander I can look at it a little bit more dispassionately and be excused for saying some of the things I do say—that in our work of industrial development, this 9.2 miles of water presents not only a physical barrier, but a psychological barrier to industries that we are trying to interest in coming to Prince Edward Island. I cannot tell you the number of times that I have tried to impress upon prospective industrialists the fact that there is no delay or that there is little if any delay by virtue of the fact that for the 9 miles the road and the rails are on water instead of on land. But be that as it may, over the last two years we have lost three industries that with the causeway we would have had in Prince Edward Island with a total investment of somewhere between $30 and $40 million. This, you can well appreciate, would have given a tremendous boost to the economy of this province.

We are prepared to document what I have just said about these three industries in confidence to this Committee, but because this is a public hearing, we have to respect the confidence of these industries and we cannot divulge their names. However, as I said, we are prepared to divulge names and all the

[*Interpretation*]

commerciale de la province. Cette collectivité dans son ensemble en a assez d'être toujours accusée de rechercher des dons, à tel point que les membres de la collectivité industrielle et commerciale ont récemment présenté un mémoire, à titre privé, au gouvernement fédéral pour exprimer sa préoccupation quant aux retards qu'accuse la construction de la chaussée sur le détroit de Northumberland.

Pour citer ce qu'on disait dans ce mémoire:

> «Construisez la chaussée et nous nous occuperons de la disparité.»

Notre corporation, de concert avec la collectivité industrielle a préparé une étude des possibilités financières quant à la viabilité de la chaussée du détroit de Northumberland.

Cette étude a été préparée selon la façon qu'un homme d'affaires envisagerait un tel investissement s'il devait se servir de ses propres fonds dans une chaussée. Est-ce qu'il le ferait? On l'a fait, et je voudrais insister un peu sur ce point, selon des principes sains des affaires; l'étude n'a pas été fondée, pour reprendre l'expression du premier ministre ce matin, sur la façon des bureaucrates d'envisager les choses. Nous nous proposons d'envoyer cette étude à votre Comité, messieurs, de même qu'un mémoire officiel que nous sommes en train de préparer à l'heure actuelle.

Je voudrais toutefois mentionner en rapport avec la chaussée de Northumberland, et peut-être parce que je ne suis pas de l'Île je peux être un peu plus objectif et on me pardonnera de dire certaines choses, mais dans notre travail d'expansion industrielle, les 9.2 milles de mer présentent non seulement un obstacle physique, mais un obstacle psychologique pour les industries que nous essayons d'attirer à l'Île. Je ne saurais vous dire combien de fois j'ai essayé de convaincre des industriels du fait qu'il y a très peu de retard, si retard il y a, du fait que sur 9 milles la route et la voie ferrée se trouvent sur l'eau et non pas sur la terre ferme. Quoiqu'il en soit, depuis deux ans, nous avons perdu trois industries que nous aurions attirées à l'Île du Prince-Édouard si la chaussée avait été aménagée grâce à des immobilisations de 30 ou 40 millions de dollars. Vous comprendrez facilement que cela aurait rehaussé énormément l'économie de la province.

Nous sommes prêts à prouver ce que je viens d'avancer au sujet de ces trois industries confidentiellement. Mais comme il s'agit d'une audience publique, nous ne pouvons pas révéler des noms. Mais comme je l'ai dit, nous sommes prêts à donner des noms et à vous donner tous les détails comfidentielle-

[*Texte*]

particulars in confidence to this Committee and this will be contained in the brief that we will be forwarding.

Finally, I should say that in addition to this psychological barrier, we also run up against people at a fairly senior level in Ottawa who are completely unaware of the service that is provided at the moment across the Northumberland Strait.

Just to cite an example, we had one senior member of the Department of Industry in Ottawa—I happened to have been a member of this Department before I came down here—tell an electronic industry that was prepared to come in here that during the summer there were three crossings a day each way and in the winter there were crossings on alternate days—on Mondays, Wednesdays and Fridays they crossed from Cape Tormentine and on the other three days the ferry ran from Prince Edward Island.

It is very difficult for us to combat this because, first of all, we do not have the time and we do not have the money to spend a lot of time in Ottawa fighting against this type of—for want of better words I will call it—false propaganda.

I would also like to make a few brief remarks about the air service and there are three points I would like to bring out. First of all, if an industry is going to locate in Prince Edward Island, the head office of that industry, no matter where it is, wants to have easy accessibility to their branch plant or their subsidiary in this province. They cannot get that now. This was one of the points thrown at us recently by an industry with which we are negotiating, the fact that it took them a day and a half to get from their head office to Charlottetown, unless they chartered an aircraft.

Secondly, put yourself in the position of an industrialist who gets off a jet and comes over to this province in a DC-3, an aircraft that has not been made since 1942. It does not create exactly a good impression. It may be a safe aircraft, but nevertheless you are going back to the DC-3 age.

In closing, gentlemen, I would like to say, that I did not have a formal brief to present as this is in the process of being prepared and will be forwarded to you which will encompass all the points that were raised in the brief that was presented recently by the members of our industrial and business community to the federal government.

I have deliberately stayed away from covering any other points about transportation because I felt that you had heard from a variety of people today who were able to

[*Interprétation*]

ment. Tout cela sera compris dans le mémoire que nous vous enverrons, d'ailleurs.

Enfin, je devrais peut-être dire qu'en plus de cet obstacle psychologique, nous devons aussi confronter certains hauts fonctionnaires d'Ottawa qui ne sont pas du tout conscients du service assuré à l'heure actuelle, pour traverser le détroit de Northumberland.

Pour vous donner un seul exemple, il y a un haut fonctionnaire du ministère de l'Industrie à Ottawa, et je faisais partie du même ministère avant de venir ici, qui a dit à une industrie de l'électronique qui était prête à venir s'installer ici, qu'au cours de l'été il y avait trois traversées par jour aller-retour et qu'en hiver, il y avait un traversier à tous les deux jours, c'est-à-dire que le lundi, le mercredi et le vendredi il traversait de Cape Tormentine vers l'Île, et que les autres jours, le traversier faisait le trajet inverse.

Il est très difficile pour nous de lutter contre ce genre de choses, car tout d'abord, on n'a pas le temps ni les fonds voulus pour passer beaucoup de temps à Ottawa et lutter contre cette fausse propagande, pour employer une expression à défaut de mieux.

J'aimerais aussi vous parler brièvement des services aériens au sujet desquels je voudrais faire ressortir trois points. Tout d'abord, si une industrie doit venir s'établir à l'Île-du-Prince-Édouard, le siège social de cette industrie, peu importe où il est situé, voudra sûrement avoir un accès rapide à sa filiale dans cette province, ce qui est impossible à l'heure actuelle. C'est un des points qui a été soulevé récemment par une industrie avec laquelle nous négocions, le fait qu'il leur fallait une journée et demi pour se rendre de leur siège social à Charlottetown, à moins de noliser un avion.

Deuxièmement, mettez-vous à la place de l'industriel qui descend d'un réacté et qui se rend dans cette province par un DC-3, un avion qui n'est plus construit depuis 1932. Cela ne donne pas la meilleure impression au monde. C'est peut-être un avion très sûr, mais néanmoins c'est un retour à l'ère du DC-3.

J'aimerais dire, en guise de conclusion, que je n'ai pas de mémoire officiel à vous présenter. On est en voie de le préparer. Mais, nous vous l'enverrons et il couvrira tous les points qui ont été soulevés dans le mémoire présenté récemment par les membres de notre collectivité industrielle et commerciale au gouvernement fédéral.

Je me suis délibérément abstenu de discuter les autres points relatifs au transport, car j'ai l'impression que vous avez entendu plusieurs autres personnes qui sont plus compé-

[*Text*]

cover this subject a lot better than I could. However, I will be willing to answer any questions that you would like to direct to me.

The Chairman: Thank you very much.

Mr. Nesbitt: On a point of order.

The Chairman: Yes, Mr. Nesbitt.

Mr. Nesbitt: I wonder, in view of one of the observations that our present witness has just made concerning the aircraft industry, do you know, Mr. Chairman, if Eastern Provincial Airlines has a representative here this afternoon?

The Chairman: I called him back at the opening of our meeting this afternoon and I will do so again. I think we will have time to hear their brief...

Mr. Nesbitt: They intend to come, do they?

The Chairman: If they are here, you can rest assured that we will hear them.

Mr. Perrault: Mr. Chairman, if we can be given examples of industries that were deterred from investing in Prince Edward Island because of the water barrier, I think they should be given serious consideration. Perhaps Mr. Bergasse can tell us whether these industries subsequently invested in the Maritimes or any other area in Canada to his knowledge.

Mr. Bergasse: Yes, two of them went to Montreal, and one went to Toronto.

Mr. Perrault: That is very interesting. I hope we can get that material as soon as possible, Mr. Chairman. Thank you.

Mr. Bergasse: We did a very sophisticated feasibility study for one of those industries to prove to them why they should come to P.E.I.

Mr. Perrault: The difficulty was the transportation?

Mr. Bergasse: The decision had been made to locate here and the day that this decision was made was also the day the announcement was made from Ottawa that the whole causeway was being re-evaluated.

Mr. Perrault: Yow many jobs would have been represented by these industries? Is there any estimate?

Mr. Bergasse: I would say somewhere in the neighbourhood of 200.

[*Interpretation*]

tentes que moi pour traiter de ce sujet. Mais je serai tout à fait disposé à répondre à toutes les questions que vous voudriez bien me poser.

Le président: Merci beaucoup.

M. Nesbitt: J'en appelle au règlement.

Le président: Oui, monsieur Nesbitt?

M. Nesbitt: Je me demandais si, vu les remarques que le témoin vient d'exprimer au sujet de l'industrie de l'aviation vous saviez, monsieur le président si *Eastern Provincial Airlines* est représenté ici cet après-midi?

Le président: Je les avais rappelés au début de la séance, cet après-midi et je le ferai de nouveau. Je crois que nous pourrons entendre leur mémoire...

M. Nesbitt: Ils ont l'intention de venir, n'est-ce pas?

Le président: S'ils sont ici, vous pouvez être sûrs que nous les entendrons.

M. Perrault: Monsieur le président, si on pouvait nous donner des exemples des industries qui n'ont pas voulu s'installer à l'Île-du-Prince-Édouard en raison de l'obstacle que constitue l'eau, je crois qu'il faudrait étudier la chose sérieusement. Est-ce que M. Bergasse pourrait nous dire si, à sa connaissance, les industries en cause ont fait des placements dans les Maritimes par la suite, ou à d'autres endroits au Canada.

M. Bergasse: Oui, deux sont allées à Montréal et une troisième à Toronto.

M. Perrault: C'est très intéressant. J'espère que nous pourrons avoir ces détails le plus tôt possible. Merci.

M. Bergasse: En ce qui concerne une des industries, nous avons fait une étude assez détaillée des possibilités pour leur montrer qu'elles devaient venir s'installer dans l'Île.

M. Perrault: Est-ce que c'était les transports qui constituaient la difficulté?

M. Bergasse: Ils avaient décidé de s'établir ici mais on a annoncé à Ottawa, la journée même, que toute la question de la chaussée était remise en question.

M. Perrault: Combien d'emplois ces industries auraient-elles créés? Avez-vous une idée?

M. Bergasse: Je dirais environ 200.

[*Texte*]

Mr. Mahoney: Perhaps, just taking off from Mr. Perrault's question, I can get mine in. I hark back to the rather noble slogan that you presented in such ringing terms: "Give us the causeway and we will take care of the disparity." The Provinces of New Brunswick and Nova Scotia do not need the causeway from the same point of view that you do and yet they still have their problems in this area. What is peculiar about you or what is lacking in their effort that makes you feel that a land bridge—a land connection—would take care of all your problems?

Mr. Bergasse: That is a very good question. First of all, we feel we have a province—this has quite a bearing on an industry wishing to locate—that is a good place for an industry to come and it is a good place for people to live. We can offer them a great deal in the way of social amenities—I am talking about their executives. We can offer them a labour force, while it is relatively unskilled at the moment, that is readily trainable and easily adaptable.

Mr. Pringle: May I ask a supplementary?

Mr. Mahoney: Perhaps you can, although I might ask it myself.

The Chairman: You can finish, Mr. Mahoney.

Mr. Mahoney: Thank you. Do you feel that the other two provinces—Nova Scotia and New Brunswick—do not share many of these amenities of which you spoke?

Mr. Bergasse: Oh, I am sure they do.

Mr. Mahoney: This really gets back then to the question Mr. Perrault raised with you. Why did the industries that decided not to locate here end up in Toronto and Montreal, rather than in New Brunswick or Nova Scotia?

Mr. Bergasse: If I told you the reason for one of them, I would be telling you what the industry was. There are industries of that type in Nova Scotia and New Brunswick. This is one particular case.

Mr. Mahoney: You and your organization sincerely and firmly subscribe to this very brief epigram that this...

Mr. Bergasse: We are in the promotion business.

Mr. Mahoney: Thank you, sir.

[*Interprétation*]

M. Mahoney: Pour faire suite aux questions de M. Perrault, je voudrais revenir au slogan plutôt grandiose que vous avez lancé avec tant de force: «Construisez la chaussée, et nous prendrons soin des disparités». Les provinces du Nouveau-Brunswick et de la Nouvelle-Écosse n'ont pas besoin de la chaussée du même point de vue que vous, mais ils ont tout de même des problèmes dans ce domaine. Qu'est-ce que vous avez de particulier ou qu'est-ce qui manque à leurs propres efforts pour vous permettre de croire qu'un lien avec la terre ferme vous permettrait de résoudre tous vos problèmes?

M. Bergasse: C'est une question très intéressante. Tout d'abord, nous croyons que notre province, qui influe beaucoup sur le désir d'une industrie de s'y établir, est une bonne place pour installer une industrie et où il fait bon vivre aussi. Nous pouvons leur offrir beaucoup à l'heure actuelle, sous forme d'avantages sociaux, et je parle maintenant des directeurs d'entreprise. Nous pouvons leur offrir de la main-d'œuvre, même si elle n'est pas spécialisée à l'heure actuelle, qu'on peut facilement former et qui s'adapte bien.

M. Pringle: Puis-je poser une question complémentaire?

M. Mahoney: Peut-être que oui, sauf je pourrais en poser une moi-même.

Le président: Terminez d'abord, monsieur Mahoney.

M. Mahoney: Merci. Croyez-vous que les deux autres provinces, le Nouveau-Brunswick et la Nouvelle-Écosse n'offrent pas les mêmes avantages sociaux que vous mentionnez?

M. Bergasse: Oh, je suis sûr qu'ils les ont.

M. Mahoney: Nous revenons donc à la question soulevée tout à l'heure par M. Perrault. Pourquoi alors les industries qui ont décidé de ne pas s'établir ici se sont-elles établies à Toronto et à Montréal plutôt qu'au Nouveau-Brunswick ou en Nouvelle-Écosse?

M. Bergasse: Si je vous le disais au sujet d'une industrie, je vous dirais de quelle industrie il s'agissait. Il y a déjà des industries de ce genre au Nouveau-Brunswick et en Nouvelle-Écosse. C'est un cas en particulier.

M. Mahoney: Votre organisme appuie sincèrement et fermement le slogan de...

M. Bergasse: Nous faisons de la promotion.

M. Mahoney: Merci, monsieur.

[*Text*]

Mr. Pringle: I would like to ask my supplementary question now, which, I think, Mr. Mahoney, really is a supplementary. You were asked about what was in Prince Edward Island that may not be in the other two provinces. Is it possible that there is more fertile land and more basis for agricultural production as a primary industry to the food industry on Prince Edward Island than possibly in the other two provinces?

Mr. Bergasse: That is very true, Mr. Pringle. I think we have more potential for development in the field to which you referred than either Nova Scotia or New Brunswick.

Mr. Allmand: I have a further supplementary to Mr. Mahoney's question. What is even more interesting, Mr. Bergasse, is that your submission seems to contradict that of the Prince Edward Island Government presented this morning. I have before me the brief which was presented by Premier Campbell and on page 8 of the brief there are three recommendations and one of them is

> That immediate steps be taken to extend the Maritime Freight Rates Subsidy to other forms of transport.

He also argued that the present subsidies should remain. Your corporation is a Crown corporation of the Prince Edward Island Government. Is there some contradiction there?

Mr. Bergasse: There is no contradiction there. You will recollect sir, that I said during my talk that I was not prepared to touch on anything that had already been discussed by previous speakers.

Mr. Allmand: But if we recall the slogan that...

Mr. Bergasse: I did not say "forget the rest". I said, "Give us the causeway and we will take care of the disparity". I did not say that you had to remove subsidies.

Mr. Allmand: Oh, you are not saying...

Mr. Bergasse: No, I never said that.

Mr. Allmand: I see; I think possibly Mr. Mahoney misunderstood you as I did. I thought you were suggesting that we remove subsidies.

Mr. Mahoney: The subsidies are there to take care of disparities.

[*Interpretation*]

M. Pringle: Ma question supplémentaire, et je crois, monsieur Mahoney, qu'il s'agit vraiment d'une question supplémentaire. On va vous demander ce qu'on trouve dans l'Île du Prince-Édouard qui ne se trouve pas dans les deux autres provinces des Maritimes, soit le Nouveau-Brunswick et la Nouvelle-Écosse. Serait-il possible qu'on y trouve un sol plus fertile et une meilleure base pour la production agricole comme industrie primaire de l'industrie de l'alimentation dans l'Île du Prince-Édouard, que dans les deux autres provinces?

M. Bergasse: C'est très vrai, monsieur Pringle. Je crois que nous avons beaucoup plus de possibilités d'expansion dans le domaine que vous avez mentionné que le Nouveau-Brunswick ou la Nouvelle-Écosse.

M. Allmand: Une autre question supplémentaire à celle posée par M. Mahoney. Ce qui est encore plus intéressant, monsieur Bergasse, c'est que votre mémoire semble contredire celui que le gouvernement de l'Île-du-Prince-Édouard, présenté ce matin par le premier ministre, M. Campbell. Je l'ai devant moi, et à la page 8 du mémoire il y a trois recommandations dont l'une est «qu'on prenne des mesures immédiatement pour étendre la Loi sur les taux de transport des marchandises dans les provinces Maritimes aux autres modes de transport. Il demande aussi que les subventions actuelles soient maintenues. Votre société est une société de la Couronne, si vous voulez, du gouvernement de l'Île-du-Prince-Édouard. Y a-t-il donc contradiction ici?

M. Bergasse: Non, il n'y a pas de contradiction. Vous vous souviendrez que j'ai dit au cours de mon exposé que je ne voulais rien discuter de ce qui avait déjà été discuté par les autres.

M. Allmand: Mais si on reprend le slogan ...

M. Bergasse: Je n'ai pas dit d'oublier le restant. Mais j'ai dit: «Construisez la chaussée, et nous nous occuperons des disparités». Je n'ai pas dit qu'il fallait retirer les subventions.

M. Allmand: Oh, vous n'avez pas dit ...

M. Bergasse: Non, je n'ai jamais dit ça.

M. Allmand: Je vois. Je crois que M. Mahoney nous a peut-être mal compris, comme moi du reste. J'avais compris que vous vouliez qu'on retire les subventions.

M. Mahoney: Les subventions sont destinées à compenser les disparités.

[*Texte*]

The Chairman: One at a time, please.

Mr. Bergasse: Not altogether.

Mr. Allmand: To make sure I understand you, when you said, "Give us the causeway and we will take care of the disparity", you were not referring to the elimination of the subsidies?

Mr. Bergasse: No, I was not. I was saying, give us the causeway so we can raise our standard of living. Maybe I phrased it poorly.

Mr. Perrault: I specifically asked the Premier today a question along those lines and he said that the causeway would reduce the need for subsidies. So I do not think there is any conflict in anything...

Mr. Bergasse: I do not think there is any conflict. I think, that given the causeway and given a fighting chance to get these industries we can control the disparities.

Mr. Perrault: That was my understanding.

Mr. Allmand: That is good, now I understand it more clearly.

Mr. McGrath: Are you suggesting, sir, that if the federal government undertakes the building of the causeway, this would eliminate the need for regional development such as the vast sums envisaged in the FRED program for the Island?

Mr. Bergasse: I am not suggesting that, sir. I am saying that my field, the corporation's field, is in the area of industrial development. This, of course, is where we have a fighting chance to attract industry. It makes it very difficult without a causeway to attract other industries, over and above agricultural-based industry. Now one of these industries which we were talking to is in the electronics field.

Mr. McGrath: The conclusion then is that your job is much more difficult because of the Island's insularity?

Mr. Bergasse: Mainly, sir, it is an accident of geography, but it is more difficult because of this lack of permanent link.

The Chairman: Are there any other questions, gentlemen? Mr. Perrault?

Mr. Perrault: Mr. Chairman, we were informed earlier this afternoon by a speaker for the Charlottetown Board of Trade that a tunnel is vastly preferable to a causeway

[*Interprétation*]

Le président: Un à la fois, s'il vous plaît.

M. Bergasse: Pas tous ensemble.

M. Allmand: Alors, si j'ai bien compris, quand vous dites: «Construisez la chaussée et nous nous occuperons des disparités» vous ne vouliez pas parler de retirer les subventions?

M. Bergasse: Non. J'ai dit: Construisez la chaussée afin de nous permettre de hausser notre niveau de vie. Peut-être que je ne me suis pas très bien exprimé.

M. Perrault: J'ai précisément demandé au premier ministre ce matin une question dans ce sens et il m'a dit que la chaussée réduirait la nécessité des subventions. Je ne crois donc pas qu'il y ait contradiction du tout.

M. Bergasse: Je ne crois pas qu'il y ait contradiction du tout. Je crois que si nous avions la chaussée et une chance véritable d'attirer ces industries, nous pourrons alors réduire les disparités.

M. Perrault: C'est ce que j'avais compris.

M. Allmand: Très bien. Je comprends mieux maintenant.

M. McGrath: Est-ce que vous suggérez, que si le gouvernement fédéral entreprend la construction de la chaussée, on éliminerait la nécessité de l'expansion régionale comme les vastes sommes que le programme FODER prévoit pour l'Île.

M. Bergasse: Pas du tout, monsieur. Ce que je dis, c'est que mon domaine, le domaine d'activité de notre corporation, est celui de l'expansion industrielle. Si nous avons, évidemment une bonne chance d'attirer les industries. C'est très difficile, évidemment, sans la chaussée, autres que les industries à base agricole. L'une des industries avec lesquelles nous avons eu des entretiens était du domaine de l'électronique.

M. McGrath: En d'autres termes, votre tâche est d'autant plus difficile en raison du caractère insulaire de l'Île.

M. Bergasse: C'est peut-être un accident géographique, mais c'est beaucoup plus difficile en raison de ce manque de lieux permanents.

Le président: Avez-vous d'autres questions, messieurs? Monsieur Perrault?

M. Perrault: Monsieur le président, on nous a dit cet après-midi par le représentant de la Chambre de Commerce de Charlottetown, qu'un tunnel serait beaucoup plus avantageux

[*Text*]

crossing. He invoked the image of ice crashing around the causeway making it impassable. I wonder, because you are such an advocate of the crossing, whether or not the Commission has adopted any policy with respect to the actual type of crossing that should be built?

Mr. Bergasse: No, we have not.

Mr. Perrault: You believe that is a policy matter?

Mr. Bergasse: We are not experts in that field and we do not claim to be experts.

Mr. Perrault: But you want an all-weather crossing of some sort?

Mr. Bergasse: We want an all-weather crossing.

Mr. Corbin: I have a supplementary question arising out of the information given by the witness, Mr. Chairman. Out of curiosity, is it not true, or would it be your experience that a good many of these electronics firms wishing to establish in the Maritimes come here mainly because of the cheaper labour? That is my question.

Mr. Bergasse: Do they come because of cheaper labour?

Mr. Corbin: Cheaper labour.

Mr. Bergasse: I think in the beginning that may be one of the factors they consider.

Mr. Corbin: They start from there in many cases, do they not?

Mr. Bergasse: That is one of the things they are looking at, yes, but they realize this is not going to last. If you are going to have productivity, it does not go along with paying a man a low wage.

Mr. Perrault: In the case of New Brunswick we had companies that were, I think, around Drummondville or Granby which moved into New Brunswick. I think one of their main reasons for moving was that they could get labour at a much cheaper cost.

Mr. Bergasse: They look at this. I think the wage scale runs about 15 per cent below the national average.

Mr. Corbin: Thank you, sir.

The Chairman: Are there any other questions, gentlemen. I would like to thank you very much for your brief.

[*Interpretation*]

qu'une chaussée. Il a évoqué l'image des glaces qui heurtent la chaussée et rendent la traversée impossible. Je me demande si, puisque vous êtes tellement en faveur de la traversée, si la Commission a adopté une politique quant au genre de traversée qu'il faudrait construire?

M. Bergasse: Non.

M. Perrault: Vous êtes d'avis que c'est une question de politique?

M. Bergasse: Nous ne sommes pas des spécialistes dans ce domaine et nous ne prétendons pas l'être.

M. Perrault: Oui, mais, est-ce que vous voulez une traversée en tous-temps?

M. Bergasse: Oui.

M. Corbin: J'ai une question complémentaire au sujet des remarques du témoin, monsieur le président. Par curiosité, est-il vrai, ou savez-vous par expérience, qu'un bon nombre de ces sociétés du domaine de l'électronique, disons ici désirent s'établir dans les Maritimes, surtout en raison de la main-d'œuvre moins coûteuse? C'est ma question.

M. Bergasse: Est-ce qu'elles viennent en raison de la main-d'œuvre moins coûteuse?

M. Corbin: La main-d'œuvre moins coûteuse, oui.

M. Bergasse: C'est peut-être un des facteurs qui les attirent d'abord.

M. Corbin: Ils partent de là dans bien des cas, n'est-ce pas?

M. Bergasse: C'est un des facteurs qu'ils étudient oui, mais ils savent aussi que cette situation ne durera pas. Si vous visez à avoir de la productivité, on ne l'obtient pas en versant des salaires inférieurs.

M. Perrault: Au Nouveau-Brunswick, nous avions des industries qui étaient établies dans la région de Drummondville ou de Grandby, qui sont déménagées au Nouveau-Brunswick, et une des principales raisons de leur déplacement, c'est qu'ils pouvaient obtenir leur main-d'œuvre à un salaire très inférieur.

M. Bergasse: Ils le prennent en considération. L'échelle des traitements est d'environ 15 p. 100 inférieure à la moyenne nationale.

M. Corbin: Merci, monsieur.

Le président: D'autres questions, messieurs? Je voudrais vous remercier de votre mémoire.

[*Texte*]

Mr. Bergasse: Thank you, sir.

The Chairman: Gentlemen, I want to call once again the Eastern Provincial Airways.

An hon. Member: Mr. Chairman, I suggest that we ask them to appear before the Committee in Ottawa.

Mr. Perrault: I move:

That the Eastern Provincial Airways be requested to appear before this Committee at Ottawa on a date to be determined.

Motion agreed to.

Mr. Nesbitt: I just want to add one thing. I thoroughly agree with Mr. Perrault but I just want to say that perhaps it would be best, if they decline to accept, that they be instructed to appear.

The Chairman: Are there any other briefs to be presented? I know that there was a gentleman here this morning, but I do not see him now. If there are no other briefs this completes our hearing in Charlottetown. Thank you, everyone.

[*Interprétation*]

M. Bergasse: Merci, monsieur.

Le président: Messieurs, une fois de plus, je voudrais appeler la *Eastern Provincial Airways.*

Une voix: On devrait leur demander de comparaître à Ottawa.

M. Perrault: Je propose:

qu'on demande à la *Eastern Provincial Airways* de comparaître devant le Comité à Ottawa à une date ultérieure.

La proposition est adoptée.

M. Nesbitt: Je voudrais simplement ajouter une chose. Je suis d'accord avec la proposition de M. Perrault. Je dis simplement que s'ils refusent d'accepter, il serait préférable quo'n leur ordonne de comparaître.

Le président: Est-ce qu'il y a d'autres mémoires à présenter? Il y avait quelqu'un ici ce matin, mais je ne le vois pas cet après-midi. S'il n'y a pas d'autres soumissions, messieurs, nous mettrons donc fin à notre audience à Charlottetown. Merci beaucoup, messieurs.

APPENDIX "Y"

JENKINS BROTHERS LIMITED
CANNERS

LOBSTERS, LOBSTER PASTE,
CHICKEN, BEEF, CLAMS,
QUAHAUGS, STRAWBERRIES, ETC.

February 19th, 1968.

SUMMERSIDE
PRINCE EDWARD ISLAND
CANADA

Standing Committee on Transport and Communication,
House of Commons,
Ottawa, Ontario.

1. This submission is made by Jenkins Brothers Limited who are one of the larger shippers of L.C.L. freight by Canadian National Railways from Summerside, P.E.I.

2. Since the implementation of Tariff Schedule No. 100 on September 5th, 1967 shipping costs have increased anywhere from 33 per cent to 160 per cent. To substantiate this statement attached is Schedule One which outlines a cost comparison on actual shipments. These charges can be verified by freight bills that I have in my possession.

3. Attached to the Brief is Schedule Two which outlines the new freight schedule on 300, 500, 1,000, 2,000 and 5,000 pounds shipments as compared to the old rate structure. These figures have been supplied to me by the Canadian National Railways. A quick comparison indicates a direct freight increase from 60 to 160 per cent depending on the freight weight classification that would apply on individual shipments.

4. As the Maritimes have not a heavy concentration of population like Ontario and Quebec customers cannot handle large shipments which means a good number of shipments are in the 300 pounds minimum category. As a result we are faced with an extremely high delivery cost.

5. Even though the old L.C.L. freight rates are still available it is impossible for us to take advantage of it as many of our customers have not the vehicles to pick up shipments from the freight shed and I refer to specifically to the large chain stores.

APPENDICE «Y»

JENKINS BROTHERS LIMITED

CONSERVERIE

le 19 février 1968

Summerside (Î.-P.-É.)

Comité permanent des transports
et des communications
Chambre des communes
Ottawa (Ont.)

1. Le présent mémoire est soumis par *Jenkins Brothers Limited*, qui comptent parmi les plus importants expéditeurs de marchandises par chargements de détail acheminés par les chemins de fer Nationaux du Canada à partir de Summerside (Î.-P.-É.).

2. Depuis la mise en vigueur du tarif marchandises n° 100 le 5 septembre 1967, les frais d'expédition ont augmenté de 33 à 160 p. 100. Ci-joint, à l'appui de cette déclaration, la Liste n° 1 qui établit une comparaison des frais effectifs. Ces frais peuvent être vérifiés au moyen des factures d'expédition que j'ai en ma possession.

3. Jointe au mémoire se trouve la Liste n° 2 qui énonce le nouveau tarif marchandises pour les charges de 300, 500, 1,000, 2,000 et 5,000 livres, comparativement à l'ancien tarif. Ces chiffres m'on été fournis par les chemins de fer Nationaux du Canada. Une comparaison rapide révèle une augmentation directe des frais d'expédition allant de 60 à 160 p. 100, selon la classification de poids du tarif marchandises applicable aux diverses expéditions.

4. Étant donné que les provinces Maritimes n'ont pas d'aussi fortes concentrations de population que l'Ontario et le Québec, les clients ne peuvent écouler de fortes expéditions, ce qui signifie qu'il y a un grand nombre d'expéditions de la classe minimum de 300 livres. Aussi, les frais de livraison sont-ils extrêmement élevés.

5. Même si les anciens taux pour chargements de détail sont encore disponibles, il nous est impossible d'en tirer parti, car beaucoup de nos clients, et surtout les grands magasins à succursales multiples, n'ont pas les véhicules nécessaires pour prendre livrai-

6. The freight costs is an item that figures into our cost of doing business as all shipments are on a prepaid basis. Last year freight costs were slightly over $7,000.00. A matter of estimation it is calculated our cost will soar to approximately $12,000.00 on our next year's operation. We do not feel we can absorb this extra burden and therefore we will have to pass it on to the consumer this in effect will increase the living cost in the Maritimes approximately 10 per cent if all Manufacturers fall in line.

7. The Provinces of Prince Edward Island, Nova Scotia and New Brunswick are spending large sums of money to attract new industries. The new freight schedule now in effect will be a hindrance and in fact discourage expansion in the Atlantic provinces.

8. It is our recommendation that the Canadian National Railways give careful consideration to revert to the old freight rate schedule that was in effect prior to September 5th, 1967.

Respectfully submitted

J. R. Phaneuf General Manager
Jenkins Brothers Limited

son des expéditions aux hangars à marchandises.

6. Le coût du transport compte parmi les frais commerciaux, car toutes les expéditions sont payées d'avance. L'an dernier, les frais d'expédition dépassaient à peine $7,000. Nous estimons que l'an prochain nos frais atteindront environ $12,000. Nous ne sommes pas en mesure d'absorber ce supplément de frais; il nous faudra donc nous faire rembourser par le client, ce qui accroîtra le coût de la vie dans les provinces Maritimes d'environ 10 p. 100 si tous les fabricants en font autant.

7. Les provinces de l'Île-du-Prince-Édouard, de la Nouvelle-Écosse et du Nouveau-Brunswick dépensent de fortes sommes d'argent afin d'attirer l'industrie. Les nouveaux tarifs marchandises maintenant en vigueur vont contrecarrer leurs efforts et même décourager l'expansion dans les provinces atlantiques.

8. Nous recommandons que les chemins de fer Nationaux du Canada songent soigneusement à revenir à l'ancien tarif marchandises qui était en vigueur avant le 5 septembre 1967.

Respectueusement soumis,

J.-R. Phaneuf, Directeur général
Jenkins Brothers Limited

APPENDIX "Z"

Second Brief on Transportation

Further to the brief I have submitted, I would like to say I had written to most of the Governors of the New England States when I prepared the brief that I have read here. I also submitted to them a copy with a letter covering my ideas.

I would like to go into the project on the Causeway, crossing the Northumberland Straits. I made quite a study of this, taking everything into consideration, as I did on the Causeway that crosses the Petitcodiac River which is now almost completed. This was in the early fifties. This Causeway will be one of the greatest uplifts to that section of the country. I wrote an article in the Moncton papers outlining my proposals. I will attach a copy of that article to the other letters I am giving you. I also spoke before the Board of Trade in Amherst on this subject. I was quite confident that it was feasable and I asked my great friend Mr. Neil Matheson who was a member of parliament at that time to bring it up in the house, which he did. It soon became an interesting subject. I was extremely pleased when a start was made on the approaches, although I was not pleased with the design. A Causeway, a bridge, an Island and a tunnel, I do not see or understand such a plan. I have not changed my mind on my plan, that concrete structure solid across with a lock for summer shipping is sound. These concrete casements could be made on the beach and floated out. There would have to be a canopy enclosure to protest the roadway from ice. It would be similar to the old fashioned covered bridges. Another great thing in this construction 95 per cent of all materials used would be purchased here in the Provinces. The proof of my plan being sound is the construction of the Canso Causeway and you know what this Causeway has done for Cape Breton and the surrounding country.

The Causeway to Prince Edward Island will be an asset to all Canada and Canada owes this to the people of the Maritimes and a great deal more. We have given Canada and the world some of the greatest men and women in all walks of life.

APPENDICE «Z»

Second mémoire sur les transports

Pour faire suite au mémoire que j'ai déjà présenté, je désirerais signaler qu'avant de préparer le mémoire dont j'ai donné lecture ici, j'avais communiqué avec la plupart des gouverneurs des États de la Nouvelle-Angleterre. En outre, je leur avais transmis le texte de mon mémoire, ainsi qu'une lettre relative à mes propositions.

J'aimerais débattre le projet de la chaussée à travers le détroit de Northumberland. J'ai fait une étude approfondie de ce projet en tenant compte de tous les aspects de la question; j'en avais fait autant en ce qui concerne la chaussée qui traverse la rivière Peticodiac et qui est maintenant presque terminée. Cela se passait au début des années 50. Cette chaussée sera l'un des plus grands avantages que cette région du pays ait jamais obtenus. J'ai écrit un article dans les journaux de Moncton concernant mes propositions. Je vais joindre une copie de cet article aux lettres dont je vais vous remettre le texte. J'ai aussi porté la parole devant le *Board of Trade* à ce sujet. J'étais convaincu de la faisabilité du projet. J'ai demandé à mon excellent ami, M. Neil Matheson, qui était député à l'époque, de soulever la question à la Chambre, et c'est ce qu'il a fait. La question a eu tôt fait de susciter beaucoup d'intérêt. J'ai été fort heureux lorsqu'on a commencé à aménager les abords, bien que la conception du projet ne m'ait guère plu. Je ne vois pas l'utilité d'aménager une chaussée, un pont, une île et un tunnel. A mon avis, une structure en béton massif munie d'une écluse pour la navigation en été est une saine proposition. Cette structure de béton pourrait être construite sur le rivage puis transportée par flottage jusqu'à pied d'œuvre. Il faudrait un toit pour protéger la route contre la glace. Cela ressemblerait aux anciens ponts couverts. Un autre avantage que présenterait une telle structure, c'est que 95 p. 100 de tous les matériaux pourraient être achetés ici même dans les provinces Maritimes. La construction de la chaussée de Canso constitue la preuve que mon plan est rationnel; tout le monde sait ce que cette chaussée a valu à l'île du Cap-Breton et à la région avoisinante.

La chaussée reliant l'Île du Prince-Édouard au continent sera un actif pour le Canada tout entier; c'est une dette dont le Canada est redevable aux gens des provinces Maritimes. Il leur doit même beaucoup plus que cela. Nous avons donné au Canada et au monde

Gentlemen, when you think the smallest Province in Canada Prince Edward Island, in this great country led second to the largest park in the world in Alberta as a Tourist attraction. The Causeway must be built. These ships can be utilized on other parts of the Island, to a great advantage. Woodisland Ferry is developing very rapidly. It needs two more boats there now. To build this Causeway you can deduct the one hundred and fifty million dollars that is wasted on the C.B.C. This is a scandulous waste. It should be turned over to private enterprise and let it pay its own way. The Government should not be in the show business. Many of the programs are a disgrace and indecent. Urban Renewal is a public monster, in a country like Canada, where we have beautiful virgin land to build on. Purchasing land at an extravagent price because certain people with money want the public to hug the centre of the city. Other properties have been left to waste. 90 per cent of these properties have been condemned by the Health Department, are owned by the richest people in the country. Too much emphasis is placed on house building. Any man that wants a fifteen thousand home or more should'nt be asking for favors. I am thinking about the man with a family who earns less than one hundred a week. I am sure that comfortable homes could be built for these people. Fortunes have been made out of this national housing. A ten thousand dollar home deducting all taxes could be built for approximately seventy two hundred dollars. The other people I am not worrying about. If they want to call the tune they can pay for it.

The railway should not be paying taxes to the municipalities. Municipalities contribute very little to it. The backbone of the railway and the country at large are farmers, fishermen, lumbermen, miners and all producers of raw materials and they are the last to be considered. Why should a miner contribute to a railway that pay taxes to a city and that tax used to illuminate a city. A city is fortunate to have a railway running through it. It has all the convenience at no cost, whereby the farmer must haul his produce to a railway station at his own expense. They are building so close to the railway tracks now they are asking the railway to move their tracks. There is only one way to remedy traffic problems entier certains des plus grands hommes et des plus grandes femmes dans tous les sentiers de la vie.

Messieurs, n'oubliez pas que la plus petite province du Canada, l'Île du Prince-Édouard, est venue au deuxième rang comme attraction pour les touristes; elle n'a été dépassée que par le plus grand parc du monde, en Alberta. Il faut aménager cette chaussée. Les transbordeurs pourront être utilisés fort avantageusement à d'autres endroits de l'île. Le transbordeur de Wood Island prend un rapide essor; il faudrait y ajouter un second navire dès maintenant. Consacrons à l'aménagement de la chaussée les 150 millions de dollars qui sont gaspillés par Radio-Canada. C'est là un gaspillage scandaleux. Cette société devrait être exploitée par l'entreprise privée afin qu'elle fasse ses propres frais. Le gouvernement ne devrait pas participer au monde des spectacles. Beaucoup des émissions sont disgracieuses et indécentes. Le réaménagement urbain est un scandale public dan un pays comme le Canada qui possède tant de terrains vierges où bâtir. On achète des terrains à des prix exorbitants parce que certains richards veulent que les gens habitent au centre des villes. En revanche, d'autres propriétés ne sont pas utilisées du tout. Quatre-vingt-dix p. 100 de ces vieilles propriétés, qui appartiennent aux gens les plus riches du pays, ont été condamnées par le bureau d'hygiène publique. On accorde trop d'importance à la construction des maisons. Tout homme qui veut une maison coûtant $15,000 ou plus ne devrait pas demander de faveurs. Je songe au père de famille qui gagne moins de $100 par semaine. Je suis certain qu'on pourrait construire des maisons confortables pour ces gens. Des fortunes ont été édifiées grâce à ces logements sociaux. Une maison de $10,000 pourrait être construite pour environ $7,200 si toutes les taxes étaient supprimées. Je ne me préoccupe pas outre mesure des autres gens. S'ils veulent des habitations, il peuvent les payer eux-mêmes.

Les chemins de fer ne devraient pas payer d'impôts aux municipalités, car ces dernières ne contribuent pour rien aux chemins de fer. L'armature des chemins de fer et du pays en général, ce sont les agriculteurs, les pêcheurs, les exploitants forestiers, les mineurs et tous les producteurs de matières premières, et ce sont eux pour lesquels on a le moins d'égards. Pourquoi un mineur devrait-il contribuer à un chemin de fer qui verse à une municipalité des impôts lesquels servent à l'éclairage de la ville? Une ville est chanceuse qu'un chemin de fer la traverse. Elle en profite gratuitement de toutes sortes de façons, tandis que l'agriculteur doit livrer ses produits à la gare à ses propres frais. On construit des

lems of trains and other conveyance, that is underpasses and overpasses.

My final subject is interest rates. If something is not done and interest is not pegged we will have a third world war.

There is no reason why the United States and Canada could not peg interest rates. They are both self supporting nations with all the commodities of life. In the thirties Canada established the greatest banking system in the world. The United States copied it, but it is starting to break up.

Thank you Gentlemen,
Major D. A. Macdonald

habitations si près des voies de chemin de fer qu'on demande maintenant aux compagnies de chemin de fer de déplacer leurs voies. Il n'y a qu'un moyen de régler les problèmes que pose la circulation des trains et des autres véhicules: c'est d'aménager des passages supérieurs et des passages inférieurs.

Mon dernier sujet a trait aux taux d'intérêt. Si l'on ne prend pas des mesures afin d'empêcher les taux d'intérêt de monter davantage, la troisième guerre mondiale va éclater.

Rien n'empêche les États-Unis et le Canada de fixer les taux d'intérêt. Ce sont deux nations indépendantes et autonomes qui possèdent tout ce qu'il faut pour vivre. Dans les années 30, le Canada a jeté les assises du plus grand régime bancaire au monde. Les États-Unis l'ont calqué, mais il commence à présenter des failles.

Merci, messieurs.

Le major D.A. Macdonald.

APPENDIX «A-1»

NORTHUMBERLAND STRAIT CROSSING FINANCIAL FEASIBILITY

Industrial Enterprises Incorporated

SUMMARY

1. *Capital Costs*

The Capital costs necessary to provide a Fixed Crossing are *LESS* than those required to provide a Ferry Service. Over 60 years this saving is estimated to be $25.26 million.

2. *Operating Results*

The Fixed Crossing starts to produce operating profits from the day it is opened whereas the Ferry Service operates at an everincreasing deficit.

3. *Cash Flow*

The Fixed Crossing, if constructed for opening in 1976, could require subventions for the first 30 years, totalling $300 million. These monies could be repaid to the Treasury in full during the subsequent 25 years. By 2030 profits could constitute a total of $411 million to Federal Funds which is $111 million more than the subventions.

The Ferry System has historically operated at an ever-increasing deficit. If this continues into the future, Government Subventions

APPENDICE «A-1»

CHAUSSÉE DU DÉTROIT DE NORTHUMBERLAND POSSIBILITÉS FINANCIÈRES

Industrial Enterprises Incorporated

SOMMAIRE

1. *Coût des immobilisations*

Le coût des immobilisations nécessaires à l'établissement d'une chaussée est *MOINDRE* que celui qu'exige le service passeur. Sur la période de soixante ans, l'économie prévue serait de 25.26 millions de dollars.

2. *Bénéfices d'exploitation*

La chaussée commence à rapporter dès le premier jour de sa mise en service, alors que le service passeur accroît constamment le déficit.

3. *Flux de fonds*

Si la chaussée était construite et mise en service en 1976, elle pourrait exiger des subventions durant les trente premières années, soit un montant global de 300 millions de dollars. Cette somme pourrait être remboursée entièrement au cours des vingt-cinq années subséquentes. Dès l'an 2030, les bénéfices versés au fonds fédéral pourraient s'établir à 411 millions de dollars, soit 111 millions de plus que les subventions prévues.

Le service passeur a fonctionné de tout temps en accumulant déficit sur déficit. Si la situation devait se prolonger indéfiniment, les

over the 30 years period 1976-2005 could total $587 million and by 2030 could be as astronomical.

4. *Conclusion*

The proper business decision would be to replace an asset that operates at a deficit with one that produces a profit. When this can be done at less capital cost and at the same time provide superior and more efficient service, there is really only one conclusion—the quicker it is done the better!

STATISTICAL STANDARDS

1. The background data for the attached Schedules has been obtained from various studies already made by government agencies and private consultants. These include:

(i) Projected capital requirements for Ferry Service, timing, number and cost of vessels required.

(ii) Traffic projections for a fixed crossing 1976-2030.

(iii) Toll charges based on present rates and escalated at 1.8 per cent per annum.

(iv) Fixed crossing operating costs.

(v) Ferry deficits, historical.

(vi) Capital costs Fixed Crossing.

2. All calculations have been made on a uniform basis and projected using an escalation factor of 1.8 per cent.

3. Capital amortizations have been calculated at 7½ per cent per annum or on a 30-year term.

4. No provision has been made for construction financing charges as this information was not available in time to be included in this study.

5. Capital costs to provide terminal facilities for an expanded ferry service have not been included so they were unavailable to us.

Schedule "A"

Northumberland Strait Crossing

Capital Costs:

Construction Costs $160.0 million; Escalation Costs $17.0 million; total: $177.0 million.

subventions gouvernementales sur la période de trente ans, 1976-2005, pourraient s'élever à 587 millions de dollars, et dès 2030, le montant serait astronomique.

4. *Conclusion*

La saine décision qui s'impose sur le plan des affaires est de remplacer un avoir producteur de déficits par un actif producteur de bénéfices. Quand le remplacement peut s'opérer à un moindre coût des immobilisations et offrir en même temps un service supérieur et plus efficace, une seule conclusions s'impose: Le plus tôt la chose se fera, le mieux ce sera.

NORMES STATISTIQUES

1. Les données fondamentales servant à la rédaction des annexes ci-jointes proviennent de plusieurs études faites par des agents gouvernementaux et par des experts-conseils particuliers. Elles comprennent les suivantes, soit:

(i) Projection des besoins de capital du service passeur; échelonnement dans le temps, nombre et coût des vaisseaux nécessaires.

(ii) Projection de la circulation sur une chaussée, 1976-2030.

(iii) Taxe péagère établie d'après les tarifs actuels, mobilité calculée au taux de 1.8 p. 100 par année.

(iv) Frais fixes d'exploitation d'une chaussée.

(v) Déficits du service passeur—historique.

(vi) Coût des immobilisations d'une chaussée.

2. Tous les calculs ont été établis sur une base uniforme et les projections ont fait appel au facteur de mobilité de 1.8 p. 100.

3. L'amortissement du capital a été calculé au taux de 7.5 p. 100, ou sur une période de 30 ans.

4. Le coût du financement de la construction n'a pas été calculé, faute d'informations en temps utile pour le faire figurer dans cette étude.

5. Le coût des immobilisations nécessaires à l'agrandissement des installations de terminus d'un service passeur ne figure pas, faute d'avoir pu consulter les données.

Annexe «A»

Chaussée du détroit de Northumberland

Coût des immobilisations

Coût de la construction—160 millions de dollars; Coût de la mobilité—17 millions de dollars; Total: 177 millions de dollars.

Annual Amortization Costs:

Amortization $177 million over 30 years at 7½ per cent=$14.69 million per year
Ferries are also amortized at the same rate over the same term.

Annual Operating Costs:

We are informed that DOT have researched the project and determined the cost of operations at $800,000 per year.

Coût annuel de l'amortissement

Amortissement de 177 millions de dollars réparti sur 30 ans au taux de 7.5 p. 100= 14.69 millions de dollars par année.
Les bateaux passeurs sont amortis aussi au même taux; l'amortissement est réparti sur la même période.

Coût annuel de l'exploitation

On nous informe que le ministère des Transports a étudié le projet et en a déterminé le coût d'exploitation à 800,000 dollars par année.

Remarques

1. Les déficits en espèces des services passeurs sont exprimés en projections arithmétiques.

2. Les coûts des terminus qui nous ont été fournis en dollars de 1968 ont été rajustés en faisant appel au facteur 1.8 p. 100.

3. Le calcul du nombre de bateaux passeurs s'appuie sur les projections qui nous ont été fournies à l'égard du coût en immobilisations.

PRESENTATION OF D. S. BARTLETT
TO THE
HONOURABLE JEAN MARCHAND

MEETIN GON TUESDAY,
FEBRUARY 18, 1969—9:15 A.M.

PROCESSED FOOD

The processed food industry on Prince Edward Island is one of the Province's leading exporters. Of gross sales approximating $20 million, $5 million is exported to offshore countries. The balance ($15 million) is sold on the Canadian market from Halifax to Winnipeg.

The growth of the domestic segment of the industry is limited by its ability to obtain efficient and reliable transportation services to major Canadian cities at comparative transportation rates. In addition, the development of reservoir of experienced, semi-skilled and unskilled labour is essential. The industry is also dependent upon delivery of goods and materials from off-Island sources. One of the major costs to secondary industry in Prince Edward Island is the need to carry unusually large inventories of materials and supplies because of the present unreliable transportation service.

The processed fruit and vegetable industry in Canada represents an annual volume of $1 billion. This industry is dependent on the availability of an abundant supply of good quality fresh fruits and vegetables. The Island climatic and soil conditions are ideal for the production of a large range of these fruits and vegetables in Prince Edward Island. It is quite apparent that the share of the industry presently supplied from Prince Edward Island is infinitesimally small. The basic factors do exist, however, to support a substantial expansion of secondary industry in this field.

The construction of a permanent dry crossing would result in:

1. A more rapid and reliable transportation facility between major Canadian cities and Prince Edward Island.

2. An improvement in labour orientation and exposure of Maritimes to wider horizons.

3. The residual scales which would remain following the construction period.

4. Greater ability of labour between Mainland New Brunswick and Prince

ALIMENTS TRANSFORMÉS

L'industrie des aliments transformés de l'Île-du-Prince-Édouard est une des principales industries exportatrices de la province. Sur l'ensemble des ventes pour une valeur d'environ 20 millions de dollars, 5 millions intéressent les pays d'outre-mer. La différence, 15 millions, provient des ventes sur les marchés canadiens échelonnés depuis Halifax jusqu'à Winnipeg.

La croissance du secteur domestique de cette industrie se limite aux possibilités d'assurer à des taux concurrentiels des services de transport efficaces et sûrs avec les principales villes canadiennes. Au surplus, il est essentiel de former une réserve de main-d'œuvre expérimentée, semi-spécialisée et experte. L'industrie dépend aussi de la livraison de fournitures et de matériel en provenance de l'extérieur. Un des principaux éléments des frais de l'industrie secondaire dans l'Île-du-Prince-Édouard est l'obligation de porter des inventaires de matériel et de fournitures exceptionnellement importants, à cause de l'état incertain du service de transport.

L'industrie des fruits et légumes transformés au Canada représente une valeur annuelle d'un milliard de dollars. Elle est dépendante de la possibilité d'obtenir un abondant approvisionnement de fruits et de légumes frais de bonne qualité. Le climat et le sol de l'île se prêtent idéalement à la production d'une grande variété de fruits et de légumes. Manifestement, la place qu'occupe présentement l'Île-du-Prince-Édouard dans ce secteur est infiniment petite. Néanmoins, l'île est dotée des conditions essentielles à une expansion notable de l'industrie secondaire dans ce secteur.

La construction d'un chaussée pourrait avoir pour résultat:

1. D'établir un service de transport amélioré en rapidité et en sûreté entre les principales villes canadiennes et l'Île-du-Prince-Édouard.

2. D'améliorer l'orientation de la main-d'œuvre et l'élargissement des horizons des Maritimes.

3. De laisser une différence favorable après la période de construction.

4. De faciliter la mobilité de la main-d'œuvre continentale du Nouveau-Bruns-

Edward Island to better accommodate the cyclical requirements of the processed food industry.

The net result would be a substantial expansion of secondary industry and proportionately greater employment and development of industrially oriented skills in the Prince Edward Island labour force.

wick à destination de l'Île-du-Prince-Édouard et de répondre davantage aux besoins cycliques de l'industrie des aliments transformés.

Il en résulterait pour l'Île-du-Prince-Édouard une nette expansion de l'industrie secondaire avec une amélioration proportionnelle de l'emploi et de la formation de la main-d'œuvre douée pour l'industrie.

PRESENTATION OF D. E. MORRISON TO THE HONOURABLE JEAN MARCHAND

MEETING ON TUESDAY, FEBRUARY 18, 1969—9:15 a.m.

INDUSTRIAL GROWTH

Industrial Enterprises Incorporated a Crown Corporation, promoting the development of new and existing industry on Prince Edward Island has been in operation for approximately three years. To date, this group of businessmen has not been able to attract a single new industry to our Province, whereas our neighbours Nova Scotia and New Brunswick have attracted many new industries during the same period. They have offered no better financing, tax arrangements and/or other incentives than does Prince Edward Island.

Mr. Minister, we can cite several examples where we have lost a new industry to our neighbours due to the lack of a crossing.

How can our Province keep pace with the economic growth of the rest of the Maritimes when it cannot provide competitive transportation costs to and from the markets?

Give us the crossing and we'll take care of our regional disparity.

MÉMOIRE DE D. E. MORRISON PRÉSENTÉ À L'HONORABLE JEAN MARCHAND

SÉANCE DU MARDI 18 FÉVRIER 1969—9 h. 15

CROISSANCE INDUSTRIELLE

La Société d'entreprises industrielles, société de la Couronne de stimulation et de développement d'industries établies et nouvelles dans l'Île-du-Prince-Édouard, exerce son activité depuis trois ans environ. Néanmoins, ce groupe d'hommes d'affaires n'a pas réussi jusqu'ici à attirer une seule industrie dans la province. Au contraire, les provinces voisines de la Nouvelle-Écosse et du Nouveau-Brunswick en ont attiré plusieurs durant la même période. Pourtant elles n'offraient pas de meilleurs avantages que l'Île-du-Prince-Édouard en matière de financement, de taxes et d'autres encouragements.

Nous pouvons citer plusieurs cas où nous avons perdu de nouvelles industries à l'avantage des provinces voisines, faute d'une chaussée.

Comment notre province peut-elle marcher d'un pas égal avec les autres provinces Maritimes sur la voie de la croissance économique, alors qu'elle ne peut offrir des moyens de transport à des tarifs concurrentiels?

Donnez-nous une chaussée et nous nous chargerons de notre disparité régionale.

PRESENTATION OF J. A. SIMMONDS AND L. W. MACLEOD TO THE HONOURABLE JEAN MARCHAND

MEETING ON TUESDAY, FEBRUARY 18, 1969—9:15 a.m.

DAIRY AND LIVESTOCK PRODUCTS

A major effort in the elimination of regional disparity can be made through encouraging the region to become self-sufficient in its annual food requirements.

MÉMOIRE DE J. A. SIMMONDS ET L. W. MACLEOD PRÉSENTÉ À L'HONORABLE JEAN MARCHAND

SÉANCE DU MARDI 18 FÉVRIER 1969—9 h. 15

PRODUITS LAITIERS ET AUTRES PRODUITS D'ORIGINE ANIMALE

Une des principales mesures aptes à corriger la disparité régionale consisterait à encourager l'autarcie à longueur d'année dans le domaine des besoins alimentaires de la région.

The Atlantic region produces less than half of its annual requirements of meat and dairy products.

The deficiency is being supplied from outside the region at an annual cost in excess of one hundred million dollars.

A great deal of the deficiency in the Atlantic area could be and should be produced in Prince Edward Island which has the best agricultural soil in the Atlantic provinces.

Prince Edward Island has large acreages of land not presently being used for agriculture. This land is ideal for producing grains which can be used for livestock feeds.

Through the implementation of the Comprehensive Development Plan it is anticipated that both the livestock and dairy industries will receive the necessary encouragement and assistance to greatly increase their production.

Owing to the highly perishable nature of these products and consequently the need for them to arrive at the market place at the peak of quality it is absolutely necessary that they be transported economically and without delay.

In the past mainland customers have been reluctant to buy with regularity products produced and processed in Prince Edward Island due to our inability to guarantee delivery and schedule resulting in the loss of many millions of dollars annually to the province.

The future growth of the livestock and dairy industries of Prince Edward Island are dependent on the completion of the Causeway.

La région de l'Atlantique produit moins de la moitié de la viande et des produits laitiers dont elle a besoin annuellement.

La différence est comblée par les arrivages en provenance de l'extérieur au coût annuel de plus de 100 millions de dollars.

Une forte proportion des produits déficitaires dans la région de l'Atlantique pourrait et devrait se produire dans l'Île-du-Prince-Édouard qui de toutes les provinces de l'Atlantique possède les meilleurs terres agricoles.

L'Île-du-Prince-Édouard compte de grandes étendues de terres qui ne servent pas à l'agriculture, mais qui conviennent idéalement à la production de céréales propres à l'alimentation du bétail.

L'application du Plan d'aménagement intégral laisse prévoir que l'élevage et l'industrie laitière bénéficieront de l'encouragement et de l'aide nécessaires pour accroître fortement leur production.

En raison de la nature manifestement périssable de ces produits, ils doivent arriver sur le marché dans l'excellence de leur qualité; il est donc absolument nécessaire de leur assurer des moyens de transport économiques et rapides.

Dans le passé, les consommateurs sur la terre ferme se sont montrés peu disposés à acheter régulièrement les denrées produites et conditionnées dans l'Île du Prince-Édouard à cause de notre impossibilité d'en assurer la livraison selon les programmes. Il en est résulté pour la province la perte de plusieurs millions de dollars annuellement.

Le développement de l'élevage et de l'industrie laitière dans l'Île-du-Prince-Édouard dépend de la construction de la chaussée.

ALBERTO J. BACARDI
BACARDI BUILDING
2100 Biscayne Boulevard
Miami, Florida 33137

January 27, 1969

The Honorable Alexander B. Campbell
Premier Prince Edward Island
P. O. Box 2000
Charlottetown, P.E.I., Canada

Dear Mr. Premier:

I was very honored to receive your letter of December 31st 1968.

We are still looking for a solution to the problem you explained to us in regard to the returning empty vessels from Puerto Rico and the Caribbean to P.E.I. There should be some

ALBERTO J. BACARDI
IMMEUBLE BACARDI
2100, boulevard Biscayne
Miami, Floride 33137

Le 27 janvier 1969

A l'honorable Alexander B. Campbell
Premier ministre de l'Île du Prince-Édouard
Case postale 2000
Charlottetown (Î. P.-É.)
CANADA

Monsieur le premier ministre,

J'ai l'honneur d'accuser réception de votre lettre du 31 décembre 1968.

Nous recherchons encore une solution au problème que vous nous avez exposé au sujet du retour à vide des vaisseaux de Puerto Rico et des Caraïbes à destination de l'Île du Prin-

commodity which could be shipped from these areas to the Atlantic provinces.

Mr. José M. Bosch, Chairman of the Bacardi Companies, has informed me of your kind letter of November 26, 1968, and wishes me to express the opinion of the committee in charge of the new Canadian organization.

Mr. Premier, it is the opinion of our transportation experts that the transportation facilities between Nassau, Bahamas and P.E.I. and the mainland are not the best suited for our industry. After computing our transportation costs to the various Liquor Boards in Canada, we found that the cost per case of BACARDI Rum to Ontario and West Canada are greater than desired. One of the main objectives of establishing a BACARDI Plant in Canada is to lower the price of BACARDI Rum to the consumer. Because of these factors, the Committee has considered that the BACARDI Rum Plant would be of more benefit to the Canadian consumers if placed somewhere nearer to our raw materials and future markets.

I do believe that if BACARDI Rum increases its sales volume by becoming more competitive pricewise, it will benefit P.E.I. as well as other provinces since the Liquor Commission is one of the basic sources of revenue.

Mr. Premier, we are most grateful for all of your kind attentions. Bacardi & Co. of Canada Ltd. will be 25% owned by Canadians. We are proud of this fact and highly optimistic about the future of your great nation.

Respectfully yours,

J. Alberto Bacardi

ce-Édouard. Il devrait y avoir un produit que l'on pourrait expédier de ces régions à destination des provinces de l'Atlantique.

M. José M. Bosch, président des Sociétés Bacardi, m'a informé de votre aimable lettre du 26 novembre 1968. Il me charge de vous communiquer l'avis du Comité chargé de la nouvelle organisation canadienne.

Nos experts en transport, monsieur le premier ministre, sont d'avis que les moyens de transport entre Nassau, Bahamas, et l'Île du Prince-Édouard, et entre votre province et la terre ferme, ne se prêtent pas des mieux à notre industrie. Après avoir calculé nos frais de transport à destination des diverses régies de l'alcool au Canada, nous constatons que le coût par caisse de rhum BACARDI à l'Ontario et à l'ouest du Canada nous paraît excessif. Une des principales raisons motivant l'établissement d'une distillerie BACARDI au Canada est de comprimer le prix du rhum BACARDI au niveau du consommateur. Compte tenu de ces facteurs, le Comité est d'avis que la distillerie de rhum BACARDI desservirait mieux les consommateurs canadiens si elle était implantée à un endroit plus rapproché de nos matières premières et des marchés éventuels.

Je suis d'avis que dans l'éventualité de l'accroissement du volume des ventes de rhum BACARDI, par l'amélioration de sa situation concurrentielle au niveau des prix, l'Île du Prince-Édouard y trouvera son avantage, vu que la régie de l'alcool est une de ses principales sources de revenu.

Nous vous sommes reconnaissants, monsieur le premier ministre, de toutes vos amabilités à notre égard. La société Bacardi et compagnie du Canada Limitée sera la propriété de Canadiens dans la proportion de 25 p. 100. Nous en sommes fiers et nous augurons des mieux de l'avenir de votre grande nation.

Je vous prie d'agréer, monsieur le premier ministre, l'assurance de mon respectueux dévouement.

J. Alberto Bacardi

MINUTES OF PROCEEDINGS

THURSDAY, March 13, 1969.
(30)

[*Text*]

The Standing Committee on Transport and Communications met this day at 9:35 a.m., the Chairman, Mr. H.-Pit Lessard, presided.

Members present: Messrs. Breau, Corbin, Givens, Horner, Lessard (*La Salle*), Mahoney, McCleave, McQuaid, McGrath, Perrault, Portelance, Pringle, Rock, Rose, Skoberg, Trudel, Turner (*London East*). (17)

Also present: Mr. Marshall, M.P.

Witnesses: From the Canadian Transport Commission: The Honourable J. W. Pickersgill, President and Mr. Pierre Taschereau, Vice-President. *From Eastern Provincial Airways (1963) Limited:* Mr. A. J. Lewington, President; Mr. K. Millar, Executive Vice-President and Mr. W. F. Gaudet, Vice-President, Marketing.

After discussion of a point of order concerning a government announcement in respect to the causeway between the Province of Prince Edward Island and the Province of New Brunswick, it was

Agreed,—That the Chairman be authorized to get the assurance from the Minister of Transport that no further announcements of government policies in the Atlantic Provinces be made until such time as the Standing Committee on Transport and Communications has studied the evidence adduced during its recent trip to the Maritimes.

After further discussion, it was

Agreed,—That the Chairman be authorized to communicate to the Minister of Transport the wishes of the Committee to extend the freeze of the Maritime Freight Rates for a few months to allow the committee to prepare a report which will be tabled in the House as soon as possible.

PROCÈS-VERBAL

Le JEUDI 13 mars 1969.
(30)

[*Traduction*]

Le Comité permanent des transports et des communications se réunit ce matin à 9 h. 35, sous la présidence de M. H.-Pit Lessard.

Présents: MM. Breau, Corbin, Givens, Horner, Lessard (*La Salle*), Mahoney, McCleave, McQuaid, McGrath, Perrault, Portelance, Pringle, Rock, Rose, Skoberg, Trudel, Turner (*London-Est*)—(17).

De même que: M. Marshall, député.

Témoins: De la Commission canadienne des transports: L'honorable J. W. Pickersgill, président, et M. Pierre Taschereau, vice-président. De l'*Eastern Provincial Airways (1963) Limited:* M. A. J. Lewington, président; M. K. Millar, vice-président exécutif; M. W. F. Gaudet vice-président à la commercialisation.

Après débat sur une question de Règlement relative à une annonce faite par le gouvernement au sujet de la chaussée entre la province de l'Île-du-Prince-Édouard et celle du Nouveau-Brunswick.

Il est convenu—Que le président soit autorisé à obtenir du ministre des Transports l'assurance que l'on ne fera plus d'annonces relatives à la politique du gouvernement dans les provinces de l'Atlantique jusqu'à ce que le Comité permanent des transports et des communications ait étudié les témoignages qui lui ont été présentés lors de son récent séjour dans les Maritimes.

Après d'autres débats,

Il est convenu—Que le président soit autorisé à communiquer au ministre des Transports le désir du Comité que l'on prolonge le gel du tarif de transport des marchandises dans les Maritimes pendant quelques mois afin de permettre au Comité de préparer un rapport qui sera déposé à la Chambre aussitôt que possible.

The Chairman then introduced the Honourable J. W. Pickersgill and Mr. Pierre Taschereau from the Canadian Transport Commission who were questioned by Members of the Committee.

Mr. Pickersgill agreed to supply additional information to the Committee concerning regional carriers in the Atlantic Provinces.

After questioning, the witnesses were excused and the Chairman thanked them for the evidence given.

Then on motion of Mr. McGrath,

Agreed,—That this Committee regrets the decision taken by the Government last week, not to proceed with the Prince Edward Island Causeway, before this Committee had an opportunity to study the evidence it has heard on this matter and to make a recommendation to Parliament.

After debate, the question was put, and by a show of hands, resulted in a tie: YEAS 7 NAYS 7.

The Chairman, using his casting vote, voted against the motion which was resolved in the negative: YEAS 7, NAYS 8.

The Chairman then introduced the President of Eastern Provincial Airways (1963) Limited who made an opening statement and was questioned thereon, assisted by officials of the Company.

After questioning, the witnesses retired and the Chairman thanked them for the evidence given.

The Clerk read the Fourth Report of the Sub-Committee on Agenda and Procedure for the meeting held on March 4, 1969.

Le président présente ensuite l'honorable J. W. Pickersgill et M. Pierre Taschereau, de la Commission canadienne des transports, qui répondent aux questions des membres du Comité.

M. Pickersgill convient de fournir au Comité des renseignements supplémentaires au sujet des compagnies de transports régionales des provinces de l'Atlantique.

L'interrogatoire terminé, on permet aux témoins de se retirer, et le président les remercie de leurs témoignages.

Puis, sur la proposition de M. McGrath,

Il est convenu—Que le Comité regrette la décision du gouvernement, prise la semaine dernière, de ne pas donner suite ou projet de la chaussée de l'Île-du-Prince-Édouard jusqu'à ce que le Comité ait eu l'occasion d'étudier les témoignages qu'il a reçus à cet égard et de présenter une recommandation au Parlement.

Après débat, la question est mise aux voix, et le vote à main levée résulte dans un nombre égal de voix (7-7) en faveur de la motion et contre la motion.

Le président, donnant sa voix prépondérante, votre contre la motion, qui est rejetée par 8 voix contre 7.

Le président présente ensuite le président de l'*Eastern Provincial Airways (1963) Limited,* qui fait une déclaration préliminaire et répond, avec l'aide des représentants de la compagnie à des questions.

L'interrogatoire terminé, les témoins se retirent, et le président les remercie de leurs témoignages.

Le secrétaire donne lecture du quatrième rapport du sous-comité du programme et de la procédure, préparé lors de la réunion du 4 mars 1969.

TUESDAY, March 4, 1969.

FOURTH REPORT

The Subcommittee on Agenda and Procedure of the Standing Committee on

LE MARDI 4 mars 1969.

QUATRIÈME RAPPORT

Le sous-comité du programme et de la procédure du Comité permanent des trans-

Transport and Communications met at 3:30 p.m. this afternoon. The Chairman, Mr. H.-Pit Lessard, presided.

Members present: Messrs. Allmand, Lessard (*LaSalle*), Mahoney, Nesbitt and Skoberg.

Also present: Mr. Horner, M.P.

Your Subcommittee met to plan further meetings to hear additional evidence pertaining to the transportation problems in the Atlantic Provinces.

After discussion, it was agreed that the following persons and companies be requested to appear before the Standing Committee on Transport and Communications, on Thursday, March 13, 1969.

1. The Honourable J. W. Pickersgill, President of the Canadian Transport Commission.
2. Eastern Provincial Airways (1963) Limited.
3. A delegation from "Les Iles-de-la-Madeleine".
4. The Canadian National Railway.

Should officials of the Canadian National Railway not be able to appear before the Committee on the above-mentioned date, arrangements will be made for them to appear on Tuesday, March 18, 1969.

It was agreed that the Committee Clerk inquire as to the possibility of having the Minutes of Proceedings and Evidence adduced during the tour of the Atlantic Provinces, printed as soon as possible.

At 4:30 p.m., the Subcommittee adjourned.

Respectfully submitted,

ports et des communications se réunit cet après-midi à 3 h. 30, sous la présidence de M. H.-Pit Lessard.

Présents: MM. Allmand, Lessard (*La Salle*), Mahoney, Nesbitt et Skoberg.

De même que: M. Horner, député.

Le sous-comité se réunit pour organiser d'autres séances en vue d'entendre des témoignages supplémentaires relatifs aux problèmes des transports dans les provinces de l'Atlantique.

Après débat, il est convenu que l'on demande aux personnes et compagnies suivantes de comparaître devant le Comité permanent des transports et des communications le jeudi 13 mars 1969:

1. L'honorable J. W. Pickersgill, président de la Commission canadienne des transports.
2. L'*Eastern Provincial Airways (1963) Limited.*
3. Une délégation des îles de la Madeleine.
4. Les Chemins de fer nationaux du Canada.

Au cas où les représentants des Chemins de fer nationaux du Canada ne pourraient comparaître devant le Comité à la date susmentionnée, on prendrait des dispositions en vue d'entendre leurs témoignages le mardi 18 mars 1969.

Il est convenu que le secrétaire du Comité s'informe de la possibilité de faire imprimer aussitôt que possible les procès-verbaux et témoignages relatifs au voyage dans les provinces de l'Atlantique.

A 4 h. 30 de l'après-midi, le sous-comité lève la séance.

Respectueusement soumis,

Le président

H.-PIT LESSARD

Chairman

Then on motion of Mr. McGrath, it was

Resolved,—That the names of Messrs. Trudel and Horner be substituted for those of Messrs. Allmand and Nesbitt on the Sub-Committee on Agenda and Procedure for this day's meeting only.

Then on motion of Mr. Mahoney, it was

Resolved,—That the briefs received during the second session of the 27th Parliament concerning transportation problems of the Atlantic Provinces and printed in Issue No. 15, 1967-68 of the Minutes of Proceedings and Evidence of the Standing Committee on Transport and Communications, be appended to the evidence adduced during the recent trip of the Committee to the Atlantic Provinces, i.e., to *Issue No. 16.*

At 1:30 p.m., the Committee adjourned to the call of the Chair.

Puis, sur la proposition de M. McGrath,

Il est décidé—Que MM. Trudel et Horner remplacent MM. Allmand et Nesbitt à la réunion de ce jour seulement du sous-comité du programme et de la procédure.

Puis, sur la proposition de M. Mahoney,

Il est décidé—Que les mémoires relatifs aux problèmes des transports dans les provinces de l'Atlantique reçus au cours de la deuxième session de la 27e législature, et imprimés dans le Fascicule n° 15 (1967-1968) des Procès-verbaux et témoignages du Comité permanent des transports et des communications, soient imprimés en appendice aux témoignages reçus lors du récent voyage du Comité dans les provinces de l'Atlantique, c'est-à-dire au *Fascicule n° 16.*

A 1 h. 30 de l'après-midi, le Comité s'ajourne jusqu'à nouvelle convocation du président.

Le secrétaire du Comité
Robert Normand
Clerk of the Committee

[*Texte*]

EVIDENCE

(*Recorded by Electronic Apparatus*)

Thursday, March 13, 1969

• 0937

The Chairman: Gentlemen, we have an order here allowing us to sit without the 11-member forum, and I believe several committees are sitting this morning. I think we should start.

As you know, we have with us this morning, from the Canadian Transport Commission, The Honourable J. W. Pickersgill and also Mr. Pierre Taschereau, Vice-President. Mr. Rose?

Mr. Rose: Before we start, Mr. Chairman, I wish to raise a question of privilege. It concerns the future of this particular Committee.

As you know, we were nine days in the Maritimes and we worked very diligently. You said so publicly on TV, so I assume it is true.

The Chairman: You still trust me.

Mr. Rose: Anyhow, I was shocked by the announcement by the government relative to the causeway, one of the principal items central to our discussions in the Maritimes.

I do not propose to discuss at this moment the merits or the demerits of the government's decision, or those of the causeway, but I am concerned if the effort that we are putting in, and have been putting in, on this Committee is just window-dressing—if it is just a sham—and these things have all been decided. If that is so, I really do not want to be part of it. I have other things to do.

I would like to have your assurance, Mr. Chairman, if you can give it, that what recommendations we might make, after listening to all these representations, are going to be considered, and are relevant, and that we are not wasting our time.

I think this might be said for other committees, as well, but I am here this morning and I wanted to raise it right at the beginning.

The Chairman: I think you have a good point, Mr. Rose.

[*Interprétation*]

TÉMOIGNAGES

(*Enregistrement électronique*)

Le jeudi 13 mars 1969

Le président: Messieurs, nous avons un règlement qui nous permet de siéger sans le quorum nécessaire de 11 membres. Il y a plusieurs comités qui siègent ce matin et nous pourrions peut être commencer. Comme vous le savez ce matin, nous avons l'honorable J. W. Pickersgill, président de la Commission canadienne des transports, ainsi que Pierre Taschereau, vice-président. Monsieur Rose?

M. Rose: Avant de commencer, monsieur le président, j'aimerais soulever une question de privilège. Il s'agit de l'avenir de notre comité. Comme vous le savez, nous avons passé neuf jours dans les Maritimes, et nous avons travaillé ferme. Vous l'avez dit publiquement à la télévision d'ailleurs, et je présume alors que c'est vrai.

Le président: Vous avez toujours confiance en moi.

M. Rose: De toute façon, j'ai été plutôt surpris de l'annonce qu'a faite le gouvernement au sujet de l'une des questions importantes de nos discussions dans les Maritimes, la chaussée. Je ne me propose pas de discuter aujourd'hui de la valeur ou du bien fondé de la décision du gouvernement, ni de la valeur de la chaussée non plus. Mais je me demande si les efforts que nous avons faits jusqu'ici au Comité ne sont que pour la galerie, ne sont qu'une farce et que toutes ces choses ont déjà été décidées. S'il en est ainsi, je ne veux pas prendre part à cela car j'ai bien d'autres choses à faire. Je voudrais donc avoir votre assurance, monsieur le président, si vous êtes en mesure de nous la donner, que le genre de recommandations que nous pourrions formuler ici, après avoir écouté toutes les présentations, seront étudiées, qu'elles soient pertinentes et que nous ne perdions pas notre temps tout simplement. Et je crois que nous pourrions peut-être dire la même chose d'autres Comités mais je suis ici ce matin, et je voulais soulever la question en commençant.

Le président: Vous avez là une bonne question, monsieur Rose.

[*Text*]

Mr. McGrath: Mr. Chairman, may I speak briefly to that?

The Chairman: Mr. McGrath?

Mr. McGrath: I, too, was interested in raising the same subject as my colleague this morning, because, as you know, we had very extensive and exhaustive hearings and investigations in the Maritimes and in Newfoundland. This was one of the principal subjects under discussion.

I think it will be generally agreed that the most controversial matters that we had on our agenda for study were the Maritime Freight Rates Act (MFRA) and the freeze, the causeway to Prince Edward Island and the passenger rail service in Newfoundland.

It is a matter of great regret to me that the

• 0940

government made their decision and their announcement in the House last week before the Committee has had a chance to study the evidence it heard in Prince Edward Island and to make its recommendations. All we heard about on the Island was the causeway.

I feel, as does Mr. Rose, that I do not want to waste my time on this Committee if this is how things are going to be done, and we are just here for window-dressing.

We have several other important items to study, on which we hope to make recommendations, and I would like you to get some assurance from the government, Mr. Chairman, if this is a proper suggestion, that they will not take any other decisions on any other matters which this Committee is studying at the present time and on which we may make recommendations.

The Chairman: What exactly is it you want me to do?

Mr. McGrath: If there is agreement, I would ask you to speak to the government on this—to the Minister of Transport especially and other ministers involved—and get their assurance that no other such decisions will be made until the Committee has had a chance to make its recommendations; and that the Committee regrets that the government made this decision last week before the Committee had an opportunity to weigh the evidence it heard about the causeway and to make a recommendation thereon.

Mr. McCleave: If I may raise another point, Mr. Chairman, there is the rapidly approaching date of March 23, and the question of possible extension of the Maritime Freight

[*Interpretation*]

M. McGrath: J'aimerais parler brièvement de cette question de privilège.

Le président: Monsieur McGrath?

M. McGrath: Moi aussi, je voulais soulever la même question que mon collègue ce matin, car, comme vous le savez, nous avons eu un voyage et des séances très épuisantes, très complètes dans les Maritimes. C'était l'une des principales questions à l'étude à ce moment-là. Je crois que tous seront probablement d'accord que l'une des questions les plus controversées que nous avions à notre programme de travail était la Loi sur les taux de transport des marchandises dans les provinces Maritimes, le gel des tarifs de transports des marchandises ainsi que la chaussée vers l'Île-du-Prince-Édouard et le service voyageurs à Terre-Neuve. Je trouve très regrettable le fait que le gouvernement ait pris sa décision et l'ait annoncée à la Chambre la semaine dernière avant que le Comité ait eu l'occasion d'étudier les témoignages qu'il a entendus à l'Île-du-Prince-Édouard, et de présenter ses recommandations. Tout ce dont on a entendu parler là-bas, c'est de la chaussée.

Tout comme monsieur Rose, je ne voudrais pas perdre mon temps ici au Comité, si c'est la façon dont se passent les choses et si nous ne servons que de parures. Nous avons d'autre part plusieurs autres questions importantes à étudier et sur lesquelles nous allons formuler des recommandations. J'aimerais donc avoir une assurance de la part du gouvernement, par votre entremise, monsieur le président, si c'est une suggestion pertinente, qu'aucune autre décision ne sera prise sur les autres questions étudiées par notre Comité à l'heure actuelle et sur lesquelles nous pourrions formuler des recommandations.

Le président: Que voulez-vous exactement que je fasse?

M. McGrath: Si tout le monde est d'accord, je vous demanderais de parler au gouvernement et surtout au ministre des Transports et à d'autres ministres pour obtenir leur assurance qu'aucune autre décision de ce genre ne sera annoncée avant que le Comité n'ait eu l'occasion de formuler ses recommandations et que le Comité regrette que le gouvernement ait pris cette décision la semaine dernière avant que notre Comité ait eu l'occasion d'évaluer les témoignages entendus dans les Maritimes au sujet de la chaussée et de faire les recommandations à ce sujet.

M. McCleave: J'ai un autre point, aussi, monsieur le président, et c'est la date du 23 mars qui approche très vite maintenant et la possibilité de prolonger la Loi sur les taux de

[*Texte*]

Rates Act until the Committee has had a chance really to go into a long-term study and make recommendations.

As you know, I am here this morning simply because Mr. Nesbitt is away. I presume that the Committee would want the people who really did the work in the Maritimes to be part of that discussion and to draw up the recommendations, but is it the feeling of the members of the Committee who are here this morning that some statement or recommendation should be made now with regard to the March 23 date and the operations of the Maritime Freight Rates Act?

I realize that the Atlantic Premiers have made somewhat broader suggestions. They would like to have the rebates extended to all modes of carriage, not just to railways. But I presume that the remedy that the Committee might want to suggest would simply be to continue as at present until it had a chance to examine the over-all situation.

Mr. Breau: Mr. Chairman, relative to the causeway, I do not think this Committee was sent to the Maritimes to decide on, or to study the feasibility of, the Causeway. Everybody here knows that the decision not to go ahead with the causeway was not made from a transportation point of view. Everybody knows that.

Mr. McGrath: The Committee had a reference from Parliament to study transportation in the Atlantic Provinces.

An hon. Member: That is right.

The Chairman: Order.

Mr. Breau: And the reason for not going ahead with the causeway now is a question of money it is a question of the cost of it. No one has said, from the transportation point of view that we do not need the causeway, therefore we can still make recommendations about the causeway when finances permit, and we might well go ahead with it. It would be a question of priority at that time; and we know that.

Mr. Skoberg: Mr. Chairman, I think, actually, we are probably all disappointed that the announcement was made by the government on the causeway, whether we agree with the economics of it or not. At least they

[*Interprétation*]

transport des marchandises dans les provinces maritimes jusqu'à ce que le Comité ait vraiment eu le temps d'en faire une étude à long terme et d'en arriver à une recommendation. Comme vous le savez, je suis ici ce matin parce que M. Nesbitt est absent. Je présume que le Comité voudrait que ceux qui ont vraiment travaillé dans les Maritimes prennent part à la discussion et rédigent les recommandations, mais est-ce que les membres du Comité qui sont ici ce matin trouvent qu'on devrait faire maintenant une déclaration ou formuler une recommandation au sujet de la date du 23 mars et de l'application de la Loi sur les taux de transport des marchandises dans les provinces maritimes.

Je constate que les premiers ministres des provinces atlantiques ont peut-être formuler de plus grandes suggestions. Ils voudraient que les abattements soient étendus non seulement aux chemins de fer, mais aux autres modes de transport. Mais j'imagine que le remède que le Comité voudrait proposer serait de continuer comme à présent jusqu'à ce qu'on ait eu le temps d'évaluer l'ensemble de la situation.

M. Breau: Au sujet de la chaussée, monsieur le président, je ne crois pas que le présent Comité ait fait la tournée dans les Maritimes pour décider si on devait ou non avoir la chaussée ou en étudier la praticabilité. Tout le monde ici sait que la décision de ne pas construire la chaussée n'a pas été prise du point de vue des transports. Tout le monde le sait.

M. McGrath: Le Comité était mandaté par le gouvernement pour étudier le problème du transport dans les provinces atlantiques.

Une voix: Oui, c'est exact.

Le président: A l'ordre.

M. Breau: Mais la raison pour laquelle on ne procède à la construction de la chaussée est une question d'argent tout simplement, en raison du coût. Personne n'a dit que c'était du point de vue des transports que nous n'avons pas besoin de la chaussée. Et par conséquent, nous pouvons toujours formuler des recommendations au sujet de la chaussée lorsque les finances le permettront, nous pourrions alors construire la chaussée. Ce serait une question de priorité à ce moment-là, et nous le savons.

M. Skoberg: Monsieur le président, je crois que nous sommes tous déçus du fait que l'annonce a été faite par le gouvernement au sujet de la chaussée, que nous soyons d'accord ou non avec l'économie du gouverne-

[*Text*]

could have waited until our report had been submitted and had given it consideration.

In relation to the MFRA rates could we have some clarification of the time involved in geting this Bill into the House, if the Bill is necessary to retain the freeze on these particular rates; and, if the extension is to be brought about, just what time is necessary there. I presume the President of he CTC could answer that when we get into the question period, unless you have the answer now, Mr. Chairman.

The Chairman: No, I have not. I did talk it

• 0945

over with the Minister and he told me he would give the House an answer very shortly. I could speak to the Minister again today, if that is the wish of the Committee.

Mr. Skoberg: Again, Mr. Chairman, with all respect, if the Minister is going to make an announcement to the House on his intention then I presume we might as well disband this Committee. There was no useful purpose in our going to the Maritimes at all if announcements are going to be made in the House without any recommendations from this Committee.

It is really a waste of the taxpayers' money to send us around the country when announcements are being made in the House without any consideration being given to what recommendations we may make.

The Chairman: If you and the Committee will allow me, I will ask Mr. Pickersgill. Perhaps he could give us an answer on that.

The Honourable J. W. Pickersgill (President, Canadian Transport Commission): This is not really just a question of the situation. The freeze and the Maritime Freight Rates Act are very often confused. The freeze has absolutely nothing to do with the Maritime Freight Rates Act. The freeze is a freeze of the ordinary rates charged by the railway—class rates and non-competitive commodity rates. By law it will expire on March 23, unless some arrangement is made about it.

If the Committee wished to make any recommendation on that narrow question that could be effective, bearing in mind the date, I assume it would have to make it very quickly.

[*Interpretation*]

ment. On aurait pu au moins attendre notre rapport afin de l'étudier avant. Au sujet des tarifs en vertu de la Loi sur les taux de transport des marchandises dans les provinces maritimes, pourrions-nous avoir quelque éclaircissement au sujet du temps en cause pour présenter ce projet de loi à la Chambre, si ce projet de loi est nécessaire pour maintenir le gel sur ces taux particuliers, et si on doit prolonger le délai, quel serait le temps en cause à cet égard? Je présume que le président de la Commission canadienne des transports pourrait peut-être nous répondre à ce sujet-là, pendant la période de questions, à moins que vous ayez la réponse vous même, monsieur le président.

Le président: Non, je ne l'ai pas. J'en ai parlé au ministre et il m'a dit qu'il aurait une réponse sous peu. Je pourrais peut-être lui parler encore aujourd'hui, si c'est le désir du Comité.

M. Skoberg: Encore une fois, monsieur le président, sauf votre respect, si le ministre doit faire une annonce à la Chambre au sujet de ses intentions, nous pourrions peut-être tout simplement annuler le Comité. Encore une fois, il n'a pas été utile pour nous de nous rendre dans les Maritimes du tout si on doit faire une annonce à la Chambre sans recevoir les recommandations de notre Comité. C'est tout simplement gaspiller l'argent des contribuables du pays que de nous envoyer promener dans le pays sans tenir compte de nos recommandations.

Le président: Si vous et le Comité me le permettez, je demanderais peut-être à M. Pickersgill, il nous donnera peut-être la réponse à ce sujet.

L'hon. J. W. Pickersgill (Président de la Commission Canadienne des Transports): Ce n'est pas tout simplement une question de la situation. Le gel et la Loi sur les taux de transport des marchandises dans les provinces maritimes font souvent l'objet de confusion. Le gel n'a rien à voir avec cette Loi. Le gel se trouve à être un gel des taux ordinaires chargés par les chemins de fer sur les taux de classe et de catégorie non-concurrentiels. Si on tient compte de la Loi, ces taux se termineront le 23 mars à moins qu'on prenne des dispositions à ce sujet.

Si le Comité voulait formuler, sur cette question épineuse, une recommandation qui soit efficace, étant donné la date, il devrait le faire très rapidement. Mais en ce qui concerne la Loi sur les taux de transport des

[*Texte*]

So far as the Maritime Freight Rates Act is concerned it was enacted in 1927; was amended in 1957; and is a continuing statute until Parliament changes it. Therefore, the two things are in entirely different categories.

Mr. Skoberg: Mr. Chairman, further to my question, perhaps Mr. Pickersgill could suggest to this Committee what is immediately necessary now to extend the freeze?

Mr. Pickersgill: All I can say is that I have seen the letter from Premier Robichaud on behalf of the four premiers, and Mr. Hellyer's reply to it. That letter is a public document, and, in fact, I think it was brought before your Committee in Fredericton.

The Chairman: No, we did not see that.

Mr. Pickersgill: In any case, I believe it has been made public. It certainly was the other day in one of the Atlantic briefs in which they said they would like the freeze continued until the government's broad policy is brought down.

There are two ways in which it could be continued. One is by legislation and the other is by an agreement with the railways. If the railways undertook not to raise the rates it would not be necessary to legislate.

I am just trying to be a little helpful to the Committee with the background, because it is not really our business at all; it is the government's business.

The Chairman: But I believe, a bill will still have to be presented in the House?

Mr. Pickersgill: Not necessarily; eventually there would have to be some provision if there was compensation to be given to the railways.

Mr. Rose: I wish to ask Mr. Pickersgill, through you, Mr. Chairman, if it would be suitable if a recommendation from this Committee to the House were tabled?

Mr. Pickersgill: I really do not think there in any point in asking me to go beyond what I ought to. I am not even a Member of Parliament.

Mr. Rose: You are still very agile, though, sir.

[*Interprétation*]

marchandises des provinces maritimes, elle a été mise en vigueur en 1927, elle a été modifié en 1957, c'est une loi continue et permanente jusqu'à ce que le Parlement la change. En conséquence, les deux choses sont tout à fait différentes.

M. Skoberg: Monsieur le président, pour faire suite à ma question, peut-être M. Pickersgill pourrait-il suggérer au Comité ce qui est nécessaire immédiatement afin de prolonger ce gel?

M. Pickersgill: Tout ce que je peux dire c'est que j'ai vu la lettre du premier ministre Robichaud au nom des quatres premiers ministres, et la réponse de M. Hellyer. Cette lettre est un document public, de fait, et je sais qu'elle a été portée à l'attention de votre Comité à Fredericton.

Le président: Non, nous n'avons pas vu cette lettre.

M. Pickersgill: De toute façon, je crois qu'elle a été rendue publique. Elle l'a certainement été l'autre jour dans l'un des mémoires des provinces atlantiques, où l'on disait qu'on voudrait que le gel soit prolongé jusqu'à ce qu'on fasse la déclaration au sujet de la politique du gouvernement. Il y a deux façons de procéder. Tout d'abord, par une mesure législative et deuxièmement par entente avec les chemins de fer. Si les chemins de fer décidaient de ne pas augmenter les taux, ce ne serait pas nécessaire d'avoir une mesure législative à cet égard.

J'essaie tout simplement d'aider le Comité et vous donner l'historique de la chose, car ce n'est vraiment pas à nous, c'est au gouvernement de décider quoi faire.

Le président: Et je crois qu'il faudrait tout de même présenter un projet de loi à la Chambre.

M. Pickersgill: Pas nécessairement. A la longue, il faudrait certainement quelque disposition s'il y avait une rénumération à accorder.

M. Rose: J'allais demander à M. Pickersgill, par votre entremise, monsieur le président, s'il serait convenable qu'une recommandation de ce Comité à la Chambre soit déposée.

M. Pickersgill: Je crois que vous me demandez d'aller au-delà de ce que je devrais faire, car je ne suis même pas député.

M. Rose: Vous êtes toujours aussi actif quand même.

[*Text*]

Mr. McGrath: Mr. Chairman, I understood that the steering committee had agreed to make an interim report, bearing in mind this March 23 date?

The Chairman: We did have a steering committee meeting, but it was understood that the Committee would be making an interim report.

Mr. McGrath: It is something we could do very quickly, because as I sense it there seems to be a consensus of the Committee on this.

The Chairman: Mr. McGrath, if you will allow me, we intend to sit next week to prepare our interim report. That report can be prepared only by myself and by the Committee, with your suggestions.

Mr. Horner: I have just one question, Mr. Chairman. I would like to follow up Mr. Pickersgill's suggestion. If there was unanimous

• 0950

agreement by the railroads not to increase freight rates after March 23 that would give the government a limited time, say, two more months, in which rates would not go up and no act would be really necessary. That would give the government and this Committee more time to make a detailed study and to report on the subject.

Mr. Pickersgill, to your knowledge, has there been any consultation along these lines, through the Canadian Transport Commission or otherwise, to ascertain the railroads' feelings in this?

Mr. Pickersgill: Mr. Horner, I think you will appreciate the position I would put myself in by answering that question.

I am not the spokesman for the government. That question should be addressed to the Minister of Transport.

Perhaps you can read certain inferences in my answer, but I do not think I ought to presume above my station.

Mr. Horner: Have the railroads contacted you on holding the line on freight rate increases and what your Commission would do about the compensatory factor that enters into all freight rate settings?

Mr. Pickersgill: I think I can say that there has been no approach made by the railways to the Commission as such.

[*Interpretation*]

M. McGrath: Monsieur le président, j'avais compris que le comité de direction devait rédiger un rapport intérimaire en tenant compte de cette date limite du 23 mars.

Le président: Oui, nous avons eu une réunion du comité de direction mais il était entendu que le Comité rédigerait un rapport intérimaire.

M. McGrath: Il faudrait le faire assez rapidement car si j'ai bien compris, les membres du Comité sont d'accord.

Le président: Monsieur McGrath, si vous voulez bien me permettre, nous avons l'intention de siéger la semaine prochaine pour préparer notre rapport intérimaire. Ce rapport ne peut être rédigé que par moi-même et le Comité, à la lumière de vos suggestions.

M. Horner: Une dernière question, monsieur le président, juste pour faire suite à la suggestion de M. Pickersgill. S'il y avait consentement unanime de la part des chemins de fer de ne pas augmenter les taux de transport des marchandises passé le 23 mars, cela donnerait au gouvernement un temps défini, mettons deux mois, pendant lesquels les taux ne seraient pas augmentés, et aucune loi ne serait nécessaire. Cela donnerait au gouvernement et à notre Comité plus de temps pour faire une étude détaillée et un rapport sur le sujet. J'aimerais demander à M. Pickersgill, s'il y a eu consultation à cet égard, à sa connaissance, grâce à la Commission canadienne des transports ou autrement, pour essayer de déterminer ce que pensent les chemins de fer à ce sujet.

M. Pickersgill: Monsieur Horner, je crois que vous comprendrez facilement la situation dans laquelle je me trouverais si je répondais à cette question.

Je ne suis pas le porte-parole du gouvernement. Cette question devrait être adressée au ministre des Transports. Vous pourriez peut-être conclure certaines choses d'après la réponse que je vous donnerais, mais tout de même, je ne pense pas que je devrais présumer au-dessus de ma position.

M. Horner: Est-ce que les chemins de fer se sont mis en communication avec vous à l'égard d'un gel des tarifs de transport des marchandises, et que ferait votre Commission au sujet de la compensation dont il faut tenir compte dans toute réduction des tarifs?

M. Pickersgill: Je crois que je puis dire que les chemins de fer n'en ont pas encore touché mot à la Commission en tant que telle.

[*Texte*]

Mr. McCleave: We have a problem, Mr. Chairman. If the report is going to be drawn up next week then we are getting very close to the deadline. We also have the problem raised by many members, that if the government suddenly comes out and acts now it may, because of this causeway incident, be afraid that it would be treading on the toes of members. However, I think there is a general consensus that we want the freeze continued in some way and perhaps this could be communicated to the Minister of Transport now, even in advance of the drafting of an interim report by the Committee.

In this way members would not feel that there had been any trampling on the privileges of the Committee if he should decide to take action before that report can be presented. I hope that is the consensus.

The Chairman: If the committee agrees, we may have a steering committee meeting after this meeting today. We could consult the Minister and we could report back to the Committee tomorrow or the day after, if it is the wish of the Committee.

Mr. McCleave: Could I ask Mr. Pickersgill a question on the legal basis of this. If the railways themselves took the step of, say, agreeing to continue the freeze for two more months, are there not still public funds involved to make up the difference and in that sense there probably would not have to be legislation.

The Chairman: As I told you a minute ago, there has to be a bill presented to the government...

Mr. McCleave: Or could it just be a gentlemen's agreement on the part of the railways?

Mr. Pickersgill: I think if the government followed the provisions of the National Transportation Act and the government of course should follow them unless the Act itself is amended in some way; it would be very improper for it not to—this would constitute, even if there was an agreement, an imposed obligation. Of course Parliament is sovereign and could decide in this particular case that it should not follow the Act, but I would not want to express any opinion about that. But, obviously, if there is to be compensation to the railways for continuing the freeze Parliament has to provide the compensation—the government cannot.

[*Interprétation*]

M. McCleave: Nous avons un problème, monsieur le président. Si nous déposons notre rapport la semaine prochaine, nous en serons pratiquement à la date limite. Plusieurs membres l'on mentionné, si le gouvernement agit dès maintenant, il peut, en raison de cette affaire de la chaussée, craindre de géner les membres du Comité. Mais, je crois qu'on est d'accord pour continuer le gel, et on pourrait peut-être le communiquer au ministre des Transports dès maintenant, même avant que nous rédigions un rapport intérimaire.

De cette façon, les membres du Comité n'auraient pas le sentiment qu'on a nui aux privilèges du Comité, s'il décidait d'agir avant qu'on présente ce rapport. J'espère que c'est ce que pensent les autres membres du Comité à ce sujet.

Le président: Si le Comité est d'accord, nous pourrions peut-être convoquer une séance du comité directeur après la séance d'aujourd'hui, et nous pourrions alors consulter le ministre et ensuite faire rapport au Comité, demain ou après-demain, si c'est le désir des membres du Comité.

M. McCleave: Puis-je poser à M. Pickersgill une question portant sur le point de vue juridique de cette affaire? Si les chemins de fer devaient prendre eux-mêmes l'initiative de continuer le gel encore deux mois, est-ce qu'il ne s'agirait pas encore de fonds publics, pour combler la différence, et, en ce sens, il ne serait probablement pas nécessaire d'avoir une mesure législative.

Le président: Comme je viens de vous le dire, il y a une minute, il faudrait présenter un projet de loi au gouvernement...

M. McCleave: Ou ne pourrait-il y avoir qu'une entente de la part des chemins de fer?

M. Pickersgill: Si le gouvernement devait suivre les dispositions de la Loi nationale sur les transports, et le gouvernement, évidemment, devrait les suivre, à moins qu'on modifie la Loi d'une certaine façon, ce ne serait pas bon qu'il fasse autrement, et cela constituerait, même avec une entente, une obligation, un engagement de sa part. Bien sûr, le Parlement est souverain et peut décider que, dans ce cas particulier, il ne doit pas se conformer à la loi, mais je ne voudrais pas exprimer une opinion à ce sujet. Évidemment, s'il doit y avoir une compensation versée aux chemins de fer pour continuer le gel, il faut que le Parlement leur rende cette compensation que le gouvernement ne peut leur accorder.

[*Text*]

Mr. McCleave: Otherwise we might find ourselves in one of these $1 item fields too, and I suppose we could do that.

Mr. Pickersgill: I doubt if $1 would satisfy the railways.

Mr. Horner: I would like to pursue a somewhat different line of questioning, if it is in order, Mr. Chairman.

Mr. Pickersgill, what trucking rates does your Commission examine, if any?

Mr. Pickersgill: None, because Part III has not yet been proclaimed.

Mr. Horner: Has there been any action motivated through your Commission to proclaim Part III of the National Transportation Act?

Mr. Pickersgill: There has been some discussion with interested parties, there has been some discussion on an informal basis, with the agreement of provincial governments, with provincial officials and in one or two cases, I believe, even with provincial ministers, with the approval of the Minister of Transport—and we have had some informal discussions with the Minister of Transport. But there has been no formal recommendation yet because we have felt that the undertaking of this would be a very formidable task and that we would want to be sure before Part III is proclaimed that we can perform efficiently the functions required after it is proclaimed.

Mr. Horner: Just on that question I would like to explain, Mr. Chairman, that there was a great deal of demand for the Maritime Freight Rates Act to be made applicable to the trucking industry as well as to the railroads, and that is the purport of my question.

If it is going to be made applicable to the trucking industry in the Maritimes than I ask you, Mr. Pickersgill, can the trucking industry be policed—that is a poor word, but for the want of a better one I will use it for now—and would it be fair to have one set of rates on the railroads examined thoroughly by your Commission and the other examined by no over-all transportation authority?

Mr. Rose: Mr. Chairman, on a point of order, I think that the line of questioning being pursued by Mr. Horner is a very important one, but I was under the impres-

[*Interpretation*]

M. McCleave: En d'autres termes, nous pouvons nous retrouver avec un de ces votes à un dollar, et je suppose que nous pourrions le faire.

M. Pickersgill: Je doute qu'un dollar satisfasse les chemins de fer.

M. Horner: J'aimerais maintenant passer à d'autres questions, monsieur le président, si cela est conforme au Règlement. Monsieur Pickersgill, quant au camionnage, quels taux la Commission examine-t-elle, si elle en examine?

M. Pickersgill: Aucun, car la partie III n'a pas encore été promulguée.

M. Horner: Est-ce qu'il y a eu une mesure motivée par votre Commission pour la promulgation de la partie III de la Loi nationale sur les transports?

M. Pickersgill: Il y a eu une certaine discussion avec les parties intéressées. Il y a eu une certaine discussion officieuse avec les gouvernements provinciaux, les fonctionnaires provinciaux, et dans un ou deux cas, je crois, même avec les ministres provinciaux, avec l'approbation du ministre des Transports. Et nous avons eu certaines discussions officieuses avec le ministre des Transports. Toutefois, il n'y a pas eu de recommandations officielles à ce sujet, car nous croyons que ce serait une tâche énorme que d'entreprendre la mise en vigueur de cette partie. Et nous voulons nous assurer, avant que la partie III soit promulguée, que nous pouvons travailler efficacement, après la promulgation.

M. Horner: Sur cette question, j'aimerais vous expliquer, monsieur le président, qu'il y a eu une forte demande pour que la Loi sur les taux de transport des marchandises dans les provinces Maritimes s'applique aux camions, ainsi qu'aux chemins de fer, et c'est la raison pour laquelle je pose la question.

Si on doit faire appliquer cette Loi à l'industrie du camionnage dans les Maritimes, alors, voici la question que je vous pose, monsieur Pickersgill: est-ce que l'industrie du camionnage peut être surveillée—l'expression n'est peut-être pas très heureuse, mais je l'emploierai quand même—est-ce que l'on pourrait surveiller cette industrie? Est-ce qu'il serait juste d'avoir un examen complet des tarifs de transport des chemins de fer par votre Commission, alors que les autres tarifs ne seraient pas examinés?

M. Rose: Monsieur le président, j'invoque le Règlement. Je crois que les questions posées par M. Horner sont très importantes, mais j'avais l'impression qu'il s'agissait sur-

[*Texte*]

sion that we were dealing with a question of privilege originally and then our discussion expanded and dealt with the matter of making an interim report through the steering committee to the Minister. I just wonder if Mr. Horner, for the sake of order, might hold his question. I imagine that Mr. Pickersgill has a presentation to make and then we are going to get on with the regular order of business. If this is not the case, then I will withdraw the point of order.

The Chairman: I thought the understanding I had a few minutes ago was that the steering committee would meet after this meeting today and that we would have an answer from the Minister this afternoon. I thought that would clear up your question, Mr. Rose.

Mr. Rose: Well, Mr. Chairman, that is fine if we have arrived at this consensus. I just felt that we were going off in all directions on various matters and perhaps that you might have an agenda or we might be going to proceed in another way.

The Chairman: No. If you remember, Mr. Rose, we were asked during our tour of the Maritimes the other day to have Mr. Pickersgill appear to answer some questions that were put by the Committee. Mr. Pickersgill does not have a brief to present. He is here to answer questions from members of this Committee.

Mr. Rose: Thank you.

Mr. Horner: Could Mr. Pickersgill answer my question with regard to rate setting on trucks or rate setting on railroads in the Maritimes?

Mr. Pickersgill: I think probably I really ought to say that even though I am no longer a minister it would still be dangerous for me to answer a hypothetical question. However, I want to be as helpful to the Committee as I can and, obviously, there would have to be some mechanism—and there is—for paying MFRA assistance to the railways. There is no mechanism now existent for paying MFRA or any other kind of assistance to any other mode of transport and there would have to be some kind of legal provision made for doing that—and whether it would be done through the Canadian Transport Commission or in some other way would be a matter for the government to propose and Parliament to decide, I would think.

[*Interprétation*]

tout de questions de privilège tout d'abord et ensuite que la discussion s'est étendue au sujet de la question d'un rapport préliminaire à porter à l'attention du ministre. Et je me demandais tout simplement si M. Horner pourrait tout simplement attendre pour poser ses questions. J'imagine que M. Pickersgill a un exposé à nous faire et que nous allons poursuivre le marche normale de nos affaires. Si tel n'est pas le cas, je vais retirer alors mon appel au Règlement.

Le président: Je croyais qu'en vous donnant l'assurance qu'il y aurait une séance du comité directeur après notre séance d'aujourd'hui, nous aurions une réponse du ministre cet après-midi; je croyais que cela éclaircirait la situation, monsieur Rose.

M. Rose: Très bien, monsieur le président, si c'est là l'assentiment du Comité. Je croyais tout simplement que nous étudiions différentes questions et que vous aviez peut-être un ordre du jour, ou que nous allions procéder d'une autre façon.

Le président: Non. Si vous vous en souvenez bien, monsieur Rose, on nous a demandé, au cours de notre tournée des Maritimes, l'autre jour, si M. Pickersgill serait présent pour répondre à certaines questions posées par le Comité. M. Pickersgill n'a aucun mémoire à nous présenter. Il est ici tout simplement pour répondre aux questions que pourraient lui poser les membres de notre Comité.

M. Rose: Merci.

M. Horner: Est-ce que M. Pickersgill pourrait répondre à ma question au sujet des tarifs de transport pour les camions et les chemins de fer dans les Maritimes?

M. Pickersgill: Je crois que je devrais probablement dire que même si je ne suis plus ministre, il serait quand même dangereux que je réponde à une question hypothétique. Mais je veux être aussi utile et aider le Comité dans la mesure du possible. Évidemment, il faudrait qu'il y ait un mécanisme. Il y en a un qui existe pour accorder aux chemins de fer les subventions prévues par la Loi sur les taux de transport des marchandises dans les Maritimes. Toutefois, ce mécanisme n'existe pas, en vertu de cette Loi, pour tout autre mode de transport. Il devrait donc y avoir une disposition de la loi pour le faire, que cela se fasse par l'entremise de la Commission canadienne des transports ou autrement. C'est au gouvernement de proposer et au Parlement de décider de cette méthode.

[*Text*]

Mr. Horner: But you believe that a mechanism could be developed and without your body having any authority over truck rates you believe that it would still...

Mr. Pickersgill: Well, it certainly could be done theoretically. Now whether it would be considered by Parliament equitable to do it without having a kind of parity of treatment in other respects between the modes is a question that would have to be decided.

Mr. Horner: My question leads up to this, Mr. Pickersgill. It has long been my belief that the trucks charge as much as the railroads. In other words, the railroads are the price-setters in setting the freight rates and the trucks stay just a little bit below if possible. If it was theoretically and practically possible to pay the subsidy to the trucking industry would not the trucks just absorb that as profit and keep their rates just about where they are now in respect of the shipper?

The reason for that question, Mr. Chairman and Mr. Pickersgill is that there was a great deal of concern in the Maritimes should the Maritime Freight Rates Act subsidy, if one could put it that way, be paid to the transportation industry the trucks and the railroads and so on, or should it go to the actual shipper?

What I am saying is if we make it applicable to the trucking industry are we merely helping the trucking industry and not the shipper, and really the purport of the Maritime Freight Rates Act should be to help the shipper. He should be the net benefitter, as I see it not necessarily the transportation industry. You understand the reasoning and could you comment on that, Mr. Pickersgill?

Mr. Pickersgill: I think you have flattered me, Mr. Horner. It is not the business of the Canadian Transport Commission to make policy and the questions you have raised are very important and I think very, very difficult questions. It seems to me that only the Minister of Transport could propose such change to be made. He could make a proposal of that kind with the full authority of the government, and then it would have to be debated in parliament. I think it would be really a piece of impertinence on my part to try to anticipate what the conclusions of that

[*Interpretation*]

M. Horner: Mais vous croyez qu'un mécanisme pourrait être fondé, et sans que votre Commission ne soit chargée de la surveillance des tarifs de transport des camions. . .

M. Pickersgill: On pourrait le faire, en théorie. Maintenant, est-ce que le Parlement estimerait qu'il est équitable de le faire sans avoir égalité de traitement parmi les autres modes de transport? Voilà une question qui devrait être décidée.

M. Horner: La raison pour laquelle j'ai posé ma question, monsieur Pickersgill, c'est la suivante: j'ai cru depuis longtemps que les camions exigent des tarifs aussi élevés que les chemins de fer. En d'autres termes, les chemins de fer établissent les tarifs de transport de marchandises et les camions se tiennent juste un peu plus bas. Alors, s'il était possible, en théorie, et du point de vue pratique, de verser la subvention à l'industrie du camionnage, est-ce que l'industrie du camionnage n'absorberait pas cela tout simplement comme un profit et ne maintiendrait pas les tarifs à leur niveau actuel à l'égard de l'expéditeur?

La raison pour laquelle je vous pose cette question, monsieur le président, et monsieur Pickersgill, c'est qu'on s'est beaucoup préoccupé dans les Maritimes, à savoir si la subvention sur les taux de transport des marchandises dans les province Maritimes doit être versée à tous les modes de transport, soit camions ou chemins de fer, ou est-ce qu'on devrait la verser à l'expéditeur?

Et alors, ce que je dis c'est que si nous l'appliquons à l'industrie du camionnage, est-ce que nous aidons tout simplement l'industrie du camionnage et non l'expéditeur, et vraiment la Loi sur les taux de transport des marchandises dans les provinces Maritimes est destinée à aider l'expéditeur. A mon avis, il doit être le principal bénéficiaire et non pas nécessairement l'industrie des transports. Vous comprendrez alors mon raisonnement. Pourriez-vous, monsieur Pickersgill, nous donner un commentaire à ce sujet?

M. Pickersgill: Vous me flattez, monsieur Horner. Ce n'est pas à la Commission canadienne des transports d'établir la politique et les questions que vous venez de soulever sont très importantes, et, à mon sens, très difficiles aussi, très complexes. Il me semble que seul le ministre des Transports, si changement il doit y avoir, peut formuler une proposition qui recevrait l'autorisation du gouvernement et qui serait alors discutée par le Parlement. Ce serait probablement impertinent de ma part d'essayer d'anticiper ce que seraient les conclusions, ou de même de m'immiscer pour

[*Texte*]

would be or even to try to smuggle myself in to take part in the debate.

Mr. Horner: I think, Mr. Pickersgill, you are flattering me by suggesting that my questions are difficult and cannot be answered...

Mr. Pickersgill: No, no.

Mr. Horner: ...and I appreciate this.

Mr. Pickersgill: All I am saying is that you can answer but I cannot.

Mr. Horner: No, what I am saying is that we have to have from you all the advice possible in order to reach a decision. Should the subsidy go to the shipper or to the transportation industry? You say you cannot police the trucking industry? You say it is theoretically possible, you think, to pay them but a new mechanism would have to be set up. You did not convince me, sir, that in passing this subsidy on to the trucking industry there would actually be a reduction in freight rates to the shipper. Could you comment on that aspect?

Mr. Pickersgill: No, I really could not, because it seems to me that under our system of parliamentary government an official like me may have a duty to advise the minister but he should not try to substitute himself for the minister, and I would not wish to do that and I know, Mr. Horner, you would not want to put me in that kind of position.

Mr. Horner: I agree, Mr. Pickersgill. I would not like to but I also feel it is your duty before this committee to advise us, all the while not jeopardizing the minister's authority. Along this same line of questioning, could you give the committee—and this falls fully within the purport of your duties—or could you review to the committee what is meant by "compensatory rates" and "variable costs". This was all gone over about two years ago but I want the committee to fully know the definitions of those terms so that we can better ascertain for our own information the trucking rates and what-have-you.

Mr. Pickersgill: If I might, Mr. Taschereau is learned and I am not. I do not know that

• 1005

he can substitute himself for parliament but I would rather let him have a crack at the question than to try, myself.

[*Interprétation*]

participer au débat.

M. Horner: Je crois, monsieur Pickersgill, que vous me flattez, moi, à mon tour maintenant en me suggérant que mes questions sont complexes et que vous ne pouvez pas y répondre . .

M. Pickersgill: Non, non.

M. Horner: ... et je l'apprécie.

M. Pickersgill: Tout ce que je dis c'est vous pouvez y répondre, mais moi non.

M. Horner: Non, je veux dire que ce qu'il nous faut, donc que vous nous donniez tous les avis et conseils pour en arriver à une décision. Est-ce que les subventions doivent aller à l'expéditeur ou à l'industrie des transports? Vous dites que vous ne pouvez exercer la surveillance de l'industrie du camionnage. Vous dites qu'il est possible, sur le plan théorique, de le leur payer, mais il faudrait de nouveaux rouages. Mais je ne suis pas encore convaincus, monsieur, qu'en cédant cette subvention à l'industrie du camionnage il y aurait une diminution du tarif-marchandises à l'expéditeur. Vous comprenez? Pourriez-vous commenter là-dessus?

M. Pickersgill: Non, je ne saurais vraiment le faire, parce qu'il me semble qu'en vertu de notre système de gouvernement parlementaire, un haut fonctionnaire, comme moi, se doit de conseiller le ministre, mais non pas de se substituer au ministre, et, je ne voudrais pas le faire et je sais, monsieur Horner, que vous ne voudriez pas que je me trouve dans une telle situation.

M. Horner: J'en conviens, monsieur Pickersgill, mais je suis aussi d'avis que vous vous devez, en ce Comité, de nous conseiller sans mettre en danger, disons, l'autorité du ministre. Suivant la même ligne de question, pourriez-vous donner au Comité, si cela relève vraiment de vos fonctions, pourriez-vous donner au Comité ou pourriez-vous nous dire ce qu'on entend par «taux compensatoires» et «coûts variables»? Cela a été examiné il y a environ deux ans, mais je voudrais que le Comité sache vraiment quelles sont les définitions de ces termes pour que nous puissions mieux savoir ce qu'il en est des taux pour le camionnage.

M. Pickersgill: Je pense que M. Taschereau est qualifié. Moi, je ne le suis pas. Je ne sais pas s'il peut se substituer au Parlement mais je préférerais le voir essayer de répondre à cette question.

[*Text*]

Mr. Taschereau: The president has given me a qualification that I do not possess, unfortunately. In the National Transportation Act provisions have been made for defining what are compensatory rates.

The question of variable costs is one that is quite involved. It has given rise to public hearings recently and a judgment is expected soon by The Railway Transport Committee on that question defining the guiding principles in the matter of railway costing. That is still a matter before the commission and I hope it will be resolved very soon.

Mr. Horner: I am none the wiser, Mr. Chairman. I have a few more questions but I will ask one more now and then pass. I would like Mr. Pickersgill to look at Clause 3 of Section 16, page 10 of the National Transportation Act. I felt this clause had a great effect on the Maritimes by limiting the Maritime people as far as putting them in a position where they could have a fair hearing before your board. I ask you, Mr. Pickersgill and Mr. Taschereau, just to consider this point I am going to make. Looking at sub-clause (i)—I will read the first part:

> (3) In conducting an investigation under this section, the Commission shall have regard to all considerations that appear to it to be relevant, including, without limiting the generality of the foregoing,
>
> (a) whether the tolls or conditions specified for the carriage of traffic under the rate so established are such as to create...

This is dealing, Mr. Chairman, with a carrier appearing before the Canadian Transport Commission to ascertain whether a rate is in the public interest. Looking at sub-clause (i) it goes on to say:

> (i) an unfair disadvantage beyond...

and I want you to pay particular attention to that word "beyond"

> ...any disadvantage that may be deemed to be inherent in the location or volume of the traffic, the scale of operation connected therewith or the type of traffic or service involved,

Because of the particular location of the Maritimes, because of the volume of traffic being perhaps not as heavy as it should, I believe with the word "beyond" in there you pretty well limit the Maritime area from

[*Interpretation*]

M. Taschereau: Le président m'a présenté certaines qualifications que je ne possède pas, malheureusement. Dans la Loi nationale des transports, on a pris des dispositions aux fins de définir ce que sont les taux compensatoires.

La question de «coûts variables» en est une forte complexe. Elle a donné lieu à des audiences publiques et un jugement devrait être rendu par le Comité des transports ferroviaires sur cette question, aux fins de définir quels sont les principes pour nous guider pour ce qui est des coûts pour les chemins de fer. La Commission est toujours saisie de la question et nous espérons pouvoir la résoudre d'ici peu.

M. Horner: Je n'en sais pas plus qu'avant, monsieur le président. J'aurais quelques autres questions. Je vais en poser une autre maintenant et ensuite céder mon tour. Je voudrais que M. Pickersgill examine le paragraphe 3 de l'article 16, page 10, de la Loi nationale des transports, j'ai trouvé que ce paragraphe avait de très grands effets pour les Maritimes, en limitant les gens des Maritimes, en les empêchant d'être dans une situation où ils pourraient avoir une audience juste, équitable devant votre Commission. Je vous demande donc, monsieur Pickersgill et monsieur Taschereau, je voudrais donc étudier ce point, l'alinéa (i):

> (3) Lorsqu'elle fait une enquête en vertu du présent article, la Commission doit tenir compte de tous les facteurs qui lui semblent pertinents et notamment, sans limiter la portée générale de ce qui précède, voir
>
> *a*) si les taxes ou conditions spécifiées pour le transport de marchandises au taux ainsi établi sont telles qu'elles entraînent...

Et là, monsieur le président, il s'agit d'un transporteur qui comparaît à la Commission canadienne des transports afin de voir si le tarif est dans l'intérêt public. Ensuite on dit:

> (i) un désavantage injuste excédant...

et je veux vous souligner le mot «excédant»

> ... celui qui peut être considéré comme inhérent au lieu ou volume du trafic, à l'échelle des opérations y afférentes ou au genre de trafic ou de service en question.

Vu l'emplacement des Maritimes, vu le volume du trafic qui n'est pas aussi considérable qu'il devrait l'être, je pense que l'expression «excédant» se trouve à limiter la région des Maritimes et l'empêche vraiment

[*Texte*]

appearing and getting a fair hearing before your Commission. I want to make this suggestion to you, Mr. Pickersgill and if you do not want to comment on it now I would fully appreciate your position. I would like you to study Clause 16, though, because I firmly believe that if the word "beyond" were taken out would not the Maritime shippers have a fairer opportunity to appeal a rate before your Commission? I would appreciate it if, rather than give me a quick answer you were to study the point I am making.

Mr. Pickersgill: I do not mind giving you a quick answer to that. It will not be quite as brief as some quick answers are. The law was modified in 1927 by the Maritime Freight Rates Act. That Act is still in force and the purpose of that Act is precisely to alleviate, if not to cure, that disadvantage of geography. That was the whole purpose of the Act. That Act is still in force and, as it is an act of parliament dealing specifically with the point, it overrides this other provision which relates to the whole of Canada.

• 1010

It has been suggested, and that is one reason why, if I may go back to a little bit of history, we did not deal with this problem in the National Transportation Act because Mr. MacPherson had said in his report that it had not been studied adequately and the government of that time thought it had not been studied adequately. It has been studied a great deal since.

As I think you all know, the Atlantic Premiers made a presentation to the Minister of Transport only this week that they made public, and you people are making a study of this same problem yourselves. I think it was always anticipated that whatever would be done to amend or to replace the Maritime Freight Rates Act would obviously be for the same purposes as the Maritime Freight Rates Act, namely to overcome part of that geographical disadvantage. And if I may be so presumptuous as to make this suggestion, it seems to me that having regard to the principles of Maritime Freight Rates Act that would be the proper way to do it—to continue the special kind of provision that the Duncan Commission recommended in 1927 but to bring it up-to-date.

[*Interprétation*]

d'avoir une audience juste et équitable. Je me rends compte de votre situation. Je voudrais que vous étudiez cette question parce que je crois sincèrement que si on enlevait l'expression «excédant», si on enlevait simplement cette expression, étudiant attentivement cet article 16. Alors, est-ce que l'expéditeur des Maritimes n'aurait pas vraiment l'occasion de faire appel d'un taux à votre Commission? Évidemment, je comprendrais si vous ne répondriez pas immédiatement, mais que vous étudiiez ce point pour voir ce qu'il en est.

M. Pickersgill: Je puis répondre rapidement à cette question. Ce ne serait pas peut-être aussi bref que certaines réponses données assez rapidement. La Loi a été modifiée en 1927 par la Loi sur les taux de transport des marchandises dans les Maritimes. Cette Loi est toujours en vigueur et, son but est exactement pour alléger, sinon obtenir ou faire disparaître le désavantage sur le plan géographique. Et, c'était là le but de cette Loi qui est toujours en vigueur et comme c'est une Loi du Parlement qui traite essentiellement de ce point, donc, elle outrepasse cette autre disposition, en autant où cela a trait à l'ensemble du Canada.

Eh bien, on a dit et c'est une des raisons pour lesquelles, si on me permet de refaire un peu l'histoire, c'est une des raisons pour lesquelles nous n'avons pas étudier ce problème dans la Loi nationale sur les transports parce que M. MacPherson l'avait dit dans son rapport, que cela n'avait pas été étudié de façon adéquate et le gouvernement d'alors croyait que cela n'avait pas été fait, mais cela a beaucoup été étudié depuis.

Vous savez tous, je pense, que les premiers ministres de l'Atlantique en ont fait un compte-rendu au ministre des Transports, et qui n'a été rendu public que cette semaine. Et vous étudiez vous-même ce même problème. Je pense que l'on a toujours prévu que, tout ce qui sera fait en vue de modifier ou de remplacer la Loi sur les taux de transport des marchandises dans les provinces Maritimes servirait, de toute évidence, sera fait aux mêmes fins que la Loi, soit aux fins de surmonter une partie des désavantages géographiques. Si je puis me permettre de faire une suggestion, il me semble qu'en tenant compte des principes de la Loi sur les taux de transport des marchandises dans les provinces Maritimes, ce serait la vraie façon de procéder, pour maintenir la sorte de dispositions spéciales que la Commission Duncan a recommandées en 1927, mais les mettre à jour.

[*Text*]

Mr. Horner: In this same transportation act it states that the Maritime Freight Rates Act is going to be limited to two years extension.

Mr. Pickersgill: Oh no. What is continued until March 23 is not the Maritime Freight Rates Act in which there is no change; it is the freeze that was put on rates when you were a supporter of the government.

Mr. Horner: In 1959.

Mr. Pickersgill: And that freeze was removed for all the rest of Canada when, on March 23, 1967, it was retained for two more years in respect of the Atlantic regions. That is what expires and that is all that expires on March 23.

Mr. Horner: You are suggesting no carrier within the Maritime freight rates area can appeal before your Commission with regard to a rate that they feel is too high even under the Maritime Freight Rates Act.

Mr. Pickersgill: You mean "shipper", do you not?

Mr. Horner: Shipper, yes.

Mr. Pickersgill: Oh no, this is of general application to the whole of Canada—

Mr. Horner: This is what I thought.

Mr. Pickersgill: —and they can appeal.

Mr. Horner: That is what I thought. Now what you are saying to me is that the Maritime Freight Rates Act does enough for the Maritimes, that the word "beyond" should remain in there because they do not need to apply—

Mr. Pickersgill: I think what happens, Mr. Horner, is that the rates are set and then the rate in respect of outbound traffic from the Atlantic region is reduced by 30 per cent. That is the way it is done—and the reduction by that 30 per cent is intended precisely to take account of the geographical disadvantage. Now that is the law as it is now, and a lot of people think it should be changed and improved.

Mr. Horner: All I am saying is that the rate is reduced 30 per cent. So you up the rate that other 30 per cent and then reduce it and then you are back where you should be. You know what I mean—unless the shipper has

[*Interpretation*]

M. Horner: Dans cette même Loi sur les transports, il est stipulé que la Loi sur le taux de transport des marchandises dans les provinces Maritimes ne serait prolongée que pour deux ans.

M. Pickersgill: Non, ce qui est maintenu jusqu'au 23 mars, ce n'est pas la Loi sur les taux de transport des marchandises dans les provinces Maritimes où il n'y a aucune modification, mais c'est le gel imposé sur le tarif lorsque vous appuyez le gouvernement.

M. Horner: En 1959.

M. Pickersgill: Et ce gel a été enlevé pour tout le reste du Canada, quand le 23 mars 1967, il a été maintenu pour deux autres années pour les régions de l'Atlantique. C'est ce qui prend fin, et c'est tout ce qui expire le 23 mars.

M. Horner: Vous dites qu'aucun transbordeur dans la région des Maritimes assujettie au tarif marchandises ne peut faire appel à votre Commission au sujet d'un tarif qui, à leur avis, est trop élevé, même en vertu de la Loi sur les taux de transport des marchandises dans les provinces maritimes.

M. Pickersgill: Vous parlez d'un expéditeur, n'est-ce pas?

M. Horner: Oui.

M. Pickersgill: Non, cela s'applique à l'ensemble du pays.

M. Horner: C'est ce que je croyais.

M. Pickersgill: Et ils peuvent faire appel.

M. Horner: C'est ce que je croyais. Vous me dites que la Loi sur les taux de transport des marchandises dans les provinces maritimes fait suffisamment pour les Maritimes, que l'expression «excédant» devrait y demeurer, parce qu'ils n'ont pas besoin de faire une demande.

M. Pickersgill: Monsieur Horner, je crois que ce qui se produit, c'est que les taux sont fixés et pour ce qui est du trafic extérieur des Maritimes est diminué de 30 p. 100. C'est la manière dont cela se fait et cette diminution de 30 p. 100 vise essentiellement pour tenir compte des désavantages géographiques. C'est la loi telle qu'elle se présente actuellement, et bien des gens croient que cela devrait changer et être amélioré.

M. Horner: Tout ce que je dis, c'est que le taux est diminué dans une proportion de 30 p. 100. Donc vous haussez le taux d'un autre 30 p. 100, vous le réduisez ensuite et vous revenez au point où vous deviez être. Vous savez

[*Texte*]

the right to appear and has a fair and equitable right to appear. But with the word "beyond" in Clause 3 it limits him. I would like you to consider that—it limits the Maritime shipper.

Because of his location, because of the volume of traffic and the scale of operation it limits his ability, in my estimation after a careful study of the Maritime problems and a trip down there, to readily appear before your Commission. I would like you to consider the whole aspect of clause 16 with the word "beyond" removed from that paragraph—in light of the Maritime location, their volume and scale of operation.

• 1015

Mr. Pickersgill: Well, I would be very glad to consider it but I suggest that perhaps it would be more appropriate to have it considered by those people who could do something about it.

Mr. Horner: Yes, but with your advice we would be in a better position to do something about it. You understand?

Mr. Pickersgill: I understand.

The Chairman: Mr. Rock?

Mr. Rock: Mr. Pickersgill, what jurisdiction does your commission have over coastal shipping, ferry service and shipping in general, ocean and lake shipping?

Mr. Pickersgill: I think, once again, I would prefer to have Mr. Taschereau give an answer to that question, because it is a question I could not answer.

Mr. Taschereau: In general, sir, I would say that this jurisdiction appears in Subsection 2 of Section 15 of the National Transportation. It is a jurisdiction that mostly relates not to regulation but rather to investigation and examination of economic features of shipping services. It says:

> (2) The Commission may examine into, ascertain and keep records of, and make appropriate reports to the Minister on,
>
> (a) the shipping services between Canadian ports...

and so on.

> (c) the cost of marine insurance,..

[*Interprétation*]

ce que je veux dire, à moins que l'expéditeur ait le droit de comparaître et ait un droit juste et équitable de comparaître, mais l'expression «excédant» vient poser des limites à l'article 3. Je voudrais donc que vous teniez compte de ce fait.

En raison de son emplacement, dû au volume de trafic et l'envergure de son exploitation, cela limite, à mon avis, après avoir étudié attentivement les problèmes des Maritimes et un voyage dans cette région, sa capacité de comparaître devant votre Commission. Je voudrais que vous teniez compte de tout l'aspect de l'article 16, avec la suppression de cette expression «excédant», à la lumière de leur emplacement dans les Maritimes, de leur trafic et de leur échelle d'exploitation.

M. Pickersgill: Je serais très heureux d'en tenir compte, mais je crois qu'il serait peut-être plus approprié que les personnes qui peuvent faire quelque chose à ce sujet en tienne compte.

M. Horner: Mais, en suivant vos conseils, nous pourrions être mieux en mesure de faire quelque chose. Vous comprenez?

M. Pickersgill: Oui, je comprends.

Le président: Monsieur Rock?

M. Rock: Monsieur Pickersgill, quelle compétence a votre Commission en matière de navigation de cabotage, de service de transbordeur et de navigation en général, sur l'océan et sur les lacs?

M. Pickersgill: Je préférerais encore que monsieur Taschereau réponde à votre question, parce que je ne saurais le faire.

M. Taschereau: Règle générale, je dirais que cette compétence figure au paragraphe (2) de l'article 15 de la Loi nationale sur les transports. C'est une compétence qui a trait essentiellement, non pas au règlement mais plutôt aux enquêtes, aux études des caractéristiques économiques des services de navigation.

> (2) La Commission peut procéder à des examens, faire des constatations et tenir des registres ainsi que faire des rapport appropriés au Ministre au sujet
>
> a) des services de navigation, entre ports canadiens...

et ainsi de suite.

> c) du coût de l'assurance maritime...

[*Text*]

(d) the water transportation industry and undertakings and services directly related thereto;

(e) the terms, conditions and usages applying to transportation of goods and passengers by water within, into and from Canada;

and so on and so forth.

Mr. Rock: If a coastal shipper, shipping from some of the ports of Canada to the Caribbean Islands wanted to discontinue that service have you any authority to force him to continue that service?

Mr. Taschereau: In my opinion, no.

Mr. Rock: Now, the reason that I am asking is because of what happened to the Saguenay cruises in the past. I think Mr. Pickersgill remembers that. He told me that there is very little, if any, jurisdiction we have over forcing them to remain in service. There was also a complaint about one firm discontinuing service to the Caribbean and it was found that there was no jurisdiction.

Do you not feel that there should be some jurisdiction to enable you to force shippers to remain in service? First of all, does your commission give them permission to ship, say, between the Caribbean and your ports in Canada?

Mr. Taschereau: The answer is no.

Mr. Rock: Is it the Department of Transport then?

Mr. Taschereau: I could not venture to say whether there has to be a licence, presumably, from the Department of Transport because I do not know.

Mr. Rock: Is it not the same then as air traffic?

Mr. Taschereau: No. If you are talking about commercial air services, these are licenced by the Commission. The former Air Transport Board used to perform that function but—

Mr. Rock: Yes.

Mr. Taschereau: —it is now the function of the Commission.

Mr. Rock: And yet there is no licencing required for shipping into our ports?

Mr. Taschereau: No—not by the Commission at least.

Mr. Rock: I found it sad that there were no regulations or law to force the owners of the

[*Interpretation*]

d) de l'industrie des transports par eau et des entreprises et services qui y sont directement rattachés;

e) des modalités et usages s'appliquant au transport par eau des marchandises et des voyageurs à l'intérieur, à destination ou en provenance du Canada;

et ainsi de suite.

M. Rock: Si un expéditeur de navigation de cabotage, faisant la navette entre quelques ports du Canada et les îles des Caraïbes, désire mettre fin à ce service, est-ce que vous pouvez le forcer à maintenir ce service?

M. Taschereau: A mon avis, non.

M. Rock: En posant cette question, je pense aux croisières du Saguenay dans le passé. Je crois que monsieur Pickersgill, s'en souvient. Il m'a dit que nous avons très peu, s'il en est, de pouvoir pour exiger qu'ils maintiennent ce service. Il y a aussi lu un grief au sujet d'une société qui fait disparaître son service à destination des Caraïbes. On a trouvé que nous n'avions auncun pouvoir dans ce domaine. Ne croyez-vous pas que nous devrions être nantis d'un certain pouvoir pour forcer les expéditeurs à rester en service. Tout d'abord, est-ce que votre Commission leur donne l'autorisation de naviguer, disons, entre les Caraïbes et les ports du Canada?

M. Taschereau: La réponse est négative.

M. Rock: Est-ce alors le ministère des Transports?

M. Taschereau: Je ne pourrais dire s'il faut un permis du ministère des Transports car je n'en sais rien.

M. Rock: Alors, n'est-ce pas la même chose pour la circulation aérienne?

M. Taschereau: Non, si vous parlez des services aériens commerciaux, le permis est délivré par la Commission. L'ancien Comité des transports aériens remplissait ces fonctions avant, mais...

M. Rock: Oui.

M. Taschereau: Cela relève maintenant de la Commission.

M. Rock: Maintenant on n'exige aucun permis de navigation dans nos ports?

M. Taschereau: Non. La Commission ne délivre pas ces permis.

M. Rock: Je trouve malheureux qu'il n'y ait pas de règlements ou de mesures législatives

[*Texte*]

Saguenay ships to continue this beautiful cruise. Then I noticed during our trip that some shippers between the Caribbean and Canadian ports were able to discontinue service at anytime and no one had any jurisdiction to do anything about it. This is reason for my questions.

The Chairman: Mr. Trudel, on supplementary questions?

Mr. Trudel: Mr. Chairman, mine is supplementary to Mr. Horner's line of questioning. I understood from his questioning that the rates were increased 30 per cent and then 30 per cent was deducted, therefore the—

Mr. Horner: I said they could be. I did not say they were.

• 1020

Mr. Trudel: I wanted to find out if there was any indication that this was being done.

Mr. Pickersgill: Well I think the answer is that obviously in respect of the Atlantic region it has not been done because the rates are frozen.

Mr. Horner: Only certain types of rates.

Mr. Pickersgill: Well, the rates that are subject to regulations are frozen. The competitive rates are not subject to regulation in any part of Canada.

Mr. Horner: Well, from the point of view of compensatory they are.

Mr. Pickersgill: Well, yes. No one can undercut and try to put someone else out of business. That is true.

The Chairman: Does that answer your question, Mr. Trudel?

Mr. Trudel: Just one more along the same line. I believe that he mentioned also in the declaration that the truckers were able to compete within the freight structures that have been set now. Is that correct? Is my assumption correct? Yet he was asking for a subsidy to be directed to these people and they were able to compete and be below the rates that have been set now.

Mr. Pickersgill: I think perhaps this is only retaining a position taken by the truckers. The position taken by the truckers is that the payment of the 30 per cent rebate to the

[*Interprétation*]

pour forcer le propriétaire des navires qui faisaient les croisières dans le Saguenay, à continuer ce magnifique service. J'ai remarqué au cours de notre voyage que certains expéditeurs qui font la navette entre les ports des Caraïbes et du Canada, peuvent mettre fin à ce service à n'importe quel moment et que personne ne peut les en empêcher. Voilà pourquoi j'ai posé ces questions.

Le président: Monsieur Trudel, une question complémentaire?

M. Trudel: Monsieur le président, ma question entre dans la ligne des questions posées par M. Horner. J'ai cru comprendre à la suite de ses questions, qu'il y a eu une augmentation de 30 p. 100, des taux et ensuite une réduction de 30 p. 100. C'est pourquoi. . . .

M. Horner: J'ai dit qu'ils pourraient être. Je n'ai pas dit qu'ils l'étaient.

M. Trudel: Je voulais savoir sil n'y avait aucune preuve que cela était en voie de se réaliser.

M. Pickersgill: Je pense que la réponse est qu'évidemment pour la région de l'Atlantique, cela ne s'est pas fait, parce que les taux sont gelés.

M. Horner: Seulement certains types de taux.

M. Pickersgill: Les taux qui sont soumis aux règlements, sont gelés. Les taux concurrentiels ne font pas l'objet des règlements en aucune partie du Canada.

M. Horner: Du point de vue des indemnités, il y en a.

M. Pickersgill: Oui, personne ne peut enlever ou essayer de faire disparaître quelqu'un des affaires. C'est vrai.

Le président: Est-ce que cela répond à votre question, monsieur Trudel?

M. Trudel: Une seule autre dans la même ligne. Je pense qu'il a aussi mentionné dans sa déclaration que les camionneurs pouvaient concurrencer dans l'infrastructure du transport qui a été établi. Est-ce juste? Est-ce que mon hypothèse est exacte? Il demandait une subvention pour ces personnes et ils pouvaient concurrencer et être en dessous du tarif, qui est actuellement fixé.

M. Pickersgill: Je pense que ce n'est que retenir une position prise par les camionneurs à l'effet que le paiement de l'escompte de 30 p. 100 qui ne revienne qu'aux chemins de fer,

[*Text*]

railways only is unfair competition and that if the railway rates are to be rebated out of the Treasury by 30 per cent, the rates for other carriers should also be rebated.

Mr. Trudel: Thank you, Mr. Chairman.

The Chairman: Mr. McGrath.

Mr. McGrath: This is a new subject, Mr. Chairman. I have only a few short questions on it. First of all, has the Commission entertained an application or granted authority to increase the rates charged on the ferries between Prince Edward Island and the mainland?

Mr. Pickersgill: Between Prince Edward Island and the mainland? There has been no increase in the rates, to the best of my knowledge—and I checked this yesterday—though there may have been between the Minister of Transport or the Department of Transport and the government of Prince Edward Island some discussion of an informal character about this matter. But there has been no increase in these rates.

Mr. McGrath: My reason for asking is that it would have a bearing, presumably, on our recommendations or on our report because this point was made by the government of Prince Edward Island in their brief, Mr. Chairman, and the Premier expressed a great concern over the fact that a 50 per cent increase, I think, was being contemplated. I wanted to know if this was now being entertained by the Commission and if in fact authority had been granted.

Mr. Pickersgill: These rates, of course, are not set by the Commission; they are set by the Canadian National Railways in consultation with the government, if I remember correctly. They certainly are not set by the Canadian Transport Commission. It does not have the power at all to set these rates but we have been consulted about any proposals and what effect they would have on transport generally. It just so happens that the matter came to my personal attention yesterday and up to the present time, while there has been some discussion about these rates, there has been no decision.

Mr. McGrath: That answer is a little bit confusing, Mr. Chairman, for this reason—and Mr. Pickersgill will correct me if I am wrong. Certainly it used to be the function of the Maritime Transportation Commission to

[*Interpretation*]

soit une concurrence injuste et que si les tarifs provisoires allaient être amortis de 30 p. 100 pour les chemins de fer par le Conseil du Trésor, on devrait faire la même chose pour les autres transporteurs.

M. Trudel: Merci beaucoup, monsieur le président.

Le président: Monsieur McGrath?

M. McGrath: C'est une matière nouvelle, monsieur le président. J'ai quelques questions brèves à poser sur ce nouveau sujet. Tout d'abord, est-ce que la commission a été saisi d'une demande ou a le pouvoir de hausser les taux exigés sur les transbordeurs entre l'Île-du-Prince-Édouard et le continent?

M. Pickersgill: Entre l'Île-du-Prince-Édouard et le continent? Au meilleur de ma connaissance, et je l'ai vérifié hier, il n'y a pas eu de hausse des tarifs, même s'il a pu y avoir entre le ministre des Transports ou le ministère des Transports et le gouvernement de l'Île-du-Prince-Édouard des entretiens officieux à ce sujet, mais il n'y a pas eu d'augmentation de ces tarifs.

M. McGrath: La raison pour laquelle j'ai posé cette question, c'est que cela aurait des répercussions, j'imagine sur les recommandations et le rapport que nous ferons, parce que le gouvernement de l'Île-du-Prince-Édouard en a parlé dans son mémoire, et, monsieur le président, le premier ministre a exprimé son inquiétude devant le fait qu'on envisageait une augmentation de 50 p. 100, je pense. Je voulais savoir si la commission en avait été saisie et si, en fait, on l'avait accordé?

M. Pickersgill: Naturellement, ces tarifs ne sont pas fixés par la commission, ils sont déterminés par les chemins de fer nationaux du Canada de concert avec le gouvernement, si je me souviens bien. Ils n'ont certainement pas été établis par la Commission canadienne des Transports. Elle n'a pas le pouvoir de fixer ces tarifs mais nous avons été consulté au sujet du projet et de ses effets sur le transport en général. Il arrive seulement que la question m'a été signalée hier et jusqu'à présent, alors qu'on étudie ces tarifs, il n'y a pas eu de décision à cet égard.

M. McGrath: Cette réponse peut quelque peu porter à confusion, monsieur le président, pour cette raison, et monsieur Pickersgill me corrigera si je me trompe. Mais habituellement, la Commission des transports mariti-

[*Texte*]

supervise and control rates on federal subsidized ferry services.

Mr. Pickersgill: Yes, but these are not federally subsidized in the ordinary sense, except possibly the Woods Island-Cariboo ferry. These ferries, after all—the one to Newfoundland, the one to Prince Edward Island, and the *Bluenose*—are owned by the government of Canada. You may say that they do not collect as much in revenue as they cost to operate but they are not subsidized in the sense that many other water services are subsidized where a private carrier gets the subsidy.

Mr. McGrath: Just one other question, Mr. Chairman. Has the Commission received an application from Nordair and Eastern Provin-

• 1025

cial Airways regarding their announced merger?

Mr. Pickersgill: We have been given informally by representatives of both companies certain information about what they were proposing to do. I understand that the representatives from one of these companies are here to be witnesses this morning and I think it would perhaps be better for them to say what they have told us than for me. If there has been a formal application made to approve the acquisition of the shares of one of these companies by the other, it was made so late yesterday that I was not informed about it.

I do not want to mislead you in any way, Mr. McGrath. I believe there is every probability that such an application will be made but in the formal legal sense, I do not think it has been made yet.

Mr. McGrath: Since we are going to hear EPA, I might conclude by one other brief question, if I may, Mr. Chairman. Has the Commission received any complaints from any source, and more particularly from the government of Prince Edward Island, regarding the service provided by EPA to that province?

Mr. Pickersgill: I believe that from time to time there have been letters from various people. I am not sure that there have not been some representations made. I do not think anything was addressed to me personally but I think there have been some represen-

[*Interprétation*]

mes avait pour fonction d'exercer une surveillance et un contrôle des tarifs sur les services de transbordeurs subventionnés par le gouvernement fédéral.

M. Pickersgill: Il ne s'agit pas de services subventionnés par le gouvernement fédéral de la manière conventionnelle, sauf, peut-être, pour le transbordeur de l'Île Wood Cariboo. Ces transbordeurs après tout, celui à Terre-Neuve, celui de l'Île-du-Prince-Édouard, le *Bluenose* appartiennent au gouvernement du Canada. Vous pouvez dire qu'ils ne perçoivent pas autant de revenus que ce qu'il en coûte pour les exploiter, mais ils ne sont pas subventionnés, en ce sens qu'on bon nombre d'autres services maritimes ne sont pas subventionnés alors qu'un transbordeur privé obtient une subvention.

M. McGrath: Une seule autre question, monsieur le président. Est-ce que la commission a reçu une demande de la *Nordair* et de *Eastern Provincial Airways* quant à leurs projets de fusionnement?

M. Pickersgill: Nous avons reçu officieusement des représentants des deux compagnies, certains renseignements relatifs à leur projet. Je comprends que les représentants d'une de ces sociétés sont ici pour témoigner ce matin, et je pense qu'il serait préférable pour eux de dire ce qu'ils nous ont dit, que pour moi. S'il y a eu une demande faite en bonne et due forme, pour approuver l'achat des actions d'une de ces sociétés par l'autre, cela a été fait si tard hier, que l'on ne m'en a pas encore fait part.

Je ne veux pas vous induire en erreur, monsieur McGrath. Je pense qu'il est très possible qu'une telle demande soit faite, de façon officielle, mais je ne crois que cela ait été fait.

M. McGrath: Vu que nous entendrons les témoins de l'EPA, je pourrais peut-être conclure avec une autre question très brève, monsieur le président. Est-ce que la commission a reçu des plaintes de quelque source que ce soit, et tout particulièrement du gouvernement de l'Île-du-Prince-Édouard, au sujet du service assuré par l'EPA dans cette province?

M. Pickersgill: Je pense que, de temps à autre, nous avons reçu des lettres de différentes personnes. Je ne suis pas sûr qu'on ait fait des instances. Je ne crois pas qu'on m'ait adressé quoi que ce soit personnellement, mais je pense qu'il y a eu des instances mani-

[*Text*]

tations made about some concern as a result of the direct service between Charlottetown, Charlo and Montreal that this has had some effect, that it has caused some inconvenience to certain people wishing connections to Moncton. Certainly I have heard that.

Mr. McGrath: Has the Commission taken a look at it?

Mr. Pickersgill: We are taking a very careful look at it. We take a look at every complaint and we generally ask the carriers to explain these things because, after all, as you know every air carrier is operating under a licence. This is not an area where there is what you might call total free enterprise. They have a licence to operate and the purpose of giving them a licence is to assure the public decent service as far as it is possible to get it. We feel we have a duty, when anything is drawn to our attention or when we notice anything ourselves, to bring it to the attention of the airline, and if there is some validity in it, to do our best to see that they correct it.

The Chairman: Mr. Skoberg.

Mr. Skoberg: Mr. Chairman and Mr. Pickersgill, the Nova Scotia Fish Packers Association suggested that they had been notified by the railway of the discontinuance of shipments of fresh fish in other than leakproof containers. Do the railways have to come before your Commission to put in new regulations under your express traffic association tariff 100 in this regard and are they obligated to give considerable advance notice to these fish packers to change their system?

Mr. Pickersgill: I know for sure, Mr. Chairman, that I could not give an intelligent answer to that question but maybe Mr. Taschereau could.

Mr. Skoberg: Well, then, Mr. Pickersgill and Mr. Chairman I think the question should be: does this express traffic association tariff 100 have in itself any bearing on your Commission? Do you have any jurisdiction over this particular item?

Mr. Taschereau: I must say that I am not cognizant of the particular tariff that you are mentioning. Certainly the matter of rates

[*Interpretation*]

festant une certaine inquiétude à la suite d'un service direct entre Charlottetown, Charlo et Montréal, à savoir que cela aurait eu certains effets et aurait causé à certaines personnes des ennuis relatifs aux correspondances vers Moncton. Sûrement, j'en ai entendu parler.

M. McGrath: Est-ce que la commission a examiné la question?

M. Pickersgill: Nous étudierons très attentivement la question. Nous étudions chaque grief formulé et, règle générale, nous demandons aux transporteurs de nous donner une explication, car, après tout, vous savez, chaque transporteur aérien doit être titulaire d'un permis pour exploiter un service aérien. Il ne s'agit pas d'un secteur où il y a ce que l'on pourrait appeler la libre entreprise. Ils détiennent un permis pour exploiter ces services et le permis est délivré dans le but d'assurer au public un service satisfaisant dans la mesure du possible. Nous croyons que nous avons un devoir à remplir lorsqu'on nous signale quelque chose ou que nous-mêmes nous observions quelque chose, en le portant à l'attention de la ligne aérienne et si la plainte est valable, de voir à ce que la situation soit rectifiée.

Le président: Monsieur Skoberg.

M. Skoberg: Monsieur le président, monsieur Pickersgill, la *Nova Scotia Fish Packers Association* a souligné qu'ils avaient été avisés par la compagnie de chemins de fer de l'interruption des expéditions de poissons frais dans des contenants autres que des cadres étanches. Est-ce que les compagnies de chemins de fer doivent se présenter devant votre commission pour appliquer les nouveaux règlements en vertu de votre tarif 100 de l'association des messageries à cet égard, ou encore est-ce qu'ils sont tenus de donner un préavis assez long à ces fabricants de conserve, en vue de changer leur mode de transport?

M. Pickersgill: Je sais, avec certitude, monsieur le président, que je ne saurais répondre à cette question, mais monsieur Taschereau serait peut-être en mesure de le faire?

M. Skoberg: Alors, monsieur le président, je pense que la question devrait être la suivante: Monsieur le président et monsieur Pickersgill, est-ce que le tarif 100 de l'association des messageries a quelque rapport avec votre commission? Avez-vous quelque pouvoir vis-à-vis de cet article?

M. Taschereau: Je dois vous dire que je ne connais pas le tarif dont vous parlez. Sûrement, cette question des tarifs relève de notre

[*Texte*]

comes under our jurisdiction from the point of view of their being compensatory and from the point of view of the possibility of there being a maximum rate. If this has bene filed

• 1030

with the Commission we can very well check and see whether the Commission has to take any action. I would have to find out.

Mr. Skoberg: In other words, you are more concerned at this time with the rates and not with the regulations under the tariff such as a change in the system of shipping produce?

Mr. Taschereau: Well, we might be interested indirectly from the point of view of service to the public. You are talking about some regulations under the tariff.

Mr. Skoberg: This is right, yes Could you possibly look into that? Another question, Mr. Chairman. Mr. Pickersgill, there was some discussion on our trip as to whether or not the Governor in Council without petition may rescind any order, decision, rule or regulation of the Board and I refer specifically to the passenger service in Newfoundland.

Mr. Pickersgill: Again Mr. Taschereau is a lawyer and I am not; I will pass.

Mr. Taschereau: Could I have the question again?

The Chairman: Would you repeat your question Mr. Skoberg?

Mr. Skoberg: May the Governor in Council, in their discretion without petition rescind any order, decision rule or regulation of the Commission.

Mr. Taschereau: It is very clear to me that under Section 53 of the Railway Act the Governor in Council has the power to act of his own motion. I am quoting "of his own motion".

Mr. Skoberg: And further to this, Mr. Pickersgill, I understand the Canadian National has announced, and I have not seen it nor have I seen the news release on it, it will leave the Newfoundland passenger service in operation. Is this correct?

Mr. Pickersgill: I was told sometime yesterday afternoon, and I asked the information officer of the Commission to get from any reliable source he could a story that I had heard had been published in Newfoundland, and I have in front of me the text of a

[*Interprétation*]

compétence du point de vue de la compensation et de la possibilité d'être un tarif maximum. Si cela a été déposé auprès de la commission, nous pouvons le vérifier et voir si la commission doit prendre des mesures. Il faudrait que je vois ce qu'il en est.

M. Skoberg: En d'autres termes, vous êtes plutôt préoccupé en ce moment par les tarifs et non pas par les règlements en vertue de ce tarif, tel qu'une modification du mode de transport des marchandises?

M. Taschereau: Peut-être que nous y serons indirectement intéressés du point de vue de service publique. Vous parlez de certains règlements relevant du tarif.

M. Skoberg: C'est juste. Pourriez-vous étudier cette question, en voici une autre monsieur le président. Monsieur Pickersgill, au cours de notre voyage, nous avons discuté afin de voir si le gouverneur en conseil, sans pétition, peut abroger tout ordre, décision, règlement ou règle, la Commission, et là je me reporte au service voyageurs à Terre-Neuve.

M. Pickersgill: Monsieur Taschereau est avocat et je ne le suis pas. Je cède mon tour.

M. Taschereau: Est-ce que je pourrais entendre la question une fois de plus?

Le président: Pourriez-vous répéter votre question, monsieur Skoberg?

M. Skoberg: Est-ce que le gouverneur en conseil peut à sa discrétion et sans pétition, abroger tout ordre, décision, règle ou règlement de la Commission.

M. Taschereau: Cela me semble très clair qu'en vertu de l'article 53 de la Loi sur les chemins de fer, le gouverneur en conseil a le pouvoir d'agir de son propre gré. Je cite «de son propre mouvement»

M. Skoberg: Pour faire suite à cette question, monsieur le président, monsieur Pickersgill, je crois que les chemins de fer nationaux du Canada ont annoncé et je ne l'ai pas vu ou, je n'ai pas eu des nouvelles à ce sujet, qu'il continuerait le service voyageurs de Terre-Neuve. Est-ce juste?

M. Pickersgill: On m'a dit hier après-midi, et j'ai demandé à l'agent d'information de la Commission d'obtenir des renseignements de source fiable, au sujet de la publication à Terre-Neuve d'un communiqué de la presse canadienne de Saint-Jean (T.-N.) dont j'ai le

[*Text*]

Canadian Press despatch from St. John's, Newfoundland which, if you like, I could read into the record. All I am doing is reading a Canadian Press despatch but if that is agreeable I would be glad to read it.

> The CNR will continue operation of its trans-island passenger train in Newfoundland until some "indefinite" time after April 15, Fabian Kennedy, CN's operations manager, said Tuesday night.
>
> Mr. Kennedy said in an interview it was decided not to abandon the train April 15, the earliest possible date set last year by the Canadian Transport Commission.
>
> The commission ruled the train could be abandoned if the CNR established a satisfactory bus service across the province, but not before April 15. The bus service was started in December.
>
> Mr. Kennedy said reasons for the decision included the CNR's wish to operate the train and its new highway bus service between here

"here" would be St. John's

> and Port aux Baques, on the province's southwestern tip, for at least one full winter to compare services.
>
> "Our winters to not usually end in mid-April," he said.
>
> Mr. Kennedy said passenger volume of the bus service was "far exceeding what we had anticipated."
>
> Some of the bus units probably would be out of service in the next few months for routine adjustments and the railway wanted to ensure it could handle all passenger traffic during that period, he said.

That is the full despatch.

Mr. Skoberg: I would like to ask, would not the CNR be obligated to file with the Canadi-

• 1035

an Transport Commission their decision to leave the passenger service on in view of your order that this could be withdrawn on April 15?

Mr. Pickersgill: I would anticipate and I would hope that the Canadian National would give us some indication as well as giving it in a press statement, but so far as I know up to the close of business yesterday we had had no

[*Interpretation*]

texte devant les yeux. Je pourrais bien vous en donner lecture. Tout ce que je fais, c'est de vous donner lecture d'un communiqué de la presse canadienne, mais si vous voulez bien, je vous donnerai lecture avec plaisir.

> Mardi soir, M. Fabian Kennedy, gérant des opérations du CN a déclaré que le CN continuera l'exploitation du service voyageurs dans Terre-Neuve jusqu'à une date indéterminée après le 15 avril.
>
> M. Kennedy a déclaré au cours d'une interview qu'on avait décidé de ne pas abandonner le service le 15 avril, date fixée l'année dernière par la Commission canadienne des transports.
>
> La Commission a décidé que le service ferroviaire pourrait être abandonné à condition que le CN établisse un service d'autobus satisfaisant à travers la province, après le 15 avril. Le service d'autobus a été inauguré en décembre.
>
> M. Kennedy a donné les raisons de la décision et du désir du CN d'exploiter le service voyageurs et le nouveau service d'autobus entre ici

«ici» voudrait dire Saint-Jean,

> et Port-aux-Basques sur la pointe sud-ouest de la province pour au moins un hiver complet afin de pouvoir comparer les services.
>
> Il a déclaré ensuite que nos hivers d'habitude ne prennent pas fin à la mi-avril.
>
> M. Kennedy a dit que la clientèle des services d'autobus dépassait de beaucoup ce qu'ils avaient prévu.
>
> Certains autobus seraient probablement hors de service dans quelques mois pour une mise au point et les compagnies de chemins de fer veulent s'assurer qu'ils pourraient s'occuper du service voyageurs durant cette période.

Tel était le contenue du communiqué.

M. Skoberg: J'aimerais vous demander une question. Le CN ne serait-il pas tenu d'informer la Commission canadienne des transports de sa décision de maintenir un service voyageurs étant donné l'ordonnance suivant laquelle le service pourrait cesser le 15 avril?

M. Pickersgill: J'imagine et j'espère que la compagnie des chemins de fer Nationaux du Canada nous donnera une indication comme il donnera un communiqué de presse. Mais autant que je sache, jusqu'à la fin de la jour-

[*Texte*]

official world from them. But I would imagine they would do that.

Mr. Skoberg: In view of the type of winter that they have had in Newfoundland, and naturally in view of the fact that the bus service as indicated already has to be repaired, is the Canadian Transport Commission now giving consideration to rescinding this order that could be effective April 15? The reason I ask this, is that I do not think this is good enough, a press release or a statement such as made by the Canadian National, because it leaves the Province, it leaves the patrons, it leaves the employees completely in doubt and at any time after April 15, if this order is not rescinded—and you may correct me if I am not right in this respect—they could abandon that passenger service. Is the Commission at this time not considering rescinding the order that could discontinue that passenger service?

Mr. Pickersgill: There is perhaps some misunderstanding about what the actual order of the Commission was. Perhaps it would be useful if Mr. Taschereau, in a moment, were to read the relevant portion of the order to clarify that situation. But the answer to the question as to whether or not there is any consideration at the moment being given to rescinding that decision is that there is not any such consideration being given to it.

I would like, before other questions are asked, if I have your agreement, to have Mr. Taschereau read precisely what the Commission said it would do before April 15, so that we will have the complete picture. I might say, first of all, the Commission in the decision which it gave did not reach a point of finality and I think we ought to see precisely from the document itself what was left "unfinal", if that is a word.

Mr. Skoberg: I do not think it is necessary because we all have document.

Mr. Rose: We have the document here before us.

Mr. Pickersgill: Notwithstanding the fact that the members of the Committee have the document, and in view of the fact that our proceedings are public, could I crave the indulgence of the Committee, even if it is not read, to have the relevant paragraphs inserted in the record, because I have given certain answers that I do not want to be incomplete

[*Interprétation*]

née hier, nous n'avions reçu aucune déclaration officielle de leur part. J'imagine qu'ils vont le faire.

M. Skoberg: Vu le genre d'hiver qu'on a connu à Terre-Neuve cette année, et vu le fait que le service d'autobus tel qu'on l'a déjà indiqué a eu besoin d'une certaine mise au point, est-ce que la Commission canadienne des transports étudie maintenant la possibilité de rescinder l'ordonnance qui pourrait entrer en vigueur le 15 avril? La raison pour laquelle je pose cette question, c'est que je ne crois pas que ce soit suffisant, soit que nous ayons un communiqué ou une déclaration de presse comme l'a fait le CN, car cela laisse la province, les employeurs et tous les employés dans le doute. Et à n'importe quel moment après le 15 avril si l'ordonnance n'est pas abrogée et vous pouvez me reprendre si je suis dans l'erreur, le CN pourrait abandonner le service voyageurs. La Commission n'étudie-t-elle pas la possibilité de modifier l'ordonnance qui pourrait discontinuer le service voyageurs.

M. Pickersgill: Je crois qu'on a peut être mal compris ce qu'était l'ordonnance de la Commission. Ce serait peut-être plus utile si M. Taschereau, vous donnait, dans un instant, lecture de la partie en cause de l'ordonnance afin d'éclaircir la situation. La réponse à la question de savoir si oui ou non on étudie actuellement la possibilité d'abroger cette décision est qu'on n'étudie pas cette possibilité.

J'aimerais avant que l'on pose d'autres questions, si vous y consentez, j'aimerais que monsieur Taschereau vous lise exactement ce que la Commission a dit qu'elle ferait avant le 15 avril, afin que nous ayons le tableau d'ensemble. Tout d'abord, je dois dire que la décision de la Commission n'est pas définitive. Je crois donc que nous devrions voir d'après le document lui-même ce qui a été laissé inachevé, si je peux dire.

M. Skoberg: Je ne crois pas que ce soit nécessaire parce que nous sommes tous en possession du document.

M. Rose: Nous avons le document sous les yeux.

M. Pickersgill: Malgré le fait que les membres du Comité ont le document, et vu le fait que notre compte-rendu est rendu public, est-ce que je pourrais alors demander l'indulgence du Comité, même si on ne le lit pas, de faire insérer, dans le compte rendu, les paragraphes pertinents, car j'ai donné certaines réponses que je voudrais laisser incomplètes.

[*Text*]

and I would like the full picture to be on the record.

Mr. Skoberg: I agree.

The Chairman: It will only take a minute and it would be fair to let Mr. Taschereau read the evidence. Mr. Taschereau.

Mr. Taschereau: As the members know, the decision in the Newfoundland matter takes the form of a judgment as well as an order. I am going to read from the order:

The Railway Transport Committee of the Canadian Transport Commission hereby orders:

1. Subject to the following conditions, the Applicants shall, on April 15, 1969, discontinue passenger train service between St. John's and Port aux Basques, in the Province of Newfoundland, provided by Train Nos. 101 and 102 and coach service on Mixed Train Nos. 203 and 204:

(1) The bus service proposed by the Judgment of Woodard, C., shall be inaugurated and continued as long as a requirement for passenger service continues, and the passenger facilities, including terminals and the shelters mentioned therein, with proper communication links, shall be provided and installed, all to the satisfaction of the Committee.

(2) Until the Applicants are notified by the Committee that the bus service is inaugurated and the passenger facilities are provided and installed to the satisfaction of the Committee, the passenger train service shall continue to be operated in the same manner and as frequently as it was during the comparable period in 1967.

(3) From the date the Applicants are notified that the Committee is satisfied that the bus service is inaugurated and the passenger facilities provided and installed, and until April 15, 1969, it will not be necessary for the Applicants to run their passenger trains except in case of emergencies created by extremes of weather or by any other cause, until full bus service is restored. To meet the requirements of this condition, the Applicants shall keep and maintain ready for operation such passenger train equipment as the Committee shall direct.

[*Interpretation*]

J'aimerais que tous les aspects de la question y figurent.

M. Skoberg: Je suis d'accord.

Le président: Cela ne prendra qu'un instant et il serait juste et équitable de laisser monsieur Taschereau lire les observations.

M. Taschereau: Comme le savent les membres du Comité, la décision sur la situation qui existe à Terre-Neuve prend la forme d'une décision rendue ainsi que d'une ordonnance. Je vais donc vous donner lecture de l'ordonnance:

Le Comité des transports ferroviaires de la Commission canadienne des transports ordonne par les présentes:

1. Sous réserve des conditions suivantes, les demandeurs supprimeront, le 15 avril 1969, le service de transport de voyageurs entre Saint-Jean et Port-aux-Basques, dans la province de Terre-Neuve, effectué par les trains nos 101 et 102, ainsi que les wagons pour voyageurs des trains mixtes nos 203 et 204.

(1) Le service d'autobus proposé par les demandeurs et décrit en détail dans le jugement de Me Woodard, sera inauguré et continué aussi longtemps que durera la demande d'un service de voyageurs, et la compagnie fournira les installations nécessaires aux voyageurs, y compris les terminus et les abris sus-mentionnés, pourvus des moyens de communication qui s'imposent, de façon à satisfaire le Comité.

(2) Jusqu'à ce que le Comité fasse savoir au National-Canadien que le service d'autobus a été inauguré et que les installations ont été mises en service à sa pleine satisfaction, le service de trains de voyageurs continuera à fonctionner de la même manière et aussi fréquemment que durant la période comparable de 1967.

(3) A partir de la date où les demandeurs auront été notifiés de l'inauguration du service d'autobus et de la mise en service des installations destinées aux voyageurs à la pleine satisfaction du Comité, et jusqu'au 15 avril 1969, les demandeurs n'auront à faire fonctionner leurs trains de voyageurs que dans les cas d'urgence créés par les intempéries ou toute autre cause, jusqu'à ce que le service d'autobus soit rétabli intégralement. Afin de remplir cette condition, les demandeurs maintiendront le matériel ferroviaire nécessaire prêt à fonctionner à tout moment selon les directives du Comité.

[*Texte*]

I do not think I have for the purposes of this discussion to read Condition No. 4. I will read Condition No. 5.

> (5) If, prior to April 15, 1969, the Applicants fail or are unable to perform any of the conditions enumerated above, or if at any time before that date the Committee is not satisfied that the bus service is at least as good as the present passenger train service, it may upon notice to the Applicants and to all parties who appeared before it in December 1967, reconvene the hearing to consider whether in the exercise of its general powers under the Railway Act, it should impose further conditions to be met prior to the discontinuance of the passenger train service or direct the adoption of such measures as may be necessary to ensure the adequacy of the bus service.

Mr. Rose: I will be very brief. The first thing that jumps out at me, Mr. Chairman, is the first line of order:

> 1. Subject to the following conditions, the Applicants shall, on April 15, 1969, discontinue passenger train service between St. John's...

I am rather surprised that does not say "may", so that brings up the particular question which occurs later on—I will not go through the matter—of whether the CTC has given the CNR any notice that it should continue its passenger service for an extended period on the grounds that the service was inadequate?

Mr. Taschereau: No, it has not, sir. If I may reply to the point you were raising as to the "shall" I might indicate that this order was rendered under Subsection (7) of Section 314 I which says:

> If the Commission determines that the operation of an uneconomic passenger-train service should be discontinued, the Commission shall by order fix such date or dates for the discontinuance of the operation of the service or parts thereof as to the Commission appears to be in the public interest; but a discontinuance date shall be:
>
> (a) not earlier than thirty days from the date of the order; or
>
> (b) not later than one year from the date of the order.

[*Interprétation*]

Je ne crois pas que pour les fins de cette discussion, je doive vous donner lecture de la condition 4 mais 5.

> (5) Si, avant le 15 avril 1969, les demandeurs n'exécutent pas, ou ne sont pas en mesure d'exécuter, l'une ou l'autre des conditions énumérées ci-dessus, ou si à un moment donné avant cette date, le Comité n'est pas convaincu que le service d'autobus est au moins aussi bon que le service de trains de voyageurs actuel, il pourra, après en avoir notifié les demandeurs et toutes les parties qui ont comparu à ses séances en décembre 1967, se réunir à nouveau en audience, afin d'examiner si, dans l'exercice de l'autorité générale que lui confère la loi sur les Chemins de fer, il devrait imposer de nouvelles conditions avant la suppression du service de trains de voyageurs, ou ordonner l'adoption des mesures éventuellement requises pour assurer le fonctionnement satisfaisant du service d'autobus.

M. Rose: Je serai bref. Ce qui me frappe devantage, monsieur le président, c'est la première ligne de cette ordonnance:

> Sous réserve des conditions suivantes, les demandeurs supprimeront, le 15 avril 1969, le service de transport de voyageurs, entre Saint-Jean...

Je suis surpris de voir qu'on ne dit pas «peut supprimer», ce qui me pousse à demander: Est-ce que la Commission canadienne des transports a averti le National Canadien qu'il devait continuer le service de transports des voyageurs pour une période prolongée parce que le service était inadéquat?

M. Taschereau: Non, monsieur. Si vous me permettez de répondre au point que vous venez de soulever, quant à l'utilisation de «supprimeront», je vous dirai que l'ordonnance a été émise en vertu du paragraphe 7 de l'article 314 I de la loi qui dit:

> (7) Si la Commission décide que l'exploitation d'un service non-rentable de trains de voyageurs doit cesser, elle doit fixer par ordonnance la ou les dates qui lui semblent être d'intérêt public pour l'arrêt de l'exploitation du service ou de parties de celui-ci; mais une date de cessation ne doit tomber
>
> *a*) ni avant le trentième jour qui suit la date de l'ordonnance;
>
> *b*) ni après qu'un an s'est écoulé à compter de la date de l'ordonnance.

[*Text*]

Mr. Rose: Now the converse of that question, sir: Has the CNR been in touch with the CTC on this same question?

Mr. Taschereau: No, it has not. As the President indicated a moment earlier, as of the close of business yesterday there had been no submission in regard to the development indicated in the Canadian Press statement.

Mr. Rose: This is a little bit unusual, is it not?

• 1045

Mr. Taschereau: Certainly the CNR indicates that it has new plans and I expect the Commission will hear from them very soon. Under normal circumstances the Committee would continue the review it has been making of the service since December, would investigate the present situation, and would have to come to a final decision about the adequacy of the bus service and the adequacy of the related facilities.

Mr. Rose: The Committee, Mr. Chairman, is continuing its investigation of this service. I would like to ask one other question and I would like to ask the formal status of the resolution passed by the Newfoundland government on the subject of the extension of life of the so-called "Newfie Bullet". Has it any formal status or is it just a public expression of good intention?

Mr. Pickersgill: Perhaps I could attempt to answer that question. I have not even actually seen it in the press, but I was told that there had been some kind of unanimous resolution passed by the House of Assembly—not by the Newfoundland Government, but by the House of Assembly of Newfoundland—with respect to the continuance of this train.

I would assume—and I assume this from my experience as a Minister—that the Clerk of the House or the Speaker would convey that resolution to the Government of Canada and that it would be considered by the Government of Canada like any other representation from so distinguished a body as the House of Assembly of Newfoundland.

Mr. McGrath: May I be permitted a brief observation before I put my supplementary, Mr. Chairman? Actually my supplementary was fairly well covered by Mr. Rose, but if I may be permitted this observation, it seems to me rather strange that the Canadian Transport Commission would have to depend on Canadian Press despatches to learn of a decision relating to what judgment it has made in this particular instance, and also that

[*Interpretation*]

M. Rose: Voici l'inverse de cette question: est-ce que le CN a communiqué avec la Commission à ce sujet?

M. Taschereau: Non, monsieur. Comme l'a dit le président, il y a un moment, à la fin de la journée de travail, hier, il n'y avait pas eu de présentation comme l'indiquait la Presse Canadienne.

M. Rose: C'est un peu inusité, n'est-ce pas?

M. Taschereau: Le CN indique certainement qu'il a de nouveaux projets et j'imagine que la Commission en entendra parler d'ici peu. Dans les circonstances normales, le Comité devrait continuer la révision qu'il fait du service depuis décembre, enquêter sur la situation actuelle et devrait en arriver à une décision ultime sur le service d'autobus pour savoir s'il est adéquat ou non.

M. Rose: Le Comité, monsieur le président, poursuit son étude de la situation. J'aimerais poser une dernière question. J'aimerais savoir ce qu'il en est, exactement, de la résolution adoptée par le gouvernement de Terre-Neuve au sujet du prolongement du service. S'agit-il tout simplement de la manifestation publique d'une bonne intention?

M. Pickersgill: Je pourrais peut-être tenter de répondre à cette question. On m'a dit, je ne l'ai même pas vu dans les journaux, mais on m'a dit qu'il y avait eu une sorte de résolution unanime adoptée par la législature, non pas par le gouvernement, mais par la législature de Terre-Neuve au sujet de la continuation de ce service. Je présume, et je dis que je présume en vertu de mon expérience comme ministre, que le greffier de la Chambre ou l'Orateur transmettra cette résolution au gouvernement du Canada qui l'étudiera comme tout autre suggestion provenant d'un organisme aussi distinguée que l'Assemblée législative de Terre-Neuve.

M. McGrath: Me permetteriez-vous une brève observation, avant ma question supplémentaire, monsieur le président? En fait, ma question supplémentaire a été couverte par monsieur Rose, mais j'aimerais que vous me permettiez cette observation: il me semble plutôt étrange que la Commission canadienne des transports doive dépendre des dépêches de la PRESSE CANADIENNE pour connaître une décision relative à un jugement qu'elle a

[*Texte*]

it would have to depend on hearsay and again press despatches—to learn of a unanimous resolution, moved by a Minister in the Newfoundland government, and passed unanimously by the Newfoundland legislature. It would seem to me that this very important body, the Canadian Transport Commission, has very poor lines of communication with the provinces.

Having said that, Mr. Chairman, my question is this: The resolution, as I understand it, asked for a two year extension, to the fall of 1971 I think, and at the end of that time that the Commission should re-open the hearing in this matter. In view of the hearsay knowledge it has had of this matter—and I certainly respect Mr. Pickersgill's ability to interpret hearsay knowledge, having in mind his reputation as a Minister and his close association with the Premier and government of Newfoundland, so we can assume that his hearsay knowledge is quite accurate in this matter—is the Commission contemplating re-opening hearings in this matter?

Mr. Pickersgill: If I may answer the last part of your question first, as Mr. Taschereau has already said the Commission is continuing to review, as it indicated in its order it would, the adequacy of the service and the other conditions that were laid down in the order. It has not given any formal consideration yet to any other matter.

As to the question of whether the Canadian National Rilways should have advised us rather than making a public statement I suppose that is a matter of opinion and I hope they will advise us in the matter in a formal way.

As for any lines of communication with the House of Assembly of Newfoundland, whatever I might conceivably have in a private capacity, I would think that it would be beneath the dignity of a House of Assembly

• 1050

of Newfoundland to pass a resolution to be sent to the Canadian Transport Commission. I think they would send it to the Government of Canada, and I do not see how I could have any official knowledge of that unless the Government of Canada in turn sent it to the Commission.

So far as I am personally aware these two things have not yet happened though they might have, because I do not see every communication that comes in every day. I did observe, if I may say in passing, what Mr. McGrath said about the same resolution. He used the words "I understand". He under-

[*Interprétation*]

rendu, et qu'elle doive se fier aux ouï-dire et aux journaux pour apprendre l'existence d'une résolution unanime présentée par un ministre du gouvernement de Terre-Neuve et adoptée unanimement par l'assemblée législative de cette province. Il me semble que cet organisme important, la Commission canadienne des transports, a de très mauvais contacts avec les provinces.

Ceci étant dit, monsieur le président, voici ma question. La résolution, si j'ai bien compris, demandait un prolongement de 2 ans, jusqu'à l'automne de 1971 et à la fin de cette période, la réouverture de l'enquête. Puisque la Commission a été mise au courant par ouï-dire, et je respecte certainement la capacité qu'a monsieur Pickersgill d'interpréter le ouï-dire en tenant compte de sa réputation comme ministre et de l'association intime qu'il a avec le premier ministre de Terre-Neuve et son gouvernement, nous pouvons donc dire que ce qu'il en sait est assez juste. En conséquence, est-ce que la Commission étudie la possibilité de rouvrir son enquête à ce sujet?

M. Pickersgill: Si je puis répondre à la dernière partie de votre question, d'abord, comme l'a déjà dit monsieur Taschereau, la Commission poursuit son étude, comme elle l'avait indiqué d'ailleurs dans l'ordonnance, afin de savoir si le service adéquat et si les autres conditions établies dans l'ordonnance sont respectées. Elle n'a encore donné aucune considération officielle à aucune autre question. Pour ce qui est de savoir si le CN aurait dû nous prévenir plutôt que de faire une déclaration publique, il s'agit là, je suppose, d'une question d'opinion. J'espère que le CN nous préviendra de façon officielle à ce sujet.

Quant aux lignes de communication avec l'Assemblée législative de Terre-Neuve, quels que soient les contacts que je puisse avoir personnellement, je crois qu'il serait indigne que l'Assemblée législative ait à faire parvenir une copie de ses résolutions à la Commission canadienne des transports. J'ai l'impression que cette résolution serait envoyée au gouvernement du Canada et par conséquent, je ne vois pas comment j'aurais connaissance officielle de ceette question à moins que le gouvernement ne la transmette à la Commission.

En autant que je le sache ces deux faits ne se sont pas produits, mais ils ont pu se produire car je ne suis pas au courant de toutes les communications qui nous arrivent à tous les jours. J'ai remarqué l'expression utilisée par M. McGrath. Il a dit «je crois savoir». Il comprend mieux que moi. Je n'ai jamais rien

[*Text*]

stands more about it than I do. I have never seen anything that purported to be the text of it. I just heard that some kind of resolution had been passed. That is really all I have heard, personally.

Mr. Givens: Mr. Chairman, I would like to raise a supplementary question on this score which I think is basic.

The Chairman: Mr. Givens, I think I will have to limit the supplementary questions because I also have two other members who have been waiting for a long time to speak. I will allow you a very short supplementary, Mr. Givens.

Mr. McGrath: Well, Mr. Chairman, if I may, I am not going to belabour this point. I just want one more brief question, if I may, Mr. Givens. My question is this, Mr. Chairman. Mr. Pickersgill in the light of the unanimous resolution passed by the Newfoundland House of Assembly, in the light of the tremendous public response to this matter in the Province of Newfoundland, and in the light of the fact that Canadian National has already seen fit to extend the service beyond April 15, will the Commission now consider rescinding the order?

Mr. Pickersgill: This matter, of course, is before the Railway Transport Committee of which I am not a member, which is presided over by Mr. Jones, and I am not going to presume to express an opinion in advance of the consideration of the matter by other persons than myself. I think it would be very improper to do that. However, I think I can safely assure you that all those conditions laid down in the order will be complied with before any final decision is reached.

Mr. Pringle: Mr. Chairman, we are discussing several subjects, but seeing we are on the very famous Newfie Bullet now I would like to make a couple of remarks, if I may.

First of all, I would think that for the record we should state that the Committee—and I can say this because I am one of the Committee—is not unanimous in way, shape or form with regard to the discussion that has been taking place recommending continuance and so on of the Newfie Bullet. I am very interested in Mr. McGrath's statement that there has been tremendous public response. I think this is wonderful. I hope he means by this that they are buying tickets on the CNR railroad, because I was hardpressed to find

[*Interpretation*]

vu qui soit censé en être le texte. J'ai tout simplement entendu dire qu'une sorte de résolution avait été adoptée. C'est vraiment tout ce que j'ai entendu dire, personnellement.

M. Givens: Monsieur le président, j'aimerais poser une question supplémentaire à ce sujet; elle est, à mon avis, fondamentale.

Le président: Monsieur Givens, je crois que je vais devoir limiter les questions supplémentaires, car j'ai aussi deux autres membres du Comité qui attendent depuis longtemps de pouvoir poser des questions. Je vais vous laisser poser une question supplémentaire, mais elle doit être très brève, monsieur Givens.

M. McGrath: Excusez-moi, monsieur le président. Je ne veux pas insister trop sur ce point, mais, si vous me le permettez, monsieur Givens, j'ai encore une brève question à poser. Voici ma question, monsieur le président. Monsieur Pickersgill, étant donné la résolution adoptée à l'unanimité par l'Assemblée législative de Terre-Neuve, étant donné la réaction énorme qu'il y a eu de la part du public de Terre-Neuve, et étant donné que le National-Canadien a déjà jugé bon de maintenir le service au-delà du 15 avril, la Commission va-t-elle maintenant envisager d'annuler cette ordonnance?

M. Pickersgill: Bien entendu, cette question est à l'étude par le Comité du transport ferroviaire, dont je ne suis pas membre, et qui est présidé par M. Jones, et je n'ai pas la prétention d'exprimer un avis avant que d'autres que moi n'aient fini d'étudier la question. Il serait très déplacé, je crois, de le faire. Mais je crois pouvoir vous assurer tout de même que l'on respectera toutes les conditions énoncées dans l'ordonnance avant de prendre une décision finale.

M. Pringle: Monsieur le président, j'ai remarqué que nous discutons plusieurs choses, mais étant donné que nous parlons maintenant du célèbre *Newfie Bullet*, j'aimerais faire quelques observations, si vous me le permettez.

Tout d'abord, je crois que, pour le compte rendu, nous devrions dire que le Comité—et je pense le dire, car j'en fais partie—n'est pas unanime quant aux méthodes ou à la forme de la discussion qui a eu lieu pour recommander le maintien du *Newfie Bullet*. Je suis très intéressé par ce qu'a dit M. McGrath, soit, qu'il y a eu une réaction énorme de la part du public. C'est merveilleux. J'espère qu'il veut dire par là qu'on achète des billets pour le chemin de fer du National-Canadien, car j'avais beau chercher, je ne trouvais personne

[*Texte*]

anybody who bought any tickets and I would suggest, Mr. Chairman, that the people of Newfoundland abandoned the railroad long before the CNR abandoned it. If there is this public response, and they are buying lots of tickets on the railroad, and they can start to pay for some of the deficit that we people in western Canada are being asked to put up, to pay for something, which is more or less a way of life and this seems to be a kind of a status that some places in the Maritimes require. They say it is a way or a right of...

Mr. Horner: That is an insult to the people of the Maritimes.

Mr. Pringle: No, I do not think that is. I do not think so. I think that most of the people wanted the Newfie Bullet to stay on was because it was their train. It was not because they particularly rode on it.

Mr. Horner: Seventy thousand people rode on it last year.

Mr. Pringle: Seventy thousand, short distances, Mr. Chairman.

Mr. Horner: How do you know?

Mr. Pringle: Because I enquired. Not too many people rode the full line from St. John's to Port-aux-Basques and I would like to say, if I may, that these gentlemen opposite have had all morning to discuss this. It is now 11 o'clock. I think that we have a right to state our side of the story. That is the point I wanted to put on the record. I certainly want to give the fine people of Newfoundland every credit for the hospitality they extended to us.

The Chairman: Are you finished Mr. Pringle?

Mr. Pringle: All right, I will permit a supplementary.

Mr. Givens: Mr. Chairman, I have been wanting to discuss something basic. I would not interrupt the hon. gentlemen and I would like to put my point and ask my question if I may, Mr. Chairman.

The Chairman: Go ahead. You have the floor, Mr. Givens.

Mr. Givens: What worries me basically, is this Mr. Chairman, through you to Mr. Pickersgill, and there has been a lot of fuss about it. It would seem to me that what the CN

[*Interprétation*]

qui en achetait, et je dirais, monsieur le président, que les Terre-neuviens ont cessé d'utiliser le chemin de fer bien avant que le National Canadien ne l'abandonne. Si le public réagit, qu'il achète beaucoup de billets de chemin de fer, et qu'il commence à payer pour combler une part du déficit que l'on nous demande à nous, de l'Ouest du Canada, de combler, pour assurer les frais de ce qui semble être plus ou moins un mode de vie, une sorte de statut qu'exigent certaines régions des Maritimes. Elles disent que c'est un mode ou un droit...

M. Horner: Ceci est une insulte aux gens des Maritimes.

M. Pringle: Non, je ne le pense pas. Je pense que la plupart des gens voulaient que l'on maintienne le *Newfie Bullet* parce que c'était leur train. Ce n'était pas parce qu'ils l'utilisaient tout particulièrement.

M. Horner: Soixante-dix mille personnes ont pris ce train l'an dernier.

M. Pringle: Soixante-dix mille personnes sur de courtes distances, monsieur le président.

M. Horner: Qu'en savez-vous?

M. Pringle: Je me suis renseigné. Il n'y a pas beaucoup de gens qui aient fait tout le trajet de Saint-Jean à Port-aux-Basques, et permettez-moi de faire remarquer que ces messieurs ont eu toute la matinée pour discuter de cette question. Il est maintenant 11 heures. Je pense que nous avons le droit de donner notre côté de l'histoire. C'est la question que je voulais faire porter au compte rendu. Je tiens à reconnaître l'extrême hospitalité dont ont fait preuve les gens de Terre-Neuve à notre égard.

Le président: Avez-vous fini, monsieur Pringle?

M. Pringle: Entendu, je vais permettre une question supplémentaire.

M. Givens: Monsieur le président, j'essaie de parler d'une question fondamentale. Je ne me permettrais pas d'interrompre les autres, et je voudrais bien qu'on me laisse dire ce que j'ai à dire et poser ma question, si vous me le permettez, monsieur le président.

Le président: Allez-y. Vous avez la parole, monsieur Givens.

M. Givens: Voici ce qui me préoccupe essentiellement. Par votre intermédiaire, monsieur le président, ma question s'adresse à M. Pickersgill. Il y a eu beaucoup de bruit à

[*Text*]

should have done instead of issuing this thing is to apply to your Commission to vary this order or this judgment. The Commission is supposed to be quasijudicial body. Does this mean, sir, that if enough political pressure is put on that an order and a judgment of the Commission can be varied? I say this because if this despatch has any basis in fact, that the Newfie Bullet should continue for the reasons indicated—because of the bus service and so on—then the proceedings which led to this order and judgment should never have taken place in the first place.

Some hon. Members: Hear, hear.

Mr. Pickersgill: I do not think that once this...

Mr. Givens: Excuse me, sir. I say generally, forgetting about the Newfoundland incidence or this problem, that I must draw the implication that if it had not been for the pressure that has been put on—and I compliment the gentlemen opposite for the pressure that they did put on to achieve what they wanted—that this press release would never have taken place. Either we are going to have respect for an order and judgment of the Commission in the future, whether it applies to Newfoundland, Ontario or anywhere else, or I must draw the conclusion that if I yell loud enough and put on enough pressure that I will win my point just as they did. Were there facts in this case which led to this conclusion or were there not? If there were, then the Newfie Bullet should go out of existence on the merits. If not, then what was the reason for the proceedings in the first instance?

Mr. Pickersgill: Perhaps I ought to make some attempt to comment on what Mr. Givens has said. The reason for the decision in the first place was that a perfectly lawful application had been made to a quasi-judicial tribunal. That quasi-judicial tribunal had a duty to consider the enquiry and did consider it to the best of its ability.

Whether or not it was appropriate for the Canadian National Railways, through one of their officers in Newfoundland, to make the kind of statement which, if I may use the word he used, is of rather indefinite character, I am not willing to say. I do not think I am going to cite him for contempt. I hope the Canadian National Railways, if they want any variation in the order, will make a formal application to us. I quite agree with Mr. Givens that that would seem to me to be the

[*Interpretation*]

cet égard. Il me semble que ce qu'aurait dû faire le National-Canadien, plutôt que de faire cette déclaration, c'est de demander à votre Commission de modifier cette ordonnance ou ce jugement. La Commission est censée être un organisme quasi-judiciaire. Cela veut-il dire, monsieur, qu'avec des pressions politiques suffisantes, on peut modifier une ordonnance et un jugement de la Commission. Si cette dépêche, où l'on dit que l'on doit maintenir le *Newfie Bullet* pour les raisons indiquées—le service d'autobus, etc.—a un fondement réel, les audiences qui ont mené à cette ordonnance et à ce jugement n'auraient jamais dû avoir lieu pour commencer.

Des voix: Bravo.

M. Pickersgill: Je ne pense pas qu'une fois que...

M. Givens: Excusez-moi, monsieur. Je dis de façon générale, en laissant de côté l'aspect du problème qui est celui de Terre-Neuve, que je dois en conclure que si ce n'était la pression que l'on a exercée et je félicite mes vis-à-vis de la pression qu'ils ont en effet exercée pour obtenir ce qu'ils voulaient, il n'y aurait jamais eu ce communiqué de presse. Soit nous allons respecter à l'avenir les ordonnances et jugements de la Commission, que cela s'applique à Terre-Neuve, à l'Ontario ou à ailleurs, soit je dois en conclure que si je crie assez fort et que j'exerce suffisamment de pression, j'obtiendrai ce que je veux, tout comme ils l'ont fait. Est-ce qu'il y a un ou non des faits, dans ce cas-là, qui ont mené à cette conclusion? S'il y en a eu, le *Newfie Bullet* devrait être supprimé en conséquence. Sinon, pourquoi alors y a-t-il eu des audiences pour commencer?

M. Pickersgill: Je devrais peut-être essayer de commenter ce qu'a dit M. Givens. La raison de cette décision, au début, c'était qu'une demande officielle avait été faite à un tribunal quasi-judiciaire. Ce tribunal était chargé d'examiner cette enquête, et il l'a fait du mieux qu'il a pu.

Ce n'est pas à moi de dire s'il convenait ou non que les Chemins de fer Nationaux du Canada, par l'entremise de l'un de leurs agents à Terre-Neuve, fassent ce genre de déclaration, qui, si je puis reprendre le terme qu'il a employé, est de caractère plutôt indéfini. Je ne pense pas que je vais le citer en justice pour outrage. J'espère que le National-Canadien, s'il veut faire modifier l'ordonnace, nous présentera une demande officielle. Je suis bien de l'avis de M. Givens: il me

[*Texte*]

appropriate thing for them to do. As to what their motivation may have been, I understand, Mr. Chairman, if I am correctly informed—and it is hearsay—you were going to ask someone from the Canadian National to appear. Therefore, it seems to me it would be more appropriate for him to speak for himself than for me to try and interpret their words.

Mr. Givens: With great respect, Mr. Chairman, I would suggest to the Chairman of the Canadian Transport Commission that this gentleman should be advised as a matter of proper procedure that in the future, if he has anything to say about an order and a judgment—I do not expect you to cite him for contempt—as Mr. Taschereau puts it, on the highest level, that he should make an application to the proper tribunal for a variation of the order and not make a grandstand announcement over the air or through the newspapers about a thing as important as this. We have been wrangling about this for weeks. Some of us were kicked off the Committee on account of this thing. Now you come around and you say that the whole thing was nothing; it was frivolous and vexatious.

• 1100

It was a cavalier way of doing it and forgetting about this instance for the moment, I raise this point; I said I thought it was basic because if it happens this time it can happen again and again and again, and bring your Commission under the hatred, ridicule and contempt of people who generally have to deal with it.

Mr. Pickersgill: I might say, Mr. Givens, that I would much rather not merely the Canadian National Railways, but other people who have views to express about our judgments, would also follow the lines laid down by Parliament and make their applications in the appropriate way. This is a free country and I do not think I should reflect on the way in which other people...

Mr. McGrath: Mr. Chairman, I would like to raise a point of order. It concerns the observation just made by Mr. Pickersgill and by Mr. Givens who is now leaving the room—remember what happened the last time you left! It concerns observations made also by Mr. Pringle regarding pressure that was brought on the CNR and pressure he suggested on the Canadian Transport Commission. I do not know how that applies, but perhaps he did not. I was going to make this observation, Mr. Chairman. Canadian National Railways is a Crown corporation owned by the people of Canada and Canadian Transport Commission

[*Interprétation*]

semble que c'est ce qu'ils auraient dû faire. Quant à savoir quel était leur motif, monsieur le président, si ce que l'on m'a dit est exact—ce n'est que du ouï-dire vous aviez l'intention de demander à quelqu'un du National-Canadien de comparaître. Il me semble donc qu'il vaudrait mieux qu'il parle en son propre nom, et non que j'essaie, moi, personnellement, d'interpréter ses paroles.

M. Givens: En toute déférence, monsieur le président, j'aimerais proposer au président de la Commission Canadienne des transports d'informer ce monsieur qu'à l'avenir, s'il a quoi que ce soit à dire sur une ordonnance et un jugement—je ne pense pas que vous allez le citer en justice pour outrage—comme l'a fait M. Taschereau, au niveau le plus élevé, qu'il veuille bien faire une demande au tribunal approprié pour faire modifier l'ordonnance, au lieu de faire une déclaration publique à la radio, à la télévision ou dans les journaux au sujet d'une question aussi importante. Nous nous querellons depuis des semaines à ce sujet. Il y en a parmi nous qui ont été chassés du Comité pour cette raison. Et, maintenant, vous arrivez et vous dites que le tout n'était que frivolités et tracasseries.

Cette façon d'agir était plutôt cavalière, mais oublions cela pour un instant; j'ai déclaré que je trouvais cette question fondamentale, parce que si cela s'est produit une fois il se peut qu'il y ait répétition et votre Commission sera détestée et ridiculisée par ceux qui doivent traiter avec elle.

M. Pickersgill: J'aimerais dire que non seulement le CN, mais tous ceux qui désirent exprimer leur opinion au sujet de nos ordonnances devraient respecter la procédure établie par le Parlement adresser leurs demandes comme prévu. Notre pays est un pays libre et je crois que je ne devrais pas ..

M. McGrath: Monsieur le président, j'en appelle au Règlement. Je songe à la remarque de M. Pickersgill et à celle de M. Givens qui s'apprête à quitter la salle. Souvenez-vous de ce qui s'est produit la dernière fois que vous avez quitté! Je songe également aux remarques de M. Pringle au sujet des pressions qui auraient été exercées sur le CN et la Commission canadienne des transports. Je ne sais pas comment cela s'applique mais peut-être qu'il ne l'a pas fait. Je voulais tout simplement formuler cette observation. Les chemins de fer nationaux du Canada sont une société de la Couronne, propriété du peuple du Canada,

[*Text*]

is a Commission operating under delegated authority from Parliament. I am a member of Parliament and I think it is perfectly right and proper for me to bring whatever pressure I can to bear as a member of Parliament to rescind any decision that I disagree with.

An hon. Member: Hear, hear.

Mr. Pickersgill: I do not disagree with what Mr. McGrath has said in any particular whatever, but there are certain procedures laid down which would bring things before the Commission in a way it would have to deal with them. That was the only observation I was seeking to make. I was not seeking to reflect on anyone. I am a very strong believer in having a free country and I do not want to restrict anyone in any way we can possibly avoid.

Mr. McGrath: I just want to make this point too, Mr. Chairman. I resent the statement made by my good friend, Mr. Pringle, for whom I have great respect...

The Chairman: Order, please!

Mr. McGrath: ...that our train service is being subsidized by the people of British Columbia. That kind of statement does not help at all.

The Chairman: Mr. McCleave, do you have a supplementary question?

Mr. McCleave: I want to ask Mr. Taschereau a question. I am wondering whether the CNR can be considered in contempt? I thought they had a time limit in which to operate. If this is correct, one of the conditions laid down, by continuing the "Newfie Bullet" beyond April 15—were they not given a year or did I misunderstand one of the conditions read earlier, Mr. Taschereau?

Mr. Taschereau: No, the matter of one year comes from Section 3141 of the National Transportation Act which says that the Commission shall fix a date of discontinuance which is:

> (a) not earlier than thirty days from from the date of the order; or
>
> (b) not later than one year...

It does happen that this judgment was rendered on July 3 so that the date of April 15 is well within the year. Another date before July 3 would be within the year of the judgment.

[*Interpretation*]

et la Commission canadienne des transports est une commission qui tient ses pouvoirs du Parlement. Je suis député et je trouve tout à fait honnête d'exercer toutes les pressions voulues à titre de député pour essayer de faire changer une décision avec laquelle je ne suis pas en accord.

Une voix: Bravo!

M. Pickersgill: Je ne suis pas en désaccord avec cela, mais enfin quoiqu'il en soit il y a certaines procédures qui sont établies et qui obligent la Commission à étudier les questions qui lui sont soumises. C'est tout ce que je voulais dire. Je suis un ardent partisan de la liberté au pays et je ne veux pas établir de restrictions pour quiconque.

M. McGrath: Je voulais aussi faire cette observation. Je n'aime pas beaucoup cette déclaration faite par mon bon ami, M. Pringle, que je respecte vraiment...

Le président: A l'ordre, s'il vous plaît.

M. McGrath: ...et selon laquelle notre service ferroviaire est subventionné par la population de la Colombie-Britannique. Une telle déclaration n'aide pas du tout.

Le président: Une question complémentaire, monsieur McCleave?

M. McCleave: J'aimerais la poser à M. Taschereau. Je me demande si le CN peut être accusé de mépris. Je croyais qu'une date-limite avait été fixée. Si cela est exact, en maintenant le service après le 15 avril—le CN n'avait-il pas reçu un avis d'un an, ou ai-je mal compris l'une des conditions dont on a donné lecture plus tôt?

M. Taschereau: Non, le délai d'un an est établi à l'article 314 I de la Loi nationale sur les transports. L'article dit que la date de cessation que fixe la Commission ne doit tomber

> *a*) ni avant le trentième jour qui suit la date de l'ordonnance,
>
> *b*) ni après qu'un an s'est écoulé à compter de la date de l'ordonnance.

Le jugement a été rendu le 3 juillet. La date du 15 avril tombe donc à l'intérieur de cette période d'un an. Toute autre date avant le 3 juillet respecterait également cette obligation.

[*Texte*]

Mr. McCleave: So they still have time to come in and ask that the order of the Commission be varied?

Mr. Taschereau: Definitely and, as a matter of fact, we have indicated that we have to review fully the matter before April 15 and I would take it that the announcement of the CNR would be followed by some submission by CNR which might make it imperative for the Committee to review its decision in this regard.

Mr. McCleave: So there is no question of contempt at the present time. That is really what I wanted to know.

The Chairman: Mr. Mahoney?

Mr. Mahoney: Mr. Taschereau, I take from your last answer that you probably appreciate the point that I was going to raise here. In the order that was made regarding the "Newfie Bullet"—if we can use that expression without offending anyone—the Commission left itself some options open prior to April 15.

It would seem to me that the Applicant—again if the press release is accurate—has in fact admitted that the time limit set was not adequate for the test and in order for the Commission to retain its options the Commission, perhaps on its motion if not that of the CNR, will have to extend that date.

• 1105

Mr. Taschereau: If one of the facts referred to in the press statement relating to the retirement of some buses for adjustments is one of the factors that is brought before the commission, certainly it will be taken into account. This might be a fact which was not apparent at the time of the judgment and might have a bearing today.

Mr. Mahoney: On the matter of including truck transport under the Maritime Freight Rates Act, the procedure set out in Section 8 of that Act for the payment of the subsidies to the rail carriers would seem to be the sort of procedure that is necessary to protect the public purse in the payment of this kind of money.

There has been emphasis again today on the thought that these subsidies should benefit the shipper rather than the carrier. I think we can safely assume that there are scores, possibly, of truckers and thousands of shippers. Can you conceive of a situation

[*Interprétation*]

M. McCleave: Ils peuvent toujours demander que cette ordonnance de la Commission soit échangée?

M. Taschereau: Oui et même nous avons indiqué qu'il nous faut réétudier la question avant le 15 avril. J'en conclurais que cette déclaration du National Canadien serait suivie d'une demande du CN qui forcerait alors le comité à réétudier sa décision.

M. McCleave: Donc, il n'est pas question de mépris, en ce moment. C'est ce que je voulais savoir.

Le président: Monsieur Mahoney?

M. Mahoney: J'en conclus, monsieur Taschereau, à la suite de votre dernière réponse que vous comprenez très bien ce point que je désire soulever. Pour ce qui est de l'ordonnance relative au «*Newfie Bullet*», j'espère que cette expression ne blesse personne, la Commission s'est ménagée certaines avenues jusqu'au 15 avril.

Il me semble que le demandeur, si le communiqué de presse est bien précis, a reconnu en réalité que la limite de temps établie n'était pas suffisante pour vraiment mettre à l'essai le nouveau service et que, pour que la Commission puisse maintenir cette possibilité qu'elle a, elle devrait, d'elle-même ou selon la décision du CN, retarder cette date.

M. Taschereau: Dans ce communiqué de presse, on parle du retrait de certains autobus du service pour y apporter certaines modifications. S'il s'agit là de l'un des points qui seront soumis à la Commission, il est évident qu'elle en tiendra compte. Ce fait n'était peut-être pas évident lorsque le jugement a été rendu mais il pourrait avoir son importance maintenant.

M. Mahoney: Parlons maintenant de l'industrie du camionnage et de son inclusion dans les dispositions de la *Loi sur les taux de transport des marchandises dans les Maritimes*. La procédure prévue à l'article 8 de cette loi pour le paiement de subventions aux transporteurs ferroviaires me semble le genre de procédures essentielles pour protéger les deniers publics.

On a signalé une fois de plus, aujourd'hui le fait que la subvention devrait aller à l'expéditeur plutôt qu'au transporteur. Je pense qu'on peut en conclure facilement qu'il y a bon nombre de camionneurs et des milliers d'expéditeurs. Pouvez-vous imaginer une

[*Text*]

whereby practically these subsidy payments could be made direct to shippers?

Mr. Pickersgill: I think it is rather dangerous to speculate about what the government might put before Parliament, but just thinking of some analogies it does seem to me that you might make a payment for the benefit of a shipper and use the carrier as an agent through which it was made, in the same way as the gasoline tax is collected. I think it would be quite impossible for the government of Ontario or any other province to collect its gasoline tax if you and I and everyone else had to go to some tax office and pay the tax every time we filled our tanks.

Since under the British North America Act provinces can only impose direct taxes, the tax is on me; it is not on the station. Therefore, they have to be appointed tax collectors. If you reverse that it is just conceivable that the carriers could be used as agents but the shipper would be protected by his way bill, or something of that sort, so that he knew he was really getting the benefit.

I am just speculating as to one possible method of accomplishing this aim if this is what the government wants to propose to Parliament and if this is what Parliament thinks should be done.

Mr. Mahoney: I would like to move now into the area of air carriage for a moment. The regional air carriers in other parts of the country now seem to be developing a very rational and efficient system. Has the Commission before it at the present time—and I of course stipulate that these are of public record—any applications from regional air carriers to expand service in the Maritime provinces?

Mr. Pickersgill: By the Maritime provinces . . .

Mr. Mahoney: I am sorry; the Atlantic provinces.

Mr. Pickersgill: Offhand I do not recall any application from a regional carrier to expand any service in the Maritime provinces.

One was very recently granted from Charlottetown, Charlo to Montreal. I do not recall any. There may be, and you could perhaps put that question to Mr. Lewington when he comes, but there are, of course, before us the applications for direct service from Montreal to Goose Bay, which is now served by Air Canada, and from Montreal to Churchill Falls, which is not served non-stop by any carrier.

[*Interpretation*]

situation où ces subventions pourraient être versées directement aux expéditeurs.

M. Pickersgill: Je pense qu'il est assez dangereux de spéculer sur ce que le gouvernement peut présenter au Parlement. Mais par analogie, je pense que vous pouvez faire un paiement à l'avantage d'un expéditeur et utiliser le transporteur comme agent, de la même façon qu'on perçoit la taxe sur l'essence. Il serait impossible pour le gouvernement de l'Ontario ou de toute autre province percevoir cette taxe sur l'essence si chacun devait aller à un bureau des impôts pour payer cette taxe chaque fois qu'il achète de l'essence.

Vu qu'en vertu de l'Acte de l'Amérique du Nord Britannique, les provinces peuvent ne percevoir que des impôts directs, c'est à moi à payer l'impôt et non pas à la station-service. Il faut donc qu'ils jouent le rôle de percepteurs d'impôts. Si l'on renverse la situation, les transporteurs pourraient être utilisés comme agents mais l'expéditeur serait protégé par sa feuille de route ou quelque chose du genre, ce qui lui permettrait de savoir si la subvention lui parvient vraiment.

Enfin, je ne puis que spéculer sur une méthode possible de réaliser ces objectifs si c'est là ce que le gouvernement veut proposer au Parlement et si c'est ce que le Parlement croit qu'il faudrait faire.

M. Mahoney: Maintenant, je voudrais parler du transport aérien. Ces transporteurs régionaux semblent mettre au point un système rationnel et efficace. La Commission est-elle saisie en ce moment—et je présume que c'est du domaine public—d'une demande des transporteurs aériens régionaux en vue d'assurer l'expansion de leur service dans les provinces Maritimes?

M. Pickersgill: Par les provinces Maritimes...

M. Mahoney: Je veux dire les provinces de l'Atlantique.

M. Pickersgill: Je ne saurais vous dire comme cela à pied levé s'il y a un transporteur régional qui a demandé d'étendre ses services dans les provinces des Maritimes.

Une demande a été accordée récemment de Charlottetown, Charlo à Montréal. Je ne me souviens pas. Mais nous sommes saisis de demandes pour le service direct de Montréal à Goose Bay, desservi maintenant par Air Canada, et de Montréal à Churchill Falls qui maintenant n'est desservi par aucun transporteur en vol direct.

[*Texte*]

These applications are before us. I think there are three applicants in the case of the Churchill Falls and—perhaps I should not rely on my memory—there are two or three relative to the Goose Bay matter; and, of course, Goose Bay is now served non-stop by Air Canada, which is another complication.

The dates for the hearings of these applications have not yet been set.

Mr. Mahoney: I think Air Canada is the only main line carrier in the region?

Mr. Pickersgill: Yes.

Mr. Mahoney: Are there any applications from Air Canada, other than the one to which you have referred, to abandon service, if you like, and any in favour of a regional air carrier if one is available?

Mr. Pickersgill: Not that I am aware of. I am not really absolutely sure whether Air Canada has to apply to us. They have a different status from other carriers. They have a contract with the government, and in certain respects we do not exercise the same degree of jurisdiction over Air Canada that we do over other airlines.

Mr. Mahoney: Relative to what I might call Class 3 carriers, are there applications for this type of local service presently outstanding in the Atlantic Provinces?

Mr. Pickersgill: I do not think so, though there may be some in northern New Brunswick. Perhaps I had better not try to recollect. I do not think there are any in any other part of the area except northern New Brunswick; but I do think there are some, which, if they are not formal applications, are at least under discussion.

Mr. Mahoney: Rather than having you try to remember, could we ask you, if they are of public record at this time, to provide the Clerk with a very brief summary of the information in that area?

Mr. Breau: Mr. Chairman, if it will help, I know that a licence was granted not long ago—perhaps two months ago—to a certain company...

Mr. Pickersgill: Yes; but I understood that these were ones that were outstanding. If you would like the recently granted ones, we could give you those, too.

Mr. Mahoney: I would appreciate that.

[*Interprétation*]

Nous sommes saisis de ces demandes et je pense qu'il y a trois demandeurs, pour ce qui est de Churchill Falls, et, si je peux me fier à un mémoire, il y en a deux ou trois pour ce qui est de Goose Bay et bien entendu Goose Bay est desservie en vol direct par Air Canada, ce qui constitue une autre complication. On n'a pas encore déterminé la date à laquelle ces demandes seront examinées.

M. Mahoney: Je pense que la société Air Canada est le seul transporteur principal de la région.

M. Pickersgill: Oui.

M. Mahoney: Y a-t-il des demandes de la part d'Air Canada, autres que celles déjà mentionnées, en vue d'abandonner le service, et d'autres demandes qui seraient en faveur d'un transporteur aérien régional s'il y en a de disponible?

M. Pickersgill: Pas à ma connaissance. Je ne suis pas très sûr si Air Canada doit nous adresser la demande. Leur statut est différent de celui des autres transporteurs. Ils ont un contrat avec le gouvernement et à certains égards, nous n'exerçons pas sur Air Canada le même degré d'autorité que sur d'autres lignes aériennes.

M. Mahoney: Pour ce qui est des transporteurs de la catégorie 3, y a-t-il des demandes en suspens pour ce genre de service local, dans les Maritimes?

M. Pickersgill: Je ne le crois pas. Il se peut qu'il y en ait au nord du Nouveau-Brunswick. Il serait peut-être préférable de ne pas essayer de me rappeler. Je ne crois pas qu'il y en ait dans d'autres régions, d'autres parties de la région, sauf au nord du Nouveau-Brunswick; mais je pense qu'il y en a quelques-unes qui, si elles ne sont pas en bonne et due forme, sont du moins sous étude.

M. Mahoney: Plutôt que d'essayer de vous demander de vous rappeler, est-ce qu'on ne pourrait pas vous demander, une fois de plus, si en ce moment le dossier est rendu public afin de permettre au secrétaire du Comité de rédiger un bref résumé de la question?

M. Breau: Si cela peut aider, monsieur le président, je sais qu'un permis fut accordé il n'y a pas longtemps, peut-être deux mois de cela, à une certaine société...

M. Pickersgill: Oui. Mais c'était des permis qui étaient en surplus. Si vous voulez ceux qui ont été accordés récemment, nous pourrions vous en faire part également.

M. Mahoney: Je l'apprécierais beaucoup.

[*Text*]

The Chairman: Mr. Turner?

Mr. Turner (London East): Mr. Pickersgill, when the order was put out by the Commission did the CNR suggest any way by which they could take care of the employees who were going to be laid off because of this order?

Mr. Pickersgill: In the proceedings I believe there was a good deal of discussion that was not in the judgment. I think perhaps I ought to ask Mr. Taschereau to comment on this.

Mr. Taschereau: It seems to me that there was a reference to the question in the notes for judgment of Commissioner Woodward. I am trying to find them. I have found this passage, if I may read it:

> Evidence was adduced by the Railway that 129 full-time employees would be affected, should the application be granted. This effect on employees was strongly attacked by Mr. Thoms and by other Railway Labour leaders at the hearing. The breakdown of employees was 65 equipment department, 38 sleeping and dining car department, 24 running trades and 2 stores department employees. These employees only hold seniority on the Newfoundland Area of the Canadian National, and although some employees affected may be able to retain employment by the exercise of seniority, it still results in 129 Railway employees being forced out of work either directly or indirectly due to the passenger train discontinuance. The Railway answered the strong protests of the Unions by stating that the company policy of preference of employment, on-the-job training, and normal attrition due to deaths and retirements would help to a considerable degree in alleviating the effect of the passenger train discontinuance. In addition, it was pointed out that a recent Railway-Union job security benefit plan would benefit some employees in the non-operating groups. This agreement takes the form of supplemental unemployment insurance payments, severance pay, relocation allowances, retraining and such other measures as may be appropriate in particular circumstances. These benefits would be available in some degree to 105 of the 129 employees...

If I may go on, it still deals with the same subject:

> .. It is estimated that the bus service would create 57 positions and it is the Railway's hope that most of these positions

[*Interpretation*]

Le président: Monsieur Turner?

M. Turner (London-Est): Monsieur Pickersgill, lorsque l'ordonnance fut émise par la Commission, le National Canadien a-t-il fait savoir comment le problème posé par la mise à pied des employés allait être réglé?

M. Pickersgill: Je crois qu'une bonne partie des délibérations ne figurent pas dans le jugement. Je demanderai donc à M. Taschereau d'y répondre.

M. Taschereau: Je pense qu'il en a été question dans le jugement émis par le commissaire Woodward. J'essaie de retrouver ce passage. Le voici. Permettez-moi de vous le lire:

> Le Chemin de fer a fourni la preuve que 129 employés à plein temps seraient affectés si la demande était accordée. M. Thoms et d'autres chefs syndicaux se sont attaqués avec vigueur, à l'audience, à ce problème des employés. Dans le détail, 65 d'entre eux s'occupent du matériel, 38 sont affectés au service des wagons-restaurants et wagons-dortoirs, 24 font partie du personnel sédentaire et deux sont magasiniers. Ces hommes n'ont d'ancienneté que pour la région terre-neuvienne du Canadien-National et bien que certains employés affectés puissent être réengagés grâce à leur ancienneté, il n'en demeure pas moins que 129 employés des Chemins de fer seront mis en chômage directement ou indirectement à cause de l'abandon du service du train-voyageurs. Répliquant aux vigoureuses protestations des syndicats, le Chemin de fer déclare que la politique de la Compagnie en matière de préférence d'emploi, de formation au travail et des remplacements dus aux décès et aux mises à la retraite aiderait grandement à atténuer l'effet de la suspension du service du train-voyageurs. De plus, on a fait remarquer qu'un régime de sécurité d'emploi adopté récemment sera profitable aux groupes sédentaires. Cet arrangement prend la forme de versements supplémentaires d'assurance-chômage, de paye de cessation d'emploi, d'allocations de réinstallation ailleurs, de recyclage et telles autres mesures appropriées en des circonstances particulières. Ces avantages seraient disponibles dans une certaine mesure à 105 des 129 employés.
>
> On estime que le service d'autobus créerait 57 emplois et le Chemin de fer formule la vœu que la plupart de ces

[*Texte*]

could be properly filled from its existing labour pool, not necessarily from the employees affected by the change, but at least from the Railway, leaving these employees' former positions available to some of those displaced by the discontinuance of the rail service.

Mr. Turner (London East): Are you aware of the fact that they have no seniority on other divisions of the Canadian National Railways? It is all right to say to a man that you will pay him severance pay, but if he is 50 years of age where is he going to go to get a job? The man still has to live, and he is a taxpayer and a consumer.

Mr. Taschereau: If you are putting the question to me, sir, these were the findings of one of the Commissioners, and concurred in by the other Commissioners who sat on the case.

Mr. Turner (London East): I talked with quite a few people in Newfoundland, and I understand it will be closer to 200, and possibly more; and also that the buses would take care of approximately 65. Therefore, we have a great many employees on the loose.

Mr. McGrath: The CNR's estimate is about as accurate as their accounting procedures.

Mr. Turner (London East): I think this order does not go far enough. After all, if a man gives his life to a railway, or any corporation, he should be taken into consideration when they make changes. This is supposed to be a society in which we all benefit through changes, and if various employees are going to be forced out of work through no fault of their own I definitely think the order should be given a second look and these employees given greater consideration.

Mr. Horner: Mr. Chairman, I have quite a list of questions. What would you say, Mr. Pickersgill, about the LCL freight rates in the Maritimes? I gathered that by being allowed to increase their LCL freight rates the railroads are, in a way, getting around the purpose and the intent of the Maritime Freight Rates Act. Does the Commission have any jurisdiction over the setting of LCL freight rates?

[*Interprétation*]

emplois puissent être comblés convenablement à même la réserve de main-d'œuvre existante, pas nécessairement par des employés affecté par le changement, mais du moins par des gens du chemin de fer, ce qui mettrait les emplois de ces anciens employés à la disposition de certains des employés déplacés par la suppression du service ferroviaire.

M. Turner (London-Est): Êtes-vous au courant du fait qu'il n'y a pas d'ancienneté dans d'autres services du National Canadien? Est-il juste de dire à un homme qu'on lui versera une allocation de fin de service? Où voulez-vous qu'un homme de 50 ans aille pour chercher du travail? Si c'est le cas, cet homme doit quand même pouvoir vivre, c'est un contribuable et un consommateur.

M. Taschereau: Si c'est à moi que vous posez la question, monsieur, je dirai que ce sont là les conclusions d'un des commissaires et les autres qui ont siégé étaient d'accord avec lui.

M. Turner (London-Est): J'ai parlé à un bon nombre de personnes à Terre-Neuve et je crois que cette mesure touchera près de 200 personnes et peut-être même plus; les services d'autobus embaucheront peut-être 65 d'entre eux. Donc, il y a bon nombre d'employés qui se trouvent en difficulté.

M. McGrath: Les prévisions du National Canadien sont aussi précises que sa comptabilité.

M. Turner (London-Est): Je pense que cette ordonnance laisse trop à désirer. Après tout, si un homme consacre toute une vie au service de sa compagnie de chemins de fer ou à toute autre société, on devrait en tenir compte. Nous vivons soi-disant dans une société où nous tirons profit de tous les changements, et s'il y a des employés qui doivent perdre leur emploi sans qu'ils en soient responsables, je suis convaincu que l'on devrait réétudier cette ordonnace et réserver un meilleur sort à ces employés.

M. Horner: Monsieur le président, j'ai toute une liste de questions ici. Monsieur Pickersgill, qu'auriez-vous à dire au sujet des tarifs des chargements incomplets dans les Maritimes? J'ai entendu qu'en permettant aux chemins de fer d'augmenter leurs tarifs de chargements incomplets ils contournent en quelque sorte les dispositions de la Loi sur le taux de transport des marchandises dans les Maritimes. L'établissement des tarifs de chargement incomplets est-il de votre compétence?

[*Text*]

Mr. Pickersgill: Yes, we certainly have. We have jurisdiction over these rates to the same extent that we have over any other rates.

I am going to count on Mr. Taschereau to correct me if I make any misstatements of law. My understanding is that LCL is a combination of the old express and the less-than-carload freight rates, and that in most parts of Canada there has been a total combination of the two.

In the Atlantic region, as I understand it, the LCL rates have been put in, but because the old rates have not been abrogated, any shipper who prefers to use the old freight rates has a free choice. If it is to his advantage to use the old freight rate rather than the new LCL rate he can do so, and there are certainly some shippers who do.

That is an interim situation, and it is an interim situation pending the submission, which was made only this week, by the Atlantic Premiers, and pending consideration by the government of that submission.

A long-term policy has not yet been enunciated but the present situation is that a shipper has the choice either to ship by the old freight rates—subject to correction, I think the old express rates are gone entirely—or by the new LCL rates. That choice, I gather, exists only in the Atlantic region.

Mr. Horner: Perhaps I could pursue that a little further. We found a great deal of dissatisfaction with these new rates. As I understand it, they are to come into effect very shortly, and you say there is nothing permanent yet established relative to maintaining the old rates?

Mr. Pickersgill: The new LCL rates are in effect and they are lower than the old express

• 1120

rates; but in many cases they are perhaps higher than the old freight rates. The express rates are gone but anybody who would have shipped anything by express now ships it LCL. They sometimes may be coincidental, but often they are rather lower, and the goods go in freight cars; they no longer go in express cars on passenger trains, in most cases. But anyone who wants to avail himself of the rates that were in force before the new LCL rates for the shipping of freight may do so.

[*Interpretation*]

M. Pickersgill: Oui, certainement, nous avons compétence pour ce qui est de ces tarifs tout comme pour ce qui est de tous les autres. Et je vais compter sur M. Taschereau pour apporter la rectification d'usage si je cite mal les dispositions de la loi. Si je comprends bien, les tarifs des chargements incomplets représentent un amalgame des tarifs de l'ancienne messagerie et de ceux des chargements incomplets, et dans la plupart des régions du Canada il y a eu un amalgame des deux. Si je ne me trompe pas, dans la région de l'Atlantique, on a introduit les tarifs des chargements incomplets, mais étant donné que les anciens tarifs n'ont pas été abolis, tout expéditeur qui préfère utiliser l'ancien tarif est libre de le faire. S'il trouve que les anciens tarifs lui conviennent mieux que les nouveaux tarifs de chargements incomplets, il peut y avoir recours, et il y a un bon nombre d'expéditeurs qui le font.

C'est une situation provisoire en attendant la présentation qui n'a eu lieu que cette semaine par les premiers ministres des provinces de la région de l'Atlantique, et en attendant que le gouvernement étudie cette présentation. Une politique à long terme n'a pas encore été énoncée. Mais, à l'heure actuelle, un expéditeur a le choix, soit d'expédier des marchandises en vertu de l'ancien tarif, je pense que l'ancien tarif a disparu, ou en vertu des nouveaux tarifs de chargements incomplets. Ce choix n'existe que dans la région de l'Atlantique.

M. Horner: Je vais pousser la question un peu plus loin. Ces nouveaux tarifs ont provoqué beaucoup de mécontentement. Si je comprends bien, ils seront mis en vigueur d'ici peu et vous dites qu'il n'y a rien de permanent qui ait été décidé pour ce qui est de maintenir les anciens tarifs?

M. Pickersgill: Les nouveaux tarifs de chargements incomplets sont en vigueur et sont inférieurs aux anciens tarifs des messageries; mais dans bien des cas, ils peuvent être supérieurs aux anciens tarifs marchandises. Les tarifs messagerie ont disparu, mais quiconque aurait expédié des marchandises par messagerie, le ferait présentement par chargement incomplet. Ce serait pure coincidence, mais bien souvent les tarifs sont plutôt inférieurs, et les marchandises sont expédiées dans des wagons-marchandises; dans la plupart des cas, elles ne sont plus expédiées dans les wagons-messagerie des trains de voyageurs. Mais quiconque désire se prévaloir des tarifs qui étaient en vigueur avant que le nouveau

[*Texte*]

Mr. Horner: May do so for a limited time.

Mr. Pickersgill: There is no limit on the time. Those rates are still in effect and they will still be in effect until they are changed.

Mr. Horner: What would you say would be the effect of reducing the 10 pound per cubic foot rule to 5 pounds per cubic foot density in setting these LCL rates.

Mr. Pickersgill: I think this would have to be very carefully considered. Perhaps I better not speculate. This is a suggestion being made to the government for a new policy and I think it would be rather unfair on my part to try to guess what the government would decide upon.

Mr. Horner: All right. I have another question. What would you say about the containerization program that is going ahead? We already have, as you know, the flour and grain export factor and a special rate in respect of eastern ports. Do you think that in respect of the containerized goods or unit train system there should also be a special rate because these goods are being exported out of eastern ports? Do you think these should have a rate similar to the one that flour and grain for export have?

Mr. Pickersgill: If I may answer your question, Mr. Horner, with a question: Do you think what I think about this really matters?

Mr. Horner: Oh yes, very much so, because any suggestion the Committee makes you can shoot them full of holes. We are studying the transportation industry and the problems in the Maritimes. You are to police these rates and you can lend this Committee a great deal of support, if the idea is right, or you can knock it.

Mr. Pickersgill: I just do not know about it. I just have to plead ignorance. Perhaps I should have done that in the first place.

Mr. Horner: I think you are hiding behind a shield of ignorance but there is quite a bit of knowledge back there.

Mr. Pickersgill: You have not proved all ny ignorance.

[*Interprétation*]

tarif des chargements incomplets soit mis en vigueur pour l'expédition des marchandises, peut le faire.

M. Horner: Pour une période limitée.

M. Pickersgill: Il n'y a pas de limite de temps. Ces tarifs sont toujours en vigueur et le seront jusqu'à ce qu'ils soient changés.

M. Horner: Quelles conséquences entraînerait, à votre avis, la modification de la règle des dix livres par pied cube pour la porter à une densité de cinq livres par pied cube, pour le tarif des chargements incomplets.

M. Pickersgill: Je pense qu'il faudrait étudier cette question très attentivement. Il serait peut-être préférable de ne pas faire de spéculations à ce sujet. C'est une suggestion faite au gouvernement pour établir une nouvelle politique et je crois qu'il serait injuste d'essayer de deviner ce que le gouvernement décidera.

M. Horner: Très bien. J'ai une autre question à poser. Alors que diriez-vous au sujet du système de cadres qu'on établit? Nous avons déjà, comme vous le savez, le facteur d'exportation de la farine et des céréales et un tarif spécial vers les ports de l'Est. Croyez-vous qu'à l'égard du système de cadres ou des trains homogènes, il devrait y avoir aussi un tarif spécial vu que les marchandises sont exportées par les ports de l'Est? Est-ce qu'il faudrait que le tarif soit analogue à celui de la farine et des céréales exportés?

M. Pickersgill: Si on veut bien me permettre de répondre à votre question par une question. Croyez-vous ce que je pense à ce sujet importe vraiment?

M. Horner: Oui, beaucoup, parce que vous pouvez jeter en l'air toutes les propositions du Comité. Nous étudions l'industrie des transports et les problèmes des maritimes. Vous devez exercer la surveillance de ces tarifs et vous pouvez vraiment appuyer le travail de ce Comité si son idée est bonne, ou encore tout jeter en l'air.

M. Pickersgill: Je n'en sais rien. Je plaide mon ignorance totale, c'est d'ailleurs ce que j'aurais du faire dès le début.

M. Horner: Je pense que vous vous cachez derrière le paravent de votre ignorance mais il y a beaucoup de connaissances derrière tout cela.

M. Pickersgill: Vous n'avez pas encore sondé le fond de mon ignorance.

[*Text*]

Mr. Horner: I am going to probe you on another question. Maritime shippers found a great deal of difficulty in shipping goods to the Newfoundland market. They claim that the rate by water from Montreal to Newfoundland was cheaper than the freight cost from the Maritime provinces to Newfoundland. In light of the intent of the Maritime Freight Rates Act do you think, from your position over all freight rates, that this is fair to the Maritime provinces?

Mr. Pickersgill: I am not sure it is even true and not being sure whether it is true or not, I really could not give an intelligent opinion as to whether it is fair.

Mr. Horner: Would you examine whether or not it is true later on?

Mr. Pickersgill: Oh yes, I think it is a very interesting point that ought to be studied.

Mr. Horner: I think this came up two or three times and I would appreciate your studying it.

I have a question on the compensatory aspect of freight going across to Port aux Basques on the southern tip of Newfoundland.

• 1125

Somebody dealt with this question earlier this morning. Can you honestly say that because the railroad is part of the government that they can set their own rate whether or not it is compensatory or otherwise and thereby jeopardize the competitive factor? I am talking about the special rate boxcars get on the ferries going across from Sydney or North Sydney to Port aux Basques.

Mr. Pickersgill: The courts decided that under the terms of union of Newfoundland with Canada that the traffic from Port aux Basques to North Sydney was to be treated as though it was rail traffic, and if the rates would be compensatory if it were a railway then they are, I would take it, compensatory by law. We know perfectly well they are not compensatory in fact because you vote huge sums of money to pay the deficit on that ferry.

Mr. Horner: That is a very good point you just made. I want to refer you to the few debates we had over the passage of this National Transportation Act.

Mr. Pickersgill: Not that.

[*Interpretation*]

M. Horner: Je vais le sonder par une autre question. Les expéditeurs des provinces maritimes éprouvent beaucoup de difficulté à expédier des marchandises au marché de Terre-Neuve. Ils prétendent que le tarif maritime de Montréal à Terre-Neuve est moins élevé que le coût de transport des provinces Maritimes à Terre-Neuve. A la lumière de l'intention derrière la Loi sur le transport des marchandises dans les provinces maritimes, croyez-vous, dans votre poste de surveillance sur l'ensemble des tarifs marchandises, que c'est juste pour les provinces maritimes?

M. Pickersgill: Je ne suis même pas sûr que c'est vraiment la situation et n'étant pas sûr si c'est vrai ou non, je ne saurais vous donner une opinion intelligente à cet égard.

M. Horner: Pourriez-vous vous assurer s'il en est ainsi?

M. Pickersgill: Oui, parce que c'est un point des plus intéressants qui devrait être éudié.

M. Horner: Je crois que c'est revenu sur le tapis à deux ou trois reprises et je vous saurais gré d'étudier la question.

Maintenant, je voudrais poser une autre question sur l'aspect compensatoire des marchandises expédiées à Port-aux-Basques, à l'extrémité sud de Terre-Neuve. Quelqu'un a traité de cette question ce matin. Pourriez-vous dire honnêtement que le chemin de fer fait partie du gouvernement, qu'il peut établir ses propres tarifs, qu'ils soient compensatoires ou non, mettant ainsi en danger l'aspect concurrentiel? Je parle de ces tarifs spéciaux pour les wagons-marchandises qui vont de Sydney ou de North Sydney à Port-aux-Basques par le transbordeur.

M. Pickersgill: Les tribunaux ont décidé qu'en vertu des conditions de l'union de Terre-Neuve au Canada que la route de Port-aux-Basques à North Sydney serait considérée comme s'il s'agissait d'une voie ferrée, et que si les tarifs seraient compensatoires, s'il s'agissait d'un chemin de fer alors j'en conclue qu'ils sont compensatoires aux termes de la Loi. Nous savons très bien qu'ils ne le sont pas en fait parce que vous votez de vastes crédits pour combler le déficit de ce transbordeur.

M. Horner: C'est une excellente observation. Je voudrais vous reporter aux quelques débats que nous avons eus sur l'adoption de cette Loi nationale sur les transports.

M. Pickersgill: Non, pas cela.

[*Texte*]

Mr. Horner: There were a few words said about it. The key to the passage of that Act was competition.

Mr. Pickersgill: That is right.

Mr. Horner: If I checked back I am sure that I could find where you mentioned that on one or two occasions in the House of Commons. Bearing that thought in mind—that competition was going to be the key to efficiency in the transportation industry—let us take another look at the situation in respect of the ferry from North Sydney to Port aux Basques. Can you honestly say that there is any room between the carriers for competition?

Mr. Pickersgill: I really do not think there is. That is one reason, that when I was Minister of Transport I recommended and the government and Parliament both accepted a subsidy to maintain a steamship service between Halifax and St. John's.

We felt that in view of the very considerable factual subsidization of the traffic by Port aux Basques it was not possible to compete profitably on that route and that it would be a mistake to have the link between Halifax and St. John's destroyed. That subsidy is still being paid by the government.

Mr. Horner: Mr. Pickersgill, bearing in mind what you have said, what would you think if this Committee recommended to the government that to maintain the competitive aspect of the transportation industry that the subsidy or the rate on the ferry should apply equally to both modes of transportation either on a square footage or ton basis—and if necessary a subsidy paid to all modes of transportation?

Mr. Pickersgill: Mr. Horner, having regard to my past and having regard to the fact that I am, at any rate, the theoretical author of the Bill—I do not say I am the author of the Act because you are one of the authors of that Act—

Mr. Horner: But not as much as I would have liked to have been.

Mr. Pickersgill: —and since the principle of competition as the most effective method of regulation is in that Bill, I can tell you I have not changed my mind.

Mr. Horner: Fine, thank you. I appreciate your view in that and I am sure that will substantiate our argument to the government.

[*Interprétation*]

M. Horner: On en a parlé un peu. La clé de l'adoption de cette Loi était la concurrence.

M. Pickersgill: C'est juste.

M. Horner: Je pense qu'en cherchant je pourrais retrouver les passages où vous en avez parlé une fois ou deux à la Chambre des Communes. Donc, en tenant compte de cela, que la concurrence serait la clé de l'efficacité de l'industrie des transports, voyons maintenant de nouveau la situation du transbordeur de North Sydney à Port-aux-Basques. Pouvez-vous dire honnêtement est-ce qu'il y a possibilité d'avoir de la concurrence entre les transbordeurs?

M. Pickersgill: Non, je ne le crois pas. C'est une des raisons pour lesquelles, lorsque j'étais ministre des Transports j'ai recommandé, et le gouvernement et le Parlement ont accepté de noter une subvention pour maintenir un service maritime entre Halifax et St-Jean.

Nous étions d'avis que vue la subvention considérable accordée au transport vers Port-aux-Basques, il n'était pas possible de concurrencer de façon rentable sur ce parcours et que ce serait une erreur de retirer le lien entre Halifax et St-Jean. Cette subvention est toujours payée par le gouvernement.

M. Horner: Tenant compte de ce que vous avez dit, monsieur Pickersgill, que penseriez-vous si le Comité recommandait au gouvernement qu'en vue de maintenir l'aspect concurrentiel de l'industrie des transports, que cette subvention ou encore ce tarif devrait s'appliquer aux deux modes de transport, en calculant soit par pied cube ou encore selon le tonnage, et s'il le faut, qu'on accorde une subvention à tous les modes de transport.

M. Pickersgill: Monsieur Horner, considérant mon passé et tenant compte aussi du fait que je suis au moins l'auteur théorique du projet de loi—je ne dis pas que j'ai rédigé la Loi même, parce que vous êtes un des auteurs de la Loi.

M. Horner: Pas autant que j'aurais voulu l'être.

M. Pickersgill: Étant donné que le principe de la concurrence comme le moyen le plus efficace de réglementer est exprimé dans le projet de loi, je vous assure que je n'ai pas changé d'idée.

M. Horner: Très bien, merci. Je comrends votre point de vue et je suis sûr que cela nous permettra d'avoir des preuves à l'appui lorsque nous ferons des recommandations au gouvernement.

[*Text*]

I have one further question. There was evidence found in Newfoundland that loaded boxcars starting out from Port aux Basques

• 1130

travelled across the province to St. John's and in most cases went back empty. We had many submissions before us stating that on these empty boxcars going back there was an exorbitant high freight rate which pretty well prohibited anybody from using them. Has this been brought to your attention as the head of the CTC.

Mr. Pickersgill: I would think that whoever set the rates in the railway ought to have his head read if he put the rates so high that he could not get traffic, if there was any traffic to be got, as long as the rate was compensatory in the strictly legal sense. A lot of people allege that the freight rates are prohibitive, but an allegation is not always a fact. I cannot believe that the CNR are deliberately trying to lose business.

Mr. Horner: We have submissions to that effect and I wanted your opinion on it.

One further question with regard to air service. Is there a figure that you use with regard to the movement of population before a regional carrier is given landing rights into another town or city? Is there a figure for the air movement of 20,000 or 50,000 people? Is there a figure which you use as a key or as a guide in this respect?

Mr. Pickersgill: I do not think so. I think we try to make a general appraisal of whether the service is likely to succeed. It is not very good for anybody if a service is started and people get accustomed to using it, and then it goes bankrupt and stops.

Mr. Horner: I am talking about initiating a new service.

Mr. Pickersgill: So am I.

Mr. Horner: I had understood that the movement of 30,000 people—

Mr. Pickersgill: I am allergic to that figure.

Mr. Horner: But it has been used as a rule of thumb.

Mr. Pickersgill: Not to my knowledge.

Mr. Horner: Not to your knowledge.

[*Interpretation*]

Une dernière question. A Terre-Neuve, on a constaté que les wagons de marchandises qui partent de Port-aux-Basques traversent la province jusqu'à St-Jean et retournent vides dans la plupart des cas. Un bon nombre des mémoires présentés protestent contre le fait que le tarif est très élevé sur ces wagons de marchandises vides, ce qui empêche pratiquement les gens de s'en servir. Je me demande si on a attiré votre attention à ce problème en tant que président de CCT.

M. Pickersgill: Je dirais que la personne qui a établi le tarif devrait peut-être se faire examiner la tête, si elle a fixé un tarif si élevé qu'il n'y a plus de trafic, si jamais il y en a eu, aussi longtemps que le taux est compensatoire, au sens strictement juridique. Plusieurs prétendent que les tarifs de transport des marchandises sont prohibitifs, mais ce n'est pas nécessairement un fait. Je ne peux pas croire que le CN essaie délibérément de perdre ses clients.

Nous avons des mémoires à ce sujet, et je voulais avoir votre opinion là-

M. Horner: Nous avons des mémoires à ce sujet, et je voulais avoir votre opinion là-dessus.

Une dernière question en ce qui concerne le service aérien. Y a-t-il un chiffre que vous employez vis-à-vis les mouvements de population, avant d'accorder les droits d'atterrissage à un transporteur aérien dans une ville? Est-ce 20,000 ou 50,000 personnes? Est-ce qu'il y a un chiffre qui vous guide à ce sujet?

M. Pickersgill: Je ne le crois pas. Je crois que ce que nous essayons de faire, c'est une évaluation générale afin de savoir si le service pourrait réussir. Car ce n'est pas tellement agréable pour quelqu'un si on lance un service, que les gens s'habituent ensuite à l'utiliser, puis qu'il fasse faillite.

M. Horner: Je parlais de l'installation d'un nouveau service.

M. Pickersgill: Moi aussi.

M. Horner: J'avais compris que le chiffre de 30,000 personnes...

M. Pickersgill: Je suis allergique à ce chiffre.

M. Horner: Oui, mais il servit de méthode empirique.

M. Pickersgill: Pas à ma connaissance.

M. Horner: Pas à votre connaissance?

[*Texte*]

Mr. Pickersgill: It may be but I have never heard it.

Mr. Horner: You have never heard it, and no figure like it.

Mr. Pickersgill: No.

The Chairman: Mr. Marshall.

Mr. Pickersgill: I do not know everything, you know.

Mr. Horner: I suspect you know a lot more than you are giving out.

Mr. Marshall: Mr. Pickersgill, I am concerned about the discontinuance of Clarke Steamships' service to Botwood. I am also concerned about the fact that the last trip of Clarke Steamships to Corner Brook will be on March 24. Are you aware of this? Also, what is the situation with regard to subsidies to Clarke Steamships?

Mr. Pickersgill: Mr. Marshall, I think this is rather directly related to the question that Mr. Horner asked a moment or two ago about whether or not the rates to Newfoundland by Port aux Basques are such that it is impossible for anyone to operate a competitive direct steamship service to Montreal. I know this matter is under very active consideration at the present moment but I do not think any conclusion has been reached on it.

Mr. Marshall: Are Clarke Steamships going to get a subsidy next year?

Mr. Pickersgill: I am here to tell you what I know, not to make predictions.

Mr. Marshall: This concerns me very greatly because, as you know, $1 million is allotted in the estimates for harbour development in Corner Brook. I am wondering about this because the CNR have a dock and Bowaters have a dock. The dock was primarily for Clarke Steamships and other carriers.

Mr. Pickersgill: I would hope that in the interests of transportation and in the interests of Newfoundland that there will continue to be a service between Corner Brook and Montreal. I think there will be adequate traffic for such a service and I hope there will continue to be a service.

Mr. Marshall: Thank you.

The Chairman: Mr. Rose.

[*Interprétation*]

M. Pickersgill: Peut-être, mais je ne l'ai jamais entendu.

M. Horner: Non? Et pas d'autres chiffres non plus?

M. Pickersgill: Non.

Le président: Monsieur Marshall.

M. Pickersgill: Je ne connais pas tout, vous savez.

M. Horner: Je crois que vous en savez beaucoup plus que vous ne voulez le dire.

M. Marshall: Monsieur Pickersgill, je me préoccupe aussi de la discontinuation du service de la *Clarke Steamship* jusqu'à Botwood et aussi du fait que le dernier voyage de la Clarke Steamship à Corner Brook se fera le 24 mars. Etes-vous au courant de cela? Et, quelle est la situation en ce qui regarde les subventions données à la Clarke Steamship?

M. Pickersgill: Cela, monsieur Marshall, est directement relié à la question que vient de poser M. Horner, il y a un instant, quant à savoir si les taux à Terre-Neuve, en passant par Port-aux-Basques, sont tels qu'il est impossible pour quiconque d'avoir ou d'assurer un service concurrentiel, soit un service de navires à vapeur en direct jusqu'à Montréal. Je sais que cette question fait l'objet d'une étude très active à l'heure actuelle, mais je ne crois pas qu'on en soit arrivé à des conclusions.

M. Marshall: Est-ce que la *Clarke Steamship* recevra une subvention l'an prochain?

M. Pickersgill: Je suis ici pour vous dire ce que je sais, non pas pour faire des prédictions.

M. Marshall: Cela me préoccupe beaucoup car, comme vous le savez, dans les prévisions budgétaires, on a prévu un million de dollars pour Corner Brook, et je me posais des questions à ce sujet, étant donné que le National-Canadien emploie le quai, de même que la Bowaters, alors que le quai était destiné tout d'abord à la Clarke Steamship et à d'autres compagnies.

M. Pickersgill: J'espère que, dans les intérêts des transports et dans les intérêts de Terre-Neuve, on continuera à avoir un service entre Corner Brook et Montréal. Je crois qu'il y aurait suffisamment de trafic pour un tel service et j'espère que le service continuera.

M. Marshall: Merci.

Le président: Monsieur Rose?

[*Text*]

Mr. Rose: I would like to go back, Mr. Chairman, to the line of questioning pursued by Mr. Horner having to do with the word "competition". However, before that he mentioned that he felt the subsidies perhaps should not be directed to the carrier but to the shipper. My concern, when you consider the low standard of living for many people in that area, is that the subsidies should in turn reach the consumer and I am not convinced that this happens.

• 1135

I think it is very important that there be a competitive transportation line within the Maritime Provinces, and we have heard some representations in favour of extending the MFRA rates to trucks under part 3 of the Act.

I also understand that the intraprovincial as well as the interprovincial trucking situation is a virtual monopoly in the Maritimes and that the public utilities commission of Nova Scotia has turned down truck line applications from Ontario and Quebec from companies that wish to operate within the boundaries of the Atlantic provinces. In my opinion it really does not make sense to praise the concept of competition on the one hand and disallow it on the other, through a provincial regulation. I would like your comments on this.

Mr. Pickersgill: Most respectfully, sir, I think I will have to refrain from making any comments on how the government of Nova Scotia administers the Province of Nova Scotia, or how the government of any other province administers its affairs, because I think it would be the highest degree of impropriety for me as a federal public servant to comment on the conduct of provincial governments or provincial government bodies.

However, you raised another point, Mr. Rose, which I would like to comment on. If you read the report of the Duncan Commission you will see that the purpose of the aid that was furnished for transportation to the then Maritime Provinces, which were extended in 1949 to include Newfoundland, was not for the purpose of reducing prices to consumers. It was for the purpose of giving the producers in the Maritime Provinces, and later the Atlantic Provinces, access to the markets of central Canada, which in the case of New Brunswick and Nova Scotia they felt was one of the undertakings of the original

[*Interpretation*]

M. Rose: J'aimerais revenir, monsieur le président, aux questions posées par M. Horner, qui avaient trait à l'expression «concurrence». Il a mentionné avant cela, toutefois, qu'il croyait que la subvention ne devrait peut-être pas être accordée aux transporteurs, mais à l'expéditeur. Personnellement, quand vous considérez le bas niveau de vie des gens de cette région, je me demande si cette subvention ne devrait pas être versée directement aux consommateurs. Je ne suis pas convaincu du fait que cela se produit.

Je crois qu'il est important d'avoir un mode de transport concurrentiel dans les provinces Maritimes, et nous avons entendu des représentations pour étendre aux camions les tarifs de transport des marchandises, en vertu de la partie 3 de la Loi.

Mais, j'ai cru comprendre aussi que la situation du camionnage provincial, ainsi que interprovincial, se trouve à être un monopole dans les provinces Maritimes et que la Commission des services publics de la Nouvelle-Écosse a refusé des demandes de camionneurs de l'Ontario et du Québec, afin de pouvoir assurer une exploitation à l'intérieur des limites des provinces atlantiques. Et alors, je trouve que cela n'a pas de sens que d'essayer de faire état de la concurrence d'une part et, ensuite, de ne pas permettre cette concurrence grâce à une réglementation provinciale; j'aimerais avoir vos commentaires à ce sujet.

M. Pickersgill: Je crois qu'en tout respect, il faudrait que je m'abstienne de commenter la façon dont le gouvernement de la Nouvelle-Écosse ou toute autre province administre ses affaires, car je ne devrais pas, à titre de fonctionnaire fédéral, commenter la conduite des gouvernements provinciaux ou des organismes de ces gouvernements provinciaux.

Toutefois il y a un autre point que vous avez soulevé, monsieur Rose, et je voudrais bien dire quelque chose à ce sujet. Si vous lisez le rapport de la Commission Duncan, vous y verrez que l'objet de l'aide donnée aux transports, dans les provinces Maritimes d'alors, et en 1949 cela a été étendu aussi à Terre-Neuve, n'était pas accordée aux fins de réduire les prix au consommateur, mais plutôt pour donner aux producteurs des provinces Maritimes et plus tard des provinces atlantiques un accès aux marchés du centre du Canada. On estimait à ce moment-là qu'il s'agissait d'un engagement de la Confédéra-

[*Texte*]

Confederation of 1867 and it was a condition of the union with Prince Edward Island in 1873 and of the union with Newfoundland in 1949.

In other words, to the best of my knowledge up to now it has never been a part of public policy. I am not saying whether this is meritorious or not, I am just trying to be historical about it. It has never been the policy up to now to try to subsidize consumers. The purpose of the Maritime Freight Rates Act, which emanated from the Duncan Commission, is to make it easier for producers in the Atlantic Provinces to get access to the big markets of central Canada. That is the objective, and I think if you look at submissions made by the four Atlantic premiers you will find that is still the prime objective in the region.

Mr. Rose: I would like to congratulate you, Mr. Pickersgill, on your fine sense of tact in that you would not presume to comment on any decision reached by the Nova Scotia government. But certainly, sir, I think we can all agree—and you will notice I am not asking you to agree—that the ultimate reason for any kind of subsidy on transportation is to assist the people in the region. This is what the exercise is all about, is it not? I hope it is.

I am pleased with your response but the nod you made will not go on the record. Nevertheless, it appears to me that transportation—although this is what we are sitting here for—is really only one part of the whole basic problem and perhaps we are involving ourselves in a patchwork or a partial investigation, and perhaps we can broaden it in another way.

As a final comment, this matter of subsidies to either shippers or carriers has come up time and time again and this is what the MFRA rate is all about, whether you call it a subsidy or not, in the same way that low wages are a hidden subsidy. They are subsidies, no matter how you look at it. But certainly there must be some industries down there that do need these subsidies.

Has the CTC ever had any representtions before it, or have they ever considered as a body, any kind of selective subsidy to those industries that need it for social objectives?

[*Interprétation*]

tion de 1867, dans le cas du Nouveau-Brunswick et de la Nouvelle-Écosse, et se trouvait aussi à être l'une des conditions de l'union avec l'Île-du-Prince-Édouard, en 1873, et avec Terre-Neuve, en 1949.

Autrement dit, au mieux de ma connaissance, cela n'a jamais été partie de la politique publique jusqu'à maintenant. Je ne dis pas que cela est sage ou non ou a du mérite ou non; j'essaie tout simplement de vous faire l'historique. Jusqu'à maintenant, on n'a jamais eu comme politique l'idée de subventionner le consommateur. L'objet de la Loi sur les taux de transport des marchandises dans les provinces Maritimes, qui découle du rapport de la Commission Duncan, voulait assurer, ou voulait faciliter, pour les producteurs des provinces atlantiques, l'accès aux gros marchés du centre du Canada. Voilà l'objectif principal. Je crois que si vous examinez les mémoires présentés par les quatre premiers ministres des provinces atlantiques, vous verrez que c'est là toujours le principal objectif dans la région.

M. Rose: Je voudrais vous féliciter, monsieur Pickersgill, pour le tact dont il a fait preuve en refusant de commenter une décision du gouvernement de la Nouvelle-Écosse. Mais je crois que nous sommes tous d'accord—et veuillez remarquer que je ne vous demande pas d'être d'accord—que la raison ultime d'une subvention, c'est pour aider les gens de la région; en fait, c'est la raison pour laquelle on agit, n'est-ce pas? Je l'espère.

Je suis content de votre réponse, mais votre geste de la tête ne figuera pas dans le compte rendu. Il me semble toutefois que les transports, même si c'est la raison pour laquelle nous siégeons aujourd'hui, ne sont qu'une seule partie du problème d'ensemble, et que peut-être nous essayons de remédier ou d'enquêter partiellement, alors que nous pourrions peut-être élargir notre champ d'enquête.

Un dernier commentaire; cette question, maintenant, de subventions, soit aux expéditeurs, soit aux transporteurs, a été soulevée à maintes reprises. Et c'est la raison d'être du tarif prévu par la Loi sur les taux de transport des marchandises dans les Maritimes, qu'on l'appelle subvention ou non, de la même façon que les bas salaires sont des subventions déguisées. Ce sont des subventions, peu importe comment on les envisage.

Mais certainement, il doit y avoir des industries qui n'ont pas besoin de subventions dans cette région.

Est-ce que la Commission canadienne des transports a déjà reçu des mémoires, ou est-ce qu'elle a déjà étudié la possibilité d'établir des subventions sélectionnées pour les

[*Text*]

Like the Newfie Bullet in Mr. Givens comment, this traditionally has been one of the basic reasons for rail lines that might run at a loss or might run into areas where they are perhaps not needed. You can call them political if you like, but they are really social objectives.

Mr. Pickersgill: Of course, a great deal of consideration has been given all through the history of Canada to the provision of transport which is not remunerative—I accept your adjective, "for social purposes" and—when I was the Minister of Transport I announced a policy for regional air carriers. I announced that certain subsidies would be given to enable air services to be provided to remote regions of this country of which there are a good many, not merely in the Atlantic Provinces but in many parts of the country.

I do not think there is any province that does not have some remote regions, except possibly Prince Edward Island.

Of course these things have to be considered and I think one has to consider them in a practical sort of way. If one lonely trapper wants to locate himself in the middle of Ungava I think it would scarcely be regarded as a useful public objective to see that he got public transport. You know, I am going to one quite ridiculous extreme and one has to make judgments about these, I think.

In our research division we are attempting to study these problem and trying to examine them from a cost benefit standpoint and not a narrow financial cost benefit standpoint, so that we will be in a position so far as transport goes to advise the government when we are asked to do so as well as we can about what is the most effective way of doing these things at the least cost to the taxpayers where there is a good social reason.

Mr. Rose: I realize my question was rather vague, unwieldy and meandering but I wish you would comment, if you will, on the concept of selective subsidies.

Mr. Pickersgill: Concerning the comment of the Atlantic Premiers, I take it that you have not had time yet to read their submission, but I do recommend it to all the members of the Committee. It is a very interesting and thoughtful document and they do make some very interesting suggestions indeed on this precise subject.

[*Interpretation*]

industries qui en auraient besoin pour des fins sociologiques. Par exemple, le *Newfie Bullet* mentionné par M. Givens, traditionnellement cela a été une raison pour les chemins de fer qui pourraient subir des pertes dans des régions où ce n'est peut-être pas nécessaire. Dites peut-être que c'est pour des raisons politiques, mais en fait, il s'agit d'objectifs sociaux.

M. Pickersgill: Évidemment, on a accordé au cours de l'histoire du Canada beaucoup d'importance à un mode de transport qui n'est pas rénumérateur et par conséquent, j'accepte votre propos, à des fins sociologiques. Quand j'étais ministre des Transports j'avais annoncé une politique pour les transporteurs aériens régionaux. J'avais annoncé que certaines subventions seraient accordées pour permettre aux services aériens d'assurer un service dans les régions éloignées de ce pays. Il y en a beaucoup, pas simplement dans les provinces de l'Atlantique mais dans plusieurs régions du pays.

Je ne crois pas qu'il y ait une seule province qui n'ait pas de régions éloignées, sauf peut-être l'Île du Prince-Édouard. Évidemment, il faut tenir compte de ces choses et l'on doit en tenir compte du point de vue pratique aussi. Si un seul trappeur veut s'installer au beau milieu de l'Ungava, je crois qu'on aurait beaucoup de difficultés à dire qu'il s'agit là d'un objectif public que de lui assurer un transport. Je donne un exemple extrême si vous voulez et ridicule mais il faut en arriver à des jugements.

Dans notre service de recherches, nous essayons d'étudier ces problèmes et nous essayons aussi de les examiner au point de vue de l'analyse des coûts et des frais et non pas de façon étroite, afin que nous soyons en mesure en ce qui concerne les transports d'aviser le gouvernement, on nous demande de le faire du mieux que l'on peut, quant à la meilleure façon d'effectuer ces choses aux moindres frais pour le contribuable là où il y a une bonne raison sociale de le faire.

M. Rose: Je conçois que ma question était plutôt vague et filandreuse mais est-ce que vous pourriez commenter sur les subventions sélectionnées?

M. Pickersgill: Pour ce qui est de cette observation de la part des premiers ministres des provinces de l'Atlantique, je comprends que vous n'ayez pas eu le temps de le lire, mais je vous recommanderais fortement aux membres du Comité de lire ce document qui est très intéressant, très réfléchi. Les premiers ministres font des suggestions très intéressantes sur ce sujet précis.

[*Texte*]

But there is just one other observation that perhaps you would not mind my making, Mr. Rose. It seems to me that there are two ways in which you could theoretically help the people of a region by reducing transport costs below a financial viable level. One is with a view to reducing the cost of consumer goods. So far as I can recollect, that has never been done consciously and deliberately in any part of Canada except possibly in the extreme north, and I am not quite sure about that.

Whether it should be or not is a very big philosophical question but there is no question whatever that if you use subsidies on transport for the purpose of enabling producers to get access to markets, this is one device for increasing employment in an area, increasing the income of the people employed in an area. Now, it is like all these devices that interfere with the free play of economic forces in the old fashioned nineteenth century way. You have to look at them very carefully and examine their teeth to see whether they really bite and see who they bite, but this is the fundamental principle, it seems to me, on which the Maritime Freight Rates Act was based.

Mr. Rose: I am very pleased with your very thoughtful and comprehensive reply. In conclusion I would like to make a comment. My particular concern is that the money that is spent on transportation subsidies is not frittered away...

An hon. Member: Hear, hear!

Mr. Rose: ...to become a sort of social welfare program for industrialists, and that the people in the communities in the areas where these subsidies are operative receive an ultimate benefit from them.

An hon. Member: Hear, hear!

Mr. Pickersgill: Well, may I make a comment too? I am one of those people who was brought up in the bush in the poorer part of northern Manitoba and I do not like to see money frittered away for any reason.

Mr. Horner: Just one quick question, Mr. Chairman. In relation to the railroad in Newfoundland, that railroad before Confederation being solely within that country, if they had joined Confederation and not given the railroad to the CNR to run, would your Commission have any jurisdiction over a railroad solely within the province?

[*Interprétation*]

Il y a peut-être une autre observation que vous n'auriez peut-être pas d'objection que je vous signale, monsieur Rose. Il me semble qu'il y a deux façons d'aider, théoriquement, les gens d'une région donnée, en réduisant les frais de transport au-dessous d'un niveau financièrement viable. L'une de ces méthodes, vise à réduire les frais des biens de consommation. Autant que je me souvienne, cela n'a jamais été fait consciemment et délibérément dans aucune partie du Canada, sauf peut-être dans le Nord, et encore je n'en suis pas sûr.

Que l'on doive le faire ou non, voilà une question philosophique importante, mais il n'y a pas de doute toutefois que si on utilise des subventions aux transports aux fins de permettre aux producteurs d'obtenir un accès au marché, c'est un moyen d'augmenter l'emploi dans une région donnée et d'augmenter les revenues des gens qui sont employés dans cette région. C'est comme tous ces moyens que l'on emploie et qui interfèrent avec le libre jeu des forces économiques. Il faut les examiner attentivement pour voir quelle est leur force et qui cette force affecte, et voilà il me semble la base même de la loi sur les taux de transports des marchandises dans les provinces Maritimes.

M. Rose: Je suis très heureux de votre réponse, très complète. En conclusion, je voudrais formuler une observation. Ma préoccupation principale c'est que l'argent que nous dépensons pour les subventions du transport n'est pas gaspillé...

Une voix: Bravo! Bravo!

M. Rose: ...pour devenir une sorte de programme de bien-être social pour les industriels et que les gens dans les collectivités dans les régions où l'on trouve ces subventions reçoivent un avantage ultime de ces subventions.

Une voix: Bravo! Bravo!

M. Pickersgill: Permettez-moi de faire une observation moi aussi. Je suis l'un de ceux qui ont été élevés dans la brousse des régions pauvres du Nord du Manitoba et je n'aime pas du tout voir l'argent gaspillé que ce soit pour n'importe quelle raison.

M. Horner: Une dernière question très brève monsieur le président. En ce qui concerne les chemins de fer de Terre-Neuve, avant la Confédération, ce chemin de fer ne se trouvait qu'à l'intérieur de la province; supposons qu'il se soit joint à la Confédération, et n'ait pas remis l'exploitation de ses chemins de fer au Canadien National, est-ce que vous auriez compétence sur les chemins de fer de cette province?

[*Text*]

Mr. Pickersgill: Well, if the railway had remained the property of the government of Newfoundland which, on March 31, 1949 at midnight became a provincial government, it would then have been a provincial railway and wholly within the boundaries of a province and would not have been subject to the Railway Act unless it had been brought under the Railway Act. In other words, it would have been like the PGE or the Ontario Northland Railway.

Mr. Horner: And your Commission has no jurisdiction over those railroads?

Mr. Pickersgill: That is right.

Mr. Skoberg: Mr. Pickersgill, on our tour Mr. K. C. Irving appeared before us and made a few statements in his brief that concerned me considerably. He suggested that they cannot get enough rail cars to move wood chips and lumber at any price. Now, I realize this can be associated with the grain situation and the allocation of boxcars and I presume the same thing would apply, that your Commission would be responsible if you have a complaint to see where these cars are. Now, I am asking whether or not you have received any complaint from K. C. Irving about the lack of cars to move his wood chips?

Mr. Pickersgill: I have not personally. There may have been some complaints in the ordinary course to the Railway Transport Committee. If there were they would certainly be looked into. I have been told in the last few days that there has been a very marked shortage of boxcars in southern New Brunswick, not related to wood chips, but consequent upon the extraordinary expansion of traffic through the port there which is related, I believe, to some labour troubles in some other parts of the world.

Mr. Skoberg: Another statement that Mr. Irving made to the Committee is that when the CNR was faced with competition they reduced their rates to meet that competition, to undercut the competition, to eliminate it. Now, can the CNR reduce their rates without coming before your Commission?

Mr. Pickersgill: As long as they remain compensatory, yes.

Mr. Skoberg: Do you take into consideration the facts that Mr. Irving is stating here? He is referring to competition?

Mr. Pickersgill: You did not think of asking Mr. Irving if he ever reduced his rates to meet competition?

[*Interpretation*]

M. Pickersgill: Si le chemin de fer était resté la propriété du gouvernement de Terre-Neuve le 31 mars 1949 alors qu'il devenait un gouvernement provincial, le chemin de fer aurait été un chemin de fer provincial entièrement à l'intérieur des limites d'une province et par conséquent n'aurait pas relevé de la loi sur les chemins de fer, à moins d'avoir été ajouté à la loi, en d'autres termes, il aurait été comme le PGE ou le Ontario Northland.

M. Horner: Et votre Commission n'a aucune autorité sur ces chemins de fer?

M. Pickersgill: C'est exact.

M. Skoberg: M. Pickersgill, M. K. C. Irving a paru devant nous et a fait quelques observations dans son mémoire qui me préoccupent particulièrement. Il a suggéré qu'on ne pouvait pas obtenir suffisamment de voitures pour le transport des copeaux et du bois, à n'importe quel prix. J'imagine que cela s'applique aussi à la situation des grains et des wagons marchandises, mais j'imagine que vous avez la responsabilité de savoir où se trouvent les wagons. Avez-vous reçu des plaintes de la part K. C. Irving en ce qui concerne le manque de wagons pour le transports de ses copeaux.

M. Pickersgill: Pas moi personnellement. Il se peut qu'il ait eu des plaintes auprès du comité des transports ferroviaires. S'il y en a eu, elles seront certainement examinées. On m'a dit que depuis quelques jours, il y avait un manque critique de wagons de marchandises dans le sud du Nouveau-Brunswick non pas pour les copeaux, mais en raison de l'extraordinaire expansion du trafic dans les ports qui est, je pense, le résultat de certains conflits ouvriers ailleurs dans le monde.

M. Skoberg: Autre chose que M. Irving nous a dit, c'est que quand la National-Canadien a eu à faire face à une concurrence, il a réduit ses prix pour essayer d'égaler la concurrence. Est-ce que le CN peut réduire ses tarifs sans comparaître devant votre Commission?

M. Pickersgill: Aussi longtemps que les taux restent compensatoires, oui.

M. Skoberg: Tenez-vous compte de ce que M. Irving a dit en parlant de la concurrence?

M. Pickersgill: Avez-vou pensé à demander à M. Irving s'il avait réduit ses taux pour faire face à la concurrence?

[*Texte*]

Mr. Skoberg: He suggested to us, I believe, that he had to build his own facilities because he could not obtain the proper service. Another of his statements that concerned me somewhat—and I do not know how you pronounce this name—is the removal of the Buctouche service by the CNR. Now, he said that verbal assurances were given on behalf of the various levels of government that adequate service would be provided. I am wondering whether they made an appearance before the Commission at any time before the removal of this service?

Mr. Pickersgill: The Buctouche branch was removed before there was any Commission. It was an application before the Board of Transport Commissioners at the time, I think, when I was Minister of Transport and it was understood that it would not be abandoned without a payment to the government of New Brunswick to help them to build a highway. That payment was duly voted by Parliament and made to the government and I have no doubt whatever it was spent on the highway and that there is a much better highway as a result.

Mr. Skoberg: In other words, the final statement of Mr. Irving, when he said these commitments have not been honoured, is not particularly correct in fact.

Mr. Pickersgill: Every commitment of which I am aware that was made to the Government of New Brunswick and every order of the Board of Transport Commissioners of which I am aware has been carried out to the full in respect of that particular branch.

Mr. Skoberg: I want to revert very briefly to the Board's decision on the Newfoundland passenger service. We realize April 15 is coming up very shortly. Could there be an indication from you, Mr. Pickersgill as President of the CTC, whether or not the RTC will look at this application and render a decision very shortly in order to assist this Committee in determining what type of recommendation we may make?

Mr. Pickersgill: There is no question whatever, as Mr. Taschereau has indicated by reading the order, that the railway committee has a duty to deal with with this matter before April 15.

Mr. Skoberg: But you appreciate the fact that this Committee has to render a report to Parliament and as such this may be one of the situations we will be looking at, and if there is a decision by the Commission in regard to the retention or discontinuance of

[*Interprétation*]

M. Skoberg: Il nous a dit, je crois, qu'il avait dû construire ses propres installations parce qu'il ne pouvait pas obtenir de service adéquat. Une autre déclaration de M. Irving et je ne sais pas comment vous prononcez ce nom mais je crois que c'est l'élimination du service Buctouche par le CN. Il a dit qu'il y avait eu des assurances orales de la part des divers niveaux du gouvernement à l'effet qu'on continuerait un service adéquat. Je me demande si ces gens ont comparu devant la Commission avant que ce service ne soit supprimé?

M. Pickersgill: La division de Buctouche a été éliminée avant l'existence même de la Commission. C'était une demande faite auprès des Commissaires des transports du Canada au moment où j'étais ministre des Transports. Il était entendu qu'on n'abandonnerait pas le service sans qu'il y ait un paiement de la part du gouvernement du Nouveau-Brunswick pour aider à la construction d'une route. Ce paiement a été voté par le Parlement et a été effectué au gouvernement du Nouveau-Brunswick et je n'ai aucun doute qu'il est été dépensé pour la grand-route et que la grand-route est bien meilleure.

M. Skoberg: En d'autres termes, la dernière déclaration de M. Irving, portant que les engagements n'ont pas été honorés, n'est pas tellement exacte de fait.

M. Pickersgill: Tout engagement pris à l'endroit du gouvernement du Nouveau-Brunswick at toute ordonnance de la Commission des transports du Canada, à ma connaissance, ont été pleinement honorés en ce qui concerne cette direction particulière.

M. Skoberg: Je veux revenir maintenant à la décision de la Commission au sujet du service voyageurs de Terre-Neuve. Nous savons que le 15 avril s'en vient très vite. Est-ce que, monsieur le président de la Commission canadienne des transports, vous pourriez nous dire si le Comité du transport ferroviaire examinera cette demande et prendra une décision sous peu afin d'aider notre Comité dans la formulation de nos recommandations?

M. Pickersgill: Il n'y a pas de doute du tout, M. Tachereau vous l'a déjà di en vous donnant lecture de l'ordonnance, que le Comité du transport ferroviaire a le devoir d'étudier cette question avant le 15 avril.

M. Skoberg: Mais vous comprenez que notre Comité doit rendre un rapport au Parlement et que cela pourrait être une des situations que nous étudierons. S'il y a une décision de la part de la Commission à l'égard de la continuation ou la discontinuation du ser-

[*Text*]

the passenger service it would have a great bearing on our report. I would ask that you take this into consideration.

Mr. Pickersgill: Obviously, the first duty we have is to make sure that all the presentations that are before the Commission and all the investigations that the Commission itself undertook to make are properly carried out and these should not be skipped. But I certainly will take into account the suggestion you have made.

In this context perhaps you might permit me to add that there has been the most dramatic increase in passenger traffic on the Canadian National Railways in Newfoundland since December. The traffic, for example, in December was up 48 per cent from December a year ago, in January it was up 97 per cent, and in February it was up 121 per cent. If you would like a breakdown for February as between the train and the bus, there were 1,494 passengers on the train and 6,068 on the bus.

Mr. McGrath: How many buses a day were there for that period?

Mr. Pickersgill: I just do not happen to have that information.

Mr. McGrath: I would suggest that that is a very unfair comparison because you have three trains a week...

The Chairman: Order please.

Mr. McGrath: ...and about six buses a day. That was a very unfair comparison.

The Chairman: Order please.

Mr. Skoberg: I would just like to comment that whatever decision is made by members of this Committee it is made on behalf of the entire nation. It was suggested by a member from the far west that the west did not like to subsidize the east, but being from Saskatchewan we appreciated the Newfoundlanders helping us with the South Saskatchewan River, and this is exactly the same thing.

The Chairman: Mr. Bell.

Mr. Bell: Mr. Chairman, I apologize for not being up to date in Committee activities, but I would like to ask Mr. Pickersgill one question.

Mention has been made up of the tie-up in the Port of Saint John. It really is very serious, it is akin really to Vancouver, but I think it is moving along now. I would like to say one thing, if I may, on that. It appears now from the information that we are getting—and I must say that the Department of

[*Interpretation*]

vice voyageur, cela pourrait grandement influer sur notre rapport. Je vous demanderais donc de prendre cela en considération.

M. Pickersgill: Le premier devoir que nous avons, c'est d'assurer que toutes les instances devant la Commission ainsi que toutes les enquêtes menées par la Commission elle-même soient bien faites et qu'elles ne soient pas omises. Mais je tiendrai certainement compte de la suggestion que vous venez de formuler.

Dans ce contexte, vous me permettrez peut-être d'ajouter qu'il y a eu une augmentation très considérable de voyageurs dans les Chemins de fer Nationaux du Canada à Terre-Neuve depuis décembre. Par exemple, le volume du trafic a augmenté de 48 p. 100 en décembre par rapport à décembre de l'an dernier; en janvier, 97 p. 100 et en février, 131 p. 100. Si vous voulez la répartition de février entre le train et à l'autobus, il y a eu 1,494 passagers dans les trains alors qu'il y en avait 6,068 dans les autobus.

M. McGrath: Combien y avait-il d'autobus, par jour, au cours de cette période?

M. Pickersgill: Je n'ai pas ce renseignement.

M. McGrath: Je trouve que la comparaison n'est pas juste tout de même car vous avez trois trains par semaine.

Le président: A l'ordre, s'il vous plaît.

M. McGrath: Et six autobus par jour. La comparaison n'était pas juste du tout.

Le président: A l'ordre, s'il vous plaît.

M. Skoberg: Je voudrais simplement dire que peu importe la décision de notre Comité, elle est prise au nom de toute la nation. Un député de l'Ouest a laissé entendre que l'Ouest n'aimait pas subventionner l'Est mais comme je viens de la Saskatchewan, nous apprécions le fait que les Terre-Neuviens nous aident pour la rivière Saskatchewan Sud, et c'est exactement la même chose.

Le président: Monsieur Bell.

M. Bell: Monsieur le président, je m'excuse si je ne suis pas tout à fait au courant de l'activité du Comité, mais je voudrais tout simplement demander une question à M. Pickersgill. On a mentionné le blocus dans le port de Saint-Jean qui est vraiment grave et qui ressemble beaucoup à celui de Vancouver, mais je crois que la circulation a repris. Permettez-moi de dire une chose à ce sujet. Il semble, d'après les renseignements que nous obtenons à l'heure actuelle, et je dois dire que

[*Texte*]

Transport has been quite co-operative and the Minister has answered questions in the House—that it really was not a labour problem. The two responsible, according to information that we get, are the CPR and the National Harbours Board.

Much of it is very dicffiult, it is due to the strike and so on and it is probably not fair to blame them too much. Naturally, the National Harbours Board can be questioned, but I realize you have no responsibility there. The difficulty seems to be that when these ships were diverted and moved around quickly the CP—because it appears that the CN has been able to fulfill their responsibility as far as Saint John goes—could not keep up with these changes. They did not have the staff and it was a very difficult time. They are certainly to blame for it, but I do not know how much justification there was in this situation.

Mr. Pickersgill, would your Commission have some responsibility to look into this matter and could an assessment be made of it in the proper way to make certain that this difficulty does not arise again?

Mr. Pickersgill: I think, Mr. Bell, your suggestion is a very reasonable one. I think in so far as the immediate situation is concerned the Minister of Transport and his Department are more apt to have an influence than we, though we would do anything we could. But from the point of view of looking at the situation that has developed with a view to seeing whether we can foresee certain problems and try to prevent them from arising again, is a very proper function of our Research Division. I think they have already been looking at it, but I will make sure that they do.

Mr. Bell: Then in some way your assessment and recommendations for the future in that connection could come forward?

Mr. Pickersgill: Yes.

The Chairman: Mr. Horner, one last question.

Mr. Horner: Mr. Pickersgill, how much is paid now under the Maritime Freight Rates Act? What is the subsidy?

Mr. Pickersgill: It is about $15 million. I am speaking off the top of my head, but I would say that.

[*Interprétation*]

le ministère des Transports a très bien collaboré et le ministre a répondu aux questions à la Chambre, qu'il ne s'agisse pas vraiment d'un conflit ouvrier. Les deux responsables, d'après les renseignements que nous avons, sont le Pacifique-Canadien et le Conseil des ports nationaux.

Il y a beaucoup de difficultés qui ont surgi à cause de la grève et il n'est peut-être pas juste de trop les blâmer. Naturellement, on peut toujours poser des questions au Conseil des Ports nationaux, et je comprends que vous n'avez aucune responsabilité à ce sujet. Le difficulté semble être que, lorsqu'on a détourné les navires et qu'on les a fait déplacer rapidement, le Pacifique-Canadien, parce qu'il semble que le National-Canadien a pu s'acquitter de ses obligations en ce qui concerne Saint-Jean, n'a pu marcher de front avec ces changements. Il n'avait pas le personnel, et les temps étaient très difficiles. Sûrement, on peut les blâmer. Mais dans quelle mesure est-ce qu'on pourrait justifier la situation?

Alors, je veux demander à M. Pickersgill, si sa Commission aurait une certaine responsabilité de faire enquête à ce sujet? Et est-ce qu'une évaluation pourrait être faite en bonne et due forme pour assurer que ces difficultés ne surgissent pas de nouveau?

M. Pickersgill: Monsieur Bell, je crois que votre suggestion est très raisonnable. En ce qui concerne la situation immédiate, le ministre des Transports et son ministère pourraient fort bien avoir une meilleure influence que nous, bien que, évidemment, nous ferons tout notre possible.

Mais du point de vue de l'examen de la situation qui s'est développée et pour voir si nous pourrions peut-être prévoir certaines difficultés et les empêcher de se produire de nouveau, voilà vraiment la fonction de notre Division de la recherche. Je crois qu'on a déjà examiné la situation, mais je vais m'assurer qu'on le fera.

M. Bell: Et alors votre évaluation et les recommandations que vous pourriez formuler pour l'avenir pour s'avancer?

M. Pickersgill: Oui.

Le président: Monsieur Horner, une dernière question.

M. Horner: Monsieur Pickersgill, quel montant est payé à l'heure actuelle, en vertu de la Loi sur les taux de transport dans les provinces Maritimes? Quelle est la subvention?

M. Pickersgill: Je dirais environ 15 millions de dollars.

[*Text*]

Mr. Horner: What figure do you think would be involved if we made it applicable to trucks, bearing in mind that it going to the trucks would mean less to the railroads of course.

Mr. Pickersgill: It would not necessarily.

Mr. Horner: If you redirected some freight due to the lowering of the freight rates I would say it would.

Mr. Pickersgill: I would guess that the average person in the Atlantic provinces would hope there would be some expansion rather than just a redirection.

Mr. Horner: All right, but could you give the Committee some idea what amount of money we are talking about.

Mr. Pickersgill: I would not like to give a different ball park figure than the one given by the Atlantic premiers.

Mr. Horner: What did they say?

Mr. Pickersgill: I have not the document with me, but I will be glad to send you a copy.

Mr. Horner: You do not want to give the Committee the benefit of your wisdom on that?

Mr. Pickersgill: My guess would not be worth giving.

Mr. Horner: Here again, you are pleading ignorance.

The Chairman: Gentlemen, this is the end of our hearing. We want to thank both Mr. Pickersgill and Mr. Taschereau.

Mr. McGrath: Mr. Chairman, as we have concluded our evidence with Mr. Pickersgill, we thank him for being so helpful.

Mr. Pickersgill: Thank you.

Mr. McGrath: I wonder if you would entertain a motion, Mr. Chairman. I will read it:

> That this Committee regrets the decision, taken by the government last week, not to proceed with the P.E.I. Causeway before this Committee had an opportunity to study the evidence it has heard on this matter and to make a recommendation to Parliament.

The Chairman: Is this a recommendation that you want us to make to the House?

[*Interpretation*]

M. Horner: Et alors quels chiffres seraient impliqués ici si nous l'appliquions aux camions, en tenant compte du fait que ce qui irait aux camions serait enlevé aux chemins de fer, n'est-ce pas?

M. Pickersgill: Pas nécessairement.

M. Horner: Oui, mais si vous détournez des marchandises à cause de la diminution des taux de transport, je crois que cela se produirait.

M. Pickersgill: Oui, mais je dirais que les gens souhaiteraient voir une expansion plutôt qu'un détournement.

M. Horner: Très bien. Mais pouvez-vous donner une idée de l'ordre des chiffres?

M. Pickersgill: Je ne voudrais pas donner un autre chiffre que celui donné par les premiers ministres de l'Atlantique.

M. Horner: Qu'est-ce que c'était?

M. Pickersgill: Je n'ai pas le document ici, mais je pourrai vous en envoyer une copie plus tard.

M. Horner: Vous ne voulez pas faire profiter le Comité de votre sagesse.

M. Pickersgill: Un chiffre deviné ne vaudrait pas la peine d'être donné.

M. Horner: Ici encore, vous plaidez l'ignorance.

Le président: Messieurs, voilà la fin de notre audience. Nous voulons remercier M. Pickersgill et M. Taschereau.

M. McGrath: Monsieur le président, comme nous avons conclu nos témoignages, je voudrais exprimer nos remerciements envers M. Pickersgill d'avoir été si utile.

M. Pickersgill: Merci.

M. McGrath: Je voudrais proposer une motion, monsieur le président. Je vais la lire:

> que le Comité regrette la décision prise par le gouvernement la semaine dernière de ne pas procéder avec la chaussée de l'Île-du-Prince-Édouard avant que le Comité ait eu l'occasion d'étudier les témoignages reçus à ce sujet et de formuler une recommandation au Parlement.

Le président: Est-ce une recommandation que vous voulez qu'on fasse à la Chambre?

[*Texte*]

Mr. McGrath: Mr. Chairman, as I understand it now, because of a report made to the House in which concurrence has not been moved yet by the Privileges and Elections

• 1200

Committee, the substance of that report being that evry time a resolution is adopted by committee it has to be followed by another resolution instructing the committee to report the previous resolution to the House, therefore, my resolution need not necessarily be reported to the House, but it would certainly be the Committee's way of letting the government know of our displeasure over the decision it has taken in this matter—our concern.

The Chairman: A check for record purposes.

Mr. McGrath: Yes; just for the record.

The Chairman: I will ask the Clerk to read the motion again:

The Clerk:

That this Committee regrets the decision, taken by the Government last week, not to proceed with the Prince Edward Island causeway before this Committee had an opportunity to study the evidence it has heard on this matter and to make a recommendation to Parliament.

Mr. Breau: May I speak on the motion?

The Chairman: Yes, Mr. Breau.

Mr. Breau: I do not think this motion is necessary. As I said obviously, in reply to what Mr. McGrath and Mr. Rose said when the meeting started, when the government announced that it was not going to go ahead with the causeway it did not say that it was because it was not necessary from a transportation point of view. On the contrary, everybody here knows very well that the Government considers it is necessary from a transportation point of view.

The decision of the government to go ahead, or not to go ahead, with the causeway does not stop this Committee making a recommendation that from a transportation point of view the government should study the feasibility of having a causeway across Northumberland Strait. Therefore, I do not see any necessity for this motion.

We can still make a recommendation to parliament, and the government could set up

[*Interprétation*]

M. McGrath: Monsieur le président, si je comprends bien maintenant, vu le rapport fait à la Chambre, dans lequel l'accord n'a pas encore été proposé par le Comité des privilèges et des élections et voulant que chaque fois qu'une résolution est proposée et adoptée par le Comité, il faut alors avoir une autre résolution demandant au comité de faire rapport de la résolution antérieure à la Chambre. Donc, il n'est pas absolument nécessaire de faire rapport de cette résolution à la Chambre, mais ce serait certainement le moyen pour le Comité de faire savoir au gouvernement notre désaccord avec la décision prise, et notre inquiétude.

Le président: Une vérification, pour le compte rendu.

M. McGrath: Oui, simplement pour le compte rendu.

Le président: Je demanderais au greffier de donner lecture de la proposition une fois de plus.

Le greffier:

Que le comité regrette la décision prise la semaine dernière par le gouvernement de ne pas aménager la chaussée de l'Île du Prince-Édouard avant que ce comité ait eu l'occasion d'étudier les témoignages entendus à ce sujet et de formuler une recommandation au Parlement.

M. Breau: Puis-je prendre la parole au sujet de cette proposition?

Le président: Oui.

M. Breau: Monsieur le président, je ne crois pas que cette proposition soit nécessaire. Comme je l'ai dit déjà, à la suite de ce que M. McGrath et M. Rose avaient dit au début de la séance, lorsque le gouvernement a annoncé qu'il n'allait pas aménager cette chaussée, il n'a pas dit que c'était parce qu'au point de vue du transport elle n'était pas nécessaire. Au contraire, nous savons tous très bien que le gouvernement considère qu'elle est nécessaire du point de vue du transport.

La décision prise par le gouvernement d'aménager ou de ne pas aménager la chaussée, n'empêche pas ce comité de formuler une recommandation selon laquelle, au point de vue du transport, le gouvernement devrait faire une étude des possibilités de construire la chaussée. Je ne vois donc pas la nécessité de cette proposition.

On peut toujours faire une recommandation au Parlement et le gouvernement pourrait

[*Text*]

a list of priorities. But the decision at this moment not to go ahead with the causeway was not because it was not necessary from the transportation point of view; it was a question of priorities; a question of expenditures; a question of money.

The Chairman: Mr. McGrath, would you agree to the deletion of the words "and to make a recommendation to Parliament" at the end of your motion, so that it would be just for the record?

Mr. McGrath: No. Why would you want to delete that? The whole point of my motion is that in our reference we were asked by parliament to study transportation in the Atlantic provinces. The Committee went to Charlottetown and heard evidence on this all day. In essence, the Committee need not have gone to Charlottetown at all; and the decision was taken right at a time when the Committee had completed its hearings, was in the process of studying the evidence and was preparing to make a recommendation to parliament.

Mr. Breau: Mr. Chairman, as I said some time ago, we can still make a recommendation to parliament, but there is no necessity to make it now.

The Chairman: Mr. Pringle?

Mr. Pringle: I associate myself, if I may, with Mr. Breau. I think that passing this resolution may be a rather dangerous thing for us to do, in as much as it would establish a precedent on something which we have not yet had an opportunity to discuss amongst ourselves.

Second, I think we should realize that the government was reasonably explicit that it was because of the money involved. We have somehow or other, Mr. Chairman, to get it across that there are not unlimited funds to spend in the Atlantic provinces. There must be some responsibility on all sides of the government relative to the tremendous amount of funds that we are collecting to spend, and this was a matter of money.

I know of no statement that this was not feasible, or that it would not be a boon to the area. As you all know, I happen to be a proponent of the causeway. Rightly or wrongly, they felt that from a financial standpoint

• 1205

they must at this time make the decision that the ferry system would be upgraded and expanded, as opposed by building the causeway. I feel that we should accept this as a

[*Interpretation*]

alors établir une liste de priorités. Mais la décision prise en ce moment de ne pas aménager la chaussée n'a pas été prise nécessairement du point de vue du transport. C'était une question de priorités, de dépenses, une question d'argent.

Le président: Monsieur McGrath, êtes-vous d'accord qu'on élimine les mots «et de formuler une recommandation au Parlement» à la fin de votre proposition, de façon à ce qu'elle soit simplement pour le compte rendu?

M. McGrath: Non. Pourquoi enlever ces mots? Le but de ma proposition est justement que le Parlement nous a demandé d'étudier le problème des transports dans les provinces de l'Atlantique. Le comité s'est rendu à Charlottetown et a entendu des témoignages toute une journée de temps à ce sujet. Essentiellement, le comité aurait pu ne pas aller à Charlottetown; et la décision fut prise au moment même où le comité avait terminé ses audiences et était en train d'étudier les témoignages avant de formuler sa recommandation au Parlement.

M. Breau: Comme je l'ai déjà dit, on peut toujours formuler une recommandation au Parlement, mais il est inutile de le faire maintenant.

Le président: Monsieur Pringle?

M. Pringle: Si on me le permet, je voudrais m'associer à M. Breau. Je pense que ce serait peut-être un peu dangereux pour nous d'adopter cette résolution en autant qu'on établirait ainsi un précédent au sujet d'une chose que nous n'avons pas encore eu l'occasion de discuter entre nous.

Deuxièmement, je pense qu'il faut admettre que le gouvernement a dit assez explicitement que c'était une question d'argent. Il nous faut, d'une façon ou d'une autre, monsieur le président, faire comprendre clairement qu'on n'a pas de fonds illimités à dépenser dans les provinces de l'Atlantique. Il faut qu'il y ait une certaine responsabilité de part et d'autre du gouvernement à l'égard des fonds très considérables qu'on perçoit pour dépenser, et que c'était simplement une question d'argent.

Il n'y a pas eu, à ma connaissance, de déclaration d'après laquelle la chaussée n'était pas réalisable ou qu'elle ne serait pas un avantage pour la région. Je suis en faveur de la chaussée, comme vous le savez tous. A tort

ou à raison, ils étaient donc d'avis que du point de vue financier, ils doivent maintenant prendre la décision d'améliorer et d'accroître le service des transbordeurs, au lieu d'aména-

[*Texte*]

reasonable approach, and that we should not belabour this point on the basis that has been suggested.

The Chairman: Mr. Rose?

Mr. Rose: I think I could agree with some of the things that Mr. Pringle said about money, but I do not think that is the issue. The issue here is the sanctity, if you like, or the value, of committee work. To me it is the principle.

The Chairman: Yes; but, Mr. Rose, that does not stop us recommending the causeway when we make our report.

Mr. Rose: Just a moment, please, Mr. Chairman. I raised this right at the beginning of the meeting because I felt it was essential that we make very strong representations on the fact that we can spend a great deal of time and money scampering around the country, hearing representations and studying briefs and pronouncements, if you like, and then find, come the time to consider these and make recommendations, that everything we have done is irrelevant because the decisions have been made. Therefore, it is the principle that I think this Committee should try to emphasize, for the successful functioning of committees generally, not this particular issue.

I do not want to examine the merits or demerits of the causeway. It is for the government to make the decision, but to make it while the Committee is sitting down to discuss the matter after spending a day in Prince Edward Island is to me a slap in the face. It destroys any kind of function that I might have in the future on committees. Why should I waste my time?

Mr. McGrath: Mr. Chairman, just briefly to supplement what Mr. Pringle has said, nobody, and certainly no member of this Committee is questioning the right, and the intent of my resolution. It was not to question the right of the government to take a decision in this matter. Everybody recognizes that. All I am suggesting is that the government could have delayed the announcement of its decision at least until the Committee had had a chance to sift through the evidence and make its report to the House.

The Chairman: Mr. Trudel?

[*Interprétation*]

ger la chaussée. Je suis d'avis que nous devrions accepter cette attitude raisonnable, et qu'on ne devrait pas insister sur ce point de la façon proposée.

Le président: Monsieur Rose.

M. Rose: Je pense que je suis d'accord avec certaines choses dites par M. Pringle à l'égard de l'aspect financier, mais je ne crois pas que ce soit la question en cause. La question est plutôt l'aspect sacro-saint, si vous voulez, ou la valeur du travail accompli par le Comité. Pour moi, c'est une question de principe.

Le président: Oui, mais, monsieur Rose, cela ne nous empêche pas de formuler une recommandation relative à la chaussée, lorsqu'on présentera notre rapport.

M. Rose: Un instant, monsieur le président. J'ai soulevé cette question dès le début de la séance parce que, selon moi il était essentiel que nous formulions des instances très fortes sur le fait que nous ayons passé beaucoup de temps et beaucoup d'argent à parcourir le pays, à entendre des instances et à étudier les mémoires et les déclarations, si vous voulez, et constater ensuite, lorsque le moment vient de les prendre en considération et de formuler des recommandations, que tout ce que nous avons fait n'entre pas en ligne de compte parce que la décision est déjà prise. C'est donc un principe sur lequel le Comité devrait insister, pour le bon fonctionnement des comités dans leur ensemble, non pas à cause de cette question en particulier.

Je ne veux pas étudier les mérites ou les désavantages de la chaussée. Je pense qu'il appartient au gouvernement de prendre cette décision, mais de la prendre juste au moment où le Comité étudie la question, après avoir passé une journée à l'Île du Prince-Édouard, c'est une insulte, à mon avis. Cette façon de procéder détruit toute fonction que je pourrais remplir au sein d'un comité à l'avenir. Pourquoi y perdrais-je mon temps?

M. McGrath: Pour suppléer à ce que M. Pringle a dit, personne et surtout aucun membre de ce Comité, ne s'en prend au droit ou à l'intention derrière ma résolution. Elle n'est pas de mettre en doute le droit du gouvernement de prendre une décision sur la question. Nous reconnaissons tous ce fait. Mais je dis simplement que le gouvernement aurait pu attendre pour annoncer cette décision que le comité ait eu l'occasion d'étudier les témoignages et de faire son rapport à la Chambre.

Le président: Monsieur Trudel.

[*Text*]

Mr. Trudel: Mr. Chairman, if we adopt this motion I think we will just be attaching a finality to the decision that has been taken.

To go back to the point that was made by Mr. Givens, I think we have a duty to perform. We are forgetting the basic principles that are involved if we adopt this. We are in the process of making a recommendation, which is the prime reason for our existence, and I think it should be carried to the nth degree. By recommending this we are adopting an attitude of finality relative to the decision that has been taken. I think this is far from the minds of the members of this Committee.

For that reason, and not because of the other principles, or the basic factor that we are now discussing, we should proceed on Mr. Givens' line of reasoning.

The Chairman: Mr. Mahoney?

Mr. Mahoney: Having heard what Mr. Trudel has said my comments would be redundant other than to observe that I do not think the country could stand still waiting for us to make a report. It would be equally appropriate to chastise the Canadian National Railway for its decision to extend the service of the "Newfie Bullet" until they had the benefit of our wisdom on that.

The Chairman: Mr. Givens?

Mr. Givens: Mr. Chairman, I find myself agreeing with both Mr. Trudel and Mr. Rose. I agree with Mr. Trudel and I will vote against the motion, but I cannot help agreeing with Mr. Rose.

If parliamentary committees are going to mean anything, if they are going to have a raison d'être, and you go off on a frolic and spend thousands of dollars visiting the Maritimes and are going to go off on a frolic and spend probably tens of thousands of dollars sending the Committee on External Affairs on a trip, when you know that for months the government has been studying its decision on whether to be plugged into, or to be unplugged from, NATO, and the other revisions of foreign policy, it becomes a little ludicrous and a sort of white-wash situation, to use the vernacular,—a snow job—to send a committee made up of representatives of various parties—serious people—and have them come back and find that there were a foregone conclusion to the problems they were supposed to investigate in the first place.

[*Interpretation*]

M. Trudel: Monsieur le président, je pense que si nous adoptons cette proposition, nous apporterons simplement une note de finalité à la décision prise.

Pour revenir au point soulevé par M. Givens, je pense que nous avons un devoir à accomplir. Nous oublions les principes fondamentaux en cause si nous adoptons cette proposition. Nous sommes en train de préparer une recommandation, ce qui est la raison d'être du comité, et je crois qu'il faudrait continuer à jouer notre rôle jusqu'au bout. En faisant une telle recommandation, nous adoptons une attitude de finalité à l'égard d'une décision qui a été prise. Ce n'est pas du tout ce que les membres de ce comité ont à l'esprit.

Pour cette raison et non pas à cause des autres principes, ou des facteurs fondamentaux que nous sommes à discuter, nous devrions poursuivre la ligne de raisonnement de M. Givens.

Le président: Monsieur Mahoney?

M. Mahoney: Après avoir entendu ce que M. Trudel a dit, mes remarques seraient redondantes sauf pour vous dire que je ne crois pas que le pays puisse attendre que nous formulions un rapport. Il serait tout aussi approprié de s'en prendre au National Canadien d'avoir décidé de prolonger le service du «*Newfie Bullet*» avant d'avoir bénéficié de notre sagesse à ce sujet.

Le président: Monsieur Givens.

M. Givens: Monsieur le président, je suis d'accord à la fois avec M. Trudel et M. Rose. Je suis d'accord avec M. Trudel, et je voterai contre cette proposition, mais je ne peux m'empêcher d'être d'accord avec M. Rose.

Si les comités parlementaires doivent jouer un rôle significatif, s'ils ont une raison d'être, si on part en voyage, dépenser des milliers de dollars à visiter les Maritimes; et également dépenser des dizaines de milliers de dollars pour envoyer le comité des Affaires extérieures en voyage alors que vous savez très bien que le gouvernement étudie depuis des mois sa décision quant à son adhérence à l'OTAN, et des autres modifications de sa politique étrangère, il est donc tout à fait ridicule dans une telle situation d'envoyer ainsi un comité composé de représentants des différents partis politiques, des gens sérieux, pour qu'ils reviennent et découvrent qu'une conclusion avait déjà été tirée quant aux problèmes qu'ils sont allés examiner.

[*Texte*]

I certainly would not want to be part of that kind of a charade.

• 1210

I did not happen to go on this trip, but that is not the point. I have not been around here long enough to know what action you take to impress on the government, and on the hierarchy of all parties, that there is supposed to be some reason for the existence of the committee system and that we are supposed to perform some function.

We are all supposed to be experts in the districts that we come from. We are not just message boys who were sent here by our constituents. This has to be impressed on the people at the top echelons of all our parties because I think that the cavalier way in which ordinary backbenchers are treated here is appalling.

Some hon. Members: Hear, hear.

Mr. Givens: I was not an ordinary backbencher where I came from. I happen to find myself in that position here, maybe temporarily. I do not know.

Mr. Chairman, I think that the point made by Mr. Rose is very serious and I think it bears discussion and reiteration over and over again.

The Chairman: Is the Committee ready for the question?

Monsieur Portelance?

M. Portelance: Je ne crois pas que le gouvernement ait dit qu'il n'accepterait pas les vues du Comité; il est bien prêt à étudier ce qu'on va lui proposer. Même si on a dit que la Chaussée ne sera pas construite la semaine prochaine, cela ne veut pas dire qu'elle ne sera jamais construite. C'est à nous de faire des propositions au gouvernement. Je crois bien que la chaussée est voulue par tout le monde, mas il y a un manque d'argent présentement. Je ne vois donc pas la nécessité de cette proposition faite par M. McGrath.

The Chairman: Are you ready for the question?

Mr. McGrath: Before you put the question Mr. Chairman, I would like to just make one final observation and a few remarks.

To me it would be very regrettable if this motion were not adopted for some of the reasons outlined by Mr. Givens and supplemented by Mr. Rose and...

Mr. Mahoney: Mr. Chairman, on a point of order. I think we are governed as nearly as may be by the rules of the House of Com-

[*Interprétation*]

Je ne voudrais certainement pas faire partie d'une telle charade.

Je n'ai pas fait partie du voyage, mais cela n'importe guère. Je ne suis pas ici depuis assez longtemps pour savoir quelles mesures il faudrait prendre pour faire comprendre au gouvernement, et à la hiérarchie de tous les partis, que le système des comités doit avoir une raison d'être et que nous devons jouer un certain rôle. Nous sommes censés être des spécialistes des régions que nous représentons, et non seulement des messagers envoyés ici par nos commettants. Il faut bien faire comprendre cela aux membres et aux dirigeants de nos partis, et je pense que la façon un peu cavalière dont les députés de l'arrière-ban sont actuellement traités est honteuse.

Des voix: Bien parlé.

M. Givens: Dans ma circonscription, je ne suis pas un simple député de l'arrière-ban. Je me trouve dans une telle situation ici. Ce n'est peut-être que temporaire, je ne sais pas. Monsieur le président, je pense que l'observation faite par M. Rose est vraiment importante et que nous devrions en discuter sérieusement.

Le président: Est-ce que le comité est prêt à se prononcer?

Mr. Portelance?

Mr. Portelance: I do not think that the government has said that it would not accept the views of the Committee. The government is ready to consider what we are going to propose. But just because the Causeway is not going to be built next week does not mean that it will never be built. It is up to us to make proposals to the government. I think the Causeway is wanted by everyone, but there is a lack of funds right now. Consequently, I do not see the need for the motion as moved by Mr. McGrath.

Le président: Êtes-vous prêts à vous prononcer?

M. McGrath: Avant de passer au vote, monsieur le président, je voudrais faire une dernière observation et quelques remarques. En ce qui me concerne, il serait vraiment regrettable si cette motion n'était pas adoptée pour certaines des raisons présentées par M. Givens et appuyées par M. Rose...

M. Mahoney: J'invoque le Règlement. Nous sommes régis par le Règlement de la Chambre des communes. Nous sommes saisis d'une

[*Text*]

mons. When we have a motion in front of us, how many times does each member...

Mr. McGrath: I am allowed to include the debate.

Mr. Mahoney: Under those rules?

Mr. McQuaid: Mr. Chairman, I wonder if I may ask one question.

Mr. Mahoney: I am asking the Chairman for a ruling.

The Chairman: What is your question, Mr. McQuaid?

Mr. McQuaid: My question is this. Following the meeting of your Committee in Charlottetown, prior to the announcement by the government that the causeway was not going to be built, were you approached, as Chairman of the Committee, by any member of the government and asked whether or not the Committee would have any recommendations to make with respect to this matter?

The Chairman: No. Mr. McGrath.

Mr. McGrath: Well, Mr. Chairman, to me it would be a matter of great regret because I am very much concerned over the partisan way that the committees are developing. For example, we find ourselves sitting over here and the government supporters sitting opposite.

Mr. Chairman, I am serious, very serious. I think this is a very serious matter and my resolution was not moved in any partisan way. It was merely moved with the intent of expressing the Committee's concern to the government over the action it has taken.

For example, what would be the position of the External Affairs Committee today if the government announced tomorrow that we were pulling out of NATO when they are in Europe studying this very subject and spending thousands of dollars of the taxpayers' money? Are these junkets or are these serious references by Parliament? If they are junkets I do not want to have any part of them. Certainly this Committee was no junket. You, Mr. Chairman, and every member of the Committee worked very hard doing hard strenuous work on this tour of the Atlantic Provinces; we heard briefs day and night. And to have this happen before we have had a chance to make a report to Parliament to me is very regrettable and I would hope that this resolution would not be looked upon in a partisan way and that it would receive the unanimous support of the Committee.

[*Interpretation*]

motion combien de fois chacun des membres...

M. McGrath: J'ai le droit de clore le débat.

M. Mahoney: En vertu du Règlement?

M. McQuaid: Monsieur le président, pourrais-je poser une question?

M. Mahoney: Je demande au président de décider.

Le président: Quelle est votre question, monsieur McQuaid.

M. McQuaid: Après la réunion de votre comité à Charlottetown, avant que le gouvernement annonce que la chaussée ne serait pas construite, est-ce que des membres du gouvernement vous ont demandé si le Comité aurait des recommandations à formuler à ce sujet?

Le président: Non. Monsieur McGrath?

M. McGrath: Monsieur le président, c'est vraiment regrettable, parce que je suis particulièrement préoccupé de l'esprit de partisannerie dont font de plus en plus preuve les comités. Par exemple, nous nous trouvons d'un côté et les partisans du gouvernement, de l'autre.

Monsieur le président, je suis vraiment sérieux maintenant parce que c'est une question importante et ma résolution n'a pas été présentée dans un esprit de partisannerie, mais simplement en vue de faire part au gouvernement de la préoccupation du Comité à la suite des mesures qu'il a prises.

Ainsi, dans quelle situation se trouverait le Comité des affaires extérieures aujourd'hui, si le gouvernement annonçait demain qu'on se retire de l'OTAN alors que le Comité est encore en Europe en train d'étudier cette question et de dépenser des milliers de dollars de l'argent des contribuables? Est-ce que le Parlement considère ces voyages comme des parties de plaisir ou est-ce qu'il les prend au sérieux? Si ce sont de simples parties de plaisir, alors je ne veux plus en être. Le voyage de notre comité n'a pas été une partie de plaisir. Nous avons travaillé fort, durant de longues heures pendant cette tournée des provinces de l'Atlantique, nous avons entendu des mémoires jour et nuit. Et de voir ainsi ces choses se produire avant même qu'on ait l'occasion de présenter notre rapport au Parlement, je considère cela comme vraiment regrettable. J'espère donc que cette résolution ne serait pas considérée comme présentée dans un esprit de partisannerie et qu'elle recevra l'appui unanime du Comité.

[*Texte*]

An hon. Member: Hear, hear.

• 1215

Mr. Corbin: Mr. Chairman, I raise a question of privilege. It has been implied by the hon. member—I will not say opposite as I feel that we are here together regardless of where we sit in this House, but I want to state plainly for the record and for the information of everyone on this Committee that I have not been and I never will be subjected to any partisan guideline. The decision I take here or the votes I take here I take on a personal basis and I am not going to be guided by any partisan dictation or guideline. That is all I have to say.

The Clerk: The motion reads:

> That this Committee regrets the decision taken by the government last week not to proceed with the Prince Edward Island causeway before the Committee had an opportunity to study the evidence it has heard on this matter and to make a recommendation to Parliament.

Mr. Pringle: On a point of order, Mr. Chairman, could I make a statement?

The Chairman: Order, please.

Mr. Pringle: It is pretty important, I think. Very important at this particular point. And that is that...

The Chairman: Order.

Mr. Pringle: All right.

The Chairman: Mr. McGrath was the last speaker on this motion. Would those in favour of the motion please rise. All right. Would those opposed to the motion please rise?

Mr. McGrath: Mr. Chairman, I implore you. You have done an outstanding job as Chairman of this Committee. We have worked hard on studying this matter and I would implore you to keep this in mind. The whole future of this Committee and perhaps of the committees of the House of Commons is involved here.

Mr. Pringle: If you are going to speak maybe I can say something too and that is: do not forget that the entire regional development program in Prince Edward Island is at stake and they have been waiting to get a decision. I have talked to the Premier of Prince Edward Island personally and they want a decision.

[*Interprétation*]

Une voix: Bien parlé.

M. Corbin: Je voudrais soulever une question de privilège? Mon honorable collègue a laissé entendre—et je ne dirai pas membre de l'opposition car nous sommes tous ici ensemble quelque soit l'endroit où nous sommes assis—mais je voudrais dire, bien clairement, pour le compte rendu et pour la gouverne de tous les membres de ce comité, que je n'ai jamais fait et ne ferai jamais preuve d'esprit de partisannerie. La décision que je prends ici, je la prends à titre personnel, sans être assujetti aux directives ou aux principes du parti.

C'est tout ce que j'avais à dire.

Le greffier: La motion se lit comme il suit:

> Que ce Comité regrette la décision prise par le gouvernement la semaine dernière de ne pas aménager la chaussée de l'Île du Prince-Édouard, avant que le Comité ait pu étudier les témoignages recueillis à ce sujet et présenter ses recommandations au Parlement.

M. Pringle: J'invoque le Règlement. Est-ce que je pourrais faire une déclaration?

Le président: A l'ordre, s'il vous plaît.

M. Pringle: C'est très important, je pense, à ce stade-ci.

Le président: A l'ordre.

M. Pringle: Très bien.

Le président: M. McGrath était le dernier à parler sur cette motion. Ceux qui sont en faveur, veuillez vous lever. Veuillez reprendre vos sièges. Ceux qui sont opposés à la motion, veuillez vous lever.

M. McGrath: Monsieur le président, vous avez fait un excellent travail à titre de président du Comité. Nous avons travaillé fort, nous avons étudié cette question sérieusement et je vous demanderais d'en tenir compte. L'avenir de ce comité et peut-être même celui des comités de la Chambre des communes est en jeu ici.

M. Pringle: Si vous voulez parler, peut-être pourrais-je dire quelque chose ici. N'oubliez pas que le programme de développement régional de l'Île du Prince-Édouard est en jeu, et qu'ils attendent une décision. J'ai parlé au premier ministre de l'Île du Prince-Édouard, personnellement ils voulaient avoir une décision.

[*Text*]

Mr. Horner: The question is that the decision was made before we reported.

The Chairman: Order, please. Order. I think I will have to put an end to this. The vote was tied 7 to 7. So I will have to decide on which side I will vote and I will vote against the motion.

I will call upon the Eastern Provincial Airlines please to come forward—Mr. A. J. Lewington and Mr. J. Millar.

An hon. Member: Mr. Chairman, are we going to sit this afternoon?

The Chairman: No, we will sit until 1 o'clock and we will resume, if we have not finished, at 8 o'clock tonight.

Mr. Skoberg: When do you expect the Steering Committee to—

The Chairman: I will contact the people this afternoon as soon as I have the chance.

Mr. Lewington is going to give us a resumé of his brief. I will not ask him to read the brief.

Pour ce qui est du rapport final, nous allons être obligés d'attendre la transcription des comptes rendus qui n'est pas encore terminée, ce qui sera dans une mois environ.

Would you go ahead, Mr. Lewington?

Mr. A. J. Lewington (President, Eastern Provincial Airways (1963) Limited): Mr. Chairman, I am pleased to have the opportunity to appear before this Committee. I think, and I hope we can, contribute information that will be of help to your deliberations and inquiries. I have with me, Mr. J. Millar, our Executive Vice-President. He is an economist and informed on air transport matters and particularly on EPA's air transport problems. Also with me is Mr. W. F. Gaudet, Vice-President Marketing. Mr. Gaudet is particularly informed on our scheduling and service patterns throughout the Atlantic area.

I think the Committee may know but, perhaps I should say, that our principal services are scheduled operations carrying mail, passengers and goods from Torbay through Gander, Deer Lake, Goose Bay, Churchill Falls and Wabush; that is one licence and one route. Another one is Moncton, Summerside, Charlottetown, Magdalen Islands. A new one was added just last year—Charlottetown Charlo, Montreal. We have another route from Charlottetown through New Glasgow to Halifax. These are licensed under class I and class II licences by the Air Transport Committee, or formerly the Air Transport Board.

[*Interpretation*]

M. Horner: Le fait est que la décision a été prise avant qu'on ne présente notre rapport.

Le président: A l'ordre. Je pense que je me dois de mettre fin à cela. Nous étions 7 à 7, donc, je dois décider de quel côté je vais voter, alors je vote contre la motion.

Je demanderais donc aux représentants de la *Eastern Provincial Airlines* de se présenter, MM. A. J. Lewington et J. Millar.

Une voix: Allons-nous siéger cet après-midi?

Le président: Non, nous siégerons jusqu'à une heure et nous reviendrons à 8 heures ce soir, si nous n'avons pas terminé.

M. Skoberg: Quand prévoyez-vous que le comité directeur...

Le président: Je communiquerai avec les intéressés dès que j'aurai l'occasion.

M. Lewington va nous donner un bref résumé de son mémoire.

Our final report will have to wait for the transcripts which have not yet been completed. It might be a month from now before we can draft a final report.

Vous pouvez y aller, monsieur Lewington.

M. A. J. Lewington (président, Eastern Provincial Airways (1963) Limited): Je suis heureux de pouvoir comparaître à ce Comité. J'espère et je pense que nous pouvons vous fournir des renseignements qui vous seront utiles au cours de vos délibérations, au cours de votre enquête. J'ai avec moi M. Millar, notre vice-président exécutif. Il est économiste et connaît très bien les questions de transport aérien et tout particulièrement les problèmes de l'EPA, et M. Gaudet qui est vice-président de la commercialisation et au courant de nos horaires et de nos services dans la région de l'Atlantique.

Je pense que le Comité sait, mais peut-être devrais-je le dire, que nos principaux services comprennent le transport du courrier, des voyageurs et des marchandises de Torbay à Gander, Deer Lake, Goose Bay, Churchill Falls et Wabush. Cela n'est qu'un parcours. Nous en avons un autre entre Moncton, Summerside, Charlottetown, les Îles-de-la-Madeleine, et on en a ajouté un nouveau l'année dernière: Charlottetown, Montréal. Nous avons un autre parcours de Charlottetown à New Glasgow et Halifax. Nous avons des permis catégorie 1 et 2 accordés par le Comité des transports aériens, l'ancienne Commission des transports aériens.

[*Texte*]

In addition to those scheduled services, we perform a number of so-called bush services or similar type services with small, single-engine aircraft and with twin-engine aircraft serving more remote areas on wheels, skis and floats.

We have suffered all the problems of a small regional air operator and have had many plans over the years which have developed slowly in extending our operations and our services to the various communities that have asked for them or have sought them, and our biggest problem is attaining an economic base of operations that will be viable. Of course, the Committee is aware through press announcements of our proposal to merge with Nordair and this is the principal reason behind that merger.

I think I might take too much time of the Committee if I attempt to continue on this line. Perhaps we could convey better information if I left the rest to questioning by the members.

The Chairman: Mr. Breau?

• 1225

Mr. Breau: Mr. Chairman, I would like to ask Mr. Lewington a few questions. In your brief which was to be presented to the Committee last year when it was going to go to Newfoundland, you mentioned at the time that you were applying for a licence to go to Charlottetown, Bathurst and Montreal. Now, for some reason or other—I do not know if you applied for it—it was granted to Charlottetown, Charlo, Bathurst and Montreal.

I know that the airport was not adequate in Bathurst at the time which probably is the reason you are now stopping at Charlo instead of Bathurst, but would you still prefer Bathurst if the airport were adequate?

Mr. Lewington: We have no preference there, Mr. Chairman. From an economic point of view—I am thinking of the government's obligations to build airport facilities—we feel there should only be one airport, that only one can be justified; that is, one complete facility with all the aids that are going to be necessary.

Our experience so far has been that the traffic we are drawing—and we are very pleased with the way the operation has gone so far—is from north of Charlo; that is, it is from Dalhousie, Campbellton and even

[*Interprétation*]

Aux services horaires prévus viennent s'ajouter des services de monomoteurs et de bimoteurs sur roues, skis ou flotteurs, vers les régions plus éloignées.

Nous avons connu tous les problèmes des petites entreprises aériennes régionales. Au cours des années, nos programmes d'extension de nos services vers les Communautés qui en ont fait la demande se sont développés lentement. Notre plus grand problème, c'est de trouver une base rentable et viable de fonctionnement. Bien entendu, le Comité sait très bien, à la suite des communiqués de presse qui ont été publiés que nous avons l'intention de nous fusionner avec Nordair et c'est là la principale raison pour laquelle nous voulons faire ce fusionnement.

Je pourrais être un peu trop long si j'essayais, disons, d'élaborer un peu plus suivant cette ligne d'idée. Peut-être pourrions-nous vous donner de meilleurs renseignements si l'on passait tout de suite à la période de questions.

Le président: Monsieur Breau.

M. Breau: Monsieur le président, je voudrais poser quelques questions à M. Lewington. Dans votre mémoire, qui devait être présenté au Comité l'année dernière alors que nous devions nous rendre à Terre-Neuve, vous avez dit à ce moment-là, que vous demandiez un permis pour faire le parcours entre Charlottetown, Bathurst et Montréal. Pour une raison ou pour une autre, je ne sais pas si vous en avez fait la demande, le permis fut accordé plutôt pour le parcours Charlottetown, Charlo, Bathurst, Montréal.

Je sais que l'aéroport n'était pas suffisamment aménagé à Bathurst à ce moment-là, et c'est peut-être la raison pour laquelle vous arrêtez à Charlo plutôt qu'à Bathurst mais, est-ce que vous préféreriez toujours Bathurst si, disons, l'aéroport convenait?

M. Lewington: Nous n'avons pas de préférence, monsieur le président. Au point de vue économique et là je pense à l'obligation qu'a le gouvernement d'aménager les services d'aéroport, nous sommes d'avis qu'il ne faudrait qu'un seul aéroport, qu'un seul peut être justifié. Mais il faudrait qu'il y ait toute l'infrastructure nécesssaire.

Et notre expérience jusqu'ici est que le trafic que nous avons (et nous sommes très heureux du fonctionnement de cette opération jusqu'ici) donc, le trafic que nous avons provient du nord de Charlo, soit de Dalhousie,

[*Text*]

around the west shore of the Bay Chaleur. From what little evidence we have now, Charlo appears to be the right location.

Mr. Breau: Are you aware that the strip in Bathurst is being paved this spring and that the lights have been installed and there is now a terminal building?

Mr. Lewington: Yes, we are informed.

Mr. Breau: Your traffic, you say, is coming from north of Dalhousie. How have you been able to check this?

Mr. Lewington: By the customers and the tickets they buy and where they buy them, and where they give their point of contact. I might add, Mr. Chairman, that this is only a three-month experience so that it is not a conclusive one.

Mr. Breau: Are you aware tht you are losing a lot of traffic south of Bathurst? All the Caraquet coast traffic and that along the Gulf of St. Lawrence going to Moncton is going by Air Canada. If you stopped in Bathurst you would get this traffic. Are you aware of that?

Mr. Lewington: It is obvious, of course, that there is a limit to how far passengers will go by road in order to join an air service and they may have references, of course, too. It is quite true that a good deal of the traffic south of Charlo is choosing other ways to travel.

Mr. Breau: There was some evidence when we were in Fredericton that you were studying the feasibility of making a stop in Chatham. Do you think that economically you can stop in both Chatham and Charlo?

Mr. Lewington: It would not be good. We would have to have approval by the Air Transport Committee and we would need their assistance on it.

Mr. Breau: In other words, you would need to be ssubidized if you were going to stop in Chatham and Charlo.

Mr. Lewington: Exactly, this is my opinion.

Mr. Breau: Supposing the airport was ready in Bathurst, and you could make one stop in Bathurst. Bathurst is 45 miles from Chatham and the roads are good. Campbellton is about 65 miles from Bathurst and the farthest point on the Gulf of St. Lawrence is about 60 miles from Bathurst. If you were to give a better service to the Miramichi area and to Northern New Brunswick as a whole,

[*Interpretation*]

Campbellton et même le long de la rive ouest de la baie des Chaleurs. D'après ce que nous avons pu voir jusqu'ici, Charlo semble le meilleur endroit.

M. Breau: Savez-vous si la piste sera pavée ce printemps à Bathurst, si le balisage a été installé et si le terminus est construit?

M. Lewington: Oui, nous le savons.

M. Breau: Vous dites que votre clientèle vient du nord de Dalhousie. Comment avez-vous pu vous vérifier cela?

M. Lewington: Auprès des clients, d'après les billets qu'ils achètent et l'endroit où ils les achètent, leur point de contact. Et je pourrais ajouter, monsieur le président, qu'il n'y a que trois mois que nous avons commencé l'expérience. Donc, ce n'est pas concluant encore.

M. Breau: Savez-vous que vous perdez beaucoup de clients de la région située au sud de Bathurst. Tous les habitants du littoral de Caraquet et le long du golfe du Saint-Laurent prennent maintenant Air-Canada. Si vous arrêtiez à Bathurst, vous pourriez avoir cette clientèle, savez-vous?

M. Lewington: Il est bien évident qu'il y a une limite au trajet par route que seront disposés à faire des voyageurs pour prendre l'avion. Les voyageurs ont aussi leurs préférences, naturellement. Une bonne partie de la clientèle au sud de Charlo choisit un autre mode de transport.

M. Breau: Lorsque nous étions à Fredericton, on s'est demandé si vous étiez à étudier la possibilité d'arrêter à Chatham? Croyez-vous qu'il serait rentable d'arrêter à Charlo et à Chatham?

M. Lewington: Ce ne serait pas bon. Il faudrait obtenir l'approbation et l'aide du Comité des transports aériens.

M. Breau: En d'autres mots, il faudrait que vous soyez subventionnés si vous deviez arrêter aux deux endroits?

M. Lewington: C'est cela, à mon avis.

M. Breau: Disons que l'aéroport est prêt à Bathurst et que vous y faites un arrêt. Bathurst n'est qu'à 45 milles de Chatham et les routes sont bonnes. Campbellton, à environ 65 milles de Bathurst, et le point le plus éloigné le long du golfe du Saint-Laurent se trouve à environ 60 milles de Bathurst. Si vous voulez donner un meilleur service à la région de Miramichi et du nord du Nouveau-

[*Texte*]

do you think that Bathurst then would be preferable? It is definitely the geographic centre of Northern New Brunswick; there is no question about that.

Mr. Lewington: This is obvious, but whether it is the economic centre, I am not sure. In any case, it would be my opinion that it would be undesirable from an economic point of view to make stops at Bathurst and Charlo.

Mr. Breau: No, no; I know that. I am saying, suppose you were to abandon Charlo and abandon Chatham and stop at Bathurst. You would then be getting the business of northern New Brunswick; you are not getting it now.

Mr. Horner: They are both in your constituency.

Mr. Breau: Well, I do not think this is important.

Mr. Horner: You are arguing from a particularly local point of view.

Mr. Breau: No, no; I am not making any representations. I am just trying to find out; Chatham is not in my constituency but that is not important. I am just trying to find out if economically you could make a stop in Charlo and Chatham; if not, then if a stop in Bathurst would be better economically for you, so that you can serve Chatham, the Miramichi area and the Campbellton area. That is what I want to know.

• 1230

Mr. Millar: On a point of economics, I think it is equally uneconomic to stop either in Bathurst or Charlo. This is just a regional air service as such and is a loss air service. Now, if you stopped in Bathurst or if you stopped in Charlo, as far as your operating cost structure is concerned it would remain the same. The only thing that would be subject to debate would be the level of traffic that you could generate in Bathurst versus Charlo and we are not quite sure if Bathurst as such, or Bathurst airport, could generate more or less traffic than Charlo at this moment in time.

Mr. Breau: But that is not what I was asking. Suppose it is not economical to stop in Chatham—you are studying the feasibility of that now—would you think that it would be better to stop in Bathurst and not stop at Charlo or Chatham—supposing the airport was adequate of course?

Mr. Lewington: Perhaps, Mr. Gaudet might take the question from there.

[*Interprétation*]

Brunswick, croyez-vous que Bathurst serait préférable? Parce que c'est vraiment le point central de la géographie du nord du Nouveau-Brunswick, il n'y a aucun doute là-dessus.

M. Lewington: C'est bien évident. Mais le centre économique, je n'en suis pas sûr. De toute façon, nous sommes d'avis qu'il ne serait pas souhaitable du point de vue économique d'arrêter à Charlo et à Bathurst.

M. Breau: Non, je sais très bien. Supposons que vous abandonnez Charlo et Chatham et que vous arrêtiez à Bathurst, vous auriez toute la clientèle du nord du Nouveau-Brunswick, ce que vous n'avez pas maintenant.

M. Horner: Vous parlez de votre circonscription.

M. Breau: Je ne pense pas que ce soit important.

M. Horner: Vous parlez du point de vue local.

M. Breau: Oh non, j'essaie tout simplement de voir ce qu'il en est. Parce que Chatham n'est pas dans ma circonscription. Peu importe. J'essaie simplement de voir s'il serait rentable d'arrêter à Charlo et à Chatham. Sinon, alors, si un arrêt à Bathurst serait plus rentable et vous permettrait de desservir Chatham, la région de Miramichi et Campbellton. C'est ce que je veux savoir.

M. Millar: Pour ce qui est de la rentabilité, il est tout aussi peu rentable d'arrêter à Bathurst ou à Charlo. C'est un service aérien régional et comme tel, il fonctionne à perte. Si vous arrêtez à Bathurst ou encore à Charlo, vos frais d'exploitation seront les mêmes. La seule chose qui ferait l'objet d'un débat serait le niveau de trafic que vous pourriez avoir à Bathurst comparativement à Charlo.

Et nous ne sommes pas tout à fait sûrs que Bathurst comme tel ou l'aéroport de Bathurst pourrait engendrer plus ou moins de trafic que Charlo, en ce moment.

M. Breau: Ce n'est pas ce que je vous demandais. Disons que ce n'est pas rentable d'arrêter à Chatham. Vous en étudiez la possibilité maintenant, est-ce que vous croyez que ce serait préférable d'arrêter à Bathurst et de ne pas arrêter à Charlo ou à Chatham, à condition évidemment que l'aéroport soit bien installé?

M. Lewington: Monsieur Gaudet pourrait peut-être répondre à cette question?

[*Text*]

Mr. Gaudet: I think you are labouring under an assumption that by having an air service through Bathurst you could in fact generate traffic from the Quebec border right down to and including the Miramichi.

Our experience in the past, with this sort of development, is that you in fact would not generate this traffic. Going on the basis of past experience, you would probably not even develop the traffic as far as Dalhousie, let alone Campbellton. And, as you know, south of Bathurst in Gloucester county there is a very great rural type of population between there and Chatham. The pocket of industry that exists in that area starts at Belledune, as you probably know and stretches up to the Quebec border. We have done market surveys on this and while they are certainly not conclusive it would be our submission that an airport in Bathurst would develop traffic approximately north to Dalhousie and south part way to Chatham—but not even to Chatham because the Chatham development would likely still continue to go through Moncton.

Mr. Breau: I cannot see that—it is 90 miles from Moncton and 40 miles from Bathurst—unless there would be such a gap in the service between Air Canada and yours.

Mr. Gaudet: The frequency of Air Canada flights through Moncton of course would pull the traffic that way because not everybody is going to the same place, and they would have a much better frequency and more variety of flights and more interesting connections at Moncton than they would have through Bathurst or Charlo.

Mr. Rose: That is because Air Canada is offering a better service.

Mr. Gaudet: They are offering a more frequent number of flights.

Mr. Pringle: Mr. Chairman, coming from the West maybe I should not take the time that is available to these gentlemen for some of the questions I had because some of the Maritimes-Atlantic Province boys may want to ask some specific questions. However, I am deeply concerned with the future of regional carriers. I am wondering if regional carriers feel that government and those people charged with the responsibility of expanding and assisting the regional carriers are doing sufficient. When we were in the Maritime Provinces we did hear some complaints in this connection. Of course, we also have complaints in Vancouver, Prince George and

[*Interpretation*]

M. Gaudet: Je crois que vous présumez tout d'abord qu'en ayant un service aérien via Bathurst, vous pourriez alors engendrer un trafic à partir de la frontière du Québec jusqu'à la région de Miramichi, y compris.

D'après notre expérience dans le passé, avec ce genre d'expansion il appert que l'on n'engendrerait pas ce trafic. Si vous vous fiez à l'expérience vous ne pourriez probablement pas augmenter le trafic jusqu'à Dalhousie, pour ne pas parler de Campbellton. Comme vous le savez, au sud de Bathurst, dans le comté de Gloucester, la population est fortement rurale entre cet endroit et Chatham. Le peu d'industries qui existent à cet endroit commencent à Belledune, comme vous le savez sans doute et s'étend jusqu'à la frontière du Québec.

Nous avons fait des études du marché dans cette région et bien que ce ne soit pas définitif, nous croyons qu'un aéroport à Bathurst engendrerait un trafic jusqu'à Dalhousie aux nord, et jusqu'à la partie sud de Chatham mais non pas jusqu'à Chatham, car le trafic de Chatham continuerait sans doute à passer par Moncton.

M. Breau: Je ne vois pas. C'est à 90 milles de Moncton et à 40 milles de Bathurst à moins qu'il n'y ait un tel écart entre le service d'Air Canada et le vôtre.

M. Gaudet: Évidemment, la fréquence des vols d'Air Canada, attirerait le trafic de cet endroit, parce que tous les gens ne se rendent pas au même endroit, et ils auraient une plus grande fréquence et variété des vols et de meilleures correspondances à Moncton qu'en passant par Bathurst ou Charlo.

M. Rose: C'est parce qu'Air Canada offre un meilleur service.

M. Gaudet: Ils offrent un plus grand nombre de vols.

M. Pringle: Étant donné que je viens de l'Ouest, je ne devrais peut-être pas prendre le temps réservé aux personnes des provinces de l'Atlantique qui aimeraient poser des questions bien précises. Mais, toutefois, je me préoccupe beaucoup de l'avenir des transporteurs régionaux. Je me demande si les transporteurs régionaux estiment que le gouvernement et ceux qui ont la charge d'étendre et d'aider les transporteurs régionaux, font un travail satisfaisant. Quand nous étions dans les provinces Maritimes, nous avons entendu certaines plaintes à cet égard. Évidemment, nous en avons aussi eues à Vancouver, à Prince George et à Régina aussi en ce qui

[*Texte*]

Regina with regard to some of the accommodation, some of the facilities and some of the equipment that is available for people to use.

I am thinking of the time when Air Canada started as Trans-Canada Airlines and the tremendous amount of assistance that was made available to Air Canada and Trans-Canada Airlines. Do you feel that there is sufficient provision made to assist in the financing of new equipment and the development of programs with regard to increasing your passenger traffic in these various areas? Do you feel that you are getting the proper assistance for do you feel you have to fight with everybody in the country, first of all, to get a licence to operate and then go on and develop and promote it entirely on your own?

It looks to me that the future of aviation at the present time is going to depend a great deal on expansion at the regional level as well as at the third level of aviation which is now just beginning in certain areas. Some people think in terms of trunk lines concentrating on more world travel and that these lines are going to be more important. Could I have a comment on this particular angle?

Mr. Lewington: In general I think we are in agreement with you, but I will ask Mr. Millar to speak specifically to your point.

Mr. Millar: Well, I think there is some difference between Pacific Western Airlines Ltd., for example, in Vancouver and some of the other regional air carriers in that Pacific Western has probably longer staged distances than most of the rest of us. But I was trying to make a point that it is sometimes difficult to compare one regional against another because of the changes in the route structure.

Now it is true that in respect of the regionals we have had a long hard fight or a long hard debate, whichever way you wish to express it. Finally in 1966 the government set forth in the form of Circular 61 and 62/66 of the Air Transport Committee a regional airline policy and this policy provided for a subsidy for regional airlines. As a matter of fact, the regional airlines were named. They were Pacific Western, Transair, Quebecair, Eastern Provincial and Nordair. Now we are all eligible for subsidy on certain specific routes which meet the criteria set forth in the circular.

But this subsidy has only been in effect for two years, the year 1967 and the year 1968, and in fact the development of the formula itself is still a matter of some considerable

[*Interprétation*]

concerne certaines installations et l'équipement mis à la disposition des gens.

Je songe au moment où Air-Canada a commencé comme Trans-Canada Airlines et de l'aide énorme qui a été accordée à Air Canada et à Trans-Canada Airlines. Est-ce qu'il y a suffisamment de dispositions prévues pour aider au financement de votre matériel et à la mise au point des programmes destinés à augmenter le trafic des voyageurs dans ces différentes régions? Croyez-vous que vous obtenez une aide satisfaisante ou qu'il vous faut lutter contre tout le monde dans le pays, d'abord pour obtenir un permis d'exploitation et ensuite de poursuivre et de développer le service et de le promouvoir entièrement vous-mêmes?

J'ai l'impression que l'avenir de l'aviation à l'heure actuelle dépendra beaucoup de l'expansion au niveau régional aussi bien qu'au troisième niveau de l'aviation qui commence à peine dans certaines régions. Certaines personnes pensent peut-être que les lignes principales se concentreront plutôt sur les voyages autour du monde et qu'elles prendront de l'importance. Pourrais-je apporter un commentaire sur cet aspect particulier?

M. Lewington: D'habitude je pense que nous partageons votre avis, mais je vais demander à monsieur Millar de parler de manière précise de votre question.

M. Millar: Je crois qu'il y a une certaine différence entre, par exemple, *Pacific Western Airlines,* à Vancouver—et quelques autres transporteurs aériens régionaux car Pacific Western parcourt probablement de plus grandes distances que tout le reste. Mais j'essayais de dire qu'il est parfois difficile de comparer un transporteur régional avec un autre en raison des changements dans le parcours.

Il est vrai que les transporteurs régionaux ont bien lutté depuis longtemps ou si vous préférez ont eu des débats très longs à ce sujet. En fin de compte, en 1966, le gouvernement a établi dans la formule des Circulaires 61, 62 de l'année 1966, du Comité des Transports aériens, une politique régionale qui devait prévoir une subvention pour les lignes aériennes régionales. En fait les lignes aériennes ont été nommées. Il s'agissait de Pacific Western, Transair, Quebecair, Eastern Provincial et Nordair. Nous sommes tous admissibles aux subventions pour des trajets précis qui répondent aux critères établis dans les circulaires.

Mais cette subvention n'est en vigueur que depuis deux ans, l'année 1967 et l'année 1968 et en fait, l'élaboration de la formule elle-même reste toujours une question de dialogue

[*Text*]

dialogue between the airlines—certainly between Eastern Provincial Airways and the Air Transport Committee of the Canadian Transport Commission.

I would say, in general response to your question, that we do feel, finally, that we are getting adequate attention from the Government of Canada with respect to the losses we incur in providing these air services. However, as these government policies are formulated the structure of the industry is changing. Certainly the air transport industry in the world has gone through several major revolutions in the last 20 years. Probably the most revolutionary thing that happened in the last 10 years was the introduction of turbo-jet airplanes A turbo-jet airplane in the short range field cost something like $5 million.

Five years ago when we operated with turbo-prop airplanes we talked about an investment of $1 million. Ten years ago when we were in the piston engine airplane business we talked about an investment of approximately $100,000 for an airplane. So this advance in technology has caused throughout the world a centralization or a merger of air carriers.

In 1963 Eastern Provincial Airways, for example, merged with Maritime Central Airways Ltd. because it was not economic for both the airlines to operate in that part of the country. There were several mergers as I remember, in the last 10 years in your part of the country. Now we have merged with Nordair basically for economic reasons. If you took the route structure of Eastern Provincial Airways and analyse it you would find that theoretically one jet aircraft could supply all the needs of the system. This is because of the immense productivity of the jet airplane versus a propeller one. You cannot possibly buy one jet airplane and operate it in any optimum economic sense.

It is just physically impossible to schedule it in such a manner as to meet the requirements of the travelling public. The very minimum you can operate with in a practical or economic sense is two jet aircraft. But operating with just two jet aircraft presents some rather serious problems of scheduling.

When one airplane is taken out for maintenance, for example, you are left only with half your fleet. So, in my opinion you really need three jet airplanes to sustain some reasonable level of efficiency in the air line business. This is what has happened in the air line business in Canada.

[*Interpretation*]

entre les lignes aériennes, du moins entre la *Eastern Provincial Airways* et le Comité des transports aériens de la Commission canadienne des transports.

Je dirais pour répondre de façon générale à votre question que nous trouvons, en fin de compte, que le gouvernement du Canada paie une attention suffisante aux pertes qui surviennent en assurant ces services aériens, Toutefois, comme au fur et à mesure qu'on élabore la politique globale du gouvernement, la structure de l'industrie change. Et certainement, l'industrie du transport aérien dans le monde a connu plusieurs révolutions importantes au cours des vingt dernières années. La chose la plus révolutionnaire des 10 dernières années est sans doute l'apparition des turboréacteurs. Un turboréacteur à faible rayon d'action coûte quelque 5 millions de dollars.

Il y a 5 ans quand nous avons piloté les turbos propulseurs, il s'agissait d'une mise de fonds de 1 million de dollars. Il y a dix ans, avec les avions avec moteurs à pistons, il s'agissait d'environ 100 mille dollars d'investissement. Ainsi, le progrès de la technique a entraîné, partout dans le monde, une centralisation ou un fusionnement des transporteurs aériens.

En 1963, par exemple, la *Eastern Provincial Airways* se fusionnait avec la *Maritime Central Airways Ltd.* car ce n'était pas rentable pour les deux lignes aériennes d'avoir un permis d'exploitation dans la même région du pays. Il y a eu plusieurs fusions. Si je me souviens bien, même dans votre région du pays, depuis 10 ans. Nous nous sommes fusionnés à Nordair pour des raisons économiques à la base. Si vous prenez le trajet de la *Eastern Provincial Airways*, et si vous l'analysez, vous trouverez qu'en théorie, un seul avion à réaction pourrait assurer tous les services du réseau entier en raison de la grande productivité d'un seul avion à réaction à comparer avec un propulseur. Il est impossible d'acheter un avion à réaction et en retirer un rendement économique maximum.

Il est impossible de déterminer l'horaire pour obtenir de manière à respecter les exigences des voyageurs. Il faut au minimum deux avions à réaction pour réaliser une exploitation rentable. Mais si vous exploitez seulement deux avions à réaction, vous rencontrez de graves problèmes d'horaire.

Par exemple, quand un avion à réaction est retiré du service pour une vérification, il ne vous reste que la moitié de votre flotte. Et à mon avis, vous avez vraiment besoin de trois avions à réaction pour maintenir un certain niveau d'efficacité dans l'industrie du transport aérien. C'est ce qui s'est passé sur les lignes aériennes au Canada.

[*Texte*]

I might say the same thing happened in the regional air line business in the United States. The only difference is that in the United States they had a subsidy system that was started in 1949, if I remember correctly, and the number of carriers has gone from 13 to 10 within the last couple of years. They have a subsidy system in Australia as well and it has been in existence for some eight to ten years.

So, Canada was late in fact in developing a policy with respect to its regional carriers, but that policy has now been developed and I think Eastern Provincial Airways (1963) Limited is satisfied with the progress we have made in the last few years, although we are not necessarily in agreement with each and every little aspect of the so-called subsidy formula.

Mr. Pringle: Thank you. Do you feel there is sufficient liaison between the main trunk lines in Canada and the regional carriers—and I refer to all of the regional carriers generally—with regard to ticketing, reservation arrangements, accommodation of passengers from one air line to another and so on? There have been some problems.

I have started for Charlottetown a couple of times and found myself on the ferry, which does not really matter, but it seems there could have been more liaison between Air Canada and Eastern Provincial at that particular time to avoid that problem. I am wondering if there is the camaraderie there should be and if there are any suggestions you could make through the Department of Transport that might assist us.

Mr. Lewington: We are very well aware of that problem, Mr. Chairman, but I would like to say right now that we have excellent relations with Air Canada, and camaraderie is the proper word to describe it. We are on a very close basis with them. This does not mean, though, that we have been able to iron out all these problems—not by a long way.

However I think as we develop our services we will be able to integrate this sort of customer service in transferring from one air line to another very, very substantially. This is developing. For example, we have our reservations on Air Canada's computer for the Prince Edward Island services. Also, Air Canada handles our passengers at Seven Islands. We have had these sorts of arrangements from time to time for a number of years.

[*Interprétation*]

Je pourrais dire que la même chose s'est produite pour les lignes de transport régionales aux États-Unis. La seule différence, c'est qu'aux États-Unis, ils avaient une régime de subventions depuis 1949, sauf erreur, et le nombre de transporteurs a diminué de 13 à 10 au cours des dernières années. En Australie, ils ont aussi un régime de subventions depuis huit ou dix ans.

De fait, le Canada était en retard dans l'élaboration d'une politique sur ses transporteurs régionaux. Mais cette politique a maintenant été élaborée. Je crois que la *Eastern Provincial Airways (1963) Limited* est satisfaite du progrès que nous avons fait depuis quelques années, même si nous ne sommes pas d'accord avec chaque aspect particulier de la formule de subvention.

M. Pringle: Merci. Croyez-vous qu'il y a suffisamment de liaison entre les lignes principales au Canada et les transporteurs régionaux—et je me réfère à tous les transporteurs régionaux en général—en ce qui concerne la vente des billets, les réservations, le logement des passagers, d'une ligne aérienne à l'autre? Il y a eu certains problèmes.

Je suis parti pour Charlottetown une couple de fois, et je me suis retrouvé à bord du traversier, ce qui importe peu, mais il me semble qu'il aurait pu y avoir une meilleure communication entre Air Canada et Eastern Provincial Airways pour éviter ce problème. Je me demande s'il existe cette camaraderie qu'il devrait y avoir et si vous pourriez, par l'entremise du ministère des transports, formuler des suggestions qui nous aideraient?

M. Lewington: Nous sommes fort au courant de ce problème, monsieur le président, mais je dois d'abord dire que nous avons d'excellentes relations avec Air Canada. Il serait juste de dire qu'il s'agit de camaraderie. Nous avons des rapports étroits avec eux. Cela ne veut pas dire que nous avons pu nécessairement régler tous les problèmes. Loin de là.

Toutefois, au fur et à mesure que nous développons nos propres services, nous pourrons probablement intégrer, en grande partie, ce genre de services aux clients, soit le transfert d'une ligne aérienne à l'autre. Nous le développons à l'heure actuelle. Par exemple, nous faisons nos réservations sur l'ordinateur d'Air Canada pour l'Île du Prince-Édouard. Également, Air Canada se charge de nos passagers à Sept-Îles. Nous avons eu ces ententes de temps à autre depuis un certain nombre d'années.

[*Text*]

Mr. Pringle: I will close with just one further point. You mentioned subsidy and I believe you are talking about operating losses, are you not?

Mr. Lewington: That is right.

Mr. Pringle: You are not talking about capital investment. You never mentioned whether any support should be given to a program of arranging financial assistance with regard to capital purchase of equipment, and so on, over a period of time so that you could upgrade your facilities and equipment and shorten the period of time when you will be able to give first class service which would not be too different from that supplied by the trunk lines. I would be interested to hear your reply in this regard.

Mr. Lewington: At the moment that assistance is not available to us. I think on our side we would agree that this would be highly desirable. I do not know when or how the government may approach that problem in the future.

The Chairman: Mr. Corbin?

Mr. Corbin: First of all, Mr. Chairman. I noticed in his opening remarks the witness stated the type of air business that EPA was in. He mentioned it in the following order; mail, passenger and freight. I wonder if he would state at this time which of these services he considers essential from an economic point of view in order to stay in business. Is it mail, freight or passenger service?

• 1245

Mr. Lewington: The common phrase is "mail, passenger and goods", which is a fine distinction. However, from an economic point of view the passenger service produces the higher yield.

Mr. Corbin: It does for you.

Mr. Lewington: It does for us.

Mr. Corbin: I see.

Mr. Lewington: And I think this is true throughout the industry. I am fairly sure it is. One of the big problems in air transport is really developing the goods business and getting the right yield and a good rate for it. I would like Mr. Millar to speak on this point because he has had very considerable experience in this area.

Mr. J. Millar: I would think one of the biggest single problems in determining an economic rate that has plagued the industry ever since I have been in the air line business is

[*Interpretation*]

M. Pringle: Je voudrais soulever un dernier point pour clore. Vous avez parlé de subventions et vous parlez de perte d'exploitation, n'est-ce pas?

M. Lewington: C'est exact.

M. Pringle: Vous ne parlez pas de mise de fonds. Vous n'avez jamais mentionné que l'on devrait appuyer un programme d'assistance financière pour l'achat d'équipement au cours d'une certaine année afin que vous puissiez améliorer vos facilités et votre équipement et raccourcir le temps requis pour vous permettre de donner un service de premier ordre comme celui des lignes principales. J'aimerais entendre vos vues à ce sujet.

M. Lewington: Ce genre d'aide ne nous est pas disponible actuellement. Nous serions tous d'accord que ce serait fort souhaitable. Je ne sais pas ni la date ni la manière dont le gouvernement s'attaquera à ce problème à l'avenir.

Le président: Monsieur Corbin?

M. Corbin: Monsieur le président, j'ai une question à poser au témoin. Tout d'abord, dans sa déclaration d'ouverture il a spécifié le genre d'industrie de EPA. Il a mentionné dans cet ordre: le courrier, les passagers, les marchandises. Pourrait-il me dire, maintenant, lequel de ces services il considère comme essentiel du point de vue économique pour demeurer en affaires? Est-ce le courrier, le service des passagers ou le cargo?

M. Lewington: Normalement, on dit «courrier, passagers et biens». Cependant, du point de vue économique, le service-passagers produit le meilleur rendement.

M. Corbin: Pour vous.

M. Lewington: Oui, pour nous.

M. Corbin: Je vois.

M. Lewington: Et je crois que c'est vrai pour toute l'industrie dans son ensemble. J'en suis presque certain. Un des grands problèmes du transport aérien, c'est vraiment de développer le service du transport des marchandises et d'en obtenir un assez bon profit. Je demanderais maintenant à M. Millar de vous parler de cet aspect, car il a une grande expérience dans ce domaine.

M. Millar: L'un des plus grands obstacles à l'établissement d'un tarif économique pour les services aériens depuis que je m'occupe de l'industrie des lignes aériennes, c'est le

[*Texte*]

the so-called density problem. The size of the envelope of an airplane is obviously a very significant factor in determining the direct operating costs of the airplane. Generally speaking, the bigger the envelope you are flying through the air the more power you need and the higher costs you get. Therefore pounds per cubic foot of an item of freight is a factor that has a most tremendous effect on rates. Because of the low amount of volume that you have in an airplane and because of the cost of operating an airplane you have to charge rates which are generally speaking not competitive.

For the most part, although in relative terms air cargo has increased at a tremendous pace during the last ten years, the amount of air cargo moved in the United States or Canada, for example, compared to the total amount of cargo moved was an infinitesimal percentage. I would hazard a guess that it was only one fiftieth of 1 per cent of the total amount moved. So, historically those things that have moved have really moved because of some special characteristics such as urgency, for example, or because of the very high cost of the item and therefore the associated cost of keeping it in inventory.

The air cargo business in the regional carrier field is something that has not grown in great leaps and bounds over the years because operating airplanes over short stage distances is much more expensive than operating them over long stage distances. Consequently the disparity between an air freight rate and a surface transportation rate is something which is fairly tremendous. For the most part the cargo that we have generated, we have generated because of the water barriers concerned, and now all cargo movement is between New Brunswick and Labrador. We really move it because of the lack of competition, basically.

The Chairman: Does that answer your question, Mr. Corbin?

Mr. Corbin: I have further questions, Mr. Chairman, if I may. I wonder if the witness could clear the record respecting a certain matter which came up when they applied to the Air Transport Committee in Bathurst last year and there was considerable difficulty in getting the hearings through. I followed the hearings quite closely as they were reported in the New Brunswick papers and it was stated that EPA was mainly interested in getting a licence to stop at Charlo in order to get a step closer to Montreal, which was the principal aim of your request, but that somewhere along the line you needed Charlo-Bathurst in order to get to Montreal; otherwise it possibly

[*Interprétation*]

problème de la densité. La dimension d'un avion est certainement un facteur très important dans le calcul des frais directs d'exploitation. Plus l'avion est gros, plus vous avez besoin de puissance et plus les coûts sont élevés. Par conséquent, le nombre de livres par pied cube est un facteur qui a un effet très grand sur les tarifs. Si vous avez un petit volume dans l'avion, il vous faut charger un tarif qui n'est pas concurrentiel à cause de vos frais d'exploitation.

Pour la plupart, même si le fret aérien a augmenté rapidement depuis 10 ans, la quantité de cargos aériens transportés aux États-Unis et au Canada, par exemple, en comparaison du total, est infime. Je dirais qu'il était peut-être 1/50 de 1 p. 100 du total transporté. Par conséquent, historiquement, les choses qui ont progressé rapidement l'ont fait très vite à cause de caractéristiques spéciales, par exemple, un besoin urgent, ou à cause des frais élevés d'un item et, conséquemment du coût combiné de le tenir en inventaire.

Le fret aérien, au niveau régional a augmenté peu et lentement au cours des années car il en coûte plus pour exploiter des avions sur un faible parcours que sur un long parcours. Par conséquent, la différence entre le tarif du cargo aérien et le transport de surface est énorme. La plus grande partie du cargo aérien que nous avons pu obtenir est due à la présence des nappes d'eau et il se fait entièrement entre le Nouveau-Brunswick et le Labrador. Vraiment, nous le transportons parce qu'il n'y a pas de concurrence.

Le président: Est-ce que cela répond à votre question, monsieur Corbin?

M. Corbin: J'ai d'autres questions, monsieur le président. Je me demande si le témoin ne pourrait pas nous éclairer sur un incident qui s'est produit lorsqu'ils ont présenté une demande au comité sur le transport aérien à Bathurst, l'an dernier. Ils ont eu certaines difficultés à obtenir les audiences voulues. J'ai suivi ces audiences de très près dans les journaux du Nouveau-Brunswick. On a prétendu que EPA voulait surtout obtenir un permis d'exploitation pour s'arrêter à Charlo, afin d'être un peu plus près de Montréal, ce qui était le but principal de votre demande. On disait que vous avez besoin de Charlo-Bathurst pour atteindre Montréal car,

[*Text*]

would not have been justified in the eyes of the Air Transport Committee members, or something along that line. If you had not had the licence to go to Montreal, how would that have affected you as you stand today?

[*Interpretation*]

autrement, vous n'auriez pu justifier votre demande aux yeux du Comité sur le transport aérien.

Si vous n'aviez pas obtenu le permis d'exploitation pour vous rendre à Montréal, comment cela vous aurait-il affecté dans votre situation actuelle?

• 1250

Mr. Lewington: The licence to Montreal is just one part of our full and future development.

M. Lewington: Le permis d'exploitation pour nous rendre à Montréal n'est qu'une seule partie de notre développement entier et futur.

Mr. Corbin: If I may, I will state it very plainly. Was it essential for your survival as a regional carrier to get into Montreal?

M. Corbin: Permettez-moi de vous le dire directement. Était-il essentiel pour la survie, de votre transporteur régional, de vous rendre à Montréal?

Mr. Lewington: Yes, in my opinion, and there is more to come of a similar kind.

M. Lewington: Oui, à mon avis, et il y en a d'autres semblables à venir.

Mr. Corbin: If I understood correctly from evidence given earlier, through your wedding with Nordair you are going to convert to jets.

M. Corbin: Si j'ai bien compris les témoignages donnés antérieurement grâce à votre alliance à Nordair, vous pourrez justement convertir votre service en avions à réaction.

Mr. Lewington: That is correct.

M. Lewington: C'est exact.

Mr. Corbin: And this will include your present line now serving Charlottetown-Charlo-Montreal. Will the landing strips, at Charlo or Bathurst be able to receive those jets, or will they have to be modified extensively?

M. Corbin: Cela comprendra aussi la ligne actuelle qui dessert Charlottetown, Charlo et Montréal. Est-ce que les pistes d'atterrisage à Charlo ou à Bathurst pourront recevoir ces avions à réaction ou est-ce que ces pistes devront être modifiées considérablement?

Mr. Lewington: They will have to be modified extensively. One of the first things is that either runway will have to be extended to at least 5,500 or 6,000 feet and paved for a bearing strength that will support at least 100,000 pounds; in addition to the lights that are already in both locations there would need to be high intensity approach lights, a VASI, which is a visual approach smoke indicator, and an instrument landing system. These will all be necessary facilities in time.

M. Lewington: On devra les modifier considérablement. De toute façon, chaque piste devra être prolongée jusqu'à au moins 5,500 ou 6,000 pieds et pavées pour pouvoir supporter au moins 100,000 livres. En plus des feux que nous avons déjà aux deux endroits, il faudra avoir des feux d'approche à haute intensité aux deux endroits, un indicateur fumigène pour l'approche à vue et un système d'atterissage au moyen d'instruments. Ces installations deviendront nécessaires avec le temps.

Mr. Corbin: Do you know at this time at what date you will put these jets into service on that line?

M. Corbin: Savez-vous quand vous mettrez ces avions à réaction en service sur votre ligne?

Mr. Lewington: Into Charlo or Bathurst, of course, this will depend entirely on what the Department of Transport is able to do. There is a very substantial amount of money involved here as well as all lead times necessary for equipment and the organizing of construction contracts.

M. Lewington: Pour Charlo ou Bathurst, cela dépend entièrement de ce que pourra faire le ministère des Transports car il y a en cause une somme d'argent très importante et tout le temps voulu pour l'équipement et la construction.

Mr. Corbin: I realize that. Is it the intention of EPA to service other points within the Province of New Brunswick? I would refer here particularly to the Saint John river valley above Fredericton, including points like

M. Corbin: Je comprends. Est-ce l'intention de EPA, de desservir d'autres points à l'intérieur de la province du Nouveau-Brunswick? Et ici, j'aimerais mentionner tout particulièrement la vallée de la rivière Saint-Jean tout

[*Texte*]

Woodstock, Grand Falls and Edmunston. Have you had a look at this?

Mr. Lewington: We have been looking at all these points and a number of others in the Atlantic region for a number of years, and our decisions in this area will depend a great deal on the studies which Air Canada are now doing internally on their position and what recommendations they are going to make to government on their regional roles. In addition to that, we at the present time have a consulting firm doing the same thing for us, and Fredericton, Saint John, every point that might deserve, or need, or ask for air service is being considered.

Mr. Corbin: Mr. Chairman, I have a last question. In the decision handed down by the Air Transport Committee the other day the application by Commuter Air Services for an all-points service within the Province of New Brunswick was denied, and I notice you opposed this particular application; can you tell us why?

Mr. Lewington: I am surprised at that, Mr. Chairman. I did not think we did oppose it. We did not support it.

Mr. Corbin: All right, you did not support the particular application? I may be wrong, but I thought I had read that you had actually opposed the application for that service.

Mr. Millar: If my memory serves me correctly, I prepared the document that this airline submitted at the specific hearing and I do not believe that we either opposed it or supported it. As a matter of fact, I think the only comment we made was that in considering the application of Commuter Air Services the Air Transport Committee should also take into consideration the developing regional airline policy since at this moment of time the policy is developing, as events have indicated in the last two years. But we were not opposed to the application of Commuter Air Services or, for that matter, to the application of Air Brunswick. In fact, we met with the principals of Commuter Air Services with a view to scheduling in such a manner as to meet the public. We met with them in Montreal, and subsequently some of our other staff met with them in New Brunswick.

Mr. Corbin: What I was basically interested in was whether or not the type of service that Commuter Air Services wanted to bring about could be comparable to a ground taxi service, bringing passengers from the outports

[*Interprétation*]

près de Fredericton, y compris les points Woodstock, Grand Falls, et Edmundston. Est-ce que vous avez examiné cette possibilité?

M. Lewington: Depuis plusieurs annéees nous avons examiné tous ces points et un certain nombre d'autres dans la région de l'Atlantique. Nos décisions, à cet égard, dépendront beaucoup des études qu'Air Canada effectue à l'heure actuelle et des recommandations que la compagnie formulera auprès du gouvernement sur leurs rôles régionaux. De plus, à l'heure actuelle, nous avons des conseillers qui font la même chose pour nous, et Fredericton, et Saint-Jean tous des points qui mériteraient, qui demanderaient ceux qui auraient besoin de services aériens, sont actuellement à l'étude.

M. Corbin: Monsieur le président, j'aimerais poser une dernière question. Je vois dans la décision rendue l'autre jour par le Comité des transports aériens que la demande de *Commuter Air Services* en vue d'un service partout au Nouveau-Brunswick a été contestée, et j'ai constaté que vous vous y êtes opposés. Pouvez-vous me dire pourquoi?

M. Lewington: Je suis surpris, monsieur le président. Je n'ai pas pensé que nous nous y opposions. Nous ne l'avons pas appuyée.

M. Corbin: Très bien. Vous ne l'avez par appuyée? Je me trompe peut-être, mais je croyais avoir lu que vous vous y étiez opposés.

M. Millar: Si j'ai bonne mémoire, c'est moi qui avais préparé le document présenté par la ligne aérienne au cours de cette audience et je ne crois pas que nous nous y soyons opposés, ni même que nous l'ayons appuyée. En fait, je crois que le seul commentaire que nous ayons apporté indiquait que pour étudier la demande de *Commuter Air Services* le Comité des transports aériens devrait aussi tenir compte de la politique d'expansion des compagnies aériens régionales, qui s'élabore, comme en fait foi les événements des 2 dernières années. Mais nous n'étions pas opposés à la demande de *Commuter Air Services* ou à celle d'*Air Brunswick*. En fait, nous avons rencontré les employés supérieurs de *Commuter Air Services* afin d'arrêter un horaire qui répondrait aux besoins du public. Nous les avons rencontrés à Montréal et par la suite quelques-uns de nos employés les ont rencontrés au Nouveau-Brunswick.

M. Corbin: Ce qui m'intéressait à la base c'était de voir si oui ou non les services que *Commuter Air Services* voulait assurer pourraient se comparer à un service de taxi au sol qui amènerait les gens jusqu'aux principales

[*Text*]

into the main airports, in this case, perhaps, to you, and people in the upper Saint John river valley, for example, would then have had an easy access into Charlo and from there to Montreal.

Mr. Millar: I think earlier the hon. member from the West Coast used the term "third" level. This is the term we use in airline business. This specific airline to which you refer is what we call a "third" level carrier.

• 1255

Over the last four or five years there have been substantial developments with respect to the relationships between regional air carriers in the United States and Canada and third level carriers and there seems to be some sort of a split personality in the industry. Some regional airlines support with some considerable weight the third level carriers, while others seem to oppose them. We have no fixed policy either of opposition or support at this moment in time because we think that our attitude towards third level carriers is part and parcel of the whole development of policy in the industry now with respect to the routes of the regionals through domestic trunks, etc.

Mr. Mahoney: Mr. Chairman, I would like to ask a couple rather specific questions.

Firstly, there were suggestions made when we visited St. John's, Newfoundland that the present Torbay airport is out of service a great deal on account of weather conditions. Has this been your experience?

Mr. Lewington: It is. I did a study at one time based on the hourly observations throughout a year; 25 per cent of the time the airport was beyond the limits of visibility, ceiling or wind.

Mr. Mahoney: Have your studies gone on to the point of thinking of alternate locations, and, if so, how far away from St. John's would you have to get to materially improve that situation?

Mr. Lewington: We have never studied it, but nevertheless we have discussed it many times with Air Canada and others who were interested, including the Department of Transport. It is my opinion, for what it is worth, that the cost of building another airport would not be justified; that is, if you located it in some other place you would certainly at some points in time be able to land there when you could not land at Torbay,

[*Interpretation*]

aérogares. Pour vous et pour les gens de la vallée en amont de la rivière Saint-Jean, y aurait-il un accès facile à Charlo et de là à Montréal.

M. Millar: Je crois que l'honorable député de la Côte de l'Ouest a employé l'expression «troisième niveau». C'est justement l'expression qu nous employons. La ligne aérienne dont vous parlez constitue un transporteur de troisième niveau.

Depuis 4 ou 5 ans, il y a eu des développements importants dans les rapports entre les transporteurs régionaux aux États-Unis et au Canada et les transporteurs de troisième classe et il semble y avoir un dédoublement de personnalité dans l'industrie. Certaines compagnies aériennes régionales appuient fortement les transporteurs de troisième classe alors que d'autres s'y opposent. Nous n'avons aucune politique définitive pour l'appuyer ou pour nous y opposer, en ce moment, car nous croyons que notre attitude vis-à-vis des transporteurs de troisième classe fait partie de toute l'élaboration de la politique de l'industrie à l'égard des routes, des transporteurs régionaux, à travers les lignes principales intérieures.

M. Mahoney: Monsieur le président, j'aimerais poser quelques questions assez précises. Tout d'abord, lors de notre visite à Saint-Jean (Terre-Neuve), on a dit que l'aéroport actuel Torbay ne peut pas servir très souvent en raison des conditions atmosphériques. Avez-vous eu cette expérience?

M. Lewington: Oui. Effectivement, j'ai fait une étude, à un moment donné, fondée sur les observations horaires au cours de l'année: 25 p. 100 du temps, l'aéroport n'était pas accessible en raison de vents, de températures ou autres facteurs de visibilité.

M. Mahoney: Est-ce que vos études vous ont amené à penser à d'autres emplacements et, dans le cas de l'affirmative, à quelle distance de Saint-Jean devriez-vous déplacer l'aéroport pour améliorer la situation?

M. Lewington: Nous n'avons pas étudié cette possibilité, mais tout de même nous en avons parlé à plusieurs reprises à Air Canada et à d'autres qui s'y intéressaient ainsi qu'au ministère des Transports. Voici ce que j'en pense. Le coût de construction d'un autre aéroport ne serait pas justifié. Vous pourriez y atterrir en certains de ces points s'il est impossible d'atterrir à Torbay, mais, dans l'ensemble, ce ne serait pas justifiable. La

[*Texte*]

but over-all it could not be justified. The answer to this problem is more sophisticated aids so that the aircraft can land at the lower limits. The so-called category 2 would bring an aircraft down to 100 feet and a quarter of a mile.

Mr. Mahoney: Moving on now to Charlottetown, do you regard the terminal facilities there as adequate for your present purposes?

Mr. Lewington: They are far from that, sir, and not only the terminal facilties there is no ILS there. Our reliability and regulatory of service with the jet equipment is going to suffer on that account until these deficiencies are made up.

Mr. Mahoney: Aside from ILS, what about the landing strip or strips themselves at Charlottetown when you move on to jets? Will they require considerable modification?

Mr. Lewington: There is one runway that is quite sufficient the others are not.

Mr. Mahoney: Thank you.

Mr. Givens: Mr. Chairman, it is an open secret that most regionals are struggling and consultants are making a fortune running around telling you why you are sick. Also it is a question in my mind as to whether the people in the regions actually have confidence in the regionals from the standpoint of equipment, operation and safety.

What do you think of this idea? Supposing instead of all of you going into debt to buy this sophisticated jet equipment that you merge your resources, put all the regionals together, get all this high class, expensive equipment and then give out franchises to the various regions and various areas; in other words, like Sheraton or even hook it up with a hotel system, like the Sheraton chain or the Hilton chain, and really make a go at it as a business and have the proper kind of uniforms and have your scheduling right across the country serving the regions, instead of each of you individually trying to make a go of it and struggling like the dickens.

Mr. Millar: Well, the theory is not new. I might say that I was a consultant before I was an airline executive.

An hon. Member: It is usually the other way around.

Mr. Millar: I might say I did not make very much money at it.

I think a regional carrier exists in a region. First of all, let me start another way. This

[*Interprétation*]

réponse à ce problème réside dans les aides plus perfectionnées pour permettre aux avions d'atterrir avec de faibles conditions de visibilité. La catégorie 2 ferait atterrir un avion à moins de 100 pieds dans un quart de mille.

M. Mahoney: Est-ce que les installations du terminus de Charlottetown suffisent à vos besoins actuels?

M. Lewington: Ils y sont bien loin, et non seulement les installations d'aérogares. Il n'y a pas de système d'atterrissage au moyen d'instruments. La sécurité et la régularité des services avec avions à réaction en souffriront jusqu'à ce qu'on remédie à ces déficiences.

M. Mahoney: En plus de ce système, qu'est-ce que vous pensez des pistes d'atterrissage ou des pistes elles-mêmes à Charlottetown, si vous inaugurez les services avec les avions à réaction? Faut-il y apporter beaucoup de modifications?

M. Lewington: Une piste d'atterrissage est assez satisfaisante; les autres ne le sont pas.

M. Mahoney: Merci.

M. Givens: Monsieur le président, c'est un secret de polichinelle que la plupart des services régionaux ont des difficultés et que les conseillers font beaucoup d'argent en leur indiquant leurs problèmes. Je me demande si les gens de ces régions ont vraiment confiance sur le plan de l'équipement, de l'exploitation et de la sécurité.

Que pensez-vous de cette idée? Supposez qu'au lieu de tous vous endetter en achetant cet avion à réaction, que vous mettez en commun les ressources de tous les transporteurs régionaux, obtenir pour tous l'équipement cher de premier ordre et ensuite, d'accorder des franchises aux diverses régions ou des divers secteurs. Autrement dit, comme la chaîne Sheraton ou vous pourriez même vous associer avec les hôtels comme la chaîne Sheraton ou Hilton, en faire vraiment une affaire, avoir de bons uniformes et un horaire des vols à travers tout le Canada, desservant les régions, au lieu d'y aller chacun de son petit effort.

M. Millar: La théorie n'est pas nouvelle. J'étais conseiller avant d'être administrateur d'une compagnie aérienne.

Une voix: C'est habituellement le contraire.

M. Millar: Je ne faisais pas tellement d'argent.

Je pense qu'un transporteur régional existe dans une région. Tout d'abord, commençons

[*Text*]

theory in essence creates another domestic carrier in this country. That is what it is saying another carrier that can operate from St. John's, Newfoundland to Vancouver or Victoria, British Columbia. Whether this nation can afford a third domestic trunk carrier at this moment, I guess, is a matter of conjecture, but I do not believe it could.

But somewhat more important than that factor is the fact that a regional carrier allegedly exists in a region because it is better equipped to schedule and meet the real local service needs of that region, while in the United States historically regional carriers have been called local service airlines. Now, in my own opinion—and it is just one opinion—this theory is unrealistic and is not what the national air transportation system in this country requires at this moment of time. Now, whether or not it is workable is also a matter for some considerable debate.

Mr. Givens: I hope you remember that when the...

The Chairman: Is there any other question?

Mr. McQuaid: Yes, Mr. Chairman, I have several questions to direct to Mr. Lewington but since it is one o'clock perhaps you might like to adjourn.

The Chairman: Well, if you are the last speaker; these gentlemen might want to go home this afternoon. We cannot get this room this afternoon so we would have to wait until 8 o'clock tonight. If the Committee agree we might be able to finish it up now.

Mr. McQuaid: Mr. Lewington, I am particularly interested and I may say concerned about the type of service that EPA are now providing to the people of Prince Edward Island on your flight from Charlettetown to Montreal, and I do not hesitate to place on the record for the benefit of this Committee that your service, from the point of view of the facilities you are using and from the point of view of the passenger confort, is about as unsatisfactory as anybody could possibly imagine. I am particularly interested in knowing whether, Mr. Lewington, when you made your application for this service to the Air Transport Committee, you gave a commitment to the Air Transport Committee, you gave a commitment to provide any particular type of aircraft on this service?

Mr. Lewington: No sir, we did not. I beg your pardon we did say that we were going to use *Herald* aircraft that is for sure.

[*Interpretation*]

d'une autre façon. Cette théorie essentiellement crée un autre transporteur domestique dans ce pays. Un autre transporteur qui peut aller de St-Jean, Terre-Neuve, à Vancouver ou Victoria, Colombie-Britannique, que cette nation puisse se permettre un troisième transporteur domestique est une simple question de conjecture, je crois qu'il pourrait.

Il y a quelque chose de plus important, c'est le fait qu'un transporteur régional existe dans une région parce qu'il est mieux équipé disons pour répondre aux besoins de service local de cette région, alors qu'aux États-Unis, ces transporteurs régionaux ont été qualifiés de ligne locale de service. A mon avis, et c'est là simplement mon avis, nous croyons que cette théorie est peu réaliste et ce n'est pas ce dont notre service national a besoin maintenant. Que ce soit possible ou pas, donc, on peut discuter de la question assez longuement.

M. Givens: J'espère que vous n'oublierez pas que...

Le président: Auriez-vous d'autres questions à poser?

M. McQuaid: Oui, j'aurais plusieurs questions à poser mais vu qu'il est une heure, peut-être voudriez-vous lever la séance?

Le président: Si vous êtes le dernier sur la liste, ces messieurs préféreraient rentrer cet après-midi. Il nous faudra attendre à huit heures ce soir parce qu'on ne peut pas siéger cet après-midi. Si le Comité était d'accord, nous pourrions terminer maintenant.

M. McQuaid: Monsieur Lewington, je suis plus particulièrement intéressé, je puis dire même préoccupé, quant au genre de service que EPA assure maintenant à la population de l'Île-du-Prince-Édouard pour ce vol de Charlottetown à Montréal et je n'hésite pas du tout à consigner au compte rendu pour la gouverne de ce Comité que votre service, du point de vue des services que vous utilisez et du point de vue du confort des passagers est à peu près aussi déplorable qu'il peut l'être.

Je suis plus particulièrement intéressé à savoir si, M. Lewington, lorsque vous avez présenté cette demande pour ce service au comité du transport aérien, vous vous êtes engagé à assurer ce service avec un genre donné d'avions.

M. Lewington: Non, je m'excuse, nous avons dit que nous utiliserions des avions *Herald*.

[*Texte*]

Mr. McQuaid: You said you were going to use *Dart Heralds* and that is what you are using now?

Mr. Lewington: That is right.

Mr. McQuaid: Now, let me ask you this, Mr. Lewington. Is there a height beyond which it is not safe to fly a *Dart Herald*?

Mr. Lewington: No, sir. Mind you, there is a limit. There is a ceiling to all aircraft and the ceiling for the *Herald* is 17,000 or 18,000 feet.

Mr. McQuaid: Do you fly at 17,000 to 18,000 feet from Charlottetown to Montreal?

Mr. Lewington: We could do, but we do not necessarily. It will depend among other things on what altitude is allocated by the air traffic control. There is a minimum altitude, I think, on that route of 6,000 feet.

Mr. McQuaid: Mr. Lewington, I understand that one of your *Dart Heralds* blew up a few years ago and that as a result of your investigation it was found it blew to pieces because of the fact that it flew too high.

• 1305

Mr. Lewington: This is not correct. I have forgotten the words of the opinions that were given after the investigation, but it was decompression. It was a failure of the hull and the decompression of the hull was catastrophic.

Mr. McQuaid: Is this not one of the weaknesses of the *Dart Herald*?

Mr. Lewington: It is no longer a weakness, sir. It has been thoroughly overcome.

Mr. McQuaid: Are you suggesting then, Mr. Lewington, to this Committee that your aircraft that you are presently using on this flight can safely fly at a height of 17,000 feet from Charlottetown to Montreal?

Mr. Lewington: Absolutely.

Mr. McQuaid: Then may I ask you why you do not fly that height and give some more passenger comfort?

Mr. Lewington: There may have been some particular reason for one flight, I do not know, but we do fly at that altitude and can fly at that altitude. If I knew the specific day and the specific flight I might be able to find out why they did not.

[*Interprétation*]

M. McQuaid: Vous avez dit que vous utiliseriez des *Dart Herald* et c'est ce que vous utilisez maintenant?

M. Lewington: C'est juste.

M. McQuaid: Dites-moi, monsieur Lewington, est-ce qu'il y a une altitude au-delà de laquelle il n'est pas prudent de faire voler un *Dart Herald*?

M. Lewington: Non, monsieur. Il y a cependant un maximum. Tout avion a un maximum et pour le *Herald* c'est 17,000 ou 18,000 pieds.

M. McQuaid: Est-ce que vous volez à 17,000 ou 18,000 pieds de Charlottetown à Montréal?

M. Lewington: On pourrait le faire mais on ne le fait pas nécessairement. Cela dépend entre autres choses de l'altitude qui nous est donnée par le contrôle du trafic aérien. Il y a une altitude minimum de 6,000 pieds sur ce trajet je crois.

M. McQuaid: Si je comprends bien, un de vos *Dart Herald* a fait explosion il y a quelques années et à la suite de l'enquête que vous avez faite, vous avez découvert qu'il avait explosé parce qu'il volait trop haut.

M. Lewington: Non, ce n'est pas juste. J'ai oublié l'expression exacte utilisée après l'enquête, il s'agissait d'une décompression. Il y avait un défaut dans la coque et la décompression a été fatale.

M. McQuaid: N'est-ce pas une des faiblesses des *Dart Herald*?

M. Lewington: Non, plus maintenant, on l'a surmontée.

M. McQuaid: Alors, est-ce que vous dites à ce Comité, monsieur Lewington que l'avion que vous utilisez maintenant pour ce vol peut très bien voler à 17,000 pieds de Charlottetown à Montréal?

M. Lewington: Absolument.

M. McQuaid: Alors, pourquoi ne pas voler à cette altitude et donner un peu plus de confort aux passagers?

M. Lewington: Il y a peut-être une raison pour laquelle ce le fut pour un vol particulier, mais je sais que vous volons à cette altitude et nous pouvons le faire. Si je pouvais savoir au juste quel jour et quel vol précis dont il s'agit, je pourrais savoir pourquoi on ne l'a pas fait.

[*Text*]

Mr. McQuaid: You are suggesting now that ordinarily you do fly at a height of 17,000 feet?

Mr. Lewington: Well, not consistently. Again it will depend on weather and the allocation given by the air traffic control, but most often we do.

Mr. McQuaid: Most often you do fly at a height of 17,000 feet?

Mr. Lewington: Yes; there are a number of reasons besides passenger comfort for that. One is the efficiency of the airplane and the economy. It is highly desirable to fly at that altitude to get the efficiency from the turbines and the fuel consumption and things like that.

Mr. McQuaid: You mentioned I believe, Mr. Lewington, a few minutes ago in your evidence that you maintain excellent relations with Air Canada. Since you got this charter to fly from Charlottetown to Montreal, how many flights from Charlottetown have you either discontinued or changed the time of which previously used to connect with Air Canada from Moncton to Montreal?

Mr. Lewington: I will let Mr. Gaudet answer that one. He is the man who is responsible for drawing up these schedules and I think he has the information there.

Mr. Gaudet: We cut back one flight, Mr. McQuaid, when we laid on our Montreal flight and, as you know, for years on the Charlottetown-Moncton service MCA operated three flights a day, one in the morning, one in the afternoon and one in the early evening.

During the last two or three years when the *Dart Heralds* were put on the run these flights were reduced to two. We still have the same number of flights operating but they go different ways now. One goes to Montreal direct and one goes to Moncton. We have, in fact, a flight originating in Moncton in the morning at seven o'clock with a *Herald*. It comes to Charlottetown and goes on to Montreal and back, and it returns to Moncton at approximately nine o'clock at night.

Mr. McQuaid: What connection does that make with Air Canada, Mr. Gaudet?

Mr. Gaudet: A very good one, as a matter of fact. I have a list here if you care for me to outline the exact connections at the present time.

[*Interpretation*]

M. McQuaid: Vous suggérez qu'habituellement vous volez à 17,000 pieds.

M. Lewington: Pas toujours. Tout dépend des conditions atmosphériques et des directives données par le contrôle aérien. La plupart du temps c'est ce que nous faisons.

M. McQuaid: La plupart du temps vous volez à 17,000 pieds?

M. Lewington: Oui. Il y a un certain nombre de raisons pour cela, en plus du confort des passangers. Une des raisons est l'efficacité de l'économie de l'avion. Il est souhaitable de voler à cette altitude pour obtenir le meilleur rendement des turbines, la meilleure consommation d'essence et ainsi de suite.

M. McQuaid: Vous avez parlé il y a quelques instants au cours de votre témoignage que vous mainteniez d'excellents rapports avec Air Canada. Je voudrais donc vous demander combien de vols de Charlottetown à Montréal vous avez effectué depuis que vous avez le permis d'exploitation de cette ligne. Combien de vols de Charlottetown à Montréal avez-vous annulés ou reportés qui habituellement assuraient la correspondance avec Air Canada à partir de Moncton à Montréal?

M. Lewington: Je vais laisser M. Gaudet répondre à cette question. Il est responsable de la préparation des horaires et je pense qu'il a des renseignements.

M. Gaudet: Nous avons annulé un vol, monsieur McQuaid, un vol de Montréal, comme vous le savez le service de Charlottetown a eu pendant des années trois vols par jour, un le matin, un l'après-midi, et un tard dans la soirée.

Au cours des deux ou trois dernières années, lorsque les *Dart Herald* furent mis en service, nous avons réduit ces vols au nombre de deux. Nous avons toujours le même nombre de vols mais ils sont organisés différemment. Un va à Moncton, l'autre à Montréal et nous avons un vol à partir de Moncton à sept heures le matin qui vient à Charlottetown et va à Montréal et revient à Moncton vers 9 heures le soir.

M. McQuaid: Quelle correspondance cela a-t-il avec Air Canada?

M. Gaudet: Une excellente. J'ai une liste ici si vous voulez, je pourrais vous donner les correspondances exactes.

[*Texte*]

Mr. McQuaid: That flight you mention that leaves Moncton, the *Dart Herald*, at seven o'clock in the morning, what time do you have to leave Montreal by Air Canada to connect with that flight?

Mr. Gaudet: You have to leave on the 0130 flight which is a *Vanguard*. It arrives in Moncton, I believe, at about 4.30 in the morning.

Mr. McQuaid: 0130; what time is that?

Mr. Gaudet: Half past one.

Mr. McQuaid: Are you sure, Mr. Gaudet? That one leaves at 1.30 in the morning and it arrives in Moncton around four o'clock; is that not right? So your passengers have to sleep in the terminal in Moncton from four o'clock in the morning until seven-thirty to connect with your EPA flight?

Mr. Gaudet: If they want to take that flight they would have to, yes. Of course, there are other flights better than that to take.

Mr. McQuaid: I am talking about this one now. Do you consider that a good connection?

Mr. Gaudet: No, I do not. I consider that a terrible connection.

Mr. McQuaid: Well, now, what is your next one? After 1.30 a.m. what time can I leave Montreal by Air Canada and what connection will I get from Moncton to Charlottetown?

Mr. Gaudet: Our flight 104 at the present time leaves Moncton at 11.30 in the morning. That flight makes four connections for eastbound traffic, one of which is flight 500 which is a direct airline service from Montreal and Toronto.

Mr. McQuaid: No, excuse me, Mr. Gaudet; just a minute. I am talking now about the passenger who is coming from Ottawa and travelling to Charlottetown, or Montreal and travelling to Charlottetown. What time can he leave Montreal to connect with your flight from Moncton to Charlottetown after 1.30 a.m.?

Mr. Gaudet: I have just outlined that; flight 500.

Mr. McQuaid: Flight 500 leaves Montreal when?

Mr. Gaudet: Flight 500 arrives in Moncton at 10.55 a.m. It would leave Montreal some time around 9.30 in the morning. I can check it in my brief case.

Mr. McQuaid: No, that is all right.

[*Interprétation*]

M. McQuaid: Ce vol qui part de Moncton par *Dart Herald* à sept heures du matin, à quel heure devez-vous quitter Montréal par Air Canada pour cette correspondance?

M. Gaudet: Il faut prendre le vol de 0130 qui est un *Vanguard*. Il arrive à Moncton, je pense, à environ quatre heures le matin.

M. McQuaid: 0130 quelle heure est-ce ça?

M. Gaudet: Une heure trente le matin.

M. McQuaid: Vous êtes sûr? Il quitte à 1.30 heure le matin et arrive à Moncton à quatre heures. Donc vos passagers doivent dormir de quatre heures le matin jusqu'à sept heures trente dans l'aéroport de Moncton pour prendre votre vol EPA?

M. Gaudet: S'ils veulent prendre ce vol, oui. Mais il y a d'autres vols plus pratiques.

M. McQuaid: Je parle de celui-là, croyez-vous que c'est une excellente correspondance?

M. Gaudet: Non, je pense que c'est terrible.

M. McQuaid: Oui, d'accord, alors quel est votre autre vol? Après 1.30 heure du matin, à quelle heure puis-je quitter Montréal par Air Canada et quelle correspondance puis-je avoir de Moncton à Charlottetown.

M. Gaudet: Notre vol 104 quitte Moncton à 11.30 heures le matin. Ce vol assure quatre correspondances pour le trafic vers l'Est dont l'un est le vol 500, service direct pour Montréal et Toronto.

M. McQuaid: Un instant. Je parle maintenant du passager qui vient d'Ottawa et s'en va à Charlottetown ou encore de Montréal à Charlottetown. A quel moment doit-il quitter Montréal pour avoir la correspondance avec vos vols de Moncton à Charlottetown après une heure trente du matin?

M. Gaudet: Je viens de vous le dire le vol 500.

M. McQuaid: Ce vol 500 quitte Montréal à quelle heure?

M. Gaudet: Ce vol 500 arrive à Moncton à 10.55, il quitte donc Montréal vers 9.30 le matin, je pourrais vérifier dans mes documents.

M. McQuaid: Non, ça va.

[*Text*]

Mr. Gaudet: I consider it to be an excellent connection to Charlottetown.

Mr. McQuaid: What is your next connection?

Mr. Gaudet: Eastbound again?

Mr. McQuaid: Eastbound again, yes.

Mr. Gaudet: And from what point?

Mr. McQuaid: Montreal.

Mr. Gaudet: The only other connection, the only other flight going to the Island, of course, is our own *Herald* flight from Montreal.

Mr. McQuaid: Yes; that is what I was coming at, Mr. Gaudet, so now, if you do not want to take this killer at 1.30 in the morning, sit up in Moncton from four o'clock to half past seven, the only other choice you have is an Air Canada flight leaving Montreal at 10:50. That is the only other time that I can get across to Charlottetown. Is that not right?

Mr. Gaudet: No. You have two choices, Mr. McQuaid. You can leave Montreal at approximately 9:00 a.m., which is a prime time for departure, take flight 500 and connect with our flight 104 at Moncton and you are in Charlottetown at approximately noon. If you do not want to do that you can take the EPA flight leaving Montreal at 2:30 p.m. and you are in Charlottetown for supper.

Mr. McQuaid: I am avoiding the EPA flight from Montreal to Charlottetown. Now, as I understand it, besides the one at 1:30 a.m. flight 500 is the only one that I can take from Montreal to bring me into Charlottetown.

Mr. Gaudet: That is correct—if you avoid EPA's direct flight.

Mr. McQuaid: Before you got your charter and ran direct from Charlottetown to Montreal and from Montreal back to Charlottetown, how many connections could I have made.

Mr. Gaudet: That would vary, Mr. McQuaid, with the season and Air Canada's timetable changes and everything else. In my experience, having done this for years, there would be some seasons where you could make three connections and some seasons you could make one.

[*Interpretation*]

M. Gaudet: Je considère cela comme une excellente correspondance pour Charlottetown.

M. McQuaid: Alors quelle est votre prochaine correspondance?

M. Gaudet: Vers l'Est?

M. McQuaid: Vers l'Est encore une fois. Oui.

M. Gaudet: A partir de quel point?

M. McQuaid: De Montréal.

M. Gaudet: La seule autre correspondance, le seul autre vol qui se rende à l'île est celui de notre *Herald* à partir de Montréal.

M. McQuaid: C'est ce à quoi je voulais en venir M. Gaudet. Maintenant, si vous ne voulez pas prendre ce vol mortel de 1 h. 30 du matin, arriver à Moncton à 4h et attendre jusqu'à 7h30, le seul autre choix c'est un vol d'Air Canada qui quitte Montréal à 10h50. C'est le seul autre moment où je peux me rendre à Charlottetown. N'est-ce pas exact?

M. Gaudet: Non, vous avez deux choix, monsieur McQuaid, vous pouvez quitter Montréal vers 9h le matin, ce qui est une belle heure pour le départ, prendre le vol 500 et changer à notre vol 104 à Moncton et vous arrivez à Charlottetown environ à midi. Si vous ne voulez pas faire cela, vous pouvez prendre le vol d'EPA quittant Montréal à 2h30 de l'après-midi, vous arrivez à Charlottetown pour le dîner le soir.

M. McQuaid: J'évite le vol de EPA à partir de Montréal à Charlottetown. Si je comprends bien, en plus du vol qui est à 1h30 le matin, le vol 500 est le seul vol que je puisse prendre à partir de Montréal pour m'amener à Charlottetown.

M. Gaudet: C'est juste. Si vous voulez éviter le vol direct de EPA.

M. McQuaid: Avant que vous n'ayez votre charte, pour aller directement de Charlottetown à Montréal, et de Montréal à Charlottetown, combien de correspondances aurais-je fait?

M. Gaudet: Cela varierait suivant la saison, monsieur McQuaid, et l'horaire d'Air Canada change et tout le reste. Suivant mon expérience, ayant fait cela pendant des années, il y aurait certaines saisons où vous pourriez avoir trois correspondances et d'autres une seule.

[*Texte*]

Mr. McQuaid: But now, irrespective of the season, there are only two.

Mr. Gaudet: Not quite irrespective of the season, since at the present time we are talking about our winter timetable which, as you know, is a reduced service in the light of our seasonal peaks of traffic. Had we not merged, for instance, with Nordair Ltd. this summer we would have laid on another flight on our summer timetable to take care of the peak. This would have given you two connections in the summer.

Mr. McQuaid: Is it not correct, Mr. Gaudet, that even during your winter service, before you got your charter to run from Montreal to Charlottetown, that I had more connections from Montreal connecting with EPA from Moncton to Charlottetown that I have right now.

Mr. Gaudet: That is absolutely correct, Mr. McQuaid, but you did not have any more than two during the winter season—and if you still wish to lop off the EPA service to Moncton to Montreal at the present time this would give you one more connection in those early days. But the way we look at it is that you still have two ways of getting to Charlottetown, as you always have had during the winter—one via EPA and one via Air Canada and EPA.

Mr. McQuaid: But one has to be by EPA.

Mr. Gaudet: That is correct.

Mr. McQuaid: Mr. Gaudet how soon are you prepared to put on this jet service that you speak of from Charlottetown to Montreal? I understand from what Mr. Lewington said a few moments ago that the air strip at your airport in Charlottetown will now handle the jets. Is that right?

Mr. Lewington: That is correct, Mr. McQuaid. If I may go on to answer the first part of your question, if approvals are received on all our proposals for merging the two companies, we expect to put a 737 on that service the first week of June.

Mr. McQuaid: That service then will not stop a Charlo, will it?

Mr. Lewington: It will not. This is another point on which we have to receive approval.

Mr. McQuaid: But you have reasonable hopes of getting that on in the first week of June.

[*Interprétation*]

M. McQuaid: C'est juste. Maintenant, quelle que soit la saison, il n'y en a que deux.

M. Gaudet: Non pas quelle que soit la saison, car, à l'heure actuelle, nous parlons de l'horaire de l'hiver, qui, comme vous le savez, est un service diminué dans l'optique du trafic de pointe saisonnier. Si, par exemple, nous ne nous étions pas fusionnés avec Nordair Ltd., cet été, nous aurions ajouté un vol à notre horaire d'été. Cela vous aurait donné deux correspondances durant l'été.

M. McQuaid: Est-ce exact, monsieur Gaudet, que pendant le service d'hiver, avant que vous n'ayez obtenu votre charte pour aller de Montréal à Charlottetown, que j'avais plus de correspondance de Montréal avec EPA de Moncton à Charlottetown que je n'en ai maintenant.

M. Gaudet: Oui, c'est juste, monsieur McQuaid, mais vous n'en aviez pas plus de deux pendant la saison d'hiver. Et si vous désirez toujours ne pas tenir compte du service de EPA de Moncton à Montréal, maintenant, cela vous donnerait une correspondance de plus à ce temps-ci. Il y a toujours deux possibilités de vous rendre à Charlottetown. Un par EPA et l'autre par Air Canada et EPA. C'est ce que vous avez toujours eu durant l'hiver.

M. McQuaid: Mais il faut en prendre un par EPA.

M. Gaudet: C'est juste.

M. McQuaid: Monsieur Gaudet, quand serez-vous prêt à avoir ce service de réactés dont vous parlez, de Charlottetown à Montréal? Si je comprends bien, d'après ce que M. Lewington a dit il y a un instant, que la piste à votre aéroport de Charlottetown, peut maintenant recevoir un réacté.

M. Lewington: C'est juste, monsieur McQuaid. Si je peux poursuivre pour répondre à la première partie de votre question, si nous avons l'approbation de toutes nos propositions pour le fusionnement des deux compagnies, nous nous attendons d'avoir un 737 pour ce service, pour la première semaine de juin.

M. McQuaid: Alors, ce service n'arrêterait pas à Charlottetown, n'est-ce pas?

M. Lewington: Non, et c'est là un autre point sur lequel nous devons recevoir l'approbation.

M. McQuaid: Mais vous pouvez espérer que vous pourrez l'avoir pour la première semaine de juin.

[*Text*]

Mr. Lewington: I think so, yes.

Mr. McQuaid: I certainly hope that this is realized, because it will be a very improved service.

Mr. Lewington: It certainly will.

Mr. McQuaid: I think that is all, Mr. Chairman. Thank you.

The Chairman: Any other questions?

Mr. Breau: Mr. Gaudet, suppose in the first part of June it becomes quite evident that physically it is not possible to have the airport either in Bathurst or Charlo ready, are you going to consider stopping at Chatham?

Mr. Lewington: No, we are not, Mr. Breau, but we will be carrying on the service to Charlo with aero-type aircraft.

Mr. Breau: You would continue with the same aircraft?

Mr. Lewington: I feel quite sure that the Air Transport Committee would insist upon it, and certainly we are planning on it.

Mr. Breau: Could you let us have a progress report of the study you made in Chatham. Also, Mr. Gaudet said that the general generation of traffic taking the Charlo to Montreal flight originated from north of Charlo. Would you send the Committee a copy of the study that has been made, showing the number of passengers that came from the Bathurst area and the number that came from the Campbellton area?

Mr. Lewington: I may even have a copy of that in my brief case that I can give to the Chairman. At any rate, we will see that the Committee has a copy of those figures. I must point out again that this is the first three months of operation, so they are not completely conclusive.

Mr. Breau: And the study of Chatham too.

Mr. Lewington: I am not sure when that will be finished. I do not believe that we will have that pulled together and in print until May or early June. This is just an opinion. There is a lot of work to be done and we are trying to co-ordinate as much as we can with the Air Canada study.

Mr. Breau: That is all, Mr. Chairman.

The Chairman: If there are no more questions, I would like to thank you three gentle-

[*Interpretation*]

M. Lewington: Je le pense. Oui.

M. McQuaid: J'espère que ce sera réalisé parce que ce serait une amélioration du service.

M. Lewington: Oui, certainement.

M. McQuaid: C'est tout, monsieur le président. Merci.

Le président: D'autres questions?

M. Breau: Monsieur Gaudet, disons que si, dans la première semaine de juin, il devient très évident qu'il n'est possible, matériellement, de préparer l'aéroport de Bathurst ou de Charlottetown, alors, est-ce que vous allez envisager la possibilité d'arrêter à Chatham?

M. Lewington: Non, monsieur Breau. Mais nous ferons toujours le service à Charlo avec aéronef.

M. Breau: Vous continuerez toujours avec le même avion?

M. Lewington: Je suis sûr que le Comité des transports aériens insistera là-dessus, et nous le projetons certainement.

M. Breau: Pourriez-vous nous faire parvenir un rapport de la marche de l'étude que vous avez faite à Chatham. Une autre chose. M. Gaudet nous a aussi parlé de l'augmentation générale du trafic que prend le vol de Charlottetown à Montréal originant du nord de Charlottetown. Pourriez-vous faire parvenir à ce Comité une copie de l'étude qui a été faite, indiquant le nombre des passagers qui venaient de la région de Bathurst et les autres qui venaient de la région de Campbellton?

M. Lewington: J'en ai peut-être une copie ici que nous pourrions donner au président. De toute façon, nous verrons à ce que le Comité ait une copie de ces chiffres. Je dois de nouveau signaler que ce n'est que pour les trois premiers mois des opérations, donc, ils ne sont pas entièrement concluants.

M. Breau: Et l'étude sur Chathem.

M. Lewington: Je ne suis pas sûr si cela sera terminé. Je ne crois pas que nous aurons ces renseignements compilés et imprimés avant le mois de mai ou le début de juin. C'est une simple opinion. Il y a beaucoup de travail à faire et nous essayons de coordonner ce travail dans la mesure du possible, avec l'étude faite par Air Canada.

M. Breau: C'est tout, monsieur le président.

Le président: Si nous n'avons plus de questions, je désire vous remercier, tous les trois,

[*Texte*]

men for coming over this morning. May I have a motion to replace Mr. Allmand with Mr. Trudel on the Steering Committee.

Mr. Mahoney: I so move.

Mr. Corbin: I second the motion.

Motion agreed to.

Mr. Chairman: I would like another motion to approve the minutes of the Steering Committee's meetings last week. Would you like the Clerk to read the minutes?

An hon. Member: Yes, please.

The Clerk:

SUBCOMMITTEE ON AGENDA AND PROCEDURE

Tuesday, March 4, 1969.

FOURTH REPORT

The Subcommittee on Agenda and Procedure of the Standing Committee on Transport and Communications met at 3:30 p.m. this afternoon. The Chairman, Mr. H.-Pit Lessard, presided.

Members present: Messrs. Allmand, Lessard (*LaSalle*), Mahoney, Nesbitt and Skoberg.

Also present: Mr. Horner.

Your Committee met to plan further meetings to hear additional evidence pertaining to the transportation problems in the Atlantic Provinces.

After discussion, it was agreed that the following persons and companies be requested to appear before the Standing Committee on Transport and Communications, on Thursday, March 13, 1969.

1. The Honourable J. W. Pickersgill, President of the Canadian Transport Commission.

2. Eastern Provincial Airlines.

3. A delegation from "Les Îles-de-la-Madeleine".

4. The Canadian National Railways.

Should officials of the Canadian National Railways not be able to appear before the Committee on the above-mentioned date, arrangements will be made for them to appear on Tuesday, March 18, 1969.

[*Interprétation*]

messieurs, d'être venus témoigner au Comité ce matin.

Je voudrais une proposition pour remplacer M. Allmand par M. Trudel au comité de direction.

M. Mahoney: Je le propose.

M. Corbin: J'appuie la proposition.

Proposition adoptée.

Le président: Je voudrais une autre proposition pour approuver le procès-verbal du comité de direction qui a tenu sa dernière réunion la semaine dernière. Voudriez-vous que le secrétaire vous en donne lecture?

Une voix: Oui, s'il vous plaît.

Le greffier:

SOUS-COMITÉ DU PROGRAMME ET DE LA PROCÉDURE

Le mardi 4 mars 1969.

QUATRIÈME RAPPORT

Le sous-comité du programme et de la procédure du Comité permanent des transports et des communications se réunit cet après-midi à 3 h. 30, sous la présidence de M. H.-Pit Lessard.

Présents: MM. Allmand, Lessard (*La Salle*), Mahoney, Nesbitt et Skoberg.

De même que: M. Horner, député.

Le sous-comité se réunit pour organiser d'autres séances en vue d'entendre des témoignages supplémentaires relatifs aux problèmes des transports dans les provinces de l'Atlantique.

Après débat, il est convenu que l'on demande aux personnes et compagnies suivantes de comparaître devant le Comité permanent des transports et des communications le jeudi 13 mars 1969:

1. L'honorable J. W. Pickersgill, président de la Commission canadienne des transports.

2. L'*Eastern Provincial airways (1963) Limited*

3. Une délégation des îles de la Madeleine.

4. Les Chemins de fer nationaux du Canada.

Au cas où les représentants des Chemins de fer nationaux du Canada ne pourraient comparaître devant le Comité à la date susmentionnée, on prendrait des dispositions en vue d'entendre leurs témoignages le mardi 18 mars 1969.

[*Text*]

The Chairman: We will have to change that to March 20, 1969 because they cannot make it on March 18.

The Clerk:

It was agreed that the Committee Clerk inquire as to the possibility of having the Minutes of Proceedings and Evidence adduced during the tour of the Atlantic Provinces, printed as soon as possible.

At 4:30 p.m., the Subcommittee adjourned.

Respectfully submitted,
H.-Pit Lessard,
Chairman.

Mr. Pringle: I move acceptance.

Mr. McGrath: I second the motion.

Motion agreed to.

The Chairman: There is one more and I would ask our Clerk to read it.

The Clerk: Motion: that the briefs received during the second session of the twenty-seventh Parliament concerning transportation problems of the Atlantic Provinces and printed in issue No. 15 of the Minutes of Proceedings of the Standing Committee on Transport and Communications be made part of the evidence adduced during the recent trip to the Atlantic Provinces.

Mr. Mahoney: I so move.

Motion agreed to.

The Chairman: I received quite a few telegrams yesterday and this morning and I wonder if those telegrams could be appended too.

Mr. Mahoney: Mr. Nesbitt is away with the External Affairs Committee. Has he been replaced on the Steering Committee yet?

The Chairman: He will be replaced by Mr. Horner.

Mr. Mahoney: Has there been a motion to that effect?

The Chairman: We will need a motion for that too.

Mr. Mahoney: I so move.

Mr. McGrath: I second the motion.

Motion agreed to.

The Chairman: This has completed our work for today. I thank you, gentlemen. There will be no sitting tonight.

[*Interpretation*]

Le président: Nous devrons changer cela pour le 20 mars 1969, parce qu'ils ne peuvent pas venir le 18 mars.

Le greffier:

Il est convenu que le secrétaire du Comité s'informe de la possibilité de faire imprimer aussitôt que possible les procès-verbaux et témoignages relatifs au voyage dans les provinces de l'Atlantique.

A 4 h. 30 de l'après-midi, le sous-comité lève la séance.

Respectueusement soumis,
Le président,
H.-Pit Lessard.

M. Pringle: Je propose l'adoption du procès-verbal.

M. McGrath: J'appuie la proposition.

La proposition est adoptée.

Le président: Il y a une dernière proposition, et je demanderais au secrétaire de nous la lire.

Le greffier: Proposition: que les mémoires reçus pendant la seconde session du 27e Parlement, relatifs aux problèmes de transport des provinces atlantiques, et qui sont imprimés dans le n° 15 du compte rendu des délibératioss du Comité permanent des transports et communications, soient intégrés dans les témoignages présentés pendant le récent voyage fait dans les provinces atlantiques.

M. Mahoney: J'en fais la proposition.

Proposition adoptée.

Le président: Donc, j'ai reçu un assez bon nombre de télégrammes hier et ce matin et je me demande si ces télégrammes ne pourraient pays y être annexés.

M. Mahoney: M. Nesbitt est en voyage avec le Comité des affaires extérieures. Est-ce qu'il a été remplacé au comité de direction?

Le président: Il sera remplacé par M. Horner.

M. Mahoney: Y a-t-il eu une proposition à cet effet?

Le président: Nous devrons ici avoir cette proposition.

M. Mahoney: J'en fais la proposition.

M. McGrath: J'appuie la proposition.

Proposition adoptée.

Le président: Ceci termine notre travail aujourd'hui et je vous remercie beaucoup, messieurs. Nous n'avons pas de séance ce soir.

[11] Remplace M. Crossman, le 20 mars 1969.

REPORT TO THE HOUSE

WEDNESDAY, March 19, 1969

The Standing Committee on Transport and Communications has the honour to present its

FIFTH REPORT

On January 17, 1969, the Standing Committee on Transport and Communications was empowered to consider and report upon the problems of transportation in the Atlantic Provinces. For the purpose of furthering its study, the Committee was authorized to adjourn from place to place within Canada.

Your Committee feels that the transportation problems of the Atlantic Provinces are complex in nature and an immediate solution is not feasible.

Moreover, the Committee recognizes the extreme urgency of certain problems which were considered during the tour of the Atlantic Provinces and deals with them in this Interim Report in respect of these problems.

MARITIME FREIGHT RATES

Your Committee recommends that Subsection 4 of Section 335 of the Railway Act be amended and the freeze extended to December 31, 1969.

PASSENGER TRAIN SERVICE IN NEWFOUNDLAND

Your Committee recommends that the Order of the Canadian Transport Commission, authorizing the Canadian National Railways to suspend rail passenger service in Newfoundland on April 15, 1969, be left in abeyance, until your Committee tables its complete report in respect to this question.

Respectfully submitted,
H.-PIT LESSARD.
Chairman.

RAPPORT À LA CHAMBRE

Le MERCREDI 19 mars 1969.

Le Comité permanent des transports et des communications a l'honneur de présenter son

CINQUIÈME RAPPORT

Le 17 janvier 1969, le Comité permanent des transports et des communications a reçu mandat pour examiner les problèmes de transports dans les provinces de l'Atlantique et pour faire rapport sur ces problèmes. Afin de pouvoir poursuivre son étude, le Comité a été autorisé à se déplacer dans le Canada.

Le Comité estime que les problèmes de transports dans les provinces de l'Atlantique sont de nature complexe, et qu'une solution immédiate est impossible.

Le Comité reconnaît aussi l'urgence de certains des problèmes qu'il a examinés lors de sa tournée dans les provinces de l'Atlantique, et il les traite dans le présent rapport provisoire concernant ces problèmes.

TAUX DU FRET MARITIME

Le Comité recommande que le paragraphe (4) de l'article 335 de la Loi sur les chemins de fer soit modifié et que le gel des prix soit maintenu jusqu'au 31 décembre 1969.

SERVICE DE TRAINS DE VOYAGEURS À TERRE-NEUVE

Le Comité recommande que le jugement rendu par la Commission canadienne des Transports, autorisant les chemins de fer nationaux du Canada à suspendre le service de trains de voyageurs à Terre-Neuve le 15 avril 1969, soit laissé en suspens jusqu'à ce que le Comité présente son rapport complet, relativement à cette question.

Respectueusement soumis,
Le président,
H.-PIT LESSARD,

29966—1½

[*Text*]

MINUTES OF PROCEEDINGS

TUESDAY, March 18, 1969.
(31)

The Standing Committee on Transport and Communications met this day, *in camera*, at 8.00 p.m. The Chairman, Mr. H.-Pit Lessard, presided.

Members present: Messrs. Breau, Corbin, Givens, Lessard (*Lac-Saint-Jean*), Lessard (*LaSalle*), Marchand (*Kamloops-Cariboo*), McGrath, Peddle, Portelance, Pringle, Rock, Rose, Skoberg, Trudel, Turner (*London East*) (15).

The purpose of this meeting is to consider and study a draft report on the transportation problems of the Atlantic Provinces.

On instruction of the Chairman, the Clerk proceeded to read, at length, the draft report.

Because it is not clearly indicated that this report would be followed by a subsequent or subsequent reports on this question.

On motion of Mr. Trudel,

Resolved,—That the word "Interim" be inserted between the words "this" and "report" in the third paragraph of the report; and that the words "in respect of these problems" be added after the word "report" in the same paragraph.

After further debate, on the second part of the recommendations entitled PASSENGER TRAIN SERVICES IN NEWFOUNDLAND it was moved by Mr. McGrath,

Resolved,—That paragraphs 1, 2, and 3 under the above-mentioned heading, be deleted and replaced with the following:

"your Committee recommends that the order of the Canadian Transport Commission, authorizing the Canadian National Railways to suspend Railway Passenger Services in New-

[*Traduction*]

PROCÈS-VERBAL

le MARDI 18 mars 1969
(31)

Le Comité permanent des transports et des communications se réunit à *huis clos* à 8 h de l'après-midi, sous la présidence de M. H.-Pit Lessard, président.

Présents: MM. Breau, Corbin, Givens, Lessard (*Lac-Saint-Jean*), Lessard (*La-Salle*), Marchand (*Kamloops-Cariboo*), McGrath, Peddle, Portelance, Pringle, Rock, Rose, Skoberg, Trudel, Turner (*London East*) (15)

Le Comité se réunit pour considérer et étudier un projet de rapport relativement aux problèmes de transport dans les provinces de l'Atlantique.

Suivant les instructions du président, le greffier procède à la lecture du projet de rapport.

Les membres du Comité sont de l'avis qu'il n'est pas clairement indiqué que ce projet de rapport sera suivi d'un rapport ou de rapports subséquents concernant cette question.

Sur la proposition de M. Trudel,

Il est résolu,—que les mots «provisoire concernant ces problèmes» soient ajoutés après le mot rapport, dans le troisième paragraphe du rapport

Après discussion sur la deuxième partie de la recommandation intitulée «Service de train de voyageurs à Terre-Neuve», sur la proposition de M. McGrath,

Il est résolu,—que les paragraphes 1, 2 et 3 sous l'entête ci-dessus mentionnée soient biffés et remplacés par le paragraphe suivant:

«le Comité recommande que le jugement rendu par la Commission canadienne des transports autorisant les chemins de fer nationaux du Canada à suspendre le service de train de

foundland on April 15, 1969, be left in abeyance, until your Committee tables its complete report in respect to this question."

The question being put on the motion, it was by a show of hands, resolved in the affirmative: yeas, 10; nays, 5.

Then, on motion of Mr. Skoberg,

Resolved,—That the draft report as amended, by adopted and that the Chairman be authorized to present same to the House.

At 9.30 p.m., the Committee adjourned to the call of the Chair.

voyageurs à Terre-Neuve le 15 avril 1969, soit laissé en suspend jusqu'à ce que le Comité présente son rapport complet relativement à cette question".

La résolution fut mise aux voix et adoptée à main levée par 4 voix contre 6.

Ensuite, sur la proposition de M. Skoberg,

Il est résolu,—que le projet de rapport soit adopté tel qu'amendé et que le président soit autorisé de le présenter à la Chambre.

A 9 h 30 de l'après-midi, le Comité s'ajourne jusqu'à nouvelle convocation du président.

THURSDAY, March 20, 1969.
(32)

The Standing Committee on Transport and Communications met this day at 9.35 a.m., the Chairman, Mr. H.-Pit Lessard, presiding.

Members present: Messrs. Blouin, Breau, Crossman, Givens, Godin, Lessard (*LaSalle*), Lundrigan, Mahoney, McCleave, McGrath, Marshall, Muir (*Cape Breton*), Peddle, Portelance, Rock, Rose, Skoberg, Trudel, Turner (*London East*)—(19).

Also present: Messrs. Perrault and Béchard, M.P.'s.

Witnesses: From the Îles-de-la-Madeleine: Messrs. Edmond Lapierre, Member, Chamber of Commerce, and delegate from the County Council; Conrad Miousse, Member, Chamber of Commerce, and delegate from the Council for the Development of the Îles-de-la-Madeleine Territories; Gilbert Carbonneau, Secretary, Chamber of Commerce. *From the Canadian National Railways:* Messrs. R. T. Vaughan, Q.C., Vice-President and Secretary; J. W. G. Macdougall, Q.C., Vice-President, Atlantic Region; J. M. Duncan, Assistant General Counsel, Montreal; I. W. Mitchell, Manager, Special Projects, Moncton.

The Chairman introduced the delegation from the "Îles-de-la-Madeleine". The spokesman for the group, Mr. Gilbert

le JEUDI 20 mars 1969
(32)

Le Comité permanent des Transports et des Communications se réunit à 9h.35 ce matin, sous la présidence de M. H-Pit Lessard.

Présents: MM. Blouin, Breau, Crossman, Givens, Godin, Lessard (*LaSalle*), Lundrigan, Mahoney, McCleave, McGrath, Marshall, Muir (*Cap Breton*), Peddle, Portelance, Rock, Rose, Skoberg, Trudel, Turner (*London Est*) (19).

De même que: MM. Perrault et Béchard, députés.

Témoins: des Îles-de-la-Madeleine: M. Edmond Lapierre, membre de la Chambre du Commerce, et délégué du Conseil de Comté; M. Conrad Miousse, membre de la Chambre du Commerce, et délégué du Conseil pour le développement du territoire des Îles-de-la-Madeleine; M. Gilbert Carbonneau, secrétaire de la Chambre du Commerce. *Des Chemins de fer nationaux du Canada:* M. M. R. T. Vaughan, C.R., vice-président et secrétaire; J. W. G. Macdougall, C.R., vice-président, région de l'Atlantique; J. M. Duncan, avocat-conseil adjoint, Montréal; I. W. Mitchell, directeur des études spéciales, Moncton.

Le président présente la délégation des Îles-de-la-Madeleine. Le porte-parole du groupe, M. Gilbert Carbonneau, fait un ex-

Carbonneau, made an opening statement and was questioned thereon, assisted by officials from the "Îles-de-la-Madeleine". (See appendix A-2 for the brief of the "Îles-de-la-Madeleine".

The witnesses were excused and the Chairman thanked them for the evidence given.

The Chairman then introduced officials of the Canadian National Railways. Mr. R. T. Vaughan, Q.C., made an opening statement and then introduced Mr. J. W. G. Macdougall, Q.C., who made certain observations relating to the problems of transportation in the Atlantic Provinces, and was questioned thereon, assisted by officials of the Company.

During questioning of the witnesses, Mr. Macdougall read a letter which was sent by the Commission Counsel from the Law Department of the Canadian National Railways to Mr. D. H. Jones, Chairman, Railway Transport Committee of the Canadian Transport Commission, relating to Passenger Train Service in Newfoundland.

Then, on motion of Mr. McGrath,

Resolved,—That the letter read by Mr. Macdougall, be tabled with the Clerk and that copies be made available to Members of the Committee.

After further questioning, it was moved by Mr. Crossman,

Resolved,—That the Committee now sit IN CAMERA until 1.00 p.m.

At 1.00 p.m., questioning of the witnesses continuing, the Committing adjourned until 3.30 p.m. this day.

posé préliminaire après quoi on l'interroge, ainsi que ses collègues des Îles-de-la-Madeleine. (Voir Annexe A-2—le mémoire des Îles-de-la-Madeleine).

Les témoins prennent congé et le président les remercie de leur témoignage.

Le président présente ensuite les fonctionnaires des Chemins de fer nationaux du Canada. M. R. T. Vaughan, C.R., fait l'exposé préliminaire et présente ensuite M. J. W. G. Macdougall, C.R., qui fait certaines remarques relatives aux problèmes du transport dans les provinces de l'Atlantique, après quoi on l'interroge ainsi que les fonctionnaires de l'organisme.

Au cours de l'interrogatoire des témoins, M. Macdougall donne lecture d'une lettre écrite par le conseiller de la Commission, de la Division juridique des Chemins de fer nationaux du Canada, à M. D. H. Jones, président du Comité des transports par chemins de fer, de la Commission canadienne des transports, relative au service des trains de voyageurs à Terre-Neuve.

Ensuite, sur une motion proposée par M. McGrath,

il est décidé—que la lettre dont M. McDougall a donné lecture soit déposée auprès du secrétaire et qu'on en distribue des exemplaires aux membres du Comité.

Après d'autres questions, sur une proposition de M. Crossman,

il est décidé—que le Comité siège à huis clos jusqu'à 13 h.

A 13h.00, comme l'interrogatoire des témoins se prolonge, le Comité lève la séance jusqu'à 15h.30 cet après-midi.

AFTERNOON SITTING
(33)

The Standing Committee on Transport and Communications met this day at 3.30 p.m., the Chairman, Mr. Lessard, presiding.

Members present: Messrs. Blouin, Breau, Givens, Lessard (*LaSalle*), Lundrigan,

SÉANCE DE L'APRÈS-MIDI
(33)

Le Comité permanent des Transports et des Communications se réunit à 15h.30 sous la présidence de M. Lessard.

Présents: MM. Blouin, Breau, Givens, Lessard (*LaSalle*), Lundrigan, Mahoney,

Mahoney, Marshall, McCleave, McGrath, Noël, Peddle, Perrault, Portelance, Rock, Rose, Skoberg, Trudel, Turner (*London East*)—(18).

Witnesses: From the Canadian National Railways: Messrs. R. T. Vaughan, Q.C., Vice-President and Secretary; J. W. G. Macdougall, Q.C., Vice-President, Atlantic Region; J. M. Duncan, Assistant General Counsel, Montreal; I. W. Mitchell, Manager, Special Projects, Moncton.

Questioning of the Canadian National Railways' officials resumed.

During questioning, it was moved by Mr. Mahoney,

Resolved,—That the Chairman be authorized to seek concurrence of the Fifth Report of this Committee which was tabled in the House on March 19, 1969.

Questioning of the witnesses then resumed.

Upon conclusion of questioning, the witnesses were excused and the Chairman thanked them for the evidence given.

At 6.20 p.m., the Committee adjourned to the call of the Chair.

Marshall, McCleave, McGrath, Noël, Peddle, Perrault, Portelance, Rock, Rose, Skoberg, Trudel, Turner (*London Est*) (18).

Témoins: Des Chemins de fer nationaux du Canada: MM. R. T. Vaughan, C.R., vice-président et secrétaire; J. W. G. Macdougall, C.R., vice-président, région de l'Atlantique; J. M. Duncan, avocat-conseil adjoint, Montréal; I. W. Mitchell, directeur des études spéciales, Moncton.

On reprend l'interrogatoire des fonctionnaires des Chemins de fer nationaux du Canada.

Au cours de l'interrogatoire, sur une proposition de M. Mahoney,

il est décidé,—que le président soit autorisé à demander l'approbation du cinquième Rapoprt du Comité déposé à la Chambre le 19 mars 1969.

On reprend l'interrogatoire des témoins.

A la fin de la période de questions, on donne congé aux témoins et le président les remercie de leurs témoignages.

A 18h.20, le Comité s'ajourne jusqu'à nouvelle convocation du président.

Le secrétaire du Comité,
Robert Normand
Clerk of the Committee.

[*Texte*]

EVIDENCE

(*Recorded by Electronic Apparatus*)

Thursday, March 20, 1969

The Chairman: I want to thank the CNR people for being here and for their kindness in letting the gentlemen from Iles-de-la-Madeleine be heard ahead of them this morning. We had an understanding with them and I think I will call on the people from Iles-de-la-Madeleine to come forward.

I will call on M. Edmond Lapierre membre de la Chambre de Commerce et délégué du Conseil de Comité; M. Conrad Miousse, membre aussi de la Chambre de Commerce et délégué du Conseil de dévelopement des territoires des Îles-de-la-Madeleine; M. Gilbert Carbonneau, secrétaire de la Chambre de Commerce.

Voulez-vous venir ici en avant, s'il vous plaît? Je demanderais à M. Carbonneau de nous donner un exposé de son mémoire, il ne le lira pas en entier, il va nous en donner un résumé seulement, ce qui permettra peut-être une période de questions plus prolongée. Monsieur Carbonneau, allez.

M. Gilbert Carbonneau (Secrétaire de la Chambre de Commerce des Îles-de-la-Madeleine): Bonjour, messieurs. Il nous fait énormément plaisir d'être ici, à Ottawa, afin de vous faire part de nos doléances à l'égard du service de transport maritime des Îles-de-la-Madeleine à l'endroit le plus rapproché à savoir une des provinces Maritimes.

Pour vous aider à situer les Îles-de-la-Madeleine car peut-être vous ne pouvez le faire exactement, mais vous avez sans doute entendu parler de la cruauté de la chasse aux phoques, bien c'est de cette région que nous venons.

Les Îles-de-la-Madeleine sont plus rapprochées de l'Île du Prince-Édouard, de la Nouvelle-Écosse, du Nouveau-Brunswick, peut-être de Terre-Neuve et de Saint-Pierre et Miquelon que de la province de Québec. Par contre, tous les échanges sociaux se font avec la province de Québec. Sur une population de 14,000, environ 90 p. 100 est francophone et 10 p. 100 anglophone. Même les anglophones font affaires avec, soit la province de Québec ou la province d'Ontario, faisant des échanges avec Toronto surtout.

[*Interprétation*]

TÉMOIGNAGES

(*Enregistrement électronique*)

Le jeudi 20 mars 1969

Le président: Je voudrais remercier les représentants des Chemins de fer Nationaux du Canada d'être venu témoigner et d'avoir bien voulu laisser les délégués des Îles-de-la-Madeleine passer avant eux ce matin. Nous nous étions mis d'accord avec eux, et je vais donc demander aux gens des Îles-de-la-Madeleine de se présenter. Je vais demander à Mr. Edmond Lapierre, a member of the Chamber of Commerce and delegate from the County Council; Mr. Conrad Miousse, a member of the Chamber of Commerce and delegate from the Magdalen Islands Development Board; and Mr. Gilbert Carbonneau, Secretary of the Chamber of Commerce. Would you pleace come to the front.

I would ask Mr. Carbonneau to give us a summary of his brief. He will not read it in its entirety, he will only give us a summary of it which will then allow perhaps for a longer question period. Mr. Carbonneau.

Mr. Gilbert Carbonneau (Secretary, Chamber of Commerce, Îles-de-la-Madeleine: Good morning, gentlemen. We are very pleased to be here, in Ottawa, to be able to speak to you about the Maritime Transportation services from the Magdelen Islands to the area closest to it which is in effect one of the Maritime Provinces.

To help you in locating the Magdalen Islands, since you may not know exactly where they are, I might point out that you have probably heard about cruelty with regard to seal hunting—well, we come from that region.

The Magdalen Islands are closer to Prince Edward Island, Nova Scotia, New Brunswick and perhaps Newfoundland and St. Pierre and Miquelon than to the Province of Quebec. On the other hand, all social exchanges are carried out with the Province of Quebec. Out of 14,000 inhabitants approximately 90 per cent is French-speaking and 10 per cent English-speaking. Even the English-speaking people have exchanges with Quebec or Ontario, especially with Toronto.

[*Text*]

Par contre, tout le commerce se fait ou presque, avec les Maritimes. Notre seule industrie est la pêche; tout notre poisson est exporté en partie aux États-Unis, via les Maritimes, et la majorité de nos denrées alimentaires sont importées des Maritimes. Ce qui veut dire que, du point de vue des transports, nous avons absolument besoin des Maritimes.

Maintenant, je vous ai dit que notre seule industrie est la pêche, mais nous songeons sérieusement à établir une nouvelle industrie qui serait plus dynamique, et qui nous permettrait de consolider notre budget, en l'occurrence le tourisme. Le tourisme qui se fait vers les Îles-de-la-Madeleine, doit venir du point le plus rapproché, à savoir, les Maritimes. Présentement, un service de traversier fait la navette entre les Maritimes, soit à: Charlottetown, Souris, Îles du Prince-Édouard et Pictou, Nouvelle-Écosse, et deux ou trois ports des Îles-de-la-Madeleine: Havre-Aubert, Cap-aux-Meules et Grande-Entrée.

Ce service de traversier est assuré par une compagnie filiale de *Clark Steamships,* la *Magdalen Islands Transportation Co. Ltd.* Cette compagnie fait le service depuis 1961, et reçoit une subvention de la Commission maritime qui, l'an dernier, était d'environ $400,000.

Présentement, le «*North Gaspé*» ne peut pas procurer un service de traversier pour les touristes, à cause de l'irrégularité de son horaire, il fréquente de trop nombreux ports. Le «*North Gaspé*» étant un bateau qui date de trente ans, par le fait même, la saison de navigation est écourtée et le service et le confort à bord sont quasi inexistants. Maintenant, la vieille méthode de chargement et de déchargement des voitures par palans existe encore. Donc, quelqu'un qui possède une voiture un peu basse n'ose pas la faire monter à bord de ce bateau. Je crois même, messieurs, que certain d'entre vous n'accepteraient pas de le faire et sans doute, hésiteriez-vous à y embarquer vous-mêmes.

Maintenant, cela fait assez longtemps que nous faisons des démarches pour obtenir un service de traversier et développer l'industrie touristique aux Îles-de-la-Madeleine. La province de Québec est probablement prête à investir un bon montant d'argent pour l'aménagement de sites touristiques et même promouvoir le tourisme, mais nous attendons la décision d'Ottawa quant au site du port de mer, et quant au nouveau traversier qu'on pourrait nous présenter. Ce que nous voudrions, c'est un *Roll-on Roll-off*.

[*Interpretation*]

On the other hand, almost all trade is with the Maritime Provinces. Our only industry is fishing. All our fish is exported, partly, to the United States via the Maritimes. Most of our foodstuffs are imported from the Maritimes, which means that from the point of view of transportation, we absolutely need the Maritimes.

I told you that our only industry is fishing, but we are seriously thinking of establishing a new industry which would be more dynamic and would allow us to make both ends meet, and by this we mean tourism. If we had a tourist industry in the Magdalen Islands, tourists would have to come from the closest point which is the Maritimes. At the present time, there is a ferry service which shuttles back and forth between the Maritimes, that is, Charlottetown, Souris, Prince Edward Island and Pictou, Nova Scotia, and two or three ports in the Magdalen Islands, namely Havre-Aubert, Cap-aux-Meules, and Grande-Entrée.

This ferry service is provided by a branch of Clark Steamships, and the Magdalen Islands Transportation Co. Ltd. This Company has been providing service since 1961 and receives a subsidy from the Maritime Commission which last year was around $400,000.

At the present time, *North Gaspé* cannot operate a ferry service for tourists because its schedule is not a regular one. It calls at too many ports, and because the *North Gaspé* is a 30-year old ship, the navigation season, of course, is automatically cut because of its age. The service and comfort aboard ship are almost non-existent. And we still have the old loading and unloading system for automobiles by meass of a pullyblock. Thus, someone who has a low slung automobile does not dare put it aboard ship. Gentlemen, I even believe that some of you would not accept having your own automobile aboard that ship and you might perhaps even hesitate getting aboard yourselves.

Now, we have been working to try and obtain a ferry service for a long time to be able to develop a tourist industry in the Magdalen Islands. The Province of Quebec is probably ready to invest a good sum of money for development of tourist sites and even to help promote tourism, but we are waiting for the decision from Ottawa with regard to the location of the seaport, and with regard to the new ferry which might be given to us. What we would like, would be a Roll-on Roll-off.

[*Texte*]

Nous sommes retardés par la question du site du port de mer ou du traversier car un cercle vicieux s'est créé ici, à savoir que lorsque nous demandons un traversier, on nous dit: «Il faut que vous ayez un port de mer adéquat»; lorsque nous demandons un port de mer adéquat, on nous dit: «Vous n'avez pas de traversier qui utilisera ce port de mer-là», et ainsi de suite. On se lance la balle de part et d'autre.

Le 26 mai 1964, l'honorable Maurice Sauvé, qui était alors député des Îles-de-la-Madeleine et ministre des Forêts et du Développement rural, a avisé la Commission maritime que la trésorerie fédérale accepterait que le service de traversier entre les provinces Maritimes et les Îles-de-la-Madeleine soit fait par C.T.M.A., qui est la Coopérative des transports maritimes et aériens, accordant une subvention de $225,000 annuellement, moyennant un contrat de trois ans, comparativement à une subvention de $294,000 à l'époque. Par la suite, la Commission maritime a délégué trois membres: M. Darling, qui est présentement président de la Commission, M. Devos, qui était, à ce moment-là, économiste au service de la Marine au ministère des Transports et le capitaine Balfray, qui est présentement à la Commission maritime.

Le rapport, je l'ai ici, même si je ne devrais pas l'avoir, vu son caractère confidentiel. On a demandé ni plus ni moins à ces personnes d'analyser leur travail. Si on demande aux députés: «Faites-vous un bon travail?» Ceux-ci vont dire: «Certainement, nous faisons un bon travail, nous gagnons notre salaire». C'est ce qu'on a demandé à ces trois personnes-là: «Le service existant aux Îles-de-la-Madeleine est-il bon? Comme ce sont eux qui autorisaient, ou presque, les subventions, ils ne pouvaient pas admettre que ce qu'ils avaient fait n'était pas bien fait.

Tout de même, il y a eu trois alternatives offertes dans ce rapport: que nous maintenions le même service, que nous établissions un service avec un *Roll-on Roll-off,* et une troisième suggestion, qui n'est pas tellement valable et qui n'a pas été retenue, aurait été d'avoir un service de cargos et un service pour les passagers et les voitures. Cette troisième alternative n'est pas tellement bonne, et même aux Îles-de-la-Madeleine, on n'y attache pas tellement d'importance.

Par contre, à la suite de ce rapport-là, qui avait été demandé par le ministère des Transports, le rapport est daté du 19 janvier 1965, nous sommes au mois de mars 1969, donc il y a au-delà de quatre ans et quatre nouveaux contrats ont été donnés à la *Magdalen Islands Transportation,* et ce contrat-là a été donné sans qu'aucune demande de soumission ne

[*Interprétation*]

We are being delayed by the question of the location of the seaport or the ferry service, because there has been a vicious circle created here, that is, when we ask for a ferry we are told: "You have to have adequate port facilities to begin with", and when we ask for adequate seaport facilities they say: "Well, you do not have a ferry which would be using the seaport". So back and forth it goes this way.

On May 26, 1964, the honourable Maurice Sauvé, who was at the time the member for the Magdalen Islands, and Minister of Forestry and Rural Development, advised the Canadian Maritime Commission that the federal treasury would accept a ferry service between the Magdalen Islands and the Maritimes to be carried out by CTMA, which is the Co-operative for Maritime and Air Transport, with an annual subsidy of $225,000, if we were able to supply a 3-year contract, as against a subsidy at that time of $294,000. Subsequently, the Canadian Maritime Commission delegated three members. Mr. Darling, who is now Chairman of the Commission, Mr. Devos, who at the time was Navy economist with the Department of Transport and Captain Balfray, who is now with the Canadian Maritime Commission.

I have the report here although I should not have it because it is confidential. These persons were asked, no more or no less, to analyse their own work. It is just the same thing as if you were to ask MPs: "Do you do good work?" And they would answer: "Of course, we do good work; we earn our pay." These three people were asked whether the service to the Magdalen Islands was good. As they were the ones who were authorizing so to say, the subsidies, they certainly would not admit that what they had done was not well done.

However, there were three alternatives given in the report, first, keep the same service, secondly, establish service with a Roll-on Roll-off, and the third suggestion, which was not such a very valid one, and which was not kept would have been to have a freighter service and a passenger and automobile service. This third alternative is not such a very good one, and even in the Magdalen Islands we do not attach too much importance to it.

On the other hand, following that report which had been requested by the Department of Transport, the report is dated January 19, 1965, and now this is March 1969, consequently four years later, there were four new contracts awarded to the Magdalen Islands Transportation Company, and these contracts were awarded without any tenders being

[*Text*]

soit faite de la part de la Commission maritime. A notre avis, il n'est pas bon de jouer avec les finances, nos finances, du pays, sans donner l'occasion à toutes les compagnies de présenter une soumission. Mais nous avons un service de transport qui nous intéresse réellement et qui, à l'heure actuelle, paralyse tout développement aux Îles-de-la-Madeleine.

Le «North Gaspé» a toujours voyagé et, à la fin de l'année, a toujours eu un profit d'au moins $50,000; au cas contraire, on s'adressait à la Commission maritime à qui on disait: «Bien, l'an prochain, nous ne donnerons pas le service si vous n'augmentez pas notre subvention.» L'an dernier, on a augmenté la subvention de $111,900; et même cette année, elle le sera d'un autre $23,000, sans que nous, des Îles-de-la-Madeleine, ne puissions dire quoi que ce soit.

Nous échangeons de la correspondance avec la Commission maritime, mais nos questions ne reçoivent aucune réponse, ou celles qu'on nous donne sont en dehors du sujet sur lequel portent nos questions.

Maintenant, c'est bien beau de se chicaner, mais que demandons-nous? Tout simplement un service de traversier *Roll-on Roll-off*, d'un point aux Maritimes, un seul point, aux Maritimes.

Je vais vous citer un exemple: l'an dernier, on a voulu éliminer le port de Charlottetown, le traversier fait un voyage par semaine à Charlottetown, et cela fait perdre un voyage par jour par rapport à cela. Donc, nous sommes allés voir le *Board of Trade* de Charlottetown, nous leur avons demandé d'endosser notre résolution soumise à la Chambre de commerce, c'est-à-dire que nous voulions un port aux Maritimes et un port aux Îles-de-la-Madeleine; à première vue, les gens n'étaient pas trop trop intéressés. Cela fait perdre un certain montant d'argent à Charlottetown du fait que toute notre marchandise est achetée là et, en plus, tout l'équipage dépense sa paie à Charlottetown.

Par contre, *Le Board of Trade* a accepté notre demande, il en a envoyé des copies au président de la Commission maritime, aux quatre députés fédéraux, à l'honorable Maurice Sauvé, à l'honorable Hellyer, et faisait savoir qu'il accepterait que nous cessions d'aller à Charlottetown pour continuer plutôt à Souris, qui est environ à 75 milles de Charlottetown. Il y a un service de train entre ces deux villes, alors, la marchandise achetée à Charlottetown aurait pu facilement être transportée par chemin de fer et une fois arrivée aux Îles-de-la-Madeleine, la nourriture aurait été probablement de meilleure qualité, parce que nous achetons surtout des

[*Interpretation*]

called by the Canadian Maritime Commission. In our opinion it is not a good thing to fool around with the country's money, our money, without giving a chance to all companies to present tenders. But we have a transportation service which really interests us, and which at the present time is stopping any sort of development in the Magdalen Islands.

The *North Gaspé* has always travelled and at the end of the year always had at least $50,000 profit. When this was not the case, we got in touch with the Maritime Commission and said "Next year, we are not going to ensure service unless you increase our subsidy". Last year, it was increased by $111,900, and this year there will be another $23,000 increase without the Magdalen Islands having much to say in this regard.

We exchange correspondence with the Canadian Maritime Commission, but the questions we ask are never answered. All the answers we get are completely irrelevant.

Now, it is all well and good to argue, but what do we want? What we want is simply a Roll on Roll off ferry service, from one single point in the Maritimes.

I will give you an example. Last year we wanted to eliminate the port of Charlottetown. There is one trip per week to Charlottetown and due to this one trip per day is lost. So we went to the Board of Trade in Charlottetown and asked them to endorse our resolution, the one we had submitted to the Chamber of Commerce. That is, we wanted a port in the Maritimes and one in the Magdalen Islands. At first sight they were not too interested. They would lose a certain amount of money in Charlottetown because of the fact that all our goods are purchased there, and in addition, the crew spends its pay in Charlottetown.

On the other hand, the Board of Trade accepted our request and sent copies to the Chairman of the Canadian Maritime Commission, to the four federal M.P.s, the Hon. Maurice Sauvé, the Hon. Paul Hellyer who let it be known that he accepted that we stop going to Charlottetown and call at Souris instead, which is about 75 miles from Charlottetown. There is a train service between those two towns, consequently the goods purchased in Charlottetown could have easily been transported by railway, and on reaching the Magdalen Islands, the food would have probably been of a better quality because we buy especially fruits, vegetables, and meat, and when

[*Texte*]

fruits, des légumes, de la viande. Lorsque cela passe quinze ou seize heures sur un bateau, bien, les tomates sont devenues une soupe aux tomates.

Par contre, la Commission maritime n'a pas voulu accepter ce changement, j'ignore pour quelle raison, je ne sais pas ce qui les a forcés à garder Charlottetown comme port d'attache. Cette année, nous sommes revenus à la charge et nous avons eu la même réponse, que ce n'était pas pratique de cesser d'aller à Charlottetown. Pratique pour qui? Nous ne le savons pas; pas pour les Madelinots, certainement!

Maintenant, nous voulons le *Roll-on Roll-off*, un point aux Maritimes, un point aux Îles-de-la-Madeleine. Ce *Roll-on Roll-off* devrait faire entre 18 et 20 nœuds à l'heure, ce qui permettrait, lors de la saison estivale, de faire deux voyages par jour, lorsque nécessaire. Ce bateau devrait pouvoir transporter au moins 30 voitures et quelque 5 remorques. On présume qu'au cours des cinq prochaines années le cargo à destination des Îles-de-la-Madeleine viendra par remorque, prêt à être livré et le poisson retournera à peu près de la même façon.

Ce bateau devrait pouvoir recevoir au moins 150 passagers, être muni d'une cafétéria, d'un bar, quelques cabines, pas obligatoirement avoir des cabines pour les 150 passagers, parce que c'est demander une chose trop énorme. Par contre, ce service de Souris, Île du Prince-Édouard aux Îles-de-la-Madeleine, va exiger quatre heures; donc, le temps suffisant pour un individu de monter à bord, de manger et il est rendu aux Îles-de-la-Madeleine.

Alors, pour résumer, nous demandons un traversier d'une capacité de 150 passagers, faisant 20 nœuds à l'heure et pourvu de quelques cabines pour parer à toute éventualité. Ce service devra nécessairement être subventionné, soit par la Commission maritime ou peut-être par le National-Canadien, parce que nous ne payons peut-être pas beaucoup de taxes, mais nous en payons. Nous payons une partie du déficit du CNR, mais nous n'y goûtons pas du tout. Nous ne demandons pas des trains, car le territoire n'est pas assez grand.

Je ne connais pas les chiffres exacts du déficit du National-Canadien, mais prenons comme exemple les traversiers de l'Île du Prince-Édouard au Nouveau-Brunswick; nous avons une population de 14,000 habitants, celle de l'Île du Prince-Édouard est d'environ 110,000, 115,000, disons 140,000, cela équivaut donc à 10 p. 100 de la population de l'Île du Prince-Édouard. Que nous ayons 10 p. 100 de

[*Interprétation*]

these foodstuffs spend 15 or 16 hours on a boat, your tomatoes wind up being tomato soup.

On the other hand, the Canadian Maritime Commission did not want to accept any change. I do not know why. I do not know what forced them to keep Charlottetown as a port of call. This year we again came back on the matter and received the same reply. That is, that it was not practical to cease going to Charlottetown. Practical for whom? We do not know—certainly not for the Magdalen Islanders!

We want a Roll-on Roll-off service, one point in the Maritimes, and one point in the Magdalen Islands. The Roll-on Roll off service should have a speed of between 18 and 20 knots per hour, which would allow, during the summer season, to have two trips per day, when necessary.

The ferry should be able to carry at least 30 automobiles and 5 trailers. We presume then that in the next five years the freight going to the Magdalen Islands will probably be all in trailers ready for delivery and the fish will travel back the same way.

The ferry should also be able to carry at least 150 passengers, be equipped with a cafeteria, bar, a few cabins, not necessarily cabins for all 150 passengers because this would be asking for something too considerable.

On the other hand, this service from Souris, Prince Edward Island, to the Magdalen Islands, would take four hours and consequently anyone getting aboard would have time to eat before arriving at the Magdalen Islands.

Briefly, what we want is a ferry capable of handling 150 passengers, equipped with a few cabins, and with a speed of 20 knots per hour. This service would necessarily have to be subsidized, either by the Canadien Maritime Commission or perhaps by the CNR, because although maybe we do not pay very much in taxes, we do pay. We pay for part of the CNR's deficit but we do not get any benefit from it. We are not asking for trains, because our land area is not big enough.

I do not know the exact figures on the CNR's deficit, but take as an example the ferry service from Prince Edward Island to New Brunswick. We have a population of 14,000 and Prince Edward Island has perhaps 110,000 or 115,000, let us say 140,000, which means that our population is 10 per cent of that of Prince Edward Island. Let us have the 10 per cent of what is spent for the Prince

[*Text*]

ce qui est dépensé pour le service de traversier de l'Île du Prince-Édouard et nous serons contents.

Je ne vois pas pourquoi nous ne l'aurions pas. Est-ce parce que nous faisons partie de la province de Québec ou est-ce parce que nous parlons français, même si 10 p. 100 de la population parle anglais? Pour quelle raison l'Île du Prince-Édouard a-t-elle le droit d'avoir plus que nous?

Il va y avoir 175 millions de dollars de dépensés par le nouveau ministère de,—je ne sais pas le nom, mais le ministère de M. Marchand,—175 millions de dollars, 10 p. 100, cela veut dire 17 millions de dollars aux Îles-de-la-Madeleine. Si nous obtenons cela, nous ne reviendrons plus.

C'est à peu près tout ce que nous avons à dire; merci infiniment de nous avoir écouté. Nous espérons que la prochaine fois que vous viendrez dans les Maritimes, vous nous le laisserez savoir et nous pourrons aller vous y rencontrer. Ce n'est pas que nous n'aimions pas venir ici, mais cela coûte énormément cher. C'est loin. Il y a au-dessus de 1,000 milles d'ici aux Îles-de-la-Madeleine. Nous vous remercions beaucoup. Merci, monsieur le président.

Le président: Merci beaucoup, monsieur Carbonneau. Monsieur Béchard?

M. Béchard: Monsieur le président, messieurs des Îles. D'abord, je veux m'excuser auprès de mes collègues, je ne sais pas si je dois le faire, mais de toute façon, ils sont membres du Comité des transports, et moi, je ne le suis pas, mais je me trouve dans l'obligation, je crois, ce matin, de saluer ici la présence de mes électeurs, puisqu'ils le sont depuis le mois de juin; depuis l'élection du 25 juin, les Îles-de-la-Madeleine font partie de la circonscription de Bonaventure.

Alors, bien que je ne connaisse les Îles que depuis l'été dernier, je veux confirmer ici ce que M. Carbonneau, le représentant de la délégation, vient de nous exposer sur le problème crucial du transport aux Îles-de-la-Madeleine. Ceux qui habitent les Îles et mes collègues de Terre-Neuve qui sont ici, savent ce que cela veut dire d'habiter des îles, au point de vue transport, et je crois que M. McGrath et M. Marshall en savent quelque chose, et tous les membres du Parlement, parce qu'ils en ont parlé assez souvent et à Terre-Neuve et ailleurs et à l'Île-du-Prince-Édouard, en particulier.

[*Interpretation*]

Edward Island ferry service and we will be happy. I don't see why we shouldn't get it. Is it because we are part of the province of Quebec, or is it because we are French-speaking, even if 10 per cent of the population is English-speaking? Why is it that Prince Edward Island is entitled to have more than we have?

There will be $175 million spent by the new Department—I do not know its name, but it's Mr. Marchand's Department at any rate—$175 million and 10 per cent of that would mean $17 million for the Magdalen Islands. If we were to get this we will not come back again.

That is about all we have to say. We thank you very much for having listened to us. We hope that the next time you come to the Maritimes you will let us know and then we could meet you. It is not that we do not like to come here, but it does cost a great deal of money. It is far, it is over 1,000 miles from here to the Magdalen Islands. We thank you very much, Mr. Chairman.

The Chairman: Thank you, Mr. Carbonneau. Mr. Béchard?

Mr. Béchard: Mr. Chairman, and you gentlemen from the Islands. First of all, I want to apologize to my colleagues. I do not know whether I have to do it, but at any rate, they are members of the Transport and Communications Committee, and I am not, but I do have the duty, I think, this morning to call attention to the presence of my constituents because since the election of June 25, the Magdalen Islands belong to the riding of Bonaventure.

So, although I only know the Magdalen Islands since last summer, I do want to confirm what Mr. Carbonneau, the representative of the delegation, has just told us with regard to the crucial transportation problem in the Magdalen Islands. Those who live on the Islands—my colleagues from Newfoundland who are here know full well what it means to live on an island from a point of view of transportation. I think, Mr. McGrath and Mr. Marshall know something about this, and all Members of Parliament, because they have spoken often enough about this, in Newfoundland and elsewhere and in Prince Edward Island, in particular.

[*Texte*]

• 1000

Alors, j'endosse à 150 p. 100 ce que vient de dire M. Carbonneau. Les Îles-de-la-Madeleine demandent, d'après les archives que j'ai consultées et les gens que j'ai entrevus là-bas, un moyen de transport adéquat depuis des années. On leur a assuré et ce, depuis longtemps, qu'ils seraient enfin dotés d'un moyen de transport maritime convenable. Et, je voudrais demander à M. Carbonneau s'il est au courant que le ministère des Transports a accepté ou décidé, en principe, de doter les Îles-de-la-Madeleine d'un nouveau traversier du genre que vous avez mentionné, «Roll on Roll off». Êtes-vous au courant, monsieur Carbonneau?

M. Carbonneau: Je vais vous lire une lettre où le ministère des Transports nous assure que le traversier... Écoutez:

> La Commission avance aussi rapidement que possible en coopération avec les autres ministères...

«Coopération», c'est un gros mot qui veut dire: «nous ne nous entendons pas.» C'est l'impression que nous avons, nous autres.

Je poursuis:

> ...avec les autres ministères concernés vers la préparation des terminus nécessaires au nouveau traversier «Roll-on Roll-off».

Ce qui veut dire que c'est le terminus nécessaire au traversier «roll on roll off» qui retarde la procédure. A peu près la même réponse nous parvient du ministère des Travaux publics.

Mr. McGrath: I wonder if the witness would read a little more—are you quoting from a letter?

Mr. Carbonneau: Yes.

Mr. McGrath: Could you quote a little more from it, please, and give us the date of it.

Mr. Carbonneau: All right. It is a letter from the Canadian Transport Commission.

Ottawa 4, le 5 décembre 1968.

La lettre est adressée à la Chambre de Commerce des Îles-de-la-Madeleine.

> Pour faire suite à votre lettre du 28 novembre 1968, je n'ai rien à ajouter à ma lettre du 12 novembre dont vous trouverez copie sous pli.

Je pourrais probablement vous donner un peu plus de renseignement, en vous lisant un peu de tout ce que j'ai ici.

[*Interprétation*]

I therefore support 150 per cent what Mr. Carbonneau has just said. According to the files I have looked at and the people I have talked to there, the Magdalen Islands have been asking for adequate transportation for several years.

They have been assured for a long time that they would be given a Maritime transportation system which would be adequate, and I should like to ask Mr. Carbonneau whether he knows that the Department of Transport has accepted or decided, in principle at least, to give the Magdalen Islands a new ferry of the type you mentioned, i.e. Roll-on Roll-off. Do you know this. Mr. Carbonneau?

Mr. Carbonneau: I shall read you a letter wherein the Department of Transport assures us that the ferry...just listen:

> The Commission is advancing as quickly as possible in co-operation with the other Departments...

"Co-operation" is a big word which means "there is no agreement". That is the impression we have.

> ...with the other Departments concerned toward the preparation of the necessary terminals for a new Roll-on Roll-off ferry.

Which means that is the terminal for the roll-on roll-off service which is delaying the procedure. We get approximately the same answer from the Department of Public Works.

M. McGrath: Je me demande si le témoin pourrait lire un peu plus loin. Est-ce une lettre que vous citez?

M. Carbonneau: Oui.

M. McGrath: Pourriez-vous en citer un peu plus, s'il vous plaît, et nous en donner la date?

M. Carbonneau: Très bien. C'est une lettre de la Commission canadienne des transports.

Ottawa 4, December 5, 1968.

The letter is addressed to the Chamber of Commerce of the Magdalen islands.

> Further to your letter of November 28, 1968, I have nothing to add to my letter of November 12, copy of which you will find enclosed.

I might perhaps be able to give you a little more information by reading what I have here.

[*Interpretation*]

Le président: Est-ce de la même date?

M. Carbonneau: Non. Je vais commencer par les premières demandes faites cette année. Je cite une lettre adressée le 17 septembre 1968 à M. Darling, président de la Commission maritime à Ottawa.

> Cher monsieur,
>
> Pour faire suite à la visite que vous faisiez aux Îles-de-la-Madeleine l'été dernier, la Chambre de Commerce apprécierait recevoir un projet du service maritime qui sera offert aux Îles-de-la-Madeleine avec les provinces Maritimes pour la saison 1969.
>
> Nous apprécierions aussi recevoir les données que vous avez communiquées relativement au nouveau traversier ainsi que la date prévue pour son entrée en opération.

Je dois vous dire, ici, que M. Darling était venu aux Îles-de-la-Madeleine l'été dernier et que, verbalement, il nous avait donné à peu près toutes les caractéristiques du nouveau traversier qui était presque prêt à entrer en opération. C'est pourquoi nous lui demandions la date d'entrée en opération.

Voici sa réponse. Il répond le 24 octobre à une lettre du 17 septembre.

> La présente est pour faire suite à la vôtre du 17 septembre 1968.
>
> La Commission a étudié attentivement les différents aspects du service en cause pour la saison 1969 et en est venue à la conclusion qu'il faut maintenir l'arrêt à Charlottetown à cause de l'impraticabilité des facilités portuaires à Souris. Quant aux données relativement au nouveau traversier, il serait prématuré de donner des détails tant que les plans des débarcadères n'auront pas été finalement établis.

La réponse ne nous a pas plu.

> Le 1er novembre 1968.
>
> Nous accusons réception de votre lettre du 24 octobre 1968.
>
> Nos directeurs sont des plus déçus du contenu de votre susdite lettre. Nous ne pouvons pas comprendre qu'il vous prenne cinq semaines à répondre négativement à une demande de renseignements de notre part.
>
> Vous voudrez bien nous faire connaître la date où la Commission étudiera soit la demande de soumission, soit tout simplement le montant de la subvention à être versée pour un service de traversier des Maritimes aux Îles-de-la-Madeleine.

[*Text*]

The Chairman: Is it the same date?

Mr. Carbonneau: No. I will start with the first requests made this year. I am quoting a letter dated September 17, 1968, addressed to Mr. Darling, Chairman of the Canadian Maritime Commission in Ottawa.

> Dear Sir:
>
> Further to the visit you made to the Magdalen Islands last summer, the Chamber of Commerce would appreciate receiving a design of the maritime service to be offered to the Magdalen Islands along with the Maritime provinces for the 1969 season.
>
> We would also appreciate receiving the data you communicated with regard to the new ferry as well as the date anticipated for its entry into service.

I should tell you here that Mr. Darling had come to the Magdalen Islands last summer and he did give us, verbally nearly all the details on the new ferry which was nearly completed and ready to enter service. That is why we were asking him for the date of effective operation.

I will give you his answer. He replied on October 24, to my letter of September 17.

> This is in reply to yours of September 17, 1968.
>
> The Commission has considered attentively the various aspects of the service involved for the 1969 season, and has come to the conclusion that we must maintain the stop at Charlottetown because of the impracticability of the harbour facilities at Souris. With regard to the details concerning the new ferry, it would be premature to give details so long as the plans for the docks have not been finally determined.

The reply did not please us.

> November 1, 1968.
>
> We acknowledge receipt of your letter of October 24, 1968.
>
> Our directors are most disappointed with the contents of the above-mentioned letter. We fail to understand that it would take five weeks for you to answer negatively to a request for information on our part. Please inform us of the date on which the Commission will consider either the request for tenders or the amount of the subsidy to be granted for a ferry service from the Maritimes to the Magdalen Islands.

[*Texte*]

Une compagnie semble intéressée à assumer la responsabilité du service des Îles de la Madeleine avec les Maritimes et d'un service avec les Îles de la Madeleine beaucoup amélioré à notre point de vue, et à une subvention moindre que celle présentement accordée à Magdalen Islands Transportation Company.

La réponse ne venait pas. Nous avons envoyé une autre lettre, avec copie à Me Béchard. Je ne sais pas si c'est lui qui a accéléré la réponse, mais de toute manière nous l'avons eue à la suite de notre lettre.

J'accuse réception de votre lettre du premier novembre 1968 relativement au service de traversier entre les Îles de la Madeleine et les provinces Maritimes.

La Commission avance aussi rapidement que possible en coopération avec les autres ministères concernés vers la préparation des terminus nécessaires au nouveau traversier *roll-on roll-off*.

Aussitôt que ces plans auront été complétés, nous ferons une demande de soumission pour un traversier *roll-on roll-off* adéquat.

C'est-à-dire que c'est le ministère des Travaux publics qui contrecarre nos plans.

M. Béchard: Monsieur Carbonneau, apparemment, ce qui empêche le tout d'aller de l'avant, c'est la décision quant au site du port de mer.

M. Carbonneau: C'est cela.

M. Béchard: Alors si on fait le tour des trois ministères intéressés, il est bon de savoir qu'un Plan d'aménagement a été signé par la province de Québec et le gouvernement fédéral au mois de mai dernier à Rimouski. Plan qui prévoit le développement de la région pilote comprenant le Bas Saint-Laurent, les Îles de la Madeleine et la Gaspésie. Et dans ce plan, la question du port et du transbordeur est abordée. Chaque fois que nous nous informons à l'un ou l'autre ministère, on nous dit: «C'est le ministère des Travaux publics qui est en retard,» ou bien, «C'est le ministère des Transports», ou encore, «C'est l'ARDA».

Je crois qu'il faut insister sur le fait que ce sont les ingénieurs qui vont décider.

Maintenant monsieur Carbonneau, pourriez-vous me dire si vous avez une préférence quant à l'endroit où sera situé le port de mer en question?

M. Carbonneau: Vous voyez, nous ne sommes pas compétents en la matière. Je ne suis

[*Interprétation*]

One company seems to be interested in ensuring service from the Maritimes to the Magdalen Islands and providing a greatly improved service in our opinion with the Magdalen Islands and with a lower subsidy than that now given to the Magdalen Islands Transportation Company.

The reply was not forthcoming, so we sent another letter with a copy to Mr. Béchard. I do not know if he is the one who saw to it that we received an answer without delay, but at any rate we received it following that letter.

I acknowledge receipt of your letter of November 1, 1968, with regard to the ferry service between the Maritime provinces and the Magdalen Islands.

The Commission is advancing as quickly as possible in co-operation with the other Departments concerned towards the preparation of the necessary terminals for the new roll-on roll-off service.

As soon as these plans have been completed, we will make a request for tenders for an adequate roll-on roll-off ferry.

This means that it is the Department of Public Works that is now blocking our plans.

Mr. Béchard: Mr. Carbonneau, apparently what is preventing the whole matter to progress is the decision with regard to the location of the seaport.

Mr. Carbonneau: That's right.

Mr. Béchard: Therefore, if we make the rounds in the three Departments involved, it is good to know that there is a Development Plan that was signed by the Province of Quebec and the Federal Government in the month of May last year, in Rimouski, which provides for development of the pilot area including the Lower St. Lawrence, Gaspé, and the Magdalen Islands. In that Plan the question of the port and the ferry is mentioned. Each time we inquire at either of the Departments, we are told that the Department of Public Works is delaying the matter, or else that this is due to DOT, or that it is because of ARDA.

I think we should insist on the fact that it is the engineers who are going to decide.

Now, Mr. Carbonneau, could you tell me whether you have any preference with regard to the site of the proposed seaport?

Mr. Carbonneau: We are not qualified in this matter, sir. I am not an engineer. It is

[*Text*]

pas ingénieur, ce n'est pas à moi à décider du site du port de mer.

M. Béchard: Alors, les gens des Îles-de-la-Madeleine que vous représentez ici, aujourd'hui, s'en remettent à la décision qui sera prise par les ingénieurs du gouvernement.

M. Carbonneau: Définitivement, oui.

M. Béchard: Monsieur Carbonneau, combien de voyages par semaine, le *North Gaspé* fait-il entre l'Île du Prince-Édouard et les Îles-de-la-Madeleine? Son horaire est-il régulier, et combien de mois par année est-il en opération?

M. Carbonneau: L'horaire n'est pas régulier. La saison débute au mois d'avril et se termine le 14 décembre. Maintenant, je vais vous donner un exemple, le bateau est censé partir de Souris à 11 heures le soir. Vous pouvez y arriver avec votre voiture à cette heure-là, et attendre facilement jusqu'à 4 heures du matin. Vous embarquez sur le bateau avec votre voiture, mais le bateau ne part pas avant 6 heures. Vous vous couchez, vous endormez, puis vous vous levez à 9 heures dix. Vous demandez une tasse de café et on vous répond qu'il est trop tard, que le déjeuner n'est servi que jusqu'à 9 heures.

L'horaire se lit comme suit: il y a deux voyages par semaine du 10 avril au 28 avril et du 7 octobre au 14 décembre. Il y a trois voyages par semaine du 29 avril au 22 juin et du 26 août au 15 octobre. J'ai ici l'horaire de l'an dernier, mais celui de cette année est exactement le même. Enfin, il y a cinq voyages par semaine, du 24 juin au 25 août. C'est l'horaire en vigueur présentement.

M. Béchard: Cela fait combien de voyages en tout, par année?

M. Carbonneau: Cela fait 111 voyages.

M. Béchard: 111 voyages. Êtes-vous au courant du montant des subsides qui seront versés cette année à la compagnie en question pour faire ce trajet-là, y compris, évidemment, Pictou?

M. Carbonneau: Oui, il y a Pictou. L'an dernier, les subventions ont été de $389,900, et cette année, d'après les renseignements que j'ai, elles seraient de $412,900.

M. Béchard: Pour 111 voyages?

M. Carbonneau: Pour 111 voyages, ce qui fait, *grosso modo*, $3,500 par voyage.

M. Béchard: Une dernière question, pour ne pas retarder davantage. Nous savons ce

[*Interpretation*]

not up to me to decide on the location of the seaport.

Mr. Béchard: So the people of the Magdalen Islands which you represent here today would then be content with the decision of the government engineers?

Mr. Carbonneau: Definitely.

Mr. Béchard: Mr. Carbonneau, how many trips per week does the *North Gaspé* make between Prince Edward Island and the Magdalen Islands? Does it operate on a regular schedule, and how many months per year is it in operation?

Mr. Carbonneau: The schedule is irregular. The season starts at the beginning of April, and ends on December 14. I will give you an example. The ship is supposed to leave Souris at 11 p.m. You get there with your automobile, and then you could wait easily until four o'clock in the morning. You get on board ship with your automobile, but it is six o'clock before the ship leaves. You go to bed, you sleep, and you get up at 9:10 a.m. You ask for a cup of coffee and you are told that it is too late, that breakfast is served only until nine o'clock.

The schedule is as follows: there are two trips per week from April 10, to April 28, and from October 7, to December 14. There are three trips per week from April 29, to June 22, and from August 26, to October 5. That is last year's schedule. This year's schedule has come out and it is exactly the same thing. There are five trips per week, from June 24, to August 25. That is the present schedule.

Mr. Béchard: How many trips in all per year?

Mr. Carbonneau: 111 trips.

Mr. Béchard: Are you aware of the amount of the subsidies to be given this year to the company involved for this trip including, of course, Pictou?

Mr. Carbonneau: Yes, it serves Pictou. Last year, the subsidies amounted to $389,000. This year, according to the information I get, they would amount to $412,900

Mr. Béhcard: For 111 trips?

Mr. Carbonneau: Yes, for 111 trips, which means approximately $3,500 per trip.

Mr. Béchard: My last question now, not to delay further the proceedings. We know what

[*Texte*]

que vous voulez, et s'il y en a un qui le sait, c'est moi.

Le président: J'allais vous dire, monsieur Béchard, que les mêmes règlements s'appliquent ici qu'à la Chambre des communes. Vous êtes parfaitement au courant de ces règlements...

M. Béchard: Merci, monsieur le président. C'est ma dernière question.

Certaines gens des Îles de la Madeleine, je ne sais pas s'ils sont nombreux, nous disent qu'ils aimeraient mieux que la liaison se fasse, la liaison maritime, avec la province de Québec, soit Gaspé, Chandler ou autres. La majorité favorise-t-elle la liaison entre l'Île du Prince-Édouard et les Îles-de-la-Madeleine.

M. Carbonneau: Vous savez, les madelinots ne sont pas séparatistes, loin de là, mais comme partout ailleurs, il y en a quelques-uns, et ce sont peut-être ces gens-là qui préféreraient avoir un service de transport maritime pour aller au Québec. Nous avons un assez bon service de transport aérien, même si cela coûte cher pour aller à Montréal, mais de Montréal, c'est facile de se rendre à Québec. Quant au transport maritime, ce n'est certainement pas la majorité qui demande une liaison avec Québec; même si vous vous reportez au plan du BAEQ, qui a été préparé par la population, on y indique clairement que même si nos attaches culturelles sont avec le Québec, nous ne sommes nullement intéressés à avoir un service de transport maritime avec le Québec, c'est-à-dire que nous en avons déjà un reliant Montréal et les Îles-de-la-Madeleine et qui fait surtout du transport de marchandises; il y a parfois quelques passagers.

M. Béchard: Il y a combien de milles entre Souris et Havre-Aubert?

M. Carbonneau: 66 milles.

M. Béchard: Combien de milles entre Havre-Aubert, Cap-aux-Meules et Gaspé ou Chandler?

M. Carbonneau: 160 milles environ.

M. Béchard: Merci, monsieur.

Le président: Monsieur Godin.

M. Godin: Merci bien. Je me souviens...

Le président: Monsieur Godin, permettriez-vous une question supplémentaire à M. McGrath?

[*Interprétation*]

you want, and if there is anyone who knows it, it is I.

The Chairman: I was about to tell you, Mr. Béchard, that the same rules apply here as in the House of Commons. You are perfectly aware of these rules...

Mr. Béchard: Thank you, Mr. Chairman. This is my last question.

There are some people from the Magdalen Islands—I do not know if there are very many of them—who tell us that they would prefer the maritime link to be with the Province of Quebec, either Gaspé, Chandler or other points. Would the majority be in favour of a link between Prince Edward Island and the Magdalen Islands?

Mr. Carbonneau: The Magdalen Islanders are not separatists, far from it, but like everywhere else, there are a few, and it is perhaps these people who would prefer having a maritime transportation service that goes to the province of Quebec. We do have a pretty good air service, even if it is costly for service with Montreal, but from Montreal it is easy to get Quebec City. With regard to maritime transportations, it is certainly not the majority that is asking for a link with Quebec. Even if you refer to the BEAQ plan, which was prepared by the people, it clearly indicates that even if our cultural links are with Quebec, we are in no way interested in having a maritime transportation service with Quebec. That is, we already have maritime transportation between Montreal and the Magdalen Islands. It is especially for freight, although these are occasionnally a few passengers.

Mr. Béchard: How many miles are there between Souris and Havre-Aubert?

Mr. Carbonneau: 66 miles.

Mr. Béchard: And how many miles are there between Havre-Aubert, Cap-aux-Meules and Gaspé or Chandler?

Mr. Carbonneau: About 160 miles.

Mr. Béchard: Thank you, sir.

The Chairman: Mr. Godin.

Mr. Godin: Thank you. I remember...

The Chairman: Mr. Godin, would you permit Mr. McGrath to ask a supplementary question?

[*Text*]

Mr. McGrath: Your answer was so fast that I did not get it on the translation. Did you say 66 miles to Souris?

Mr. Carbonneau: Yes, that is right.

Mr. McGrath: And how many miles to Gaspé?

Mr. Carbonneau: One hundred and sixty.

M. McGrath: Merci.

Le président: Monsieur Godin.

M. Godin: Étant donné que la compagnie de transport maritime perçoit $3,500 par voyage, pouvez-vous monter sans payer ou si on vous demande encore quelque chose? Je m'excuse, mais je ne me suis pas rendu plus loin que Gaspé jusqu'à présent.

Le président: A l'ordre.

M. Carbonneau: Il n'y a pas de problèmes jusqu'à Gaspé, c'est à partir de cet endroit que nous en avons. Voyage simple de Pictou, Charlottetown aux Îles-de-la-Madeleine $10 en première classe; il y a deux classes, mais la deuxième classe, vous savez, là... $7.30 pour la deuxième classe.

Le président: Quelle différence y a-t-il entre la première et la deuxième?

M. Carbonneau: C'est-à-dire, je vais vous dire exactement ce que je fais, moi; je prends un billet de deuxième classe et je m'en vais en première classe.

M. Godin: C'est le taux pour un passager?

M. Carbonneau: Pour un passager.

M. Blouin: $10.

M. Carbonneau: $10. Mais je vais vous donner les chiffres, je ne voudrais pas vous entraîner sur une fausse piste.

M. Breau: Combien cela coûterait-il par avion?

M. Carbonneau: Par avion, c'est $12. Les passagers viennent surtout par Souris, donc je vais vous donner le prix de Souris à Havre-Aubert qui est à peu près cela. Souris: $8, une personne; il va y avoir au moins un déjeuner, $1.60.

M. Godin: En plus?

M. Carbonneau: Oui, ces prix-là ont été majorés cette année, je ne sais pas exactement, ce sont les prix de 1967 et ils ont été majorés.

[*Interpretation*]

M. McGrath: Votre réponse a été tellement rapide que je n'en ai pas eu l'interprétation. Avez-vous dit 66 miles jusqu'à Souris?

M. Carbonneau: Oui, c'est cela.

M. McGrath: Et combien jusqu'à Gaspé?

M. Carbonneau: Cent soixante.

Mr. McGrath: Thank you.

The Chairman: Mr. Godin.

Mr. Godin: As the Maritime Transportation Company is granted approximately $3,500 a trip, can you get aboard without paying or are you charged for it? Excuse me, but so far, I did not get any further than Gaspé.

The Chairman: Order, please.

Mr. Carbonneau: There is no problem as far as Gaspé, but it is from there onwards that we have problems. Single trip from Pictou, Charlottetown to the Magdalen Islands, $10. That is first class. There are two classes, but the second class, you know...$7.30, second class.

The Chairman: What is the difference between first and second class?

Mr. Carbonneau: I will tell you exactly what I do. I take a second class ticket and then I go into first class once I get aboard.

Mr. Godin: Is this the rate for a single passenger?

Mr. Carbonneau: For a single passenger.

Mr. Blouin: $10.

Mr. Carbonneau: $10. I will give you the figures. I do not want to mislead you.

Mr. Breau: How much is it by air?

Mr. Carbonneau: By air, $12. The passengers come particularly from Souris, so I will give you the rates from Souris to Havre-Aubert. Souris, $8 a person. You will have at least breakfast, $1.60.

Mr. Godin: In addition?

Mr. Carbonneau: Yes, these prices have been increased this year. I do know exactly how much, but these are the prices for 1967. They have been increased.

[*Texte*]

M. Godin: Cela nous donne une bonne idée.

M. Carbonneau: J'ai les prix de 1969. C'est monté, c'est vrai. Souris aux Îles-de-la-Madeleine $8.50 par personne, automobile et un occupant depuis Souris aux Îles-de-la-Madeleine $17 et $2 de péage, je pense, cela revient au fédéral, ce n'est pas pire, un déjeuner $1.70, cela coûte $29.20 à une personne pour se rendre aux Îles-de-la-Madeleine. Maintenant, il faut que vous y reveniez, il faut absolument y revenir, ce qui veut dire $58.40 au minimum pour une personne. Si vous y alliez en vacances, vous n'iriez pas seuls, il y a au moins en moyenne deux enfants, une femme, ce qui veut dire que vous rajoutez trois fois $8.50, cela fait $25.50, 3 déjeuners $5.10, $85.

M. Crossman: Est-ce le même prix pour les enfants et les adultes?

M. Carbonneau: Oui, mais il doit y avoir des détails qui ne sont pas indiqués, c'est probablement gratuit pour un enfant âgé de moins de 12 ans, je pense que c'est pour les enfants de moins de 2 ans, cela diffère du transport aérien.

M. Godin: Maintenant, du côté navigation: on voit circuler des navires entre Terre-Neuve et Montréal pendant l'hiver. Quelles sont les conditions de la glace, chez vous? Est-ce qu'un bon navire pourrait vous donner un service même durant l'hiver?

M. Carbonneau: Certainement, le problème est qu'on s'entête, sans raison, à aller à Charlottetown, qui est un port intérieur. Donc, il y a de la glace au mois de décembre (cette année il n'y a pas de problème, il n'y a pas de glace) mais une année où il y en a, si l'horaire donne comme date du premier voyage, le mois d'avril, il arrive souvent que le bateau est pris dans la glace à Charlottetown et il attendra quinze jours avant de pouvoir sortir.

M. Godin: Merci bien.

Le président: Monsieur McGrath.

Mr. McGrath: Mr. Chairman, most of my questions have already been answered, but just for clarification—because some of the answers were fairly fast for the translator and I think we lost a few points in translation. As I understand it now, you will get a roll-on roll-off ferry immediately you get the proper docking facilities at Havre Aubert in the Magdalen Islands. Is that right?

[*Interprétation*]

Mr. Godin: That gives us a good idea.

Mr. Carbonneau: Here I have the 1969 tariff. It has gone up, it is true. Souris to Magdalen Islands, $8.50 a person. Automobile and one occupant, from Souris to the Magdalen Islands, $17, and there is $2 for dock fees, I believe—that goes to the federal government; that isn't bad—one breakfast, $1.70, which means $29.20 for one person alone to go to the Magdalen Islands. Now you have to come back too, which means $58.40 return trip minimum for one person. If you were going there on holidays you would not go alone. Normally, you have at least two children and one wife, which means that you would have to add three times $8.50, which amounts to $25.50, and three breakfasts, $5.10, for a grand total of $85.

Mr. Crossman: Do they charge the same price for children as for adults?

Mr. Carbonneau: Yes, but there must be some details which are not marked here. Probably below the age of 12 they do not pay, although I think it is for children below the age of 2—it is not the same thing as air transportation, you know.

Mr. Godin: From the point of view of navigation. We see ships operating between Montreal and Newfoundland during the winter. What are ice conditions like where you come from? Could a good ship provide you with service, even in wintertime?

Mr. Carbonneau: Of course. The problem is that people insist, for no good reason, on going to charlottetown which is an inland port. Consequently, they have ice in December. This year there is no problem; there is no ice, but if you get a year when there is ice, if the schedule reads the month of April for the first trip, often the ship is caught in the ice in Charlottetown and will have to wait a couple of weeks before being able to leave.

Mr. Godin: Thank you.

The Chairman: Mr. McGrath.

M. McGrath: Monsieur le président, la plupart de mes questions ont déjà reçu une réponse, mais j'aimerais quelques éclaircissements, car certaines des réponses étaient trop rapides pour l'interprète, et je crois que nous avons perdu certaines choses dans l'interprétation. Si j'ai bien compris vous aurez un service de bac à chargement et déchargement rapides dès que l'on aura aménagé les quais nécessaires au Havre-Aubert, aux Îles-de-la-Madeleine. Est-ce bien cela?

[*Text*]

Mr. Carbonneau: That is what they are telling us.

Mr. McGrath: Who is telling you this?

Mr. Carbonneau: The Department of Transport.

Mr. McGrath: I did not understand who is going to provide this new vessel.

M. Carbonneau: Ils vont demander des soumissions pour le service.

Mr. McGrath: Tenders for the construction of the vessel or tenders for the charter of the vessel?

M. Carbonneau: Probablement pour le service, c'est-à-dire que présentement, nous savons qu'il y a un bateau qui répondrait à nos besoins en ce qui a trait au service. C'est un bateau qui dessert la Gaspésie et la Côte Nord, et ceux . . .

Mr. Blouin: If I may, Mr. Chairman, I think that they are going to ask for tenders for a subsidy. The Canadian Transport Commission is going to ask for public tenders to grant a subsidy.

Mr. McGrath: In other words, whoever is successful in getting the tender will have to provide the vessel and in return he will be provided with a subsidy.

Mr. Carbonneau: That is right.

Mr. McGrath: And the vessel will have to meet specifications set down by the tender. You say that according to the Canadian Transport Commission, who wrote you on this matter, the only thing that is delaying the calling for tenders for this vessel is the building of the facilities.

Mr. Carbonneau: That is right.

Mr. McGrath: And the building of the facilities is the responsibility of the Department of Public Works, and the Department of Public Works have taken a holiday in the Maritimes this year, so it looks as if we may have to wait perhaps another year. It would seem to me, if I may just make this observation, Mr. Chairman, that this witness and the Magdalen Islands have certainly presented a strong case for this Committee to a least light a fire under Public Works and get the facilities built.

The Chairman: Mr. Trudel?

[*Interpretation*]

M. Carbonneau: C'est ce qu'on nous dit.

M. McGrath: Qui vous le dit?

M. Carbonneau: Le ministère des Transports.

M. McGrath: Je n'ai pas compris qui devait vous fournir le nouveau navire.

Mr. Carbonneau: They are going to call for tenders for the service.

M. McGrath: Les offres pour la construction du navire, ou pour son affrètement?

Mr. Carbonneau: Probably for the service itself. That is to say that at the present time we know that there is one ferry which would be suitable for us, one which goes to the Gaspé and the North Shore, and those . . .

M. Blouin: Si vous me le permettez, monsieur le président, je dirais que l'on va demander des offres pour une subvention. La Commission canadienne des transports va demander des offres publiques pour accorder une subvention.

M. McGrath: En d'autres termes, le soumissionnaire auquel on adjugera le contrat devra fournir le navire et, en retour, il recevra une subvention.

M. Carbonneau: C'est exact.

M. McGrath: Et le navire devra être conforme aux exigences posées dans l'offre. Vous dites que, d'après la Commission canadienne des transports, qui vous a écrit à ce sujet, la seule chose qui retarde l'appel d'offres pour la construction du navire, c'est l'aménagement des quais.

M. Carbonneau: C'est exact.

M. McGrath: Or, c'est le ministère des Travaux publics qui est chargé de la construction des installations, et le ministère des Travaux publics a pris congé dans les Maritimes cette année. Il semble donc qu'il va falloir attendre peut-être encore un an. Il me semble, si vous me permettez de faire cette observation, monsieur le président, que le témoin et les Madelinots ont, assurément, présenté au Comité une assez bonne cause pour qu'au moins le Comité fasse sauter les Travaux publics pour activer la construction des installations.

Le président: Monsieur Trudel?

[*Texte*]

M. Trudel: Monsieur le président, est-ce que le traversier que vous avez présentement, monsieur Carbonneau, pourrait être muni d'une rampe permettant aux véhicules de monter à bord?

M. Carbonneau: Non, aucunement.

M. Trudel: Il n'y a aucune possibilité d'adoptation, même si vous aviez les facilités portuaires?

M. Carbonneau: Non, aucunement. Présentement, ce bateau peut servir pour transporter le cargo.

M. Trudel: Strictement.

M. Carbonneau: Ah oui! Nous sommes tout de même en 1969 et faire monter un passager à bord d'un tel navire est absurde.

M. Trudel: Maintenant, l'autre question: vous avez cité tout à l'heure et vous avez laissé croire, du moins c'est l'interprétation que j'en fais, qu'en obtenant 10 p. 100 des subventions versées présentement à l'Île du Prince-Édouard, cela réglerait probablement vos problèmes. Avez-vous une idée du pourcentage des subventions que vous recevez présentement? Est-ce 5 p. 100 ou 2 p. 100 que vous recevez? Ou avez-vous fait une étude qui nous permettrait d'étudier ces chiffres-là?

M. Carbonneau: Non, nous n'avons fait aucune étude. Mais au sujet du transport et je vais m'en tenir à ce point seulement, car c'est ce qui nous occupe, encore dernièrement, je pense au mois de novembre, le National-Canadien a acheté un nouveau traversier pour faire le transport Borden-Cap-Tourmente. Lorsque M. Trudeau ou M. Marchand a annoncé la mauvaise nouvelle à l'Île du Prince-Édouard que la chaussée ne serait pas construite, on leur a assuré que de nombreux bateaux viendraient faire le service. J'évalue à au moins $25 millions annuellement les sommes qui vont être investies dans le service des transports pour l'Île du Prince-Édouard; quant à nous, 2 millions et demi, nous en avons suffisamment.

M. Trudel: Merci, monsieur le président.

Le président: Monsieur Breau.

M. Breau: Une question supplémentaire à ce sujet. Avez-vous 10 p. 100 de la circulation qui va du Nouveau-Brunswick à l'Île du Prince-Édouard présentement? Vous dites que vous aimeriez avoir 10 p. 100 des subventions, mais savez-vous si vous auriez aussi 10 p. 100 de la circulation?

[*Interprétation*]

Mr. Trudel: Mr. Chairman, the present ferry you now have, Mr. Carbonneau, could it be adapted to have a ramp to allow vehicles to get on?

Mr. Carbonneau: No, not at all.

Mr. Trudel: There is no possibility of adapting the ferry, even if you had the harbour facilities?

Mr. Carbonneau: No, not at all. At the present time that ship can carry cargo.

Mr. Trudel: Strictly?

Mr. Carbonneau: Yes, really, after all , this is 1969, and putting passengers on this kind of ship is absurd.

Mr. Trudel: My other question. A llittle while ago you quoted, and you let it be understood, at least that is how I interpreted it, that if you were to get 10 per cent of the subsidies now given to Prince Edward Island, this would probably solve your problems. Do you have any idea of the present subsidies you receive with regard to percentage? Do you receive 5 per cent or 2 per cent? Or have you made any analysis which would allow us to study these figures?

Mr. Carbonneau: No, we have made no study. But with regard to transportation, and I shall just stick to that point because that is the one we are concerned with, lately, I think it was in November, the CN bought a new ferry for the Borden—Cap Tourmente ferry service. When Mr. Trudeau or Mr. Marchand announced the bad news to Prince Edward Island that it was not going to get the causeway, he assured them that a good number of ships would come and give the service. I evaluate at $25 million annually the amounts to be invested in the transportation service for Prince Edward Island. In so far as we are concerned, we would have plenty with $2.5 million.

Mr. Trudel: Thank you, Mr. Chairman.

The Chairman: Mr. Breau.

Mr. Breau: A supplementary question to this now. Do you have 10 per cent of the traffic which goes from New Brunswick to Prince Edward Island at the present time? You are saying that you would like to get 10 per cent of the subsidy, but do you know whether you would also get 10 per cent of the traffic?

[*Text*]

M. Carbonneau: C'est automatique. Écoutez, il y a peut-être mille personnes, l'été dernier, qui se sont rendues à Souris, elles ont regardé le bateau et elles ont eu peur. Voyez, je ne dis pas cela pour essayer de faire sensation, mais c'est exact. Nous recevons beaucoup de demandes de renseignements à la Chambre de commerce, parce qu'il n'y a pas de bureau touristique, nous recevons donc beaucoup de demandes. Lorsque nous leur faisons parvenir l'horaire, nous sommes quelque peu gênés de l'envoyer. Il y en a qui se rendent aux Îles puis réellement . .

M. Breau: Oui, mais malgré qu'il y ait eu mille personnes, savez-vous si vous auriez 10 p. 100 de la circulation? Vous ne le savez pas.

M. Carbonneau: Avec un service de traversier, je n'en doute aucunement. Je crois même que nous aurions peut-être plus que 10 p. 100 de la circulation.

M. Breau: Par exemple, s'il y a un demi-million de personnes qui traversent, à d'autres endroits, vous en auriez au moins 10 p. 100.

M. Carbonneau: Oui, j'ai essayé de m'en assurer personnellement.

M. Breau: Maintenant, êtes-vous satisfait du service aérien que vous avez présentement?

M. Carbonneau: Dans une proportion de 75, 80 p. 100, je dirais.

M. Breau: Avez-vous un bon aéroport maintenant, parce que jusqu'à ces tout derniers temps, ils atterrissaient sur la plage?

M. Carbonneau: Ça fait longtemps de cela.

M. Breau: Ça fait longtemps de cela?

M. Carbonneau: Ah oui! Mais l'aéroport doit être agrandi encore un peu, probablement qu'à l'avenir, des avions réactés assureront le service entre les Îles-de-la-Madeleine et Montréal.

M. Breau: Présentement, c'est EPA qui vous donne un service?

M. Carbonneau: EPA qui, je pense, est présentement fusionnée avec Nordair.

M. Breau: Oui, maintenant ils disent qu'ils auront des réactés avant longtemps, et que cela va prendre une piste d'au moins 6 mille pieds; en avez-vous une de cette longueur?

M. Carbonneau: Je ne le pense pas, non.

[*Interpretation*]

Mr. Carbonneau: It is automatic. There were approximately 1,000 people last year who went to Souris, looked at the boat and got scared. Now, I am not saying this for the sake of sensationalism, but it is true. We receive a great deal of requests for information at the Chamber of Commerce, because there is no tourist bureau, so we receive a great many requests for information. When we send them the schedule we do not even like to send it, because some go to the Island and then. . .

Mr. Breau: Yes, but in spite of the fact that there were 1,000 persons, do you know if your would get 10 per cent of the traffic? You don't know.

Mr. Charbonneau: With a ferry service, I have no doubt of it. I even think that we might have more than 10 per cent of the traffic.

Mr. Breau: For instance, if half a million people go across at other places, you would have at least 10 per cent.

Mr. Carbonneau: Yes, I personally tried to make sure of this.

Mr. Breau: Now, are you satisfied with your present air service?

Mr. Carbonneau: I would say in a proportion of 75 or 80 per cent.

Mr. Breau: Do you have a good airport now because, until quite recently, planes had to land on the beach?

Mr. Carbonneau: That is a long time ago.

Mr. Breau: A long time ago?

Mr. Carbonneau: Sure! But the airport still has to be enlarged a bit more, because in the future we will probably have jet service between the Magdalen Islands and Montreal.

Mr. Breau: At the present time, it is E.P.A. that services you?

Mr. Carbonneau: Yes, E.P.A., which I think has now been amalgamated with Nordair.

Mr. Breau: Yes, now they say that they are going to have jets before too long, and it is going to take at least a 6,000 foot runway. Do you have a 6,000 foot runway?

Mr. Carbonneau: I do not believe so, no.

[*Texte*]

M. Breau: Savez-vous si vous pourrez l'obtenir? Si on instaure un service de réactés de l'Île du Prince-Édouard à Montréal, et que vous n'avez pas de piste de 6 milles pieds, il va falloir donc que vous utilisiez un petit avion pour aller à Charlottetown?

M. Carbonneau: Oui, je le sais, mais vous dire bien franchement, je ne peux pas demander plus que ce qui est raisonnable. Quand même que nous aurions un réacté, pouvant transporter 108 passagers, qui viendrait aux Îles-de-la-Madeleine en chercher à tous les jours, il n'y aurait pas autant de personnes qui viendraient, surtout pendant la saison morte du tourisme. Donc, c'est peut-être demander un peu trop.

M. Breau: Ainsi, vous pensez qu'il n'est pas nécessaire d'avoir un service de réactés. Vous seriez satisfait d'avoir un service régional assuré par un petit avion qui vous amènerait à Charlottetown, disons.

M. Carbonneau: Bien, c'est-à-dire un petit avion, il faut s'entendre.

M. Breau: Bien, je veux dire tel que celui que vous avez à l'heure actuelle.

M. Carbonneau: Comme nous avons présentement? Disons, pour la prochaine année, mais cela ne veut pas dire que dans deux ans nous n'aurons pas besoin du service des réactés.

M. Breau: Maintenant, avez-vous dit que les installations de l'aéroport, telles qu'elles existent présentement sont suffisantes?

M. Carbonneau: Non, elles ne sont pas suffisantes, parce qu'il y a une piste qui n'est pas éclairée, puis l'avion vient le soir.

M. Breau: La piste n'est pas éclairée et l'avion vient le soir?

M. Carbonneau: Il y a seulement une piste d'éclairée, la deuxième ne l'est pas; celle de nord-sud est éclairée, je pense, mais celle d'est-ouest ne l'est pas, ou quelque chose de ce genre. Puis le soir, c'est éclairé temporairement.

Le président: Monsieur Portelance?

M. Portelance: Merci, monsieur le président. Vous avez mentionné, tout à l'heure, qu'il y a un traversier qui s'appelle «Nord-Gaspé»? Est-ce le seul qui va chez vous ou la Clarke Steamship en a-t-elle d'autres qui y vont?

[*Interprétation*]

Mr. Breau: Do you know whether or not you can get one? Because if they give jet service from P.E.I. to Montreal and if you do not have a 6,000 foot runway, that means you will have to use a small aircraft to go to Charlottetown?

Mr. Carbonneau: Yes, I know, but frankly I would have to tell you that we cannot ask for more than what is reasonable. Even if we were to get a 108 passenger jet coming to the Magdalen Islands to pick up passengers daily, there would certainly not be that many people flying in, particularly in the off-season. So, it is perhaps asking for a little too much.

Mr. Breau: So, you do not think it is necessary for you to have a jet service. You would be satisfied with regional service with a small aircraft taking you, let's say, to Charlottetown.

Mr. Carbonneau: What do you mean by a small aircraft?

Mr. Breau: Like the one you have at the present time.

Mr. Carbonneau: Like the one we have at the present time? Let us say for the next year, but that does not mean that in two years we will not need jet service.

Mr. Breau: Now, did you say that present airport facilities are sufficient?

Mr. Carbonneau: No, they are not sufficient, because one runway is not lit, and the aircraft.

Mr. Breau: The runway is not lit and the aircraft arrives at night?

Mr. Carbonneau: There is only one lit runway, the second one is not. The north-south runway is lighted but the east-west runway is not, or something like this. And at night, it is lighted temporarily only.

The Chairman: Mr. Portelance?

Mr. Portelance: Thank you, Mr. Chairman. You mentioned a little while ago that there is a ferry called the North Gaspé. Is that the only one that goes to the Magdalen Islands, or does Clarke Steamship Company Ltd. have others that go there?

[*Text*]

M. Carbonneau: C'est le seul de la Clarke Steamship qui vient chez nous.

M. Portelance: Et présentement la moyenne est de cinq voyages par semaine? C'est cela?

M. Carbonneau: L'été seulement.

M. Portelance: L'été seulement? Croyez-vous que ce soit suffisant, même si c'est un meilleur traversier qui fait le . .

M. Carbonneau: Non, ce n'est sûrement pas suffisant parce que la capacité de ce bateau n'est que pour 40 passagers et on en fait monter jusqu'à 150.

M. Portelance: Présentement, on en fait monter jusqu'à 150?

M. Carbonneau: Oui.

M. Portelance: Les limites seraient de 40?

M. Carbonneau: Seraient de 40.

M. Portelance: N'estimez-vous pas que la sécurité envers les passagers est négligée, à ce moment-là?

M. Carbonneau: Absolument, oui.

M. Portelance: La commission maritime est-elle au courant de cet état de choses?

M. Carbonneau: Le bateau est inspecté ou est censé l'être à tous les ans.

M. Portelance: Combien y a-t-il d'automobiles dans les Îles-de-la-Madeleine?

M. Carbonneau: Approximativement, je dirais 3,000, comme il faut, peut-être un peu plus.

M. Portelance: Pour 14,000 habitants?

M. Carbonneau: Oui, 3,000 automobiles. N'oubliez pas que la famille moyenne y est plus nombreuse qu'ailleurs.

M. Portelance: Cela veut dire qu'à peu près chaque famille a une automobile?

M. Carbonneau: Je dirais une famille et quart.

M. Portelance: Justement, ces automobilistes ont-ils à sortir souvent de l'Île, vont-ils souvent à l'Île du Prince-Édouard?

M. Carbonneau: Non, mais ils viennent souvent à Montréal, Québec, Ottawa, Toronto et ainsi de suite.

M. Portelance: On voyage par avion à ce moment-là ou bien non. . .

[*Interpretation*]

Mr. Carbonneau: It is the only one that Clarke Steamship Company Ltd. has that comes to the Magdalen Islands.

Mr. Portelance: Then at the present time the average is five trips per week? Is that right?

Mr. Carbonneau: In the summer only.

Mr. Portelance: In the summer only? Do you think it is sufficient, even if there were a better ferry. . .

Mr. Carbonneau: No, definitely not, because that ship's capacity is for 40 passengers only, and up to 150 are put aboard.

Mr. Portelance: At the present time you put up to 150 on board?

Mr. Carbonneau: Yes.

Mr. Portelance: And the limit is 40?

Mr. Carbonneau: Yes, forty.

Mr. Portelance: Don't you think that there is a lack of security in that case towards passengers?

Mr. Carbonneau: Definitely, yes.

Mr. Portelance: Is the Canadian Maritime Commission aware of this?

Mr. Carbonneau: The vessel is supposed to have an annual inspection.

Mr. Portelance: How many automobiles are there in the Magdalen Islands?

Mr. Carbonneau: I would say approximately 3,000, maybe a little bit more.

Mr. Portelance: For 14,000 people?

Mr. Carbonneau: Yes, 3,000 cars. Do not forget that our average family is larger than elsewhere.

Mr. Portelance: That means that nearly every family has an automobile?

Mr. Carbonneau: I would say 1¼ families.

Mr. Portelance: Do these automobile drivers have to leave the island often? Do they have to go to P.E.I.?

Mr. Carbonneau: No, but they often come to Montreal, Quebec City, Ottawa, Toronto, and so on.

Mr. Portelance: Do they travel by air then?

[*Texte*]

M. Carbonneau: Non, pas toujours, l'hiver oui, pas l'été.

M. Portelance: L'été on se sert de l'automobile...

M. Carbonneau: Oui.

M. Portelance: Du traversier.

M. Carbonneau: Oui.

M. Portelance: Jusqu'à l'Île du Prince Édouard, et de l'Île du Prince-Édouard, on prend un autre traversier pour aller sur la terre ferme.

M. Carbonneau: Oui.

M. Portelance: Êtes-vous au courant du nombre approximatif de voyageurs des Îles-de-la-Madeleine vers Charlottetown pour l'an dernier?

M. Carbonneau: Non, je ne pourrais vous donner cela, la seule chose que je peux vous dire, c'est que l'an dernier, il y a eu un voyage supplémentaire qui n'avait pas été annoncé. Cela a permis de transporter 500 voitures et 1,200 passagers de plus que la saison précédente, où il n'y a eu au cours de l'été, que quatre voyages.

M. Portelance: Arrive-t-il parfois que des personnes des Îles-de-la-Madeleine, qui aimeraient sortir des Îles une journée donnée, ne puissent pas embarquer sur le bateau?

M. Carbonneau: Certainement, soit parce qu'il y a trop de voitures à bord et il n'y a pas de place, ou qu'on n'a pas fait de réservations, ou encore cela peut se produire une journée où le bateau est censé venir, disons le jeudi, et il ne vient que le vendredi.

Donc, si pour une affaire urgente, une personne veut se rendre dans les Maritimes, avec sa voiture, il est obligé de prendre l'avion, mais souvent les points de correspondance avec les trains ou les autobus ou les services de transport en commun, sont quasi inexistants, à certains endroits, parce que, présentement, par avion on va à Charlot et non à Moncton. Ce qui veut dire que cette personne est obligée de louer une automobile à Charlot pour y faire ses affaires.

M. Portelance: Je vous remercie, monsieur Carbonneau.

Le président: Monsieur Blouin?

M. Blouin: Monsieur le président, évidemment, après avoir entendu les témoignages et étant moi-même allé très souvent aux Îles-de-la-Madeleine, et venant de la Côte Nord, je suis assez au courant des problèmes des

[*Interprétation*]

Mr. Carbonneau: No. In winter yes, in summer no.

Mr. Portelance: In summer they use their cars...

Mr. Carbonneau: Yes.

Mr. Portelance: The ferry.

Mr. Carbonneau: Yes.

Mr. Portelance: As far as P.E.I., and from P.E.I. you use another ferry to get to the continent.

Mr. Carbonneau: Yes.

Mr. Portelance: Do you know approximately how many travellers from the Magdalen Islands went last year towards Charlottetown?

Mr. Carbonneau: No, I could not give you that figure. The only thing I could tell you, is that last year there was an additional trip which was not announced. This enabled to carry 500 automobiles and 1,200 passengers more than the previous year, which had only four trips during the summer.

Mr. Portelance: Does it happen sometimes that people from the Magdalen Islands who would like to leave the Island on a given day, cannot get on board the ship?

Mr. Carbonneau: Certainly, either because there are too many automobiles on board and there is no room, or there are no reservations made, or it happens that the ship is supposed to arrive, say on Thursday, and arrives only on Friday. So, if it is an urgent matter, and a person wanted to go to the Maritimes with his automobile, he has to take the air service, but often the connections with trains, buses or the ordinary transportation services are almost non-existent, in some places because, at the present time, we can go to Charlottetown by air and not to Moncton. Which means that you then have to rent a car once you get to Charlottetown in order to carry out your business.

Mr. Portelance: Thank you, Mr. Carbonneau.

The Chairman: Mr. Blouin?

Mr. Blouin: Mr. Chairman, of course after having heard the testimony and having quite often gone to the Magdalen Islands myself, and coming from the North Shore, I am quite aware of the ferry service and maritime

[*Text*]

traversiers et du transport maritime. En tant que résidant des Îles-de-la-Madeleine, avez-vous des plans assez précis pour le service de traversier que vous voulez obtenir? Par exemple, le genre de traversir, le trafic passager, le trafic automobile, avez-vous fourni tous ces chiffres?

M. Carbonneau: Oui, ces chiffres...

M. Blouin: Au ministère des Transports?

M. Carbonneau: Oui, ces chiffres-là ont été fournis à la suite de l'étude qui a été faite par le BAEQ, Bureau de l'aménagement de l'Est du Québec; il y a eu un rapport spécial pour les Îles-de-la-Madeleine, parce que nous constituons une région à part entière. Nous ne sommes attachés ni aux Maritimes, ni à la province de Québec, c'est-à-dire que nous sommes attachés aux deux, mais pas plus à l'un qu'à l'autre. Nos contrats sociaux sont avec le Québec, notre commerce avec les Maritimes, donc nous sommes une région tout à fait à part de l'Est du Québec.

Dans la réorganisation du transport, toute l'étude a été faite, à peu près; nous n'avons pas fait un plan détaillé pour un traversier, mais nous avons donné tous les détails de ce que nous voulons pour un *roll-on roll-off*, que vous trouverez aux pages 172, 173, 174 et ainsi de suite.

M. Blouin: Alors, a-t-il été question d'un traversier à l'année longue. au rythme de tant par jour, tout cela a-t-il été indiqué?

M. Carbonneau: Oui, c'est-à-dire que nous voulons un traversier construit pour naviguer dans les eaux du golfe parce qu'il y a un peu de mer, un traversier dont la coque est renforcée pour voyager à travers les glaces. On a fait...

M. Blouin:. Vous avez nécessairement besoin d'un traversier, et quant à en avoir un, il devra pouvoir assurer le service à l'année longue.

M. Carbonneau: Oui.

M. Blouin: Il n'y a pas de période de gel et de dégel qui empêche le service? Alors, tout cela a été demandé?

M. Carbonneau: Oui.

M. Blouin: Alors, vous n'avez jamais eu de réponse définitive.

M. Carbonneau: Non, absolument pas.

M. Blouin: Il n'a jamais été question d'aucunes sortes de traversiers, de leurs dimen-

[*Interpretation*]

transportation problems. As a resident of the Magdalen Islands, do you have fairly concrete plans for the ferry service you want to obtain? For instance, the type of ferry, the passenger traffic, the automobile traffic, did you supply all these figures?

Mr. Carbonneau: Yes, these figures...

Mr. Blouin: To the Department of Transport?

Mr. Carbonneau: Yes, these figures were supplied following a study made by the B.A.E.Q. One report was devoted especially to the Magdalen Islands because they are a complete territory. We are not attached to the Maritimes or to the Province of Quebec. That is, we are attached to both but no more to one than to the other. Our social contacts are with Quebec and our business contacts with the Maritimes. Therefore, we are an area that is entirely distinct from Eastern Quebec.

In the re-organization of transportation—the entire study has more or less been completed—there is no detailed plan for a ferry but we did give all the specifications we would like to have for a roll-on roll-off service, which appear on pages 172, 173, 174 and so on.

Mr. Blouin: Was there any mention of a year round ferry operating at so many trips per day—was all this information supplied?

Mr. Carbonneau: Yes, that is to say that we want a ferry that is especially built for gulf service because the effects of the open sea are somewhat felt. A ferry which would be strengthened against ice. We have...

Mr. Blouin: Of necessity, you need a ferry, and if you are going to get a ferry you need one for year round service.

Mr. Carbonneau: Yes.

Mr. Blouin: There is no period of freezing and thawing which prevents the service from operating? So, you have asked for all this?

Mr. Carbonneau: Yes.

Mr. Blouin: And you never got a definite reply?

Mr. Carbonneau: Absolutely not.

Mr. Blouin: There was no question, at any time, of any kinds of a ferries, their dimen-

[*Texte*]

sions, de bateaux semi-brise-glace, comme traversiers, il n'a jamais été question de cela?

M. Carbonneau: M. Darling est venu aux Îles l'été dernier et il nous a donné verbalement les détails des exigences requises par la Commission selon lui. Par la lettre que j'ai lue tout à l'heure, nous avons demandé qu'il nous confirme par écrit ce qu'il nous avait dit verbalement. La réponse n'est jamais venue.

M. Blouin: Je comprends. Alors, c'est à peu près tout. Il y avait bien d'autres questions, mais je les ai entendues tout à l'heure, elles ont été posées avant moi. Je vous remercie, monsieur le président.

Le président: Monsieur Godin.

M. Godin: Monsieur Carbonneau, quel est le prix d'un billet d'avion entre les Îles et Montréal?

M. Carbonneau: $56.

M. Godin: Maintenant, supposons que j'ai une automobile qui date de dix ans, par exemple et qui n'est pas trop, trop bien entretenue; les compagnies d'assurances peuvent refuser de me protéger et en même temps, l'Office de la sécurité routière va exiger également que je la retire de la circulation.

Dans le même ordre d'idées, y a-t-il des règlements maritimes qui pourraient exiger de mettre au rancart votre navire «*Nord-Gaspé*» qui, à mon sens, est un danger public? Maintenant, en résumé, à partir de quel moment peut-on faire condamner un navire et dans quelle condition doit-il être pour cela?

M. Carbonneau: Personnellement, je présume qu'un navire, qui n'a pas été construit pour le transport de passagers, mais qui le fait quand même, je présume qu'après trente ans au maximum, il devrait être retiré de la circulation tant pour les passagers que pour les voitures. Parce que vous dites, si vous avez une vieille voiture, mais, par contre, si vous avez une voiture neuve, puis qu'en voulant la monter à bord du bateau, elle tombe sur le quai, la seule compensation que vous en retirerez de la part de la compagnie de transport, c'est $500, même si les dommages à votre voiture s'élèvent à $2,000.

Donc, au bout de trente ans, je présume qu'on devrait absolument retirer un bateau du genre de la circulation, du moins en ce qui a trait aux passagers; quant au cargo, il n'y a pas de problème.

M. Godin: Votre navire peut transporter combien d'autos?

[*Interprétation*]

sions, of having semi-icebreakers as ferries, there was never any question of this?

Mr. Carbonneau: Mr. Darling came to the Magdalen Islands last year and gave us verbally the specifications which he thought the Canadian Maritime Commission was going to request. In the letter I read a little while ago we asked that he put in writing what he had told us orally, but we never got the answer.

Mr. Blouin: I understand. That is about all. There were a great many other questions but I heard them a little while ago. Thank you, Mr. Chairman.

The Chairman: Mr. Godin?

Mr. Godin: Mr. Carbonneau, what is the cost of an aircraft ticket from the Magdalen Islands to Montreal?

Mr. Carbonneau: $56.

Mr. Godin: Now, let us say that I have an automobile that is, let's say, ten years old and is not in too good shape: the insurance companies may refuse to provide any protection for me and at the same time Highway Safety will also require that I get my car off the highways.

Following this same line of thought, are there any maritime regulations which might perhaps force the North Gaspé, which I consider to be a threat to public safety, to be withdrawn from service? At what age can we have a ship condemned and in what condition must it be?

Mr. Carbonneau: Personally, I would assume that any ship which was not designed for passenger service and which does carry passengers, I would presume that after 30 years at a maximum, it should be withdrawn from service, for both passenger service and for automobiles. Because you say "if you have an old automobile", but if on the other hand you have a new car, and in trying to get it on the ship it falls onto the dock, the only insurance you will get is $500 from the transportation company even if your damage amounts to $2,000.

Consequently, at the end of 30 years, I think that we should withdraw a ship of this type from circulation, at least for passengers; as far as cargo is concerned, there is no problem.

Mr. Godin: How many cars can your ship carry?

[*Text*]

M. Carbonneau: Présentement, c'est vingt-deux, c'est-à-dire le premier ne pourrait en transporter que douze, treize. On a apporté différentes améliorations au bateau et c'est ce qui coûte énormément cher à la Commission maritime, les réparations qui sont faites sur ce vieux bateau-là.

M. Godin: Maintenant, étant donné que les autos sont montées à bord du navire par palan, combien de temps est requis pour monter vingt-deux autos et les descendre?

M. Carbonneau:. Vingt-deux autos, cela demande au moins trois heures?

M. Godin: Trois heures?

M. Carbonneau: Oui.

M. Crossman: Excusez. Pour le débarquement puis le...

M. Carbonneau: Trois heures pour le chargement et trois heures pour le déchargement des voitures seulement.

M. Crossman: Si tout va bien.

M. Carbonneau: Oui, oui, s'il n'y a pas de voiture qui pourrait être de travers.

M. Crossman: Comment les monte-t-on à bord?

M. Carbonneau: Avec un palan. On prend la voiture, on la monte, on la fait venir à un point donné et on la descend.

M. Godin: Cela veut dire que lorsque vous venez de Montréal, en auto, vous pouvez attendre six heures sur le quai pour monter à bord du navire, puis une fois rendu chez vous, vous pouvez attendre encore trois heures avant d'avoir votre voiture.

M. Carbonneau: Certainement. Le type qui arrive aux Îles-de-la-Madeleine, s'en va à la maison où il veut aller, on décharge sa voiture quand on le peut, puis il va la chercher après.

M. Godin: A $2 de l'heure, cela augmente encore le prix de votre billet.

M. Carbonneau: Oui.

Le président: Monsieur Béchard.

M. Béchard: Monsieur le président, je voudrais faire de brefs commentaires. M. Breau, tantôt, a paru surpris lorsque M. Carbonneau lui a dit qu'il y avait une piste qui n'était pas éclairée à l'aéroport de Havre-aux-Maisons. C'est vrai, mais il faut dire qu'à la suite de l'inauguration du nouveau service de EPA au

[*Interpretation*]

Mr. Carbonneau: At the present time, it is 22. That is to say that the first one could only carry 12 or 13. There were several improvements made to the ship and this is what costs so much to the Canadian Maritime Commission, i.e. all the repairs made to this old ship.

Mr. Godin: How long does it take now to load and unload 22 automobiles with a pulley-block?

Mr. Carbonneau: At least 3 hours for 22 cars.

Mr. Godin: Three hours?

Mr. Carbonneau: Yes.

Mr. Crossman: Excuse me. To unload and...

Mr. Carbonneau: 3 hours to load and 3 hours to unload automobiles only.

Mr. Crossman: This is provided all goes well.

Mr. Carbonneau: Yes, if no car gets in the way.

Mr. Crossman: How are they loaded on board?

Mr. Carbonneau: They use a pulley-block. we take the car, load it, bring it to a given place, and unload it.

Mr. Godin: Which means that when you come to Montreal by automobile, you could wait six hours on the dock in order to get on board and another three hours before you get your car on arrival.

Mr. Carbonneau: Yes, the person coming to the Magdalen Islands goes home or wherever he wants to go, meanwhile his car is unloaded when possible, he goes and gets it later on.

Mr. Godin: At $2 an hour, that increases the cost of your ticket again.

Mr. Carbonneau: Yes.

The Chairman: Mr. Béchard.

Mr. Béchard: Mr. Chairman, I would like to make some brief comments. Mr. Breau was surprised a little while ago when Mr. Carbonneau said that there was an unlighted landing strip at the Havre-aux-Maisons airport. It is true, but we must say that following the inauguration of new EPA service in October,

[*Texte*]

mois d'octobre, il y a un avion qui arrive aux Îles-de-la-Madeleine le soir. Alors, c'est là qu'on a besoin d'avoir une piste éclairée.

L'autre service se fait de jour. Il y en a une qui est éclairée, mais si on arrive, à cause du vent, dans l'autre sens, on doit se servir de l'autre piste, à cause de cela. Mais le ministère en a été informé et j'espère qu'elle sera éclairée avant longtemps.

Maintenant, monsieur Carbonneau, une dernière question. Êtes-vous au courant qu'il y aurait un bateau de disponible pour répondre aux désirs de la population des Îles-de-la-Madeleine, exprimés devant les gens de la Commission des Transports, M. Darling, etc., l'été dernier, en attendant la construction du bateau ou l'entrée en service du bateau *Roll on Roll off*, que la population veut un service immédiatement, d'ici à ce que ce nouveau bateau soit en opération?

Êtes-vous au courant qu'il y aurait un bateau ou deux de disponibles actuellement et prêts à faire le service entre Souris et les Îles-de-la-Madeleine, et qui serait un bateau, disons, semi *Roll on Roll off* ou *Roll on Roll off*?

M. Carbonneau: Oui, je sais qu'il y a un bateau et, même, il en a été question aux Îles-de-la-Madeleine. La population s'est réjouie un peu tôt, je pense, mais il a été question d'un bateau qui aurait fait le service aux Îles-de-la-Madeleine. Je pense que la question a été soulevée; un des bateaux de *Clarke Steamship*, qui fait le voyage quelque part sur la Côte Nord, était censé être mis au rancart par les autorités. Donc, on aurait pris le «*North Gaspé*» pour faire le transport de marchandises sur la Côte Nord et on aurait pris un nouveau bateau, je pense que son nom c'est «Le Comeau», qui serait disponible présentement et on l'aurait mis sur la ligne des Îles-de-la-Madeleine. Ça nous aurait contentés, mais, encore une fois, on a frappé dans l'air.

M. Béchard: Est-ce qu'on ne pourrait pas, à ce moment-ci, faire des représentations auprès de *Clarke Steamship* ou de *Magdalen Island Transportation* pour qu'ils se portent acquéreurs de quelque façon que ce soit ou louent ce bateau pour faire le service cette année, car on sait qu'ils ont un nouveau contrat pour un an?

M. Carbonneau: Oui, on pourrait toujours le faire, mais je suis convaincu que *Clarke Steamship* ou *Magdalen Island Transportation* ne le feront pas, parce qu'ils vont avoir leur bateau, «*North Gaspé*», qui alors, ne fera

[*Interprétation*]

a flight arrives in the Magdalen Islands in the evening. That is why we need a runway that is lighted. The other flight arrives in the daytime. There is one runway lighted, but if because of wind conditions an approach has to be made from the other direction, you have to take the other runway because of this. The Department has been told, however, and I hope it will be lighted before long.

Now I will ask Mr. Carbonneau my last question. Are you aware that there will be a vessel available to meet the wishes of the people of the Magdalen Islands as expressed before the Canadian Transport Commission, Mr. Darling, and so on, last summer, while awaiting construction or the entry into service of the Roll on Roll off ferry, and that the people want service immediately while awaiting the operation of the new ship?

Do you know whether there would be one or two ships available at the present time which would be ready to ensure service between Souris and the Magdalen Islands, and that would be a semi Roll on Roll off, or a completely Roll on Roll off ferry?

Mr. Carbonneau: Yes, I do know that there is one ship and there was even some talk in the Magdalen Islands about it. The people rejoiced a little bit too early, I think, but there was some mention of a vessel which would have ensured the service to the Magdalen Islands. I think that the question was raised. It is one of the ships of the Clarke Steamship Company which travels at the present time somewhere on the North Shore and was supposed to be set aside by the authorities. Therefore, the North Gaspé would then have been taken for freight service on the North Shore and we would have had a new vessel, I think its name was the Comeau, which would be available and it would have been put on the Magdalen Islands line. We would have been satisfied with this, but once again, all was in vain.

Mr. Béchard: Could we not make representations now to the Clarke Steamship Company, or the Magdalen Island Transportation so that they would acquire or rent this vessel in order to ensure service this year, because we know that they have a new one-year contract?

Mr. Carbonneau: Yes, of course we could. But I am convinced that Clarke Steamship Company or Magdalen Islands Transportation will not do it because they are going to have their own ship, the North Gaspé, which

[*Text*]

rien. Et puis ce ne sont pas des types intéressés à perdre de l'argent.

M. Béchard: Je vais vous poser une dernière question, monsieur. Il n'y a là aucune malice et je ne voudrais pas que la compagnie le prenne comme ça, mais n'êtes-vous pas sous l'impression que *Clarke Steamship* ou *Magdalen Island Transportation* feraient certaines pressions pour retarder l'inauguration du transbordeur que vous voulez?

M. Carbonneau: Je n'irais pas jusqu'à dire qu'ils font des pressions pour retarder quoi que ce soit, mais une chose est certaine, tant qu'ils ne pourront pas trouver une place pour leur «*North Gaspé*», ils ne sont nullement intéressés à nous donner un nouveau service, nullement, et ils doivent sûrement faire des pressions assez fortes. Écoutez, il n'y a pas eu de demande de subventions de faite par la Commission maritime depuis 1961-1962, je pense, donc, il y a quelqu'un qui pousse quelque part. Ce n'est pas nous autres, certain; pas dans cette direction-là.

M. Béchard: Merci.

M. Blouin: Une question supplémentaire, monsieur le président.

Le président: Monsieur Blouin?

M. Blouin: Est-ce que, advenant le cas où des arrangements seraient faits et puis qu'un traversier comme «Le Comeau», que je connais très bien, serait mis en service aux Îles-de-la-Madeleine, il faut nécessairement, je pense, des installations portuaires. Il ne sert à rien de parler de traversier s'il n'y a pas de quais proprement aménagés à cet effet et cela s'applique des deux côtés. Il ne sert à rien de parler de traversier s'il n'y a pas les installations portuaires d'un côté comme de l'autre. Alors, est-ce que cela a été prévu? Est-ce qu'il y a quelque chose de fait?

M. Carbonneau: D'après le rapport que MM. Darling, DeVos et Balfrey ont préparé «Le Comeau», à ma connaissance, est un *Roll on Roll off* par l'arrière.

M. Blouin: Oui, oui.

M. Carbonneau: Dans la présente étude, il a tenté d'estimer le coût du service, du terminus.

M. Blouin: Terminus, c'est ça

M. Carbonneau: *End loading* ou *Side loading*. «End loading», environ $75,000 à chaque station; on a deux stations, ce qui veut dire $150,000. Maintenant, c'est en 1965; les prix ont augmenté, les taxes ont augmenté, ce

[*Interpretation*]

would then not be doing anything. Furthermore, they are not interested in losing money.

Mr. Béchard: I would like to ask a last question. It is done without malice, and I would not want the company to think otherwise, but you do not think the Clarke Steamship Company or Magdalen Islands Transportation might exert some pressure in order to delay the inauguration of the ferry service you want?

Mr. Carbonneau: I would not go so far as to say they are exerting any pressure to have anything delayed, but one thing is sure, that is, so long as they cannot find a place for the North Gaspé they certainly are in no way interested in giving us a new service—in no way at all—and they must certainly be exerting rather strong pressure. here have been no requests for subsidies made by the Maritime Commission since 1961-62, I believe, so someone is certainly pushing somewhere—not us, not in that direction at any rate.

Mr. Béchard: Thank you.

Mr. Blouin: A supplementary question, Mr. Chairman.

The Chairman: Mr. Blouin?

Mr. Blouin: In the event that there would be arrangements made and that a ferry like the Comeau, which I know very well, would enter into service for the Magdalen Islands, necessarily, I think you would have to have port installations. There is no sense in talking of a ferry unless you have docks suitably equipped for the ferry and, of course, this applies to both sides. There is no sense in speaking of a ferry unless there are harbour facilities on the one side as on the other. Has this been provided for? Has something been done about this?

Mr. Carbonneau: According to the report which Messrs. DeVos, Balfrey and Darling prepared, the Comeau to my knowledge, is a Roll on Roll off service from the rear.

Mr. Blouin: Yes.

Mr. Carbonneau: In the present study, they tried to estimate the cost of the service, of the terminal.

Mr. Blouin: That's right, the terminal.

Mr. Carbonneau: End loading or side loading, would amount to approximately $75,000 at each station, which means $150,000. That was in 1965, and of course, prices have gone up, taxes have gone up, it will be more ex-

[*Texte*]

sera plus cher, mais autour de $200,000. Ce n'est pas énorme.

M. Blouin: Ce n'est pas exorbitant.

M. Carbonneau: Ce serait facile à faire. On pourrait le faire immédiatement pour cet été. Ce serait faisable pour cet été, si on veut.

M. Blouin: Alors, c'est cela que je voulais savoir, monsiur le président, par ma question supplémentaire

Le président: Y a-t-il d'autres questions Monsieur Portelance?

M. Portelance: Avant de terminer, j'aimerais que ces messieurs qui viennent des Îles-de-la-Madeleine nous fassent savoir combien ça leur a coûté de venir ici pour faire leur présentation, à eux personnellement ou si quelqu'un défraie les dépenses de leur voyage?

M. Carbonneau: C'est défrayé, pour ma part, par la Chambre de Commerce, par M. Miousse, par le Conseil de développement du territoire des Îles-de-la-Madeleine, pour M. Lapierre par le Conseil de Comté des Îles, qui est notre agent d'une façon ou d'une autre, ça nous coûte environ $300 chacun: hôtel, transport et ainsi de suite.

M. Portelance: Merci.

M. Béchard: Monsieur Lapierre, combien de voyages par semaine le «*North Gaspé*», fait-il actuellement? Pas actuellement, parce qu'il ne voyage pas encore, mais ordinairement?

M. Lapierre: A Grande-Entrée?

M. Béchard: A Grande-Entrée, qui est une des extrémités des Îles-de-la-Madeleine.

M. Edmond Lapierre (membre de la Chambre de Commerce et délégué du Conseil du Comté des Îles): A Grande-Entrée, le «*North Gaspé*», fait un voyage par semaine.

The Chairman: Are there any further questions? Mr. Turner?

Mr. Turner (London East): Mr. Carbonneau, who owns Clarke Steamship Lines Company Limited? Is it a subsidiary of some other big company or is it strictly a private company?

Mr. Carbonneau: I think it is a private company.

[*Interprétation*]

pensive, and now it would probably be around $200,000. It is not a tremendous amount really.

Mr. Blouin: No, it is not exorbitant.

Mr. Carbonneau: It could be done easily. It could be done right away for this summer. It would be feasible for this summer, if they want to do it.

Mr. Blouin: That is what I wanted to know with regard to my supplementary question, Mr. Chairman.

The Chairman: Are there any other questions? Mr. Portelance?

Mr. Portelance: Before concluding, I would like to have these people from the Magdalen Islands tell us how much it cost them, personally, to come here and make their representation, or whether someone is paying for their travelling expenses?

Mr. Carbonneau: My own expenses are paid for by the Chamber of Commerce, those of Mr. Miousse by the Development Board of the Magdalen Islands Territory, those of Mr. Lapierre by the Islands County Council which is our agent. At any rate, it is costing us $300 each for hotel, transportation costs and so on.

Mr. Portelance: Thank you.

Mr. Béchard: Mr. Lapierre, how many trips a week does the North Gaspé make at the present time? Not right now, because it is not travelling, but ordinarily?

Mr. Lapierre: To Grande-Entrée?

M. Béchard: To Grande-Entrée, which is one of the extremeties of the Magdalen Islands.

Mr. Edmond Lapierre (Member, Chamber of Commerce, and delegate from the County Council, Îles-de-la-Madeleine): The «*North Gaspé*» makes one trip per week to Grande Entrée.

Le président: Y a-t-il d'autres questions? Monsieur Turner?

M. Turner (London-Est): Monsieur Carbonneau, qui est propriétaire de la *Clarke Steamship Lines Company Limited?* Est-ce une filiale d'une autre grande compagnie, ou est-ce strictement une compagnie privée?

M. Carbonneau: Je pense que c'est une compagnie privée.

[*Text*]

Le propriétaire est Clarke. Maintenant, je ne sais pas si on veut rendre un service à M. Clarke, pour ses états de service au pays pendant la guerre, mais je pense qu'il serait temps qu'on arrête de payer M. Clarke pour les services rendus à cette époque, il y a vingt-cinq ans.

Mr. Turner (London East): Thank you.

Le président: S'il n'y a pas d'autres questions, messieurs, je tiens à vous remercier, messieurs de la délégation des Îles-de-la-Madeleine de votre très bon exposé et de la façon dont vous avez répondu aux questions.

Mr. Béchard: Mr. Chairman, I wish you would make a strong report in favour of a transportation...

The Chairman: You are out of order, Mr. Bechard.

Mr. Skoberg: Mr. Chairman, before calling the CNR representatives I would like to raise a very short point of order on the procedure of our Committee the other night and the method in which it was reported back to the House. I believe it is most important that we have this cleared up before we call the CNR witnesses today.

It was my understanding when you reported back to the House yesterday that you would move that report. That report was not moved and it was my impression that the last motion that was made at our meeting the previous evening was made to move the report in the House, and I am wondering whether or not that motion may be in the minutes and that we could have that motion read back.

I realize, of course, that the MFRA rates are looked after by the new bill coming in but I believe this may have some bearing.

The Chairman: I do not think that will change anything at all, Mr. Skoberg.

Mr. Skoberg: It could possibly have a bearing in regard to the passenger service in Newfoundland.

The Chairman: Yes, but this is still an interim report. I believe if you change your view it might close the door to making a final report at the end.

Mr. Skoberg: The motion was supposed to be that the interim report be moved in the House, and this is where we ran into a problem one other time, Mr. Chairman. I believe it should be clarified at this particular time. We realize it was tabled, but...

[*Interpretation*]

The owner is Clarke Steamships. Now, I do not know whether a favour is being done to Mr. Clarke for services rendered by him to the country during the war, but I think it is about time we stopped paying Mr. Clarke for services rendered during the war, 25 years ago.

M. Turner (London-Est): Merci.

The Chairman: If there are no other questions, gentlemen, I would like to thank the delegation from the Magdalen Islands for their excellent brief and for the way in which they have replied to the questions.

M. Béchard: Monsieur le président, j'aimerais que vous appuyiez fermement, dans le rapport...

Le président: Vos propos sont irrecevables, monsieur Béchard.

M. Skoberg: Monsieur le président, avant de convoquer les représentants du National-Canadien, j'aimerais soulever brièvement la question du règlement, quant à la procédure suivie par le comité l'autre soir et la manière que le rapport a été présenté à la Chambre. Il importe au plus haut point d'élucider cette question avant d'appeler les témoins du National-Canadien aujourd'hui.

Lorsque vous avez fait rapport à la Chambre hier, je croyais que vous proposeriez l'adoption du rapport, ce qui n'a pas été fait. J'avais l'impression que la dernière motion faite la veille au soir, visait à proposer l'adoption de ce rapport à la Chambre. Alors, je me demande si cette motion figure au compte rendu; en ce cas, on pourrait l'y retrouver.

Je me rends compte, bien entendu, qu'il est question de ce tarif-marchandises dans le nouveau projet de loi, mais je crois que la chose a quelque importance.

Le président: Cela ne changerait rien, je pense, monsieur Skoberg.

M. Skoberg: Peut-être pour le service-voyageurs à Terre-Neuve, oui.

Le président: Ce n'est qu'un rapport provisoire. Je pense que si vous voulez changer d'avis, cela pourrait nous empêcher de présenter un rapport définitif.

M. Skoberg: La motion tendait censément à proposer l'adoption du rapport provisoire à la Chambre; or, c'est là un problème qui s'est déjà présenté, monsieur le président. Je pense qu'il nous faudrait préciser maintenant ce qu'il en est. Le rapport a été déposé, mais...

[*Texte*]

An hon. Member: It was tabled but it was not read.

Mr. Skoberg: It was not moved.

An hon. Member: The report was tabled yesterday but it was not read and there was no motion. I think this is what Mr. Skoberg is getting at. Is that not right?

Mr. Skoberg: Yes, there was no motion.

Mr. Breau: On this point, Mr. Chairman, I did not understand that we are to move every interim report that we make. It was moved and, as I understand it, one the final report is made it would be concurred in.

The Chairman: The motion was made and the Chairman was authorized to report it to the House, and this was agreed to by everyone.

Mr. Skoberg: Yes! There is no argument on the reporting to the House, but I believe it was fully understood by the Committee that it was an interim report. We ran into the situation not too many weeks ago where the report was not moved in the House, and I am sure we do not want to run into this particular phase of the problem again.

The Chairman: No, you will not run into that again, Mr. Skoberg.

Mr. Skoberg: This is why at the end of it, when it was said that it be moved in the House, that report should have been moved and as such it would then have become the property of the House and not the Cabinet. This way the report has just been tabled one again and it has no weight whatsoever.

Mr. McGrath: Just to supplement this, Mr. Chairman, it seems to me when a report is tabled in the House that it is customary for the Chairman to say that he will move concurrence later this day—this is my understanding of it, and you correct me if I am wrong—and the report is read and then under motions the Chairman moves concurrence of the report.

• 1045

Mr. Skoberg: Do you not have the motion in writing, Mr. Chairman, that we made the other night?

The Chairman: I do not have it here, Mr. Skoberg. Would you leave this until the end of the meeting and then we will get together on that.

Mr. Skoberg: Possibly we could look at it this afternoon, Mr. Chairman.

[*Interprétation*]

Une voix: . . . on ne l'a pas lu.

M. Skoberg: On n'en a pas proposé l'adoption.

Une voix: Le rapport a été déposé hier, mais on n'en a pas fait lecture ni proposé l'adoption. Voilà où monsieur Skoberg veut en venir, n'est-ce pas?

M. Skoberg: Oui, il n'y a pas eu de motion.

M. Breau: Monsieur le président, je croyais que nous n'avons pas nécessairement à proposer l'adoption de nos rapports provisoires. Ce n'est qu'une fois présenté que le rapport définitif serait agréé.

Le président: En fait, la motion adoptée l'autre soir à l'unanimité autorisait le président à faire rapport à la Chambre.

M. Skoberg: La question n'est pas là; je pense que tout le monde a compris qu'il s'agissait d'un rapport provisoire. Il y a quelques semaines, l'un de nos rapports n'a pas été adopté à la Chambre, et personne ne voudrait que l'histoire se répète, je pense.

Le président: Cette fois-ci, aucun problème, monsieur Skoberg.

M. Skoberg: Justement, vu qu'il était dit, à la fin de la motion, de proposer l'adoption du rapport, on aurait dû le faire; ainsi, ce rapport appartiendrait à la Chambre, non au cabinet. Un rapport qui est tout simplement déposé n'a aucun poids.

M. McGrath: A ce propos, monsieur le président, lorsqu'un rapport est déposé à la Chambre, il est d'usage courant que le président déclare qu'il en proposera l'adoption au cours de la journée. Veuillez me corriger, si je me trompe. Ensuite, le rapport est lu, puis le président en propose l'adoption à la période des motions.

M. Skoberg: Monsieur le président, n'auriez-vous pas le texte de la motion de l'autre soir?

Le président: Non, monsieur Skoberg. Avec votre assentiment, nous y reviendrons à la fin de la réunion.

M. Skoberg: Cet après-midi peut-être, monsieur le président.

[*Text*]

Mr. McCleave: I would like to raise another point before the witnesses are called, and I will be very brief. May I suggest that the steering committee consider whether the earlier witnesses whom we have heard, and who have come here at some considerable expense to their organizations, should not be paid some compensation, even part payment of their costs. I make this suggestion because the Transport Committee did not schedule a visit to the Magdalen Islands, as I understand it, although I was not a member of the Committee at that time, when it went to the Maritime Provinces.

However, some very real problems have been presented to us this morning from an important area, and as we could not get to them—it would have involved a great deal of expense on our part—perhaps in some way we could make it up to these people because they have obligingly come to us. I do not make this as a motion, I just wonder if it is the consensus of the Committee that this be studied by the steering committee and perhaps a recommendation brought back.

Mr. McGrath: Mr. Chairman, just to help the Committee in this regard, a short time ago the Regional Development Committee heard two witnesses from Bell Island and there was a motion made in the Committee that they be reimbursed for reasonable expenses and it was unanimously adopted, which I think is a precedent in this regard. I think Mr. McCleave's suggestion is a very good one and I commend it to the Committee.

The Chairman: The Clark is making a note of that and you may rest assured we will discuss that in the steering committee, Mr. McCleave.

Mr. McCleave: Thank you.

The Chairman: I will now call upon the CNR people to come forward. As you know, it was proposed that the questioning this morning would be on the Maritime trip only. I think all the members understand this.

I have on my right Mr. R. T. Vaughan, Q.C., Vice-President and Secretary; Mr. J. W. G. Macdougall, Q.C., Vice-President of the Atlantic Region; Mr. J. M. Duncan, Assistant General Counsel from Montreal, I think everyone knows him, and Mr. I. W. Mitchell, Manager, Special Projects, from Moncton.

Mr. R. T. Vaughan, Q.C., (Vice-President and Secretary, Canadian National Railways): Thank you, Mr. Chairman, and good morn-

[*Interpretation*]

M. McCleave: Permettez-moi de soulever une autre question avant l'arrivée des témoins, je serai bref. A l'égard des témoins que nous avons entendus plus tôt et dont la venue a entraîné des frais très élevés pour les organisations qu'ils représentent, je propose que le comité de direction envisage la possibilité de rembourser une partie de leurs frais. La raison en est que le comité des transports, sauf erreur, n'avait pas prévu de se rendre aux Îles-de-la-Madeleine (je ne faisais pas partie du Comité lorsque l'itinéraire a été établi) lors de sa tournée dans les Maritimes.

Or, ce matin, on nous a mis au courant des problèmes nullement imaginaires dans une importante région du pays; étant donné que nous ne sommes pas allés la visiter, vu les fortes dépenses qu'un tel voyage aurait occasionnées, est-ce qu'on ne pourrait pas compenser ces gens qui ont eu l'obligeance de venir ici? Ce n'est pas une motion que je fais maintenant, mais je me demande si le comité serait d'accord pour que le comité de direction étudie la question en vue de recommander une telle mesure.

M. McGrath: Monsieur le président, par la gouverne du comité, il y a quelque temps, le Comité de l'expansion économique régionale a entendu deux témoins de l'île Bell. Or, on a subséquemment présenté une motion, d'ailleurs adoptée à l'unanimité, à rembourser les témoins dans une proportion raisonnable. Voilà qui me semble un bon précédent. Je pense donc que la proposition de M. McCleave est excellente, et je la recommande au comité.

Le président: Je demanderai au secrétaire d'en prendre avis. Soyez assuré, monsieur McCleave, que nous en discuterons lors de la réunion du comité de direction.

M. McCleave: Je vous remercie.

Le président: Je vais maintenant convoquer les représentants du National-Canadien. Comme vous le savez, il a été convenu ce matin que les questions porteraient uniquement sur notre tournée des Maritimes.

Je vous présente les témoins: à ma droite, M. R. T. Vaughan, C.R., vice-président et secrétaire, M. J. W. G. Macdougall, R.C., vice-président de la région de l'Atlantique, M. J. M. Duncan, conseiller général adjoint, Montréalais que tous les membres connaissent, je crois, et M. I. W. Mitchell, directeur d'études spéciales, de Moncton.

M. R. T. Vaughan (C.R., vice-président et secrétaire, Chemins de fer nationaux du Canada): Merci beaucoup, monsieur le prési-

[*Texte*]

ing, gentlemen. We of the CNR thank you for your invitation to appear before you this morning. As we said last year when this Committee began its deliberations on matters affecting transportation in the Maritimes and the Atlantic Provinces, the Canadian National is most interested in the work of the Committee and that it would endeavour to assist this Committee in arriving at some constructive proposals that might bring about the further growth and development of the Atlantic area, which is an area we are greatly interested in.

As the Chairman has indicated, we have with us today Mr. Duncan and Mr. Mitchell, with whom you are familiar. They travelled with your Committee during its various visits to the points in the Atlantic Provinces. Mr. Macdougall on my right is the Vice-President of the Atlantic Region. I am a native Maritimer and have great affection for that area of the world.

Mr. Chairman, in the interests of assisting the Committee we have prepared sort of a short summary, which I will ask be given to the Clerk. Perhaps we could deal with that first. We also have some other notes that we could file with the Committee—we do not intend to read them—which really fill out the summary that you will receive in a moment. If it is agreeable to have these summaries passed around, Mr. Chairman, we will speak to that now.

The Chairman: That is fine.

Mr. Vaughan: We intend to pass out this summary, and if it is agreeable to the Committee perhaps we could speak to the summary.

The Chairman: Is that agreeable?

Some hon. Members: Agreed.

• 1050

Mr. Vaughan: Mr. Chairman, the copies are in English and French and the Clerk is endeavouring to pass those around.

As a transportation company which has been observing for quite a while the various matters and representations that have been made concerning problems in the Atlantic area, what we tried to do here is to give you a summary of our observations on these. I shall ask Mr. Macdougall, the Atlantic region Vice-President, to speak to the summary and after that we will take whatever questions you have.

[*Interprétation*]

dent. Au nom du National-Canadien, je vous remercie de nous avoir invités à comparaître ce matin. Comme nous l'avons dit l'année dernière, lorsque votre comité a entamé ses délibérations sur les transports dans les Maritimes et les provinces de l'Atlantique, le Nationnal-Canadien s'intéresse beaucoup à vos travaux; aussi s'efforce-til de vous aider à formuler des propositions concrètes en vue de favoriser la croissance et le développement de la région de l'Atlantique, à laquelle il porte grand intérêt.

Comme le président vous l'a dit, nous avons avec nous aujourd'hui MM. Duncan et Mitchell, que vous connaissez bien, étant donné qu'ils vous ont accompagnés dans votre tournée des provinces de l'Atlantique. M. Macdougall, à ma droite, est vice-président de la région de l'Atlantique. Je suis, moi-même, natif des Maritimes, pour lesquelles j'éprouve beaucoup d'affection.

Monsieur le président, pour la gouverne du comité, nous avons préparé un bref résumé qui sera remis au secrétaire. Peut-être pourrions-nous en discuter d'abord. Nous avons aussi des notes que nous pourrons remettre au comité. Nous n'avons pas l'intention d'en faire lecture, mais elles complètent le résumé que nous vous distribuerons dans un instant, avec votre permission, monsieur le président.

Le président: D'accord.

M. Vaughan: Donc, nous allons distribuer le résumé et si le comité en convient, nous pourrons ensuite l'exposer.

Le président: Entendu?

Des voix: Entendu.

M. Vaughan: Monsieur le président, nous avons des copies en français et en anglais, et le secrétaire du Comité est en train de les distribuer.

En tant que société de transport qui pendant un certain temps a déjà observé les différentes questions et instances qui ont été formulées à l'égard des problèmes de la région de l'Atlantique, nous essayerons de vous donner un résumé de nos constatations là-dessus.

Je demanderais donc à M. Macdougall, vice-président de la région de l'Atlantique, d'en faire un résumé après quoi nous répondrons volontiers à vos questions.

[*Text*]

The Chairman: That is fine.

Mr. J. W. G. Macdougall, Q.C., (Vice-President, Atlantic Region, Canadian National Railways): Thank you very much, Mr. Chairman and good morning, gentlemen. As Mr. Vaughan says, we are delighted to be here and if we can shed any light on matters in which we are all mutually interested we will be well rewarded.

I might just first mention that in thinking of what we might say to the Committee we thought you would be more interested in our views on Atlantic transportation since really it is within your terms of reference to look at the Atlantic transportation problems and the Atlantic economy to see what constructive suggestions might be made to improve it.

Therefore, we have approached our coming here in that light and we have been working and thinking about this for many months. Probably it is a constant endeavour down there, because really the lifeblood of our organization is to think in those terms and to endeavour not only to operate what we are presently operating, but to look at the future and the problems that we face, many of which are well known, to see what we can do about them and how we can improve them.

This little summary really gives our views in general and we would be glad to expand on any one of them. Perhaps as a start I might just run through the summary and make some comments and then if you have any further questions, or questions on other matters, we will only be too happy to deal with them.

As you know, the Economic Council of Canada, the Maritime organization known as APEC, and many other institutions and organizations interested in dealing with the general welfare and economic growth of Atlantic Canada have been thinking of these problems over the past few years.

We first want to say that we agree with the Economic Council of Canada's assessment and also that of APEC, that if we are going to have good economic growth in the Atlantic area we have to endeavour to put some of our eggs in one basket and try to develop economic growth centres in Atlantic Canada which will be able to act as pivot points for our economic development.

We think that is right. It fits into the transportation pattern because we have to think in terms of whether we are going to have to give service to a myriad of small points on a

[*Interpretation*]

Le président: C'est très bien.

M. J. W. G. Macdougall (vice-président, National-Canadien, région de l'Atlantique): Merci beaucoup messieurs. Comme l'a dit M. Vaughan, nous sommes heureux d'être ici et serons bien satisfaits si nous parvenons à faire la lumière sur des questions qui nous intéressent mutuellement.

Tout d'abord, permettez-moi de vous dire que nous avons pensé que vous seriez plus intéressés à connaître notre point de vue sur le transport dans la région de l'Atlantique puisque c'est là votre mandat qui consiste à considérer les problèmes du transport ainsi que l'économie dans la région de l'Atlantique pour voir quelles propositions constructives peuvent être faites pour améliorer la situation.

Par conséquent, c'est dans ce sens que se sont dirigés nos efforts pendant ces derniers mois. Il s'agit là-bas d'un effort soutenu car l'âme de notre entreprise constitue vraiment à y songer en ces termes et d'essayer non seulement d'exploiter ce que nous possédons, mais de nous tourner vers l'avenir et vers les problèmes que nous affrontons dont plusieurs sont très bien connus pour voir ce que nous pouvons faire pour les résoudre. Ce bref résumé expose vraiment notre point de vue en général et nous nous ferons un plaisir de nous étendre là-dessus. Pour commencer je devrais peut-être parcourir le résumé, faire quelques commentaires, puis si vous avez des questions à poser sur ce sujet ou sur d'autres questions nous en discuterons volontiers.

Comme vous le savez, le Conseil économique du Canada, le Conseil économique des provinces de l'Atlantique—organisme des Maritimes, ainsi que plusieurs autres institutions qui s'intéressent au développement économique et au bien-être général des provinces de l'Atlantique ont envisagé ces problèmes au cours des dernières années.

Tout d'abord nous voulons exprimer notre accord avec l'opinion du Conseil économique du Canada et celle du Conseil économique des provinces de l'Atlantique que si nous voulons parvenir à une bonne croissance économique dans la région de l'Atlantique, il nous faut essayer de mettre nos œufs dans un même panier et essayer d'établir des centres de croissance dans les régions de l'Atlantique qui seront en mesure d'agir en tant que pivots pour notre développement économique. Nous pensons que c'est juste. Cela cadre bien avec les caractéristiques économiques car il nous

[*Texte*]

certain basis or whether the future holds the necessity for giving transportation to major areas which may in the future grow to be of fairly substantial size.

The growth centre principle is one that has been expounded by economists and various other people and we think from a transportation point of view that this is a very valid and useful approach because it will produce better transportation service, we think, because the volume to be served and the magnitude of the operation will be greatly enlarged in certain centres, and therefore we will be able to produce a better service.

• 1055

The second point is that major emphasis of future industrial development ought to be upon the establishment of secondary industries and I do not think I need to comment on that. It is an economic theory and I think from the transportation point of view I simply wanted to say that this fits in with our thinking. It seems to be the cornerstone to getting larger economic development in Atlantic Canada and we in Canadian National are gearing our future plans to that type of development.

Transportation is only one of a number of factors affecting economic growth, and while improvements in transportation services to and from and within Atlantic provinces will assist true growth, it will also require developmental change in education, industrial development, housing, manpower mobility, and so on. Perhaps because we are in the transportation industry, we often feel that there is a very distinct focus on transportation, that transportation is the great ill, and if it is cured then everything else will be rosy.

Personally, I do not think that is so. I think transportation is of vital importance in an area like Atlantic Canada; it is important in the whole of Canada, but it is not going to be the one factor which, if improved, is going to create and produce economic growth in Atlantic Canada.

We are convinced that improvements in the rail services or in highway services or water services are not going automatically to bring with them a revitalization of economic growth. We think economic growth requires

[*Interprétation*]

faut songer s'il nous faudra desservir une myriade de petites localités d'une certaine façon, ou si l'avenir nous obligera d'assurer le transport dans les principaux centres qui pourraient progressivement prendre de l'importance.

Le principe des centres de croissance en est un qui a été exposé par des économistes et nous croyons que pour ce qui est du transport, c'est là une idée tout à fait valable et utile, parce qu'il en résultera un meilleur service de transport à notre avis, du fait que le volume à desservir et l'ampleur de l'entreprise se seront accrus dans certains centres, et nous pourrons par conséquent, assurer un meilleur service.

Deuxièmement, l'industrialisation doit être orientée surtout vers l'implantation d'industries du secteur secondaire et je n'ai pas à commenter là-dessus. C'est une théorie économique et du point de vue des transports, je voulais tout simplement ajouter que cela cadre très bien avec notre ligne de pensée. C'est de cela que dépend l'accroissement de l'expansion économique dans les provinces de l'Atlantique, et nous, du National-Canadien concevons nos programmes d'expansion à venir en fonction de ce genre de développement.

Les transports ne représentent qu'un des nombreux facteurs du développement économique et si l'amélioration des services de transports desservant les provinces de l'Atlantique est à considérer, on ne saurait envisager un développement réel sans une amélioration des secteurs de l'éducation, de l'industrie, de l'habitation, et sans une mobilité accrue de la main-d'œuvre, etc. C'est peut-être parce que nous faisons partie de l'industrie du transport que nous avons souvent l'impression d'être considérés différemment, que l'industrie du transport est le mal du siècle, et qu'il suffit d'y remédier pour que tout retourne à l'ordre.

Personnellement je ne crois pas qu'il en soit ainsi. A mon avis, le transport est d'une importance vitale pour les régions de l'Atlantique; il est important pour tout le Canada, mais il ne suffit pas de l'améliorer pour croire qu'il pourra à lui seul créer et produire la croissance économique dans les provinces de l'Atlantique.

Nous sommes convaincus que l'amélioration, disons, du service ferroviaire, et du service routier, et du service maritime, n'engendrera pas automatiquement une réanimation de cette croissance économique.

[*Text*]

that this be done, but it is going to require also many other things that are proceeding in their normal way, I think, in Atlantic Canada and which probably the new Department of Regional Development will focus on very directly. But we are in the transportation industry and we are interested in the transportation factor, and I just want to point out here that we share the view of others and hold it most strongly that while transportation has to assume its place in this economic growth, improvement in transportation alone will not itself create good economic growth.

At present a high percentage of traffic moving within and out of the Atlantic provinces consists of bulk commodities such as ore, gypsum, pulpwood logs, chips, newsprint and lumber. That will give you some idea of the commodities we are handling. Traffic moving to the Atlantic provinces will continue, we think, to be predominantly of the consumer product type. This is what is happening today. Consumer products are coming into Atlantic Canada from Central Canada and other areas. The movements within Atlantic Canada and out of Atlantic Canada are mostly of low rated bulk commodities such as ore, gypsum, pulpwood, newsprint, lumber, and so on. Newsprint and lumber, of course, are not low rated but some of the others are.

As secondary industries develop, traffic within and from the Atlantic provinces we think will become more oriented toward this latter type of commodity; that is, the consumer goods type of commodity. If we can get more secondary industries producing in the area then, rather than sending out our coal and our ore, unfinished steel, and things of this kind, we think we should be able to develop our economy to the point of sending out to the rest of the world, not only to central Canada, finished goods or goods that have come from our secondary industries.

Therefore, we are greatly in favour of anything we can do transportationwise or that can be done in any other way to develop the secondary industries because we feel that this is one of the great hopes for building up the economy of the Atlantic provinces.

Greater co-operation between the transportation companies and increased use of intermodal techniques in which long haul movement is provided by rail and pick up and delivery by highway, and the development of

[*Interpretation*]

A notre avis, la croissance économique exige que cela se fasse, mais elle exige aussi un bon nombre d'autres éléments qui se développent de la façon normale, dans les régions de l'Atlantique, sur lesquels le nouveau Ministère de l'Expansion économique régionale concentrera très directement ses efforts. Nous sommes dans l'industrie du transport et nous nous intéressons au facteur transport et nous disons que nous partageons le point de vue des autres et nous sommes d'avis que les transports doivent assumer la place qui leur revient au sein de cette croissance économique, mais que l'amélioration seule des transports n'engendrera pas une bonne croissance économique.

A l'heure actuelle, le trafic intérieur et les expéditions des provinces de l'Atlantique se composent surtout de produits bruts comme le minerai, le gypse, le bois à pâtes en rondins ou en copeaux, le papier journal et le bois d'œuvre. Cela vous donnera une idée des produits que nous transportons. Le trafic à destination de ces provinces reste essentiellement composé de produits de consommation. C'est ce qui arrive aujourd'hui. Les produits de consommation pour les régions de l'Atlantique proviennent du Canada central et d'autres régions. Le trafic intérieur et les expéditions des provinces de l'Atlantique se composent surtout de produits bruts dont le taux de transport est peu élevé, comme le minerai, le gypse, le bois à pâte, le papier journal, le bois d'œuvre etc. Le papier journal et le bois d'œuvre ne jouissent pas d'un tarif réduit.

L'implantation d'industries du secteur secondaire devrait modifier la nature du trafic à l'intérieur de ces provinces et vers l'extérieur, qui, je pense, sera plus orienté vers ce dernier genre de denrées. Si nous réussissons à attirer plus d'industries secondaires dans la région, plutôt que d'expédier nos produits bruts tels que le charbon, le minerai, l'acier et autres vers l'extérieur, je crois que nous devrions être en mesure de développer notre économie au point de pouvoir expédier non seulement vers le Canada central, mais aussi vers le monde entier des produits finis ou des marchandises provenant de nos industries secondaires.

C'est pourquoi nous sommes prêts à faire tout ce que nous pouvons en matière de transport ou autrement pour développer les industries secondaires, car à notre avis, c'est là un des grands espoirs pour accroître l'économie des provinces de l'Atlantique.

Cinquième point: une meilleure collaboration entre les entreprises de transport, l'utilisation croissante d'effectifs rail-route faisant intervenir les chemins de fer sur les longues distances et les véhicules routiers pour le

[*Texte*]

the unit train concept where economically feasible, will provide greater opportunities for shippers to reduce total costs for distributing their goods.

As you gentlemen are so well aware, and we in the transportation industry in the Maritimes are so well aware, we have a distinct disability because of the length of haul we have to carry goods to markets from Atlantic Canada. At this point, I would just make the comment that I often have businessmen speak to me and say, "Your rates are too high".

I personally take great exception to that, because basically our rates are lower in Atlantic Canada than they are elsewhere in Canada but the costs of transportation are too high because we are so far away from markets. There is a very distinct difference between rates for traffic being too high and the cost of transportation being too high, and I am the first one to admit that one of our great disabilities in Atlantic Canada is our high

• 1100

costs of transportation to get our goods out of the Atlantic area or to bring goods in from Central Canada into Nova Scotia or Newfoundland. It is a long distance and that distance has a relation to cost. Transportation, of course, is only one factor involved in the actual price of goods; there are many other factors that go into it.

We have some goods where the transportation factor is less than 1 per cent of the delivered price of the goods even though they travel a long distance, 700 or 800 miles. There are other commodities where the transportation factor is 20, 30, 40 per cent of the delivered price of the goods. As to whether or not his commodity can absorb the transportation cost makes a distinct difference in the ability of a man to market his product. We in our industry think of it in terms of the total cost of the delivery process, of handling the goods from the point where they are made until they reach their destination, and the rate itself is really not terribly important.

My major point here is that we are in favour of greater co-operation between the transportation companies. We have no views that Canadian National should be a monopoly or should control all of the operations, truck or rail or whatever they are, but we are firmly convinced that in the development of

[*Interprétation*]

ramassage et la livraison ainsi que l'utilisation du train bloc partout où il se justifie économiquement, permettront aux expéditeurs de réduire leurs frais de distribution.

Comme vous le savez si bien, messieurs, et nous autres de l'industrie du transport dans les Maritimes le réalisons aussi, nous sommes visiblement dans l'impuissance à cause des longues distances que nous devons parcourir pour transporter des marchandises des provinces de l'Atlantique vers les débouchés. Je dois dire ici que bien souvent des hommes d'affaires nous accusent d'avoir des tarifs trop élevés.

Personnellement je trouve que cela n'est pas vrai, car nos tarifs sont essentiellement moins élevés dans les provinces de l'Atlantique que dans le reste du Canada, mais ce sont les frais de transport qui sont trop élevés car nous sommes trop éloignés des débouchés. Il y a une grande distinction à faire entre des tarifs trop élevés et des coûts de transport trop élevés, et je serais un des premiers à reconnaître qu'un de nos plus grands désavantages dans les provinces de l'Atlantique est le coût trop élevé de transport de nos produits à partir de la région de l'Atlantique, ou de transporter des marchandises du Canada central vers la Nouvelle-Écosse ou Terre-Neuve. C'est toute une distance à parcourir et cette distance doit se rapporter au prix. Le transport, bien sûr, n'est qu'un des facteurs en cause pour ce qui est du prix et des denrées. Il y a bon nombre d'autres facteurs dont il faut tenir compte.

Il y a certains produits pour qui le facteur des transports ne représente que 1 p. 100 du prix de ce produit, après livraison, même s'il doit parcourir 700 ou 800 milles. Pour d'autres produits, le facteur des transports représente 20, 30 ou 40 p. 100 du prix du produit livré. Mais ce qui fait une différence pour ce qui est de la possibilité de commercialisation d'un produit, c'est de voir si le produit peut absorber ou non le coût du transport. Mais nous songeons, pour ce qui est de notre industrie, à l'ensemble du coût de la livraison, de la manutention des produits à partir du point où on les fabrique, jusqu'à leur arrivée à destination, et le taux même n'est pas tellement important, à ce moment-là.

Nous sommes donc en faveur d'une plus grande collaboration entre les différentes compagnies de transport. Le National-Canadien ne devrait pas être un monopole ou contrôler toutes les opérations, qu'il s'agisse des camions, des chemins de fer, ou d'autres moyens, mais nous sommes vraiment convain-

[*Text*]

cheaper and better transportation, where we have this long haul to and from the central Canadian market and to and from our export ports of Saint John and Halifax, we should endeavour to take advantage of the cheapest form of transportation for the long haul, and that is rail, and that we should try to combine the rail and the truck to the greatest extent possible, also rail and water, so that we can carry the goods in large quantity over the long haul by rail and then distribute them from railheads to their destinations by the cheapest means which, on the short haul basis, is usually the truck.

What I am really saying is that the old concept that we have had for many years in Canada is to build railways, but now a change is being forced on us by the times and the circumstances: mainly the rising costs of operation and the rising cost of living. We can really no longer afford to have myriads of branch lines operating into small communities. Where we have good road systems and so on, we are much better off and give a much better service and the customer is better satisfied and the costs of transportation are lowered where we can use the railway for the basic long haul, the heavy volume, and then distribute by highways.

So that we, in our view, are going to be moving as much as we can in Atlantic Canada in the future toward the intermodal type of operation which means the combination of the rail and the truck or rail and water or any of the modes of transportation. You see this exemplified today with our container operations and with the piggyback. The container is growing very dramatically everywhere in the world. We are using them in large volumes in Atlantic Canada. We are handling not all, but about 80 per cent of our small package goods to Newfoundland via containers. It is a very flexible unit. You are able to take it off the railway car at the point where you want to get rid of it and send it by highway. You get a quicker delivery of that. You put your railway car back into operation to carry something else instead of leaving it sitting on a siding for three or four days, or even a couple of weeks. Even the truck, when it delivers the trailer can leave it so that it can be unloaded by the customer at his convenience and the truck can go off and do other work. It has all this flexibility and gives us an ability to lower the over-all transportation costs.

[*Interpretation*]

cus que la mise au point d'un meilleur transport, d'un réseau de transport moins coûteux, alors que nous avons ces longues distances à parcourir, à partir du marché central ou vers le marché central du Canada, et aussi vers les ports d'exportation de Saint-Jean et d'Halifax, signifie qu'il nous faut vraiment essayer, dans la mesure du possible, de bénéficier d'un meilleur réseau de transport à longue distance, soit les chemins de fer, et nous devons essayer de combiner le rail et la route dans la mesure du possible et le rail et l'eau, pour transporter de plus grandes quantités de produits sur ces longues distances par chemins de fer, et ensuite répartir ces produits à partir du terminus ferroviaire vers leur destination, par le moyen de transport le moins coûteux qui, à court terme, est le camion.

Ce que je veux dire, c'est que tout ce concept que nous avons eu depuis bon nombre d'années au Canada pour l'aménagement de chemins de fer, a subi une modification imposée par le temps et les circonstances, soit le coût accru des transports et le coût plus élevé de la vie. Et on ne peut simplement avoir maintenant des lignes secondaires, des embranchements dans les petites collectivités. Là où nous avons un excellent réseau routier, il est préférable, et le service est bien meilleur, le client est plus satisfait, et les frais de transport sont moins élevés, si on peut avoir recours au service ferroviaire pour le trafic à longue distance et la route pour les courtes distances.

A notre avis, donc, nous nous acheminerons, dans la mesure du possible, dans les provinces atlantiques, à l'avenir, vers un mode intégré, soit la combination du rail et de la route ou du rail et du transport maritime ou de tout autre mode de transport. Cela nous est d'autant plus montré aujourd'hui par l'utilisation des cadres et le rail-route. Le cadre connaît une expansion vraiment extraordinaire, partout dans le monde. On s'en sert beaucoup dans les provinces atlantiques. Nous n'avons pas tout, mais environ 80 p. 100 de nos expéditions de petits colis vers Terre-Neuve se font par cadres. C'est un élément très souple. Vous pouvez le descendre du wagon, à l'endroit voulu, et l'expédier ensuite par la route. Puis vous utilisez le wagon pour transporter quelque chose d'autre plutôt que de le laisser sur la voie d'évitement deux ou trois jours, ou même deux ou trois semaines. Même le camion peut l'expédier plus facilement et être déchargé par le client, et le camion peut faire d'autres travaux. Il y a donc toute cette souplesse, toute cette possibilité de combinaisons qui nous permet donc d'abaisser, dans l'ensemble, le coût du transport.

[*Texte*]

My point here is really that in the future, rather than continuing with the old form of rail transportation, we will be going more and more to a mainline type of operation, to try to put the heaviest volume on our mainlines which are of good standard and that we will be working with other truck operators and with our own truck services as circumstances may require to deliver off the railheads by highway. We think this can be worked out without great inconvenience or difficulties and without loss of jobs. These things I do not think are really in the picture at all because the highway developments that will have to occur, and which are being promoted now by the four provinces themselves, will mean that the railway line will become redundant.

You will have a better way to serve the customer. It is not a question of taking a service away from the customer as much as it is restructuring the type of services which are going to give better service to the customer and then, when they are there, be able to get rid of the redundant services which cost so much money to operate in the old fashion.

Sixthly, we believe that effective competition between the various modes of transport is desirable. We would not want anyone to have an idea that we are not in favour of good competition. It is said many times that the competition between truck and rail is not as virulent or as strong in Atlantic Canada as it is elsewhere in Canada. In some respects that is true, but it is not a statement that can be taken baldly because competition between rail and truck in many parts of Atlantic Canada is very strong. As evidence of this, looking at the traffic handled under the Maritime Freight Rates Act, our studies there show, and this is common, general knowledge, that probably 50 per cent of the traffic for which the subsidy is paid is moving on competitive rates that are set at competitive levels because of the force of competition.

So, we are really just saying here that effective competition between various modes is a healthy thing. We welcome it because our experience has been that where we have it better service is produced for the customers and the railways and trucks and other transportation media do perform better in a competitive field than when they have it all to themselves.

Our seventh point is that a general improvement in the roadway system to provide all-weather capability on arterial roads

[*Interprétation*]

A l'avenir, plutôt que de toujours avoir recours à cet ancien mode de transport ferroviaire, de plus en plus, nous aurons ces genres d'opérations d'une ligne principale, d'avoir le plus de lignes le long de cette ligne principale, avec d'excellentes normes, et nous travaillerons avec d'autres services de camionneurs et le nôtre aussi, suivant les circonstances, pour faire la livraison terminus par la route. Cela n'entraînera pas tellement d'ennuis ou de pertes d'emplois. Non, cela n'entre pas en jeu ici, vu ces développements qui sont encouragés maintenant et qui se produiront et qui sont encouragés d'ailleurs par les quatre provinces. Au fur et à mesure que cela se présentera, les lignes ferroviaires deviendront redondantes.

Ce sera un meilleur moyen de servir le client. Il ne s'agit pas tant d'enlever le service aux clients que d'assurer le genre de service qui assurera un meilleur service aux clients et ainsi faire disparaître tout service qui fait double emploi et qui nous coûte si cher.

Sixièmement, nous croyons qu'une saine concurrence entre les différents modes de transport est souhaitable. Nous ne voudrions pas que quiconque croit que nous ne sommes pas en faveur d'une bonne concurrence. On a dit plusieurs fois que la concurrence entre le rail et la route n'est pas aussi grande, aussi forte, dans les provinces atlantiques qu'ailleurs au Canada. A certains égards, c'est juste, mais on ne peut le dire dans l'ensemble, parce que la concurrence entre le rail et la route dans plusieurs parties des provinces atlantiques est très forte. Et nous n'avons qu'à voir le trafic visé par la Loi sur les taux de transport des marchandises dans les Maritimes. Et notre étude nous montre, et tout le monde le sait d'ailleurs, qu'environ 50 p. 100 du trafic pour lequel nous payons des subventions se fait en vertu d'un taux concurrentiel, établi à des niveaux concurrentiels, à cause de la force de cette concurrence.

Donc, tout ce que nous disons ici, c'est qu'une saine concurrence entre différents modes de transport est à notre avis tout à fait souhaitable, excellente. Nous sommes fort heureux de voir une telle concurrence. Parce que, suivant notre propre expérience, nous avons un meilleur service aux clients, et les chemins de fer, les camions et autres modes de transport donnent un meilleur rendement, dans un contexte concurrentiel.

Septième point. L'amélioration du réseau routier, ce qui permettrait de rouler en toutes saisons, est nécessaire si l'on veut créer un

[*Text*]

is necessary to create a climate in which a truly competitive commercial trucking industry can develop.

This is a point which has been made many times by the provincial governments in Atlantic Canada and what we are really saying here is that we agree that there should be a strong activity by all concerned to improve the roadway system in Atlantic Canada; this is particularly so on the island of Newfoundland. However, when you look at the road structure in Atlantic Canada, outside of the Trans-Canada Highway, you do not find many of the feeder roads that are really of all-weather capability.

Each of the provinces knows this. We know it because we operate trucks over these roads.

From the long term point of view we are convinced that the health of Atlantic Canada is closely tied to the development of good all-weather arterial roads, feeder roads, so that we can give, from a rail point of view, good off track service quickly all seasons of the year.

I am convinced that the intermodal method of operation is going to be the dominant one in the future, particular in an area like Atlantic Canada. Tied in with this development is the necessity for a good road system, because if you have a good mainline rail system and you have a good arterial road system with good feeder roads, you can produce a first-class service and you can produce it at minimum cost.

In regard to our eight point, it has been mentioned by various parties who have appeared before you that Part III of the National Transportation Act should be proclaimed.

Our only comment on this is that since that deals with interprovincial trucking, and does not deal with the trucking between Amhurst and Halifax in Nova Scotia or between Moncton and Saint John in New Brunswick, but with trucking between Moncton and Halifax and between Moncton and Charlottetown, the interprovincial type of trucking, under the present system in order for ourselves in our trucking operations and other truckers to serve the interprovincial runs we have to obtain licences from two different provincial boards. This is not impossible but, after all, each province is different. Their acts sometimes are different, their regulations sometimes are different, and in many cases the interpretation or the importance placed upon various things by different provincial boards is different.

[*Interpretation*]

climat favorable au développement du transport routier véritablement compétitif.

C'est une observation faite plus d'une fois par les gouvernements des provinces atlantiques et ce qu'on dit ici, c'est que nous sommes d'accord. Il devrait y avoir beaucoup d'activités de la part de tous les gens en cause pour améliorer le réseau routier des provinces atlantiques. Cela vaut d'autant plus pour l'Île de Terre-Neuve. Mais lorsque vous voyez la structure des routes des provinces atlantiques, outre la route transcanadienne, il n'y a pas tellement de routes secondaires qui permettent de rouler en toutes saisons. Chaque province le sait bien. Nous savons ce qu'il en est parce que nous exploitons un service de camionnage sur ces routes.

A long terme, nous sommes convaincus que la prospérité des provinces atlantiques est rattachée au développement de grandes routes toutes saisons, de routes d'alimentation pour pouvoir donner, du point de vue ferroviaire, un bon service rapide, pendant toutes les saisons de l'année.

Je suis sûr que ce mode de transport sera celui qui dominera à l'avenir, surtout dans une région comme celle des provinces atlantiques. Rattachée à ce développement, il y a la nécessité de construire un excellent réseau routier, car si nous avons un excellent réseau ferroviaire et un excellent réseau de voies principales, avec de bonnes routes secondaires, nous pouvons fournir un service de première classe à un coût minimum.

Le point nº 8 maintenant. Les différentes parties qui ont comparu devant vous ont mentionné que la partie III de la Loi nationale sur les transports devrait être promulguée.

Notre seul commentaire à ce sujet c'est, qu'étant donné qu'il s'agit de camionnagee interprovincial et non pas de camionnage entre Amhurst et Halifax en Nouvelle-Écosse, ou entre Moncton et Saint-Jean, au Nouveau-Brunswick, mais, avec le service de camionnage entre Moncton et Halifax, et entre Moncton et Charlottetown, le camionnage interprovincial, le régime actuel veut que, pour que nous et l'autre industrie du camionnage puissions obtenir les permis voulus pour l'exploitation des lignes interprovinciales, nous obtenions un permis d'exploitation de deux bureaux provinciaux différents. Ce qui n'est pas impossible, mais, après tout, toutes les provinces sont différentes, leurs lois sont différentes, parfois les règlements le sont aussi, et, dans plusieurs cas, même l'importance accordée à différentes questions par les différents bureaux est différente.

[*Texte*]

Therefore, we think in general that it would be advantageous to the development of trucking in Atlantic Canada if either there was one board to serve all Atlantic Provinces and they would all agree that this board would operate with respect to interprovincial traffic throughout the whole of Atlantic Canada, or else that Part III be proclaimed which would mean that you would have one licensing authority for interprovincial trucking throughout the whole of Atlantic Canada.

We just simply say that we think this is desirable. There would be uniformity in the regulations and the laws and in the application of the laws so that we would not have difficulties with provincial boards.

I now come to paragraph 9. Close liaison ought to be maintained between highway planning authorities, regional planners and the railways to ensure the development of adequate highways in areas from which it may be possible to remove unnecessary branch lines.

I touched on this previously, but this, I can tell you, is very active. We have very good liaison with the provincial highway authorities on this matter. I believe they are as convinced as we are that we have to have better highways and have to have a good intermodal system of transportation in Atlantic Canada. They have come to us already and said, "Now, where are the areas in which you think we should, with priorities, look at the improvement of highways so that we can get rid of an uneconomic branch line?". We have thoughts on that, and so have they.

All I would say to you is that we are working closely with them. We both have the same point of view, and our general feeling is that rather than just trying to get rid of a branch line which has ceased to be of any particular use to us, it is a much more practical and useful way to approach it by trying to see if we cannot serve the people who need to be served in that area by some intermodal arrangement such as a truck from a railhead, or by container, or piggyback, and then get rid of the unnecessary branch line. But concommitant with this is the importance of the highways in that area. So we are working on that problem with the provincial authorities.

In paragraph 10 we say that rail passenger service ought to be maintained only on high volume main line routes and that passenger train service on branch lines ought to be replaced by efficient bus feeder services.

This is not new, and there is nothing very startling about it, but we hold the view—and I think correctly—that the passenger rail ser-

[*Interprétation*]

En conséquence, nous croyons que ce serait avantageux pour le développement du camionnage dans les provinces de l'Atlantique s'il y avait, soit un seul bureau pour desservir toutes les provinces de l'Atlantique et pour réglementer le trafic interprovincial, ou bien qu'on promulgue la partie III, ce qui veut dire qu'une seule administration délivrerait les permis d'exploitation pour le camionnage interprovincial, à travers les provinces de l'Atlantique.

Nous avons simplement dit que ce serait souhaitable. Il y aurait de l'uniformité dans les règlements et dans les lois, de même que dans l'application des lois, afin que nous n'ayons pas de difficultés avec ces bureaux provinciaux.

Numéro 9: Établissant d'une liaison étroite entre les organismes de planification routière, la planification régionale et le chemin de fer est indispensable au développement des routes dans les régions où la suppression des lignes secondaires est possible.

J'en ai déjà parlé auparavant mais je puis vous dire que ces contacts sont très suivis, nous avons une excellente liaison avec les autorités provinciales qui sont convaincues autant que nous qu'il faut absolument de meilleures routes et de bons moyens de transport dans les provinces de l'Atlantique. Elles se sont déjà présentées à nous pour nous demander où étaient les endroits prioritaires pour l'amélioration des routes afin de pouvoir éliminer les lignes secondaires non rentables. Nous avons une certaine opinion à ce sujet, elles aussi.

Tout ce que nous pouvons dire, c'est que nous travaillons en étroite collaboration. Nous avons le même point de vue et l'opinion générale c'est que plutôt que de juste essayer de faire disparaître une ligne secondaire qui ne nous rend plus service, il serait beaucoup plus efficace d'essayer de voir s'il serait possible de desservir les gens de la région par un moyen intermédiaire grâce au transport par cadre, ou par le service «*piggyback*», et ensuite éliminer la ligne secondaire qui serait de trop, mais il faut pour cela garder en vue l'importance du réseau routier dans la région. Nous travaillons donc vers la solution de ce problème avec les autorités provinciales.

Les services-voyageurs ne devraient être maintenus que sur les grandes lignes à fort trafic, sur les lignes secondaires, ils devraient être remplacés par de bons services d'autobus. Ce n'est pas nouveau, il n'y a rien d'étonnant à ce sujet mais nous estimons et je crois que nous avons raison de le croire que le service voyageur devrait être le meilleur

[*Text*]

vices should be as good as possible and should be better than they are today; but this is a matter of economics, and problems of that kind. Looking at the long term, it is our feeling that, rather than getting rid of all the rail passenger services, we should concentrate on the main lines—Halifax to Montreal, Sydney to Montreal, in the Atlantic area—and should provide a first-class, excellent service on those high-density main lines. And off the main line there should be provided—and today in many cases there is provided—a good feeder bus service.

This, in our view, also applies to air services. Atlantic Canada, we feel, should have improved local air services. It should be the main line air services which go from the major centres to major centres, but the feeding into those—this is our general view; and Mr. Vaughan is giving me a dig here because I am not an airline officer—but we were looking at this from the point of view of passengers, not from the point of view of railways; that is my point.

We looked at the bus, the rail and the air and we could see that transportation needs to be improved in Atlantic Canada, but you do not improve it by holding on to the old line trains. That is my point. We will probably talk about that later.

Paragraph 11: The Canadian Press reported on March 12 that the Premiers of the four Atlantic Provinces presented to the Minister of Transport a report they have been working on, outlining what they suggest to be "the basic elements of an Atlantic Provinces transportation policy". Among other things, they have made specific recommendations for changes in the Maritime Freight Rates Act.

I just want to say that we are in general agreement with what we know of the provinces' position—it has been reported fairly extensively in the press—and we are in general agreement with the Maritime Freight Rates Act changes which they have proposed.

I thought perhaps we should just set out briefly our views on the Maritime Freight Rates Act, and I have done that in paragraph 12. The Act in its present form—it has been there since 1927—is not really an effective instrument in 1969 for encouraging economic growth.

You will recall that its purpose was to enable the merchants and shippers of Atlantic Canada to gain the greater markets of central Canada as opposed to being confined to the Maritime market.

[*Interpretation*]

possible, et surtout plus efficace qu'il ne l'est à l'heure actuelle; il s'agit là d'une question d'économie mais si on examine la situation à long terme plutôt que de nous débarrasser des services-voyageurs, nous devrions peut-être concentrer nos efforts sur les lignes principales, Halifax-Montréal, Sydney-Montréal, dans la région de l'Atlantique et prévoir un service de premier ordre sur ces lignes à fort trafic. Sur les autres lignes, nous devrions pourvoir à un bon service d'autobus relié aux lignes principales. Il devrait y avoir un bon service d'autobus.

Cela s'applique aussi, selon notre point de vue au service aérien, les provinces de l'Atlantique devraient avoir un service aérien amélioré, il devrait y avoir une ligne principale qui devrait desservir les grands centres, M. Vaughan me dit que je ne suis pas un haut-fonctionnaire des lignes aériennes, mais nous examinons la question du point de vue du service ferroviaire et nous voyons que les transports doivent être améliorés dans la région de l'Atlantique, nous le faisons en prenant en considération les voyageurs plutôt que les compagnies ferroviaires.

Nous avons examiné les trois moyens de transport, air, rail, route. Nous avons vu qu'il y avait une place pour des améliorations mais on ne peut les faire en maintenant les vieilles lignes de chemin de fer. Nous en reparlerons du reste plus tard.

Numéro 11: La Presse canadienne annonçait le 12 mars que les premiers ministres des quatres provinces de l'Atlantique avaient présenté au ministre des Transports un rapport indiquant ce que devait être selon eux les éléments essentiels des transports pour les provinces de l'Atlantique. Entre autre, ils ont préconisé certaines modifications à la Loi sur les taux de transport des marchandises dans les provinces Maritimes.

Je voulais tout simplement dire que nous sommes d'accord avec la décision des provinces, et, en ce qui concerne la Loi et ses modifications, nous sommes d'accord avec la plupart des modifications suggérées. En ce qui concerne la Loi sur les taux de transport des marchandises des provinces Maritimes, je pourrais peut-être vous donner notre opinion à ce sujet, ce que j'ai fait dans le numéro 12 d'ailleurs. Sous sa forme actuelle, ladite Loi qui existe depuis 1927, ne constitue pas un moyen efficace en 1969 pour encourager la croissance économique. Vous vous souviendrez que son objectif était de permettre aux expéditeurs de l'Atlantique d'atteindre les marchés du centre du Canada plutôt que d'être restreints aux Maritimes.

[*Texte*]

In our view that purpose has long been bypassed by reality. What we need today is something that is going to assist, from the transportation viewpoint, the economic growth of Atlantic Canada, and this Act, in our view, should be amended much as the Premiers have suggested. It should be restructured so that its emphasis is directed toward providing assistance to Maritime industry in its growth and development in any way it possibly can, to enable industries to get into the transportation markets that they can usefully get into, whether they are in central Canada, the United States, or overseas, or wherever they may be.

I am not suggesting that it be converted into an aid program. I am suggesting that the transportation assistance that may be given through that Act be directed toward assisting any industry which really needs it in Atlantic Canada to get into its markets and thereby enable it to grow and prosper.

We think that the policy of just paying a straight 30 per cent subsidy on all out-bound traffic, and a 20 per cent subsidy on all traffic within the Maritimes, should be examined, and that the subsidies should be paid and related to specific commodities that are moving, or specific industries in the area; and that Maritimers themselves should have the direct hand in deciding where the money should be applied and where it will do the most good in enabling Maritime industry to grow.

We think that to certain selective commodities which now come into Atlantic Canada for finishing and manufacture and so on and which now get no subsidy whatsoever, there should be some applicability of these subsidy moneys; and if Atlantic industry needs assistance in transportation of raw materials inbound some of those things should be looked at. This would have to be studied.

I am not proposing that it be given to everything but there are certain goods, raw materials and some semi-finished commodities, coming in-bound, which we feel could well be given some assistance to help Maritime industry to grow and prosper and be able to produce goods for out-bound shipment.

We think that the subsidy should be paid to all modes of transport. It should be paid to rail, truck and water, and the shipper really should make the decision himself on how he is going to use it. The money should be paid to the shipper, not paid to the railways.

[*Interprétation*]

A notre point de vue toutefois, cet objectif est de beaucoup dépassé par la réalité, et ce qu'il nous faut aujourd'hui, c'est quelque chose qui aidera du point de vue du transport, la croissance économique des provinces de l'Atlantique.

A notre point de vue, la loi devrait être modifiée comme l'ont d'ailleurs suggéré les premiers ministres, pour insister un peu plus sur une aide, une assistance à l'industrie des Maritimes pour accélérer la croissance économique, afin d'obtenir des débouchés au moyen du transport où qu'ils se trouvent, au centre du Canada, aux États-Unis, outre-mer, etc...

Je ne suggère pas qu'on doive en faire un programme d'assistance mais je suggère que l'aide au transport en vertu de la Loi puisse être dirigée vers une industrie qui en aurait besoin dans les provinces de l'Atlantique pour lui permettre d'attendre ces marchés et par conséquent de se développer.

Nous croyons que, plutôt que de donner 30 p. 100 de subventions pour le trafic allant vers l'extérieur et 20 p. 100 à l'intérieur des Maritimes, cette subvention devrait être versée pour une denrée particulière ou pour une industrie précise dans la région et que les gens des Maritimes eux-mêmes devraient avoir le choix pour l'attribution de ces fonds dans les domaines où l'aide serait la plus profitable pour permettre la croissance économique des Maritimes.

Nous croyons qu'il y a certaines denrées qui entrent à l'heure actuelle dans les provinces de l'Atlantique pour être apprêtées ou transformées et qui ne sont pas subventionnées. A l'heure actuelle, on devrait les aider dans une certaine mesure et si les industries des Maritimes a besoin d'aide pour les transports, nous devrions alors examiner cette question, je ne propose pas qu'on l'accorde à tout le monde mais il y a certainement des denrées et des matières premières, des produits semi-manufacturés qui auraient besoin d'une assistance qui pourrait leur être fournie, pour aider l'expansion de l'industrie des Maritimes.

Nous croyons que la subvention devrait être donnée à tous les modes de transports, chemins de fer, camions, et bateaux et que l'expéditeur devrait avoir le choix du mode de transport et la liberté d'employer ces fonds comme bon lui semble. L'argent devrait être remis à l'expéditeur et non pas au chemin de fer.

[*Text*]

It is paid to the railways now. That is not because it is a subsidy to the railways, but because from an administrative point of view it was the simplest way to make the payments. Rather than going through more elaborate processes to pay it to individual shippers, it was decided that the railways should make certain reports, that the moneys would be paid to them and they, in turn, would cut back the rates to the shipper. That is the way it has worked over the years. We give a reduced rate to the shipper, we make a report to the government, the calculation is made, and we are paid a certain sum of money.

This has been, I think, in some ways, misinterpreted over the years as a subsidy to railways. To some extent it has perhaps benefited the railways to have it done that way, but my company takes the view that everyone would be better served if the subsidy could be structured in such a way that it would be paid to the individual shipper. If he needs assistance, or if he has a specific industry, or specific commodities that require assistance and somebody decides he should be helped, the assistance should be given to him. Then he can decide whether he wants to send it by truck, or by rail, or however he wants to send it.

We think that it should apply to all types of merchandise traffic. Today it applies only to freight. It does not apply to express. This is really an historic sort of throw-back. Express used always to be carried on passenger trains and did not apply to passenger services, so it never applied on express; but it applied on carload freight and less-than-carload freight.

Now the progression of organization of our business has brought together the less-than-carload freight, which got the subsidy, and express, which did not get it, into one service for small package goods, as we call them, which, for purposes of identification, we now call "express". Since we call it express and the Act says it will not be paid on express those who ship those small goods today do not get the benefit of the Maritime Freight Rates Act subsidy. We think that is really a kind of anomaly. It should be paid on all goods.

Mr. Rose: Why did you change the name of what you describe as "express"?

Mr. Macdougall: Well that was thought of very carefully, but "express" has a connotation in people's minds which we wanted to

• 1120

preserve. That is the reason we keep that.

[*Interpretation*]

A l'heure actuelle, on le donne aux chemins de fer mais ce n'est pas en vertu d'une subvention aux chemins de fer mais bien plutôt que du point de vue administratif; il était plus facile de faire un seul versement plutôt que d'avoir un procédé beaucoup plus élaboré et de verser l'argent aux expéditeurs. On a décidé qu'on verserait l'argent au chemin de fer qui à leur tour réduirait les taux aux expéditeurs. Le calcul est effectué, un rapport est envoyé au gouvernement fédéral et voilà comment nous en arrivons à obtenir nos fonds.

On a mal interprété cette subvention, au cours des années, comme étant une subvention aux chemins de fer. A certains égards, elle a été profitable pour les chemins de fer mais ma compagnie estime que tout le monde serait mieux desservi si la subvention était structurée de façon qu'elle soit versée à l'expéditeur. S'il a besoin d'aide, ou si une industrie précise ou un produit précis a besoin d'aide, et que quelqu'un décide qu'une aide doit être fournie, cette assistance devrait lui être versée, ensuite l'expéditeur décidera de son moyen de transport.

Nous croyons aussi que cela devrait s'appliquer à tous les types de trafic-marchandise; aujourd'hui cela ne s'applique qu'au fret, et non pas aux messageries. Habituellement, les messageries sont transportées par les trains de voyageurs et comme les subventions ne s'appliquaient pas au service-voyageur, les messageries n'ont pas été touchées.

Aujourd'hui nous avons combiné les deux, les chargements partiels et les messageries pour en faire un seul service pour les petits colis que nous appelons maintenant «les messageries». Ceux qui font l'expédition de ces petits colis aujourd'hui n'ont pas l'avantage de la subvention, c'est une anomalie; normalement, on devrait la verser pour toutes les denrées.

M. Rose: Pourquoi avez-vous changé le nom de ce que vous décrivez comme étant des «messageries»?

M. Macdougall: Oui, mais les messageries avaient une certaine implication dans l'esprit des gens, nous voulions que la signification du

mot soit préservée...

[*Texte*]

• 1120

Mr. Rose: Like the trains?

Mr. Macdougall: "Express" means to an ordinary person a parcel that is going to go by an expedited service; and it does go by an expedited service, but it is on a freight train.

An hon. Member: On a slow freight.

Mr. Macdougall: Not on a slow freight; it goes on a fast freight.

An hon. Member: There is an anomaly for you.

Mr. Rose: Do you have express freight?

Mr. Macdougall: We no longer call it that. We call it "express".

Mr. Rose: I am sorry.

Mr. Macdougall: Anyhow, my point really is that it is goods traffic and should take the Maritime Freight Rates Act.

Relative to intra-regional traffic, that is, the traffic which today gets a 20 per cent subsidy if the goods are shipped from Moncton to Halifax, or Halifax to Saint John, it is our view that this has pretty well outlived its usefulness. We think that that traffic, with the exception of in Newfoundland, should not be subsidized. We feel that the development of competition in the area, the whole general development of the area, does not today really require this type of subsidization. About 50 per cent of the traffic now moving in this area and getting the subsidy is competitive traffic in any event. But we do feel that in Newfoundland, until the highway system is improved there, goods moving within, to and from Newfoundland should be retained on the present basis.

We are not opposed, as I said, to the payment of the subsidies under the Act directly to the users of transportation. We think that there are some administrative difficulties in that, but we do not think they are insuperable. We have investigated it ourselves and our view is that it can be done, and should be done.

We think that this whole maritime freight rate problem should be dealt with by a newly created body, as mentioned by the premiers in the news release that I read—a federally appointed body made up of people who live in the Maritimes. This body would work there and would decide where the moneys now paid out under the Maritime Freight Rates

[*Interprétation*]

M. Rose: Comme les trains?

M. Macdougall: Le mot «messageries» veut dire pour tout le monde un colis qui est acheminé rapidement, mais par un train de marchandises.

Une voix: Un train lent.

M. Macdougall: Non pas un train lent, mais un train de marchandises rapide.

Une voix: Ça doit être une anomalie...

M. Rose: Avez-vous un tarif-fret-messagerie?

M. Macdougall: Il ne s'appelle plus comme cela aujourd'hui; il s'appelle maintenant: «tarif-messagerie».

M. Rose: Désolé.

M. Macdougall: De toute façon, il s'agit de denrées et de marchandises et elles devraient bénéficier du taux de marchandise privilégié.

Pour ce qui est du trafic intra-régional, celui qui aujourd'hui bénéficie d'une subvention de 20 p. 100, si les produits sont expédiés de Moncton à Halifax ou de Halifax à Saint-Jean, il est, selon nous, démodé maintenant et nous croyons que ce trafic, à l'exception de celui de l'intérieur de Terre-Neuve, ne devrait bénéficier d'aucune subvention. Nous croyons que les développements de la concurrence dans cette région, le développement intégral de la région n'exige pas aujourd'hui ce genre de subventions. Environ la moitié du volume du traffic subventionné, dans cette région, est concurrentiel. Nous croyons qu'aussi longtemps que le réseau routier ne sera pas amélioré à Terre-Neuve que les marchandises doivent être maintenues sur la base actuelle.

Nous ne nous opposons pas à ce que les subventions soient versées directement aux usagers du transport en vertu de la loi. Nous trouvons qu'il y a certaines difficultés administratives, mais elles ne sont pas insurmontables. Nous en avons fait l'examen nous-mêmes, et nous croyons que cela peut et doit se faire.

Nous croyons que tout le problème des taux de transport dans les Maritimes devrait être réglé par un nouvel organisme, tel que mentionné par les premiers ministres dans le communiqué de presse que j'ai lu, un organisme fédéral composé de gens qui vivent dans les Maritimes. Cet organisme œuvrerait dans les Maritimes, déciderait de la façon

[*Text*]

Act should be applied, what industries should receive assistance and which ones should not. In other words, the Maritime members of that body, on behalf of the Atlantic provinces people, will decide themselves where they want to apply this money. We think that if that is done in that way it will be a great stride forward. Then we will be able to have a great deal more say in Atlantic Canada, within our own house, on how to help our own industry to develop and move.

In paragraph 13 we suggest the establishment of warehousing and storage facilities in distribution centres in the principal market areas outside the Atlantic Provinces. This is a suggestion that has been made by other than Canadian National, and we think it is an excellent one.

In many cases distribution difficulties occur because people are shipping goods from Atlantic Canada in less than carload or expressload lots and when there is a reordering of goods they have to go back to the factory in Atlantic Canada and ship it up again. We think that a good deal of these difficulties would be met if, instead of doing the warehousing in Atlantic Canada, we did it in the market areas—in Montreal, Toronto, Boston or wherever the market might be—and ship the commodities in the cheapest way possible to those areas, perhaps in carload lots in off-season peaks and so on. Then, assistance is required with warehousing costs this body should assist with those costs, thereby assisting industry to market its goods by having goods on hand when reordering is needed. In this way, if a replacement part is needed, it can be supplied immediately rather than having to wait two weeks for it to come from the Maritime factory. That is what that would mean.

We recommend the provision of assistance in the commencement of new transportation facilities and operations. Many times there is a requirement for some new facility or some new method of handling goods to be set up which would improve things greatly but, because the industry is too small, there is no money to do it. This new body that the premiers suggested, I submit, should have the ability and the power to assist industry in that way.

If a new facility or a new service is needed and it requires subsidization for six months or a year to get it going, this is where this body comes into play. In my view, this would serve the same purpose as Industrial Estates in Nova Scotia or some other group which assists an industry to get on its feet. So if transportation assistance is necessary, this

[*Interpretation*]

dont serait utilisé l'argent versé aux termes de la *Loi sur les taux de transports dans les Maritimes* et déciderait également quelles industries recevraient de l'aide et lesquelles n'en recevraient pas. Les membres de cet organisme décideraient, en d'autres mots, de la façon dont serait utilisé cet argent. Nous croyons que si cela se fait ainsi ce sera un grand pas dans la bonne direction. Nous participerions ainsi, d'avantage, au développement de notre propre industrie.

Au treizième paragraphe, nous suggérons l'aménagement d'installation d'entreposage dans les centres de distribution des principaux marchés à l'extérieur des provinces de l'Atlantique. C'est une suggestion qui a été formulée par d'autres que le National-Canadien et nous la trouvons excellente.

Dans plusieurs cas, il y a des difficultés de distribution parce que les gens expédient leurs produits des provinces de l'Atlantique dans des lots brisés ou de moins d'une wagonnée. Et alors, quand on passe une nouvelle commande il faut revenir dans les provinces de l'Atlantique et l'obtenir de là en vue de l'expédition. Nous croyons qu'on pourrait éliminer une bonne part de ces difficultés si, au lieu d'entreposer les produits dans les provinces de l'Atlantique, ils l'étaient à Montréal, Toronto, Boston, ou ailleurs. Les produits pourraient être expédiés par wagons complets, par exemple, hors des périodes de pointe. Si certains ont besoin d'aide pour défrayer les coûts d'entreposage, cet organisme pourrait s'en charger et ainsi aider à la mise en marché des produits. Si une pièce est défectueuse, il serait ainsi possible pour le client de l'obtenir rapidement sans avoir à attendre qu'elle arrive de l'usine. C'est ce que cela veut dire.

Nous recommandons qu'une aide soit apportée lors de la mise en place de nouveaux services de transport. Il arrive souvent qu'il soit nécessaire de recourir à de nouvelles méthodes mais l'industrie étant trop petite l'argent nécessaire à cette fin fait défaut. Ce nouvel organisme suggéré par les premiers ministres devrait avoir la capacité et le pouvoir d'aider l'industrie à cet égard.

Si un nouveau service s'avère nécessaire, et s'il doit être subventionné durant six mois ou un an afin d'assurer sa mise sur pied, ce nouvel organisme serait tout désigné. C'est la même chose, à mon sens, que les *Industrial Estates* en Nouvelle-Écosse, ou tout autre groupe qui aide une industrie à s'établir. S'il doit y avoir assistance dans le domaine des

[*Texte*]

body should be able to provide it.

The establishment and maintenance of research facilities available to shippers

• 1125

experiencing problems of marketing and/or distribution appear to be desirable as a means of stimulating economic growth of these industries in Atlantic provinces. Research into problems of marketing and distribution is one area in which we in Atlantic Canada and I think in the whole of Canada are very deficient.

As you know, the Canadian Transport Commission in its newly re-organized form has large research arm. But it is a problem to get it organized, to get people, to get the material and the details that they need to do their work and we feel that this new organization in the Maritimes, either in liaison with the Canadian Transport Commission or perhaps with some of their own resources, should begin to conduct research into our own Maritime transportation, marketing and distribution problems to find out why we have difficulties, where the difficulties are and what can be done about them, what the facts are, not just what the complaints are, and not only what people's general views are but what the detailed facts are in respect of various transportation problems. We would help ourselves a great deal in that area if we placed a good deal of emphasis on the research side of this proposed new organization.

Rather than pure research I am thinking of research into the marketing of goods, which is a thing we are interested in, and in the physical distribution of goods right from the time an article comes off the machine at the factory until it goes into somebody's hands to be used—including warehousing, transportation, financing of the whole matter, the sales organization that sells it, distribution from some forward point by highway or something of that kind, packaging—the whole thing. In our view, this is badly needed. As well as the other things that such a Maritime or Atlantic provinces oriented group could do, they could provide great facilities to industry which could not afford to do these things and give them the necessary know-how in that regard.

Gentlemen, that is an outline of our views on what is going on and what should be done. What I have been speaking of here are not only my views. This is a framework with which the management of our company is fully familiar. They feel this is the right way for us to proceed. Our planning and organiza-

[*Interprétation*]

transports, cet organisme devrait pouvoir s'en charger.

L'établissement et le maintien d'un service de recherches disponible pour les expéditeurs ayant à faire face à des problèmes de marketing ou de distribution nous semblent utiles pour stimuler l'essor industriel des provinces de l'Atlantique. La recherche sur les problèmes de distribution et de commercialisation est une des lacunes dont souffrent les provinces maritimes et le Canada tout entier.

La nouvelle Commission canadienne des transports à un service de recherches. Mais il lui est difficile de l'organiser, de trouver du personnel et de trouver tout ce dont il a besoin pour effectuer son travail. Nous croyons que ce nouvel organisme, dans les Maritimes devrait, en collaboration avec la Commission ou de lui-même effectuer des recherches sur les problèmes de distribution et de commercialisation dans les Maritimes, avant d'établir pourquoi nous avons des difficultés, que sont-elles, ce qui peut être fait pour les régler, quels sont les faits, non pas seulement quelles sont les plaintes et les opinions générales, mais quels sont les faits au sujet des principaux problèmes de transport. Nous pourrions nous aider beaucoup dans ce domaine si nous insistions sur l'aspect recherches de cet organisme proposé.

Je ne pense pas à la recherche pure, mais à la recherche relative à la commercialisation de nos produits, de nos denrées ainsi qu'à la distribution de nos produits, à compter du moment où ils quittent l'usine jusqu'au moment où ils entrent dans les mains de l'usager. Le financement, le transport, la vente, l'organisation des ventes, la distribution, l'empaquetage, et tout. A notre sens, nous en avons grandement besoin. Et tous ces autres aspects dont cet organisme pourrait s'occuper: il pourrait offrir à l'industrie ce qu'elle ne pourrait s'offrir elle-même.

Voilà, messieurs, un résumé de notre point de vue sur ce qui se passe et sur ce qui devrait se faire. Je pourrais peut-être ajouter que ce dont je parle ici, ce n'est pas tout simplement mon opinion personnelle, mais il s'agit d'un point de vue que connaît très bien la direction de notre compagnie. La direction

[*Text*]

tion for the future of Atlantic Canada is proceeding along these lines. Of course many things do not lie within our own hands to do. In any event, this is our view of what should be done, and this is what we intend to follow.

The Chairman: Mr. Rose.

Mr. Rose: On a minor point of order, what I have to say may or may not be of assistance in facilitating our discussions from now on. This has been a very comprehensive brief and I am sure there are going to be a great number of questions by a great number of people. I was wondering if it might be possible to deal with a particular round of questions on a seriatim basis—that is, on a point by point basis as raised by Mr. MacDougall. Otherwise we will be all over the place and will not be dealing with any one particular item at one particular time. I do not feel strongly about this but I think it might be helpful.

The Chairman: Do you mean that you want to start with paragraph one?

Mr. Rose: Yes.

Mr. McGrath: I think he wants the rule of relevancy strictly applied. Is that not correct?

Mr. Rose: Well I thought that some of these are . . .

Mr. McGrath: Is that what you mean by seriatim?

Mr. Rose: I am pleased that I have been able to provide the member from St. John's East with a new word today.

I thought we could deal with the items one by one and have a round of questions on each one.

Mr. McGrath: I was going to raise a point of order, Mr. Chairman, but I can speak to the point raised by Mr. Rose.

I think his suggestion is a very good one. These are very busy gentlemen and we want to impress them with our efficiency, because we are an efficient committee.

Mr. Rose: A fishing Committee.

Mr. McGrath: In that connection, Mr. Chairman, I was going to make a suggestion to the Committee. Bearing in mind the fact that the CNR is a crown corporation and has to compete, and bearing in mind that there are numerous questions that we would like to

[*Interpretation*]

estime que telle est la manière de procéder. Dans notre propre organisme, c'est comme cela que nous envisageons l'avenir des provinces de l'Atlantique. Évidemment, tout ne relève pas de nous, mais voilà notre opinion sur ce qui devrait se faire. C'est cette voie que nous entendons suivre.

Le président: Monsieur Rose.

M. Rose: Je voulais faire un léger rappel au Règlement dans l'espoir de faciliter nos discussions à l'avenir. Le mémoire est très complet et je suis sûr qu'il y aura un très grand nombre de questions posées. Je me demande s'il serait possible de traiter successivement des divers points soulevés par M. Macdougall. Autrement, on pourrait discuter de toutes sortes de points et on ne discutera pas d'un seul point à un moment donné. Je crois que cela aiderait peut-être.

Le président: Vous voulez dire en commençant par le paragraphe 1?

M. Rose: Oui.

M. McGrath: Je crois qu'il désire que nous nous en tenions strictement à la question de pertinence.

M. Rose: Je croyais que . . .

M. McGrath: C'est cela que vous voulez dire par successivement?

M. Rose: Je suis très heureux d'avoir pu fournir au député de Saint-Jean-Est l'occasion d'utiliser un nouveau mot. Nous pourrions parler des divers points un à un et permettre des questions sur chacun, successivement.

M. McGrath: J'allais justement en appeler au Règlement, monsieur le président, mais je parlerai sur le point soulevé par M. Rose.

Je trouve sa suggestion excellente. Nos témoins sont des hommes très occupés et nous voulons justement les impressionner par notre efficacité car notre Comité est efficace.

M. Rose: Vous dites que vous aimez la chasse?

M. McGrath: Je voulais justement faire une suggestion, monsieur le président. Puisque le CN est une société de la Couronne qui doit faire face à la concurrence et puisque nous poserons sans doute nombre de questions aux représentants du CN mais que certaines

[*Texte*]

• 1130

direct to officials from the CNR the answers to which may not be in the interests of the company to release to the general public—for example, in respect of their accounting procedures—and which they may have the right under a certain section of the Railway Act not to reveal, I suggest that when we get to this particular area—and this is in line with Mr. Rose's suggestion—we ask strangers to leave the room and hold that particular phase of our hearing in camera.

The Chairman: Are you on a point of order?

Mr. Rock: Yes. If we do agree to proceed item by item I feel that the CNR should make a statement of some kind on the passenger service in Newfoundland. I know it is covered in here to some degree but there will be a lot of questions asked on this and I think it would be beneficial if they made some kind of formal statement.

The Chairman: We will get to that point later, Mr. Rock.

Mr. Rock: I know it is generally covered in paragraph 10 but I thought if a statement were made now we would be in a better position for questioning.

Mr. McGrath: We have waited a long time for this, Mr. Chairman.

The Chairman: Mr. Peddle?

Mr. Peddle: Mr. Chairman, I do not think the suggestion is that we necessarily have to be confined to the items outlined by the CNR officials. These are suggestions for questions we should ask. I do not think that we are going to be confined to that.

The Chairman: I agree with you, Mr. Peddle. Just a minute. One at a time, please.

Mr. McCleave: Instead of following the number system 1 to 13 which Mr. Macdougall has presented to us why does not each member raise a topic and speak to it until it is exhausted, with the next questioner on your list going to something else?

The Chairman: I think that would be the easiest way Mr. Breau?

Mr. Breau: Mr. Chairman, on a point of order. I was going to suggest that we divide it

[*Interprétation*]

réponses ne devraient peut-être pas être rendues publiques, en autres dans le domaine de la comptabilité, ce qu'elle a peut-être le droit de faire, je suggère que lorsque nous en arriverons à des questions de ce genre, le public soit invité à quitter la salle et que nous poursuivions à huis clos.

Le président: Vous en appelez au Règlement?

M. Rock: Oui. Si nous procédons item par item, je crois que les fonctionnaires du National-Canadien devraient faire une déclaration sur le service voyageur à Terre-Neuve. Je sais que le mémoire traite de cette question mais il y aura certainement beaucoup de questions de posées à ce sujet. Je crois qu'il serait préférable que les représentants du CN fassent une certaine déclaration officielle.

Le président: Nous en arriverons à ce point-là, monsieur Rock.

M. Rock: Je sais que c'est généralement prévu à l'alinéa 10, mais je crois que si une déclaration était faite en ce moment, nous serions mieux préparés pour poser les questions.

M. McGrath: Nous avons attendu longtemps pour cela, monsieur le président.

Le président: Monsieur Peddle?

M. Peddle: Je ne crois pas, monsieur le président, que nous soyons nécessairement limités aux questions soulignées par les fonctionnaires du National-Canadien. Il s'agit de suggestions au sujet des questions que nous devrions poser. Nous ne sommes pas nécessairement limités à cela.

Le président: Je suis de votre avis, monsieur Peddle. Un moment s'il vous plaît. Un à la fois.

M. McCleave: Au lieu de suivre le système numérique de 1 à 13 tel que proposé par M. Macdougall, pourquoi ne nous arrangeons-nous pas pour que chaque membre soulève un sujet et en discute jusqu'à ce qu'il l'épuise, pour passer ensuite à un autre membre qui soulèvera un autre sujet.

Le président: Je crois que ce serait le plus simple. Monsieur Breau?

M. Breau: C'est sur un point d'ordre monsieur le président. J'allais suggérer que l'on

[*Text*]

some other way but now that Mr. McCleave has suggested that, I think this is a better idea.

Mr. McGrath: My point has not been dealt with, Mr. Chairman, and that is that when we get into the area of accounting procedures or questions which it would not be in the interest of the railway to have released to the public we agree to clear the room of strangers and sit in camera.

The Chairman: Would you agree, Mr. McGrath, that we sit the rest of the morning in open committee and that this afternoon we sit in camera?

Mr. McGrath: That is a good suggestion.

The Chairman: Then we will sit at 3.30 this afternoon.

Mr. Skoberg: Mr. Chairman, I think that on the particular item mentioned by Mr. McGrath this is proper. But I do not agree with sitting in camera on some of the other items that may be brought up. This has been a public hearing throughout the whole Atlantic provinces, and for other than those specific items mentioned I would not agree.

The Chairman: Well, we can sit in camera for an hour this afternoon. Then if you feel that important questions are asked, we can go back to an open meeting.

Mr. McGrath: I do not think that is necessary, Mr. Chairman, with great respect. Your suggestion was a good one but I do not think it is necessary to confine it to a timetable. All we have to do is to agree that when a witness suggests that it is not in the interest of the railway to answer a question we clear the room.

Mr. Rose: Mr. Chairman, on a point of order, I certainly did not mean that we should confine our discussions to these 13 points. I am more concerned with what the CNR did not say than with what they did say, and I certainly would not want to be confined to these things. It was a suggestion for procedure only because I have been through such meetings where we get jammed up and way off the topic and I was hoping to avoid this.

The Chairman: I think we should not waste any more time on points of order as we could be on points of order all morning. I think we shall carry on. Mr. Skoberg, you have the floor.

[*Interpretation*]

procède autrement, mais puisque la suggestion de M. McCleave est bonne, je crois que nous devrions procéder de cette façon.

M. McGrath: Le point que j'ai soulevé n'a pas été discuté, monsieur le président; je voulais proposer que lorsque nous en arriverons à discuter de comptabilité ou de questions qui de l'avis des compagnies de chemins de fer ne devraient pas être rendues publiques, de siéger à huis clos.

Le président: Monsieur McGrath, seriez-vous d'accord que nous siégions cette matinée en comité et que cet après-midi, la séance soit tenue à huis clos?

M. McGrath: C'est une bonne idée.

Le président: Ce sera donc à 3h. 30 p.m.

M. Skoberg: Monsieur le président, je suis d'accord pour ce qui est de la proposition de M. McGrath. Mais je ne suis pas d'accord que nous siégions à huis clos pour certaines autres questions qui pourraient être soulevées. Jusque-là, nos audiences ont été publiques à travers les provinces de l'Atlantique et outre les questions précises dont il a été question, je ne serais pas d'accord.

Le président: Dans ce cas nous pourrions siéger à huis clos pendant une heure cet avant-midi. Ensuite, si vous croyez que d'importantes questions sont posées, nous pourrons siéger en public.

M. McGrath: Je ne pense pas que cela soit nécessaire, monsieur le président. Votre proposition était bonne, mais je ne pense pas qu'il soit nécessaire de la limiter à un horaire fixe. Tout ce que nous avons à faire, c'est de convenir de tenir la séance à huis clos dès que le témoin suggère qu'il n'est pas dans l'intérêt des chemins de fer de répondre à la question.

M. Rose: Monsieur le président. Sur un point d'ordre, je ne voulais pas dire que nous nous en tenions aux 13 points. Ce qui me préoccupe le plus, c'est ce que le CNR n'a pas dit plutôt que ce qu'il a dit, et je ne voudrais certainement pas être limité à ceci. Je suggérais simplement une question de procédure, car j'ai déjà assisté à des séances où on était débordés et bien en dehors du sujet, c'est pourquoi j'essayais d'éviter cela.

Le président: Je crois que nous avons déjà perdu assez de temps sur des questions d'ordre. Je pense que nous devrions maintenant poursuivre nos questions. Monsieur Skoberg, vous avez la parole.

[*Texte*]

Mr. Skoberg: Mr. Chairman, I am sure that all of us of this Committee have appreciated the summation that has been presented to us today. I believe that the officials of the CNR will agree that the proposals and the summaries that they have here will take a lot of co-operation among every form of government and the private enterprise people in the field to bring about proper economic planning

• 1135

for the entire area. I expect that they would agree that a real challenge is ahead of us to bring about an entire regional economic development, and I would suggest that they look very closely at any further abandonments of branch lines or curtailment of service until the legislation is brought down defining the growth areas generally.

I certainly agree with your summary in regard to the growth areas with regard to what the Economic Council of Canada has said and I would ask you to take that under serious consideration until such time as these areas are defined by the new legislation.

I think there is one thing on our minds—and no doubt it is on all of our minds at this particular time. When we had Mr. Pickersgill with us the other day, he indicated that he had not been notified at that time of any curtailment of passenger service in Newfoundland. I understand that you have recently written a letter to the CTC indicating that your company, the CNR, is contemplating continuing this service for a period of time. I think the first question should be as to whether or not you are familiar with the action that this Committee has taken and has reported to the House as of yesterday in regard to the retention of this passenger service. Are you familiar with that?

Mr. Vaughan: No, sir, we are not.

Mr. Skoberg: Well, this committee has recommended that the order of the CTC—we are well familiar with the order number—authorizing the CNR to suspend rail passenger service in Newfoundland on April 15 be left in abeyance until the Committee tables a complete report. The question immediately arises then, that in your letter to the CTC you did suggest that you are contemplating continuing this service for a period of time. Would you agree that the period of time be at least as long as it takes this Committee to

[*Interprétation*]

M. Skoberg: Monsieur le président, je suis sûr que tous les membres du Comité apprécient la déclaration qui a été faite aujourd'hui, mais je crois que les fonctionnaires du CN seront d'accord que les propositions, contenues dans le résumé qu'ils ont ici, nécessiteront beaucoup de collaboration entre tous les paliers de gouvernement, et l'entreprise privée dans ce domaine, pour aboutir à une planification économique dans toute la région. Ils conviendront aussi que nous affrontons présentement un vrai défi qui consiste à aboutir au développement économique régional, et je leur conseille de penser à deux fois avant d'abandonner les lignes secondaires ou de réduire le service et cela jusqu'à ce qu'on ait une Loi qui définisse les centres de croissance en général.

Je suis tout à fait d'accord avec ce que vous dites dans votre sommaire touchant les centres de croissance et ce qu'a dit le Conseil économique du Canada à ce sujet, mais je vous demanderais d'en prendre connaissance jusqu'à ce que ces centres soient définis dans la nouvelle loi.

A mon avis, il y a un point qui nous préoccupe tous en ce moment. M. Pickersgill avait indiqué l'autre jour qu'il ignorait tout d'une élimination éventuelle du service de voyageurs à Terre-Neuve. Si je comprends bien vous avez écrit récemment une lettre à la Commission canadienne des transports indiquant que votre compagnie, le National-Canadien, songeait à maintenir ce service pour quelque temps. La première question serait la suivante: Etes-vous au courant ou pas des mesures prises par ce Comité et du rapport qu'il a fait dès hier, à la Chambre à l'égard du maintien du service des voyageurs?

M. Vaughan: Non, monsieur, nous ne le sommes pas.

M. Skoberg: Nous avons recommandé que l'ordonnance de la Commission, et nous connaissons le numéro de l'ordonnance, autorisant le National-Canadien à suspendre son service de voyageurs à Terre-Neuve le 15 avril, ne soit pas appliquée et cela jusqu'à ce que notre Comité ait reçu un rapport complet. La question qui se pose à présent, c'est que, dans votre lettre à la Commission, vous avez laissé entendre que vous songiez à maintenir le service pendant un certain temps. Accepteriez-vous que cette période de temps soit au

[*Text*]

complete its report before any action is taken to curtail that service? The method that you have used now in communicating with the CTC is too vague.

Mr. Vaughan: Well, perhaps you refer to a letter which it might be beneficial to the Committee for us to table.

Perhaps the letter that Mr. Skoberg refers to should be read by Mr. Macdougall and tabled for the benefit of the other members of the Committee.

Mr. Skoberg: For the record, I have not seen the letter.

Mr. Vaughan: Oh, I see.

Mr. Skoberg: In verbal conversation I understand you have indicated this to the CTC. I have not seen the letter. I want to have that absolutely understood.

Mr. Vaughan: Well, I did not know how the CTC handles correspondence or anything but we did write them a letter and we will make it available to you, so I will have Mr. Macdougall refer to the letter. The letter is from our Commission Counsel. He is the man who carries on the constant liaison with the Railway Committee of the Canadian Transport Commission.

The Chairman: Is it agreed by the Committee that the letter be read?

Mr. Macdougall: The letter is addressed to Mr. D. H. Jones, Chairman, Railway Transport Committee, Canadian Transport Commission, Ottawa, Ontario. It is dated March 14, 1969.

Dear Mr. Jones: Re—Newfoundland Passenger Train Service.

I thought it appropriate that I write to you in connection with the current situation concerning Trains Nos. 101 and 102 and coach service on Mixed Trains Nos. 203 and 204 in the Province of Newfoundland. This will confirm also the recent and several informal conversations that we have had related to equipment to be retained for stand-by purposes after the particular train services are discon-

[*Interpretation*]

moins aussi longue que la période de temps nécessaire à ce comité pour compléter son rapport avant que des mesures soient prises pour réduire le service. La méthode dont vous vous êtes servi pour entrer en rapport avec la Commission canadienne des transports est trop vague.

M. Vaughan: Vous parlez peut-être d'une lettre? Ce serait peut-être avantageux pour le Comité que nous déposions la lettre. Peut-être que la lettre dont M. Skoberg fait allusion devrait être lue et déposée par M. Macdougall pour que les autres membres du Comité en prennent connaissance.

M. Skoberg: Je tiens à vous dire que je n'ai pas vu la lettre.

M. Vaughan: Je vois.

M. Skoberg: Lors d'une conversation j'ai cru comprendre que vous l'aviez indiqué à la Commission; je n'ai pas vu la lettre encore. Je veux que vous compreniez cela une fois pour de bon.

M. Vaughan: Je ne savais pas ce que faisait la Commission avec sa correspondance, mais nous leur avons écrit une lettre que nous allons mettre à votre disposition, ainsi je demanderai à M. MacDougall d'en faire état. La lettre provient de notre conseiller juridique, qui est chargé de la liaison continuelle avec le comité des chemins de fer auprès de la Commission canadienne des transports.

Le président: Le Comité est-il d'accord que la lettre soit lue?

M. Macdougall: La lettre est adressée à M. D. S. Jones, président du Comité des Chemins de fer auprès de la Commission canadienne des transports, Ottawa (Ontario). La lettre est datée du 14 mars 1969.

Monsieur,

Objet: Service ferroviaire de voyageurs Terre-Neuve

J'ai cru utile de vous écrire à propos de la situation actuelle, concernant les trains n° 101 et 102 ainsi que le service de voyageurs sur les trains mixtes n° 203 et 204 dans la province de Terre-Neuve. Ceci confirmera également les récentes et nombreuses conversations que nous avons eues concernant le matériel que l'on devra tenir en réserve après la suspension des services ferroviaires en cause,

[*Texte*]

tinued, and also discussions concerning actual train and bus carryings over the past winter.

I would specifically direct your attention to Clause 1, paragraph (2) of Order No. R-2673. The burden of this sub-clause is that until the Railway is notified by your Committee that the bus service is inaugurated and that passenger facilities are provided and installed to the satisfaction of the Committee, the passenger service shall continue to be operated in the same manner and as frequently as it was during the comparable period in 1967. Throughout the winter we have been keeping a close check on the situation and as the April 15th date approaches, which is the date on which the Commission must make its final disposition of the matter, we are in the process of re-assessing the situation. This, basically, was the intended import of the recent statements by Newfoundland Railway officers in response to inquiries. From the recent statistics that I have it will be apparent that there has been a very heavy response to the bus operation by the people of Newfoundland, and in light of this our operating people are examining the position regarding the number of buses that will be required during the coming months.

In view of this, we have in contemplation the possibility of having the train services extended for a short period beyond April 15th, but we would not expect that the train services would be required beyond June 15th. At this point in time it is not possible to say whether such services would be required until the June 15th date. For the sake of clarity, and so there will be no misunderstanding of our position, it is not our intention that the train services be continued indefinitely. As our current examination is completed, we will confirm what we regard as the requirements of the situation.

Canadian National has endeavoured to be flexible in its approach, particularly during the transitional period from train operation to bus operation, bearing in mind that the new service was inaugurated in the late fall of 1968 and has continued with good results throughout the current winter. The carryings are as follows:

[*Interprétation*]

ainsi que les discussions concernant le nombre de personnes qui ont réellement emprunté les autobus, l'hiver dernier.

Je voudrais surtout attirer votre attention sur l'article 1, alinéa (2) de l'Ordonnance nº R-2673. Le fardeau qu'impose ce paragraphe est que, jusqu'à ce que la compagnie de chemins de fer soit notifiée par votre comité que le service d'autobus est inauguré et que les installations pour le service de voyageurs sont assurées et mises en place à la satisfaction du comité, le service de voyageurs doit continuer de fonctionner de la même façon, en gardant la même fréquence que celle de la même période de l'année 1967. Durant tout l'hiver, nous avons surveillé la situation de très près, et comme le 15 avril est tout proche, date à laquelle la Commission doit prendre ses dispositions définitives à cet égard, nous sommes en train de réévaluer la situation. En principe, c'est ce que visaient les déclarations des hauts fonctionnaires des chemins de fer de Terre-Neuve à la suite des enquêtes effectuées. Les derniers renseignements dont je dispose indiquent une très forte réaction de la part des terreneuviens, en faveur d'un service d'autobus, et par conséquent, nos représentants étudient la situation pour ce qui est du nombre d'autobus qui seraient requis durant les prochains mois.

Cela nous mène à étudier la possibilité de prolonger la durée du service ferroviaire pour une courte période au-delà du 15 avril, mais nous ne croyons pas en avoir besoin au-delà du 15 juin. Nous ne pouvons dire en ce moment, si ces services seraient requis jusqu'à la date du 15 juin. Pour être plus clair et pour éviter tout malentendu concernant notre position, nous n'avons nullement l'intention de maintenir indéfiniment les services ferriaires. Dès que l'étude en cours aura pris fin, nous vous ferons part des besoins de la situation.

Le National-Canadien s'est efforcé d'avoir une attitude assez souple, en particulier pendant la période de transition entre l'exploitation du service ferroviaire et celle du service d'autobus, étant donné que ce dernier service a été inauguré à la fin de l'automne 1968 et a continué de façon satisfaisante pendant tout l'hiver. Voici le nombre des voyageurs qui ont emprunté ces services:

Comparative Train Handlings in 1967

December	6506
January	5389
February	3207

We shall advise you in due course as to the results of our current re-assessment.

Yours very truly,

H. J. G. PYE,
Commission Counsel.

Mr. Skoberg: Thank you, Mr. Macdougall. The date that you have in that letter, then, indicates that June 15 is the period that you now expect to keep this train in operation. Is this correct? Is this what you are reading, June 15?

Mr. Macdougall: It said:

> ...In view of this, we have in contemplation the possibility of having the train services extended for a short period beyond April 15th, but we would not expect that the train services would be required beyond June 15th. At this point in time it is not possible to say whether such services would be required until the June 15th date.

You can see from the carryings that the bus carryings are quite heavy and the total carryings are heavier than they were the year before, quite considerably, so we have had to make some judgment as to the number of buses that were needed before this service started and those buses are in service and are being used.

The question now arises, are they going to be sufficient, because the train service is to continue until the bus service is sufficient and suitable to the Commission. They told us that they would not decide this before April 15. They may not be sufficient until August 15 or June 15, I do not know, but we are not allowed to take that service out until the Commission is satisfied that the service is sufficient, so we have to assess the bus requirement.

This is the thing we are doing at the moment. Our intention is to continue to provide the train service until such time as the Commission is satisfied that they can execute

Nous vous aviserons en temps voulu des résultats de notre réévaluation actuelle.

Veuillez agréer, monsieur, l'assurance de ma considération distinguée.

Le conseiller juridique
auprès de la Commission,
H. J. G. Pye.

M. Skoberg: Merci, monsieur Macdougall. D'après la date indiquée dans cette lettre, le 15 juin est la date jusqu'à laquelle vous comptez maintenir ce train en service. Est-ce bien cela? Est-ce bien ce que vous lisez? Le 15 juin?

M. Macdougall: On disait:

> . En conséquence, nous songeons à la possibilité de maintenir les services ferroviaires pendant quelque temps après le 15 avril, mais nous ne pensons pas que ces services soient nécessaires après le 15 juin. Pour le moment, il est impossible de dire si l'on aurait besoin de ces services jusqu'au 15 juin.

Vous pouvez voir, d'après le nombre des voyageurs, que le nombre des voyageurs par autobus est assez grand et que le nombre total des voyageurs est beaucoup plus élevé que l'année précédente. Il nous a donc fallu décider combien il faudrait d'autobus avant que ce service ne débute, et ces autobus sont maintenant au service et sont bien utilisés.

On se demande maintenant si le nombre d'autobus va être suffisant, car le service de train doit être maintenu jusqu'à ce que le service d'autobus soit suffisant et convienne à la Commission. On nous a dit que l'on ne pourrait en décider avant le 15 avril. Le service ne sera peut-être pas suffisant jusqu'au 15 août ou jusqu'au 15 juin, mais nous n'avons pas le droit de le supprimer tant que la Commission ne sera pas convaincue que le service est suffisant, et il nous faut donc évaluer les besoins du service d'autobus.

C'est ce que nous faisons en ce moment. Nous avons l'intention de continuer à assurer le service ferroviaire jusqu'à ce que la Commission soit convaincue qu'elle peut mettre à

[*Texte*]

their order in the form in which it has been made and we will continue to provide the train service. The point is, we do not really know. We do not think April 15 is going to be the date, but we do not know whether it is May 15 or June 15. Then, or course, you have the possibilities of weather conditions worsening in Newfoundland and April 15 may not be an appropriate date at all.

We are really just saying that we are intending to continue that service until such time as it is quite clear that the people of Newfoundland will have a good and sufficient service satisfactory to the Commission. When that day comes we expect that the train service will cease.

Mr. Skoberg: I think you will appreciate, Mr. Chairman, . . .

Mr. McGrath: On a point of order, Mr. Chairman. The letter that has been read and referred to constitutes a very important document so far as our examination is concerned, and I would therefore request that it be tabled and immediately distributed.

The Chairman: Is it agreeable to the Committee?

Some hon. Members: Agreed.

Mr. Skoberg: Mr. Chairman, I am sure that Mr. Macdougall can appreciate the position it puts this Committee in at this particular time and in particular when Mr. Pickersgill is before us. We had a press release from the C.N. management in Newfoundland indicating that the Newfoundland passenger service would remain. They knew nothing about it, of course, at the Canadian Transport Commission.

This is why we were concerned as to just what was involved and I believe your explanation now certainly indicates that it is a temporary measure. I will pose a direct question then, Mr. Chairman. Could you give the assurance to this Committee at this time that you will leave the passenger train service on in Newfoundland until this Committee has an opportunity to report to the House with its final report?

• 1145

Mr. Vaughan: There is a legal situation here. With due respect, we will endeavour to answer your questions as best we can and give you straightforward answers and opinions. There is a legal situation in that there was a hearing under the statute and under

[*Interprétation*]

exécution son ordonnance sous la forme sous laquelle elle a été rendue, et nous continuerons à assurer le service des trains. Le problème, c'est que nous ne savons pas vraiment. Nous ne pensons pas que la date sera le 15 avril, mais nous ne savons pas si ce sera le 15 mai ou le 15 juin. De plus, il y a, bien entendu, la possibilité que les conditions atmosphériques ne s'aggravent à Terre-Neuve, et le 15 avril ne soit absolument pas une date appropriée. En fait, nous voulons simplement dire que nous avons l'intention de maintenir ce service jusqu'à ce qu'il soit bien clair que la population de Terre-Neuve aura un service satisfaisant et suffisant, et qui convienne à la Commission. Alors le service de trains sera sans doute supprimé.

M. Skoberg: Je pense que vous vous rendez compte, monsieur le président . . .

M. McGrath: J'invoque le règlement; monsieur le président. La lettre que l'on nous a lue et que l'on a mentionnée est un document des plus importants pour ce qui est de notre étude, et je demande donc qu'on la dépose et qu'on nous la distribue immédiatement.

Le président: Est-ce que cela convient au Comité?

Des voix: D'accord.

M. Skoberg: Monsieur le président, je suis certain que M. Macdougall se rend compte de la situation dans laquelle cela met le Comité en ce moment, surtout en présence de M. Pickersgill. Il y a eu un communiqué de presse de la direction du National-Canadien à Terre-Neuve, dans lequel on dit que le service de trains sera maintenu. Bien entendu la Commission canadienne des transports n'était pas au courant.

C'est pourquoi nous tenions à savoir de quoi il s'agissait exactement, et l'explication que vous nous avez donnée indique, assurément, qu'il ne s'agit que d'une mesure provisoire. Je vais donc poser une question directe, monsieur le président. Pourriez-vous donner dès maintenant au Comité l'assurance que vous allez maintenir le service de trains à Terre-Neuve jusqu'à ce que le Comité ait eu l'occasion de faire son rapport final à la Chambre?

M. Vaughan: Il y a ici une situation qui relève du domaine juridique. En toute déférence, nous allons essayer de répondre à vos questions de notre mieux, et de vous donner des réponses et des avis francs. Il y une situation qui relève du domaine juridique en

[*Text*]

the regulaitons that Parliament has prescribed. The Company went before the Commission in accordance with the statute and in accordance with the regulations, and in due course a hearing was held and a judgment rendered and that judgment you are familiar with and we refer to part of it in this letter.

Simultaneously with that, your Committee has been dealing with Maritime transportation problems and you visited various points in the Atlantic Canada and had other people appearing before you. We do not know and we have not seen any evidence of what transpired here a week ago, but I would ask your indulgence that you do not ask us to endeavour at this point to vary or attempt to vary or to give new evidence that might vary a judgment that now exists.

As you just stated a moment ago your Committee, in a report tabled yesterday which you just read, Mr. Skoberg, now poses another matter in relation to it. We would really appreciate your indulgence that you do not ask us to endeavour to vary the situation as it exists. You have two points. We refer to Clause 2 of Order No. R-2673. That is the current situation now before the Commission and I think it would be improper to ask us to make a further statement in relation to that legal situation.

Mr. Skoberg: May I ask then, on a straight legal definition of R-2673 which says:

> subject to the following conditions, the Applicants shall, on April 15, 1969,...

Mr. McGrath: Mr. Chairman, I am going to raise a point of order before we proceed. A very important statement has been made and if it is allowed to go unchallenged we may as well dispense with this hearing now because according to what Mr. Vaughan has said he is not permitted to give any new evidence which would have any relationship to or alter in any way the judgment of the CTC, and he asks our indulgence not to ask questions which would shed any new light on it.

Mr. Vaughan: I did not say that I would not. I really tried to outline to you the legal situation.

Mr. McGrath: That is right. We appreciate that.

[*Interpretation*]

ce sens qu'il y a eu une audience en vertu de la loi et des règlements prescrits par le Parlement. La compagnie a comparu devant la Commission, conformément à la loi et aux règlements, et en temps et lieu, on a tenu une audience et rendu un jugement. Ce jugement, vous le connaissez, et nous en mentionnons une partie dans cette lettre.

En même temps, votre Comité a étudié les problèmes des transports dans les provinces Maritimes, et vous avez visité différentes parties de la région de l'Atlantique, où différents témoins ont comparu devant vous. Nous ne savons pas, et nous n'avons pas entendu parler de ce qui s'est produit ici il y a une semaine, mais je vous demande d'être assez indulgents pour ne pas nous demander d'essayer, pour le moment, de modifier un jugement déjà rendu, ou de donner de nouveaux témoignages qui puissent faire modifier ce jugement. Comme vous l'avez dit il y a un instant, votre Comité, dans un rapport déposé hier, et dont vous venez de nous donner lecture, monsieur Skoberg, met une autre question en cause. Nous aimerions que vous soyez indulgents, et que vous ne nous demandiez pas d'essayer de modifier la situation actuelle. Il y a deux questions en cause. Nous parlons de la clause 2 de l'ordonnance nº R-2673. Il s'agit de la situation actuelle que doit étudier la Commission, et je pense qu'il serait malvenu de nous demander de faire une autre déclaration relativement à cette situation d'ordre juridique.

M. Skoberg: Puis-je demander, alors, une définition juridique claire de l'ordonnance R-2673, où l'on dit:

> Sous réserve des conditions suivantes, les demandeurs supprimeront, le 15 avril 1969...

M. McGrath: Monsieur le président, avant que nous n'allions plus loin, je vais invoquer le Règlement. Une déclaration très importante a été faite, et si nous la laissons passer sans la relever, nous pouvons aussi bien ne pas tenir cette audience, car, d'après ce qu'a dit M. Vaughan, il n'a pas le droit de donner de nouveaux témoignages qui aient quelque rapport avec le jugement de la Commission canadienne des transports, ou qui le modifient en quoi que ce soit, et il vous demande de ne pas lui poser de questions qui puissent donner des éclaircissements à cet égard.

M. Vaughan: Je n'ai pas dit que je ne répondrais pas. J'ai réellement essayé de vous expliquer ce qu'il en était sur le plan juridique.

M. McGrath: C'est cela. Nous le voyons bien.

[*Texte*]

Mr. Vaughan: I asked your indulgence if you would not really put me in the position...

Mr. McGrath: We appreciate that, but I just want to say that it seems to me—and I am not a lawyer, Mr. Chairman—that under the National Transportation Act, Section 52 or 53, the Governor in Council has the right upon petition or of their own volition to change the judgment in any way, and it is in this connection and this regard that this Committee is pursuing the judgment that was rendered by the CTC with the view to having the Governor in Council change the judgment.

Mr. McCleave: On the legal point, may I just ask Mr. Vaughan one question? This is something that I raised the other day with Mr. Pickersgill. Is it not a fact, Mr. Vaughan, that the railway has until August 15 to carry out this particular order of the Canadian Transport Commission? Do you not have to carry it within the year? I thought this was a point made by Mr. Pickersgill the other day.

Mr. Vaughan: I thought the order read April 15.

Mr. McGrath: Yes, April 15.

Mr. Skoberg: I have just one last question. I want to leave this and I will not introduce a new subject because I am sure there are many other questions here. The order says:

> the applicants shall, on April 15,

Do I gather then, Mr. Vaughan, that the CNR can vary the order that we have before us?

• 1150

Mr. Vaughan: No, we cannot vary the order. I do not have the order in front of me but I remember reading it and if you look at Clause 1, paragraph 1, it says "shall", does it not? Clause 1, paragraph 2 also says "shall". "That we shall continue".

> The passenger train service shall continue to be operated in the same manner and as frequently as it was during the comparable period 1967, until the Commission is satisfied that such bus service has been inaugurated.

There are two "shalls" in paragraph 1 and paragraph 2.

Mr. Skoberg: I presume then that the Canadian National management has decided that

[*Interprétation*]

M. Vaughan: Je vous ai demandé d'être indulgents et de ne pas me mettre dans une situation...

M. McGrath: Nous nous en rendons compte, mais je voudrais simplement dire qu'il me semble—et je ne suis pas juriste, monsieur le président—qu'en vertu de l'article 52 ou 53 de la Loi sur les transports, le gouverneur en conseil a le droit, sur pétition ou de son propre chef, de modifier le jugement comme il le veut mais c'est pour cette raison et à cet égard que le Comité poursuit le jugement rendu par la Commission canadienne des transports, en vue de faire modifier le jugement par le gouverneur en conseil.

M. McCleave: Sur l'aspect juridique puis-je simplement poser une question à M. Vaughan? C'est un sujet que j'ai déjà mentionné l'autre jour, avec M. Pickersgill. N'est-il pas exact, monsieur Vaughan, que les chemins de fer ont jusqu'au 15 août pour mettre à exécution cette ordonnance particulière de la Commission canadienne des transports' N'a-t-on pas à le faire dans les douze mois? Je croyais que c'était là ce qu'avait dit M. Pickersgill l'autre jour.

M. Vaughan: Je croyais que ce décret disait le 15 avril.

M. McGrath: Oui, c'est cela, le 15 avril.

M. Skoberg: J'ai une dernière question. Je veux en finir, et je ne vais pas aborder un nouveau sujet, car je suis certain qu'il y a beaucoup d'autres questions à étudier. On dit dans l'ordonnance:

> ... les demandeurs supprimeront, le 15 avril 1969...

Dois-je en conclure, monsieur Vaughan, que le National-Canadien peut modifier l'ordonnance que nous étudions actuellement?

M. Vaughan: Non, nous ne pouvons la modifier. Je n'ai pas l'ordonnance sous les yeux, mais je me souviens de l'avoir lue, et, si vous regardez le paragraphe 1 de la clause 1, on y emploie des termes assez catégoriques, n'est-ce pas? Il en est de même du paragraphe 2 de la cause 1, où l'on dit «que le service de trains de voyageurs continuera à fonctionner de la même manière et aussi fréquemment que durant la période comparable de 1967, jusqu'à ce que le service d'autobus ait été inauguré et mis en service à la pleine satisfaction de la Commission». On emploie, dans les paragraphes 1 et 2, des termes assez catégoriques.

M. Skoberg: J'en conclus, alors, que l'administration du National-Canadien a décidé que

[*Text*]

right now the facilities you do have and the bus facilities are not sufficient to meet the demand. In regard to this service are you taking into consideration the weather conditions being very mild in Newfoundland?

Mr. Vaughan: We are really trying to be flexible in dealing with the situation and this is what the letter said and Mr. Macdougall will deal with this in a moment.

Mr. Macdougall: We have the winter weather conditions which have not been as severe in some parts this winter as they probably could be some other winters, although some of it has been as severe as you would ever want to find it. Basically the response that has been given to the bus service which was indicated raised the question in our minds as to whether we had sufficient bus capacity and we are not satisfied that we have not sufficient bus capacity now, and we are not satisfied that we have to get additional buses, but the question has been raised as to whether or not, if this growth goes on much longer which is more than we had expected before, we will have sufficient and how we are going to deal with it. So we are investigating that and trying to make an assessment of it because we know that sometime this spring the Commission is going to ask what the situation is and we have to be in a position where we can show that the service that we said we would provide will be provided in the quality that we said it would be.

Mr. Skoberg: You will leave the train on as is until that time arrives.

Mr. Macdougall: The train will be on until such time as everybody is satisfied, that is, the Commission is satisfied that the bus service is adequate. If they were to say to us, "Your bus service is not adequate because you need three more buses", we are looking at that to make sure we will know the answer to that eventuality should it arise.

Mr. Skoberg: The consist of the train that presently exists will remain until the decision is made?

Mr. Macdougall: It has not changed.

Mr. Lundrigan: May I ask a supplementary question, before we leave the topic, Mr. Chairman? Do I understand that the CNR officials recommended to the Railway Transport Committee of the Canadian Transport Commission that the deadline of April 15 not be enforced until you get the reassessment of your bus facilities, and so on and so forth? Is this my understanding from your letter?

[*Interpretation*]

pour le moment les installations et le service d'autobus dont vous disposez ne sont pas suffisants pour répondre aux besoins. Est-ce que vous tenez compte du fait que la température est très clémente à Terre-Neuve, à l'égard de ce service?

M. Vaughan: Nous essayons d'être très souples face à cette situation. C'est bien ce qui est dit dans la lettre et M. Macdougall vous en parlera dans un instant.

M. Macdougall: L'hiver a été plutôt clément dans certains ports, et cela peut se reproduire, bien qu'à certains moments il était aussi rigoureux que d'habitude. La réaction au service d'autobus qu'on a mentionnée fait qu'on se demande vraiment si nous avons suffisamment d'autobus, et nous ne sommes pas convaincus qu'on manque d'autobus à l'heure actuelle, et qu'il faudrait se procurer d'autres autobus. Mais on se demande, si cette expansion se poursuit à un rythme plus élevé qu'on ne le prévoyait, comment nous allons régler le problème. Nous étudions la situation pour en faire une évaluation parce que nous savons que ce printemps, la Commission nous demandera ce qu'il en est et il nous faudra être en mesure de démontrer que le service que nous avions promis sera bel et bien assuré comme nous l'avions promis.

M. Skoberg: Vous allez donc maintenir le service par train jusqu'à ce moment-là?

M. Macdougall: Jusqu'à ce que tout le monde soit satisfait, c'est-à-dire jusqu'à ce que la Commission soit convaincue que le service d'autobus est adéquat. Si on nous dit qu'il n'est pas adéquat parce qu'il nous faut trois autobus de plus, nous étudierons la situation de façon à savoir quoi répondre dans ce cas.

M. Skoberg: Le service des passagers par train sera maintenu jusqu'à ce que la décision soit prise.

M. Macdougall: Il n'a pas changé.

M. Lundrigan: Puis-je poser une question complémentaire avant qu'on ne quitte ce sujet, monsieur le président? Si je comprends bien, les fonctionnaires du National-Canadien ont recommandé au comité du Transport par chemin de fer de la Commission canadienne des transports que la date limite du 15 avril ne sera pas mise en vigueur jusqu'à ce que vous puissiez réévaluer votre service d'auto-

[*Texte*]

Mr. Vaughan: Well, that is what the letter says.

Mr. Lundrigan: Yes. Well, then, Mr. Chairman, there is a basic contradiction because Mr. Skoberg asked the question as to whether the railway officials would recommend that the rail passenger service status of abandonment be set aside until our Committee had a chance to make its final report and so on—

The Chairman: He has no right to do so.

Mr. Lundrigan: Well, in any event I think the question was that the CN officials stimulate some thinking along the lines of having the decision set aside until such and such a date. This was my understanding.

Mr. Macdougall: No, no that is not the point. The point is that the order specifies that the Commission must be satisfied that the alternate service is sufficient before the train service comes off, and they say it will not happen before April 15. We are simply pointing out to the Committee that we are re-examining the adequacy of the bus capacity and until we have had a chance to do that we are not suggesting to them that they come and ask us on April 15, "Are you ready to take it off?" We are telling them that we may have to go a little longer than that before we can assess this new factor.

Mr. Lundrigan: Well, then my supplementary is this. Regardless of what the order said, could you not recommend as a corporate body that this passenger service continue indefinitely? Could you not recommend this? You have already taken steps partly in that direction.

Mr. Vaughan: We tried to cover that a moment ago.

Mr. Lundrigan: I am sorry but my question was not answered.

Mr. Vaughan: My answer was that I had endeavoured a while back to cover that particular point in conversation with Mr. Skoberg when I outlined the legal position and I asked your indulgence really not to ask us that question.

• 1155

Mr. McGrath: I want to raise a point of order, Mr. Chairman. This is a very important point because unless we get your ruling

[*Interprétation*]

bus, et ainsi de suite? Est-ce que j'ai bien compris votre lettre?

M. Vaughan: C'est ce que dit la lettre.

M. Lundrigan: Alors, monsieur le président, il y a une contradiction fondamentale parce que monsieur Skoberg a demandé si les fonctionnaires du National-Canadien recommanderaient que l'abandon du service des passagers ferroviaire soit mis de côté jusqu'à ce que le Comité ait l'occasion de présenter son rapport final et ainsi de suite.

Le président: Il n'a pas le droit de le faire.

M. Lundrigan: De toute façon, je pense que la question posée était que les fonctionnaires du CN songent à remettre ces décisions à telle ou telle date. C'est ce que j'ai compris.

M. Macdougall: Non, le fait est que le décret précise qu'il faut convaincre la Commission que le nouveau service est adéquat avant que les services ferroviaires soient discontinués, ce qui, selon eux, ne se fera pas avant le 15 avril. On dit tout simplement au comité que nous sommes à réétudier notre service d'autobus pour savoir si le nombre d'autobus est suffisant et que, jusqu'à ce que nous l'ayons fait, nous ne leur disons pas qu'ils viennent nous demander le 15 avril si nous sommes prêts à le discontinuer. Nous disons que nous devrons peut-être le prolonger un peu avant de pouvoir évaluer ce nouveau facteur.

M. Lundrigan: Voici donc ma question complémentaire. Quoi que dise le décret, ne pourriez-vous pas recommander, en tant qu'organisme, que le service voyageurs soit maintenu indéfiniment? Ne pourriez-vous pas faire une recommandation en ce sens? Vous avez déjà pris certaines mesures dans cette voie.

M. Vaughan: Nous avons essayé de répondre à cela il y a un instant.

M. Lundrigan: Je m'excuse, mais on n'a pas répondu à ma question.

M. Vaughan: Ma réponse est que j'ai essayé, il y a un instant, de répondre à cette question au cours d'une conversation avec monsieur Skoberg, lorsque je vous ai exposé la situation juridique et j'ai fait appel à votre indulgence de ne pas nous poser cette question.

M. McGrath: J'en appelle au règlement, monsieur le président. C'est un point très important car à moins que nous ayons votre

[*Text*]

on this it will be a waste of time for us to pursue this matter, because Mr. Lundrigan has directed a question and the witness has referred to the legal position which I brought up a few moments ago on a point of order.

I submit we have every right to pursue questioning and ask for new evidence under Section 53 of the Act, and also under the terms of the interim recommendation we have made to the House. I am going to ask for a ruling on this, Mr. Chairman, so that we can pursue a line of questioning similar to the line Mr. Lundrigan is pursuing now.

Mr. Trudel: Mr. Chairman, on a point of order, I think it is not for this Committee, Mr. Chairman, to interpret the law. We will have to abide by the rulings. On this line of questioning that we have been conducting I see no evidence of the witnesses not co-operating. They have been co-operating, and to my mind we are getting the kind of answers that we want. I do not see any reluctance in the answers. I think they are just stating a fact, and this would apply not only in this particular instance, but with all rulings when it is a point of law that is being disputed, that the witness has no right to interfere. This would apply not only before this Committee but before any other committee. The evidence we are getting now is, in my interpretation of it, sufficient. There will many more questions. We need far more facts than we have had presented but if we keep on arguing as to the point of law we will not get what we are trying to achieve in this Committee.

As to Article 53 that has been mentioned, it is not for the witness to say what the Governor in Council will change after our final report. This will only come at that time and I do not think that we can invoke Article 53 as some members are doing at this time so as to be either for or against the witness's statements that they are giving right now.

Mr. Lundrigan: Mr. Chairman, perhaps in asking my question I did not take enough time to clarify what I was trying to do and perhaps it was a bit misleading. I am aware of the particular part of the act, Section 53, and I am aware of the fact that the Canadian Transport Commission said that the service shall continue until it was satisfied that the alternate service was adequate.

[*Interpretation*]

jugement à ce sujet, il sera inutile de poursuivre cette ligne de questions parce que monsieur Lundrigan a posé une question et le témoin a répondu en parlant de la situation juridique que j'ai soulevée il y a un instant dans un appel au règlement.

Je dis que nous avons le droit de poser des questions et de demander de nouvelles preuves en vertu de l'article 53 de la Loi et aussi aux termes des recommandations provisoires que nous avons formulées à la Chambre. Je demande donc que vous portiez un jugement là-dessus, monsieur le président, pour que nous puissions poursuivre l'interrogatoire dans le sens de M. Lundrigan.

M. Trudel: J'en appelle au Règlement, monsieur le président, ce n'est pas à ce comité, je pense, monsieur le président, de faire l'interprétation de la Loi. Il nous faudra nous en tenir aux jugements. Dans l'orientation que prend l'interrogatoire, je ne vois rien de la part des témoins qui nous permette de conclure qu'ils ne collabore pas. Ils ont collaboré jusqu'ici et je crois que nous avons les réponses que nous désirons obtenir. Les témoins ne refusent pas de répondre. Ils donnent les faits et je pense que cela ne s'applique pas simplement dans ce cas, mais à tous les jugements portés lorsqu'une question juridique est mise en cause, le témoin n'a pas le droit d'intervenir. Cela ne s'applique pas seulement à ce Comité mais à tous les comités. Les témoignages que nous obtenons sont suffisants d'après mon interprétation. Il y aura encore beaucoup de questions. Il nous faut beaucoup plus de faits que ceux dont on nous a fait part jusqu'ici, mais si on continue de se quereller sur une question juridique on ne parviendra pas à réaliser l'objectif de ce Comité.

Quant à l'article 53 dont on a parlé, ce n'est pas au témoin de dire quand le Gouverneur en conseil modifiera notre rapport définitif, cela ne se produira qu'à ce moment-là et je ne crois pas qu'on puisse invoquer l'article 53 comme d'autres députés le font en ce moment de façon à se prononcer pour ou contre les déclarations que les témoins font en ce moment.

M. Lundrigan: En posant la question, je n'ai peut-être pas précisé suffisamment ce à quoi je voulais en venir et qu'elle pouvait induire en erreur. Je connais l'article de la Loi en cause, l'article 53, et je sais aussi que la Commission canadienne des transports a dit que le service sera maintenu jusqu'à ce qu'elle soit convaincue que le nouveau service est adéquat.

[*Texte*]

My point was that the CTC did not say that the alternate service was inadequate and therefore that the rail passenger service should continue until the buses were brought up to an adequate state. This was not the situation. The situation, as I understand it, is that the CNR has approached the Railway Transport Committee of the CTC asking that it be allowed to continue the rail passenger service because they admitted the bus service was not adequate. My understanding of it is pretty well along those lines.

In other words, I do not understand from what was read here on the record that the Canadian Transport Commission has ordered that the passenger service continue. I understand that the railway has taken the initiative. Therefore, I thought my question was quite in order. If the railway has taken a certain initiative—I do not know how it is defined by the gentlemen here—why can it not take further initiative?

Mr. Trudel: May I speak to this, Mr. Chairman?

Mr. Vaughan: Is there another question?

The Chairman: Mr. Mahoney, on a point of order.

Mr. Mahoney: No, I think Mr. Lundrigan has asked a question—are we still talking on the point of order?

Mr. Lundrigan: Well, this is a question Mr. Chairman, to our . . .

Mr. Mahoney: Frankly, having heard the question restated, I think it is a hypothetical question. What is being asked here is what course of action the CNR is going to take when it meets again with the CTC, and I do not think it is proper for this Committee to compel that answer. They have told us that they are studying the situation. This is the reason for the deferral. They are obviously not ready to meet with the CTC or they would be doing so already. So what purpose is there in following this particular line of questioning?

The Chairman: The purpose of this Committee this morning is to hear from the CNR people and we can ask questions, but I do not think Mr. Vaughan has the authority to recommend such things to the CTC. So, I think the question, as I see it, is completely out of order.

[*Interprétation*]

Ce à quoi je voulais en arriver, c'est que la CCT n'a pas dit que le nouveau service est inadéquat et que, par conséquent, il faudra maintenir le service voyageurs du chemin de fer jusqu'à ce que le service d'autobus soit amélioré. Ce n'est pas le cas. Si je comprends bien, la situation est que le National-Canadien a demandé au comité du transport ferroviaire de la CCT la permission de maintenir le service voyageurs parce qu'il reconnaît que le service d'autobus n'est pas adéquat. C'est la façon dont je vois la situation.

Autrement dit, je ne comprends pas, à la suite de ce qui a été consigné au compte rendu, que la Commission canadienne des transports ait exigé qu'on maintienne le service voyageurs. Je crois comprendre que c'est le National-Canadien qui a pris l'initiative. Par conséquent, je crois que ma question est tout à fait recevable. Si le National-Canadien a pris une certaine initiative, je ne sais pas comment ces gens la désignerait, mais pourquoi ne peut-il pas en prendre d'autres?

M. Trudel: ESt-ce que je peux prendre la parole à ce sujet, monsieur le président?

M. Vaughan: Est-ce qu'il y a une autre question?

Le président: Monsieur Mahoney, en appel au Règlement.

M. Mahoney: Non, je crois que M. Lundrigan a posé une question—Est-ce qu'il s'agit toujours du même appel au Règlement?

M. Lundrigan: Ma question, monsieur le président s'adresse à . . .

M. Mahoney: Maintenant qu'on a répété la question, je crois franchement que c'est une question hypothétique. On désire simplement savoir quelle ligne de conduite le National-Canadien va adopter lorsqu'il rencontrera de nouveau les représentants de la CCT, et je ne crois pas qu'il soit approprié de les obliger de répondre. Ils nous ont dit qu'ils étudient la situation. C'est la raison pour laquelle ils veulent répondre plus tard. Ils ne sont évidemment pas prêts à rencontrer la CCT, sinon ils le feraient dès maintenant. A quoi bon poursuivre ce genre de questions?

Le président: Je pense que l'objet de la séance de ce matin est d'entendre le point de vue du National-Canadien et nous pouvons poser des questions, mais je ne crois pas que monsieur Vaughan a l'autorité voulue pour faire de telles recommandations à la CCT. Je pense donc que la question, de la façon dont je la vois, est tout à fait irrecevable.

[*Text*]

Mr. McGrath: What is out of order?

The Chairman: Because Mr. Vaughan does not have the authority to do so. He is trying

•1200

to answer in the best he can all these questions but you have asked him about something he has not got the authority to do.

Mr. Lundrigan: Mr. Chairman, I am going to raise my question, even if I have to do it on a point of order. I have before me now the submission by the Canadian National Railways, their Commission Counsel Mr. Pye, and it states in here specifically "In view of this...", "this" meaning the heavy traffic experienced this year, and so on, on the buses and the rail line:

> ...we have in contemplation the possibility of having the train services extended for a short period...

of time. This was the CNR's initiative.

Mr. Vaughan: That is what we are saying; it is clear what it ways.

Mr. Lundrigan: Well, this is the reason for my question. If the CN can take this kind of initiative why cannot it take initiative beyond this and have the thing extended indefinitely?

Mr. Vaughan: If you read the rest of the letter I think it is clear.

Mr. Crossman: Mr. Chairman, I have one minor question. Are you bringing in a 20-minute period for each questioner instead of 10 minutes, or can one questioner go on indefinitely?

The Chairman: Ten minutes, but Mr. Crossman we have been on points of order all around the house here. Mr. Trudel?

Mr. Trudel: Mr. Chairman, I think following Mr. Lundrigan's line of questioning that the CNR has acted within the terms of reference in the ruling of the CTC if you will refer to it. I think it was deposited in our tabling to the House. In this they are not doing anything that is not provided for in the ruling of the CTC. It was their prerogative and I think there was a review indicated. I think if my memory serves me correctly it is referred to in Article 5. I do not have have the wording of the article before me.

Mr. McCleave: Do you want me to read it into the record? I have it here. Do you mean

[*Interpretation*]

M. McGrath: Qu'est-ce qui n'est pas recevable?

Le président: Monsieur Vaughan n'a pas l'autorité voulue pour le faire. Il essaie de répondre à toutes ces questions au meilleur de sa connaissance, vous vous lui avez posé une question à laquelle il n'a pas l'autorité voulue pour répondre.

M. Lundrigan: Monsieur le président, je vais poser ma question même si je dois faire un appel au règlement. J'ai ici le mémoire du National-Canadien préparé par M. Pye, leur conseiller juridique et on y dit de façon bien précise, «vu cet état de chose». c'est-à-dire vu le nombre élevé de personnes qui utilisent ces services d'autobus et de chemin de fer:

> nous songeons à la possibilité de prolonger ces services pour une brève période...

C'est l'initiative prise par le National-Canadien.

M. Vaughan: C'est ce que nous disons. C'est très clair ce qu'on y dit.

M. Lundrigan: C'est la raison pour laquelle j'ai posé la question. Si le National-Canadien peut prendre de telles initiatives, alors pourquoi ne pas prendre d'autres initiatives et les prolonger indéfiniment?

M. Vaughan: Si vous lisez le reste de la lettre, vous verrez que c'est très clair.

M. Crossman: Monsieur le président, j'ai une petite question à poser. Est-ce que vous prévoyez 20 minutes pour chaque député qui pose une question, ou 10 minutes? Ou peut-on prolonger la période indéfiniment?

Le président: Dix minutes, monsieur Crossman, mais nous avons des rappels au Règlement ici. Monsieur Trudel?

M. Trudel: Monsieur le président, à la suite des questions posées par M. Lundrigan, je pense que le National-Canadien a agi suivant le mandat apporté par la décision de la Commission. Je crois que cela a été déposé aussi à la Chambre. Ils ne font rien qui ne soit pas prévu dans la décision de la Commission. C'est leur prérogative et je crois qu'il y a eu une révision. Si je me souviens bien, on en parle à l'article 5.

Je n'ai pas le libellé de cet article, ici devant moi.

M. McCleave: Vous voulez que je le consigne au compte rendu? Je l'ai ici. Voulez-vous

[*Texte*]

subparagraph (5) of the order of the Committee?

Mr. Trudel: Yes and I think this letter is pursuant to this. I see no conflict of interest anywhere nor I do see any new initiative that has not been provided for under this article. And I think we have obtained what we were looking for, an extension of time until we were able to table our report.

Mr. Lundrigan: That is not in there...

Mr. McCleave: I think there is a point of order, actually, Mr. Chairman under this subparagraph (5) of the order of the Railway Transport Committee. It says in part:

> (5) If, prior to April 15, 1969, the Applicants fail or are unable to perform any of the conditions enumerated above, or if at any time before that date the Committee is not satisfied that the bus service is at least as good as the present passenger train service, it may upon notice to the Applicants and to all parties who appeared before it in December, 1967 reconvene the hearing to consider whether in the exercise of its general powers under the Railway Act, it should impose further conditions to be met prior to the discontinuance of the passenger train service or direct the adoption of such measures as may be necessary to ensure the adequacy of the bus service.

The Chairman: And what did you read it from Mr. McCleave?

Mr. McCleave: This was from the Order signed by Mr. Rump, paragraph 9 subparagraph (5). The odd thing is that it is very badly drafted because there are two options, one "if the applicants fail", and the second "the Committee is not satisfied". But just dealing with the part about the options to explain my point:

> If, prior to April 15, 1969, the Applicants fail or are unable to perform any of the conditions enumerated above,... it may upon notice to the Applicants...

As I say, it is a very badly drafted Order but I think still the Railway Committee can take that initiative to postpone its order before April 15, 1969.

[*Interprétation*]

parler du sous-alinéa (5) de l'ordonnance du Comité?

M. Trudel: Oui. Cette lettre vient à la suite de cela. Il n'y a pas de conflit d'intérêt ou quoi que ce soit et je ne vois pas de nouvelles initiatives qui n'ont pas été prévues en vertu de cet article. Je pense que nous avons obtenu ce à quoi nous voulions en arriver, soit un prolongement jusqu'à ce que nous soyons en mesure de déposer notre rapport.

M. Lundrigan: Ce n'est pas dans...

M. McCleave: Je pense qu'il y a un rappel au Règlement, monsieur le président, en vertu du sous-alinéa (5) de l'ordonnance du Comité du transport ferroviaire. On y dit que:

> (5) Si, avant le 15 avril 1969, les demandeurs n'exécutent pas, ou ne sont pas en mesure d'exécuter, l'une ou l'autre des conditions énumérées ci-dessus, ou si à un moment donné avant cette date, le Comité n'est pas convaincu que le service d'autobus est au moins aussi bon que le service de trains de voyageurs actuel, il pourra, après en avoir notifié les demandeurs et toutes les parties qui ont comparu à ses séances en décembre 1967, se réunir à nouveau en audience, afin d'examiner si, dans l'exercice de l'autorité générale que lui confère la loi sur les Chemins de fer, il devrait imposer de nouvelles conditions avant la suppression du service de trains de voyageurs, ou ordonner l'adoption des mesures éventuellement requises pour assurer le fonctionnement satisfaisant du service d'autobus.

Le président: D'où vient ce texte?

M. McCleave: C'est l'ordonnance signée par M. Rump, alinéa 9, sous-alinéa (5). Ce qui est étonnant, c'est que c'est très mal rédigé parce que, si vous lisez, il y a deux possibilités: (1) «les demandeurs n'exécutent pas», et (2) «le Comité n'est pas convaincu». Mais je voudrais expliquer mon point de vue:

> Si, avant le 15 avril 1969, les demandeurs n'exécutent pas, ou ne sont pas en mesure d'exécuter, l'une ou l'autre des conditions énumérées ci-dessus... il pourra, après en avoir notifié les demandeurs..

Comme je l'ai dit, cette ordonnance est très mal rédigée, mais le comité du transport ferroviaire peut toujours prendre l'initiative de retarder cette ordonnance avant le 15 avril 1969.

[*Text*]

The Chairman: Not the Company, Mr. McCleave.

Mr. McCleave: I am sorry; the Railway Transport Committee.

An hon. Member: Not this Committee.

Mr. McCleave: I am sorry if I mislead you. I meant to say the Railway Transport Committee.

The Chairman: Mr. Rose?

Mr. Rose: Mr. Chairman, I have been listening to all of this and I think the chief concern voiced on this side of the table is that Article 5 deals with the Canadian Transportation Commission initiative, making certain that the various options that were open and described in subparagraph (5) are adhered to. They obviously have not done this. The initiative has been up, at this point, with the CNR. Now, we do not know for what reason. We do not know whether they responded to a resolution in the Newfoundland legislature. We really have no idea and it seems to me that this is the basic concern being expressed here. I have no views to express other than that on the matter, but it appears to me that we might get on with this and carry our argument further with the CTC at this particular point.

Mr. Vaughan: Could I say that there is liaison going on all the time between the railway and the railway branch of the CTC. The first paragraph of that letter refers the Commission's counsel and counsels various discussions about stand-by equipment and these people are talking together all the time, so there is not any mystery about this at all. It is fairly straightforward. We are conscious of the April 15 date in the order and discussion has to go on. We have to try to satisfy them on the stand-by equipment or what we plan to do is adequate in their minds.

It just so happens this one letter and this one conversation seem to be important elements and that is why I brought it. I read in the paper about your deliberations of a week ago but I did not see the evidence and I really do not know what went on.

Mr. Rose: We have not either, sir.

Mr. Vaughan: Anyway, I really brought this letter to try to be helpful.

[*Interpretation*]

Le président: Pas la compagnie, monsieur McCleave.

M. McCleave: Je m'excuse; le comité du transport ferroviaire.

Une voix: Pas ce Comité-ci.

M. McCleave: Je regrette de vous avoir induit en erreur. Je voulais parler du comité du transport ferroviaire.

Le président: Monsieur Rose?

M. Rose: Monsieur le président, après avoir entendu tous ces échanges, je pense que la principale préoccupation de ce côté-ci, c'est que l'article 5 traite de l'initiative de la CCT pour s'assurer qu'il y a différentes options possibles et décrites au sous-alinéa (5) et qu'on s'en tienne à ces dispositions. On ne l'a pas fait, de toute évidence. Cette initiative, jusqu'ici, a été laissée au National-Canadien. Nous ne savons pas pour quel motif. Nous ne savons pas s'ils ont réagi à la suite d'une résolution adoptée à la législature de Terre-Neuve. Nous n'en savons rien, et je pense que c'est là la principale préoccupation formulée ici. Je n'ai pas de point de vue à formuler sur la question, mais il me semble que nous pourrions poursuivre cet argument auprès de la CCT maintenant.

M. Vaughan: Il y a toujours des rapports qui se maintiennent entre les chemins de fer et la commission ferroviaire de la CCT. Au premier alinéa de cette lettre, il est question des entretiens pour ce qui est de l'équipement, des réserves et ainsi de suite. Et ces gens se rencontrent et discutent de la chose fréquemment. Donc, il n'y a pas de mystère là-dedans. C'est très clair, c'est très précis. Nous sommes conscients de cette date du 15 avril dans l'ordonnance. Il faut donc avoir des discussions. Il faut répondre à leurs exigences avec cet équipement de réserve. Ce que nous essayons de faire doit être adéquat, à leur avis.

Il y a eu cette lettre, il y a eu cet entretien qui semble être un élément important. C'est la raison pour laquelle je vous le présente. Parce que j'ai lu ce qu'il en était dans les journaux quant à vos délibérations d'il y a une semaine. Je n'ai pas vu les témoignages. Je ne sais pas vraiment ce qui s'est passé, ce qui s'est produit.

M. Rose: Nous non plus, Monsieur.

M. Vaughan: De toute façon, j'ai apporté cette lettre pour essayer de vous rendre service, de vous être utile.

[*Texte*]

The Chairman: Mr. McCleave, you have the floor.

Mr. McCleave: Oh, I am sorry. I was going to raise the topic of the roadbeds and the paragraph seven in the document Mr. Macdougall has brought to us this morning. You suggest, Mr. Macdougall, general improvement in the roadway system to provide all-weather capabilities on arterial roads. Of course, you are dealing with the highway transportation, but I was wondering about the capability of the railway roadbeds especially, say, on something like the haul from Halifax through to Montreal because of the unit train which is to be developed out of Halifax. Is that roadbed as capable as any railway roadbed in the world to carry heavy traffic?

Mr. Macdougall: Well, that is a pretty broad question, Mr. McCleave, to compare it with any roadbed in the world, but it is perfectly adequate to carry the traffic that we have now and which we contemplate.

Mr. McCleave: So if you had unit trains with very heavy containers in them this roadbed would be adequate in your opinion.

Mr. Macdougall: Oh, yes. Actually the container type of unit train is not usually a very heavy tonnage type of train. It is not like carrying iron ore or things of that kind which is very heavy, dense material. Containers usually have packaged goods in them, furniture and things of that kind, and they are not really very heavy. The track structure that we have now between Halifax and Montreal is perfectly adequate to handle any of the unit trains that we can see at the moment developing.

To take an example, if we were to get very heavy tonnages of heavy material, such as iron ore, through Canso if that were opened up as a seaport, or Leonardville in New Brunswick if that were to be opened up, and we had to operate unit trains from there into Central Canada or the U.S. we might have to do some further examination of what we needed in order to get the optimum speed out of those trains to give us the services desired. However, as yet we have not been faced with that problem and we are handling very heavy tonnages as it is right now over our mainlines and they are perfectly adequate.

Mr. McCleave: May I ask, and I hope it is a fair question, whether you as Atlantic Vice-President find sympathy when you present your request for this maintenance, over-haul and up-building and capital expenditures on the roadbed of the over-all system?

[*Interprétation*]

Le président: Monsieur McCleave, vous avez la parole.

M. McCleave: Je m'excuse, je voulais parler de l'alinéa 7, dans le document que nous a présenté M. MacDougall ce matin. Monsieur MacDougall, vous proposez une amélioration du réseau routier et aussi des axes principaux et je me demandais ce qu'il en était quant à la possibilité de voir à l'amélioration de l'aménagement ferroviaire, particulièrement d'Halifax à Montréal, à cause du train homogène qui doit partir d'Halifax. Est-ce qu'on peut avoir un trafic très lourd?

M. Macdougall: C'est une question très difficile, monsieur McCleave. Il est aussi bon que n'importe quel autre au monde et il est adéquat pour le trafic que nous avons maintenant et auquel nous songeons.

M. McCleave: Donc, si vous aviez des trains homogènes avec des cadres très lourds ce serait suffisant, selon vous.

M. Macdougall: Oui, ce train homogène à cadres, habituellement, n'est pas très lourd. Ce n'est pas comme si on transportait, disons, du minerai de fer ou des choses de ce genre, ce qui est très lourd et très dense. Les cadres, habituellement, ont des meubles, des colis et ce n'est pas très lourd. Et, disons, le rail que nous avons de Halifax à Montréal est suffisant pour tout train homogène auquel nous puissions songer maintenant.

Simplement pour vous donner un exemple, si nous avions des matériaux très lourds, tel le minérai de fer, à transporter par Canso, si c'était inauguré comme port maritime, ou Leonardville, au Nouveau-Brunswick, et s'il nous fallait avoir un service de trains homogènes à partir de ce point jusqu'au Canada central ou aux États-Unis, il faudrait savoir quelles seraient les nouvelles exigences pour avoir une vitesse maximale pour ce train et assurer le service requis. Mais, nous n'avons pas encore à faire face à ce problème. Nous avons un tonnage très élevé déjà prévu maintenant pour cette ligne principale.

M. McCleave: J'espère que cette question est juste. Est-ce que je pourrais vous demander si, en tant que vice-président de la région Atlantique, on comprend très bien votre demande lorsque vous demandez l'amélioration ou encore les dépenses en immobilisations pour cet aménagement ferroviaire?

[*Text*]

Mr. Macdougall: From our system headquarters?

Mr. McCleave: Yes.

Mr. Macdougall: Oh, yes. On a system such as Canadian National, all the requirements all over the system have to be looked at and there is only a certain amount of money to go around. There is not any sort of open pot from where you take everything you want, but I think it is fair to say that our trackage is maintained to the quality of the transportation that has to operate over it, and that is the same rule that applies in Ontario or British Columbia or wherever it may be.

Mr. McCleave: Arising also out of paragraph 7, Mr. Macdougall, but dealing with the roadway side or the highway side, does the CNR in the Maritimes or Atlantic Canada have trucking systems?

Mr. Macdougall: Yes, we have trucking services throughout the whole of Atlantic Canada.

Mr. McCleave: Are these for long-range hauls?

Mr. Macdougall: The services that we perform ourselves for Canadian National are mainly of the intermodal type, short hauls handling containers or piggy back between major centers such as Moncton and Halifax, Halifax and Sydney, Campbellton and Moncton, and so on. We do have a subsidiary operation, Eastern Transport, which is a highway transport operation that handles things basically by highway transport.

Mr. McCleave: Does this go beyond the Atlantic region, say, into the next region or is it entirely intraregional?

Mr. Vaughan: Just intra.

The Chairman: Have you finished, Mr. McCleave?

Mr. Macdougall: From Nova Scotia into New Brunswick, basically.

Mr. Crossman: Mr. Macdougall, do the rates for carload lots differ quite a bit from the mixed cars, or the less-than-carload lots?

Mr. Macdougall: Yes, they do. Rate-making is a little complicated, as you know, Mr. Crossman, but basically I think that carload lots is the cheapest form per 100 pounds of traffic carried; and it is considerably cheaper than the L.C.L. rate because it is a different type of service.

[*Interpretation*]

M. Macdougall: Au siège social de la compagnie?

M. McCleave: Oui.

M. Macdougall: Oui. Dans un système comme celui du CN, toutes les exigences pour l'ensemble du réseau doivent être étudiées et il faut voir à ce qu'il y ait suffisamment d'argent pour les différents travaux à faire. Ce n'est pas une source inépuisable. Il faut maintenir le rail suivant la qualité, et pour le trafic qui se présente, et la même règle vaut pour l'Ontario ou la Colombie-Britannique, ou autres endroits.

M. McCleave: A la suite du paragraphe 7, monsieur MacDougall, mais pour en revenir à la ligne ferroviaire, à la route, est-ce que le CN, dans les Maritimes, a un système de camionnage?

M. Macdougall: Oui, nous en avons un dans l'ensemble des provinces atlantiques.

M. McCleave: Pour les parcours à longue distance?

M. Macdougall: Le service que nous assurons nous-mêmes pour le National-Canadien se fait surtout sur de brèves distances avec des cadres, ou les services rail-route entre les grands centres comme Moncton et Halifax, Halifax et Sydney, Campbellton et Moncton, et ainsi de suite. Nous avons une filiale, la *Eastern Transport,* qui est un service de transport routier.

M. McCleave: Est-ce que cela dépasse les cadres de la région Atlantique, ou si c'est simplement dans la région?

M. Vaughan: Simplement dans la région.

Le président: Vous avez terminé, monsieur McCleave?

M. Macdougall: De la Nouvelle-Écosse vers le Nouveau-Brunswick, essentiellement.

M. Crossman: Les taux pour les wagonnées complètes ou les chargements de moins d'une wagonnée sont-ils les mêmes ou varient-ils?

M. Macdougall: Ils varient. C'est assez complexe d'établir les taux. Vous savez, monsieur Crossman, que, essentiellement, le transport par wagonnée est la méthode la moins coûteuse d'expédition, aux 100 livres. C'est moins que pour moins d'une wagonnée, parce que c'est là un autre genre de service.

[*Texte*]

Mr. Crossman: Is it possible for an area such as the Atlantic region to get a blanket rate for carload lots and the same for less-than-carload lots? Do you think that would be an incentive to the growth of small industry?

Mr. Macdougall: Of course, the basic method of handling is that if you have a volume then you ship it by carload. If you have not got the volume to ship by carload you have to find a different method. It may be possible to ship it less-than-carload; or to ship it as a container load which is smaller than a boxcar; or to ship it as a piggyback load which is smaller than a boxcar; or via truck load, by truck, if the highway services are available.

It depends upon the commodity and the volume that is available. If the services are performed by a pool car operator, he may take some of your goods and some of Mr. Rose's goods and various others and put them together and make a carload and get a carload rate and ship it from A to B. There is a flexibility in the different types of the services, and we try to provide as much of that as we can.

Mr. Crossman: It would be a matter of efficiency on the part of the shipper, then, in trying to get as low a rate as possible.

Mr. Macdougall: I would not like to say it is up to his initiative because we are the people who are selling the service. In most cases it is really up to the shipper and our people to get together. Our people find out the difficulties of shippers and seek them out and try to provide the type of service that they need. If they cannot, well, they cannot. But we have a very active customer-research section and a very active sales group. From my point of view, it is our job to go out and tell people about our services, and go to places where we think there is traffic to be found, to see if we cannot provide a service that will attract them.

Mr. Crossman: I agree with you in your statement about the improvement in arterial roads in the Atlantic region and about an effective competition in the setting of freight rates, or transportation rates, but until such time as this is possible do you not think that the Maritime freight rates should be maintained—until we find the answers to our problems?

Mr. Macdougall: Mr. Crossman, as you know, I am not an expert on highways and I am not making recommendations on what they should do with them. What I am really saying is that the provinces and the premiers

[*Interprétation*]

M. Crossman: Est-ce qu'il est possible alors pour une région, telle celle de l'Atlantique, d'obtenir un taux d'ensemble, disons, pour les wagonnées complètes et pour moins d'une wagonnée? Croyez-vous que ce serait un encouragement pour les petites industries?

M. Macdougall: Bien entendu, la principale méthode de manutention réside dans l'expédition par wagonnées, si le volume est suffisant. Si vous n'avez pas une wagonnée complète, alors, il faut trouver une autre méthode. Il est peut-être possible d'expédier moins d'une wagonnée ou d'utiliser les cadres, qui contiennent moins qu'un wagon, ou de recourir au service rail-route ou aux services de camionnage s'ils sont disponibles. Tout dépend des denrées et du volume. Il est peut-être possible de grouper dans un même wagon certaines de vos denrées, une partie de celles de M. Rose, et ainsi de suite, et obtenir un prix d'ensemble pour l'expédition de A à B. Il y a diverses possibilités. Nous essayons d'en offrir le plus grand nombre possible.

M. Crossman: Il s'agit d'efficacité de la part de l'expéditeur qui tente d'obtenir le taux le moins élevé possible.

M. Macdougall: Je n'aime pas dire que l'initiative lui revient parce que nous vendons ce service. Dans la plupart des cas, il appartient à l'expéditeur et à nos emlpoyés de se réunir. Nos employés tentent d'examiner les difficultés de l'expéditeur afin de les régler et d'offrir le service voulu. Si c'est impossible, c'est impossible. Nous avons un service de recherches pour le consommateur et un service de ventes très actif. Il nous appartient de faire connaître nos services, d'aller là où nous pensons pouvoir trouver un marché et voir s'il nous est possible de leur offrir un service qui pourrait les intéresser.

M. Crossman: J'en conviens avec vous, pour ce qui est de l'amélioration du réseau routier et de l'établissement de taux vraiment concurrentiels, mais d'ici là, ne croyez-vous pas que les taux de transport de marchandises dans les Maritimes devraient être maintenus jusqu'à ce que nous ayions réglé nos problèmes?

M. Macdougall: Pour ce qui est des routes, monsieur Crossman, comme vous le savez, je ne suis pas un spécialiste et je n'entends pas faire de recommandations à ce sujet. Je dis tout simplement que les premiers ministres et

[*Text*]

have recommended that highway building programs be undertaken; and the Atlantic Development Board had representations made to them relative to a highway building program. I am just saying that we think that that is good, because it is going to be good for the Atlantic provinces. We think it will be good for not only the people who use the highways but will be good for railways, as well, because it will have a seeking effect on he improvement of our economy.

Mr. Crossman: If we have to spend lavishly on the highways necessary to establish competition in transportation and in so doing establish a rate that is acceptable to the growth of our economy, would it not be necessary for the Maritime freight rates to be maintained until that time?

Mr. Macdougall: I do not think there is any question of the Maritime freight rates not being maintained. The suggestion here really is that the whole impact of the Maritime Freight Rates Act system be changed so that the money be used in a better fashion.

• 1215

There is no suggestion that the money be just taken away or that they cease to have the Maritime Freight Rates Act. Our view is that industry in Atlantic Canada needs assistance in transportation but that we are putting it in the wrong places and are not getting our industries built up and our economy developed. We are really saying that we should be more selective on how we use it; that we should foster the industries that we think we can help to grow and develop, so that they will make a stronger Atlantic Canada—more jobs, more work, more traffic—which would be better for everyone; and not just maintain what we have today on a straight, across-the-board basis. You will develop the competitive forces better than they are today by putting money into improving the highways and assisting these industries to grow.

Mr. Crossman: I thought it would be helpful to clarify this point. Thank you.

Mr. Macdougall: Thank you, Mr. Crossman.

The Chairman: Mr. McGrath?

Mr. McGrath: Mr. Chairman, if I am to abide by the rule of relevancy I should pursue the subject raised by my friend, but it is not at all the subject I had in mind.

[*Interprétation*]

les provinces ont recommandé que soit entrepris un programe de construction de routes et que l'Office d'expansion économique de la région atlantique a fait des pressions en ce sens. Je dis simplement que nous croyons que c'est bon parce que ce sera bon pour les provinces de l'Atlantiques. Nous pensons que ce sera bon, non simplement pour les gens qui utilisent les routes, mais aussi pour les chemins de fer, parce que cela aura des effets bénéfiques sur l'économie.

M. Crossman: S'il nous faut dépenser largement pour la construction des routes nécessaires à l'établissement de cette concurrence dans les transports et en ce faisant établir un taux qui soit acceptable pour la croissance de notre économie, est-ce qu'il ne serait pas essentiel alors que le tarif-marchandises dans les Maritimes soit maintenu jusqu'à ce moment-là?

M. Macdougall: Je ne crois pas qu'il soit question d'éliminer ces taux. La suggestion qui a été faite veut que le système prévu par la loi soit modifié afin que l'argent soit mieux utilisé. Il n'est pas question de retirer cet argent ou d'éliminer la *Loi sur les taux de transport de marchandises dans les Maritimes*. A notre avis l'industrie, dans la région de l'Atlantique, a besoin d'aide dans le domaine du transport. Nous croyons que cette aide ne se fait pas, présentement, de la bonne façon et que les industries et l'économie n'en profitent pas comme elles le devraient. Nous disons, en fait, que notre choix devrait être plus méticuleux; que nous devrions aider ces industries que nous croyons capables de croître pour améliorer la situation dans cette partie du Canada, grâce à de plus nombreux emplois et à un trafic accrû; et non seulement maintenir l'ensemble de ce que nous avons aujourd'hui. Il y aura de la concurrence si l'argent nécessaire sert à l'amélioration des routes et à la croissance des industries.

M. Crossman: Je croyais qu'il serait utile de clarifier ce point. Merci.

M. Macdougall: Merci.

Le président: Monsieur McGrath?

M. McGrath: Monsieur le président, si je dois m'en tenir à la règle énoncée plus tôt, je devrai poursuivre sur le sujet abordé par mon ami, même si ce n'est pas du tout le

[*Texte*]

I would like to get back to the point of order I raised. I am not satisfied with Mr. Vaughan's answer, nor am I satisfied with what I think was the snap ruling you made. All I am saying, Mr. Chairman, before I pursue my line of questioning, is that, under the order of the House of Commons of January, instruction the Committee to study the transportation problems of the Atlantic provinces under Section 53 of the Railway Act, under the heading Review and Appeal, we have every right to pursue any line of questioning we feel is necessary to throw any new light on this subject, to give us the necessary information upon which to base a recommendation which would advise the Governor in Council so that they may be in a position either to uphold this judgment of the CTC or set it aside.

As I say, I am not a lawyer, but it would appear to me, on reflection that, I do not think Mr. Vaughan should have made that answer, nor do I think, with respect, you should have made that ruling.

Having said that, I am going to proceed with my line of questioning.

Mr. Peddle: Mr. Chairman, if the point order is to be opened up may I make a very brief observation? I think it is important and I would ask your indulgence.

The Chairman: Is it a new point of order?

Mr. Peddle: No, it is on...

The Chairman: The other one was ruled out. Mr. Lundrigan?

Mr. Peddle: May I raise a new point of order, Mr. Chairman? It might be related.

My point of order is this, Mr. Chairman, that I undertand this Committee to be an arm of Parliament and that we are here to search out facts. We have had Mr. Pickersgill before this Committee, and to every pertinent question that we asked him he came back with something like "It would be a gross impropriety for me to comment."

Mr. Trudel: Mr. Chairman, I object to this.

Mr. Peddle: Mr. Chairman, we now have the gentlemen from the CNR and they make a similar comment—"It would be improper". My question to the Committee on the point of order is: To whom do we go to gather the necessary facts, bearing in mind that my particular interest is having this ruling of CTC set aside? To whom do we go to gather the

[*Interprétation*]

sujet dont je voulais traiter. J'en ai appelé, plus tôt, au Règlement. J'aimerais soulever ce point une nouvelle fois. Je ne suis pas satisfait de la réponse de M. Vaughan ou de la décision rapide que vous avez prise. Tout ce que je dis, monsieur le président, c'est qu'en vertu de l'ordre que nous a transmis la Chambre, en janvier, d'étudier le problème des transports dans les provinces de l'Atlantique, en vertu de l'article 53 de la *Loi sur les chemins de fer* nous avons tous les droits voulus pour poser toute question qui, à notre avis, peut éclairer la situation et qui peut nous fournir les renseignements qui nous permettront de formuler des recommandations au gouverneur en conseil pour qu'il soit en mesure, soit de maintenir ce jugement de la CCT, soit de le mettre de côté.

Comme je vous le dis, je ne suis pas un avocat, je ne connais pas le droit, mais après mûre réflection, je ne crois pas que M. Vaughan aurait dû répondre comme il l'a fait et, après y avoir bien pensé, je ne crois pas que vous auriez dû rendre la décision que vous avez rendue. Ceci dit, j'en reviendrai maintenant aux questions que je désire poser.

M. Peddle: Puis-je me permettre une brève observation, monsieur le président? Je la crois importante.

Le président: Est-ce un nouvel appel au Règlement?

M. Peddle: Non.

Le président: L'autre a été rejeté. Monsieur Lundrigan?

M. Peddle: Alors, permettez-moi de soulever un nouvel appel au Règlement.

Si je comprends bien, ce Comité est issu du Parlement et nous sommes ici pour obtenir des faits. Nous avons entendu M. Pickersgill et à chaque question pertinente que nous lui avons posée il répondait «Il serait très inconvenant que je réponde.»

M. Trudel: Monsieur le président, je m'oppose à cette déclaration.

M. Peddle: Et maintenant, monsieur le président, les représentants du National-Canadien nous répondent de la même façon. Je me demande à qui nous devons nous adresser pour obtenir les faits requis, si l'on tient compte du fait que, personnellement, je désire que la décision de la CCT soit rejetée? A qui devons-nous nous adresser pour obtenir

[*Text*]

new facts that would be necessary to present to Parliament in order for them to make such a ruling?

An hon. Member: A good question, Mr. Chairman.

Mr. Mahoney: I think Mr. Peddle was perfectly correct when he defined this as seeking for facts, and as long as we stick to facts we are all right. But if we start to reach into the areas of asking these people to say what is going to happen if, as and when the CTC examines this case again, or what their line of argument is going to be on that occasion, and so on, we are out of the realm of fact.

The Chairman: That is what I think.

Mr. McGrath: Mr. Chairman, that is the argument on which the ruling was based. I agree with you—no witness should be obliged to answer a hypothetical question. I would be the first to agree with that, Mr. Chairman. But that is not the point at all.

The Chairman: Mr. Vaughan told you that he could not answer that question.

Mr. McGrath: Mr. Vaughan did not say he was not answering the question because it was hypothetical. That would have been a different argument entirely. Mr. Vaughan said that he was not answering the question because there was a point of law involved, and I made a submission and you made a ruling on it. Is that correct?

Mr. Mahoney: Legal interpretations are another thing.

Mr. McGrath: Did you make a ruling on it, Mr. Chairman?

The Chairman: Yes, I did.

Mr. McGrath: Mr. Chairman, I must say, with great respect and with great regret, that I have to appeal your ruling. I do not know what the machinery is under our new rules, but I am appealing your ruling because I cannot accept that.

• 1220

Mr. Vaughan: May I say something? I really probably should not say anything at this point, but if the Chairman . . .

The Chairman: One moment, please, Mr. Vaughan.

Mr. Vaughan: May I make a further comment?

[*Interpretation*]

ces faits dont nous avons besoin pour les présenter au Parlement afin qu'il puisse prendre une telle décision?

Une voix: Une excellente question.

M. Mahoney: Je crois que M. Peddle a raison lorsqu'il dit que nous cherchons des faits et qu'aussi longtemps qu'on s'en tient aux faits, nous avons raison. Mais si nous essayons de demander à ces gens qu'est-ce qui va se produire si la CCT étudie à nouveau la question et lorsqu'elle le fera, ou quels seront alors leurs arguments, alors nous nous éloignons des faits.

Le président: C'est ce que je pense.

M. McGrath: La décision a été basée sur cet argument. Je suis d'accord avec vous. Aucun témoin ne devrait avoir à répondre à des questions hypothétiques. Je serais le premier à en convenir, mais tel n'est pas le point.

Le président: Monsieur Vaughan vous a dit qu'il ne pouvait pas répondre à cette question.

M. McGrath: M. Vaughan n'a pas dit qu'il ne pouvait pas répondre parce qu'il s'agissait d'une question hypothétique. Il a dit qu'il ne pouvait répondre parce qu'il s'agissait d'une question de droit. J'ai fait des représentatioss et vous avez rendu une décision. Est-ce exact?

M. Mahoney: C'est différent, lorsqu'il s'agit d'une interprétation juridique.

M. McGrath: Vous avez rendu une décision à ce sujet, monsieur le président?

Le président: Oui.

M. McGrath: Je dois vous dire que je regrette d'avoir à en appeler de votre décision. Je ne sais pas ce que le nouveau Règlement prévoit, mais j'en appelle de votre décision parce que je ne puis l'accepter.

M. Vaughan: Puis-je dire quelque chose? Je ne devrais sans doute pas, mais, si le président. . .

Le président: Un moment, s'il vous plaît, monsieur Vaughan.

M. Vaughan: Puis-je dire quelque chose d'autre?

[*Texte*]

The Chairman: You might clear up the whole thing.

Mr. Vaughan: I do not know.

Mr. Givens: Mr. Chairman, on a point of order. The ruling of the Chair, with great respect, is appealed. There is no debate and no discussion. Legally I would think that the Chairman vacates the Chair, somebody else goes into the Chair and the question has to be, "Shall the ruling of the Chair be sustained or not?" before you proceed with anything else.

Mr. Mahoney: We may be proceeding to a more happy solution, if you will . . .

Mr. Givens: Then I suggest that the honourable member will have to withdraw his motion.

The Chairman: Order, order. Maybe we will let Mr. Vaughan give us his idea. Perhaps it will change the opinion of Mr. McGrath too.

Mr. Vaughan: Well, no. Perhaps I really should not speak on this point. I do not really want to complicate the matter for you, but I have listened to what you all have had to say and I tried before to outline what the legal position was. It seems to me that the Committee itself ought to examine what its terms of reference are, and then it ought to examine the terms of reference in relation to the specific problem Mr. McGrath has in mind, and then they ought to obtain a legal opinion on the manner and method, as he says, by which they will proceed to endeavour to utilize the avenue of appeal to the Governor in Council which he is referring to.

My respectful submission, just from my cursory examinatin and listening to this is that this is not the way to do it. You mention Section 53. I do not know that you have definitely before you a specific matter of appeal vis-à-vis Order No. R-2673 of the Canadian Transport Commission. That is another matter. If you do, and we are then before you to deal with the appeal of that Order, then we will make our case.

Mr. McGrath: If I may say with great respect . . .

Mr. Vaughan: I am sorry, I really do not want to get into an argument.

Mr. McGrath: Well you have, sir, whether you wanted to or not.

Mr. Vaughan: I was really trying to be helpful and . . .

[*Interprétation*]

Le président: Peut-être pourrions-nous alors tout régler?

M. Vaughan: Je n'en sais rien.

M. Givens: J'en appelle au Règlement. Le président a rendu sa décision. Il y a appel. Il n'y a pas de débat ni de discussion. Je pense qu'au point de vue juridique, il faudrait que le président quitte la fauteuil, que quelqu'un le remplace et qu'on pose la question ainsi: «Est-ce qu'on accepte la décision du président ou non», avant de faire autre chose.

M. Mahoney: Il y aurait peut-être une autre solution, si vous . . .

M. Givens: Je propose alors que l'honorable député devra retirer sa proposition.

Le président: A l'ordre, s'il vous plaît. Laissons M. Vaughan nous faire part de ses idées. Peut-être qu'il réussira à changer l'opinion de M. McGrath.

M. Vaughan: Non. Peut-être que je ne devrais pas prendre la parole à ce sujet. Je ne veux pas compliquer la question davantage, mais j'ai entendu ce que vous aviez à dire, et j'ai essayé déjà de vous exposer l'aspect juridique de la question. Il me semble que le Comité lui-même doit étudier ce qu'est son mandat, et ensuite étudier son mandat par rapport au problème auquel songe M. McGrath. Il devrait ensuite obtenir des conseils juridiques quant aux voies et moyens, comme il le dit, qu'ils doivent emprunter pour essayer d'utiliser la procédure d'appel auprès du gouverneur en conseil dont il a parlé.

J'ajouterai, très respectueusement après en avoir fait un examen rapide et entendu ce qui s'est dit ici, que ce n'est pas la façon de procéder. Vous parlez de l'article 53. Je ne vois pas que vous êtes vraiment saisis d'une question d'appel vis-à-vis de l'ordonnance R-2673 de la Commission canadienne des transports. C'est là une autre question. Si vous le faites, et que nous comparaissons devant vous à ce sujet, nous plaiderons notre cause.

M. McGrath: Si je dis très respectueusement . . .

M. Vaughan: Je m'excuse, mais je ne voudrais pas commencer une querelle.

M. McGrath: Vous l'avez fait déjà, que vous le vouliez ou non.

M. Vaughan: J'essayais simplement d'être utile et . . .

[*Text*]

Mr. McGrath: Yes, but I say with great respect that that is not the object of my line of questioning at all. I submit that under the reference of Parliament of January, instructing if that is the proper word, this Committee to study the transportation problems of the Atlantic Provinces, that this clearly falls within that category. Furthermore, the interim recommendation submitted to Parliament yesterday asking that this decision be set aside obligates this Committee to make a further recommendation on this specific subject.

It is in this area that we want to pursue a line of questioning and not in the area of an appeal, because the matter is now before Parliament. It is a different kettle of fish entirely if you will accept a "Newfie" colloquialism.

It was in that area, Mr. Chairman, that you made your ruling and I came back to it because I cannot accept it. If your ruling in this matter stands I must insist on my right to appeal your ruling.

The Chairman: Mr. Breau.

Mr. Breau: On a point of order. It relates to the point of order Mr. McGrath had a while ago, when he said we had an order of reference from the House of Commons to study all sorts of transportation problems in the Atlantic Provinces. I think he has a point there and if he wants to question, or if any member of this Committee wants to question the fact that the CNR or the CTC are supporting a change in passenger transportation from rail to bus, and if we wish to question that fact, I think we have jurisdiction to question it. But that is not what happend a while ago.

We got involved over the question of jurisdiction, the question of legal interpretation

• 1255

and in the question of, "Will the CNR do this? Will they go on with the discontinuance order or will they not?" We should not go into that. If you want to discuss whether or not rail passenger service should be maintained because it should be a better passenger service, that is a different story. You can discuss that point but you should leave aside the question of the Order. This is something that we have no jurisdiction to question.

Mr. McGrath: The Order? We just made a recommendation on it. We made a recommendation to have the order set aside. We made a recommendation to have the order "held in

[*Interpretation*]

M. McGrath: Je vous dis, avec tout le respect que je vous dois, que mes questions ne sont pas orientées dans ce sens. Je dis que, en vertu du mandat qui nous a été donné au mois de janvier, alors que le Parlement nous a demandé d'étudier les problèmes des transports dans les provinces de l'Atlantique, et que cette question tombe clairement dans ce domaine. En plus, à la suite des recommandations provisoires présentées au Parlement hier, dans lesquelles nous demandions que cette décision soit mise de côté, nous sommes tenus de formuler d'autres recommandations à ce sujet.

C'est donc dans ce secteur que nous voulons poser des questions et non pas pour ce qui est d'un appel, parce que le Parlement est saisi de cette question à l'heure actuelle. C'est une autre paire de manches. C'est donc dans ce secteur que vous avez rendu votre décision, monsieur le président, et j'y reviens parce que je ne puis l'accepter. Si votre décision est maintenue à cet égard, je dois insister sur mon droit d'en appeler de votre décision.

Le président: Monsieur Breau.

M. Breau: J'en appelle au règlement. Il s'agit de l'appel au Règlement fait par M. McGrath il y a un instant, lorsqu'il a dit que la Chambre des communes nous avait donné le mandat d'étudier les problèmes des transports dans les provinces de l'Atlantique. Je pense qu'il a raison et s'il veut mettre en question ou si les membres du Comité veulent mettre en question le fait que le National-Canadien ou la CCT sont en faveur d'abandonner le service-voyageurs par chemin de fer en faveur de l'autobus, et si on veut mettre en question ce fait, je pense que nous avons la compétence pour le faire. Mais ce n'est pas ce qui s'est produit il y a un instant.

Nous nous sommes enberlificotés de la Loi avec cette question de compétence et d'interprétation et sommes demandé «Est-ce que le National-Canadien fera ceci ou cela? Est-ce qu'il mettra en vigueur ce décret de fin de service?» Ce n'est pas le genre de choses qui devrait nous préoccuper. Si on veut discuter s'il faut maintenir le service voyageurs par train, parce que le service est meilleur, c'est une autre histoire. Vous pouvez en parler, mais vous devriez laisser de côté la question du décret. C'est une chose que nous n'avons pas la compétence voulue pour mettre en question.

M. McGrath: Le décret? Nous venons de faire une recommandation à son égard. Pour qu'il soit mis de côté, jusqu'à ce que nous formulions une recommandation.

[*Texte*]

abeyance", I think was the wording, until we can make a recommendation.

Mr. Breau: Why?

Mr. McGrath: How can we make a recommendation unless we are permitted to examine the Canadian National Railways in great detail on this matter.

Mr. Breau: On the question of changing rail passenger service to bus, but leave the question of this discontinuance alone.

Mr. McGrath: But more particularly on the abolition of the rail passenger service.

Mr. Breau: Right. That is the point we should pursue.

Mr. McGrath: I agree, no witness should be obliged to answer a hypothetical question, but I did not hear a hypothetical question put.

Mr. Breau: And he should not be obliged to give...

The Chairman: You put a question to Mr. Vaughan that he was not authorized to answer.

Mr. McGrath: Why is he not authorized? I maintain he is authorized to answer and I maintain he is obliged to answer.

Mr. Breau: He is not here to interpret the law.

Mr. McGrath: No, that is precisely why I appeal the ruling.

Mr. Rock: Mr. Chairman, I would just like to add a comment. I do not feel those members who are pursuing this are within their rights because they are leading to legal questions rather than asking questions on administration, cost of operations, and why the CNR want to abandon the passenger service. Instead of that they are arguing about the legality of the decisions that were made.

Mr. Lundrigan: We have not even started a line of questioning yet and the honourable member...

Mr. Rock: That is exactly what I am saying. This is exactly it; you did not start on this line of questioning at all.

Mr. Lundrigan: You are presuming exactly what we are going to do, and we have not even started. The honourable member has not started the question.

[*Interprétation*]

M. Breau: Pourquoi?

M. McGrath: Comment pouvons-nous faire une recommandation à moins qu'on nous autorise de vraiment poser des questions détaillées au National-Canadien à ce sujet.

M. Breau: Pour ce qui est de passer d'un service ferroviaire à un service d'autobus, d'accord, mais qu'on laisse de côté la question du décret de fin de service.

M. McGrath: Plus particulière pour ce qui est du service voyageurs du chemin de fer.

M. Breau: Oui. C'est l'aspect sur lequel on devrait s'arrêter.

M. McGrath: Je suis d'accord que les témoins ne soient pas tenus de répondre à une question hypothétique, mais je n'en ai pas entendu.

M. Breau: Et ils ne devraient pas être tenus de donner ...

Le président: Vous avez posé une question à M. Vaughan qu'il n'était pas autorisé à répondre.

M. McGrath: Pourquoi n'est-il pas autorisé? Je dit qu'il est bel et bien autorisé et il se doit d'y répondre.

M. Breau: Il n'est pas ici pour interpréter la Loi.

M. McGrath: C'est précisément la raison pour laquelle j'en appelle de la décision du président.

M. Rock: Je voudrais simplement faire une remarque. Je ne crois pas que les députés qui s'orientent dans cette voie soient dans leurs droits car ils nous entraînent dans des questions juridiques plutôt que de poser des questions sur l'administration, le coût des opérations, et les raisons pour lesquelles le National-Canadien veut abandonner son service voyageurs. Ils se querelle plutôt sur l'aspect juridique des décisions qui ont été prises.

M. Lundrigan: On n'a pas encore posé ce genre de questions et l'honorable député ...

M. Rock: C'est exactement ce que je dis. Vous n'avez pas encore orienté la discussion en ce sens.

M. Lundrigan: Vous supposez exactement ce que nous allons faire, et nous n'avons même pas commencé. L'honorable député n'a même pas commencé à poser ses questions.

[*Text*]

The Chairman: Order.

Mr. Lundrigan: I abide by the Chairman's ruling. I do not think we need a postmortem for half an hour on it though.

The Chairman: You put a question, Mr. McGrath, to appeal my ruling. My ruling is, as I said a minute ago, that Mr. Vaughan is not authorized to answer your question, and such a question should not be put to Mr. Vaughan. It was a hypothetical question. That is what I said.

Mr. McGrath: I do not remember precisely what the question was.

Mr. Skoberg: Mr. Chairman. We have to know what the question is. Can we go back on the record and have the question, please, precisely.

Mr. Breau: The question was about the CNR taking the initiative in continuing with the train service. That is the way I understood it.

Mr. Lundrigan: Mr. Chairman, I wonder if we could go on with Mr. McGrath's line of questioning. I am sure that it is in order. Let us forget about what happened half an hour ago.

Mr. Crossman: Perhaps Mr. McGrath will withdraw his appeal of the ruling of the Chairman.

Mr. McGrath: I will withdraw it if the Chairman withdraws his ruling.

Mr. Rose: Then you could bring it up later.

The Chairman: Let us withdraw the question and carry on with the line of questioning that we are here for this morning. I think that would be fair to everyone. Is it agreed? Agreed.

Mr. McGrath: Mr. Chairman, perhaps the best way to start would be to deal with the last submission we had on this matter which is the letter, which brings a whole new area into this matter.

My first question is this: on page 2 of the letter there is a comparison, in my view an

• 1230

unfair comparison, between the buses and the trains. For example, you state here that for the month of December 1968 the bus carried

[*Interpretation*]

Le président: A l'ordre.

M. Lundrigan: J'accepte la décision du président, mais je ne crois pas qu'il soit nécessaire d'en faire l'autopsie pendant une demi-heure, cependant.

Le président: Vous avez posé une question, monsieur McGrath, pour en appeler de ma décision. Ma décision est, comme je l'ai dit il y a un instant, M. Vaughan n'est pas autorisé à répondre à votre question et qu'on ne devrait pas poser une telle question à M. Vaughan puisqu'il s'agissait d'une question hypothétique. C'est ce que j'ai dit.

M. McGrath: Je ne me souviens pas exactement quelle était la question.

M. Skoberg: Monsieur le président, il faut savoir quelle était cette question. Est-ce qu'on ne pourrait pas voir le compte rendu afin de savoir quelle était cette question au juste?

M. Breau: La question était de savoir si le National-Canadien ne pourrait pas prendre l'initiative pour maintenir ce service ferroviaire? C'est ainsi que je l'ai comprise.

M. Lundrigan: Monsieur le président est-ce qu'on ne pourrait orienter la discussion dans le sens de M. McGrath? Je suis sûr que ces questions sont recevables. Oublions ce qui s'est produit il y a une demi-heure.

M. Crossman: Peut-être que M. McGrath veut retirer son appel de la décision du président.

M. McGrath: Je retire mon appel si le président retire sa décision.

M. Rose: Vous pourrez alors en reparler plus tard.

Le président: Laissons tomber toute la question et poursuivons la discussion pour laquelle nous sommes ici ce matin. Je pense que ce sera juste pour tous. Êtes-vous d'accord? Bon. Monsieur McGrath.

M. McGrath: Monsieur le président, la meilleure façon de commencer serait peut-être de revenir à la dernière instance que nous avons eue à ce sujet, soit la lettre, qui apporte un nouvel élément.

Voici donc ma première question. A la page 2 de cette lettre, vous faites une comparaison qui, à mon avis, est injuste, entre les autobus et les trains. Entre autres, vous dites ici qu'en décembre 1968 les autobus ont transporté 6,299 voyageurs et les trains, pendant le même mois, ont transporté 3,378 voyageurs.

[*Texte*]

6,299 pasengers and the train, in the same month, carried 3,378 passengers. I may be going right up the garden path on this question, but I am going to take a chance on it, anyway. How many passenger seats were available in December in the bus system as opposed to train seats. What I am getting at, sir, is that you had three passenger trains a week and I believe anywhere from 12 to 20 buses a week.

Mr. Vaughan: Twenty-eight.

Mr. McGrath: Twenty-eight buses a week.

Mr. Macdougall: I do not know the answer to that. I know the bus service is more frequent because we have a daily bus service.

Mr. McGrath: The point I am making, sir, is that we had six trains and 28 buses a week, and as a consequence of that my submission is that this is not a correct representation of the facts.

Mr. Vaughan: Let us say they are facts, anyway. There is certainly not...

Mr. McGrath: It is not fact, it is an argument, is it not?

Mr. Vaughan: No, I think they are...

Mr. Macdougall: These are facts. There is no editorial comment with respect to why they are there. Those are the numbers that went on the bus and the numbers that came off.

Mr. McGrath: Yes, but it implies that the buses...

Mr. Macdougall: It does not imply anything.

Mr. McGrath: Of course it does. It implies that the buses were much more popular than the trains, and I submit that until the other figures are available we cannot make a proper or a fair comparison.

Mr. Trudel: Mr. Chairman, a supplementary. I think this came out in the evidence—I do not know whether Mr. McGrath remembers—during the questioning that was pursued in the Maritimes. It was a matter of rather than using your figures on a train we would use a compartment. I will be furthering this line of questioning later on but I think what we want can be secured from the line of questioning we had in the Maritimes. You want seat occupancy and I think this was

[*interprétation*]

Enfin, je me trompe peut-être tout à fait, mais je pose ma question de toute façon. Combien de places pour voyageurs disposiez-vous en décembre, dans le système d'autobus, par rapport aux trains. Voilà ce à quoi je veux en venir: si vous avez 3 services voyageurs de trains par semaine et je pense qu'il y a de 12 à 20 autobus par semaine.

M. Vaughan: Vingt-huit.

M. McGrath: Vingt-huit autobus par semaine.

M. Macdougall: Je n'ai pas la réponse exacte. Je sais que le service des autobus est plus fréquent parce que nous avons un service quotidien par autobus.

M. McGrath: Nous avions 6 trains par semaine et 28 autobus par semaine. Donc, en conséquence, je dis que ce n'est pas une bonne représentation des faits.

M. Vaughan: Enfin, ce sont les faits!

M. McGrath: C'est un argument.

M. Vaughan: Non, Ce sont les faits!

M. Macdougall: Ce n'est pas un éditorial. Voici les chiffres des usagers de l'autobus...

M. McGrath: Mais cela laisse entendre que les autobus...

M. Macdougall: Cela ne veut rien dire du tout.

M. McGrath: Mais si; cela veut dire que les autobus sont beaucoup plus populaires que les trains. Je vous dis que jusqu'à ce que nous ayons les autres données on ne peut vraiment faire une comparaison valable.

M. Trudel: Question complémentaire, s'il-vous-plaît, monsieur le président? Cela se trouve dans les témoignages. Je ne sais pas si M. McGrath s'en souvient, mais pendant une des audiences au cours d'une série de questions posées dans les Maritimes ceci s'est présenté. Et plutôt que d'utiliser les données pour le train, si on prend disons, un wagon, un compartiment, j'y reviendrai plus tard avec d'autres questions, on peut obtenir à la suite des questions que nous avons posées

[*Text*]

determined from one of the questions I asked in the Maritimes.

Mr. McGrath: And this is one of the questions that was held in abeyance until these gentlemen were before us.

Mr. Trudel: Right. I will be pursuing this further because I am also interested in this. I think at the time 50 per cent occupancy was the maximum and then it came down to about 10 per cent for the train, and I think at that time we determined that on each train there were five compartments. I think if you bring it down to that it will be the only fair comparison that we can establish.

Mr. McGrath: That is correct. Can we have an undertaking that this information will be made available to us?

Mr. Macdougall: I think if you will ask a specific question, sir, we will be delighted to get the answer for you.

Mr. McGrath: We want to know how many seats were available on the buses for a given week in December and how many seats were available on the trains for a given week in December.

Mr. Mahoney: In 1968.

Mr. McGrath: It says here 1968-69.

Mr. Mahoney: It is December of 1968. They are waiting for 1969.

Mr. McGrath: Perhaps the same figures could be made available for the other statistical data that is given here—January and February—so that we will be in a position to make a true comparison.

Mr. Chairman, my other line of questioning has to do with accounting procedures. I recognize and respect the right of the CNR, which is their right by law, not to reveal these facts. Consequently I suggest that perhaps we could now pursue this line of questioning in camera.

Mr. Crossman: Just for clarification, Mr. Chairman, how long do you intend to sit?

• 1235

The Chairman: We might be able to complete it in 20 or 25 minutes. I will address the audience. If you do not mind, we are going to sit in camera for the next 25 minutes. What about the the recording of the proceedings?

Mr. McGrath: If we sit in camera we cannot record it.

[*Interpretation*]

dans les Maritimes. Vous voulez connaître le nombre de sièges occupés? C'est une des questions que j'ai posée dans les Maritimes.

M. McGrath: Et nous nous sommes entendus de réserver la question jusqu'à ce que nous ayons ces témoins.

M. Trudel: J'y reviendrai parce que je m'intéresse aussi à cet aspect de la question et je pense qu'alors nous avions 50 p. 100 au maximum de sièges occupés et 10 p. 100 du train, par unité, par compartiment comparativement à l'autobus parce que chaque train avait 5 compartiments. Donc, la seule comparaison juste et équitable que nous puissions établir, serait de nous donner ces chiffres.

M. McGrath: C'est juste. Alors, est-ce qu'on ne peut pas obtenir une étude et s'engager à nous fournir ces renseignements?

M. Macdougall: Posez une question bien précise et nous nous ferons un plaisir de vous procurer la réponse.

M. McGrath: Nous voulons savoir combien de sièges d'autobus étaient disponibles pour une semaine donnée au mois de décembre et la même chose pour le train.

M. Mahoney: En 1968.

M. McGrath: On parle de 1968-1969.

M. Mahoney: Pour décembre 1968.

M. McGrath: Les mêmes données pourraient être fournies pour les autres données statistiques fournies ici: janvier et février. Afin que nous soyons en mesure d'établir une constatation valable.

Voici donc, maintenant, une autre série de questions que je voudrais poser quant à la procédure comptable et je reconnais que le National-Canadien est dans son droit lorsqu'il ne veut pas révéler ces faits. Et par conséquence, je voudrais que nous reprenions ces questions à huis-clos, maintenant?

M. Crossman: Jusqu'à quelle heure voulez-vous siéger?

Le président: Il nous reste encore au moins 25 minutes. Donc, je demanderais au public de se retirer, nous siégerons à huis-clos pour les 25 prochaines minutes.

M. McGrath: Est-ce que l'on continue la transcription? Si l'on siège à huis-clos, on ne peut le faire.

[*Texte*]

An hon. Member: If it is recorded it will be published, and this will defeat the whole purpose.

Mr. McGrath: Under the Act they are not permitted to reveal these figures publicly. They gave them privately to the C.T.C. and now we want the same privilege, that is all.

Mr. Crossman: We were asking if a recording should be made of it.

Mr. McGrath: Obviously it cannot be recorded if it is in camera.

The Chairman: We will do it that way. The meeting is adjourned.

AFTERNOON SITTING

• 1530

The Chairman: I had a list before lunch of those who had asked to speak. Mr. Lundrigan, you are the next speaker.

Mr. Lundrigan: Mr. Chairman, is Mr. McGrath still on his round of questions? I am not sure whether he is finished.

Mr. McGrath: I reached a stalemate before lunch on my question.

The Chairman: I think I should answer to a question that was put by Mr. Skoberg too, at noon. I made a notice of motion, Mr. Skoberg, for our interim report to be concurred in on Monday. I had to make this motion before 5 o'clock tonight so it will come back on Monday. Is that all right?

Some hon. Members: Agreed.

The Chairman: Mr. McGrath, you want to know my decision. I think I am still on the same decision. I inquired at noon from some advisers and they told me as long as nobody appeals this judgment we cannot force anyone. Like these gentlemen here from the CNR, we have no authority whatsoever to ask the CTC to reverse their motions. As long as nobody has appealed to the CTC I think the question is still closed. If anybody appealed their decision or protested that would reopen the CTC negotiation; then perhaps the CNR would be allowed to put a question to them.

Mr. McGrath: Your ruling, Mr. Chairman, means that we cannot pursue questions regarding the judgment.

[*Interprétation*]

Une voix: Si on fait la transcription, ce sera publié, et alors on supprime le huis-clos.

M. McGrath: En vertu de la Loi, le CN ne peut pas rendre ces données publiques. Ils les ont donnés privément à la C.C.T., nous voulons le même privilège, c'est tout.

M. Crossman: On ne peut faire la transcription si c'est à huis-clos?

M. McGrath: Évidemment, c'est entendu.

Le président: Nous allons procéder ainsi. La séance est ajournée.

SÉANCE DE L'APRÈS-MIDI

Le président: J'ai la liste ici de ceux qui avaient demandé la parole. Il y a M. Lundrigan sur ma liste, vous êtes le suivant monsieur?

M. Lundrigan: Monsieur le président, est-ce que M. McGrath pose toujours ses questions? Aurais-je compris qu'il a fini?

M. McGrath: Je suis arrivé à une impasse avec mes questions.

Le président: J'ai fait un avis de motion pour M. Skoberg, au sujet de notre rapport intérimaire puis cela a été adopté lundi, j'ai dû présenter la motion avant 5 heures ce soir et alors nous l'aurons lundi prochain, d'accord?

Des voix: D'accord.

Le président: Monsieur McGrath vous voulez savoir ce qu'il en est? Je suis toujours rendu au même point quant à ma décision. Je me suis entêté auprès de certains conseillers, ils m'ont dit qu'aussi longtemps que personne n'en appelle de cette décision. Comme ces messieurs du CN, nous ne pouvons pas forcer qui que ce soit, ils n'ont aucune autorité pour demander à la Commission canadienne des transports d'abroger la motion. Et alors aussi longtemps que personne n'en a appelé auprès de la Commission canadienne des transports, je crois que la question est toujours close. Si quelqu'un voulait en appeler, on ré-ouvrirait les négociations à la Commission et alors le CN aurait le droit de poser des questions.

M. McGrath: Votre décision, monsieur le président, veut dire que nous ne pouvons pas continuer de poser des questions au sujet de la décision?

[*Text*]

The Chairman: I mean to say that you cannot ask the CNR people to ask the CTC to change their judgment.

Mr. McGrath: We are not trying to do that at all.

The Chairman: Yes, but when you ask the CNR people to ask the CTC to prolong the service, this is asking the CTC to change its judgment.

Mr. McGrath: No, that is not my understanding.

Mr. Peddle: Mr. Chairman, would it be in order for us to question the gentlemen who are witnesses regarding the support that they presented with their application to abandon the rail passenger service? Would it be in order for us to ask questions on that? We are not asking them to change anything, but just to get some information.

The Chairman: It comes to the same thing; it boils down to the same thing.

Mr. Lundrigan: Mr. Chairman, do I understand that we cannot ask any questions relating to the rail passenger service and the concomitant bus service in Newfoundland?

Mr. Breau: Mr. Chairman, we will have to be careful here. We can ask questions on the alternatives of passenger train service or bus service in the Atlantic provinces because this comes within the Order of Reference we have had from the House, to hear evidence on the transportation problem of the Atlantic provinces.

If it is a known fact that the CNR are attempting—because perhaps the people would rather have that—to change everything from passenger trains to bus, then we can question that, but I do not think we can question the order that was made on a certain date concerning the passenger train service in Newfoundland.

Mr. McGrath: It relates to that.

Mr. Breau: No, it does not. There is a passenger train or bus service perhaps some place else...

Mr. McGrath: Oh yes, I know.

Mr. Breau: It says in the presentation here that rail passenger service ought to be maintained only on high volume main lines.

[*Interpretation*]

Le président: Somme tout, ce que je veux dire, c'est que vous ne pouvez pas forcer le CN à demander à la CCT de changer sa décision.

M. McGrath: Ce n'est pas ce que nous voulons faire.

Le président: Mais quand vous demandez au CN d'en appeler auprès de la CCT pour prolonger le service, cela équivaut à une demande auprès de la Commission pour changer sa décision.

M. McGrath: Non, ce n'est pas ce que j'ai crû comprendre.

M. Peddle: Monsieur le président, est-ce que nous pouvons poser une question aux témoins, au sujet de l'argument qu'ils ont invoqué au sujet de l'abandon du service-passager? Est-ce qu'il serait dans l'ordre de poser des questions à ce sujet? On ne leur demande pas de changer quoique ce soit, mais juste de donner des renseignements.

Le président: Cela revient au même.

M. Lundrigan: Monsieur le président, dois-je comprendre qu'on ne peut pas poser des questions au sujet du service ferroviaire et au sujet du service de remplacement par des autobus à Terre-Neuve?

M. Breau: Oui, il faut faire attention, monsieur le président. Nous pouvons poser des questions sur le choix entre le train de voyageurs et le service d'autobus, car cela entre dans le mandat que nous avions de la Chambre, de faire enquête sur le problème du transport dans les provinces de l'Atlantique.

C'est un fait connu que le CN tente, peut-être parce que les gens le veulent ainsi, de changer tout le service-voyageur pour le service d'autobus. Nous pouvons poser des questions à ce sujet, mais nous ne pouvons pas poser des questions au sujet de la date à laquelle la substitution du service-voyageur se ferait à Terre-Neuve.

M. McGrath: Cela revient au même.

M. Breau: Non. Il y a un service voyageur ou un service d'autobus, peut-être ailleurs...

M. McGrath: Oh oui, je vois.

M. Breau: Il est dit dans la présentation que le service-voyageur doit être maintenu uniquement sur les lignes principales à haute fréquentation.

[*Texte*]

Mr. McGrath: In other words, what you are saying is that we can ask questions about it elsewhere but not in Newfoundland.

• 1535

Mr. Breau: No, I am not saying that.

The Chairman: You can ask questions on buses, Mr. McGrath, in Newfoundland. How they are operated; what is the cost of operation and all that sort of thing. There is nothing stopping you.

Mr. McGrath: Mr. Chairman, I do not understand your ruling. Anyway, was Canadian National able to get the figures I asked for before noon?

Mr. Vaughan: In answer to Mr. McGrath, we did make a phone call and we have some figures.

Mr. Macdougall: Mr. McGrath, I have some figures, not exactly in the form you asked, for a week. I was just able to get them by the months. They are kept by the month. You asked for the total number of seats that was available by bus and by train. In December, 1968 by bus there were 7,254 seats available and by train 7,488. There was some extra train capacity in December because of the Christmas rush, so you will notice a difference in January. In January, 1969 the seats available by bus were 9,672 and by train 6,460. In February, 1969 the total by bus was 8,736 and by train 5,075.

Mr. Mahoney: I have a supplementary on this point, Mr. Chairman. On page 2 of the letter of March 14 to the CTC you give certain figures regarding passengers on the train. May I verify that the train service in December, 1968 through February, 1969 and the train service December, 1967 through February, 1968 was the same type of service, that is three trains a week?

Mr. Macdougall: That is right, sir, yes.

Mr. Mahoney: Thank you.

Mr. Perrault: This question may have been asked earlier and if it has been, I apologize. What is the percentage of seat occupancy in these two modes of transportation? You say, 7,254 seats available.

[*Interprétation*]

M. McGrath: Oui, mais ce que vous dites c'est que nous pouvons poser des questions partout ailleurs, mais pas au sujet de Terre-Neuve.

M. Breau: Non, ce n'est pas ce que je dis.

Le président: Vous pouvez poser une question au sujet du service des autobus monsieur McGrath, sur l'exploitation, le coût, etc, il n'y a rien qui ne vous empêche de poser des questions à ce sujet là.

M. McGrath: Alors, monsieur le président, je ne comprends pas votre décision. Mais en tous les cas, est-ce que le CN a pu obtenir les chiffres que j'ai demandé avant le déjeuner?

M. Vaughan: Oui, monsieur. Nous avons certains chiffres, je m'excuse, oui, pour répondre à M. McGrath, nous avons, en fait, certains chiffres. M. Macdougall va vous les donner.

M. Macdougall: J'ai pu obtenir certains chiffres, monsieur McGrath, non pas dans la forme que vous avez demandé, non par semaine mais par mois. C'est ainsi qu'on les compile. Vous avez demandé le total des sièges disponibles par autobus et par train. En décembre 1968, par autobus, 7,254 places disponibles et par train 7,488. Il y a eu en décembre un surplus dans le train en raison de Noël, et en janvier 1968, le nombre de places disponibles en autobus était de 9,672, et par train, 6,460. En février 1969 le total pour l'autobus, 8,736 et par train 5,075.

M. Mahoney: J'aurais une question supplémentaire à poser sur ce point, monsieur le président. A la page 2 de la lettre partie 14 à la Commission canadienne des transports, concernant le nombre de voyageurs, la réponse nous indique que le service de trains entre décembre 1968 jusqu'à février 1969, et le service de trains en décembre 1967 jusqu'en février 1968, était le même genre de service, soit trois trains par semaine. Est-ce exact?

M. Macdougall: C'est exact.

M. Mahoney: Merci.

M. Perrault: Une question supplémentaire s'il vous plaît. La question aurait dû, peut-être, être posée plus tôt, et si c'est le cas, je m'excuse. Quel est le pourcentage de places, disons, prises dans les deux modes de transport? En d'autres termes, vous dites 7,254 places disponibles?

[*Text*]

Mr. Macdougall: If you take these figures down, Mr. Perrault...

Mr. Perrault: I have written all the figures down here.

Mr. Macdougall: These figures were given before, but I will give them to you again about the actual carryings.

Mr. Perrault: Do not repeat them; I missed part of this morning's hearing.

Mr. Macdougall: It is on page 2.

Mr. Perrault: Oh, it is here. That is fine. Thank you. Mr. Chairman, I apologize; I have just received it.

Mr. Turner (London East): Mr. Vaughan, is it true that all passes were cancelled on the train during the test period of the buses; that CNR passes were honoured on the buses, but not on the train?

Mr. Vaughan: I am sorry, I could not answer that. Does anybody know?

Mr. Macdougall: I have never heard of that.

Mr. Turner (London East): I heard that down in Newfoundland and I just want to know if these figures...

Mr. Macdougall: I know of no order that was issued cancelling the applicability of the passes on the trains.

Mr. Trudel: I have a supplementary. It such an order were issued, Mr. Chairman, would either Mr. Macdougall or Mr. Vaughan be advised? It would come to your attention if such an order had been issued?

Mr. Macdougall: I would think it would come to my attention.

Mr. Trudel: To your attention? Thank you.

Mr. Skoberg: I have a supplementary, Mr. Chairman. For those people working on the boat coming from Port-aux-Basques back to St. John's, was any instruction issued to them to ride the buses rather than the train?

Mr. Macdougall: I know of no instructions of that kind. They were certainly never issued by me and I have never heard of them.

Mr. McGrath: Was there any advertising for the train and the bus during this period?

[*Interpretation*]

M. Macdougall: Si vous avez écrit les chiffres...

M. Perrault: Oui, je les ai écrit.

M. Macdougall: Les chiffres que j'avais donnés précédemment au sujet du nombre de passagers transportés, sont les suivants:

M. Perrault: Ne les répétez pas, je n'étais pas là ce matin.

M. Macdougall: C'est à la page 2.

M. Perrault: Je m'excuse cela est ici. Merci monsieur le président, je viens de les recevoir.

M. Turner (London-Est): Monsieur Vaughan, est-ce vrai que tous les passagers soient acceptés dans les autobus, non pas dans les trains, pendant cette période d'essai?

M. Vaughan: Je m'excuse, je ne saurais vous donner la réponse. Est-ce que quelqu'un le sait?

M. Macdougall: Je n'ai rien entendu de semblable.

M. Turner (London-Est): La raison pour laquelle j'ai posé la question, c'est que j'en ai entendu parler à Terre-Neuve.

M. Macdougall: Je ne sais pas si on a annulé les passes dans les trains.

M. Trudel: Monsieur le président, est-ce que M. Macdougall ou M. Vaughan auraient été avertis d'une telle disposition? En d'autres termes une telle directive a-t-elle été portée à leur attention?

M. Macdougall: Je crois que cela aurait été porté à mon attention oui.

M. Trudel: A votre attention. Merci.

M. Skoberg: J'ai une question supplémentaire. Ceux qui travaillent sur le navire, venant de Port-aux-Basques et retournant à Saint-Jean, est-ce qu'il y a eu des directives à leur égard d'utiliser des autobus plutôt que le train?

M. Macdougall: J'ignore toutes ordonnances ou toutes directives de ce genre. Certainement je n'en ai jamais données et je n'en ai jamais entendu parler.

M. McGrath: Y a-t-il eu une tentative, y a-t-il eu des annonces ou de la publicité faites pour le train et les autobus?

[*Texte*]

• 1540

Mr. Vaughan: Are you speaking of the experimental period?

Mr. McGrath: Yes, the experimental period. We are talking about the first three months; the last month of 1968 and the first two months of 1969.

Mr. Vaughan: When you ask, was there any advertising, what do you mean, sir?

Mr. McGrath: Newspaper, television, radio advertising extolling the virtues of travelling by bus and extolling the virtues of travelling by train.

Mr. Vaughan: Probably.

Mr. Macdougall: I think we would do the normal advertising if we do, but I do not think we mounted any special campaign either in favour of the bus or the train.

The Chairman: Mr. Peddle.

Mr. Peddle: We saw lots advertisements on television advertising the buses but I have yet to see in Newfoundland any advertising on television advertising their train service.

Mr. Macdougall: You have more information on that than I have. I do not know about that.

Mr. Skoberg: Another supplementary question if I may, Mr. Chairman.

The Chairman: Mr. Skoberg.

Mr. Skoberg: Could you possibly indicate an amount that may be budgeted for the straightening of your trackage in Newfoundland.

Mr. Macdougall: I do not know that I really caught the import of your question, Mr. Skoberg.

Mr. Skoberg: I am referring to straightening some of the curves out. There were numerous curves in the short distance we travelled.

Mr. Macdougall: There are a lot of curves over there. Of course there are a lot of curves everywhere. But we are carrying out our normal maintenance program each year, depending upon the volume of traffic we have to carry, but I have no knowledge of any specific program designed just to straighten out curves in the track other than what is carried out in the normal maintenance program to see that the track is of sufficient quality to handle the traffic.

[*Interprétation*]

M. Vaughan: Quand vous parlez de la période d'essai ou quoi?

M. McGrath: Nous parlons des trois premiers mois. C'est-à-dire du mois de décembre 1968 et des deux premiers mois de 1969?

M. Vaughan: Quand vous parlez de la publicité, quelle sorte de publicité voulez-vous dire?

M. McGrath: Des gens qui auraient été incités à voyager par autobus, plutôt que par train.

M. Vaughan: C'est probable.

M. Macdougall: Je crois que nous ferons la publicité normale, mais je ne crois pas que nous ayons monté de campagne spéciale soit en faveur de l'autobus ou du train.

Le président: Monsieur Peddle.

M. Peddle: Nous avons vu à la télévision beaucoup de publicité en faveur de l'autobus, mais nous ne voyons pas de publicité télévisée en faveur du train à Terre-Neuve.

M. Macdougall: Vous avez plus de renseignements que moi à ce sujet-là.

M. Skoberg: Une autre question, vous permettez, monsieur le président.

Le président: Monsieur Skoberg.

M. Skoberg: Pourriez-vous indiquer la somme qu'on pourrait prévoir pour le redressement de la voie à Terre-Neuve.

M. Macdougall: Je ne sais pas si j'ai bien compris votre question.

M. Skoberg: Je parle du redressement de quelques courbes. Il y en avait plusieurs dans le bref parcours que nous avons fait.

M. Macdougall: Il y a beaucoup de courbes c'est vrai mais il y en a partout. Nous exécutons notre programme normal d'entretien chaque année selon le volume du trafic mais je ne connais aucun programme précis visant à éliminer les courbes dans la voie sauf le programme normal d'entretien visant à assurer que la voie soit de qualité suffisante pour supporter le trafic.

[*Text*]

Mr. Skoberg: In other words, you are just maintaining the present trackage under the minimum conditions necessary to handle the traffic that you have at this time. Is that correct?

Mr. Macdougall: No, I would not say that that is a fair summation. We are maintaining the trackage on the same standard basis that we maintain trackage everywhere—we maintain it to a quality which will enable us to operate safely with the volume of traffic we have to put over the line. You must remember that on the Newfoundland line the volume of traffic is not as heavy as on many other lines in Canada, therefore you do not spend money to obtain a standard of track on a line for 100,000 tons of traffic if you are only going to move 5,000 tons of traffic over it.

Mr. Skoberg: The point, of course, Mr. Macdougall, is that we do know that there is a trackage improvement program carried out on CN and all rail lines generally and it would appear that there is absolutely no attempt being made to straighten out the line in some of those areas that could well be straightened out. There are sharp curves in some of those areas and that is why I am wondering whether or not you do have any over-all program for improvement.

Mr. Macdougall: If you will excuse me, sir, I do not think that that is so. Our program for maintaining our track is to ensure that our tracks throughout the whole of Canada are of sufficient quality and condition to handle the traffic we know or anticipate is going to pass over it. It is not any different in Newfoundland than in any other part of Canada.

The Chairman: Mr. McCleave.

Mr. McCleave: Mr. Macdougall, is it not true that if there are curves in a line it cuts down the amount of tonnage that a locomotive can haul?

Mr. Macdougall: No, I do not think it necessarily follows that because you have curvature its cuts down the tonnage locomotives can haul. What they can haul depends upon their rated capacity to haul traffic. It may cut down your speed somewhat, depending upon the amount of curvature. But Newfoundland has a lot of curvature—there is no doubt about that. It was built by the Reid Newfoundland Company in the beginning that way.

There is a lot of curvature in the track on Prince Edward Island. It was built originally

[*Interpretation*]

M. Skoberg: En d'autres termes, vous maintenez tout simplement la voie actuelle dans les conditions minimum pour supporter le volume de trafic que nous avez à l'heure actuelle. Est-ce exact?

M. Macdougall: Je ne dirais pas que c'est juste. Nous maintenons la voie selon les mêmes normes que nous le faisons partout ailleurs. C'est-à-dire que nous maintenons une qualité qui nous permettra d'opérer en toute sécurité compte tenu du volume. Souvenez-vous qu'à Terre-Neuve le volume du trafic n'est pas aussi élevé que sur plusieurs autres lignes au Canada et que par conséquent vous ne dépensez pas de l'argent pour obtenir une ligne pouvant accepter 100,000 tonnes de volume, si vous n'en avez en fait que 5,000.

M. Skoberg: Le point est, monsieur Macdougall, que nous savons qu'il y a un programme d'amélioration de la voie au CN et de toutes les lignes ferroviaires en général. Il semble qu'on n'essaie aucunement de redresser la voie dans certaines régions qui en auraient vraiment besoin. Il y a des courbes raides dans certaines régions et je me demande si vous avez un programme d'ensemble à ce sujet.

M. Macdougall: Je ne crois pas qu'il en soit ainsi, si vous me le permettez monsieur, notre programme d'entretien de la voie est conçu en vue d'assurer que toutes les voies à travers le Canada soient de qualité suffisante pour pouvoir supporter le trafic qui doit y passer. Ce n'est pas différent à Terre-Neuve qu'ailleurs au Canada.

Le président: M. McCleave.

M. McCleave: Monsieur Macdougall, n'est-il pas vrai que les courbes d'une voie peuvent réduire la charge qu'une locomotive peut tirer?

M. Macdougall: Je ne crois pas que les courbes réduisent nécessairement la charge que peut tirer une locomotive. La charge que peut tirer une locomotive dépend de sa puissance. Les courbes peuvent réduire quelque peu la vitesse mais à Terre-Neuve, il y a beaucoup de courbes, il n'y a aucun doute à ce sujet. La voie a été construite de cette façon au début par la Reid Newfoundland Company.

Il y en a beaucoup aussi dans la voie de l'Île-du-Prince-Édouard. La voie a été cons-

[*Texte*]

by the Prince Edward Island Railway. There is curvature on other portions of track, CPR as well as CN.

Mr. McCleave: But is it not a fact that the more curvature and grade you have the more it drives up the cost of transportation?

Mr. Macdougall: To a certain extent it does drive up the cost of transportation, but it is not an element, from my knowledge of it, that drives the cost of transportation up in a violent manner at all. Once you get the train rolling or operating at the speed that the track will allow, I do not say it is not more expensive to operate with curves and grades than on a flat straight piece of track—I think that is rather axiomatic—but it does not escalate the costs of that materially.

I know I have heard this argument made, and I think it applies to this point, that somebody wants to spend $1 million, $2 million, $5 million doing just the type of thing you are talking about—cutting down grade and eliminating curvature. But there is always the question of just how much value you are

• 1545

going to get back for the dollars you spend on that—I just how much you can increase your speed and how much you can increase your tonnages if you do that. This is always an economic question and our engineering people have to figure out just what the optimum situation is for the expenditure of money involved. When you come to do this you get into fairly substantial expenditures—you have to really make a new roadbed if you are going to take out other than just the odd curve. We are taking out the odd curve here and there, railways do that continually, but when you start in a place such as Newfoundland to eliminate this, how far do you go, how big a program do you get into? You can eventually work your argument down to the point where you should build a whole new railroad.

The Chairman: Mr. McGrath.

Mr. McGrath: Does the company make money on their rail passenger service in the province of Nova Scotia?

Mr. Macdougall: I do not know that we separate out our passenger services by provinces. We separate them by passenger runs. For instance, our operation from Montreal to Halifax of the *Ocean Limited* is a train run; we look at that train run but we do not look at just the province of Nova Scotia as such.

[*Interprétation*]

truite de cette façon au début. Il y a des courbes aussi sur les voies non seulement du CN mais du CP.

M. McCleave: Mais n'est-il pas vrai que plus il y a de courbes et plus les pentes sont raides, plus cela augmente les frais de transport?

M. Macdougall: Oui, cela augmente les frais de transport, jusqu'à un certain point, mais ce n'est pas un élément qui, à ma connaissance, augmente les frais de transport de façon appréciable. Une fois que le train roule à la vitesse maximum permise par la voie, il n'en coûte pas plus d'opérer avec des courbes et des pentes qu'avec une voie très droite. Cela n'augmente pas les frais de façon appréciable.

On a déjà entendu dire, et je crois que cela s'applique ici, que quelqu'un veut dépenser 1, 2 ou 5 millions pour faire ce dont vous parlez, c'est-à-dire éliminer les courbes et les pentes. Mais il est toujours utile de se demander combien on va retirer de ses investissements, si la vitesse et la charge utile vont augmenter. C'est toujours une question économique et nos ingénieurs doivent calculer exactement quelle sera la meilleure situation pour la somme d'argent en cause. Dans un cas comme celui-ci, il s'agit de sommes plutôt élevées car il faut refaire les assises de la voie si l'on fait plus que supprimer une courbe ici où là. Nous supprimons des courbes ici et là; les compagnies de chemins de fer font cela continuellement. Mais si l'on commence à le faire dans un endroit comme Terre-Neuve, il faut décider où s'arrêter, quelle importance donner au programme? On peut discuter jusqu'à en conclure éventuellement qu'il faudra construire une nouvelle voie ferrée au complet.

Le président: Monsieur McGrath?

M. McGrath: Monsieur le président, est-ce que la compagnie fait de l'argent avec le service-voyageurs en Nouvelle-Écosse?

M. Macdougall: Je ne sais pas si nous faisons la répartition par province de nos services-voyageurs. Nous les répartissons selon le parcours. Par exemple, le trajet de Montréal à Halifax que fait l'*Océan Limitée* est un seul parcours; nous examinons ce parcours du trajet en Nouvelle-Écosse.

[*Text*]

Mr. McGrath: Let me take two runs. How about the run from North Sydney to Truro and the run from Yarmouth to Halifax.

Mr. Macdougall: I think I would have to answer that by saying that "making money" is not an economous phrase that you can use. Do you mean are we making our costs, are we making a contribution to our overhead, or are we making a profit?

Mr. McGrath: Mr. Macdougall, I want the same criteria applied to those two runs that you applied to Newfoundland. How much money are you losing or how much are you making?

Mr. Macdougall: We are not making any—let us put it that way.

Mr. McGrath: How much are you losing?

Mr. Macdougall: I do not know exactly how much we are losing on those runs, but I can tell you that I do not think that any of the services east of Montreal make any money...

Mr. McGrath: Can we find out...

Mr. Macdougall: —or the transcontinental trains make any money.

Mr. McGrath: ... how much money we lose on the run from Sydney to Truro and from Yarmouth to Halifax?

Mr. Macdougall: I do not think so, no. You probably could find out in respect of the Yarmouth to Halifax one because it is a mixed train operation that runs on that line. The Sydney to Truro one is part of the *Ocean Limited* that runs Sydney to Montreal.

Mr. McGrath: Yes, but it is a separate train. You have to change at Truro to get the *Ocean Limited,* do you not?

Mr. Macdougall: No, the *Ocean Limited* goes from Sydney to Montreal right through Truro.

Mr. McGrath: I thought the *Ocean Limited* originated in Halifax.

Mr. Macdougall: No, it does not. *The Chaleur* originates at Moncton, *The Scotian* originates at Halifax and the *Ocean Limited* originates at Sydney.

Mr. McGrath: But is it a fair statement to say that none of these runs are making any money?

[*Interpretation*]

M. McGrath: Permettez-moi de comparer deux lignes. Le parcours de North Sydney à Truro, par exemple, et ensuite celui de Yarmouth à Halifax.

M. Macdougall: Je crois qu'il faudrait dire que «faire de l'argent», n'est pas une expression juste au point de vue économique. Voulez-vous savoir si nous rencontrons nos frais, si nous contribuons à nos frais généraux ou si nous faisons un profit?

M. McGrath: Je voudrais qu'on applique à ces deux parcours les mêmes critères qu'on a appliqués à Terre-Neuve. Combien d'argent faites-vous, combien en perdez-vous?

M. Macdougall: Nous n'en faisons pas.

M. McGrath: Alors, combien en perdez-vous?

M. Macdougall: Je ne le sais pas, mais je pourrais vous dire que je ne crois pas que les services à l'est de Montréal fassent de l'argent.

M. McGrath: Pouvons-nous trouver...

M. Macdougall: Ou même les trains transcontinentaux.

M. McGrath: Est-il possible de savoir combien nous perdons sur les parcours de Sydney à Truro et de Yarmouth à Halifax?

M. Macdougall: Non, je ne le crois pas. De Yarmouth à Halifax, vous pourriez peut-être l'obtenir car il s'agit d'un train mixte sur ce parcours. Mais de Sydney à Truro, ça fait partie de l'*Océan Limitée* qui va de Sydney à Montréal.

M. McGrath: Oui, mais il s'agit d'un train séparé. Il faut tout de même faire la correspondance à Truro pour prendre l'*Océan Limitée*?

M. Macdougall: Non, l'*Océan Limitée* va de Sydney à Montréal en passant par Truro.

M. McGrath: Je croyais que l'*Océan Limitée* partait de Halifax.

M. Macdougall: Non. Le *Chaleur* part de Moncton, le *Scotian*, de Halifax et l'*Océan Limitée*, de Sydney.

M. McGrath: Et aucun de ces parcours ne montre de profit, c'est exact?

[*Texte*]

Mr. Macdougall: I think that is fair, yes. The passenger business is notorious for losing a lot of money both in Canada and in the United States.

Mr. McGrath: Why then is it not a general policy of the railway to abandon all of these lines?

Mr. Macdougall: Basically because the Parliament of Canada said differently.

Mr. McGrath: You have not asked for permission.

Mr. Vaughan: If you mean by that, are we going to make more applications, the answer is yes.

Mr. McGrath: May I ask where the axe will fall next?

Mr. Vaughan: There are some applications on file at the Commission now.

An hon. Member: For provincial abandonment?

The Chairman: Mr. Trudel.

Mr. Trudel: Along the same line of questioning, Mr. Chairman, is there a percentage of occupancy that the CNR uses to arrive at a date when they ask for a discontinuance of a service? Would you ask for discontinuance on a line, say, where there is only 20 or 30 per cent occupancy, or have you cut it down that fine?

Mr. Macdougall: No, I do not recognize that as a criteria that I have ever heard of. We examine our train runs. We watch what is happening on the train runs and a decision has to be made by management from time to time whether or not they should apply for abandonment of these operations.

As you know, in recent years there has been the passage of the National Transportation Act which deals with this whole question of passenger service and passenger operations, and we are proceeding to put before

• 1550

the Commission those lines and services on a priority basis which we feel they should deal with.

Unfortunately, since the passage of that Act nearly two years ago they have not dealt with any cases, except this because they got into other matters. We are now waiting patiently, perhaps even as patiently as Mr. McGrath is with some of his concerns, to have cases all across Canada that are now laying before the Commission dealt with.

[*Interprétation*]

M. Macdougall: Oui, c'est exact. Le service voyageurs perd toujours de l'argent, beaucoup d'argent, au Canada et aux États-Unis.

M. McGrath: Et alors, pourquoi les compagnies ferroviaires n'abandonnent-elles simplement pas ces parcours.

M. Macdougall: Au fond, parce que le Parlement du Canada en a décidé autrement.

M. McGrath: Vous n'avez pas demandé la permission en fait?

M. Vaughan: Si vous voulez savoir par la si nous allons faire d'autres demandes d'abandon, la réponse est oui.

M. McGrath: Je n'ai pas encore posé ma question.

M. Vaughan: Nous avons présenté quelques demandes que la Commission étudie à l'heure actuelle.

Une voix: Demandes d'abandon de services?

Le président: Monsieur Trudel.

M. Trudel: Dans la même ligne de pensée, monsieur le président, y a-t-il un pourcentage d'occupation qu'utilise le CN pour en arriver un jour à demander la permission d'abandonner un service? Allez-vous demander la permission d'abandonner un service si, par exemple, il n'y a que 20 ou 30 p. 100 des places disponibles qui sont occupées?

M. Macdougall: Je ne reconnais pas cela comme critère dont j'aurais déjà entendu parler. Nous surveillons ce qui se passe dans nos trains et la direction doit décider de temps si elle doit demander ou non l'abandon d'un service.

Comme vous le savez, la Loi nationale sur les transports a été adoptée il y a quelques années et elle traite de cette question des services voyageurs et nous allons soumettre à la Commission les questions prioritaires.

Depuis l'adoption de la loi il y a près de deux ans, nous n'avons pas eu beaucoup de cas de ce genre, comme vous le savez, parce qu'il y a eu d'autres questions à l'étude. Nous attendons patiemment, comme M. McGrath le fait lui-même, pour que les causes qui sont devant la commission soient réglées.

[*Text*]

Mr. McGrath: I took a train from Montreal last night. It was a Montreal to Winnipeg Train. Is that a line?

Mr. Macdougall: I do not think it is a line, sir. We do not operate a service from Ottawa to Winnipeg.

Mr. McGrath: Montreal to Winnipeg.

Mr. Macdougall: We operate a transcontinental service...

Mr. McGrath: From Montreal to Winnipeg.

Mr. Macdougall: ...from Montreal to Winnipeg and on to the Pacific Coast, the transcontinental, the supercontinental and the panarama trains.

An hon. Member: This train I took last night was just to Winnipeg.

An hon. Member: It stopped at Winnipeg.

An hon. Member: No, sir, it terminated at Winnipeg.

An hon. Member: That is what I mean—stopped, terminated at Winnipeg. That is a winter run.

An hon. Member: Yes, I think that is a winter operation. They do stop the train; they break it there and you have to make a connection to go on from there—a connection with another train.

Mr. Macdougall: I think, Mr. McGrath, in answer to your question, the fact is well known that railway passenger business loses money. It loses money practically any place that I am aware of, certainly in North America. All the railroads are in exactly the same position. We have tried for a number of years to reverse that tide by doing our best to attract passengers into our passenger services throughout the whole of Canada and we have had certain successes with that. But at the same time we have not stemmed the tide; we know that. We have made improvements and we have improved our loss position, but basically most of the passenger services do lose money.

Mr. McGrath: I have two final questions, Mr. Chairman. The first one. Would the railway consider it to be a reasonable proposition to accede to the requests of the Newfoundland legislature to the vast body of public opinion in Newfoundland, and the brief that has been presented to this Committee and the CTC to have a longer period of time in this experimentation between the buses and the train? We are not here to plead the "Bullet"

[*Interpretation*]

M. McGrath: J'ai pris à Montréal hier soir le train de Montréal à Winnipeg. Est-ce un parcours?

M. Macdougall: Non, il ne s'agit pas d'un parcours. Monsieur, nous n'avons pas de service d'Ottawa à Winnipeg.

M. McGrath: Montréal à Winnipeg.

M. Macdougall: Nous exploitons un service transcontinental.

M. McGrath: De Montréal à Winnipeg.

M. Macdougall: ... de Montréal à Winnipeg et jusqu'à la côte du Pacifique, le transcontinental, le super continental et panorama.

Une voix: Ce train que j'ai pris l'autre nuit allait seulement à Winnipeg.

Une voix: Il s'arrêtait à Winnipeg.

Une voix: Non, monsieur, il n'allait pas plus loin que Winnipeg.

Une voix: C'est ce que je voulais dire, il s'arrêtait à Winnipeg. C'est un service d'hiver.

Une voix: Oui je pense que c'est un service d'hiver. Il arrête le train, et vous devez prendre une correspondance avec un autre train pour continuer.

M. Macdougall: Je crois qu'en réponse à votre question, monsieur McGrath, tout le monde sait très bien que le service voyageur perd de l'argent. Il perd de l'argent partout où je connais, certainement en Amérique du Nord. Tous les chemins de fer sont dans la même situation. Nous avons essayé depuis plusieurs années de renverser cette tendance, en faisant de notre mieux pour attirer les voyageurs à notre service voyageur à travers le Canada et nous avons eu un certain succès à cet égard. Mais nous n'avons toujours pas pu renverser le flot, et nous le savons. Nous avons pu l'améliorer, diminuer nos pertes si vous le voulez, mais au fond, la plupart de nos services voyageurs perdent de l'argent.

M. McGrath: J'ai deux questions pour terminer, monsieur le président. La première: est-ce que le chemin de fer considérerait ceci comme une proposition raisonnable, d'accéder à la demande de la législature de Terre-Neuve, de la plupart des gens de Terre-Neuve, de l'opinion publique et du mémoire qui a été présenté devant notre Comité et la Commission canadienne des transports, d'avoir une période de temps plus longue pour

[*Texte*]

on the basis of sentiment or to keep the thing going in perpetuity. All we want to ensure is that we will have a reasonably efficient transportation service.

A number of problems have been raised that bother us very much. For example, there is no way to transport patients and invalid people from the west coast of Newfoundland to specialized treatment in St. Johns if the trains are taken off. The elderly, women with children, and so on. Would you consider it a fair proposition to keep the trains running until the fall of 1970, at which time the Commission would be asked to re-examine the whole picture?

Mr. Macdougall: Let me just deal first of all with your concern, quite properly, about women and children and sick people.

Mr. McGrath: We had a brief on this by the way, from the social workers.

Mr. Macdougall: I understand that. But this sort of problem arises all over Canada where there are no train services, and people are handled by ambulance. They go in an ambulance for 60 miles into Toronto to have something done to them.

Mr. McGrath: Do they go 450 to 600 miles by ambulance?

Mr. Macdougall: Let me tell you this. We do not carry very many people of that kind on the trains. I made some enquiries about Newfoundland, and I can find very few instances in the last few years where we have had any call or request for the type of thing you are speaking of. So if they are in that condition, they are going by some other means.

Mr. McGrath: But you would have no way of knowing...

Mr. Macdougall: We would know if they were on the train.

Mr. McGrath: ...whether you carry a litter patient in a sleeping car. You would have no way of getting this recorded.

Mr. Macdougall: Our people know about that. They have to put a crew in there, take out the windows, put the people in, and that sort of thing.

Mr. McGrath: I will not argue about it, Mr. Macdougall. I would like to have an answer to my other question.

[*Interprétation*]

cet essai entre les autobus et les trains. Nous ne sommes pas ici pour plaider en particulier pour le Bullet par sentimentalité ou pour le garder «ad infinitum». Tout ce que nous voulons c'est assurer un service de transport efficace.

Il y a un certain nombre de problèmes qui ont été soulevés et qui nous préoccupent beaucoup. Par exemple, il n'y a pas moyen de transporter les invalides, côte ouest, de Terre-Neuve à Saint-Jean si vous enlevez le train. De même, les vieillards, les mères avec leurs petits enfants etc. Est-ce que vous estimez que ce serait suffisant pour garder les trains jusqu'à l'automne de 1970, et à ce moment-là, on demandera à la Commission d'étudier la question de nouveau.

M. Macdougall: Permettez-moi, tout d'abord, de parler de votre préoccupation au sujet des femmes, des vieux et des malades.

M. McGrath: Nous avons eu un mémoire à ce sujet.

M. Macdougall: Le problème surgit partout au Canada où il n'y a pas de service de train, on a alors des services ambulanciers; vous prenez l'ambulance pour soixante milles jusqu'à Toronto.

M. McGrath: Est-ce qu'il faut qu'il fasse 450 milles à 600 milles par ambulance?

M. Macdougall: Permettez-moi de vous dire que nous ne transportons pas beaucoup de gens de ce genre dans nos trains. J'ai enquêté à Terre-Neuve; il y a eu très peu de cas à Terre-Neuve où nous avons eu des problèmes de ce genre. Et alors s'il se trouve dans cette situation, ils se rendent par d'autres moyens.

M. McGrath: Mais vous ne le sauriez pas...

M. Macdougall: Nous le saurions s'ils étaient sur le train.

M. McGrath: .. si vous transportiez une civière dans un compartiment-couchette, vous n'auriez pas de moyen de le savoir.

M. Macdougall: Nos employés le savent car il faut absolument une équipe pour enlever les fenêtres, faire entrer les gens, etc...

M. McGrath: Je ne discuterai pas cela M. Macdougall, mais je voudrais une réponse à mon autre question.

[*Text*]

Mr. Macdougall: I have no instructions to give any answer to your other question, sir. I can not answer that one.

Mr. McGrath: I put it to Mr. Vaughan.

Mr. Vaughan: Well, Mr. McGrath, I will have to really state the same answer as I did this morning. I told you what the order says, and I think I would like our position to remain there.

The Chairman: Do you have another question, Mr. McGrath?

Mr. McGrath: No, I have not got another question, because I cannot accept that answer. I mean, it is a straight forward question and...

Mr. Vaughan: I have given you a straightforward reply, and I am saying no, I will not and cannot give any such undertaking.

Mr. McGrath: May I ask why you cannot answer that question, Mr. Vaughan?

The Chairman: Mr. McGrath, I think we are coming back to the same point we were at this morning. Everything has been going fine, and then you come back exactly with the same point as this morning.

• 1555

Mr. McGrath: Well, how can we make a recommendation to the House if we cannot get the evidence?

The Chairman: They are not allowed to give that kind of information. They are not here for that purpose.

Mr. McGrath: What are they here for, Mr. Chairman?

The Chairman: Order, please.

Mr. Rock: I asked for the floor, Mr. Chairman. I think Mr. Vaughan answered you. He said he cannot give you that undertaking. That is the answer. We have made a recommendation to the House. Now whether Parliament and the cabinet are going to agree to that recommendation or not, that is another item.

An hon. Member: It is a recommendation.

Mr. Rock: A recommendation, yes, until we bring in our final report. I do not see what the argument is here at all, Mr. Chairman.

[*Interpretation*]

M. Macdougall: Je ne saurais vous répondre. Je n'ai aucune instruction à ce sujet.

M. McGrath: Alors je poserais la question à M. Vaughan.

M. Vaughan: Je devrai vous donner la même réponse que je vous ai donnée ce matin. Je vous ai cité l'ordonnance, et je crois que notre attitude demeurera la même.

Le président: Une autre question M. McGrath?

M. McGrath: Non, je n'ai pas d'autres questions; car je ne puis accepter cette réponse! Je veux dire c'est une question précise et...

M. Vaughan: Je vous ai donné une réponse précise, et j'ai dit que je ne puis pas m'engager, et je ne le peux pas!

M. McGrath: Est-ce que je pourrais demander pourquoi vous ne pouvez pas répondre à cette question, M. Vaughan!

Le président: M. McGrath, nous en revenons au même point où nous étions ce matin. Tout marchait très bien, et vous en revenez exactement au même point que ce matin.

M. McGrath: Mais, comment pouvons-nous formuler une recommandation à la Chambre, si nous sommes incapables d'obtenir des preuves?

Le président: Les témoins ne peuvent pas donner ces renseignements. Ils ne sont pas ici pour cela.

M. McGrath: Et alors dans quel but sont-ils ici?

Le président: A l'ordre, s'il vous plaît!

M. Rock: J'ai demandé la parole, M. le président. Je crois que M. Vaughan vous a déjà répondu; il a dit qu'il ne pouvait pas s'engager dans ce sens, voilà la réponse. Nous avons formulé une recommandation à la Chambre. Maintenant que le Parlement et le Cabinet soient d'accord, voilà une autre question.

Une voix: C'est une recommandation.

M. Rock: Oui, jusqu'à ce que nous fassions notre rapport définitif, je ne vois pas du tout le problème monsieur le président.

[*Texte*]

Mr. Lundrigan: May I ask a supplementary question?

The Chairman: Mr. Lundrigan.

Mr. Lundrigan: Can Mr. Macdougall or Mr. Vaughan comment on the normalcy or the abnormality of the weather in Newfoundland this year as it pertains to the bus service, and perhaps even comment as well on the number of accidents that the buses have had, if any, and with what results?

Mr. Macdougall: Generally speaking, I would say that from the point of view of the bus operations, they have had a very good trial this winter. They have had some very open weather; they have had some very difficult weather. Our technical people tell me there have been little problems. When you start up a new service of any kind you are bound to run into a few problems. But basically our people are very satisfied that it has performed very well.

The buses are good buses. They are the best we could provide and the best we could obtain. And within the bounds of the normal things that happen with your automobile, the bus, any mechanical piece of equipment, it has operated very well.

I followed this very closely with our own people over there. I am in touch with them by telephone regularly, and my general information is that there has been relative satisfaction with the buses. There have been a few minor accidents. After all, we had no drivers available for these buses. We were most insistent—I was, in any event—that we offer these jobs as bus drivers to men from Newfoundland. We endeavoured to get them from our own railway service where we could get them, but everyone of them had to be trained right from the very beginning. And I think that those men, most of them Newfoundlanders, have done a first-class job, sometimes under very difficult weather conditions.

Mr. Lundrigan: What were the weather conditions like generally? Were they abnormally good or bad?

Mr. Macdougall: You know them as well as I do, sir. They are normal weather conditions from my information. Some periods of time were very, very bad; some periods of time were very, very good. I am not enough of an expert on Newfoundland weather...

Mr. McGrath: Well you seem to be, Mr. Macdougall. You are presenting yourself as...

The Chairman: Mr. McGrath, just a minute.

[*Interprétation*]

M. Lundrigan: Est-ce que je pourrais poser une question supplémentaire?

Le président: M. Lundrigan.

M. Lundrigan: Est-ce que M. Macdougall ou M. Vaughan pourrait parler de l'aspect normal ou anormal des conditions climatiques cette année en ce qui concerne les services d'autobus, et parler aussi du nombre d'accidents que les autobus ont eus et leurs résultats?

M. Macdougall: En général, je dirais que du point de vue de l'exploitation des autobus, l'essai a été excellent cet hiver. On a eu de bonnes conditions et de très mauvaises. Le service technique m'a fait savoir qu'il y a très peu de problèmes. Quand on inaugure un nouveau service, il y a nécessairement des problèmes. Mais apparemment, les gens sont satisfaits que le service d'autobus ait été si bon.

Ce sont de bons autobus, les meilleurs que nous ayons pu obtenir. Et dans les limites des choses normales qui se produisent, quand il s'agit du matériel mécanique, tout cela a très bien marché.

J'ai suivi de très près avec nos gens là-bas. Je suis régulièrement en liaison téléphonique avec eux et mes renseignements indiquent que les gens ont été assez satisfaits des autobus. Il y a de petits accidents. Il n'y avait pas de chauffeurs d'autobus pour les conduire. On a insisté, moi-même dans ce cas, pour que ces postes de chauffeur d'autobus soient offerts à des gens qui étaient sur place; nous avons tenté de les prendre parmi nos cheminots, lorsque c'était possible, mais chacun a dû être formé en partant de la base. La plupart de ces gens, tous de Terre-Neuve, ont fait un excellent travail, et parfois dans des conditions climatiques très difficiles.

M. Lundrigan: Quelles étaient les conditions climatiques en général; normales, bonnes, mauvaises?

M. Macdougall: Vous les connaissez aussi bien que moi, monsieur. Ce sont des conditions normales. D'après ce que j'ai pu comprendre, parfois elles étaient affreuses, et parfois bonnes. Je ne connais pas suffisamment le climat de Terre-Neuve.

M. McGrath: Vous semblez l'être, M. Macdougall. Vous vous présentez comme...

Le président: Monsieur McGrath, un instant, s'il vous plaît!

[*Text*]

Mr. McGrath: Mr. Macdougall has just set himself up as an expert on weather conditions in Newfoundland.

The Chairman: No, no.

Mr. McGrath: Why does he not explain? What does he have to back it up with? I am trying to be rational.

The Chairman: Order, please.

Mr. McGrath: Let him back that up with statistical facts, Mr. Chairman.

The Chairman: Order please. Mr. Noel.

Mr. Noel: A supplementary question. In line with what has been discussed here by the members on the opposite side, can I ask the CNR people if there is in this country, outside of Newfoundland, a place where they run a train on love?

Mr. McGrath: If you have any more questions like that, I doubt...

The Chairman: Order. I would say he is not in order.

Mr. Trudel: Mr. Chairman, is this gentleman a member of the Committee?

The Chairman: Mr. Trudel? Yes, he is a member of the Committee.

Mr. Trudel: With that kind of a question?

The Chairman: Gentlemen, order please. Mr. Trudel has a supplementary.

Mr. Rock: Mr. Chairman, on a point of order. Could you tell me who is the questioner now? There have been so many supplementary questions that I do not know whose turn it was to ask the questions, and that person has never come back to ask...

The Chairman: Mr. Trudel is, for the moment.

Mr. Trudel: This is a supplementary question to Mr. Lundrigan's line of questioning, and I would like to direct this to Mr. Vaughan. There seems to be a lot of importance attached to weather conditions in Newfoundland Mr. Vaughan, in your position you must be aware of the weather conditions throughout the country, not only in Newfoundland. I would like to ask you this question. What is the most difficult area in Canada in which you have to operate trains with regard to the depth of the snowfall experienced?

[*Interpretation*]

M. McGrath: M. Macdougall vient de s'ériger en expert sur la climatologie de Terre-Neuve.

Le président: Non, non.

M. McGrath: Pourquoi n'explique-t-il pas? Sur quoi s'appuie-t-il? J'essaie d'être rationnel.

Le président: A l'ordre! S'il vous plaît!

M. McGrath: Laissez-le essayer de prouver par des statistiques ce qu'il avance, monsieur le président.

Le président: A l'ordre! S'il vous plaît! Monsieur Noël.

M. Noël: Une question supplémentaire. A la suite de ce qui a été discuté ici par les membres de l'opposition, est-ce que je pourrais demander aux employés du CN, s'il y a dans ce pays, à part Terre-Neuve, un endroit où on a un service exploité pour le plaisir?

M. McGrath: Si vous avez d'autres questions comme cela, je doute...

Le président: A l'ordre. Je devrais dire qu'il n'est pas à l'ordre.

M. Trudel: Monsieur le président, est-ce que ce monsieur appartient à ce Comité?

Le président: M. Trudel? Oui il est membre du Comité.

M. Trudel: Avec ce genre de question?

Le président: Messieurs, à l'ordre. M. Trudel a une question supplémentaire.

M. Rock: Monsieur le président, j'en appelle au Règlement. Pourriez-vous me dire qui questionne à l'heure actuelle. Il y a tellement de questions supplémentaires que j'ignore à qui est la parole.

Le président: A M. Trudel pour le moment!

M. Trudel: C'est une question supplémentaire posée à la suite de celles de M. Lundrigan; je voudrais la poser à M. Vaughan. Il semble qu'on attache beaucoup d'importance aux conditions climatiques à Terre-Neuve. M. Vaughan, dans votre situation vous devez être au courant des conditions climatiques partout au pays non seulement à Terre-Neuve. Alors je voudrais vous poser cette question-ci: quelle est la région la plus difficile pour l'exploitation des trains au Canada en ce qui concerne la quantité des neiges dans notre pays?

[*Texte*]

Mr. Vaughan: Well, without posing as an expert on that, and I am not, this winter Western Canada was the most difficult part of the country in which to operate.

Mr. Trudel: Was it a really severe winter?

• 1600

Mr. Vaughan: Yes. Severe cold that persisted through December and January, and that I would say was the most difficult time we had in operations this year.

Mr. Trudel: Would this be a condition that you find prevalent mostly year after year out West? What I am trying to establish here, Mr. Vaughan, is that I have been in Newfoundland, not as often possibly as I would have liked, but I come from an area where snowfall is a big problem and a big factor, but it has not been a deterrent to the rail service or the bus service.

I feel that we have areas other than Newfoundland, and I am not trying to plead a case here; I am just trying to establish a point of fact. This is not the main consideration when you are operating either bus or rail. What I am trying to obtain from you—and you do not have to answer the question if you do not wish—is that there are other areas that have a far heavier snowfall than the area that we are discussing at the present time?

Mr. Vaughan: Certainly.

The Chairman: Mr. Lundrigan?

Mr. Lundrigan: Mr. Chairman, I have a further supplementary. My question relates to a statement that was made by Mr. Macdougall about, first, the general loss of revenue of the passenger rail service in Canada, and, second, about the CN having been making a good deal of effort to attract passengers and thereby to cut its losses, if you want.

I am asking my question of an expert who knows the situation because it is right on target with his operations.

Could you tell us, generally, what efforts have been made to upgrade the roadbed of the Newfoundland system and also to upgrade the service generally in terms of the dining cars and the cleanliness and the over-all service provided? What effort has been made relative to other areas of Canada, and with what results? Why has it not attracted passengers, if it has not?

Mr. Macdougall: The efforts that we have made to attract passenger business throughout Canada have been a system...

[*Interprétation*]

M. Vaughan: Sans vouloir m'ériger en expert à ce sujet, je dirais que l'ouest du Canada, cet hiver, a été la région la plus difficile pour l'exploitation des trains.

M. Trudel: Ce fut un hiver très rigoureux?

M. Vaughan: Oui. Il y a eu un hiver vraiment sévère en décembre, en janvier et je dirais que ce fut la période la plus difficile pour l'exploitation des trains cette année.

M. Trudel: Est-ce que c'est une condition que vous trouvez, année après année, disons dans l'ouest? Ce que j'essaie de voir là, M. Vaughan, c'est que je me suis rendu à Terre-Neuve, peut-être pas aussi souvent que j'aurai voulu, mais je viens d'une région où ce facteur est très important, mais ce n'est pas un handicap pour le service ferroviaire ou par autobus.

Nous avons d'autres régions que Terre-Neuve et je n'essaie pas de plaider une cause ici, mais simplement d'établir des faits. Ce n'est pas la principale considération lorsque vous exploitez un service ferroviaire ou d'autobus. Ce que j'essaie d'obtenir, vous n'avez pas à répondre à cette question si vous ne désirez pas le faire, c'est qu'il y a d'autres endroits où il y a des chutes de neige plus importantes que dans la région qui nous intéresse actuellement.

M. Vaughan: Oui.

Le président: Monsieur Lundrigan.

M. Lundrigan: Une question complémentaire, monsieur le président. Cette question a trait à une déclaration faire par monsieur Macdougall, tout d'abord, au sujet des pertes générales de revenu du service voyageurs par chemins de fer au Canada, et deuxièmement, au sujet du CN qui a vraiment essayé d'attirer des passagers et, par le fait même, de réduire ses pertes.

Je vais poser la question à un spécialiste qui connaît la situation, parce que son travail y est rattaché. Pourriez-vous nous dire en général, quels efforts furent déployés pour améliorer leur service de rails à Terre-Neuve et aussi le service relativement aux wagons-restaurant, la propreté et l'ensemble des services offerts, et par rapport au reste du Canada, et avec quels résultats? Si cela a échoué, quelle en est la raison?

M. Macdougall: Les efforts que nous avons faits pour attirer les affaires à travers le Canada a été un système...

[*Text*]

Mr. Lundrigan: I am from Newfoundland.

Mr. Macdougall: I know you are. We have had a system approach to this all across the country, including Newfoundland.

Probably if you were to examine in detail things that have been done—and I do not know what detail you might be interested in—you would probably find more done in one place than in another. In other words, the attempt was to try to test the market to see whether people would come back to train travel. The red, white and blue fares were a particular example of that. It was felt that no matter how nice you make things, or what changes you may make, people really are interested in the money they pay.

We wanted to see if we could attract people to the service through fare action, and we established a new type of fare system to try to do this. Mainly, those fares were considerably lower than they were previously, because we wanted, first of all, to find out whether people were prepared to pay anything for this service. That was started in the Maritimes and was applied in Newfoundland before it was applied anywhere else in Canada. We started it down there to see what we could do with that change.

We also endeavoured to eliminate the situation of the person having to buy transportation and buy food, and we put it all together in one package so that a man could get his ticket reservation and his food. We started that, too, in the Maritimes and in Newfoundland, and it has been applied right across our whole system.

Relative to the detail of what we have done with dining cars and equipment and so on, I did look at the Newfoundland equipment register that we have there. We have looked at this in relation to this whole question of service there. You speak of dining cars. We have seven dining cars in Newfoundland; five of which were in service in Newfoundland when we took over there in 1949, a new one was converted in 1953, and we built another one in 1958. Fifteen of the coaches have been rebuilt or refurbished since 1949, and seven of the remaining, of the total of 22 we have there, were built in 1943, before Canadian National look over.

We put in new steam generator units to improve the heating, and so on, of the equipment, and five new ones were built in 1956 and put into service in Newfoundland.

The sleeping cars are mostly those that

• 1605

were built by the U.S. army and taken over and operated in service, although we have seven that were built after 1952.

[*Interpretation*]

M. Lundrigan: Je viens de Terre-Neuve.

M. Macdougall: Je le sais. Nous l'avons essayé à travers tout le pays, même à Terre-Neuve. Si vous étudiez en détail ce qui a été réalisé, et je ne connais pas tous les détails qui peuvent vous intéresser, vous trouverez peut-être qu'en un endroit on a fait plus qu'en un autre. Nous essayons donc d'étudier le marché pour voir si les gens reviendraient au voyage en train. Les billets bleu, blanc, rouge constituent un exemple de cet effort. Nous nous sommes aperçus que peu importe la beauté que vous donnez aux choses ou les changements que vous apportez, les gens s'intéressent surtout à l'argent qu'ils dépensent.

Nous avons voulu savoir si nous pourrons attirer le public en modifiant le tarif. Nous avons alors instauré un nouveau type de tarif. Les tarifs étaient beaucoup moins élevés dans bien des cas qu'ils ne l'étaient auparavant, parce que, tout d'abord, nous voulions voir si les gens étaient prêts à payer pour ce service. Il a été inauguré dans les Maritimes et a été mis en vigueur à Terre-Neuve avant tout le reste du pays. Nous avons commencé le service dans cet endroit pour voir ce qu'il en résulterait.

Nous avons aussi essayé de faire disparaître la question des personnes qui doivent payer pour le transport et la nourriture. Nous avons tout mis dans un même billet, de sorte qu'un homme peut acheter un billet où les repas sont compris. Ce système a aussi été inauguré dans les Maritimes et à Terre-Neuve et il a été appliqué sur tout notre réseau ferroviaire. Pour ce qui est du travail qui a été fait pour les wagons-restaurant, l'équipement et ainsi de suite, j'ai examiné notre équipement à Terre-Neuve. Nous avons examiné ces questions en rapport avec toute la question des services en cet endroit. Vous parlez des wagons-restaurants. Nous en avons 7 à Terre-Neuve, dont 5 étaient en service lorsque nous nous sommes installés là-bas en 1949, un nouveau a été converti en 1953 et nous en avons construit un autre en 1958. 15 wagons ont été réaménagés ou remis à neuf depuis 1949 et 7 voitures sur 22 ont été aménagées en 1943 avant que le CN s'implante sur place.

Nous avons aménagé des systèmes de chauffage à la vapeur, cinq nouveaux ont été construits en 1956 et mis en service à Terre-Neuve. Les wagons-lits étaient pour la plupart aménagés par l'armée américaine et mis en service même si sept d'entre eux furent construits après 1952.

[*Texte*]

Therefore, we have tried at least to hold the quality of the service there relative to the equipment from the point of view of safety and general comfort.

Mr. Lundrigan: Did you say, "Hold the quality?

Mr. Macdougall: Yes, hold the quality; I do not know how much it has actually been improved, but we have endeavoured to put some money into the Newfoundland operations of the passenger service.

Mr. Lundrigan: Mr. Chairman, I think what I am going to say should be on the record. I think all members, regardless of where they sit in the house, would like to hear what I have to say on this and then perhaps I could get a reaction. I am going to make a charge which has been levelled by quite a number of people involved with the CN in Canada, not only in Newfoundland.

I have had the distinct privilege, I suppose, of travelling from St. John's, Newfoundland, right across the whole continent with the CN. I am not going to say what my experiences were relative to other parts of Canada because I think that would colour the issue a little, but a charge has been made and I think if one were to investigate the Newfoundland railway system this would perhaps be substantiated: that the Canadian National has a policy in Canada—not only in Terreneuve—of deliberately downgrading services when they want to justify the abandonment of these services.

I have interviewed CN personnel on the trains; I have interviwed people who have been there for 20 years, people who have made their livelihood from it; and they have indicated—and I can speak from personal experience, but I will not give you my own background—that the service has been deliberately downgraded; that the roadbed is all but gone; that unless the system is upgraded immediately it is just as well not to retain it anyway because you will not be able to run on the road service; and that the meals and the cleanliness of the whole system have been deliberately downgraded in an effort to have people not use the service.

In spite of this, the service has continued to retain a fair level of support from the public.

I do not expect a positive answer, but I would like to have the reaction to this accusation that the CN does have a policy of deliberately downgrading services to justify their termination. I will give you evidence, if you wish me to bring it before the Committee,

[*Interprétation*]

Nous avons donc essayé, au moins, de maintenir la qualité des services et de l'équipement sur le plan de la sécurité et du confort en général.

M. Lundrigan: Vous avez dit: «Pour maintenir la qualité».

M. Macdougall: Oui, pour maintenir la qualité. Je ne sais pas dans quelle proportion il y a eu amélioration, mais nous avons essayé d'investir de l'argent dans le service-voyageurs de Terre-Neuve.

M. Lundrigan: Monsieur le président, je pense que cela devrait être inscrit au compte rendu. Je pense que tous les membres, quelles que soient leurs allégeances politiques, aimeraient entendre ce que j'ai à dire là-dessus, et peut-être pourrais-je alors voir quelle serait la réaction. Et, je vais faire une accusation qui fut énoncée par bon nombre de personnes qui empruntent les services du CN au Canada et non pas seulement à Terre-Neuve.

J'ai eu le privilège de voyager de Saint-Jean (Terre-Neuve) et de traverser tout le continent avec le CN. Je ne veux pas dire quelles furent mes expériences par rapport aux autres régions du Canada, parce que je pense que cela serait un peu trop imagé. Mais on a porté une accusation et je crois que si on faisait enquête sur le système ferroviaire de Terre-Neuve, on pourrait établir que le CN a une politique au Canada, et non pas simplement à Terre-Neuve visant à rabaisser délibérément les services lorsqu'ils veulent vraiment justifier l'abandon d'un tel service.

J'ai interrogé des membres du personnel à bord des trains du CN; j'ai interviewé des gens qui étaient là depuis vingt ans et qui y ont gagné leur vie. Ils ont indiqué et là, je peux vous parler à partir d'une expérience personnelle, mais je ne vous donnerai pas mon propre curriculum vitae, ils ont dit que ce service a été rabaissé de façon délibérée; que les lits étaient à peu près finis; à moins qu'on améliore le service immédiatement ce serait inutile de le maintenir parce que vous ne pourrez plus maintenir un tel service, et que les repas et la propreté de tout ont été négligés en vue de décourager les gens à avoir recours à ce service. Malgré tout, le service a été maintenu et a reçu tout de même un certain appui du public. Mais je ne m'attends pas à ce qu'on y réponde mais je voudrais voir la réaction à cette accusation, à savoir que le CN néglige délibérement son service afin de faciliter l'abandon de ces lignes. Je vous en donnerai des preuves si vous voulez que je le fasse devant le Comité,

[*Text*]

Mr. Chairman, that this is a fact in Newfoundland.

Mr. Macdougall: I can tell you very definitely that there is no such policy in Canadian National.

Mr. McGrath: We certainly would expect that from...

Mr. Macdougall: You would expeect me to be honest; and it is being honest.

Mr. McGrath: Well...

The Chairman: Order, please. Mr. Lundrigan?

Mr. Rock: On a point of order. We have been having supplementaries all the way through. I ask you again: Who was the original questioner?

The Chairman: I said a moment ago that I would allow no supplementaries for a while. Mr. Lundrigan is going to finish and then you will have the floor, Mr. Rock.

Mr. Lundrigan: Mr. Chairman, in view of what I have said and the fact that I am prepared to give evidence of what I am talking about, perhaps the gentleman in question would like to react a little more fully, because it is a serious accusation.

M. Macdougall: I think it is a very serious accusation. I do not think there is any foundation to it. And I tell you that there is no such policy in Canadian National. I do not see any point in my discussing it with you because there is no foundation to it at all.

Mr. Lundrigan: Mr. Chairman, may I give a little bit of information to the Committee in order to...

The Chairman: If it is about Newfoundland, all right; if it is not, you are out of order.

Mr. Perrault: Is it hearsay evidence, Mr. Chairman, or does he have papers and proof?

Mr. Lundrigan: No, I do not have papers to prove it, but I can quote from interviews I have had with CN personnel about the cleanliness of the carrying service, about the fact that they have been instructed not to do any cleaning for weeks and months and that in the dining cars the linen service has deteriorated to the point now that even...

[*Interpretation*]

monsieur le président, et c'est un fait à Terre-Neuve.

M. Macdougall: Il n'y a pas de politique de ce genre du CN.

M. McGrath: Nous nous attendrions à ce que...

M. Macdougall: Vous vous attendriez à ce que je sois honnête, et c'est être honnête.

M. McGrath: Eh bien!

Le président: A l'ordre, s'il vous plaît. Monsieur Lundrigan?

M. Rock: Un appel au règlement. Nous avons eu des questions complémentaires tout le temps. Je vous demande encore une fois qui avait la parole?

Le président: J'ai dit il y a un instant que je n'autoriserais plus de questions complémentaires. Monsieur Lundrigan va terminer et ensuite, vous aurez la parole, monsieur Rock.

M. Lundrigan: Monsieur le président, vu ce que j'ai déclaré, et vu le fait que je suis prêt à vous fournir des preuves de ce dont je vous ai parlé, le témoin aimerait peut-être réagir un peu plus parce que c'est tout de même une accusation assez grave.

M. Macdougall: Oui, mais elle n'est pas fondée à mon avis. Le CN ne suit pas une telle politique. Je ne vois donc pas pourquoi j'en parlerais parce que ce n'est pas fondé.

M. Lundrigan: Monsieur le président, est-ce que je peux donner plus de renseignements au Comité?

Le président: Si cela concerne Terre-Neuve, d'accord. Mais sinon, vous êtes hors d'ordre.

M. Perrault: Est-ce que ce sont de simples ouï-dire, monsieur le président, ou a-t-il des documents et des preuves à l'appui?

M. Lundrigan: Non, je n'ai pas des documents mais je peux vous citer des entrevues que j'ai eues avec des membres du personnel du CN au sujet de la propreté du service, au sujet du fait qu'ils aient reçu des directives demandant de ne pas faire de nettoyage ou de ménage pendant des semaines ou des mois mais que dans les wagons-restaurants, le service de linge de table s'est détérioré au point que même...

[*Texte*]

The Chairman: You could make your report to them.

Mr. Perrault: Mr. Chairman, this sounds remarkably like hearsay evidence. Do we have these alleged statements on the service in affidavit form?

Mr. McGrath: If he is making a statement as a member you must accept it, but...

Mr. Perrault: No, he said...
...I simply do not think there is any value in a member merely saying, "I have heard from 'X' that this situation exists."

The Chairman: You could put those matters before the Committee, but I doubt that it is relative to put them to these people here. You have asked a question of them and they have answered you, that no such order was given; and I think this is the truth.

Mr. Lundrigan: Mr. Chairman, may I suggest, then, that the Committee perhaps at some future and early date summon some of the people who have been connected with the railway service in order to determine the relative quality of the service offered now as compared with five or ten years ago, and the quality of the roadbed, and so on? Perhaps

• 1610

this might be in order, if the hon. member will not take my word for it.

The Chairman: Mr. Rock, you now have the floor.

Mr. Rose: Mr. Chairman, on a point of order, before you leave this subject.

Mr. Macdougall, I think you said there was no policy on downgrading, but that does not mean, sir, that you have no policy relative to the elimination of unproductive passenger runs. This is how the downgrading is done and I think this is what Mr. Lundrigan is saying. I will draw your attention, sir, to point 10 of your brief which indicates that you do have a policy towards the elimination of pasenger runs that you feel redundant.

Mr. Macdougall: Right, but we do not have any policy which is designed to take a good or a satisfactory service today and downgrade it into a category that we can get rid of.

[*Interprétation*]

Le président: Vous pourriez leur faire rapport de ces faits.

M. Perrault: Monsieur le président, cela semble vraiment des ouï-dire. Est-ce que ces déclarations à l'égard du service existent dans les formules d'affidavit?

M. McGrath: S'il fait une déclaration en tant que député, vous devez l'accepter, mais...

M. Perrault: Non, il a dit...Je ne crois pas que l'on doive attacher une quelconque valeur aux propos d'un député qui dit avoir entendu une certaine personne dire ceci ou cela.

Le président: Vous pourriez porter ces questions à l'attention du Comité mais je doute que cela intéresse les personnes ici présentes. Vous leur avez posé une question et ils vous ont répondu que de telles directives n'avaient jamais été données et je crois que c'est la vérité.

M. Lundrigan: Puis-je proposer que le Comité réunisse à l'avenir et sous peu des gens qui ont déjà été en rapport avec le service ferroviaire, de façon à comparer la qualité du service offert maintenant, à celui d'il y a cinq ans ou dix ans quant à la qualité des lits et de l'équipement, etc. Ce serait peut-être acceptable si l'honorable député ne voulait pas me croire.

Le président: Monsieur Rock, vous avez la parole.

M. Rose: Monsieur le président, en appel au règlement, avant que vous laissiez cette question. Monsieur Macdougall, je crois que vous avez dit qu'aucune politique de ce genre n'existait. Mais cela ne signifie pas que vous n'avez pas de ligne de conduite relative à l'élimination d'un service voyageur non productif parce que c'est là vraiment la façon dont la politique est appliquée. Je pense que c'est ce dont M. Lundrigan voulait parler. Je vous signalerai le point 10 de votre mémoire qui indique que vous avez vraiment une politique qui tend à faire disparaître les services passagers qui, à votre avis, font double emploi.

M. Macdougall: C'est vrai, mais nous n'avons pas de politique conçue pour prendre un service aujourd'hui, un service satisfaisant et en faire une catégorie que l'on puisse abandonner.

[*Text*]

Mr. Rose: If I could pursue this for one sentence more, it sounds a little bit to me as if you are ignoring certain social objectives that the railway was there for in the first place and it is a stark parallel to some insurance companies that want only the good risks.

The Chairman: Mr. Rock, you have the floor now.

Mr. Lundrigan: Mr. Chairman, on a point of order. I have asked a question and the question was along the lines of downgrading and I think the least that our witnesses can do is provide us with evidence. If they cannot provide it now, I will understand, because they are not able to recall all this, as to what moneys have been used to operate this service per mile relative to other passenger services in Canada, that is, the road bed, and what moneys have been usde to sustain the service which is there relative to personnel employed and the kind of persons who have been used to upgrade it and so on. There is a good bit of evidence there that we need. I have made a chart charge, if you want to call it that, and I think that our witnesses have the responsibility to make this knowledge available to us. Perhaps I am totally wrong.

Mr. Vaughan: Mr. Chairman, the responsibility that we have is what you referred to this morning: it is to Parliament and the statutes that Parliament has passed, and we are abiding by those statutes and following prescribed methods and procedures outlined therein, and this is what we have done.

Mr. Lundrigan: I am not arguing with you. I am asking for the information and you canot give it right now.

Mr. Vaughan: No, we cannot, and with all due deference, I think you are really arguing the case again. This is the impression I get from it.

Mr. Lundrigan: Mr. Chairman, this is getting to be a waste of time. I am not arguing. Mr. Chairman, my point of order is that if we cannot get the information I asked for, then the witnesses should be...

The Chairman: Order please, order. I do not see any point of order, it is just a point of argument that is all. Mr. Rock, you have the floor.

Mr. Rock: Mr. Chairman, I hope that in future members will note down questions, and when it comes to their turn...

[*Interpretation*]

M. Rose: Si on veut bien me permettre de poursuivre, il me semble que vous ne tenez pas compte de certains objectifs d'ordre social qui ont été au début la raison d'être du chemin de fer; vous agissez exactement comme certaines compagnies d'assurance qui ne prennent que des risques sûrs.

Le président: Monsieur Rock, vous avez la parole.

M. Lundrigan: Monsieur le président, j'invoque le Règlement. J'ai posé une question, au sujet de l'abandon du service, et je crois que les témoins pourraient au moins nous fournir des preuves. Je comprends qu'ils ne peuvent le faire maintenant, sans se rappeler quels argents ont été utilisés pour maintenir les services au mille comparativement aux autres services voyageurs au Canada, pour ce qui est du terre-plein, et quels sommes ont été utilisées pour maintenir le service pour ce qui est du personnel employé et du genre de personnes utilisées pour améliorer ces services. Nous avons besoin de ces preuves et témoignages. J'ai porté une accusation, si vous voulez l'appeler ainsi, et nos témoins se doivent de mettre ces données à notre disposition. Peut-être ai-je complètement tort.

M. Vaughan: Monsieur le président, la responsabilité que nous avons est celle dont vous avez parlé ce matin. Nous sommes responsables envers le Parlement et les lois adoptées par le Parlement; nous devons respecter ces lois, nous en tenir aux méthodes et aux procédures qui y sont prescrites. C'est ce que nous avons fait.

M. Lundrigan: Je n'argumente pas avec vous. Je vous demande des renseignements, mais vous ne pouvez me les donner maintenant.

M. Vaughan: Non, nous le pouvons pas, et vous argumentez toujours à ce sujet; c'est du moins l'impression que j'ai.

M. Lundrigan: Monsieur le président, c'est un gaspillage de temps. Je n'argumente pas. Monsieur le président, mon rappel au Règlement est celui-ci: si nous ne pouvons obtenir les renseignements que j'ai demandés, les témoins devraient...

Le président: A l'ordre, je ne vois pas du tout votre rappel au Règlement. Ce'st un simple argument que vous présentez. Monsieur Rock, vous avez la parole.

M. Rock: Monsieur le président, j'espère qu'à l'avenir les honorables membres noteront des questions et quand ça sera leur tour...

[*Texte*]

The Chairman: Put your question, Mr. Rock.

Mr. Rock: I have a number of them here. Mr. Vaughan, does CNR own any ships other than ferries?

Mr. Vaughan: What do you mean, other than ferries?

Mr. Rock: Directly or indirectly. I think you operate some ferries.

Mr. Vaughan: We operate the Cabot Strait ferries, and...

Mr. Rock: Yes, I see. By "other than ferries" I mean either directly or indirectly does the CNR own, say, shares in other shipping firms?

Mr. Vaughan: No, not in shipping firms. We have the Prince George on the west coast, and another one at Windsor-Detroit which just carries railway cars; but that is a ferry too. No, we have no other ships.

Mr. Rock: The Minister of Communications of the Province of Newfoundland, when he was questioned in Newfoundland, stated that the government is studying the possibility of a tunnel between Labrador and Newfoundland. Have you any intention of having your officials, let us say, study with them this possibility of a tunnel under that Strait, with the idea of continuing a train service or something like that?

Mr. Vaughan: If we are asked to participate in such a study we will cooperate, as we do with all these authorities in their examination of such things as this. Yes, we would.

Mr. Rock: In connection with the causeway to Prince Edward Island, I understand that there was a study with CNR also to have a track on that causeway. During that study was there any study also of the possibility of building a tunnel rather than a causeway at that time?

• 1615

Mr. Vaughan: Well, I am not sure, Mr. Rock.

Mr. Rock: Maybe Mr. Macdougall would know.

[*Interprétation*]

Le président: Posez vos questions, monsieur Rock.

M. Rock: J'en ai un certain nombre. Est-ce que le National-Canadien, monsieur Vaughan, est propriétaire de navires autres que des transbordeurs?

M. Vaughan: Qu'entendez-vous par «autres que des transbordeurs»?

M. Rock: Directement ou indictement? Je pense que vous avez un service de transbordeurs.

M. Vaughan: Nous avons des transbordeurs dans le détroit de Cabot et...

M. Rock: Je vois. Par «autres que des transbordeurs», je veux dire est-ce que le National-Canadien est propriétaire, directement ou indirectement, d'actions dans d'autres compagnies de navigation.

M. Vaughan: Non, pas dans des compagnies de navigation. Nous avons le Prince George sur le littoral du Pacifique et un autre transbordeur qui va de Windsor à Détroit simplement pour les wagons ferroviaires. Non, nous n'avons pas d'autres navires.

M. Rock: Le ministre des Communications de la province de Terre-Neuve, lorsqu'on l'a interrogé à Terre-Neuve, nous a dit que le gouvernement étudiait la possibilité d'avoir un tunnel entre le Labrador et Terre-Neuve. Est-ce que vous avez l'intention de voir vos hauts fonctionnaires, disons, étudier avec le gouvernement cette possibilité d'aménager un tunnel, soit pour un service de train ou quelque chose du genre?

M. Vaughan: Si on nous demande de participer à une telle étude, nous collaborerons comme nous le faisons toujours avec les autorités lorsqu'elles étudient de tels projets. Oui, nous le ferions.

M. Rock: Pour la chaussée de l'Île-du-Prince-Édouard, si je comprends bien, une étude a été faite aussi en collaboration avec le National-Canadien pour y aménager un rail. Au cours de cette étude, est-ce que l'on a étudié aussi la possibilité d'aménager un tunnel plutôt qu'une chaussée?

M. Vaughan: Je ne suis pas sûr, monsieur Rock.

M. Rock: M. Macdougall le saurait peut-être.

[*Text*]

Mr. Vaughan: Before Mr. Macdougall answers, there is a decision rendered on this situation is there not?

Mr. Rock: Yes. No, no it is just for information, Mr. Vaughan.

The Chairman: Why do you ask for this information when you know you are not allowed to?

Mr. Vaughan: These were government decisions and I really do not want to comment on a government decision.

Mr. Rock: Serious charges were made during the hearings that MFRA benefits have been received by CNR on shipments by trucks with railway bills of lading. I would like to know whether or not there is any truth to this?

Mr. Macdougall: I think I might make a comment on that. I have heard this same thing expressed principally by Day & Ross Ltd., a trucking operator in Atlantic Canada. The background of that might be interesting to you and it is this, that under the Maritime Freight Rates Act, as you know, this is paid only with respect to goods handled by rail today. There are proposals with which we agree that it should be paid no matter which method is used. But, in the past the railway operated off its main lines by using branch lines, what we call way freight services. A package from Montreal to Buctouche would go to Moncton and then on a local train out to Buctouche with a railway bill of lading billed at a railway station in Montreal.

As times changed, that line was discontinued. A truck service was put on to serve that community out there. This commodity would still be billed in Montreal with Canadian National to go to Buctouche. In many cases when we abandoned the lines, we were required by the Transport Commission to provide a substitute service, or we offered a substitute service by highway in order to get rid of the heavy deficit of operating a branch line. So we would have a package destined for Buctouche and it would go down to Moncton by train and then over to Buctouche by highway, either in one of our own trucks or by a contractor. So, we took the legal obligation to deliver it from Montreal to Buctouche, and it went on a rail bill of lading and the Maritime Freight Rates Act would apply. There are objections to this type of thing because part of the operation was by truck.

[*Interpretation*]

M. Vaughan: Avant que M. Macdougall ne vous réponde, la décision a été rendue là-dessus; n'est-ce pas?

M. Rock: Non, non. C'est simplement pour des renseignements, monsieur Vaughan.

Le président: Pourquoi demandez des renseignements quand vous savez que vous ne le pouvez pas?

M. Vaughan: Le gouvernement a pris une décision et je ne veux pas faire de commentaires sur une décision prise par le gouvernement.

M. Rock: On a porté des accusations assez graves pendant les audiences à l'effet que des subventions en vertu de Loi sur le transport des marchandises dans les Maritimes, ont été reçues par le National-Canadien pour des expéditions faites par camion avec connaissements ferroviaires. J'aimerais savoir si ces accusations sont fondées.

M. Macdougall: J'aimerais faire un commentaire là-dessus. J'ai entendu exactement la même observation, surtout de Day and Ross Ltd., compagnie de camionnage des provinces de l'Atlantique. Il serait intéressant pour vous de savoir tout ce qu'il en est. Comme vous le savez, en vertu de la *Loi sur le transport des marchandises dans les Maritimes*, ces subventions ne sont données que pour le transport des marchandises fait par rail. On a proposé, et nous sommes d'accord, qu'elles soient versées quel que soit le mode de transport. Par le passé, le chemin de fer utilisait, à partir de sa ligne principale, des lignes secondaires appelées services aux petites stations. Un paquet, de Montréal à Buctouche, allait à Moncton puis, par le train local, à Buctouche avec un connaissement de la station de Montréal.

Avec le temps, cette ligne a été abandonnée, nous y avons aménagé un service routier. Le connaissement est encore établi à Montréal pour une expédition du colis à Buctouche. La plupart du temps, lorsque nous avons abandonné des lignes, la Commission des Transports nous a obligés à fournir un service de remplacement ou nous avons donné un service substitut par route plutôt que d'avoir un déficit. Donc, un colis à destination de Buctouche se rend à Moncton par train et ensuite à Buctouche par route, soit par un de nos propres camions ou encore par camion d'un entrepreneur. Donc, nous avons assumé l'obligation légale de faire la livraison de Montréal à Buctouche, le connaissement est ferroviaire et la Loi sur le transport des marchandises dans les Maritimes s'applique. On s'objecte à cela parce qu'une partie des opérations se fait par camion. Là où nous avons une compagnie

[*Texte*]

Where we operate a trucking company like Eastern Transport Limited, which is solely a trucking company, and it handles a package billed in Truro and takes it to Moncton, they take it on an Eastern Transport Limited bill of lading and no subsidy is applicable.

Mr. Rock: Could you tell me, regarding the MFRA subsidies, the total amount received last year by the CNR? Maybe you also have the figures for the other railway?

Mr. Macdougall: Yes, we have these figures here somewhere if you will give us a minute to look for them. Yes, during 1967 the amount of subsidy paid to the Canadian National was $12,066,000.00. The total paid out under the MFRA in that year was $14,180,770.00. That is from the Department of Transport records.

Mr. Rock: Mr. Macdougall, I believe you stated, regarding MFRA, that there should be more selection as to where it should apply and also that benefits should be paid directly to shippers. Do you not feel that the administration then for MFRA would be very expensive in comparison to what it is now?

Mr. Macdougall: To pay it to the shippers, you mean?

Mr. Rock: Yes.

Mr. Macdougall: I do not know that it would be very expensive. I do not think that has been worked out in detail. I think it would be more expensive than it is now and perhaps that is the reason it is paid to the railway companies today. However, I think it would be worth the extra money. Certainly it should be looked at, and unless it is astronomical it will be worth the extra money to make the payments direct to the shippers and let them choose the method that they want.

This would do a lot of good: in the first place it would eliminate the wrong idea that this is a subsidy to the railway. We have always smarted a little bit under the suggestion that we were just getting a handout for

[*Interprétation*]

de camionnage, comme la Eastern Transport Limited qui s'occupe exclusivement de camionnage, si un colis avec un connaissement de Truro est transporté à Moncton, le connaissement est celui de la Eastern Transport Limited et aucune subvention n'est payée.

M. Rock: Pourriez-vous me dire, pour ce qui est des subventions payées au titre de la Loi sur le transport des marchandises dans les Maritimes, quelles furent les subventions totales obtenues l'année dernière par le National-Canadien? Peut-être avez-vous aussi les données pour l'autre chemin de fer.

M. Macdougall: Oui, nous avons ces données et si vous nous le permettez, nous allons les trouver. En 1967, les subventions payées au National-Canadien étaient de $12,066,000.00. Le total payé en vertu des dispositions de la Loi sur le transport des marchandises dans les Maritimes était de $14,180,770.00. Ces chiffres sont tirés des livres du ministère des Transports.

M. Rock: M. Macdougall, je pense que vous avez dit au sujet de la Loi sur le transport des marchandises dans les Maritimes, qu'on devrait avoir une meilleure sélection quant à son application et que les avantages devraient être payés directement aux expéditeurs. Ne croyez-vous pas que l'administration des dispositions de la Loi sur le transport des marchandises dans les Maritimes serait alors très coûteuse comparativement à ce qu'elle est maintenant?

M. Macdougall: Si on payait aux expéditeurs?

M. Rock: Oui.

M. Macdougall: Je ne crois pas que ce serait très coûteux et je ne crois pas qu'on l'a établi dans le détail. Ce serait selon moi, plus coûteux que ce l'est maintenant et c'est la raison pour laquelle on paie à la société ferroviaire actuellement. Mais cela en vaudrait la peine. On devrait étudier la possibilité et à moins que ce ne soit beaucoup plus coûteux, il en vaudrait les frais supplémentaires de faire les paiements directement à l'expéditeur et de le laisser choisir la méthode qu'il désire obtenir.

Cela serait excellent, je pense; tout d'abord, cela ferait disparaître cette idée fausse voulant qu'ils s'agisse là d'une subvention aux chemins de fer. Nous nous sommes toujours un peu offusqués à la suggestion qu'on nous

[*Text*]

• 1620

this. What we actually do is reduce our rates, charge a lower rate than we normally would and get the additional portion from the government in a payment. We are quite content to take our chances against the competition, let them choose the method that they want, charge our full rate and then the shippers can get back from some agency the additional assistance they consider they should have. That is our view.

Mr. Rock: What financial effect has the freeze on freight rates on the CNR in the Maritimes presently?

Mr. Macdougall: Obviously it has an adverse effect upon the Canadian National. We have made two advances in our rates since the passage of the National Transportation Act, one in 1967 and one in 1968, and neither of those—in the category of rates that are frozen—have been applied in the Maritime area. Consequently we have had to forgo the additional revenue that we would have received. I cannot tell you the exact figure but it is in the millions of dollars. I think it has had an unwanted, adverse effect on Atlantic Canada in that they have frozen all the rates on the commodities that come into the Atlantic area, many of which are competitive with goods produced in Atlantic Canada, and therefore they are subsidizing their competitors in Central Canada who are sending goods into Atlantic Canada, as against the production of similar goods in Atlantic Canada itself. I think that has an adverse effect on Atlantic Canada.

Mr. Rock: Referring to the "Bullet" in Newfoundland, I understand that most of the railway employees who are working on the passenger service will be transferred to the bus service or to other jobs within the railway company. Is this correct?

Mr. Macdougall: I do not know if I can give you just a flat yes or no answer to that. This is a matter which I am very intimately concerned with and I do not look at it in the sense of what we are going to do with these people just in a block. We have to try to fit these people into our railway family somewhere. Many of them have had a good number of years' service with us and some of them have had very little service. At the moment, until we know the exact details of how long the service is going to continue and various

[*Interpretation*]

faisait simplement la charité. Nous ne faisons que réduire nos taux, nous imposons un taux réduit, comparativement à ce que nous obtenons habituellement, et touchons la différence du gouvernement. Nous serions entièrement satisfaits de nous mesurer à la concurrence, de leur laisser choisir eux-mêmes la méthode qu'ils désirent, et d'exiger le plein tarif, quitte à laisser l'expéditeur obtenir d'un organisme quelconque l'aide additionnelle qui, selon lui, devrait lui être accordée. C'est là notre point de vue.

M. Rock: Quels sont actuellement les effets du gel du tarif des marchandises pour le National-Canadien dans les Maritimes?

M. Macdougall: Cela a évidemment des répercussions fâcheuses pour le National-Canadien. Nous avons augmenté deux fois nos taux depuis l'adoption de la Loi nationale sur les transports, une en 1967, une en 1968 et ni l'une ni l'autre, dans la catégorie de taux qui sont gelés, n'ont été appliqués dans les Maritimes. En conséquence, nous avons dû renoncer au revenu additionnel que nous aurions pu obtenir. Je ne peux vous dire au juste le chiffre mais c'est dans les millions de dollars. Je pense que cela a eu un effet contraire, non recherché, sur les provinces de l'Atlantique, dans ce sens qu'ils ont gelé tous les taux pour les denrées qui sont acheminées vers les provinces de l'Atlantique, dont bon nombre font concurrence aux denrées produites dans les provinces de l'Atlantique et ainsi, ils subventionnent leurs concurrents du Canada central qui envoient leurs produits dans le Canada de l'Atlantique, contre la production de ces mêmes denrées dans les provinces de l'Atlantique. Cela a, à mon avis, un effet néfaste sur le Canada de l'Atlantique.

M. Rock: A propos du *Bullet* de Terre-Neuve, je crois comprendre que la plupart des employés du chemin de fer qui travaillent au service-voyageurs, seront transférés au service d'autobus ou à d'autres postes au chemin de fer. Est-ce exact?

M. Macdougall: Je ne sais pas si je peux répondre tout simplement oui ou non à votre question. Il s'agit là d'une question qui me préoccupe de très près et je ne l'envisage pas sous le rapport de ce que nous ferons pour l'ensemble de ces gens. Il nous faut essayer de leur trouver une place au sein de notre grande famille ferroviaire. Bon nombre d'entre eux sont chez nous depuis de longues années et certains n'ont eu que très peu de service. Actuellement, jusqu'à ce que nous puissions savoir exactement combien de

[*Texte*]

other things, we are doing the best we can to work out a plan to look after as many of these employees as we can. If we were able to just chop off the train service and put on the bus service, then you would have a decrease of so many and an increase of so many and you could make it fit a lot better, but we have been required to operate the bus service and the train service together. We have had to take on additional employees to handle the bus service but we still have to maintain the train. We have moved some people from the train service into the bus service, and we have hired some new poeple both in the train and bus service to get the two going together, and when the train comes off naturally there are going to be problems because we just do not have have the jobs in the bus service and many of these jobs are already filled, some with our own people.

We have various provisions that help us with this. In our union agreements we have provision for such things as job security and assistance to employees who are affected by technological change. These are available to employees. We have the seniority districts under which these various employees work, some are larger and some are smaller than others, which will enable them to exercise seniority, so the people affected will be people with as low a number of years of service as possible. We are also searching in every way we can to provide work elsewhere—in or out of Newfoundland—for people who can go to other types of work.

One of the things which both management and the employees have to accept is that when you make changes some people have to change from the type of job they did before. A man may have to become a machinist in another plant, rather than working as a fireman in St. John's, Newfoundland. We are looking at all these factors.

In addition, we have had one experience already which has given us a good deal of comfort, and it should also comfort the employees, in connection with the handling of the changes that have been made in the last few years at Port aux Basques and North Sydney. We changed from the system that had been in use for many, many years of taking all our freight out of box cars in North Sydney, piling it on the dock, having it handled by stevedores into ships in the normal way that you would load a general cargo ship, offload it on the dock at Port aux Basques and then load it into freight cars and move it. We now have rail car ferries which

[*Interprétation*]

temps le service continuera et diverses autres choses, nous faisons tout ce que nous pouvons pour mettre au point un programme pour prendre soin du plus grand nombre possible de ces employés. Si nous pouvions simplement mettre fin au service ferroviaire et commencer le service d'autobus, il y aurait telle diminution et telle augmentation d'autre part et cela serait beaucoup plus facile, mais nous devons faire fonctionner le service des trains et le service d'autobus conjointement. Nous avons dû embaucher de nouveaux employés pour le service d'autobus, mais nous devons toujours maintenir le train. Nous avons transféré des gens du train à l'autobus, et nous avons engagé des nouveaux employés pour le train comme pour l'autobus pour assurer le fonctionnement des deux, et lorsque le train disparaîtra, il y aura des problèmes parce que nous n'avons pas les emplois dans le service d'autobus, et beaucoup ont déjà été remplis, certains par nos propres employés.

Il y a différentes dispositions qui nous aident. Dans nos conventions collectives, nous avons des dispositions prévoyant la sécurité de l'emploi et l'aide aux employés affectés par les modifications technologiques. Les employés peuvent s'en prévaloir. Nous avons des districts d'ancienneté, certains plus grands et certains moins importants que d'autres, ce qui permettra aux employés d'exercer leur ancienneté, si bien que les employés affectés seront ceux qui auront le moins d'années de service possible. Nous essayons aussi par tous les moyens de trouver du travail ailleurs, à Terre-Neuve ou à l'extérieur pour ceux qui peuvent occuper d'autres emplois.

Une des choses que l'administration et les employés doivent accepter est que lorsqu'on apporte des modifications, certaines personnes doivent changer de genre de travail. Un homme peut avoir à devenir machiniste, dans une autre usine, plutôt que d'être pompier à Saint-Jean de Terre-Neuve. Nous étudions tous ces facteurs.

En plus, nous avons déjà eu une expérience qui nous réconforte et elle devrait aussi rassurer les employés pour ce qui est des changements qui ont eu lieu au cours des dernières années, à Port-aux-Basques et à North Sydney. Nous avons abandonné le système qui avait été utilisé depuis de nombreuses années, celui de prendre toutes nos marchandises des fourgons, de les empiler sur le quai, de les faire charger par des débardeurs dans les navires comme on fait habituellement pour un cargo et ensuite, les décharger à Port-aur-Basques et les mettre à bord du train. Nous avons maintenant des transbordeurs pour les wagons qui transportent nos

[*Text*]

move our loaded cars across the strait to Port aux Basques, and we put the Newfoundland cars and the mainland cars side by side and just transfer the freight at a freight dock. So,

• 1625

we have really eliminated a major need for stevedoring at North Sydney and Port aux Basques.

We went into a very detailed educational program down there. Many of these men had a considerable number of years of service there. Many of them had very little education. Their ability and mobility to move into other work was limited. So, we not only set up a union-management consultative committee which dealt with the counselling of these men to endeavour to fit them into other types of work, but we actually ran schools and taught them trades and gave them high school education qualifications to enable them to take jobs in categories which required a Grade 11 leaving certificate or a Grade 10 education. I think that worked out fairly successfully.

There are always some things about it that I suppose are not as successful as you hope they will be, but I think this is a real first in management-labour relations in trying to deal with redundant employees, and it was a marked success. We are now thinking of the same type of thing here. If men require retraining, counselling and assistance in moving into other work, that type of thing is being set up and organized. We are approaching it from the point of view that we have a problem here in being able to get these men settled in some form of service and as few as possible being left without employment. It is a difficult problem but we are working at it, and we have had some experience and some success.

Mr. Rock: Is the CNR contemplating finding ways and means by technical change of having freight service made more rapid across Canada? Is any research being done in this respect?

Mr. Macdougall: Research is being done and experimentation is being carried on. One of the things we have been able to do in this so-called computer age is we have been able to put our train operations on the computer, we have been able to simulate train operations to see how quickly we can move goods and what the blockages in our track systems are that are holding us down to a certain length of time, and so on. Experimentation is going on on our railroad and on the Canadien Pacific

[*Interpretation*]

wagons chargés de l'autre côté du détroit à Port-aux-Basques et nous mettons les wagons du continent à côté de ceux de Terre-Neuve et nous transférons simplement les marchandises à un quai de marchandises. Ainsi, nous avons vraiment éliminé le besoin d'avoir recours au service des débardeurs à North Sydney et à Port-aux-Basques.

Nous avons établi un programme d'instruction très détaillé là-bas. Beaucoup de ces hommes avaient bon nombre d'années de service. Beaucoup n'avaient que très peu d'instruction. Leur possibilité de trouver un autre emploi était limitée. Donc, nous avons constitué un comité consultatif administration-syndicat pour conseiller ces hommes et leur trouver d'autres genres emplois mais nous leur avons donné des cours, enseigné un métier et nous leur avons donné une formation d'école secondaire afin de leur permettre d'occuper des emplois dans des catégories qui demandaient une 10e ou 11e année. Je pense que cela a donné d'assez bon résultats.

Il y a toujours quelque chose qui ne réussit pas aussi bien qu'on l'espérait, mais c'est un véritable précédent dans les rapports patrons-ouvriers pour essayer de s'occuper des employés excédentaires, et ce fut un véritable succès. Nous songeons maintenant aux mêmes dispositions ici. Si des gens ont besoin de recyclage, d'orientation et d'aide pour d'autres emplois, nous l'établissons et l'organisons. Nous étudions la question suivant un point de vue voulant que nous ayons un problème pour pouvoir assurer un emploi à ces hommes dans le service et en laisser le moins possible en chômage. C'est un problème difficile, mais nous y travaillons et nous avons déjà eu une certaine expérience et obtenu un certain succès.

M. Rock: Est-ce que le National Canadien songe à trouver des voies et moyens par l'évolution technologique pour avoir un service de messageries plus rapide à travers le Canada? Est-ce qu'on fait des recherches dans ce domaine?

M. Macdougall: On fait de la recherche et des expériences. Une des choses que nous avons pu faire en cet ère de l'ordinateur, c'est utiliser un ordinateur pour notre service ferroviaire, et nous avons pu stimuler ce dernier afin de voir avec quelle rapidité nous pouvons acheminer les marchandises et quels sont les obstacles dans nos systèmes de voies qui nous retardent un certain temps, etc. Les expériences se poursuivent chez nous et au Pacifique Canadien pour améliorer la situation, mais

[*Texte*]

all the time to improve this, but it is a major undertaking to get your average speed up. If you look at the statistics they will show that the average speed is going up a little bit, but this takes into account all the time they are stopped in the yards waiting and moving, the whole whole thing, but there is a distinct movement towards improving the speed. However, even more important than that is the matter of improving the quality and the reliability of the service. There are so many places where something can go wrong that we are working at this tooth and nail all the time to see if we cannot improve the quality and reliability, because that is really where our competitive problems lie vis-a-vis the trucker.

Mr. Rock: This is my last question. You spoke about the loss of passenger clientele across the country. I would like to have your comments on whether you feel this is due to the affluent society in North America. You said this happens not only in Canada but in the United States and the whole of North America as well because people now own cars and trailers and such things more than they did in the past for holidaying, and the like. Is this one of the reasons? Of course, there is also the fact that many highways have been built across the country in comparison to the past. Has this had an effect on the...

Mr. Macdougall: I think it is the fact of the greatly improved highways and the greater number of automobiles that are on the road.

Mr. Rock: Yes, and the air services as well.

Mr. Macdougall: Air and automobiles.

The Chairman: Mr. Breau.

Mr. Breau: Mr. Macdougall, some of the trucking people charged that they were paying considerably more for crossing on the ferries than your trucks or your cars were paying. Is this true?

Mr. Macdougall: I do not know that I would say it is true or it is not true, but they pay on a different basis. As you know, these charges for the ferries are set by the Department of Transport. We do not set the charges for the ferries.

Mr. Breau: You do not set the charges for the ferries?

Mr. Macdougall: No. The charges are not by the Department of Transport. As a matter

[*Interprétation*]

c'est une entreprise importante que d'essayer d'augmenter la vitesse moyenne. Si vous regardez les statistiques, vous verrez que la vitesse moyenne augmente un peu, mais cela comprend tous les arrêts dans les dépôts, l'attente etc., mais il y a vraiment un mouvement vers l'augmentation de la vitesse. Cependant, il est encore plus important d'améliorer la qualité et la fiabilité des services. Il y a tellement d'endroits où les choses peuvent ne pas fonctionner que nous travaillons d'arrache-pied pour voir si nous ne pouvons pas rendre le service plus fiable et plus sûr, car c'est vraiment là que résident nos problèmes de concurrence en face du camionnage.

M. Rock: Une dernière question. Vous parlez de diminution de votre clientèle à travers le pays. Je voudrais savoir si vous croyez que cela est dû à la société prospère de l'Amérique du Nord. Vous avez dit que cela se produit non seulement au Canada, mais aux États-Unis et dans toute l'Amérique du Nord car les gens ont maintenant des voitures, des roulottes etc., plus souvent qu'autrefois pour leurs vacances et choses du genre. Est-ce là une des raisons? Bien entendu, il y a aussi le fait que beaucoup d'autoroutes ont été construites à travers le pays comparativement à ce qu'il en était par le passé. Est-ce que cela a affecté le...

M. Macdougall: Je crois que c'est en raison de la grande amélioration du réseau routier et du plus grand nombre d'automobiles sur la route.

M. Rock: Oui, et aussi le service aérien.

M. Macdougall: Le service aérien et les automobiles.

Le président: Monsieur Breau.

M. Breau: Monsieur Macdougall, certains camionneurs ont avancé qu'ils payaient beaucoup plus pour traverser par les bacs que vos camions ou wagons payaient. Est-ce vrai?

M. Macdougall: Je ne dirais pas si c'est vrai ou non, mais le principe du tarif est différent. Comme vous le savez, les frais de traversier sont fixés par le ministère des transports. Nous n'établissons pas ces frais.

M. Breau: Ce n'est pas vous qui fixez les frais?

M. Macdougall: Non. C'est le ministère des Transports. De fait, tous les services de tra-

[*Text*]

of fact, all the ferry services in Atlantic Canada are under very active review at the moment and presumably a new establishment of charges will be published before too long.

port. So, we operate the service that the

The Department of Transport and the Government of Canada owns the ferries. We operate the ferries for them and the deficits that occur on them are paid by the Government of Canada to the Department of Trans-

• 1630

owner asks us to provide. The method that we have of paying for the carriage of our freight by the ferry is a little different than the trucker, and this is basically because of our constitution. For instance, we are required to provide and Canada is required to provide, a link between North Sydney and Port aux Basques and to provide it on the basis that in so far as the shipper is concerned he only pays for moving it across there as if it were 98 miles of rail, just as if the railroad went right over to Newfoundland. Our policy in Canada, as set out by the government, is that the shipper is not required to pay the costs of going across to Newfoundland. He is just required to pay as if it were 98 miles of rail. The rates are calculated on that basis. When we give a portion of our revenue to the Department of Transport for that portion of the haul from Montreal to St. John's, Newfoundland, we give them the proportion of the 98 miles of rail that is represented by that ferry service.

The trucker going across there pays a flat rate of whatever it might be, $2 or $3 a ton, and that is set by the Department of Transport with respect to carriage of the truck across. It depends upon the weight of the truck and the length, and so on. Prince Edward Island is basically the same. It is a charge that we rebate back to the government on the freight charges we obtain for the haul across there, related to the haul across the water of about nine miles to Prince Edward Island as if it were rail.

Mr. Breau: Could you tell me what exactly is the relationship between Canadian National and Canadian National Transportation Limited? Is CNTL considered as another transportation company?

Mr. Vaughan: It is a wholly-owned subsidiary of Canadian National Railways.

Mr. Breau: Do they transport for CN on a contract basis, or on an *ad hoc* basis? Are there contracts involved? Do they operate the express trucks?

[*Interpretation*]

versier dans les provinces de l'Atlantique font l'objet d'une revue très sérieuse à l'heure actuelle, et un nouveau tarif sera vraisemblablement établi avant longtemps.

Le ministère des Transports et le gouvernement du Canada sont propriétaires des traversiers. Nous les exploitons pour eux et les déficits sont payés par le gouvernement du Canada au ministère des Transports. Par conséquent, nous exploitons le service qui nous est demandé par le propriétaire. Notre méthode de payer le transport de nos propres marchandises par traversier est un peu différent de celui du camionneur et c'est fondamentalement en raison de notre constitution. Par exemple, nous sommes tenus, et le Canada aussi, d'assurer un lien entre North Sydney et Port-aux-Basques et de le fournir suivant le principe que, en ce qui concerne l'expéditeur, il ne paie que le coût de transport, comme s'il s'agissait de 98 miles de rails, tout comme si le chemin de fer se rendait jusqu'à Terre-Neuve.

Notre politique au Canada, établie par le gouvernement, est la suivante: l'expéditeur n'est pas tenu de payer les frais de transport jusqu'à Terre-Neuve. Il ne doit payer que comme s'il s'agissait de 98 miles de rails. Le tarif est fixé d'après ce principe. Quand nous donnons une partie de nos recettes au ministère des Transports pour cette partie du transport jusqu'à Saint Jean (Terre-Neuve) nous leur donnons une proportion des 98 milles de rails, représentés par le service des traversiers.

Quand le camionneur traverse, il paie un plein tarif, que ce soit $2. ou $3. la tonne, qui est fixé par le ministère des Transports à l'égard du transport du camion. Évidemment, cela dépend du poids du camion, de sa longueur, et ainsi de suite. A l'Île-du-Prince-Édouard, c'est toujours la même chose. Ce sont des frais que nous remboursons au gouvernement pour les frais de transport que nous avons reçus pour la traversée, par rapport à la traversée du détroit qui est de neuf milles, à l'Île-du-Prince-Édouard comme si c'était une voie ferrée.

M. Breau: Pourriez-vous me dire le rapport qu'il y a entre le National-Canadien et la *CN Transportation Limited*? Est-ce qu'on considère la *CN Transportation Limited* comme une autre entreprise de transport?

M. Vaughan: C'est tout simplement une filiale du National-Canadien.

M. Breau: Est-ce qu'ils font le transport pour le CN, sur base de contrat, ou au jour le jour? Est-ce qu'il y a des contrats en cause? Est-ce qu'ils exploitent les messageries?

[*Texte*]

Mr. Vaughan: They operate our express trucks and our pick-up and delivery trucks—all those trucks that you see running around with the "CN" symbol on them. They are the CNTL. They are operated by the sort of highway department of the railway company.

Mr. Breau: Suppose you had to make a haul of 200 or 400 miles by truck. Would you put that out to tender or would you automatically give it to CNTL?

Mr. Vaughan: It depends on where the movement is.

Mr. Breau: Does it happen that you have to give out contracts before you can have a regular...

Mr. Vaughan: Yes; if that is your question, we not only use our own trucks—the CNTL trucks you speak about—but we have many hundreds of contracts with independent truckers to take the goods from us and continue them on their way.

Mr. Breau: When you replace rail freight with trucks what do you do? Do you automatically publicly ask for a tender so that a private trucker can bid on it?

Mr. Macdougall: Sometimes when a rail line is abandoned no service is provided by us. I think the normal would be that where the service situation on a branch line has deteriorated to the point that there is just a dribble and there is no requirement for carload movements we apply to abandon the line, authority to do that, and that is the end of it. If there is traffic there to be handled then a local trucker would come along and pick it up and take it.

If it turned out that we had goods to be delivered there off-line we could arrange to deliver them by our own truck, or by an independent trucker, but we do not normally just set up a new service every time a line is abandoned.

Mr. Breau: But could it not happen that the CTC would say to you, "We want to be assured that there will still be a transport service there" where perhaps for some reason or another there is no local trucker?

Mr. Macdougall: Yes.

[*Interprétation*]

M. Vaughan: Ils exploitent nos messageries, nos services de cueillette et de livraison, tous les camions que vous voyez avec le «CN». Ce sont les camions, justement, de cette compagnie. Ils sont exploités par le genre de département des routes d'une compagnie de chemins de fer.

M. Breau: Mettons, par exemple, que vous ayez un certain transport à faire, sur une distance de 200 milles ou 400 milles par camion. Est-ce que vous en feriez l'attribution par soumissions ou est-ce que vous le donneriez automatiquement à la CNTL?

M. Vaughan: Tout dépend de la direction de ce transport.

M. Breau: Est-ce qu'il vous faut donner des contrats avant d'avoir un...

M. Vaughan: Si c'est là votre question, non seulement, employons-nous nos propres camions et ceux de la CNTL, mais nous avons, des centaines de contrats avec des camionneurs indépendants pour transporter les denrées et les acheminer à destination.

M. Breau: Quand vous remplacez une ligne de marchandises de chemin de fer par les camions, qu'est-ce que vous faites? Est-ce que vous demandez automatiquement des soumissions publiques pour qu'un camionneur indépendant puisse présenter sa soumission?

M. Macdougall: Parfois quand nous abandonnons une ligne de chemin de fer, nous fournissons les services. Mais la façon normale serait que, lorsqu'il y a une détérioration des services sur une ligne secondaire à tel point qu'il n'y a plus de besoin de mouvements de wagons, nous demanderions l'abandon de la ligne, aurions la permission de le faire et c'est tout. S'il y a un volume de trafic qui doit être servi, alors un camionneur local viendrait, le ramasserait et le livrerait.

S'il arrivait ensuite que nous ayons des denrées à livrer d'après une ligne secondaire, nous nous arrangerions pour les faire livrer par un de nos camions ou par un camionneur indépendant, mais normalement nous n'établissons pas un nouveau service, chaque fois qu'il y a abandon d'une ligne.

M. Breau: Est-ce que la Commission canadienne des transports pourrait vous dire: «Nous voulons être assurés qu'il y aura toujours un service de transport,» s'il n'y avait pas, pour une raison ou une autre de camionneur local?

M. Macdougall: Oui.

[*Text*]

Mr. Breau: When that happens do you automatically give that to the CNTL, or do you ask for tenders...

Mr. Vaughan: It depeends on the circumstances.

Mr. Breau: So it is not always the same procedure?

Mr. Vaughan: No.

Mr. Lundrigan: Mr. Chairman, can you give me the reason for my being ruled out of order a few minutes ago by Mr. Vaughan and yourself...

Some hon. Members: No, no.

Mr. Lundrigan: . .on the questions I posed about the relative cost to the CN of maintaining and upgrading its roadbeds and to operate its dining room, sleeper and coach service in Newfoundland, relative to other provinces? I suggested that even though they could not provide the information for us right now—and undoubtedly they could not—they might make this information available to the Committee very shortly? Why was I rulled out of order on these questions?

The Chairman: Had you put your questions that way perhaps I would not have ruled you out of order.

Mr. Lundrigan: Mr. Chairman, may I put my questions now, in that event? Perhaps I have them a little more refined. I will grant you that.

The Chairman: You will have a chance to ask them later. I have your name on my list. Others have been seeking to speak since this morning and have been delayed and delayed. You will have an opportunity to put those questions.

Mr. Lundrigan: That is fine, Mr. Chairman. I was ruled out of order on basically the same questions, and I could not understand why.

Mr. Skoberg: The Nova Scotia Fish Packers Asosciation indicated that you now have an embargo on the large hopper cars in that area, effective February 15, 1969. Their great concern, of course, was that they must have these large hopper cars to handle their produce. Do you still have that embargo on, and what good reason is there for it?

[*Interpretation*]

M. Breau: Quand cela arrive, est-ce que vous donnez cela automatiquement à la CNTL, ou est-ce que vous demandez des soumissions?

M. Vaughan: Tout dépend des circonstances.

M. Breau: Alors la façon de procéder n'est pas toujours la même?

M. Vaughan: Non.

M. Lundrigan: Est-ce que je pourrais demander au président de me donner la raison pour laquelle il y a quelques minutes, M. Vaughan et vous m'avez dit que mes questions n'étaient pas recevables...

Des voix: Non, non.

M. Lundrigan: ...au sujet des frais pour le CN de maintenir, d'améliorer l'assiette de ses lignes de chemin de fer et d'exploiter son service de wagons-lits, wagons-restaurants, wagons-salons, à Terre-Neuve, par rapport aux autres provinces? J'ai proposé que même s'ils n'avaient pas les renseignements à l'heure actuelle, et sans doute ils ne le pouvaient pas, ils pourraient les donner au Comité très prochainement? Je me demande pourquoi on m'a dit que mes questions étaient irrecevables?

Le président: Si vous aviez posé la question de cette façon-là, je ne vous aurais peut-être pas dit que vos questions étaient irrecevables.

M. Lundrigan: Alors, est-ce que je pourrais poser mes questions, maintenant? Elles sont un peu plus raffinées, je dois l'avouer.

Le président: Vous aurez la chance d'y revenir. J'ai votre nom sur la liste. Il y en a d'autres qui ont demandé la parole depuis ce matin, mais il y a eu des retards et des retards. Vous aurez l'occasion un peu plus tard de poser vos questions.

M. Lundrigan: Très bien, monsieur le président. Au fond, les mêmes questions ont été jugées recevables et je ne pouvais comprendre pourquoi.

M. Skoberg: La *Nova Scotia Fish Packers Association* avait indiqué que vous avez maintenant un embargo sur les wagons-trémie dans cette région, à compter du 15 février 1969. Évidemment, la principale préoccupation c'est qu'il faut absolument avoir ces wagons-trémie pour leurs produits. Est-ce que l'embargo est toujours en vigueur, et quelle bonne raison avez-vous pour le justifier?

[*Texte*]

Mr. Macdougall: Yes; this company is mainly interested in the handling of fish meal, and they move fish meal out on that line. They would like to have the largest car available. They would like to have one bigger than the largest we have available, if they could get it, because there are economies in moving a product such as fish meal in bulk if you can do it in the largest possible quantities.

The largest cars that we have, that they would like to use, seem to have a characteristic that causes them to oscillate at a certain speed. We have had some trouble on that track with derailments in that area when these cars are travelling at speeds of 20 to 25 miles an hour. The oscillation takes place at a very low speed. Something happens and it starts to roll.

This is not happening just there. It happens on your line and on CP, and it happens on Canadian National all over Canada. To give them service and to avoid the possibilities, that we can foresee from our experience, of additional derailments, we have gone to a little smaller type of the same covered hopper type of car, the design of which does not set up this rolling characteristic. That is why we have put the embargo on the big cars.

Mr. Skoberg: And the problem, of course, is that their freight rates increase and what they are asking for is some type on compensatory adjustment of their freight rates on less than 100,000 pounds.

Mr. MacDougall: Yes, I think our people have had some detailed discussions with them about that. I cannot tell you whether or not they have concluded them, but they are very aware of the problem. These people have made it known to us and our sales people have been in contact with them trying to work something out.

Mr. Skoberg: To be consistent with your recommendations, of course, it is most important that these people down there be looked after for the economic growth of that area?

Mr. MacDougall: If we can look after them we certainly will. We do not want them dissatisfied.

Mr. Skoberg: When Mr. Irving was before us, as he was, for quite some time, he suggested that the railways of Canada should give greater consideration to incentive rates

[*Interprétation*]

M. Macdougall: La compagnie s'intéresse surtout à la manutention de farine de poissons, et elle le transporte sur cette ligne-là. Elle voudrait le plus gros wagon disponible. Elle en voudrait un qui soit plus grand que ce que nous avons à l'heure actuelle, si nous pouvions l'obtenir, car il y a des économies à transporter en vrac un produit comme la farine de poissons, si vous pouvez le faire en plus grande quantité.

Les wagons les plus grands que nous avons à l'heure actuelle, et qu'ils voudraient employer, semblent avoir une caractéristique qui les fait osciller rendu à une certaine vitesse.

Nous avons certains déraillements sur cette ligne dans la région, alors que la vitesse était de 20 à 25 milles à l'heure. L'oscillation se produit à des vitesses très basses. Quelque chose se produit et le wagon commence à basculer.

La chose ne se produit pas seulement sur notre ligne et sur celle du CP, et sur celles du National-Canadien partout au Canada. Alors, pour leur donner un service et pour éviter la possibilité d'autres déraillements, que nous pouvons prévoir d'après notre expérience, nous avons eu recours à des wagons un peu plus petits du même genre de wagons-trémie couverts, dont la conception n'a pas ce roulement caractéristique. C'est la raison pour laquelle nous avons mis l'embargo sur les plus grands.

M. Skoberg: Et alors, leurs frais de transport augmentent et ce qu'on demande dans ce cas-là, c'est une compensation pour le tarif marchandises pour moins de 100,000 livres.

M. Macdougall: Oui, je crois que notre personnel a eu des entretiens avec eux à ce sujet. Je ne sais pas si les discussions sont finies, mais ils sont au courant du problème. Ils nous ont avisés de la chose et notre propre personnel des ventes essaie d'en arriver à un arrangement.

M. Skoberg: Si nous nous en tenons à vos recommandations, évidemment, il importerait beaucoup de prendre soin de ces gens pour la croissance économique de la région.

M. Macdougall: Si nous le pouvons, nous le ferons. Nous ne voulons pas qu'ils soient mécontents.

M. Skoberg: M. K. C. Irving a comparu devant nous pendant assez longtemps. Il a suggéré que les chemins de fer du Canada devraient vraiment étudier la possibilité de donner des tarifs qui stimuleraient le déve-

[*Text*]

to encourage industrial development. Is your company now providing any incentive rates in any area of the Atlantic Provinces?

Mr. MacDougall: I would have to give you a very general answer on that question. We have lots of incentive rates, as such, in effect in the Atlantic Provinces, and elsewhere. An incentive rate really means just saying to a man, "The normal rate is a dollar for 50,000 pounds, but if you load 60,000 pounds we will make the rate 95 cents; if you load 70,000 pounds we will make it 90 cents; and if you load 100,000 pounds we will make it 55 cents". In other words, we give a lower rate for a larger volume. Because we make some economies by handling the larger volume we share with the shipper the economies we have by taking the larger volume. That is the incentive rate principle, and we have many of those all over the Atlantic Canada, the rest of Canada, and in Newfoundland.

Mr. Skoberg: Mr. Irving also complained about the lack of proper cars to move wood chips and lumber in New Brunswick. He said that he had used all the avenues that he knew of to try to obtain sufficient cars for the movement of this type produce. Have you had complaints about this registered with your office?

Mr. MacDougall: We have had some, yes, From him, I do not know that I have been aware of any major difficulty. We serve Mr. Irving's plants in the Maritimes and we provide cars for wood chips moving to his paper plants. There may have been some cases where he has complained about this. He has not spoken to me personally about it; although I have sat down and talked with him for an hour or so a couple of times he has not raised that point. I do not know of any serious condition of that kind.

But, unfortunately, you do get into situations from time to time where you do have a shortage of cars of one type or another—sometimes many types at one time. I do not know whether he is just talking about our inability to supply all the cars that he would like. Lots of people like to have ten or fifteen just sitting there at their back door all the time so that when they want to move them in they have them. This does not help us with our car supply, nor the one who needs a car and we cannot supply it. I am not suggesting that is what Mr. Irving's complaint was.

Mr. Skoberg: It was also suggested that when faced with competition from coastal

[*Interpretation*]

loppement industriel. Avez-vous à l'heure actuelle de tels genres de tarifs d'encouragement dans les provinces de l'Atlantique?

M. Macdougall: Il faudrait que ma réponse soit très générale. Le tarif d'encouragement comme tel, il y en a beaucoup en vigueur dans les provinces de l'Atlantique et ailleurs. Il s'agit simplement de dire: «Normalement, le tarif est $1.00 pour 50,000 livres et si vous avez 60,000 livres, nous vous donnerons un tarif de 95 cents et si vous avez 70,000 ce sera 85 cents et s'il y a 100,000 livres, le tarif sera de 55 cents.» En d'autres termes, nous demandons un tarif moins élevé si le volume est plus grand. Parce que nous réalisons des économies en ayant un volume plus grand, nous partageons—cette économie avec l'expéditeur. C'est le principe du tarif d'encouragement. Nous en avons partout dans l'Atlantique et ailleurs au Canada, et à Terre-Neuve aussi.

M. Skoberg: Une autre question. M. Irving s'est plaint aussi du manque de wagons pour le transport du bois et des copeaux au Nouveau-Brunswick. Il a dit qu'il avait essayé tous les recours possibles pour obtenir les wagons suffisants pour le transport de ce genre de produits. Avez-vous eu des plaintes à votre bureau à ce sujet?

M. Macdougall: Nous en avons eues quelques-unes. De sa part, je n'ai pas connaissance de difficultés importantes. Nous desservons les usines de M. Irving dans les Maritimes et nous fournissons des wagons pour le transport des sciures vers ses usines de papier. Il y a peut-être eu certains cas où il s'est plaint. Il ne m'en a pas parlé personnellement; quoique je lui ai parlé pendant une heure ou deux à quelques reprises, il ne l'a pas mentionné. Je ne connais pas de situations difficiles de ce genre.

Malheureusement, il arrive de temps à autre qu'il y ait une lacune de wagons d'un genre ou d'un autre et parfois de plusieurs genres de wagons en même temps même. Mais je ne sais pas s'il parle simplement de notre incapacité à lui fournir tous les wagons qu'il désire. Il y a beaucoup de gens qui voudraient en avoir 10 ou 15 dans leur cour tout le temps de façon à les avoir à portée de la main si le besoin s'en fait sentir. Cela ne nous aide pas du tout à assurer le nombre de wagons voulus, ni ceux qui ont besoin d'un wagon dont nous ne disposons pas. Je ne dis pas que c'est de cela que M. Irving se plaint.

M. Skoberg: On a aussi laissé entendre que lorsqu'il y a une concurrence de la part du

[*Texte*]

shipping or river shipping CNR rates have been reduced to undercut and to eliminate the competition. Do you know of any case where you cut your rates to eliminate competition in the Atlantic provinces?

Mr. Macdougall: No, it is not our policy to eliminate competition. Our policy is to meet competition and to get the traffic on the railway and if we can lower our rates to get that traffic on the railway and still have a compensatory rate to make some contribution to our variable costs, that is what we do. And we compete just as hard as Mr. Irving does in that regard. He is a prime example perhaps of a successful businessman who has competed hard with other companies, has obtained the business for his company, and done very well.

We would like to be as successful as he is, although I know that we are not. However, that is what we do—we compete hard for the traffic but we do not go below the compensatory level thereby making some contribution to our costs. If that puts him out of business, then that is not the intention.

Mr. Skoberg: Do you consider that any special rate should be established for rail movements west to east to cover materials and supplies to the manufacturers who are in the Atlantic provinces?

Mr. Macdougall: We suggested in the outline we gave you that in respect of certain commodities, some raw materials and some unfinished products moving from west to east—that is, coming into Atlantic Canada—it would be helpful if Atlantic manufacturers received some transportation assistance. I do agree that that is so. I think the provincial premiers in their brief said the same thing, but I am not just sure of the detail at the moment.

Mr. Skoberg: We run into one other problem down there. Of course, freight rates are increased on a percentage basis, but it has been suggested that it should be done on a cents per 100 pound basis. Have you any jurisdiction over setting freight rates in this regard? Could you change the method of setting freight rates?

Mr. Macdougall: I do not know if we have the jurisdiction over that but our rate officers advise management and they decide how the increases are going to be made. But I would

[*Interprétation*]

service de cabotage ou du service de transport fluvial, le CNR réduit ses tarifs de façon à pouvoir éliminer la concurrence. Connaissez-vous un cas où vous avez réduit vos tarifs pour éliminer la concurrence dans les provinces de l'Atlantique?

M. Macdougall: Non, ce n'est pas notre politique d'éliminer la concurrence. Elle est plutôt de faire face à la concurrence et nous essayons d'attirer le trafic aux chemins de fer et, si possible, de réduire nos tarifs pour le faire tout en ayant toujours un taux compensateur qui contribue à nos frais réels. Nous faisons autant de concurrence que M. Irving à cet égard. Il est peut-être le meilleur exemple d'un homme d'affaires qui a réussi après avoir fait une dure lutte à d'autres sociétés, à s'assurer des contrats, et il a très bien réussi.

Nous aimerions réussir autant que lui mais je sais que nous ne le sommes pas. C'est pourtant ce que nous faisons. Nous concurrençons de toutes nos forces pour obtenir les contrats, mais nous n'allons pas en deçà du niveau compensatoire contribuant ainsi à défrayer nos coûts. Si on lui enlève ainsi des clients, ce n'est pas notre intention.

M. Skoberg: Estimez-vous qu'il devrait y avoir un tarif spécial pour les mouvements de l'ouest et l'est pour les matériaux et les fournitures destinés aux fabricants qui se trouvent dans les provinces de l'Atlantique?

M. Macdougall: Nous avons suggéré, dans l'exposé que nous vous avons fait à l'égard de certains produits non œuvrés et des matières premières qui vont de l'ouest à l'est, c'est-à-dire vers les provinces de l'Atlantique, qu'il serait utile pour les fabricants des provinces de l'Atlantique d'obtenir une subvention pour le transport. Je suis de cet avis. Je crois que les premiers ministres des provinces de l'Atlantique ont dit essentiellement la même chose dans leur mémoire, mais je n'en suis pas tout à fait sûr des détails à l'heure actuelle.

M. Skoberg: Nous devons faire face à un autre problème là-bas. Même si le tarif-marchandises est haussé selon un calcul de pourcentage. On a proposé qu'on devrait le faire sur une base d'un cent par cent livres. Est-ce que vous avez juridiction sur les tarifs-marchandises à cet égard? Est-ce que vous pourriez changer la procédure suivie pour établir le tarif-marchandises?

M. Macdougall: Je ne sais pas si nous avons la compétence pour le faire, mais nos fonctionnaires avisent la direction à cet égard et décident de quelle façon les hausses sont cal-

[*Text*]

point out to you that that is a pretty big question and one that has been argued many times by western and eastern lawyers and freight rate councils back and forth over the years. They have argued which is the better way to do it. Sometimes they have done it both ways. An example is the bridge subsidy legislation applied by the Board of Transport Commissioners, as it then was. They made the reductions in the rates partly in cents per 100 pounds and partly on a percentage basis to meet the two different circumstances that occur.

Mr. Skoberg: I have one further question and it is on the water service of St. John's, Newfoundland. Has the CNR removed any water or ferry service at St. John's, Newfoundland? Have CNR boats been removed?

Mr. Macdougall: You may be referring to the two ships, Baccalieu and Burgeo, that were in the coastal service but since have been taken out of service in Newfoundland.

Mr. Skoberg: What was the reason for that?

Mr. Macdougall: These are old vessels and the Canadian Steamship Inspection Service would not allow us to operate them further in the condition which they were in. This has to do with saving life at sea and proper standards for life-saving. Now they did at one time have proper standards but the standards have changed. As I said, these are old vessels.

Some of the other vessels in the coastal fleet are also deficient but they have sufficient life and quality left in them—I am thinking of the Cabot Strait—to warrant spending

• 1645

maybe $500,000 on them to bring them up to the standards demanded by the Canadian Steamship Inspection Service today. But these two vessels are about the oldest in the Newfoundland fleet and they do not have, in the consideration of both the owners and the operators—the owners being the Dominion of Canada and the operators being the Canadian National Railways—enough life in them.

Mr. Skoberg: Then is the CNR now chartering any ships for coastal service, such as the Sarah.

Mr. Macdougall: Yes, the Sarah is chartered. I think we have presently in Newfoundland four or five ships on charter. Until the new rail car Ferries went in, at this time of year we would probably have 30 ships on charter. There are about five today.

[*Interpretation*]

culées. Mais permettez-moi de vous signaler que c'est une question très vaste et qui a fait l'objet de nombreuses discussions entre les juristes de l'est et de l'ouest, et dans les conseils de tarifs-marchandises au cours des années, quant à savoir quelle est la meilleure procédure à suivre. Ils utilisent parfois les deux méthodes. Prenez, par exemple, la mesure législative touchant la subvention accordée pour les ponts appliquée par la Commission des transports du Canada. Ils établissent les baisses de tarifs partiellement en pourcentages et partiellement en cents pour cent livres pour tenir compte des deux situations qui se présentent.

M. Skoberg: Une dernière question en ce qui concerne le service de transport maritime de St-Jean, Terre-Neuve. Est-ce que le CN a abandonné un service de transport maritime ou de transbordeur à St-Jean, Terre-Neuve. Est-ce qu'on a retiré certains navires du CN?

M. Macdougall: Vous parlez peut-être des deux navires, le *Burgeo* et le *Baccalieu*, qui faisaient partie du service de cabotage et qui ont été retirés du service à Terre-Neuve?

M. Skoberg: Pour quelle raison?

M. Macdougall: Parce qu'il s'agissait de vieux navires et que le service d'inspection des navires du Canada ne nous permettait pas de les exploiter plus longtemps dans l'état où ils se trouvaient à cause des normes de sauvetage en haute mer. A un moment donné, ils satisfaisaient aux normes, mais les normes ont changé. Comme je l'ai dit, ces navires sont plutôt vieux.

Certains autres navires du service de cabotage sont déficients, mais ils ont encore une vie utile suffisamment longue, comme le *Cabot Strait*, pour qu'on dépense jusqu'à $500,000 pour les réaménager au point de satisfaire aux normes établies par le Service d'inspection des navires du Canada. Mais le *Baccalieu* et le *Burgeo* sont peut-être les deux plus vieux navires de la flotte, et, d'après les propriétaires, soit le gouvernement du Canada, et les exploitants, le CN, n'avait pas une vie utile assez longue pour que ce soit rentable.

M. Skoberg: Alors, est-ce que le CN nolise des navires pour le service de cabotage, comme le *Sarah*?

M. Macdougall: Oui, le Sarah est nolisé. A l'heure actuelle, je crois que nous avons quatre ou cinq navires nolisés. Avant d'introduire les nouveaux traversiers de chemins de fer, il y en avait peut-être trente.

[*Texte*]

Mr. Skoberg: Under whose jurisdiction do these come?

Mr. Macdougall: Well if you charter a vessel with a crew, I presume they are under the captain. They are to do the work that we give them to do.

Mr. Skoberg: There are no CNR employees on these chartered boats?

Mr. Macdougall: No.

Mr. Skoberg: Have you a list of companies that you have these boats chartered from?

Mr. Macdougall: As I recall, there was a question on this and we supplied quite a bit of detail. Is that not included in what you have there? Perhaps I might explain a bit more in respect of these two boats, the Baccalieu and Burgeo.

There have been many queries raised why we did not build new vessels and put them into service, but I think the answer really is that the coastal services in Newfoundland are very important in the looking after of the people in the outports, particularly in areas where there is a paucity of highways, and it is not known at this time how long those coastal services are going to be required and in which areas they will be required. However, they are constantly being adjusted in an attempt to try to give the best service we can over there in the circumstances.

We are now in the process of making some adjustments in coastal services on the south coast. It was felt, and I think quite properly, that until such time as you could envisage more clearly the type of vessel really needed to replace those two, it would be better to take on a chartered vessel for the interim period. I would expect—and this is just my own understanding of it—that when the type of vessel that should be put on these runs permanently to replace these, is decided, there will be a couple of vessels built and put in the service. These will be owned by Canada and operated in the same way. I look upon chartering in this case as an interim feature.

Mr. McGrath: I have a supplementary question. Was not the Sarah built to CNR specifications by the charterer?

Mr. Macdougall: I do not know but I do not think so. We look for charter vessels and we try to find the best one to do the job that has to be done. The Sarah apparently was available to do that

[*Interprétation*]

M. Skoberg: De qui les navires nolisés relèvent-ils?

M. Macdougall: Si vous nolisez un navire avec son équipage, j'imagine qu'elle relève du capitaine. Ils doivent faire le travail que nous leur demandons de faire.

M. Skoberg: Il n'y a pas d'employés du CN sur ces navires nolisés?

M. Macdougall: Non.

M. Skoberg: Avez-vous une liste des compagnies desquelles vous avez nolisé ces navires?

M. Macdougall: Si je me souviens bien, il y a eu une question de posée à ce sujet, et nous avons donné beaucoup de détails. Est-ce que cela ne paraît pas dans le document? J'aimerais vous expliquer un peu plus, au sujet des deux navires, le *Baccalieu* et le *Burgeo*.

On a posé plusieurs questions quant aux raisons pour lesquelles nous n'avons pas construit de nouveaux navires pour les mettre en service. Et je crois que la réponse est vraiment que le service de cabotage de Terre-Neuve est très important pour desservir les gens éloignés, surtout lorsqu'il n'y a pas ou très peu de routes. On ne sait pas à l'heure actuelle, jusqu'à quel moment ces services de cabotage seront nécessaires et dans quelles régions. De toute façon, on les transforme constamment afin de pouvoir rendre les meilleurs services possibles dans les circonstances.

Nous modifions présentement notre service de cabotage de la côte sud. Il nous a semblé, et avec raison, je crois, que jusqu'au moment où nous verrons un peu plus clairement le genre de navire qu'il faudra pour remplacer les deux navires abandonnés, il vaut mieux avoir des navires nolisés pour la période intérimaire. J'imagine, et ce n'est que mon opinion, que lorsqu'on aura décidé du genre de navire qu'on devra mettre en service de façon permanente pour les remplacer, on construira deux navires et on les mettra en service. Ils seront la propriété du Canada et exploités de la même façon. De toute façon, il s'agit d'une mesure intérimaire.

M. McGrath: Une question complémentaire. Est-ce que le *Sarah* n'a pas été construit selon le cahier des charges du CN?

M. Macdougall: Je ne le sais pas mais je ne le crois pas. Nous cherchons des navires à noliser, et nous essayons toujours de trouver le meilleur qui réponde à nos exigences. Il semble que le *Sarah* remplissait toutes les exigences.

[*Text*]

Mr. McGrath: One further supplementary, Mr. Chairman. Is it not also a fact that the captain and crews operating on these vessels work considerably longer hours at considerably less pay than crews on CNR vessels?

Mr. Vaughan: I do not think so. I think they are subject to whatever statutory requirements there are—the Canada Labour (Standards) Code. In any event, our position would not be to do that for that purpose.

Mr. Skoberg: I have one last question. I am not going to belabour this because this morning we went into it at some length, Mr. Chairman. I think it is still important, and maybe after contemplation over the lunch hour you are now able to advise on the possibility of having the Newfoundland passenger service extended for short periods of time, as indicated in your letter. Could you not give this Committee some commitment now as to what you were saying in this particular paragraph? The two words "contemplation" and "possiblity" in the language we have before us utterly amaze us. I believe the gentlemen could answer this. They must have some idea how much longer they must keep the train on.

• 1650

The Chairman: They said it about three or four times.

Mr. Portelance: Again, referring to that train in Newfoundland, at what time of year were more people travelling, during the summer or winter?

Mr. Macdougall: It was during the summer.

Mr. Portelance: Do you think that by next summer you will have enough buses to give them as good a service as they had in the past?

Mr. Macdougall: Yes. That is the idea of the commission's ruling. The bus service has to be suitable and adequate to them before they will release us from the train service, so that is the idea.

Mr. Portelance: Travelling in Newfoundland from one end to the other, I think it is about 500 miles. What was the percentage of the travellers going from one end to the other by train?

Mr. Macdougall: Perhaps we could take a note of that question. To give you an indica-

[*Interpretation*]

M. McGrath: Une dernière question supplémentaire, monsieur le président. N'est-il pas exact que le capitaine et les équipages de ces navires ont des heures de travail beaucoup plus longues et un salaire inférieur aux équipages des navires du CN?

M. Vaughan: Je ne le crois pas. Je crois qu'ils sont sujets aux exigences statutaires du codes (normes) du travail du Canada. De toute façon, notre attitude ne serait pas de le faire à cette fin.

M. Skoberg: Une dernière question supplémentaire. Je ne vais pas m'en prendre à cette question car nous en avons discuté en détail ce matin. Je crois qu'elle est toujours importante, et peut-être qu'après y avoir repensé durant le déjeuner, vous pourrez nous renseigner sur la possibilité de prolonger le service-voyageurs de Terre-Neuve pour une courte période de temps comme vous l'avez indiqué dans votre lettre. Ne pourriez-vous pas vous engager, auprès du Comité, au sujet de ce que vous disiez dans ce paragraphe en particulier?

Les deux mots «songer» et «possibilité» dans ce document me surprennent énormément. J'imagine que les messieurs pourraient nous répondre. Ils doivent certainement avoir une idée durant combien de temps ils devront maintenir le service ferroviaire.

Le président: Ils l'ont dit trois ou quatre fois.

M. Portelance: Pour parler encore une fois du train de Terre-Neuve, j'aimerais bien savoir à quel moment de l'année les gens voyagent le plus. Quelle était la période de pointe, pendant l'été ou pendant l'hiver?

M. Macdougall: Pendant l'été.

M. Portelance: Alors, croyez-vous que, d'ici l'été prochaine, vous aurez suffisamment d'autobus pour leur assurer un excellent service, tout comme vous avez fait par le passé?

M. Macdougall: Oui. C'est le sens de la décision de la Commission. Il faut que le service d'autobus soit au point avant que nous puissions abolir le service ferroviaire, voilà.

M. Portelance: D'un bout de Terre-Neuve à l'autre, il y a à peu près 500 milles. Quel est le pourcentage de voyageurs qui traversent toute l'île?

M. Macdougall: Nous pourrions peut-être prendre avis de cette question. Pour vous en

[*Texte*]

tion of this, there are three basic bus services operated. One is the through service from St. John's to Port aux Basques. There is a second service which is from Corner Brook to Port aux Basques. And a third service is from St. John's to Gander. Those are the three elements of the bus service.

In the figure I gave you for December 1968 of 7,254 total travelling on the bus, there were 4,680—no, it was the seats I gave you. I told you the number of seats available for December was 7,254. Of those, 4,680 seats were available in the St. John's-Port aux Basques through service, 2,340 in the Corner Brook-Port aux Basques service and 234 in the St. John's-Gander service. In that time the figure that we gave was that the total that went by bus was 6,299. That might give you a little bit of feel for it.

Mr. Portelance: But these 6,299 did not travel from one end to the other; they only went a short distance. We do not know how many went from one end to the other. They are really the ones who would have a long trip by bus.

Mr. Macdougall: If you take that we had 7,254 seats available in December 1968 and we carried 6,299 passengers, a good many of them must have been in those 4,680 seats that went from St. John's to Port aux Basques. It is obvious that there are many long-haul passengers in there.

Mr. Portelance: So you would say there is a substantial number of passengers going for longer distances in Newfoundland, according to these figures?

Mr. Macdougall: I think, generally speaking, that the actual number that go right from St. John's to Port-aux-Basques is probably on the smaller end rather than the larger end. The service, I think, really does more for people going from Corner Brook to St. John's and people going part-way across the Island. Certainly not by any imagination does the larger number of the total group go the full distance across. Mr. McGrath, you would know that.

Mr. McGrath: By far the larger percentage would be taking short hauls.

Mr. Macdougall: Yes, I think so.

The Chairman: Have you finished, Mr. Portelance? Mr. Marshall.

Mr. Marshall: Mr. Chairman, Mr. Vaughan, I say with respect that there is a conflict of opinion within your own Department and if I may, I would like to read an article that

[*interprétation*]

donner une idée, il y a trois principaux services d'autobus dans l'île. Le premier assure un service direct de Saint-Jean à Port-aux-Basques, le deuxième fait la navette entre Corner Brook et Port-aux-Basques, le troisième va de Saint-Jean à Gander, voilà les trois éléments du service d'autobus.

Quant au chiffre que je vous ai donné pour décembre 1968, des 7,254 passagers d'autobus, 4,680.. Non, il s'agit du nombre de places. Donc, des 7,254 places retenues en décembre, 4,680 se rendaient de Saint-Jean à Port-aux-Basques, 2,340 de Corner Brook à Port-aux-Basques et 2,340 de Saint-Jean à Gander pour servir les gens à cet endroit. En réalité, le chiffre total des passagers d'autobus dans ce mois-là s'est établi à 6,299. Cela vous en donnera peut-être une idée.

M. Portelance: Mais ces 6,299 passagers n'ont pas traversé toute l'île: certains ne faisaient qu'un court trajet. Nous ignorons combien d'entre eux ont traversé l'île. Ce sont eux qui auraient un long trajet à faire en autobus.

M. Macdougall: S'il y avait, 7,254 places de disponibles en décembre et que nous avons transporté 6,299 passagers, il est sûr qu'un bon pourcentage des 4,680 passagers se rendaient de Saint-Jean à Port-aux-Basques. Il est évident que beaucoup de gens entreprennent de tels longs trajets.

M. Portelance: Alors, vous diriez, d'après ces chiffres, qu'un bon nombre des passagers effectuent de longs trajets à Terre-Neuve?

M. Macdougall: En général, on peut dire, je pense, que le nombre réel de passagers à bord de l'autobus Saint-Jean-Port-aux-Basques est probablement assez faible. La plupart des gens prennent plutôt l'autobus Corner Brook-Saint-Jean, car ils ne traversent qu'une partie de l'Île. Il est difficile de s'imaginer que la majorité des passagers font tout le parcours d'un bout à l'autre.

M. McGrath: Donc, la plupart n'effectueraient que de courts trajets.

M. Macdougall: Je le crois, oui.

Le président: Vous avez terminé, monsieur Portelance? Monsieur Marshall.

M. Marshall: Monsieur le président, monsieur Vaughan, sauf votre respect, il semble y avoir des divergences d'opinions au sein de votre propre ministère. Si vous me le permet-

[*Text*]

appeared in one of the Newfoundland papers where a senior official of the Canadian National Railways firmly believes the best way to travel over intermediate distances—125 miles to 750 miles—is by train despite the versatility of the automobile and the speed of the airplane. On road transportation he further went on to say:

> Anyone who has experienced the miseries of peak congestion on even the most modern 12-lane super highway will recognize that road transportation is incapable of providing adequately for all the needs of the travelling public.

• 1655

An hon. Member: Mr. Chairman, on a point of order may we ask Mr. Marshall to identify the document he is reading from?

Mr. Marshall: The senior official is Mr. J. A. McDonald, Vice-President, Production. He told this last fall to a meeting of the Atlantic Professional Engineers in St. Andrews, New Brunswick.

The Chairman: From what paper is it?

An hon. Member: It actually came from the CN Topics.

Mr. Vaughan: It is possible too that Mr. McDonald made a speech.

Mr. Marshall: It just makes me wonder, in spite of the number of people that are travelling by bus there still must be a need for trains because there are a certain number of people who are not using the bus and they must have to use the train. It is the same in every province, so why should the discrimination be in the Province of Newfoundland?

Mr. Macdougall: I do not think of this in terms of discrimination. I recognize the fact that people say that this is the elimination of the whole passenger train service in the province and that is true, but it was not designed to eliminate the passenger train service in the province. It was just designed to eliminate one passenger run which it was decided at that time should be put before the Canadian Transport Commission.

I would think that probably others will be put before the Canadian Transport Commission that will eliminate the passenger service in other provinces at some particular time. I do not know when and cannot give you the details but I do not think it is ever a thought in our minds that we are eliminating a service in a province or that there is any particular

[*Interpretation*]

tez, j'aimerais vous lire un article qui a paru dans un journal de Terre-Neuve. Selon un fonctionnaire supérieur du National-Canadien, le meilleur moyen de transport pour des trajets de moyenne durée, soit entre 125 et 750 milles, c'est le train, malgré le confort de l'automobile et la vitesse de l'avion. Il pousuit en disant:

> Tous ceux qui ont dû subir l'encombrement des grandes routes, même celles qui comptent douze voies, admettent volontiers que le transport routier ne suffit pas à tous les besoins du public voyageur.

Une voix: Le Règlement, Monsieur le président. Monsieur Marshall pourrait-il identifier le document qu'il cite?

M. Marshall: Il s'agit du vice-président de la production. M. J. G. McDonald qui a tenu ces propos, l'automne dernier, lors d'une réunion des ingénieurs professionnels des provinces de l'Atlantique, tenue à St. Andrews (N.-B.).

Le président: Dans quel journal?

Une voix: Du «CN Topics».

M. Vaughan: Il se peut aussi que monsieur McDonald n'ait prononcé qu'un discours, tout simplement.

M. Marshall: Ce qui me rend perplexe, malgré le nombre de personnes qui voyagent en autobus, il doit toujours y avoir un besoin de trains, car il y en a tout de même un certain nombre qui ne prennent pas l'autobus, donc, qui doivent prendre le train. C'est la même chose dans toutes les provinces. Alors, pourquoi faire une distinction injuste dans le cas de Terre-Neuve?

M. Macdougall: Je ne crois pas qu'il s'agisse vraiment d'une distinction injuste. Bien sûr, d'aucuns prétendent qu'on abolit entièrement le service-voyageurs dans la province; c'est vrai, mais on ne l'a pas fait à dessein. Il s'agissait simplement d'abolir le service sur un seul parcours, mais auparavant de saisir la Commission canadienne des transports de la question.

J'imagine qu'on soumettra d'autres propositions du genre à la Commission, avec le résultat que le service-voyageurs disparaîtra dans d'autres provinces. Je ne sais pas quand et ne saurais vous donner les détails, mais je ne crois pas que nous ayions jamais songé à éliminer pareil service dans une province, ni que nous ayions le mérite d'avoir maintenu

[*Texte*]

merit in considering that you must maintain it because it is in a province. Our view is that we could give what we consider to be an improved service, better service to the people who are using this service in Newfoundland and that we can do it and save $1 million a year—$900,000.

Mr. Marshall: Mr. Macdougall, you do not agree with this confrere of yours?

Mr. Macdougall: I did not quite get the whole thing as you were reading it there so I am not going to say whether I agree or do not agree but I know Mr. McDonald and he makes very thoughtful and reasonable suggestions. I do not have any reason to think that he would say something that is improper or untrue if he is quoted properly.

Mr. Marshall: I was interested in your disclosures on the movement of traffic from North Sydney to Port aux Basques. You must be as well aware as I of the very many complaints from chambers of commerce right across the west coast about the tie-ups of traffic in Port aux Basques, the losses, the thefts. Is this eliminated now by the disclosure you made with the...

Mr. Macdougall: I would not want to have you come back in two years and face me with the fact that I say now that it is eliminated. But I can tell you that right at this moment, when this is usually one of the most difficult times in getting traffic across the Gulf and there is a big backlog of hundreds of cars at North Sydney of traffic going to Newfoundland, today there is no such backlog. Everything is current between North Sydney and Newfoundland today and this is basically due to the advent of the car ferries and the fact that we have had, as yet, no serious complications of ice in the Gulf.

In former years when we have had serious problems with ice, we have had to get into this breaking bulk business of taking the stuff out, putting it in chartered vessels, taking it across and so on, and doing it perhaps at Mulgrave or some other port —Halifax. But so far this year we have not been faced with that. The car ferries have operated well and we have a current situation.

I do not think there are those complaints today. There were a couple of years ago but I do not think there are today. It is much better. It will be better again because we have not reached a point where I could say it is perfect. I know it is not but we are working on management problems, we are working on physical handling of commodity problems and there is more to be done yet by far but it is

[*Interprétation*]

un service parce qu'il se trouvait déjà dans une province. Ce que nous voulions, c'est de fournir un meilleur service aux habitants de Terre-Neuve, et si nous pouvions le faire tout en épargnant un million de dollars par année, plus précisément $900,000...

M. Marshall: Monsieur Macdougall, vous n'êtes pas d'accord avec votre collègue?

M. Macdougall: Je n'ai pas tout à fait saisi ce que vous avez lu, alors je ne puis pas dire si je suis d'accord ou non, mais je sais que monsieur McDonald et lui expriment toujours des opinions raisonnables, réfléchies. Alors, je n'ai aucune raison de croire qu'il dirait quelque chose qui est faux ou inconvenable, s'il a été cité correctement.

M. Marshall: J'ai écouté avec attention vos propos au sujet de la circulation entre North Sydney et Port-aux-Basques. Vous devez savoir autant que moi que les chambres de commerce sur la côte ouest ont formulé de nombreuses plaintes au sujet des embouteillages, des pertes, des vols à Port-aux-Basques. Les a-t-on éliminés, depuis que...

M. Macdougall: Je ne voudrais pas que vous me rappeliez dans deux ans que j'ai dit cela. Toutefois, je peux vous affirmer qu'à ce moment, l'une des périodes les plus difficiles pour la circulation de part et d'autre du golfe, il y avait jadis des centaines de voitures qui faisaient la queue à North Sydney pour se rendre à Terre-Neuve, mais aujourd'hui, il n'y en a pas. Tout va bien, à l'heure actuelle, entre North Sydney et Terre-Neuve, grâce surtout aux nouveaux transbordeurs de véhicules et à l'absence de conditions de glace défavorables dans le golfe.

Dans le passé, quand les glaces ont posé de graves difficultés, il a fallu faire le tri des marchandises en vrac, les charger à bord de bâtiments nolisés et les faire traverser le golfe soit à Mulgrave, soit à Halifax. Jusqu'ici, cette année, nous n'avons pas éprouvé de telles difficultés. Les transbordeurs de véhicules fonctionnent bien, sans aucun retard.

On n'entend plus de plaintes aujourd'hui. On en a formulé, il y a quelques années, mais ce n'est plus le cas aujourd'hui, je pense. Tout va beaucoup mieux. Il y a encore moyen d'améliorer la situation, car nous ne pouvons pas dire encore que tout est parfait. Je sais que ce ne l'est pas, mais nous essayons de résoudre certains problèmes administratifs, d'améliorer les conditions de manipulation des

[*Text*]

much, much better than it used to be and right at the moment, principally of weather, we are in a good position.

Mr. Marshall: I just have one other question, Mr. Chairman, about the newsprint movement and logging from Bowaters Newfoundland Limited and Price (Newfoundland) Pulp and Paper Limited.

Mr. Macdougall: Yes.

Mr. Marshall: They have their own ships, naturally, but it appears that they would use CNR a lot more if the rates were right.

Mr. Macdougall: We are presently handling newsprint from Bowaters and Prince Brothers to the mainland by rail now.

Mr. Marshall: A good portion of their production?

Mr. Macdougall: A fairly good proportion, yes. They are quite interested in it because what happens is that they avoid the storage of paper in Newfoundland and then the storage in the United States somewhere if they can get a flow going on a current basis. They can be producing it at their customer's plant as it is produced from mainland mills on a current basis. We are very much interested in this because it is good traffic and also because the preponderance of movement to Newfoundland is into Newfoundland and this is traffic coming out of Newfoundland. We are working very closely with them to develop this and I hope it will become a really substantial movement.

Mr. Marshall: But they seem to have a problem when they are shipping out of Canada and into the United States. Are you able to handle that?

Mr. Macdougall: I do not know of any problems we are having with it at the moment other than just the normal ones of getting a new service set up. The test cars we moved down went through beautifully. There is no problem.

Mr. Marshall: Thank you, Mr. Chairman.

The Chairman: Mr. Rose.

Mr. Rose: Mr. Chairman. A number of the things I was going to bring up have already been answered. Nevertheless, I have a couple of comments and a few questions. Perhaps I could ask long questions and receive short

[*Interpretation*]

denrées. Il y a encore beaucoup de progrès à faire, c'est vrai, mais c'est beaucoup mieux que jadis; à l'heure actuelle, d'ailleurs, nous sommes favorisés, surtout par le climat.

M. Marshall: Monsieur le président, une dernière question au sujet du transport du bois d'œuvre et du papier journal à partir des usines de la Bowaters Newfoundland Limited et de la Price (Newfoundland) Pulp and Paper Limited.

M. Macdougall: Oui.

M. Marshall: Ces sociétés sont leurs propres navires, évidemment, mais il me semble qu'ils auraient recours aux équipements du National-Canadien si les taux étaient meilleurs.

M. Macdougall: A l'heure actuelle, nous transportons à la terre ferme, par voie ferrée, le papier journal de la Bowaters et de la Price Brothers.

M. Marshall: Dans une grande mesure?

M. Macdougall: Dans une assez grande mesure, oui. Ce qui les intéresse, c'est de ne pas avoir à entreposer le papier à Terre-Neuve, puis aux États-Unis, si elles peuvent en assurer la distribution constante. Ainsi, elles peuvent maintenir la production aussi bien dans ces usines qu'à leurs établissements sur la terre ferme. Nous nous intéressons beaucoup à cette question, car ce sont d'excellents clients pour nous, d'autant plus que, contrairement à la plupart des cas, il s'agit de marchandises en provenance de Terre-Neuve. Nous collaborons étroitement avec ces sociétés, afin d'intensifier ce trafic.

M. Marshall: Elles semblent aussi éprouver des problèmes en ce qui concerne les expéditions vers les États-Unis. Pourriez-vous y voir?

M. Macdougall: Je ne suis pas au courant de tels problèmes, sauf ceux qui accompagnent généralement la mise en place d'un nouveau service. Le transport des wagons d'essai s'est déroulé sans heurts.

M. Marshall: Merci, monsieur le président.

Le président: Monsieur Rose.

M. Rose: Monsieur le président, on a déjà répondu à une partie de mes questions, mais j'aurais quelques commentaires à faire et quelques questions à poser. Peut-être pourrai-je poser des longues questions et obtenir

[*Texte*]

answers, and then we could get on with this a little faster because I believe there are some other members from the area we are considering who want to ask questions as well. We were treated to the genial company of Mr. Duncan and Mr. Mitchell all during our trip through the Maritimes, and when you presented what I think is in the main expert and philosophical brief here this morning, I expected some kind of refutation of a number of charges that had been made, specific ones, and these two gentlemen took notes the whole trip.

Rather than having to go through all this material that we have done today, which I think is in a sense repetitive, I would like your comments on that and also I would like your comments on the fact that earlier, I believe, Mr. MacDougall said he had some background notes and things to present to this Committee. As far as I know we have not heard any of them. Are they here?

Mr. Vaughan: Yes, they are here, and we were going to table these. I guess as the morning wore on I forgot to do this. We were going to pass these around. It really is an amplification of that summary.

Mr. Rose: I wonder if you would perhaps comment on the question that I asked previously to that one.

Mr. Vaughan: You mean about the general...

Mr. Rose: These gentlemen were with us the whole trip. There were certain charges made in these briefs and we have heard about them. These gentlemen made considerable notes. I would have liked to have had a table reflecting these charges and the CN's position on each of them, rather than having to drag it out of you gentlemen now.

Mr. Macdougall: Well, I can make a comment on that. I did not think very much of that idea. I thought of it, and I thought this Committee would be more interested in hearing our views as to what we think should happen with the future of transportation in Atlantic Canada, how we could improve it, how we could make it better, how our industry could prosper and grow, rather than listening to a catalogue of refuting claims, many of which—and I have read them—I did not think were even worth looking at.

It is very easy to make charges. Some of them I thought had some substance, but I must confess that many of them, I thought,

[*Interprétation*]

de très brèves réponses. Ensuite, nous pourrions procéder un peu plus rapidement parce que je pense qu'il y a d'autres députés de la région qui songeaient aussi à poser des questions. Nous avons eu la compagnie géniale de M. Duncan et de M. Mitchell tout au long du voyage dans les Maritimes et lorsque vous avez présenté ce que je crois être un exposé expert et philosophique ce matin, je m'attendais à ce qu'on refute un certain nombre d'accusations qui avaient été portées d'une façon bien précise et ces deux messieurs ont pris des notes au long du voyage.

Plutôt que de parcourir toute cette documentation que nous avons faite aujourd'hui, qui en ce sens se trouvent à faire répétition, je voudrais avoir vos commentaires sur cela et aussi sur le fait que, plutôt, je crois, M. Macdougall a dit qu'il avait des notes fondamentales et des documents qu'il pourrait présenter à ce Comité. A ma connaissance, nous n'avons encore rien entendu. Est-ce qu'ils sont ici?

M. Vaughan: Oui, ils y sont, et nous allons les déposer. J'ai oublié de le faire ce matin. Nous devions les distribuer. Il s'agit vraiment d'une amplification du sommaire.

M. Rose: Pourriez-vous faire un commentaire sur la question que j'ai posée plus tôt sur ce sommaire?

M. Vaughan: Au sujet de l'ensemble...

M. Rose: Ces deux messieurs nous ont accompagnés tout au long du voyage. Ces mémoires portaient des accusations et nous avons entendus parlé d'eux. Ces deux messieurs ont pris beaucoup de notes. J'aurais bien aimé avoir un tableau reflétant ces accusations et la ligne de conduite du National-Canadien en face de chacune de ces accusations plutôt que d'avoir à vous tirer les vers du nez maintenant, messieurs.

M. Macdougall: Je peux faire un commentaire là-dessus. Je n'ai pas beaucoup songé à cette idée. J'y ai pensé et j'ai pensé que ce Comité serait plus intéressé à entendre notre point de vue sur ce qui devrait arriver à l'avenir du transport dans le Canada atlantique, sur la façon de l'améliorer, sur la façon dont notre industrie pourrait prospérer et croître plutôt qu'entendre un catalogue de réfutations, dont une bonne partie, je les ai lues, ne valaient même pas la peine d'être examinées.

C'est très facile de porter des accusations. Certaines étaient assez substantielles, mais je dois avouer qu'un bon nombre d'entre elles

[*Text*]

had no substance at all. And I did not really think that you wanted me to come here and to deal in that way. I thought you wanted to hear our views on a positive and constructive way as to what we think should happen in Atlantic Canada.

Mr. Rose: Sir, I did not want to listen to them either. I wanted to read them. This was the reason that I raised it.

Mr. Macdougall: There are many of them, I think, on which I would just say I have no comment to make. I do not think there is any substance there.

Mr. Rose: All right. I do not know who to direct this to, Mr. Chairman, but I would like to know if the CNR has any interprovincial truck lines operating in the Maritimes, in other words, coming from central Canada into the Maritimes.

Mr. Macdougall: Yes. Eastern Transport Limited.

Mr. Vaughan: Not from central Canada.

Mr. Rose: That is intraprovincial. I am speaking of interprovincial.

Mr. Vaughan: No, we do not have any interprovincial truck lines from central Canada into Atlantic Canada.

Mr. Rose: May I be permitted to ask why?

Mr. Macdougall: Well, the basic reason is that we want to get the best value we can out of our mainline rail service, and our basic policy is that we handle traffic to and from central Canada by rail, and then we handle it on the short hauls from railheads by truck.

• 1705

Mr. Rose: We heard that competition would do a great deal to lower the rates, and you said yourself, sir, or one of you gentlemen did, that you did your best to meet various competitive rates. The Nova Scotia public utilities commission refused to grant central Canadian truck lines into the Maritimes. Would this decision also apply to your firm?

Mr. Macdougall: I am afraid I missed something there. You said the Nova Scotia...

[*Interpretation*]

n'étaient pas du tout motivées. Je ne croyais pas vraiment que vous vouliez procéder de cette façon. Je croyais que vous vouliez connaître notre point de vue que nous voulons présenter de façon positive et constructive sur ce qui devrait arriver dans le Canada atlantique.

M. Rose: Monsieur, je ne voulais pas les entendre non plus Je voulais les lire. C'est la raison pour laquelle j'ai posé la question.

M. Macdougall: Sur beaucoup parmi elles, je pense, je dirais simplement que je n'ai aucun commentaires à faire. Je ne crois pas qu'elles soient du tout motivées.

M. Rose: D'accord. Je ne sais pas à qui je dois poser ma question monsieur le président, mais je voudrais savoir. Est-ce que le Canadien-National a une ligne interprovinciale de camions opérant dans les Maritimes en d'autres termes, venant du Canada central vers les Maritimes?

M. Macdougall: Oui, c'est la Eastern Transport Limited.

M. Vaughan: Non pas du Canada central.

M. Rose: C'est interprovincial, je parle d'interprovincial.

M. Vaughan: Non, nous n'avons pas de ligne de camionnage interprovinciale du Canada central vers les provinces atlantiques.

M. Rose: Alors, est-ce que je peux vous demander pourquoi?

M. Macdougall: Essentiellement, c'est que nous voulons avoir la meilleure valeur possible de notre service ferroviaire de la ligne principale et notre principe fondamental est d'assurer un service ferroviaire pour le trafic entrant et sortant du Canada central, et alors, pour les courtes distances nous le faisons par camion.

M. Rose: Nous avons entendus dire que la concurrence ferait beaucoup pour baisser les taux et vous avez dit vous-mêmes monsieur, ou un autre le fait que vous aviez fait de votre mieux pour avoir divers tarifs concurrentiels. La Commission des services publics de la Nouvelle-Écosse refuse d'accorder un permis aux entreprises de camionnage du Canada central pour venir dans les Maritimes. Cette décision s'applique également à votre entreprise.

M. Macdougall: Je n'ai pas compris tout à fait. Vous avez dit ..

[*Texte*]

Mr. Rose: It was my information that the Nova Scotia public utilities commission refused a request by two central Canadian truck lines to operate from central Canada into the Maritimes. We are a Committee dealing with transportation problems. If internally this sort of thing is going on within the Atlantic Provinces, then apparently, I think, we are stuck with the position we hold at the moment.

Mr. Macdougall: I am not aware of that information. Maybe Mr. Duncan is.

Mr. Rose: Well, the position is that there is no competition as far as trucking firms to the railways from central Canada into the Maritimes.

Mr. J. M. Duncan (Assistant General Counsel, Montreal, Canadian National Railways): There are trucking companies into the Maritimes from central Canada. I think all that Mr. Vaughan intended to set out to the Committee was that Canadian National Railways does not operate one. I know of one that does operate from central Canada into the Atlantic Provinces. Day and Ross Ltd. is another classic example. There are, I think, probably four or five interprovincial carriers from central Canada to the Maritimes.

Mr. Rose: I just wonder if the Atlantic Provinces are in a position of wanting competition but really not wanting it.

Mr. Duncan: You are perfectly right. I can think of at least one interprovincial carrier which was denied the right to operate from central Canada into Nova Scotia. I am not sure what the result of the application which was made to New Brunswick was, but certainly it was turned down in Nova Scotia.

Mr. Rose: I would like to go on to something else. I am attracted to the concept of selective subsidies because we heard representations before the one we heard from you this morning, and I am really only paraphasing, or what I felt you implied, that selective subsidies are the answer and a blanket across-the-board subsidy is often wasted. In your view it is a waste of money. I am interested in how this might apply, the method of it, if you as the Vice President of the CNR in that region has anything to offer in this regard.

[*Interprétation*]

M. Rose: J'ai dit que la Commission des services de la Nouvelle-Écosse refuse d'accéder à la demande formulée par deux entreprises de camionnage du Canada central, de faire le transport du Canada central vers les Maritimes. Nous sommes un Comité qui étudie la question de transport et ses problèmes. Si cela se produit dans les provinces atlantiques, alors c'est évident, je pense que nous sommes pris avec la situation dans laquelle nous nous trouvons maintenant.

M. Macdougall: Je ne suis pas au courant de ce renseignement. M. Duncan l'est peut-être?

M. Rose: C'est qu'il n'y a pas de concurrence pour ce qui est des camions, pour les chemins de fer à partir du Canada central vers les Maritimes.

M. J. M. Duncan (Conseiller général adjoint, Montréal, Chemins de fer Nationaux du Canada): Il y a des entreprises de transport qui viennent du Canada central vers les Maritimes. Je pense que tout ce que M. Vaughan avait l'intention de dire, c'est que le National Canadien n'en exploite pas une. J'en connais une qui assure un tel transport du Canada central vers les Maritimes. *Day and Ross Ltd* est un autre exemple classique. Il y a quatre ou cinq transporteurs interprovinciaux du Canada central vers les Maritimes.

M. Rose: Je me demande si les provinces atlantiques sont en mesure de vouloir la concurrence sans la vouloir vraiment.

M. Duncan: Vous avez parfaitement raison. Oui, je peux songer au moins à un transporteur interprovincial qui s'est vu refuser le droit d'exploiter un tel service à partir du Canada central vers la Nouvelle-Écosse. Je ne sais pas quels furent les résultats de cette demande formulée au Nouveau-Brunswick, mais ce fut rejeté en Nouvelle-Écosse.

M. Rose: Je voudrais passer à un autre sujet. Je suis attiré par le principe des subventions choisies, nous avons entendu des instances avant celle que vous nous avez présentée ce matin, mais, je ne fais que paraphraser, ou du moins, sur ce que je croyais que vous laissiez entendre, que les subventions choisies sont la réponse et une subvention dans l'ensemble est souvent gaspillée. A votre avis, c'est un gaspillage. Maintenant, alors, je voudrais savoir comment cela pourrait s'appliquer, en connaître la méthode, si vous, qui êtes le vice-président du National-Canadien dans cette région, avez une observation à faire à cet égard?

[*Text*]

Mr. MacDougall: Yes. As I said, when you give a blanket subsidy you give everybody a percentage of the reduction in their freight rate. You are lumping together the man who in order to get into his market has to absorb transportation charges varying anywhere from one-quarter of one per cent of his delivered price up to maybe 30 or 40 per cent of his delivered price. So our view is, you have the two extremities here and possibly at neither end of the extremity is there really a good valid reason for giving a subsidy.

In the case of the man for whom, say, half of one per cent or one per cent or perhaps even up to five per cent of his delivered price is transportation, giving him a 30 per cent reduction in his transportation is not going to decide the question of whether he is going to be able to market or not market.

Mr. Rose: Thirty per cent of five per cent.

Mr. Macdougall: Yes. Thirty per cent of five per cent of his price. One case that I know of, we had a series of questions asked about an increase that we made in the rates for luggage, for suitcases. We made a substantial increase in our piggyback rates to this company and we had representations that this was going to put them out of business. But when you looked at what actually happened to the suitcase, a suitcase that would sell for $20, we were increasing the freight charges from 50c to 65c on the suitcase. Now it seemed a little incongrous to think that this action of ours, putting perhaps 20c or 25c on the cost of a suitcase for transportation, was going to be the straw that would break the camel's back.

There always is the case, I suppose, where you have a person who is balanced on such a fine edge that anything would put him over the top, but this was again in the low category of a small percentage of the delivery price of the goods being the transportation charge. If you took away the subsidy from those people and used that money to give more to some people who are in a more critical position, with whom perhaps 20 per cent of their delivered price is transportation charge—he has got a good flourishing industry but he really is not getting into his market. And if you gave him some real help, perhaps he would expand or tripple the size of his industry. He would really get into the market and really get a volume going that would give him reduced cost due to volume production

[*Interpretation*]

M. Macdougall: Oui. Comme je l'ai dit, lorsque vous donnez une subvention d'ensemble, vous donnez à tout le monde un pourcentage de la diminution dans leurs taux de transport marchandises. Vous considérez en bloc l'homme qui, pour en arriver à son marché, doit observer les frais de transport, disons, variant partant d'un quart pour cent de son prix de livraison à 30 ou 40 pour cent de son prix de livraison. Donc, de notre avis, c'est que vous couvrez les deux extrémités ici, et peut-être ni à une extrémité, ni à l'autre, y a-t-il une raison valable pour donner une subvention.

Dans le cas de l'homme pour qui un demi pour cent ou un pour cent ou même jusqu'à 5 pour cent de son prix de livraison, vient du transport alors, lui donnent 30 pour cent de diminution pour ses transports, cela ne va pas décider s'il sera en mesure ou non de commercialiser.

M. Rose: Trente pour cent de cinq pour cent.

M. Macdougall: Oui. Trente pour cent de cinq pour cent de son prix. Ainsi il y a eu un exemple où on se demandait ce qu'il en était quant à une augmentation que nous avons faite dans les taux, pour les valises. Nous avons augmenté sensiblement nos tarifs railroute à cette société, mais on nous a présenté des observations portant que nous les ferions se retirer des affaires. Mais lorsque vous voyez ce qui s'est produit, pour le cas de la valise, cette valise se vendait pour vingt dollars. Nous augmentions les frais de transport de 50 cents à 65 cents, pour la valise. Cela semble un peu incongru que de telles dispositions de notre part, soit d'exiger 20 ou 25 cents de plus pour le transport de ces valises, pourrait détruire cette société.

C'est toujours le cas, j'imagine, de la personne en équilibre sur un bord très fragile qu'un rien pourrait faire tomber. Mais il s'agit d'une proportion inférieure d'un petit pourcentage du prix de livraison des marchandises qui sont les frais de transport. Mais, si nous enlèvions ces subventions à ces personnes et que nous utilisions cet argent pour donner plus à des personnes qui se trouvent dans des situations plus critiques, et pour lesquelles 20 p. 100 de leur prix de livraison est le coût du transport, et il a une excellente industrie, mais il ne parvient pas vraiment dans son marché. Alors, si vous lui donnez une aide positive, il pourrait peut-àtre doubler ou tripler son entreprise. Il entrerait vraiment sur le marché et obtiendrait un volume d'affaires qui lui donnerait un coût ré-

[*Texte*]

and volume shipment and various other things. If you can be selective that way, that is the idea.

Mr. Rose: There was a suggestion I believe of one man who happens to be employed by Hawker Siddeley Canada Ltd. He suggested that firms that are contemplating applying for such selective subsidies should have on their payrolls or staffs a transportation consultant. I believe you made a similar point, saying that there is really not very much known about transportation and the various problems. We also learned that there was not one university course in Canada dealing with this particular specialty, which it is now.

Mr. Macdougall: I think it is probably basically true that as a science or an art, which ever it is, we do not have anything like the number of people available in Canada to advise companies or shippers that we would like to have. We do not have the quantities that we have of accountants, lawyers, doctors and people like that. But what I was suggesting was that this new committee that the premiers of the Atlantic Provinces have suggested, this new group, that they should have a capability of providing this type of assistance to industries such as Hawker Siddeley or anybody else. Perhaps Hawker Siddeley could provide their own; they are a fairly substantial group, but smaller industries perhaps cannot. This organization might be able to provide this type of assistance for them.

On the selectivity point, if this Commission is going to do the selecting it is going to be a selective process by Atlantic Provinces' people for their own industry. It is not going to be somebody in Ottawa who is going to do it or somebody in the United States or somebody off somewhere else, it is going to be the people of the Atlantic Provinces, their own organization, that is going to do the selecting and deciding which industries that they want to support, very much in the same way that they do now, deciding whether they want Volvo to go into Nova Scotia and support them, or some other company to come in and put in a plant in New Brunswick and support them with assistance. They would support their own industries where they think the support will do the most good; put the money where it will do the best work.

Mr. Rose: In other words, sir, you would avoid the connotations of the word "subsidy" and perhaps choose a more acceptable one such as "incentives".

[*Interprétation*]

duit en raison de la production et de l'expédition en volume, et beaucoup d'autres choses. Si vous pouvez être sélectifs de cette façon, c'est ce qu'il faut.

M. Rose: Je pense qu'un homme à l'emploi de *Hawker Siddeley,* a suggéré que les entreprises qui songeraient à demander ces subventions sélectives, devraient avoir à leur service un expert-consil en transport. Je crois que vous avez fait une remarque semblable, disant qu'on ne savait pas vraiment ce qu'il en était des transports et des problèmes qui s'y rapportent. Nous avons aussi appris qu'il y avait un cours donné dans une des universités au Canada pour former les gens dans ces spécialités car c'est une spécialité.

M. Macdougall: Je pense qu'il est essentiellement vrai que, à titre de science ou d'art, ou enfin, quoiqu'il en soit, nous n'avons pas vraiment le nombre de spécialistes disponibles au Canada, pour conseiller les sociétés ou les expéditeurs, que nous aimerions avoir. Nous n'avons pas le nombre que nous avons en comptables, avocats, médecins, et autres. Ce que je dirais, c'est que ce nouveau comité, que les premiers ministres des provinces atlantiques ont proposé, ce nouveau groupe devrait pouvoir avoir la possibilité de fournir une telle aide aux industries telles que *Hawker Siddeley* ou autres. Peut-être que *Hawker Siddeley* pourrait fournir ses propres services; c'est un groupe assez important, mais de plus petites entreprises ne le peuvent peut-être pas. Ce comité pourrait leur fournir cette aide.

Du point de vue de la sélectivité, si la Commission fait le choix, il y aura un processus de sélection qui se fera par les provinces de l'Atlantique pour leurs propres industries. Ce ne sera pas quelqu'un à Ottawa ou aux États-Unis ou quelqu'un de très éloigné, mais ce seront des gens des provinces de l'Atlantique, leur propre organisation, qui décidera quelles seront les industries qu'ils désirent appuyer, tout comme ils le font maintenant. Ils décident s'ils veulent que *Volvo* s'établisse en Nouvelle-Écosse ou qu'une autre société puisse s'établir au Nouveau-Brunswick et s'ils peuvent les appuyer, leur fournir de l'aide. Ils appuient leurs propres industries là où cela fera le plus de bien; investissent l'argent où il donnera un rendement plus efficace.

M. Rose: En d'autres mots, donc, vous éviteriez les connotations du mot «subside» et vous choisiriez, un terme plus acceptable, tel «encouragement».

[*Text*]

Mr. Macdougall: Or "assistance", or something else.

Mr. Rose: Would you clear up something for me because you confuse me—I know I confuse a lot of people too. You mentioned something about the subsidy adversely affecting Maritime manufacturers on those things which they imported.

Mr. Macdougall: Yes; this is the freeze that we talked about, not the subsidy. This is the freight rate freeze which has frozen the rates at a certain level. That has meant that normally we would have increased the rates on certain products going into the Maritimes which are competitive with some things produced in the Maritimes, but we have not been able to increase those. Therefore, the upper Canadian manufacturer has been able to get into the Maritime market at a frozen rate.

Mr. Rose: When we were in Newfoundland we were confronted with the problem of the rates charged on the return of cars coming from Corner Brook to St. John's. Are you also studying this one? An industry was represented at the hearings by a Mr. Lundrigan—no relation to my colleague behind the cigar at the end of the table there—and he made the point that they shipped some products such as gypsum or something of that nature to St. John's. The cars went back empty. They could use them for other return products except that they had negotiated an agreed rate for west-east but the rates were so unfavourable on the return run that they were not doing this. Are you looking into this matter, or has it been raised?

Mr. Macdougall: I do not have any knowledge of that specific problem.

Mr. Rose: All right. I have one or two questions, Mr. Chairman, and I suggested earlier today how we might avoid the time we spent on some of the other matters today, but nevertheless I will not talk about that. I saw a TV program recently dealing with the container concept and there was a good deal of discussion of the single rate as it applied to distance rather than weight or type of cargo or anything else. What is the CN's position on this matter? It seems to me that this rate business is a patchwork thing. We are always having to juggle around with it. It is very complicated. Nobody can understand it and it employs a lot of lawyers.

• 1715

Mr. Macdougall: You may not think you have confused, me but I think you have!

[*Interpretation*]

M. Macdougall: Ou «aide», ou autre chose.

M. Rose: Voulez-vous préciser parce que je suis un peu confus, je sais que je confonds aussi bien des gens. Mais vous avez parlé de subventions affectant de façon contraire les fabriquants des Maritimes ou ces choses qu'ils importaient.

M. Macdougall: Oui, nous parlions du gel, non pas de subventions. C'est le gel qui a maintenu les taux à un certain niveau. Habituellement, nous aurions augmenté les taux pour certains produits acheminés vers les Maritimes qui sont en concurrence avec des produits fabriqués dans les Maritimes, mais nous n'avons pu le faire. Le fabricant du haut Canada a donc pu pénétrer dans les Maritimes à un taux gelé.

M. Rose: Lorsque nous étions à Terre-Neuve, nous avons été saisis du problème du taux prélevé pour le retour des wagons revenant de Corner Brook à Saint-Jean. Est-ce que vous étudiez aussi ce problème? Une industrie était représentée par un M. Lundrigan. Aucun lien de parenté avec mon collègue qui se cache derrière son cigare à l'autre bout de la table, mais enfin voici ce qu'il a dit. Ils expédient certains produits, tels le gypse ou autre produit du genre, à Saint-Jean. Les wagons reviennent vides. Ils pourraient les utiliser pour d'autres produits, mais ils avaient convenu d'un taux pour le transport ouest-est, mais les taux étaient si peu favorables pour le retour qu'ils ne faisaient pas. Est-ce que vous étudiez la question?

M. Macdougall: Nous ne sommes pas au courant de ce problème particulier.

M. Rose: J'aurais une ou deux questions à poser encore, et j'ai dit plus tôt aujourd'hui comment nous pouvions éviter tout ce temps que nous avons passé sur certaines des autres questions, mais je n'en parlerai pas, monsieur le président. J'ai vu tout récemment un programme de télévision sur le principe des cadres et on a beaucoup parlé du taux simple, tel qu'il s'applique à la distance plutôt qu'au cargo ou au poids. Quelle est la ligne de conduite du National-Canadien? C'est une affaire de rapiéçage. Nous devons toujours jouer autour. C'est très compliqué. Personne n'y comprend rien, il faut avoir recours aux avocats.

M. Macdougall: Vous ne pensez peut-être pas m'avoir embrouillé, mais vous l'avez fait.

[*Texte*]

Mr. Rose: A member of some rail line, neither CP or CN, suggested that what containers would lead us to would be a single rate, regardless of weight or type of cargo, based only on distance.

Mr. Macdougall: Perhaps he was talking about the single rate between some point in England and some point in Canada or United States, that is, the water and the rail and transportation charges through the terminals, and so on.

Mr. Vaughan: No; what he is talking about I think is that for the container, regardless of the commodity, whether it is diamonds or sawdust, the rate is the same.

Mr. Rose: Right.

Mr. Vaughan: In other words, a single rate concept per container rather than a commodity.

Mr. Macdougall: Oh, yes; we do not take account of what the commodity is in the container particularly, or each individual item that may be in there. If we get a container load of traffic we have a tariff that is a "container-all types of commodities," so they can put wire hoops or chairs of whatever they like in it and we take it.

Mr. Rose: I have two more questions. Do you foresee the concept of a traffic co-ordinator for the Maritimes under the premiers? You touched on this a little earlier.

Mr. Macdougall: Yes, they proposed this. They propose a committee or a commission, an organization which would be set up to co-ordinate the use to be made of the Maritime Freight Rates Act money. I do not envisage seeing some sort of a czar for the Maritimes who is going to say how you will do things; I do not think that would be good.

Mr. Rose: We have one there anyway. I believe that people here from Western Canada would have appreciated a czar of some kind in the grain situation. Anyway, thank you for your indulgence and I will yield to someone else.

The Chairman: Gentlemen, I still have five more speakers. Mr. Trudel?

Mr. Trudel: I will try to be as brief as I possibly can. The first question is related to a submission which was made to us in St. John's. It was a very touching presentation. I would like to ask Mr. Macdougall: When is

[*Interprétation*]

M. Rose: Un membre d'une ligne ferroviaire, soit CN ou CP, a suggéré que les cadres peu à peu nous amèneraient à un taux simple, quel que soit le poids ou le genre de cargo, fondé simplement sur la distance à parcourir.

M. Macdougall: Peut-être parle-t-il du taux simple entre un point en Angleterre et un point au Canada et aux États-Unis, c'est-à-dire les frais de transport par eau et rail par les terminus, et ainsi de suite.

M. Vaughan: Ce dont il parle, je pense, c'est que pour un cadre que ce soit des diamants ou de la sciure de bois, il n'y a qu'un taux.

M. Rose: C'est juste.

M. Vaughan: En d'autres mots, un seul taux par cadre plutôt que suivant les denrées qu'il contient.

M. Macdougall: On ne tient pas compte de ce qu'est la denrée ou de l'article dans le cadre. Si nous avon des cadres, nous avons un tarif, c'est-à-dire «cadre-toutes denrées», de sorte qu'on peut y mettre quoi que ce soit, des chaises, des cerceaux ou autre chose, et nous le prendrons.

M. Rose: J'ai deux autres questions. Concevez-vous un coordonateur du traffic dans les Maritimes, sous l'autorité des premiers ministres? Vous en avez parlé un peu plus tôt.

M. Macdougall: Oui. Ils proposent un comité ou une commission, un organisme qui serait constitué en vue de coordonner l'utilisation à faire de l'argent prévue en vertu des dispositions de la Loi sur le taux de transport des marchandises dans les Maritimes. Enfin, ce ne sera pas tout à fait un tsar des Maritimes qui vous dira comment faire les choses; je ne pense pas que cela serait bien.

M. Rose: Il y en a un déjà de toute façon. Mais enfin je pense que les gens de l'Ouest du Canada aimeraient bien avoir un tsar pour les céréales. Je vous remercie de votre patience et je cède à quelqu'un d'autre.

Le président: Messieurs, j'ai toujours cinq autres orateurs sur ma liste. Donc, monsieur Trudel?

M. Trudel: Monsieur le président, je serai le plus bref possible. La première question a trait à un mémoire qui nous fut présenté à Saint-Jean. C'était une question délicate qui nous fut présentée. Je voudrais demander à

[*Text*]

the last time you have had a special request to transport a disabled person?

Mr. Macdougall: Mr. Trudel, as I said earlier, I do not have any specific information on that. I asked the general question of our people in Newfoundland and they say that this happens very, very seldom.

Mr. Trudel: You have had no complaints that you can recall within the last six months?

Mr. Macdougall: No.

Mr. Trudel: My next question was touched on by another gentleman—and I do not want to open a full discussion on this—regarding the type of service that you secure in the Maritimes and some of the work that you have done to the rolling stock. You mentioned particularly, I believe, a dining car. Would it be a fair assessment, Mr. Macdougall, to say that to refurbish a dining car would be in the order of $200,000?

Mr. Macdougall: I am not an expert on this. A new dining car, I think, would cost you that amount of money.

Mr. Trudel: Then would I be safe in assuming that $75,000 would be a fair estimate for updating the car?

Mr. Macdougall: It might well be, depending upon what you did to it. It depends on the work done and the cost of the work, but if you had to do a major overhaul of the car it would cost you that easily.

Mr. Trudel: Thank you. I am just trying to relate the value in my mind to the answer you have given regarding the upgrading of your rolling stock, particularly in Newfoundland and in the Atlantic Provinces. That is the reason why I ask these questions.

Another point was raised concerning a roadbed. Do you have different specifications for roadbeds for freight, passenger or mixed trains? Would they require different roadbeds?

• 1720

Mr. Macdougall: Basically our roadbeds are used for all types of traffic, passenger, freight and express. I do not know of any that we have specifically that are used only for passenger. We may have some trackage that is used only for freight because we do not operate passenger services.

[*Interpretation*]

M. Macdougall: Quand, pour la dernière fois, avez-vous été saisi d'une demande spéciale pour faire le transport d'une personne invalide?

M. Macdougall: Monsieur Trudel, comme je l'ai dit plus tôt je n'ai pas de renseignements précis là-dessus. J'ai posé la question générale de nos gens à Terre-Neuve et ils m'ont dit que cela se présente rarement.

M. Trudel: Il n'y a pas eu de griefs qui ont été formulés au cours des six derniers mois?

M. Macdougall: Non.

M. Trudel: Un autre député a déjà parlé de ma prochaine question. Je ne veux pas engager toute une discussion là-dessus, mais enfin pour ce qui est du genre de service que vous assurez dans les Maritimes, et du travail que vous aviez fait au matériel roulant. Vous parliez tout particulièrement, je pense, d'un wagon-restaurant. Est-ce que ce serait une bonne évaluation de la situation, monsieur Macdougall, que pour renouveler un wagon-restaurant, il en coûte $200,000?

M. Macdougall: Je ne suis pas un spécialiste. Un nouveau wagon-restaurant vous coûterait cette somme, je pense.

M. Trudel: Alors, est-ce que j'ai raison d'en conclure que $75,000 serait à peu près la somme requise pour remodeler ce wagon-restaurant?

M. Macdougall: Tout dépend du genre de travail, et du coût du travail, mais un renouvellement complet du wagon peut facilement vous coûter aussi cher que cela.

M. Trudel: J'essaie simplement de faire le lien entre le montant que j'ai en tête et la réponse que vous avez fournie pour la remise à jour de votre matériel roulant, surtout à Terre-Neuve et dans les provinces de l'Atlantique. C'est la raison pour laquelle je vous pose ces questions.

Un autre point a été soulevé quant à l'assiette des rails. Est-ce que vous avez des spécifications différentes d'assiettes, pour le transport des marchandises, des passagers ou pour les trains mixtes?

M. Macdougall: Essentiellement, les assiettes servent à tout genre de traffic, passager, express, message. Je ne crois pas que nous en ayons simplement pour les passagers. Il se peut que nous ayons des voies qui soient utilisées simplement pour le transport des marchandises parce que nous n'avons pas là de service passager.

[*Texte*]

Mr. Trudel: The reason I ask this question, Mr. Macdougall, is because the point was made that there was downgrading. I am reluctant to use this term, but it was used, and I could see no reason why the rail would be adding a special roadbed for a special type of service. That is the reason I raised the point.

During our visit to the Maritimes, on several occasions in the briefs that were presented witnesses mentioned 10 pounds per cubic foot in the weight structure and the LCL rates, and they were not too happy about this. I would like to ask the question, what was the previous arrangement? What were you working from previously?

Mr. Macdougall: The previous arrangement, the 10 pounds per cubic foot, came in when the new less carload or the small package tariff called ETA-100 came into effect at the end of 1967. Prior to that there was no simple cube rule expressed in that same way, but the cube was described in the description of the goods that is contained in the freight classification. If you endeavour to make a comparison, which I have done, the cube rule if it were stated in figures in the old classification would be about 12 as opposed to the 10.

Mr. Trudel: Have you had many complaints in this respect since you instituted this new ruling?

Mr. Macdougall: First of all, I should say that we have had no complaints that I am aware of in the last six to eight months.

Mr. Trudel: My next question, Mr. Chairman, is: Is there any other area in Canada where you service a a narrow gauge rail?

Mr. Vaughan: No, sir.

Mr. Trudel: Is there any being operated by your competitors in any other areas in Canada?

Mr. Vaughan: I do not know of any. There are other railways but whether they are our competitors or not, I am not sure. The White Pass and Yukon is a narrow gauge line; Mr. Turner would know. It is a different gauge even than in Newfoundland.

Mr. Trudel: I have before me, Mr. Chairman, a report that was commissioned in St. John's, Newfoundland, in 1961—Newfoundland Board of Trade—and it had several recommendations regarding the transportation in the Maritimes. Are you aware, Mr. Vaughan, or have you taken cognizance of this report?

[*Interprétation*]

M. Trudel: J'ai posé cette question, monsieur Macdougall, parce qu'on a parlé de négligence quant au service. J'hésite à utiliser cette expression, mais on l'a dit. Je ne vois pourquoi on aurait une assiette spéciale pour un genre spécial de service. C'est la raison pour laquelle je pose la question.

Pendant notre tournée dans les Maritimes, plus d'une fois dans les mémoires présentés des témoins ont parlé de dix livres au pied cube pour ce qui est du poids et des chargements incomplets et ils ne semblaient pas trop heureux. Je voudrais donc savoir quelles étaient les dispositions que vous aviez auparavant.

M. Macdougall: L'arrangement précédent, le 10 livres au pied cube a été introduit lorsque le tarif ETA-100 est entré en vigueur à la fin de 1967. Avant cela, il n'y avait pas de règle précise formulée de cette façon pour le cubage. Le cubage était décrit dans la description des marchandises contenue dans la classification des marchandises. Si vous essayez d'établir une comparaison, ce que j'ai fait, la règle du cubage, si elle était donnée en chiffres, selon l'ancienne classification, serait d'environ 12, comparativement au 10 actuel.

M. Trudel: Est-ce que l'on a formulé de nombreuses plaintes à cet égard depuis que vous avez établi cette nouvelle règle?

M. Macdougall: Tout d'abord, permettez-moi de dire que nous n'avons pas eu de plainte au cours des 6 ou 8 derniers mois.

M. Trudel: Une autre question, monsieur le président. Est-ce qu'il y a d'autres régions du Canada où il y a des voies à faible écartement?

M. Vaughan: Non, monsieur.

M. Trudel: Est-ce que vos concurrents en ont dans d'autres régions du Canada?

M. Vaughan: Pas que je sache. Il y a d'autres compagnies ferroviaires, mais je me demande si ce sont des concurrents. Au Yukon, disons, il y a une voie à faible écartement. Monsieur Turner le saurait sans doute. C'est un écartement différent de celui qu'il y a à Terre-Neuve.

M. Trudel: J'ai ici un rapport qui a été présenté à Saint-Jean (Terre-Neuve), en 1961, par la Chambre de Commerce de Terre-Neuve. On y formule certaines recommandations au sujet du transport dans les Maritimes. Êtes-vous au courant, monsieur Vaughan, ou est-ce que vous avez déjà lu ce rapport?

[*Text*]

Mr. Vaughan: Well, I just can not identify it, but I assure you that we have every report and every brief that has been presented on this subject—economic survey—in the Maritimes, but I do not recognize it at the moment.

Mr. Trudel: It is St. John's and Newfoundland Economic Survey commissioned in 1961 by the Newfoundland Board of Trade. You are not familiar with this report?

Mr. Vaughan: No sir, I am not. That does not mean that nobody in the company is not.

Mr. Trudel: The point was raised regarding empty box cars returning to Port-aux-Basques by the paper companies, but I think this has been answered. I have other questions, Mr. Chairman, but I think I will forego them to give a chance to the other members of the Committee.

Mr. Perrault: Mr. Chairman, I will try to be very brief. Would it be a fair summation to say that an effort was made to maintain the rail passenger service in Newfoundland during the past number of years comparable to the effort made in the other parts of Canada? Would that be a fair statement?

Mr. Macdougall: I think generally that is a fair statement, Mr. Perrault, yes.

Mr. Perrault: I accept Mr. Macdougall's statement of a few minutes ago that there was no deliberate program of down-grading. I accept that, but there is another way of looking at this. I accept that there is no deliberate down-grading. A number of little things that come to mind. Why were the linens removed from the tables in the diners in Newfoundland for the past number of years and replaced by paper place mats, and the same thing not done anywhere else in Canada?

I will just give a list of little things that come to mind. Why, for instance, the stupid little thing on the diner in Newfoundland where you get one little piece of butter and everywhere else in Canada you get four or five or half a dozen. Those are little things, now.

Why do you get a fresh flower in the diner anywhere in Canada that I have been—every time there is a fresh flower on the linen—and you do not get it in Newfoundland? Why did they institute to attract passengers such things as bingo games—a very popular game and I played it on the mainland on the train here and I have won prizes—and why were such things not done in Newfoundland? There are any number of things like that.

[*Interpretation*]

M. Vaughan: Je ne puis ainsi l'identifier. Je puis vous assurer que nous avons tous les rapports et tous les mémoires qui ont été présentés sur le sujet—les enquêtes économiques—dans les provinces Maritimes, mais je ne le reconnais pas en ce moment.

M. Trudel: C'est le relevé économique de St-Jean et de Terre-Neuve, effectué en 1961 par la Chambre de commerce de Terre-Neuve. Vous ne reconnaissez pas ce rapport?

M. Vaughan: Non. Cela ne veut pas dire qu'il n'y a personne au CN qui ne le connaisse.

M. Trudel: On a soulevé une question au sujet des wagons vides qui sont retournés à Port-aux-Basques par les compagnies de papier, mais on a déjà répondu à cette question. J'ai d'autres questions mais je vais maintenant céder la parole aux autres.

M. Perrault: J'essaierai d'être très bref, monsieur le président. Est-ce qu'il serait juste d'en conclure que des efforts qui ont été déployés pour maintenir le service passager à Terre-Neuve au cours des dernières années peuvent ne comparer aux efforts déployés dans les autres régions du Canada? Est-ce juste de faire une telle déclaration?

M. Macdougall: Je dirais que oui, monsieur Perrault.

M. Perrault: J'accepte la déclaration qu'a faite, il y a quelques instants, M. Macdougall lorsqu'il a dit qu'il n'y avait pas de programmes délibérés de dégradation des services. Mais il y a une autre façon d'envisager le problème. Je reconnais qu'il n'y a pas détérioration des services. Il y a certaines petites choses qui nous viennent à l'esprit. Pourquoi a-t-on enlevé le linge de table dans les wagons-restaurants à Terre-Neuve pour le remplacer par des napperons de papier? Cela n'a pas été fait ailleurs au Canada. Pourquoi, par exemple, dans le wagon restaurant à Terre Neuve, a-t-on un simple petit morceau de beurre alors qu'ailleurs vous en avez près d'une demi-douzaine?

Pourquoi a-t-on une fleur fraîche au wagon-restaurant n'importe où au Canada—chaque fois que j'y vais, il y a toujours une fleur fraîche—mais jamais à Terre-Neuve? Pourquoi a-t-on des parties de bingo—jeu très populaire—pour attirer les passagers et j'ai joué et j'ai même gagné des prix? Pourquoi n'avez-vous pas fait cela à Terre-Neuve et des choses du genre?

[*Texte*]

Why, for instance, have the linens in the berths been allowed to become threadbare over the past number of years? I slept in a berth no more than six or eight months ago in Newfoundland and when I woke up I was wearing the sheet around my neck where my head had gone through it. I am not kidding the Committee—I made it my business to check the others and they were littered with patches in the other berths.

An hon. Member: Did you pay for the sheet?

Mr. Perrault: This is not a joke. While there was no deliberate down-grading, there was certainly no comparative up-grading and efforts to encourage passenger business. Now, would you comment on that, Mr. Macdougall? I speak from personal knowledge.

Mr. Macdougall: I accept what you say as your fair comment based on personal knowledge. I cannot give you any refutation of that. I will not attempt to do it; you are making a statement and I am not too sure whether it is right or it is wrong, but I accept that you make it.

Mr. Perrault: Well, I wanted to set the records straight so that the Committee would not get the impression that the Newfoundland passenger service of the CNR is part of this great national service and equally as good. I just wanted to set the record straight lest the Committee be mislead.

Mr. Macdougall: Unfortunately, you know, we have equipment in other parts of Canada that is not as good as we would like to it be. As a manager I tell you quite frankly I would like to have every piece just spotless and in the best condition it could possibly be, with a nice, straight road bed and everything, but you just cannot have these things everywhere within the limitations that are imposed. Unfortunately some circumstances may arise such as you described, and I am sorry to hear it.

Mr. Perrault: The price in the diner is just as expensive, or more expensive, in Newfoundland. Every time I have been aboard the diners have been filled. There were times I could not get served, and yet this little service of a linen tablecloth, as only one example, had been removed and replaced by paper.

Mr. Vaughan: Is this just a recent...

Mr. Perrault: No; this has been for any number of years.

[*Interprétation*]

Pourquoi, par exemple, a-t-on laissé les draps des couchettes s'user à la corde au cours des dernières années? J'ai pris un lit il n'y a pas plus de six ou huit mois à Terre-Neuve et lorsque je me suis éveillé, j'avais latête passée à travers un trou. Je n'essaie pas de leurrer le Comité. J'ai regardé les autres draps et ils étaient tous rapiécés.

Une voix: Vous avez payé pour le drap?

M. Perrault: Je ne rigole pas. S'il n'y a pas eu de négligence délibérée, on n'a quand même pas vraiment essayé d'améliorer le service voyageurs. Auriez-vous des commentaires à faire monsieur Macdougall? Je vous parle d'après mon expérience personnelle.

M. Macdougall: J'accepte ce que vous dites, parce que vous parlez d'après votre expérience personnelle. Je n'ai rien à rejeter, et je n'essaierai pas de le faire. Je ne suis pas tout à fait sûr si votre déclaration est juste ou non, mais je l'accepte.

M. Perrault: Je voulais établir les choses comme elles sont parce que je ne voulais pas que le Comité ait l'impression que le service voyageurs du National-Canadien à Terre-Neuve fait partie de ces grands services nationaux et est tout aussi bon. Je veux simplement dire les choses comme elles sont afin que le Comité ne soit pas induit en erreur.

M. Macdougall: Malheureusement, vous savez, vous avez dans d'autres régions du Canada du matériel qui n'est pas aussi bon que nous le souhaiterions. En temps qu'administrateur, j'aimerais bien que tout soit impeccable, immaculé, dans les meilleures conditions possibles, des assises de voie droites, mais on ne peut avoir tout cela partout à même les restrictions qui nous sont imposées. Malheureusement, il peut représenter certaines circonstances comme celles dont vous parlez, et je regrette que cela se produise.

M. Perrault: Et les prix dans le wagon restaurant aussi élevés, sinon plus, à Terre-Neuve. Les places sont toujours toutes occupées et il y a même eu des fois où je n'ai pu être servi. Le service de lingerie de table a été remplacé par de petits napperons de papier. Cela n'est qu'un exemple.

M. Vaughan: C'est récent.

M. Perrault: Non, cela se fait depuis plusieurs années.

[*Text*]

Mr. Macdougall: I have been on all kinds of dining cars on the rest of our system that have not got linen. We have got lots of cars operating with paper napkins and paper serviettes and things of that kind.

Mr. Perrault: In the coffee shop, yes. All right; I will carry on with my next question if you do not mind, sir. I am not going to question the judgment of CTC, but in their order to the CNR—I am not going to question it, I am just going to ask how the Canadian National Railway regards this part of the order that the bus service must be as good as, if not better than, the train service? What is CNR's interpretation of those words?

Mr. Macdougall: We are trying to provide an excellent bus service. The Committee has made that requirement; we are trying to provide an excellent bus service. We bought the best buses we could buy, we are trying to staff them with people who have understanding and competence and we expect that the bus service will be as good as there is anywhere in this country. We think that will be comparable with the rail at least. We are not proposing to put on a poor bus service; we do not want a poor bus service—we want an excellent bus service.

Mr. Perrault: Bearing in mind passenger comfort, accommodation.

Mr. Macdougall: Of course.

Mr. Perrault: Eat, sleep.

Mr. McGrath: One john for everybody.

An hon. Member: Oh please!

Mr. Macdougall: Some houses have got along for years with none.

• 1030

Mr. Perrault: Is there any deterioration at this present moment in the CNR passenger service in Newfoundland as compared to, say, a year ago?

Mr. Macdougall: Compared with what, sir?

Mr. Perrault: Compared with one year ago, is the service as good today—the trains are still running, mind you—as it was a year ago?

Mr. Macdougall: Well, now, I must say that I do not travel it every week myself to test it out, naturally, but the frequency of the service and the general quality of the service is the same today as it was a year ago.

[*Interpretation*]

M. Macdougall: Je suis allé un peu partout ailleurs, dans les voitures restaurant qui n'ont jamais de nappes. Nous avons beaucoup de wagons ou il n'y a que des serviettes de papier, etc.

M. Perrault: Dans le cafétéria oui. Mais je vais poursuivre maintenant avec ma question suivante, je n'ai pas l'intention de mettre en doute le jugement de la CCT, je ne veux pas mettre en question l'ordonnance de la Commission au CN, mais comment le CN envisage-t-il cette partie de l'ordonnance selon laquelle le service d'autobus doit être aussi bon sinon meilleur que le service des trains? Comment le CN interprète-t-il cela?

M. Macdougall: Nous essayons de fournir un excellent service d'autobus. Nous avons acheté les meilleurs autobus possibles. Nous essayons d'y mettre un personnel compétent et compréhensif et nous nous attendons que le service d'autobus sera aussi bon que n'importe quel autre service d'autobus au pays. Nous croyons qu'il pourra se comparer facilement au service des trains. Nous ne voulons pas introduire un service médiocre d'autobus, ce n'est pas cela que nous voulons; nous voulons un excellent service d'autobus.

M. Perrault: Tenant compte du service, du comfort des passagers.

M. Macdougall: Naturellement.

M. Perrault: Des repas, du coucher.

M. McGrath: Une toilette pour chacun.

Une voix: S'il vous plaît!

M. Macdougall: Il y a plusieurs maisons qui ont dû en passer pendant des années.

M. Perrault: Y a-t-il détérioration, à l'heure actuelle, du service voyageurs à Terre-Neuve comparativement à, mettons à il y a un an.

M. Macdougall: Pardon?

M. Perrault: Comparativement à il y a un an, est-ce que le service est aussi bon aujourd'hui et il y a toujours des trains qui roulent?

M. Macdougall: Je dois dire que je ne voyage naturellement pas toutes les semaines personnellement pour le vérifier. Mais la fréquence du service et la qualité générale du service sont certainement les mêmes qu'il y a un an.

[*Texte*]

Mr. McGrath: I have a supplementary question. When was the last time you travelled from Port-aux-Basques to St. John's on the Newfoundland train, Mr. Macdougall?

Mr. Macdougall: Well, this is March 20. I guess it was probably in November, 1968.

Mr. Perrault: I have one further question, Mr. Chairman. I would just like a comment from either of those gentlemen from the CNR giving his opinion as to the capability of the highways in Newfoundland. As you know, it is just a two-lane highway; the traffic is increasing every day; we see those big CNR trailer trucks and what have you. Everyday there are more of them. We are adding a fairly large fleet of buses. Do they have any opinion to express as to the capabilities during the coming summer and the years to come of this highway in its present two-lane state of handling the traffic that will be operating?

Mr. Macdougall: The Trans-Canada Highway is built to Trans-Canada specifications and in other parts of Canada they are taking the full complement of highway vehicles, trucks, buses and so on. I do not have any feeling of inadequacy of the highway.

Mr. Perrault: One very short question, Mr. Chairman. I understand there are a number of applications for abandonment of various pieces and bits of rail lines before the Transport Commission?

Mr. Macdougall: All across Canada.

Mr. Perrault: All across Canada. A number of those were put before the Commission at the same time as the application to abandon the service in Newfoundland. Was there any particular urgency attached to the application to abandon the service in Newfoundland?

Mr. Macdougall: Well, I do not know that I would offer you a complete answer on that, because I have not thought of that. But one particular reason would be the savings that could be made by eliminating that service, I suppose. They are substantial.

Mr. Perrault: Could you offer any comparative figures? You already said this afternoon that almost every line experiences deficits. Could you offer any comparative figures of the deficits for instance between North Sydney and Truro?

Mr. Macdougall: No, I cannot.

Mr. Perrault: That is all, Mr. Chairman.

[*Interprétation*]

M. McGrath: Une question supplémentaire. Quand, pour la dernière fois, avez-vous fait le voyage entre Port-aux-Basques et Saint Jean dans ce train, Monsieur Macdougall.

M. Macdougall: C'est aujourd'hui le 20 mars. Je crois que c'était en novembre 1968.

M. Perrault: Une dernière question, monsieur le président. J'aimerais avoir l'opinion de l'un des deux fonctionnaires du CN, sur la capacité des routes à Terre-Neuve. Comme vous le savez les grandes routes de Terre-Neuve ne sont que des routes à deux voies; la circulation augmente tous les jours; nous voyons ces gros camions remorque du CN, il y en a de plus en plus. Nous ajoutons présentement une assez grande flotte d'autobus. Ont-ils une opinion à exprimer sur les possibilités au cours de l'été qui vient et des années à venir de cette route à deux voies en matière de la circulation.

M. Macdougall: La route transcanadienne construite d'après les exigences de l'administration de la route transcanadienne et dans les autres parties du Canada, elle supporte tous les véhicules à moteur, autobus, camions, autos, etc. et je n'ai pas l'impression que la grande route soit inadéquate.

M. Perrault: Une dernière question brève monsieur le président. Je comprends qu'il y a un certain nombre de demandes d'abandon de divers bouts de lignes de chemins de fer qui ont déjà été présentées à la Commission canadienne des transports.

M. Macdougall: A travers tout le Canada.

M. Perrault: A travers tout le Canada. Un certain nombre a été présenté à la Commission en même temps que la demande en vue d'abandonner le service à Terre-Neuve. Y avait-il une urgence particulière attachée à la demande d'abandon du service à Terre-Neuve?

M. Macdougall: Je ne sais pas si je pourrais donner une réponse complète à ce sujet car je n'y ai pas pensé. Mais une des raisons, serait l'épargne que nous pourrions faire en supprimant ce service, je suppose. Cette épargne est assez importante.

M. Perrault: Alors, pouvez-vous nous donner des chiffres de comparaison? Vous avez déjà dit cet après-midi que presque toutes les lignes accusent des déficits. Pourriez-vous nous fournir les chiffres comparatifs des déficits, par exemple, entre Sydney-Nord et Truro?

M. Macdougall: Non, je ne le peux pas.

M. Perrault: C'est tout, monsieur le président.

[*Text*]

Mr. Turner (London East): Mr. Chairman, Mr. Vaughan and Mr. Macdougall, when we were down East we heard there were constant complaints of a shortage of box cars in the Maritimes, all over. When they want box cars, the shippers cannot get them. Some of them waited as long as ten days. It this normal practice?

Mr. Macdougall: No, there were spot shortages of cars all over Canada this spring. We had a grain problem. I referred a while ago to the severe winter weather conditions in Western Canada. We could not use 100-car trains. Trains had to be broken down to 20 or 30 cars in order to move grain. There were shortages in different parts of the country. The CPR would have suffered the same kind of shortage.

We are working our way out of that situation now, and the grain is moving, and I think that your situation in the Atlantic region has improved quite a bit. But we are going to have shortages. You would know that, sir.

Mr. Turner (London East): Well, up my way, it just depends who you are, whether you get cars or not. If you are a big shipper you get the cars, while a little fellow is just passed by. Under area management do you make the final decision regarding the Maritime area operations? Or do you have to go to Montreal?

Mr. Macdougall: I do not know that I understand your question. My responsibility is for the Atlantic region.

Mr. Turner (London East): That is right.

Mr. Macdougall: From Rivière du Loup to St. John's, Newfoundland.

Mr. Turner (London East): Do you make the final decision in that region?

Mr. Macdougall: I do, yes.

Mr. Turner (London East): Did the CNR apply for truck line licences on P.E.I., and were these applications opposed, and by whom?

Mr. Macdougall: Perhaps Mr. Duncan, our general counsel, could answer that question.

[*Interpretation*]

M. Turner (London-Est): Monsieur le président, monsieur Vaughan et monsieur Macdougall, quand nous étions dans l'Est, on nous a dit qu'il y avait des plaintes incessantes au sujet du manque de wagons de marchandises, partout dans les Maritimes. Quand ils veulent des wagons de marchandises, les expéditeurs ne peuvent se les procurer. Certaines personnes ont dû attendre jusqu'à dix jours pour les obtenir. Est-ce normal?

M. Macdougall: Non, on n'a manqué de wagons de marchandises qu'en certains endroits du Canada au cours du printemps. Nous avons eu de la difficulté au sujet des céréales. J'ai parlé il y a quelques instants des conditions climatiques de l'hiver dans l'Ouest du Canada. Nous ne pouvions pas employer des trains de 100 wagons. On devait diviser les trains et ne mettre que 20 ou 30 wagons pour transporter les céréales. On a souffert de ces manques un peu partout dans le pays. Le Pacifique-Canadien aurait eu les mêmes difficultés.

Toutefois, nous sommes en train d'en sortir. Le blé est transporté et je crois que votre situation dans la région de l'Atlantique s'améliore beaucoup. Nous aurons certainement les mêmes difficultés. Vous devriez le savoir.

M. Turner (London-Est): Tout dépend qui vous êtes pour obtenir des wagons. Si vous êtes un expéditeur important, vous les obtenez pendant qu'une personne ordinaire est laissée de côté. En vertu de l'administration de la région de l'Atlantique, rendez-vous une décision définitive au sujet de l'exploitation dans les Maritimes?

M. Macdougall: Je ne sais pas si j'ai bien compris votre question. Je suis chargé de la région de l'Atlantique.

M. Turner (London-Est): C'est juste.

M. Macdougall: De Rivière-du-Loup à Saint-Jean (Terre-Neuve).

M. Turner (London-Est): Est-ce vous qui prenez la décision finale dans cette région?

M. Macdougall: Oui.

M. Turner (London-Est): Le CN a-t-il demandé des permis d'exploitation de parcours de camions dans l'Île-du-Prince-Édouard ou est-ce que les demandes ont reçu des oppositions, et de la part de qui?

M. Macdougall: Notre avocat-général, monsieur J. M. Duncan de la région de l'Atlantique pourrait peut-être répondre à cette question.

[*Texte*]

Mr. Duncan: Yes, Mr. Turner, we did on several occasions make applications to the Public Utilities Commission of Prince Edward Island.

• 1735

On the first occasion we were granted the right to carry express in one tractor trailer unit to Summerside and one to Charlottetown. Of course, this is not in anywhere near the number which would be required in order to give an adequate service. But that was all we were given, so we did put that on. And we went back again. And we applied again for the removal of this restriction on the number of vehicles. We were allowed one more truck to serve Summerside and Charlottetown, and quite frankly we did not put that on because there were no savings to be made; we could not take any rail equipment off.

Mr. Turner (London East): Well, the general idea of these truck licences was to give better service in that area, right?

Mr. Duncan: Precisely.

Mr. Turner (London East): Do you believe that subsidies should apply both ways? And how can we be sure that they are channelled down to the consumer?

Mr. Duncan: This should be applied both ways.

Mr. Turner (London East): Both ways. We heard that down in the Maritimes. They should be applied both ways. East-west and west-east.

Mr. Macdougall: On the first part of your question as to its applicability both ways, I do not think that I am in favour of it being applied entirely both ways, because of this point I mentioned before. If you subsidize the inbound traffic, you are going to inhibit many cases in the Atlantic Provinces, because the competitors they have to compete with are going to be able to put goods cheaper into Atlantic Canada. And I think it would be in our own interest to endeavour to build up our industry rather than making it cheaper for outsiders to come in and do business there. That is one point.

But I do think at the same time that there are certain commodities such as some raw materials, some unfinished goods that it would be helpful to Maritime manufacturers

[*Interprétation*]

M. Duncan: Oui monsieur Turner, nous avons présenté des demandes à plusieurs reprises à la *Public Utilities Commission* de l'Île-du-Prince-Édouard.

La première fois, on nous a donné l'autorisation de transporter les messageries dans un camion-remorque jusqu'à Summerside, et un autre jusqu'à Charlottetown. Évidemment, cela est loin d'approcher le nombre qui serait nécessaire pour assurer un service adéquat. C'est tout ce qu'on a donné toutefois. Alors, nous l'avons inauguré et nous sommes revenus. Nous avons encore demandé la suppression de la restriction relative au nombre des véhicules. On nous a alors permis l'usage d'un autre camion pour desservir Summerside et Charlottetown. Et pour dire franchement, nous ne l'avons pas mis en service, car on ne pouvait pas faire d'économies. On ne pouvait éliminer le service ferroviaire.

M. Turner (London-Est): Alors, l'idée générale des permis de camions était de donner un meilleur service dans la région, n'est-ce pas?

M. Duncan: Précisément.

M. Turner (London-Est): Croyez-vous que les subventions devraient s'appliquer dans les deux sens? Et comment pouvons-nous nous assurer qu'elles passent au consommateur?

M. Duncan: Cela devrait s'appliquer dans les deux sens.

M. Turner (London-Est): Dans les deux sens. Nous en avons entendu parler dans les Maritimes. Elles devrait être appliquées dans les deux sens, est-ouest et ouest-est.

M. Macdougall: Pour répondre à la première partie de votre question, relative à l'application dans les deux sens, je ne crois pas que je sois en faveur complètement, en raison de ce que j'ai déjà mentionné. Car, si vous subventionnez le transport venant vers les provinces Maritimes, vous allez empêcher dans plusieurs cas, la croissance économique des provinces de l'Atlantique parce que leurs concurrents pourront mettre des denrées sur le marché des Maritimes où un meilleur coût que s'ils les produisaient dans les provinces Maritimes. Je crois qu'il serait de votre intérêt d'essayer de former notre industrie plutôt que d'encourager les étrangers à venir dans nos provinces avec leurs propres produits.

Je crois aussi qu'il y aurait certaines installations, comme les matières premières, quelques produits semi-ouvrés qu'il serait utile pour les fabricants des Maritimes d'avoir une

[*Text*]

to have coming in with some transportation assistance. And I think this commission that we have talked about would be the body that would be able to cast an eye over the scene to find out where they could do that.

I have forgotten the other point you had, Mr. Turner.

Mr. Turner (London East): To make sure that these subsidies are channelled down to the consumer.

Mr. Macdougall: Yes, I think they should be.

Mr. Turner (London East): Thank you. Now, did the CNR get any appeals or complaints from any group regarding the decision of taking off the "Bullet" prior to April 15th or later? We heard in the Maritimes that nobody appealed the CTC decision. Did the CNR get any complaints or appeals?

Mr. Vaughan: No, I have not received any, as far as Montreal is concerned.

Mr. Macdougall: We have seen most of the things that have been in the papers and so on, but we have not had representations that I am aware of.

Mr. Turner (London East): This is what I mean. Now, is it not true that the train schedule has not been changed for 25 years?

Mr. Macdougall: No, I do not think that is right. The train schedule in Newfoundland?

Mr. Turner (London East): That is right.

Mr. Macdougall: No, I do not think so. For instance, we operated our trains up until October, 1961, on a 7-day-per-week basis all year round. At that time we changed in the winter time from a 7-day to a 6-day basis. Then in 1962 we went in the winter time to a 3-day-per-week basis. There have been changes made.

Mr. Turner (London East): Could you cut the running time down by 4½ hours, instead of having this 22½ hours now? Could you cut it down by 4½ hours?

Mr. Macdougall: I do not think there is any simple yes or no answer to that question. You can always do things if you have enough money to do them.

Mr. Turner (London East): Well, if the government gave you a million dollars a year, would you still keep the "Bullet" train on?

[*Interpretation*]

certaine aide pour le transport. Je pense que la commission dont nous avons parlé pourrait peut-être jeter un coup d'œil pour savoir dans quel domaine ils pourraient le faire.

J'ai oublié l'autre point, monsieur Turner.

M. Turner (London-Est): Pour s'assurer que la subvention soit acheminée vers le consommateur.

M. Macdougall: Oui, je le crois.

M. Turner (London-Est): Est-ce que le CN a reçu des plaintes ou des appels de la part d'un groupe au sujet de la décision d'enlever le *Neufie Bullet* avant le 15 avril ou même plus tard? On nous a dit dans les Maritimes que personne n'avait appelé de la décision de la CCT. Est-ce que le CN a reçu des plaintes ou des appels?

M. Vaughan: Je n'en ai pas reçu, en ce qui concerne Montréal.

M. Macdougall: Nous avons vu la plupart des choses qui ont paru dans les journaux, et ainsi de suite, mais à ma connaissance, nous n'avons pas eu de représentations.

M. Turner (London-Est): C'est ce que je veux dire. N'est-il pas vrai que l'horaire des chemins de fer n'a pas changé depuis 25 ans?

M. Macdougall: Je ne crois pas que ce soit exact. Vous voulez dire l'horaire des trains à Terre-Neuve?

M. Turner (London-Est): Oui.

M. Macdougall: Non, je ne crois pas. Par exemple, nos trains étaient exploités jusqu'en octobre 1961, sept jours par semaine, à l'année longue. A ce moment-là, nous avons changé à l'hiver, et au lieu de sept jours, il a été exploité six jours par semaine et en 1962, pendant l'hiver, nous avons réduit à trois jours par semaine. Il y a donc eu des changements.

M. Turner (London-Est): Est-ce que vous pourriez réduire maintenant le temps du parcours de quatre heures et demie au lieu de 22 heures et demie? Est-ce que vous pourriez le réduire de quatre heures et demie?

M. Macdougall: Je ne crois pas que l'on puisse répondre à cette question par un oui ou par un non. Il est toujours possible de le faire à condition d'avoir suffisamment d'argent.

M. Turner (London-Est): Si le gouvernement vous donnait un million de dollars, par année, garderiez-vous le *Bullet*?

[*Texte*]

Mr. Macdougall: I do not know the answer to that question.

Mr. Turner(London East): It is a matter of economics?

Mr. Macdougall: Yes.

Mr. Turner (London East): The boss has got to make money.

Mr. Macdougall: Basically, if somebody wants us to operate a service and wants to pay for it, and give us a small profit, we are anxious to do that kind of business.

Mr. Turner (London East): How many employees will be affected when this train is taken off? We have heard 150 up to 400.

• 1740

Mr. Macdougall: I have not got the figures here to give you a complete breakdown on this, but our calculations indicate that we can see certain of these employees fitting into other work and other jobs and so on. But we will get down to a hard core number at some time that we will not be able to fit in. This is the problem we have.

As I explained in some detail in an earlier answer, we have various training programs, counselling programs, researching out areas and places for people to go. And then of course, you run into the resistance that comes from human beings themselves to be changed and to go somewhere else. Some of them do not want to go and live in Moncton or work in the shop. They want to stay in St. John's, and I do not blame them at all. But you get into that type of problem. So it is very difficult for me to give you figures. But I can tell you this, that I do not think the figures will be large and that maximum effort is being expended to endeavour to make it as minimum a number as possible, and people with very short service.

Mr. Turner (London East): Can employees who will eventually be affected go to the mainland with their seniority regardless of their service?

Mr. MacDougall: Some of them can, Mr. Turner, yes.

Mr. Turner (London East): What department?

[*Interprétation*]

M. Macdougall: Je ne connais pas la réponse à cette question.

M. Turner (London-Est): C'est une question financière n'est-ce pas?

M. Macdougall: Oui.

M. Turner (London-Est): Le patron doit faire de l'argent.

M. Macdougall: Au fond, si quelqu'un veut que nous exploitions un service et s'il veut payer pour le faire, en nous assurant un petit bénéfice, nous serions très heureux de le faire.

M. Turner (London-Est): Combien d'employés seront touchés quand le train sera enlevé? On a entendu parler de 150 à 400.

M. Macdougall: Je n'ai pas les chiffres devant moi pour vous en donner une illustration complète, mais nos calculs indiquent que certains des employés pourront être mutés à d'autres emplois. A un autre travail, et ainsi de suite. Mais, nous en arriverons à un moment donné à un certain nombre que nous ne pourrons pas employer. C'est le problème que nous avons.

Comme je l'ai expliqué en détail plus tôt, nous avons établi divers programmes de formation, d'orientation, et nous essayons de trouver des endroits et des domaines pour ces employés. Et ensuite, vous entrez dans le domaine de la résistance des hommes qui veulent changer et aller ailleurs. Certains ne veulent pas se déplacer pour aller vivre à Moncton ou travailler dans un atelier. Ils préfèrent rester à Saint-Jean et je ne les en blâme pas. C'est le genre de problèmes qui surviennent. Alors, c'est très difficile pour moi de vous donner des chiffres exacts. Je puis vous dire toutefois que je ne crois pas que le chiffre soit très élastiques et qu'on fait l'effort maximum pour essayer de réduire le nombre au strict minimum et les gens qui comptent peu d'années de service.

M. Turner (London-Est): Pour les employés qui seraient éventuellement touchés, pourront-ils se rendre sur le continent et faire valoir leur ancienneté sans tenir compte de leurs services?

M. Macdougall: Certains le pourront, oui.

M. Turner (London-Est): Dans quel service?

[*Text*]

Mr. MacDougall: I think the fellows who cannot go to the mainland are the people in the sleeping and dining car service.

Mr. Turner (London East): What about the running crews?

Mr. MacDougall: There are about 30 of those.

Mr. Turner (London East): The running crews have got no seniority district over in the mainland.

Mr. MacDougall: The running trades may be confined to Newfoundland, I am not sure. Of course, we are retaining our freight services, and it is my hope that we will see expansion of our freight services. We talked about such things as the paper coming out of Corner Brook and out of Grand Falls, which is a big potential movement and I would hope we would see a time there when we get whole trains of paper coming out of those places. I can see an interim period where there are going to have to be some adjustments but I would hope the train crews would not be adversely affected in the long term at all.

Mr. Turner (London East): We heard quite a bit of comment that on the L.C.L. rates being 10 pounds per cubic foot and everybody suggests that it should be five pounds per cubic foot. Could you make money at five pounds per cubic foot?

Mr. Macdougall: I do not know that I can just answer the question, can we make money at five pounds. It would depend upon the rate you applied to the goods. But let me just give you a little bit of information about this 10 pounds. I, naturally, get a little bit impatient with this argument. In the first instance, the only place we are getting any complaint about it is in Atlantic Canada. It applies throughout the whole of the rest of Canada and we are not getting any complaints at all. As I said before, it is at least two pounds per cubic foot less than it was under the old rates. The truck comparable cube rule is 12 to 18 cubic feet. In air, for domestic traffic, it is 7 and for international traffic 8.9. These rates were set in 1948 and they are regarded by the airlines today as most unsatisfactory and they are trying to get them up. They are looking for something in the order of what we are using.

It is 56 pounds per cubic foot for water traffic. There is no other surface carrier any-

[*Interpretation*]

M. Macdougall: Je crois que ceux qui ne peuvent pas le faire travaillent dans le service des voitures-restaurants et des voitures-lits.

M. Turner (London-Est): Et qu'en est-il du service des itinérants?

M. Macdougall: Ils sont environ trente.

M. Turner (London-Est): Ils n'ont pas de district d'ancienneté sur le continent?

M. Macdougall: Il se peut que les employés itinérants restent à Terre-Neuve. Mais nous maintenons notre service des marchandises et j'espère que le service des marchandises augmentera. On a mentionné le papier journal de Corner Brook et de Grand Falls. C'est un mouvement possible considérable et j'espère que nous verrons un jour des trains entiers de papier journal partir de ces endroits. Il y aura certainement une période intérimaire où l'on devra faire des ajustements, mais j'espère qu'il n'y en aura pas trop d'employés de chemin de fer qui seront affectés par ces mesures.

M. Turner (London-Est): Au sujet du tarif de moins d'une wagonnée on nous a dit, que le volume autorisé était de 10 livres par pied cube. Il devait être de 5 livres plutôt que de 10 livres. Est-ce que vous pourriez faire de l'argent avec un poids de 5 livres par pied cube?

M. Macdougall: Je ne sais pas. Tout dépend évidemment du tarif appliqué. Mais permettez-moi de vous dire quelque chose au sujet des 10 livres par pied cube. Je deviens un peu irrité par cet argument. Tout d'abord, le seul endroit où l'on se plaint de ce taux c'est dans les provinces de l'Atlantique. Ailleurs au Canada, on ne se plaint pas du tout. Et comme je l'ai dit auparavant, c'est au moins 2 livres par pied cube de moins que ce l'était en vertu de l'ancien tarif. Maintenant, le camionnage prévoit de 12 à 18 livres par pied cube; pour le service aérien c'est 7 et pour le transport international, c'est 8.9. Ces taux avaient été fixés en 1948 et les lignes aériennes les estiment injustes aujourd'hui et cherchent à les hausser.

Par conséquent, pour le transport maritime c'est 56 livres par pied cube. Et il n'y a pas

[*Texte*]

where that has a lesser rate than 10 pounds per cubic foot. It is the lowest rate that exsts for surface transportation.

I am afraid that of the complaints that have occurred with respect to this, many occurred when this was first put in at the end of 1967 or early 1968. We may be quite responsible for not doing a good enough job or not assessing the market well enough to do a good enough job of explaining this. Since that time, however, we have sent our people throughout the Atlantic to talk to hundreds of shippers to show them how they can use this cube rule to their own advantage. Many customers of ours, who were formerly dissatisfied and complained, are now quite satisfied.

The Chairman: Could I interrupt for one moment? While we have a quorum here I would like to have a motion from the Committee. Mr. Mahoney?

Mr. Mahoney: I move that the Chairman be authorized to seek concurrence of the fifth report of this Committee which was tabled in the House on March 19, 1969.

Motion agreed to.

The Chairman: There is another question. Time is running out on us as we only have 15 minutes left this afternoon and we still have two more speakers. Would the Committee agree to sit tonight or do you feel that we can finish this afternoon?

Mr. McCleave: I am one of the two; I will just take seven and a half minutes if the other member will take the other seven and a half.

Mr. McGrath: Mr. Chairman, the Regional Development debate is on in the House tonight and we are sitting on limited time.

Mr. McCleave: Do not take our 15 minutes.

Mr. McGrath: We have limited capacities as to how long we can remain in this position.

The Chairman: I recognise Mr. McCleave.

Mr. McGrath: No, no, I am not finished Mr. Chairman. I am not finished making my point. You asked about this problem of sitting tonight. I say we cannot sit tonight and, in my view, I cannot see how we can finish by six o'clock.

Mr. McCleave: My first question arises out of the submission of the Atlantic Premiers which I think was mailed to all members yesterday from Moncton and probably will be

[*Interprétation*]

d'autre transporteur de surface où que ce soit qui a un taux de moins de 10 livres par p. cube. C'est le plus bas existant dans les transports.

Je crains donc que nous soyons un peu responsables des plaintes qui ont été formulées à ce sujet, plusieurs d'entre elles ont été formulées au début quand on a inauguré ce tarif à la fin de 1967 ou au tout début de 1968, dans le sens que nous n'avons peut-être pas suffisamment évalué le marché ou nous n'avons pas suffisamment expliqué le barème. Mais, depuis ce temps-là, notre personnel dans les Maritimes a expliqué à ces centaines de personnes comment employer ce barême à leur avantage. Plusieurs de nos clients qui étaient alors mécontents, sont maintenant satisfaits de nos services.

Le président: Monsieur Turner, est-ce que je pourrais requérir un instant votre indulgence, pendant que nous avons le quorum. J'aimerais avoir une motion de la part du Comité.

M. Mahoney: Que le président soit autorisé à demander l'adoption du cinquième rapport du Comité qui a été déposé à la Chambre, le 19 mars 1969.

La motion est acceptée.

Le président: Il y a aussi une autre question. Je sais que le temps avance et il nous reste 15 minutes. Cet après-midi. Il nous reste encore deux orateurs. Est-ce que vous êtes d'accord pour siéger ce soir ou estimez-vous que nous pouvons finir cet après-midi?

M. McCleave: Je suis l'un des deux orateurs; je vais prendre sept minutes et demie et si l'autre membre du comité fait la même chose, nous pourrons finir à temps.

M. McGrath: Monsieur le président, il y a le débat sur l'expansion régionale économique, ce soir et notre temps est limité.

M. McCleave: Ne prenez pas nos 15 minutes.

M. McGrath: Nos capacités sont limitées pour pouvoir demeurer dans cette situation.

Le président: M. McCleave.

M. McGrath: Non, non, je n'ai pas terminé, monsieur le président. Je n'ai pas terminé. Vous nous avez demandé si nous pouvions siéger ce soir. Je prétends que nous ne pouvons pas siéger ce soir, et d'ailleurs, nous ne pouvons pas terminer avant 6 heures.

M. McCleave: La première question qui me vient à l'esprit au sujet de ce mémoire des premiers ministres des provinces de l'Atlantique, qui nous a été envoyé hier, c'est que l'on

[*Text*]

in our boxes tomorrow. One of the suggestions was that there might be savings in the re-alignment and diversions of track in Atlantic Canada, and I want to ask Mr. Macdougall if the CN is carrying out cost-benefit analyses of such a program?

Mr. Macdougall: Can you point to the specific item, Mr. McCleave.

Mr. McCleave: It is on page 18 under the heading "Rail", in the Atlantic Premiers' submission. The second paragraph reads:

> Indications are that certain track realignment and diversions will reduce the cost of rail transportation. If a more detailed cost-benefit analysis of such a program confirms a net saving, such improvements should be undertaken immediately by the railways.

Have there been studies along that line?

Mr. Macdougall: No, this is a major sort of thing. There have been no representations made directly to me on that point. I think that generally the point is a valid one. Just what the study would show, or how detailed a study would be required to do it, I am not too sure, Mr. McCleave. We have not begun anything on that.

Mr. McCleave: I take it, then, the answer is that the CN would make decisions on the briefs when they are before you?

Mr. Macdougall: We would certainly be delighted to discuss this with the provinces and to indicate places where we think such action might be taken, but I cannot be any more definite than that at the moment.

Mr. McCleave: All right. My other question involves the operation by the CN of the ferries between North Sydney and Port-aux-Basques and also between Cape Tormentine and Borden.

Mr. Macdougall: Yes?

Mr. McCleave: And it involves the charge for carrying a ton of freight under four different circumstances, and I would like to know if the rate is the same in all circumstances. First, a ton of freight in a CN boxcar; second, in a Canadian National Transportation Limited truck; third, in a railway-owned truck line, for example, Eastern Transport, and fourth, a non-railway owned truck line that is going over on the ferry. Are the rates per ton of freight the same in each of those four cases?

[*Interpretation*]

pourrait faire des économies avec les détournements et les corrections de voies ferrées dans les provinces de l'Atlantique. Je voulais demander à M. Macdougall si le CN fait l'analyse du coût d'un tel programme.

M. Macdougall: Est-ce que vous pourriez me dire quel est le point particulier, monsieur McCleave?

M. McCleave: A la page 18 sous la rubrique «Transport par rail» du mémoire des premiers ministres des provinces de l'Atlantique. Au deuxième paragraphe on lit:

> Il y a des indications que des détournements et corrections de lignes réduiront les frais si l'analyse des frais d'un tel programme confirme l'économie. Dans ce cas une amélioration devrait être entreprise immédiatement par les chemins de fer.

Y-a-il eu des analyses ou des études de ce genre?

M. Macdougall: Non. Il semble que ce soit une question d'ordre majeur. Il n'y a pas eu de représentations directement sur ce point qui m'ont été adressées. Je crois qu'en général, le point est valable, ce donnerait l'étude ou jusqu'à quel point cette étude serait détaillée, je ne le sais pas. Nous ne l'avons pas fait, monsieur McCleave.

M. McCleave: Et alors, d'après la réponse, je crois comprendre que le CN, prendra ces décisions au moment où il aura le mémoire.

M. Macdougall: Nous serons certainement heureux de discuter la question avec les provinces et de démontrer les endroits où de telles mesures doivent être prises. Mais je ne puis être plus précis en ce moment.

M. McCleave: Très bien. Ma prochaine question, est au sujet de l'exploitation par le CN des bacs entre North-Sydney et Port-aux-Basques et aussi entre Cape Tormentine et Borden.

M. Macdougall: Oui?

M. McCleave: Et elle touche les frais de transport d'une tonne de marchandises dans quatre conditions différentes; tout d'abord, une tonne de marchandises dans un wagon de marchandises du CN; deuxièmement, dans un camion du CNTL; troisièmement, sur la ligne de camionnage qui est la propriété du CN et du gouvernement; et quatrièmement, d'un service de camionnage qui n'est pas la propriété du service ferroviaire. Est-ce que le tarif par tonne de marchandises est le même dans les quatre cas?

[*Texte*]

Mr. Macdougall: I think the answer to that, Mr. McCleave, is in the answer I gave a little while ago dealing with this question. If the goods go across by truck there is a tariff that is established by the Department of Transport for each of those ferries for different types of trucks, such as trailer trucks, smaller trucks, and so on. Each of the trucks would pay the same whether owned by Canadian National or by an independent trucker. With respect to goods that go across in railway cars, we make an apportionment of the revenue that we receive from that traffic to the Department of Transport in relationship to the distance it goes across the strait.

Mr. McCleave: In other words, the CN gives no special advantage to itself by reason of the fact that it is carrying a captive competitor on those particular runs?

Mr. Macdougall: No.

Mr. McCleave: Thank you, Mr. Chairman.

Mr. Lundrigan: Mr. Chairman, my question is really only a refinement of one I asked earlier. I think that our Committee is in the process of making a final report, and undoubtedly this final report will reflect on the visit of the Committee to the Atlantic region. This is the first time that the CN has been before our Committee, and I think it is imperative that before the Committee makes a report, and perhaps a recommendation, hopefully, on the service that we have talked so much about today and in the last several weeks, that the Canadian National take it upon itself to make information available to us as to the Canadian National Railways' cost or what it has spent per mile on maintaining and upgrading its railbeds in Newfoundland in each of the years from 1963 to 1968 inclusive, as a period of time, and to provide the same information for the other Canadian provinces.

My second question is in relationship to the carrying facilities, and my question is: What has the Canadian National spent on the maintenance and service of its passenger rail service dining cars, sleepers, coaches and so on in Newfoundland, again in each of the years in question, 1963-1968, in relation to the cost of keeping these services going in the Atlantic region except Newfoundland, the central region, the Prairie region and the British Columbia region? I think this is important information. And perhaps some other members may want to supplement these questions with others which have relevance to our knowledge of what we are talking about.

[*Interprétation*]

M. Macdougall: Je crois que la réponse à cela, monsieur McCleave, se trouve dans la réponse que j'ai donnée tout à l'heure sur cette question. Si les marchandises sont transportées par camion, il y a un tarif établi par le ministère des Transports pour chacun de ces bacs dans chacune des catégories de véhicules, les camions-remorques, les plus petits camions, etc., que ces derniers soient propriété du CN ou du camionneur indépendant, ils paieront le même tarif. En ce qui concerne les marchandises transportées par wagons de chemin de fer, nous faisons la répartition du revenu que nous recevons au ministère des Transports, par rapport à la distance du détroit.

M. McCleave: En d'autres mots, le CN ne se donne aucun avantage spécial par le fait qu'il transporte un véhicule appartenant à un concurrent captif.

M. Macdougall: Non.

M. McCleave: Merci, monsieur le président.

M. Lundrigan: Monsieur le président, ma question est peut-être un rafinement de la question que j'ai posée auparavant. Notre Comité est en train de préparer son dernier rapport et, évidemment, il reflètera la situation dans les provinces de l'Atlantique. Je crois que notre Comité doit faire son rapport, et peut-être aussi, formuler des recommandations sur le service dont nous avons tellement entendu parler aujourd'hui et au cours des dernières semaines. C'est la première fois que le CN se présente devant notre comité et je crois qu'il est essentiel qu'il prenne sur lui de nous fournir les renseignements de ses coûts et de ses dépenses par mille pour l'entretien et l'amélioration des voies ferrées à Terre-Neuve, dans chacune des années de 1963 à 1968 inclusivement et de donner les mêmes renseignements pour les autres provinces du Canada.

Et ensuite, ma deuxième question a trait aux moyens de transport et voici ma question: combien le National-Canadien a-t-il dépensé pour l'entretien des wagons-restaurants, des wagons-lits, des wagons de voyageurs, etc., de sous service de trains de voyageurs à Terre-Neuve, une fois encore, pour chacune des années en cause, de 1963 à 1968, par rapport au coût du maintien de ces services dans la région de l'Atlantique, à l'exception de Terre-Neuve, dans la région centrale, dans les Prairies et en Colombie-Britannique? Je crois qu'il s'agit là de renseignements importants. Peut-être d'autres membres du Comité voudraient-ils poser des questions qui aient trait à notre connaissance de ce dont nous parlons.

[*Text*]

We cannot expect our friends here, who have been very co-operative, to give us this information. They just do not have it. Perhaps we could have this information from Canadian National and have it submitted to our Committee so that we can consider it in making our final report.

Mr. Vaughan: Sir, I will undertake to look at the questions and endeavour to supply the information to the best of our ability.

Mr. Lundrigan: Thank you. The questions are now on the record, and perhaps I can pass along these rough copies to you, if the Chairman will permit.

Mr. Vaughan: I will undertake to write a letter to the Chairman of the Committee.

Mr. McGrath: Mr. Chairman, I have a number of questions and a couple of them are supplementary to the very interesting and important matters raised by Mr. Turner.

I was rather intrigued with one of Mr. Macdougall's answers. Mr. Turner put a direct question to Mr. Macdougall. He wanted to know: If the railway were supplied with a subsidy to make up for their deficit, which is about $1 million, would they continue to operate? Mr. Macdougall's reply, to the best of my recollection, was "I cannot answer that question".

Mr. Vaughan: Perhaps you had better tell them why you cannot answer it.

All I think he was saying was that the judgment is there and the ruling was made. And the Act also contains other provisions meeting this very point that Mr. Turner raised. That is why Mr. Macdougall said he could not answer. Is that right, Mr. Macdougall?

Mr. Macdougall: Yes, sir; I think that is right; and I made the point with Mr. Turner that if someone wants to have a passenger service such has been suggested in Newfoundland and that the train be kept as a tourist attraction, or wants to operate a special train or special service for some particular reason, and that someone is willing to pay for the service and says "We will pay for it", then of course we will provide a service.

Mr. McGrath: With great respect, in my submission, I do not think that has anything at all to do with the order of the CTC. I think

[*Interpretation*]

Nous ne pouvons nous attendre à ce que nos amis ici, qui nous ont donné leur précieuse collaboration, puissent nous fournir ces renseignements. Ils ne les ont pas. Peut-être nous faudrait-il les obtenir du National-Canadien, et les faire soumettre à notre Comité, de sorte que nous puissions en tenir compte lors de la rédaction de notre rapport définitif.

M. Vaughan: Monsieur, je vais examiner les questions et m'efforcer de fournir les renseignements voulus de mon mieux.

M. Lundrigan: Merci. Les questions sont maintenant dans le compte rendu, et je pourrais peut-être vous en donner ces brouillons, si monsieur le président le permet.

M. Vaughan: Je m'engage à écrire au président du Comité.

M. McGrath: Monsieur le président, j'ai un certain nombre de questions à poser, et deux d'entre elles sont complémentaires des questions très intéressantes et importantes qu'a soulevées M. Turner.

J'étais plutôt intrigué par l'une des réponses de M. Macdougall. M. Turner a posé une question directe à M. Macdougall. Voici ce qu'il voulait savoir: si les chemins de fer recevaient une subvention pour compenser leur déficit qui est d'un million de dollars environ, est-ce qu'ils maintiendraient l'exploitation de leurs services? M. Macdougall, si je me souviens bien, a répondu: «Je ne peux répondre à cette question».

M. Vaughan: Peut-être devriez-vous leur dire pourquoi vous ne pouvez y répondre. Tout ce qu'il voulait dire, c'était que, à mon avis, le jugement était là et que la décision avait été prise. La Loi contient aussi d'autres dispositions qui répondent précisément à la question soulevée par M. Turner. C'est pourquoi M. Macdougall a dit qu'il ne pouvait y répondre. Est-ce bien cela, monsieur Macdougall?

M. Macdougall: Oui, monsieur, je pense que c'est exact; et j'ai aussi dit à M. Turner que si quelqu'un voulait avoir un service de voyageurs comme on l'a proposé à Terre-Neuve, et que l'on veuille garder le train comme attraction touristique, ou si quelqu'un voulait assurer un train spécial ou un service spécial pour une raison particulière, et que quelqu'un soit prêt à payer le service et dise qu'il le paiera, évidemment nous serons heureux de fournir le service.

M. McGrath: En toute déférence, je ne crois pas que cela ait quoi que ce soit à avoir avec l'ordonnance de la Commission cana-

[*Texte*]

it was just a straight question seeking information. I think it was a very useful question, and my next question follows it up. What was the total...

Mr. Macdougall: He did not say he had the million dollars there, or who was going to pay for it.

Mr. McGrath: Wait for my next question, Mr. Macdougall. What was the total deficit of the CNR in your last fiscal year?

Mr. Macdougall: It is all given in our annual report.

Mr. McGrath: Yes, I know.

Mr. Vaughan: Last year the over-all deficit was $25 million.

Mr. McGrath: What proportion of that was accounted for by losses on passenger rail service across the country?

Mr. Vaughan: I do not mind talking about the financial affairs of the CN, but I think that is another broad complicated subject. The gross revenues of the CNR are about $1 billion. The debt of the CNR is close to $2 billion. The fixed charges we have amount to $70 million—that is the interest on the debt.

This $25 million figure that I used means that when you take all of the operating revenues and expenses we have a net operating position of perhaps $30 million or $40 million dollars before interest. Therefore, when you ask how much of the deficit is attributable to that I cannot answer right off-hand at this moment.

Mr. McGrath: Will you undertake to provide the Committee with the information on what percentage of your deficit for the last fiscal year resulted from losses on passenger rail service across the country?

Mr. Vaughan: Yes. We gave a great deal of evidence on this point to this committee not too many years ago—one or two years ago—when the Committee was dealing with the Bill which is now the National Transportation Act. The deficit that we dealt with at that time on passenger service was $43 million, as I remember. Is that about right?

Mr. Macdougall: Something like that.

[*Interprétation*]

dienne des transports. Je pense qu'il s'agissait tout simplement d'une question directe en vue de chercher à obtenir des renseignements. A mon avis, c'était une question très utile, et ma question suivante y fait suite. Quel était le total...

M. Macdougall: Il n'a pas dit qu'il avait ce million de dollars, ni qui allait le payer.

M. McGrath: Attendez ma prochaine question, monsieur Macdougall. Quel était le déficit total du National-Canadien pour la dernière année financière?

M. Macdougall: Tout cela figure dans notre rapport annuel.

M. McGrath: Oui, je le sais.

M. Vaughan: L'an dernier, le déficit total s'est élevé à 25 millions de dollars.

M. McGrath: Quelle proportion de ce déficit était-elle due aux pertes sur les services de trains de voyageurs à travers le pays?

M. Vaughan: Je n'ai pas d'objections à parler des finances du National-Canadien, mais je pense que c'est un autre sujet très vaste et compliqué. Les revenus bruts du National-Canadien sont d'environ un milliard de dollars. Ses dettes s'élèvent à près de deux milliards. Nos frais fixes—soit l'intérêt sur nos dettes—se chiffrent à 70 millions de dollars.

Le chiffre de 25 millions de dollars que j'ai cité signifie que lorsque vous prenez tous les revenus et tous les frais d'exploitation, il reste peut-être trente ou quarante millions de dollars avant les intérêts. C'est pourquoi, lorsque vous demandez quelle serait la proportion du déficit attribuable à cela, je ne peux vous répondre au pied levé, pour le moment.

M. McGrath: Est-ce que vous fournirez au Comité des renseignements afin que nous puissions savoir quel pourcentage de votre déficit de la dernière année financière était dû aux pertes pour le service de trains de voyageurs à travers le pays?

M. Vaughan: Oui. Nous avons donné au Comité beaucoup de témoignages à ce sujet, il n'y a pas tellement d'années de cela—un ou deux ans, je pense, lorsqu'il étudiait le bill qui est maintenant la Loi nationale sur les transports. Le déficit pour les services de voyageurs était, à l'époque, pour autant que je me souvienne, de 43 millions de dollars. Est-ce bien cela?

M. Macdougall: Oui, quelque chose dans ce genre.

[*Text*]

Mr. Vaughan: Forty-three million dollars, let us say. That passenger deficit, because of higher costs and wage agreements being renegotiated, and so on, would probably have increased.

Mr. McGrath: Yes; but, with great respect, I want the figures for the last fiscal year to relate them to the new factors that have come into play, the increase in road transportation and air transportation.

Mr. Vaughan: I have just finished telling you what the figure was a year ago. And I told you I did not have these figures for the last fiscal year with me. But this Committee is going to deal with our annual report when it is published, and as soon as it gets out of the printer the Chairman and the President will be here. I am sure you will have a great many questions on the whole aspect of the CNR affairs.

Mr. McGrath: That is fair; and I hope you will be here, and Mr. Macdougall, too.

Mr. Vaughan: We will be here. I hope you do not mean by that that...

Mr. McGrath: I did not mean that facetiously. I just hope you will be here. You, sir, have taken it upon yourself a number of times today to make comments the propriety of which I would question. I merely suggest that to you, and I do not think you should impute to me motives for what I say. I merely suggest that you should be here so that we can perhaps get some qualification of, and enlightenment on, some of the very vague and ambiguous answers we have been getting here all day. That is the only reason I raise it.

However, I have another question, Mr. Chairman, and I would like to...

The Chairman: Order. Mr. McGrath hoped that Mr. Vaughan would be here, and Mr. Vaughan said he would.

Mr. McGrath: Then Mr. Vaughan tried to impute motives to me for saying that, and I took exception to it.

Mr. Vaughan: Mr. McGrath, may I just say this...

The Chairman: Order.

Mr. Vaughan: May I say something, please? I have been appearing before this committee for the last 16 years, I think. I know many of

[*Interpretation*]

M. Vaughan: Disons 43 millions de dollars. Ce déficit pour les services de voyageurs doit certainement avoir augmenté, du fait de l'augmentation des coûts, des nouvelles négociations sur les salaires, etc.

M. McGrath: Oui, mais, en toute déférence, je voudrais avoir les chiffres de la dernière année financière, pour pouvoir les mettre en rapport avec les nouveaux facteurs qui sont intervenus, l'expansion qu'ont prise le transport routier et le transport aérien.

M. Vaughan: Je viens de vous dire ce qu'était le chiffre il y a un an. Et je vous ai dit que je n'avais pas ici les chiffres de la dernière année financière. Mais le Comité va étudier notre rapport annuel lorsqu'il sera publié, et, dès que ce rapport sortira de l'impression, le président va venir ici. Je suis sûr que vous aurez beaucoup de questions à poser sur toute l'exploitation du National-Canadien.

M. McGrath: Entendu; et j'espère que vous-même et M. Macdougall serez aussi présents ici.

M. Vaughan: Oui, nous viendrons. J'espère que vous ne voulez pas dire par là que...

M. McGrath: Je ne disais pas cela ironiquement. J'espère simplement que vous serez ici. Aujourd'hui, monsieur, vous avez pris sur vous, à plusieurs reprises, de faire des observations que je mets en doute. Ce n'est qu'une réflexion au passage, et je ne pense pas qu'il vous faille imaginer des motifs pour mes paroles. Je dis tout simplement que vous devriez être présent afin que nous puissions obtenir quelques explications, et quelques éclaircissements sur certaines des réponses très vagues et ambiguës que vous n'avez cessé de nous donner aujourd'hui. C'est la seule raison pour laquelle j'ai fait cette réflexion.

Toutefois j'ai une autre question à poser, monsieur le président, et j'aimerais...

Le président: A l'ordre! M. McGrath a dit qu'il espérait que M. Vaughan serait présent, et M. Vaughan a répondu que oui, il viendrait.

M. McGrath: Puis M. Vaughan a essayé d'imputer des motifs à mes paroles, et je m'y suis opposé.

M. Vaughan: Monsieur McGrath, laissez-moi simplement dire que...

Le président: A l'ordre!

M. Vaughan: Permettez-moi de dire quelque chose, s'il vous plaît. Je comparais devant ce Comité depuis 16 ans, je crois. Je connais

[*Texte*]

the members and they know me. We always come here and endeavour to co-operate as much as possible, and we will continue to do that. Mr. McGrath, if you thought anything like that I withdraw it. I want to be co-operative with you, and we will continue to do that. I will be back whenever the railways appear before this Committee relative to any of its affairs; and I agree with you, for the sake of continuity, that when we do come back on the other things, I should be here so that we can follow the trend of the conversation.

Mr. McGrath: That is fine, sir. I was not being facetious when I asked that, and...

Mr. Vaughan: I hope we can leave it on a pleasant vein.

Mr. McGrath: That is fine. I think my next question is more appropriate to the subject under discussion. You state in your submission—and this figure was challenged in the course of our hearings in Newfoundland—that it would cost you $140 million to take the curves off the Newfoundland line. One of the senior officials of the railway unions in Newfoundland has made the charge that you pulled this figure out of the air and that you could not substantiate it.

Mr. Vaughan: I do not know when we have used the figure of $140 million recently, but I think it was used some years ago before one of these committees. You can correct me if I am wrong...

Mr. McGrath: Yes, sir; it is in your submission to the CTC—it is in the judgment.

Mr. Vaughan: All right; I am sorry. Then I stand corrected. It is in our submission...

Mr. McGrath: It is in the judgment that we have before us.

Mr. Vaughan: I think that figure related to a reconstruction of the railway from narrow gauge to...

Mr. McGrath: No, sir.

Mr. Vaughan: It could be the other...

Mr. Trudel: Mr. Chairman, when he mentioned this figure of $140 million I think he was using part of the statement, if my memory serves me correctly.

[*Interprétation*]

plusieurs de ses membres, et ils me connaissent aussi. Nous venons toujours ici pour essayer de collaborer le plus possible avec le Comité, et nous continuerons à le faire. Monsieur McGrath, si vous avez pensé que c'était là ce que je voulais dire, je retire mes paroles. Je veux collaborer avec vous, et nous continuerons à le faire. Je reviendrai lorsque les chemins de fer comparaîtront devant le Comité à n'importe quel égard. Je suis bien d'accord avec vous: pour les besoins de la continuité, je devrais être présent lorsque nous reviendrons ici pour d'autres questions, afin que nous puissions maintenir une certaine harmonie d'une audience à l'autre.

M. McGrath: Très bien, monsieur. Je ne faisais pas d'ironie, lorsque j'ai demandé cela, et...

M. Vaughan: J'espère que nous allons pouvoir finir sur une note agréable.

M. McGrath: Très bien. Ma question suivante se rattache plus directement, je crois, au sujet à l'étude. Vous dites dans votre mémoire—et l'on a mis ce chiffre en doute, lorsque des audiences qui ont eu lieu à Terre-Neuve—que cela vous coûterait 140 millions de dollars pour enlever les courbes le long de la voie de chemin de fer de Terre-Neuve. L'un des hauts représentants des syndicats des chemins de fer de Terre-Neuve vous a accusé d'avoir inventé ce chiffre, et de n'avoir aucune preuve à l'appui de vos allégations.

M. Vaughan: Je ne sais pas quant nous avons utilisé ce chiffre de 140 millions récemment, mais je pense qu'on l'a cité il y a quelques années devant l'un des comités. Corrigez-moi si je me trompe...

M. McGrath: Oui, monsieur, ce chiffre figure dans le mémoire que vous avez présenté à la Commission canadienne des transports; il est cité dans le jugement.

M. Vaughan: Entendu, excusez-moi. Je reconnais mon erreur. Le chiffre figure dans notre mémoire...

M. McGrath: Il figure dans le jugement que nous étudions.

M. Vaughan: Je pense qu'il s'agissait d'une reconstruction des voies de chemin de fer pour les faire passer d'un faible écartement à...

M. McGrath: Non, monsieur.

M. Vaughan: C'est peut-être l'autre...

M. Trudel: Monsieur le président, si je me souviens bien, lorsqu'il a mentionné ce chiffre de 140 millions de dollars, il citait une partie de la déclaration.

[*Text*]

Mr. McGrath: No, I am not Mr. Trudel. Do you have the submission to the CTC? It is $140 million to straighten out the line, and $225 million to convert it to wide gauge.

Mr. Vaughan: I might say, in fairness to the people to whom that statement would have application, that they would not pull the figure out of the air; that it was based on a calculation—was based on some engineering knowledge.

Mr. McGrath: Is there any way by which we can have this figure?

Mr. Vaughan: I will undertake to look at that, too.

Mr. McGrath: We would like to have the engineering submission, if we could, on which you base that figure because it is a serious charge. The charge has been made that you were somewhat less than honest in your submission. I am not making that charge. It was made to us at our hearings in St. John's.

Mr. Vaughan: The union made the charge.

Mr. McGrath: It is a very serious charge and it should not be allowed to go unanswered.

Mr. Macdougall: It surprises me that a union man of our company would make a charge of that kind against management. That really shocks me, if it is a real charge. Perhaps he just brought the point up, I do not know, but to think that one of the responsible union people in our company would make charge against the management...

Mr. Trudel: May I just say something, Mr. Chairman. I think this was an opinion expressed by one individual. If he was speaking for the union it was not included in the submission, it was not in the brief. It was a verbal comment that was made by one individual who was away off the track on several other submissions that he made to the Committee.

Mr. McGrath: I do not know. It seems to me, Mr. Chairman, that this Committee has reached a sorry pass when we seem to bog down into argument on every single point that is made. Mr. Trudel is the last person I expected would challenge the validity of what I say because he knows my reputation in this Committee for being accurate and for being fair in my assessment, and he is too, and he

[*Interpretation*]

M. McGrath: Non. Avez-vous le mémoire présenté à la Commission canadienne des transports? Il s'agit de 140 millions de dollars pour redresser la voie, et de 225 millions pour la transformer en voie à large écartement.

M. Vaughan: Je dirais, en toute justice à l'égard des personnes auxquelles cette déclaration s'appliquerait, qu'elles n'ont certainement pas inventé ce chiffre, qu'il doit se fonder sur des calculs, sur des connaissances en matière de génie.

M. McGrath: Est-ce qu'il serait possible d'avoir ce chiffre?

M. Vaughan: Je verrai ce qu'il en est, là aussi, monsieur.

M. McGrath: Nous aimerions savoir sur quelles connaissances techniques vous avez basé cette évaluation, car c'est une accusation grave. On vous a accusé de ne pas être tout à fait honnête dans votre mémoire. Je ne vous accuse pas. Mais c'est ce qu'on nous a dit à Saint-Jean.

M. Vaughan: C'est le syndicat qui a porté cette accusation.

M. McGrath: Oui, c'est une accusation grave qu'on ne devrait pas laisser passer sans y répondre.

M. MacDougall: Cela m'étonne qu'un employé syndiqué de notre société porte une telle accusation contre la direction. J'en suis choqué s'il y a un fond de vérité. Peut-être a-t-il simplement fait une observation, je ne le sais pas, mais je ne crois pas qu'un employé syndiqué responsable de notre société porterait une telle accusation contre la direction.

M. Trudel: Puis-je dire quelque chose, monsieur le président? Je pense que c'est une opinion formulée par une personne. S'il parlait au nom du syndicat, on ne le mentionnait pas dans le mémoire. C'est une simple observation faite par une personne dont un bon nombre d'observations qu'il a faites au Comité n'étaient pas toujours à prendre au sérieux.

M. McGrath: Je ne le sais pas. Il me semble, monsieur le président, que ce Comité en est rendu à un niveau assez bas lorsqu'on semble s'en prendre à tout ce qui est soulevé. M. Trudel m'étonne parce que je ne m'attendais pas du tout à ce qu'il mette en doute la validité de ce que je dis car il connaît très bien ma réputation dans ce comité d'être précis et juste lorsque je fais une évaluation, il

[*Texte*]

knows that this figure was raised by the union leader in making his submission and it is also mentioned in his brief.

Mr. Trudel: The point you have made, Mr. McGrath, if I may, Mr. Chairman, is that this man was accusing the CNR of using fictitious figures—and he quoted them—and he did not believe them, and I think that is what we are discussing now. I am not disputing the fact that you used the figure of 100 million or so, he said that these figures were not true and they were using wrong assumptions, and if you remember during the course of the briefing this man also made several other assertions.

Mr. McGrath: The record, of course, will bear this out and we will have the record in a few days I hope, Mr. Chairman. However, just to conclude on that particular topic, I hope that the railway will provide us with data to substantiate this figure so that we can deal with this once and for all, because I think it is very important.

Mr. Lundrigan: Mr. Chairman, may I ask one short supplementary which I think is related to this. I asked two questions about ten minutes ago and I think Mr. Vaughan and Mr. Macdougall undertook to try to provide some information to the Chairman and through him to the Committee members. I wonder if he could also follow up the representation made by several of the members of our Committee today and provide us with some details. You will not get this from your annual report because it is quite general.

Could you provide us with some detail of the deficits incurred by various other lines in Canada, including the Newfoundland line, which we understand is approximately $1 million. Could this be done, Mr. Vaughan, from 1966 until now, or at least back a few years?

• 1805

Mr. Vaughan: Yes. I shall undertake to. .

Mr. Lundrigan: I would like it in a fair amount of detail so we will know what it is costing us as taxpayers to run the various systems.

Mr. Vaughan: Yes. This is also what you will hear when the annual report comes along. In any event, I am not trying to evade your question, or anything like that. I will undertake to do as much as I can for the Committee within the limits of our capabilities.

[*Interprétation*]

l'est également, et il sait très bien que le chef syndical a cité ce chiffre durant son exposé et qu'il est mentionné aussi dans le mémoire.

M. Trudel: Ce que vous dites, monsieur McGrath, si monsieur le président me le permet, c'est que cette homme accusait le National-Canadien d'utiliser des données fictives qu'il a citées, et qu'il ne les croyait pas; je pense que c'est ce que nous sommes à discuter. Je ne m'en prend pas au fait que vous avez parlé de 100 millions ou plus, il a dit que ces chiffres sont erronés, qu'ils partaient d'hypothèses fausses, et, si vous vous souvenez, au cours de l'exposé, cet homme a aussi fait d'autres déclarations.

M. McGrath: Le compte rendu démontrera qu'il en est bien ainsi. Nous l'aurons d'ici quelques jours, monsieur le président, du moins, je l'espère. Mais, simplement, pour terminer sur cette question, j'ose espérer que les chemins de fer nous fourniront des données pour appuyer ce chiffre afin de régler la question une fois pour toutes, car je sais qu'elle est très importante.

M. Lundrigan: J'aimerais poser une question supplémentaire assez brève que je crois pertinente. J'ai posé deux questions il y a environ dix minutes et je pense que M. Vaughan et M. Macdougall se sont engagés à essayer de fournir des renseignements au président et au Comité. Pourrait-il de même à la suite des instances faites par un bon nombre de membres de ce Comité nous fournir des détails. Vous ne les trouverez pas dans votre rapport annuel parce qu'il est assez général.

Pourriez-vous nous donner des détails sur les déficits encourus par diverses autres lignes au Canada, y compris la ligne de Terre-Neuve, qui, si je comprends bien, est d'environ un million de dollars. Est-ce qu'on pourrait le faire, M. Vaughan? De 1966 jusqu'à maintenant ou du moins pour quelques années passées?

M. Vaughan: Oui, je m'engage à le faire.

M. Lundrigan: J'aimerais avoir assez de détails afin de savoir combien il en coûte aux contribuables pour exploiter ces différentes lignes.

M. Vaughan: Oui, c'est ce que vous aurez lors de la présentation du rapport annuel. Enfin, je n'essaie pas d'éviter votre question. Je m'engage à faire mon possible.

[*Text*]

Mr. McGrath: Mr. Chairman, there is another subject that was raised during the course of our hearings in St. John's. Believe me, gentlemen, I thought the whole purpose of this exercise was to have the CNR appear before us today to answer the questions and the doubts that were raised as a consequence of our tour of the Maritimes in connection with the reference that we now have from Parliament.

There are a number of questions we have not had an opportunity to put to the witnesses and, as I say, I thought this was the whole purpose of the exercise. For example—if I may proceed, Mr. Chairman, or perhaps you want to adjourn—the question was raised about the facilities at Port aux Basques which were designed to take a 70,000 pound mainland freight car and place it on a Newfoundland truck, I think that is the proper term, because a Newfoundland car only has a 40,000 pound capacity. How much did that installation cost?

Mr. Macdougall: In the first place, Mr. McGrath, as yet there has not been a facility built that is specifically designed to do this. We are doing some transfers of mainland cars to Newfoundland trucks in the transit shed which was built a year or two ago. To get this type of a service going and to meet the demands of shippers who want this type of service, and it is a good type of service, we have in the planning and implementation stage, and hope to have built by this fall, a facility which will more readily be able to transfer a limited number—perhaps 15 to 20 a day—of mainland cars to Newfoundland trucks so we will be able to carry the car straight through to destination. It is not a very expensive facility. I think it will cost something on the order of $400,000. It is mainly just to put some hydraulic jacks in the floor that will push the car body up and you then move the trucks out manually. After that you slip the other trucks in and drop it down again.

Mr. McGrath: My reason for asking that question is that evidence was given in St. John's which indicated that this system was not working. The reason it was not working was that a Newfoundland truck could not carry a 70,000 pound car.

Mr. Macdougall: I am not sure whether the actual figures that you have given express the problem or not, but this scheme is working and it is working very well. Some of our biggest cars have gone over the Newfoundland trackage very successfully, without any difficulty at all.

[*Interpretation*]

M. McGrath: Monsieur le président, il y a un autre sujet qui fut soulevé pendant nos audiences à Terre-Neuve. Messieurs, je pensais que tout cet exercice avait pour but de faire comparaître le National Canadien ici aujourd'hui pour répondre aux questions et aux doutes qui furent soulevés durant notre tournée dans les provinces Maritimes et aussi en vertu du mandat que nous avons du Parlement.

Il y a un certain nombre de questions que nous n'avons pas eu l'occasion de poser aux témoins et, comme je l'ai dit, je pensais que c'était le but de cet exercice. Par exemple, si on me permet de poursuivre, monsieur le président, ou vous désirez peut-être lever la séance, on s'est posé la question au sujet des aménagements de Port-aux-Basques qui sont conçus pour prendre un wagon de 70,000 livres provenant du continent et le placer sur des boghies de Terre-Neuve, je crois que c'est le terme propre, parce que les boghies de Terre-Neuve n'ont qu'une capacité de 40,000 livres. Quel fut le coût de cet aménagement?

M. Macdougall: Précisons d'abord qu'on n'a pas encore aménagé une installation conçue uniquement à cette fin. On fait toujours le transfert des wagons provenant du continent aux boghies de Terre-Neuve dans le hangar de transit aménagé il y a un an ou deux. Pour mettre sur pied un tel service et pour répondre aux demandes des expéditeurs qui réclament un tel service, qui est excellent d'ailleurs, nous sommes à préparer et à mettre en œuvre un plan, et nous espérons, d'ici l'automne, avoir un service qui nous permettra de faire le transfert beaucoup plus facilement un certain nombre, peut-être de 15 ou 20 par jour, de wagons en provenance du continent sur les boghies pour qu'on puisse les acheminer directement à destination. Ce n'est pas un aménagement très coûteux. Je pense qu'il en coûte quelque chose comme $400,000. Il s'agit simplement de placer des crics hydrauliques pour lever le wagon, de retirer le boghie à la main, et le remplacer par le boghie de Terre-Neuve avant de laisser descendre le wagon.

M. McGrath: La raison pour laquelle j'ai posé la question, c'est qu'à Terre-Neuve, nous avons eu des témoignages selon lesquels ce système ne fonctionnait pas parce que les boghies de Terre-Neuve ne pouvaient pas prendre une charge de 70,000 livres.

M. Macdougall: Je ne sais pas si les chiffres que vous avez cités donnent une bonne idée du problème, mais ce programme donne d'excellents résultats. Certains de nos plus gros wagons ont été utilisés sur les voies de Terre-Neuve sans aucune difficulté.

[*Texte*]

Mr. McGrath: Without being filled to capacity. This is the evidence we had.

Mr. Macdougall: That may be. I do not know whether they are filled to capacity. We have limitations that are not based upon the car.

Mr. McGrath: I take it that these limitations are placed on the car by virtue of the road bed.

Mr. Macdougall: Right, by virtue of the bridges.

Mr. McGrath: That is right. Apparently when this facility was put in this is something that was not taken into account.

Mr. Macdougall: Oh yes, it was taken into account. We know the capacity of the bridges and we are not going to put something in there that is going to fall through a bridge.

Mr. McGrath: But the point is that you can only carry an extra 10,000 pounds as a consequence of this. Is that right?

Mr. Macdougall: We can carry up to 142,000 pounds.

Mr. McGrath: I am at a bit of a disadvantage, Mr. Chairman, because we do not have the evidence in front of us that we heard on our trip, and I submit to you, sir, that this places the Committee under a very serious handicap in trying to examine the Canadian National Railways in connection with our study of the transportation problems of the Atlantic provinces.

• 1810

Mr. Macdougall: Mr. McGrath, may I ask you a question, sir. I am not sure why you raised this question. This is a new type of service which was asked for by the people of Newfoundland. They want an improved service and they want mainland quality. This is one way in which you can get mainland quality on the Newfoundland rails, by enabling the commodity car to go right through from Vancouver to St. John's. We are spending money in order to do this. We are working hard to provide a better service for the people in Newfoundland. Why is somebody objecting to it? We are not going to do things that are going to affect safety. We are bound by the regulations of the Canadian Transport Commission. We are not going to break the bridges. I do not understand why anybody would raise this. This is something that is

[*Interprétation*]

M. McGrath: Sans être remplis à pleine capacité. C'est ce qu'on nous a dit.

M. Macdougall: Peut-être je ne sais pas s'ils sont remplis à pleine capacité ou pas. Il y a des restrictions qui ne sont pas établies à cause du wagon.

M. McGrath: Je suppose que ces limitations sont établies en fonction de la voie.

M. Macdougall: C'est juste, en fonction des ponts.

M. McGrath: C'est exact. Apparemment, lorsque vous avez institué ce service, on n'en a pas tenu compte.

M. Macdougall: Oui, nous en avons tenu compte. Nous savons que la capacité d'un pont est de tant, et on ne mettrait tout de même pas quelque chose qui défoncerait le pont.

M. McGrath: Ce à quoi je veux en venir, c'est que vous ne pouvez transporter que 10,000 livres de plus à cause de cela. N'est-ce pas?

M. Macdougall: Nous pouvons transporter jusqu'à 142,000 livres.

M. McGrath: Je suis un peu désavantagé, monsieur le président, parce que nous n'avons pas ici devant nous les témoignages entendus au cours de notre tournée, et je vous dirai que le comité se trouve, de ce fait, dans une situation vraiment désavantageuse lorsqu'il s'agit d'interroger le National Canadien par rapport à notre étude des problèmes des transports dans les provinces de l'Atlantique.

M. Macdougall: Monsieur McGrath, je voudrais vous poser une question. Je ne vois pas pourquoi vous posez cette question. Il s'agit de services nouveaux offerts à la demande de la population de Terre-Neuve. Ils veulent un meilleur service de la même qualité que celui offert sur le continent. C'est une façon d'assurer un service de la même qualité que sur le continent sur les chemins de fer de Terre-Neuve, en permettant le convoyage des wagons marchandises de Vancouver à St-Jean. On a dépensé de l'argent pour le faire, nous nous efforçons vraiment d'améliorer le service pour les gens de Terre-Neuve. Pourquoi s'y oppose-t-on? Nous ne ferons rien qui affectera la sécurité. Nous sommes liés par les règlements de la CCT. On ne va pas défoncer les ponts. Je ne vois pas pourquoi on soulève la question. C'est une chose que l'on

[*Text*]

being done and it is a very thoughtful, useful and effective means of helping traffic in Newfoundland. What is the problem?

Mr. McGrath: Mr. Macdougall, I say with great respect that I am not objecting to it, nor is anyone else objecting to it. All I am saying is that this question was raised in the course of our hearings and it was raised in a critical sense and the impression was left with the Committee, rightly or wrongly, that Canadian National spent a substantial amount of funds on this process in Port aux Basques only to find that it was not working.

Mr. Macdougall: I tell you that that is absolutely wrong. Do you not accept my view as the president of the Canadian National Railways who is responsible for this, as opposed to somebody who knows nothing about it and is making a wild claim?

Mr. McGrath: Yes, sir, I am accepting your view. That is why I am asking you the question.

Mr. Macdougall: Well, I have answered it.

Mr. McGrath: Again, do not impute motives to me. I am not objecting to it.

Mr. Vaughan: I think we are all getting a little weary.

Mr. Macdougall: I wondered why you raised it, that is all.

Mr. McGrath: I told you why I raised it. The reason all the questions have been raised today is to try to set the record straight because you people have been under fire ever since this Committee started and in all fairness to the Canadian National and to you, in order to complete the picture we must get answers to questions and answers to doubts which are still in our minds before we can sit down and write a report.

Mr. Macdougall: Unfortunately you have not heard the many people who have come to us and congratulated us upon doing these things and insisting that these things are worthwhile, useful and helpful and where they are looking for a better service and exhorting us to do these things.

Mr. McGrath: Mr. Macdougall, you do so little we can congratulate you on in Newfoundland that I am glad we found something.

[*Interpretation*]

fait à bon escient, c'est un moyen utile et efficace pour aider au trafic de Terre-Neuve où est le problème?

M. McGrath: Monsieur Macdougall, je dis avec tout le respect que je vous dois, que je ne m'y oppose pas, ni personne d'autre. Je dis simplement que cette question fut posée au cours de nos audiences et elle fut posée dans un esprit critique, de sorte qu'elle a laissé au Comité l'impression, à tort ou à raison, que le National Canadien dépensait beaucoup d'argent pour cet aménagement à Port-aux-Basques avant de se rendre compte qu'il ne donnait pas de résultats.

M. Macdougall: Je peux vous dire que c'est absolument faux. Vous n'acceptez pas mon opinion en tant que président du National Canadien, et responsable de ce domaine, alors que vous acceptez celle de quelqu'un qui ne s'y connaît pas du tout et qui porte une telle accusation?

M. McGrath: Oui, j'accepte votre opinion. C'est pourquoi je pose la question.

M. Macdougall: Bien, j'y ai répondu.

M. McGrath: Mais, ne m'imputez pas des motifs. Je ne m'y oppose pas.

M. Vaughan: Je crois que nous sommes tous un peu fatigué.

M. Macdougall: Je me demandais tout simplement pourquoi vous avez posé la question, c'est tout.

M. McGrath: Je vous ai dit pourquoi je l'ai posé. La raison pour laquelle on pose toutes ces questions aujourd'hui c'est tout simplement pour rectifier le compte rendu parce que vous avez fait l'objet de critiques depuis le début de nos audienses et en toute justice à votre égard et à l'égard du CN, afin d'avoir une vue d'ensemble de la situation, il nous faut une réponse aux questions et aux doutes qui subsistent toujours dans notre esprit avant que nous puissions rédiger notre rapport.

M. Macdougall: Malheureusement, vous n'avez pas entendu le grand nombre de gens qui sont venus nous féliciter de le faire et dire que c'est utile, et pour avoir un meilleur service, ils nous prient de le faire.

M. McGrath: Vous faites si peu de choses à Terre-Neuve qui méritent nos félicitations que je suis heureux de pouvoir enfin vous féliciter.

[*Texte*]

Mr. Macdougall: I cannot accept that statement, Mr. McGrath. I think there have been a lot of improvements in Newfoundland since 1949.

Mr. McGrath: With great respect, sir, not improvements in the rail passenger service.

Mr. Vaughan: I thought you meant over-all improvements.

Mr. McGrath: There have been tremendous improvements in freight in Newfoundland. There is no question about that. There is no doubt about that at all.

Mr. Vaughan: We have tried very hard to improve the general level of the railway situation in Newfoundland.

Mr. McGrath: Before we conclude, Mr. Chairman, again, for the record, because we have to follow these things up and we are not here to make mischief as some hon. members may think, Mr. Marshall quoted from a document today and he left some doubt as to what he was quoting from. This is a statement which I would like to read into the record; it is not very long.

> J. A. McDonald, vice-president, production, told a recent meeting of the Atlantic Professional Engineers, in St. Andrews, N.B., that trains "will continue to be a vital and dynamic force in the economic life of this country."

Then he went on to refer to the fact that trains were still the best way to travel. This report can be found in the September 5 issue of *Management News,* which is a publication of CNR to keep its management personnel abreast of happenings in the CNR.

Mr. Lundrigan: Mr. Chairman, may I ask a procedural question before we leave?

Mr. Macdougall: I do not see anything wrong with that. What is wrong with it?

Mr. McGrath: I want to correct the record, Mr. Macdougall, to give the source.

Mr. Lundrigan: The reason for my procedural question is this. There are still a number of questions that members would like to raise and we would like to know whether our friends from CNR will be back next week so that we can proceed a little further and set the record straight?

[*Interprétation*]

M. Macdougall: Je ne puis accepter cette phrase monsieur McGrath. Je crois qu'il y a eu une foule d'améliorations à Terre-Neuve depuis 1949.

M. McGrath: Avec tout votre respect, monsieur, il n'y en a pas eu pour le service voyageurs des chemins de fer.

M. Vaughan: Je croyais que vous parliez d'améliorations d'ensemble.

M. McGrath: Il y a eu des améliorations incroyables dans le domaine du transport des marchandises. Il n'y a aucun doute à ce sujet.

M. Vaughan: Nous avons essayé d'améliorer la situation des chemins de fer à Terre-Neuve.

M. McGrath: Avant de terminer, monsieur le président, simplement pour le compte rendu, nous devons relancer ces choses, et nous ne sommes pas ici pour nous disputer, comme certains peuvent le croire. Monsieur Marshall a cité un extrait d'un document, aujourd'hui, et il a laissé un certain doute au sujet de la source de cette citation. C'est une déclaration que je voudrais consigner au compte-rendu. Elle n'est pas tellement longue.

> J. A. McDonald, vice-président, Production, a dit au cours d'une récent réunion des ingénieurs professionnels des provinces de l'Atlantique à St. Andrews, N.-B., que les trains seront toujours un élément vital et dynamique de la vie économique de ce pays.

Ensuite, il a souligné que le chemin de fer représentait encore la meilleure manière de voyager. J'ajoute pour le compte rendu, monsieur le président qu'on peut trouver ce rapport dans le numéro du 5 septembre du *Management New,* publication du CN destinée à tenir les cadres au courant de ce qui se passe au CN.

M. Lundrigan: Monsieur le président, puis-je poser une question de procédure avant de terminer?

M. Macdougall: Je n'y vois rien de mal. Qu'y a-t-il de mal?

M. McGrath: J'aimerais restifier le compte-rendu pour donner la source, monsieur Macdougall.

M. Lundrigan: La question de procédure que je pose vient du fait qu'il y a toujours un certain nombre de questions que les députés aimerainent soulever et nous voudrions savoir si nos amis du CN reviendront la semaine prochaine pour reprendre les débats et rectifier le compte rendu.

[*Text*]

The Chairman: Not next week.

Mr. Lundrigan: When will the CNR be back?

Mr. McGrath: Will it be before we complete our study?

The Chairman: I think we will have a chance to study the Proceedings first.

Mr. Lundrigan: I would like to look at the evidence, too. Will it be coming out soon?

The Chairman: Yes.

Mr. Vaughan: I would just ask for your indulgence again. Next week I have a board meeting on Monday and a board meeting on Tuesday. I have to go away on Wednesday and return to Ottawa on Thursday to deal with another committee. However, we will try to do your bidding as best we can. Could I just add one more thing?

The Chairman: Yes.

• 1815

Mr. Vaughan: I referred this morning to some notes and we do have copies here. Perhaps we could leave them with the Clerk and he will see that you get these notes to amplify the summary.

The Chairman: Mr. Trudel, do you have a final word?

Mr. Trudel: I have just one remark, Mr. Chairman. This is not a question, it is an observation. I would like to set this straight, Mr. Chairman. The witnesses appearing before us today have been co-operative and I would like to thank them, contrary to what has been said by other members.

Some hon. Members: Hear, hear.

Mr. McGrath: Mr. Chairman, I want to raise a question of privilege and I do so with great respect for Mr. Vaughan and Mr. Macdougall. I am sorry they had to be dragged into this but I am going to raise this question of privilege. The witnesses have not been co-operative in my view and they probably have good and sufficient reasons for not being so. Mr. Trudel has raised this matter and I am sorry that he did, because we sat today for over half an hour in camera and we got no where. We are still in doubt as to how the Canadian National arrived at this deficit of $1 million in 1966 for rail passenger service.

[*Interpretation*]

Le président: Pas la semaine prochaine.

M. Lundrigan: Quand?

M. McGrath: Avant de terminer notre étude?

Le président: Je crois que nous aurons d'abord l'occasion d'étudier le compte-rendu.

M. Lundrigan: Je voudrais aussi entendre les témoignages. Est-ce que cela sera fait bientôt?

Le président: Oui.

M. Vaughan: Je vous demande une fois de plus votre indulgence. La semaine prochaine, j'ai une réunion du Conseil de l'administration lundi et une autre mardi. Mercredi, je dois m'absenter, et revenir à Ottawa jeudi pour m'occuper d'un autre comité. Nous essaierons toutefois de satisfaire vos désirs le mieux possible. Pourrais-je ajouter autre chose?

Le président: Oui.

M. Vaughan: Ce matin, je vous ai parlé de certaines notes dont nous avons les copies. Peut-être pourrions-nous en donner des copies au greffier qui verra à les distribuer.

Le président: Monsieur Trudel, avez-vous quelque chose à ajouter?

M. Trudel: J'aimerais faire une simple observation. Il ne s'agit pas d'une question. Monsieur le président, je désirerais remercier les témoins qu'on a entendu aujourdh'ui pour leur collaboration, malgré tout ce que d'autres députés ont déjà dit.

Des voix: Bravo.

M. McGrath: Monsieur le président, je désire soulever une question de privilège et je le fais avec tout le respect que je dois à l'égard de monsieur Vaughan et de monsieur Macdougall. Je regrette qu'ils aient été entraînés dans ce remous, mais je dois poser cette question de privilège. A mon avis, les témoins n'ont pas vraiment collaboré et ils avaient certainement d'excellents motifs pour le faire. Monsieur Trudel a soulevé la question et je regrette qu'il l'ait fait, parce qu'aujourd'hui, nous avons siégé pendant plus d'une demi-heure à huis clos et nous n'en savons pas plus. Nous ignorons encore comment le CN a accumulé le déficit de 1 million de dollars en 1966 pour le service voyageurs.

[*Texte*]

Mr. Rock: I remember, Mr. Chairman, in the Montreal area between Valleyfield and Montreal there was a passenger service which was discontinued. I think it was CPR, but I am just trying to bring up the point that at the time they discontinued because of the strong competition from the provincial bus service and, of course, many people owning cars.

What I want to to know, Mr. Macdougall, is this. Suppose you did not go into the bus service but just continued as you are in many other areas with a train service, and a bus service came into effect by some other company. Would you then suffer from competition as in many other places and have to discontinue the passenger service anyway because of the loss of passengers to the bus service and, of course, even have to lay off a lot of men?

Mr. Macdougall: I am not sure that I understand your question completely, Mr. Rock. However, the usual thing, when a passenger service or a general rail service has reached the point where it is no longer patronized by the public, is that we apply to discontinue it. We leave the traffic that is available there to be taken by some other means, some other trucker or some other bus service, or something. In the case that we have been talking about here, the Newfoundland case, it was considered there might be hardships involved in doing just that with people. We did not know who would provide the bus service so we offered to provide an alternative service. This is a special type of case because of the conditions there.

Mr. Rock: Yes, what I am getting at, Mr. Macdougall, is this. Suppose that you did not go into the bus service and another firm received permission to go into a bus service on the Trans-Canada Highway, would this not have had an effect on your service through a heavy loss of passengers? Possibly then you would have had to discontinue with no alternative because there would not be another alternative?

Mr. Macdougall: Yes, that could be so.

Mr. Rock: Therefore, you had the foresight to go into the bus service before someone else did.

The Chairman: Mr. Lundrigan, just one last word.

[*Interprétation*]

M. Rock: Je me souviens, monsieur le président, que dans la région de Montréal, entre Valleyfield et Montréal, il y avait un service voyageurs qui a été discontinué. Je pense que c'est le Pacifique-Canadien, mais j'essaie simplement de dire qu'à ce moment-là, ils ont discontinué le service en raison d'une très forte concurrence exercée par le service d'autobus provincial et par plusieurs personnes qui possédaient des voitures.

Voici, monsieur Macdougall, ce que j'aimerais savoir. Disons que vous n'inaugurez pas de service d'autobus, mais que vous continuez simplement le service de train comme vous le faites dans d'autres secteurs, et qu'un service d'autobus est mis en vigueur par une autre société. Est-ce que vous serez touchés par cette concurrence et seriez-vous obligés de mettre fin au service voyageurs de toute façon, vu la perte de voyageurs qui empruntent maintenant l'autobus, et de mettre bon nombre d'hommes à pied?

M. Macdougall: Je ne suis pas sûr d'avoir bien compris votre question, monsieur Rock. De toute façon ce qui arrive habituellement, quand certains services voyageurs ou des services ferroviaires d'ordre général ne sont plus empruntés par le public, nous demandons l'autorisation de l'abandonner, et nous essayons de céder ces services à une autre société de transport, soit par camions, par autobus, pour le cas qui nous intéresse, celui de Terre-Neuve, nous étions certains de rencontrer des difficultés. Nous ne savions pas qui assurerait les services et nous avons donc offert le nôtre. C'est un cas spécial en raison des conditions du moment.

M. Rock: Oui, voici ce à quoi je veux en venir, monsieur Macdougall. Supposons que vous n'ayez pas offert de service d'autobus et qu'une autre société ait alors obtenu l'autorisation d'assurer un service d'autobus sur la route transcanadienne. Est-ce que cela n'aurait pas vraiment eu des répercussions sur votre service, entraînant la perte d'un bon nombre de passagers? Vous auriez peut-être été obligé de mettre fin à votre service, sans aucun autre service parce qu'il n'y aurait pas eu d'autre solution.

M. Macdougall: Cela aurait pu arriver.

M. Rock: Vous aviez donc prévu d'aménager ce service d'autobus avant que quelqu'un d'autre ne le fasse.

Le président: Monsieur Lundrigan, une dernière question.

[*Text*]

Mr. Lundrigan: Mr. Chairman, we, all members of the Committee, would like to express our appreciation to the gentlemen from Canadian National Railways; they have been very helpful. It is a matter of having the time, but hopefully we will have another meeting in the not too distant future. At that time we can get some other answers, perhaps more fully than we have had today. We are grateful, but it is a matter of time. We have had a long sitting, we have been sitting six hours. We are hopeful we will see these gentlemen again, to be able to probe a little more fully, perhaps with a little more information available at that time.

Mr. McGrath: Mr. Chairman, I would like to say that Mr. Vaughan and Mr. MacDougall have shown great restraint today, and personally Mr. Chairman, I think we have shown great restraint today also.

The Chairman: We always try.

Mr. McGrath: I do hope we will have a chance after we read the proceedings to perhaps get some answers to our questions.

Mr. Vaughan: For our side, may I say that all of you have shown great restraint. This is a very difficult thing and I understand your point of view and hope you understand ours. Thank you, sir.

• 1820

The Chairman: I want to thank you too, gentlemen.

[*Interpretation*]

M. Lundrigan: Monsieur le président, tous les membres du Comité désirent faire part de notre appréciation aux représentants de la compagnie des chemins de fer Nationaux du Canada qui nous ont été très utiles. Tout n'est qu'une question de temps. Nous espérons tenir une autre réunion d'ici peu. Nous pourrons alors obtenir des réponses plus complètes que celles que nous avons eues aujourd'hui. Nous vous remercions. La longue séance a déjà duré 6 heures. Nous espérons vous revoir pour approfondir un peu plus la question et peut-être y obtenir plus de renseignements.

M. McGrath: Monsieur le président, j'aimerais dire que messieurs Vaughan et Macdougall ont fait preuve de beaucoup de réserve et nous, à mon avis, de beaucoup de discipline.

Le président: Nous essayons aussi.

M. McGrath: Nous espérons que nous pourrons obtenir des réponses à nos questions après la lecture du compte-rendu.

M. Vaughan: En ce qui nous concerne, permettez-moi de vous dire que vous avez fait preuve de beaucoup de discipline. Ce n'est pas très facile. Je comprends très bien votre point de vue et j'espère que vous comprenez aussi le nôtre. Merci.

Le président: Je désire vous remercier, messieurs.

APPENDIX A-2

BRIEF SUBMITTED TO THE COMMONS STANDING COMMITTEE ON TRANSPORTATION BY THE CHAMBER OF COMMERCE OF THE MAGDALEN ISLANDS

LEOPOLD DELANEY, President
CONRAD MIOUSSE, Vice-President
GILBERT CARBONNEAU, Secretary-Treasurer
ISAAC BOURGEOIS, Director
RAYMOND HEBERT, Director
LEO L. BOURQUE, Director
JEAN ARSENEU, Director
GUY O. LANGFORD, Director
LAURIE DELANEY, Director
REDGIE POIRIER, Director
ROLAND CHEVRIER, Director

As a result of steps and pressures by the Chamber of Commerce of the Magdalen Islands, the Commons Standing Committee requested that a delegation of our members visit Ottawa to voice their opinions.

Efforts begun in 1964 to obtain a modern ferryboat for our area have continued. Petitions for the Chamber of Commerce of the Islands, approved and recommended by various public bodies such as the Island County Council, the Magdalen Islands Development Board and the Board of Trade of Charlottetown, have been sent to various federal transportation or harbour development bodies.

We shall not attempt a detailed description of the geographic, economic and social position of the Magdalen Islands, but shall try to outline our own position here.

We are 14,000 Canadians of whom 90% are French-speaking and 10% English-speaking. As we are the only true maritime area of Quebec, our exports and the major portion of our commercial ties are directed towards the Maritime Provinces whereas our social contacts are mainly with Quebec.

We are often wrongly identified with Gaspé. We are in no way complementary to this area which is almost totally unknown to us.

Our sole resource at the present time is fishing, the yield from which is sent to the United States via the Maritimes. We import foodstuffs chiefly from the Maritimes.

APPENDICE A-2

MÉMOIRE PRÉSENTÉ AU COMITÉ PERMANENT DES COMMUNES SUR LE TRANSPORT PAR LA CHAMBRE DE COMMERCE DES ÎLES-DE-LA-MADELEINE

Léopold Delaney, Président
Conrad Miousse, Vice-Président
Gilbert Carbonneau, Secrétaire-trésorier

Isaac Bourgeois, Directeur
Raymond Hebert, Directeur
Leo L. Bourque, Directeur
Jean Arseneu, Directeur
Guy O. Langford, Directeur
Laurie Delaney, Directeur
Redgie Poirier, Directeur
Roland Chevrier, Directeur

A la suite de démarches et de pressions de la Chambre de Commerce des Îles-de-la-Madeleine, le comité permanent des Communes a demandé qu'une délégation de nos membres se rendre à Ottawa pour y être entendue.

Le travail amorcé en 1964 pour nous doter d'un traversier moderne n'a pas cessé depuis. Des pétitions de la Chambre de Commerce des Îles, approuvées et recommandées par différents corps publics comme le Conseil de Comté des Îles, le Conseil de Développement du Territoire des Îles-de-la-Madeleine et le Board of Trade de Charlottetown ont été envoyées aux différents organismes Fédéraux de Transport ou d'Aménagement portuaire.

Nous ne décrirons pas en détail la situation géographique, économique et sociale des Îles-de-la-Madeleine, mais nous essayerons de nous y situer.

Disons que nous sommes 14,000 Canadiens dont 90% sont francophones et 10% anglophones. Étant le seul territoire vraiment maritime du Québec, nos exportations et la majeure partie de nos relations d'affaires se font avec les Provinces Maritimes, alors que les virements sociaux viennent du Québec.

L'on nous identifie souvent à la Gaspésie, à tord, car nous ne sommes aucunement complémentaire de cette région qui nous est presque totalement inconnue.

Notre unique ressource est présentement la pêche et le produit est expédié aux États-Unis via les Maritimes, tandis que l'importation de denrés alimentaires se fait en grande partie avec les Maritimes.

We are closer to the Maritime Provinces and the islands of St. Pierre and Miquelon than to the Province of Quebec.

Our standard of living is comparable to that of the Maritimes. However, the Maritime Provinces can count on industries other than fishing whereas in the Magdalen Islands our only other possible resource is the establishment of a new activity: *tourism.*

The present ferryboat which carries freight from the Maritimes and provides the automobile and passenger transportation service is no longer fitted to modern traffic needs.

The North Gasp is still sutiable for cargo but new water transportation demands (more serious than the age of the vessel) for cars and passengers make it no longer adequate for this type of service. Because the North Gaspé operates the service from the Maritimes to the Islands, the navigation season is limited as is the capacity for passengers and cars, and the loading and unloading methods are obsolete. The rates frighten the few rare tourists. The schedules are indecipherable and not respected. The ports visited are too numerous and the departure and landing points vary. Service and comfort are almost non existent.

Because of the problems created by the isolation of the Islands, Magdaleners consider inadequate transportation facilities a serious drawback to the development of the Islands.

A vicious circle has been created. In Ottawa we are told: study—study. In Quebec, a letter dated December 23, 1968 from the Department of Tourism, Fish and Game states: "The Minister has asked me to assure you that once we have received, from the competent authorities, all the details of this transportation system[1], including the date upon which it will be in operation, we shall undertake to develop the necessary facilities to accommodate tourists to the Islands and to promote all the tourist potential of the Islands."

We no longer know what to reply to the numerous requests for travel information emanating from Canada, the United States and even from Europe.

On May 26, 1964, the Honourable Maurice Sauvé, then Member of Parliament for the Magdalen Islands, advised the Minister of Transport that the federal Treasury had accepted the offer of the Maritime and Air Transportation Co-operative to provide transportation between the Magdalen Islands and Prince Edward Island for the years 1965-66

[1] Ferryboat, Roll-on, Roll-off.

Nous sommes plus près des Provinces Maritimes et des Îles St-Pierre et Miquelon que de la Province de Québec.

Notre niveau de vie se compare à celui des Provinces Maritimes. Cependant les provinces maritimes pouvant compter sur d'autres industries que la pêche, aux Îles-de-la-Madeleine notre seule autre ressource possible est l'établissement d'une activité nouvelle: *le tourisme.*

Le Traversier actuel, responsable du fret des Maritimes et du service de Transport automobile et passager n'est plus adapté aux besoins modernes de trafic.

Le North Gaspe demeure convenable pour le cargo mais les nouvelles exigences du transport maritime (*plus sérieuses que son âge*) pour automobile et passager ne le rendent plus apte à opérer ce service. Du fait que le North Gaspe opère le service des Maritimes aux Îles, la saison de navigation est limitée ainsi que la capacité des passagers et d'automobiles et les méthodes de chargements et de déchargements sont désuètes. Les tarifs effraient les quelques rares touristes. Les cédules ne sont pas déchiffrables et ne sont pas respectées. Les ports visités sont trop nombreux et les points de départs et d'arrivées varient. Le service et le confort est quasi inexistant.

Par suite des problèmes créés par l'insularité des Îles, le transport est considéré par les Madelinots comme l'élément constituant une contrainte au développement des Îles.

Un cercle vicieux s'est créé. A Ottawa l'on nous dit: Étude—Étude. A Québec une Lettre du 23 décembre 1968 du Ministère du Tourisme, de la Chasse et de la Pêche—dès que nous aurons reçu des autorités compétentes tous les détails de ce système de Transport[1], y compris la date qu'il sera en opération, le Ministre me prie de vous assurer que nous commencerons le développement d'infrastructure nécessaire afin d'héberger les touristes aux Îles ainsi que de promouvoir tout le potentiel que possède les Îles pour attirer les *Touristes.*

Nous ne savons plus quoi répondre aux nombreuses demandes de renseignements de touristes venant du Canada, des États-Unis et même de l'Europe.

Le 26 mai 1964, L'Honorable Maurice Sauvé, alors député des Îles de la Madeleine avisait le ministre des Transports que la Trésorerie Fédérale avait accepté l'offre de la Coopérative de Transport Maritime et Aérien d'assurer le transport entre les Îles de la Madeleine et l'Île du Prince Édouard pour les années 1965-1966 et 1967 à une subvention

[1] Traversier Roll-on Roll-off.

and 67 for an annual subsidy of $225,000 as compared to a subsidy of $294,000 then given to the Magdalen Islands Transportation.

Subsequently, a report was prepared during the summer of 1964 by members of the Department of Transport but the report failed to take into account the aspirations of the Magdaleners. No request for a subsidy has been made by the Transport Commission since. Is the reason for the poor service the lack of interest of the Magdalen Island Transportation in providing Magdaleners with the best service possible? We dare not say.

In the beginning of 1967, in the face of the immobility of federal authorities, the Chamber of Commerce of the Islands sent a resolution requesting a daily service between Souris, P.E.I. and the Magdalen Islands. Apparently the request was too late for any changes to be made in the 1967 season.

On November 15, 1967 a new resolution of the Chamber of Commerce of the Islands read as follows:

For the 1968 season exclusively a regular trip, seven (7) days per week, from the port of Havre-Aubert, M.I., with priority for docking upon arrival at the first wharf, to Sourir, P.E.I. Departure from Souris at 12:00 hours and from Havre-Aubert at 24:00. Cargo and shipment service established to serve the Islands' area. Maximum price for a one-way trip for car—$10.00; for a passenger—$5.00.

These resolutions were also passed by the County Council of the Magdalen Islands and by the Magdalen Islands Development Board. In addition, the Board of Trade of Charlottetown approved the resolution on January 15, 1968.

Mr. H. J. Darling, Chairman of the Water Transport Committee of the Canadian Transport Commission, received the documentation and assured us that "The Water Transport Committee is as interested as possible in improvement to this service and will give special attention to the representations of your Chamber of Commerce."

On January 26, a delegation of Magdaleners visited Ottawa to meet the President of the Canadian Transport Commission as well as Messrs. Balfrey, Director of Shipping Services, and Blanchet, Director of Administrative and Financial Services, in the presence of the Honourable Maurice Sauvé. The report of the meeting as given to the Chamber of Commerce of the Islands appears as an annex to the present brief.

Pursuant to the recommendations of the report of the delegates, on February 7 the following telegram was sent to Mr. Darling with a copy to Mr. Sauvé: "Pursuant to steps

annuelle de $225,000 contre une subvention de $294,000 alors donnée à Magdalen Islands Transportation.

Par la suite, un rapport fut préparé durant l'été 1964, par des membres du Ministère des Transports mais ce rapport ne tenait pas tellement compte des aspirations des Madelinots. Toujours est-il qu'aucune demande de subvention ne fut faite par la Commission des Transports depuis. Est-ce la cause de la pauvreté du service, du manque d'intérêt de Magdalen Island Transportation à doter les Madelinots du meilleur service possible? Nous n'osons répondre.

Au début de 1967 devant l'immobilité des autorités Fédérales, la Chambre de Commerce des Îles envoya une résolution demandant un service journalier entre Souris, Î.P.É. et les Îles de la Madeleine. Apparemment la demande était trop en retard pour changement de la saison 1967.

Le 15 novembre 1967 nouvelle résolution de la Chambre de Commerce des Îles rédigé comme suit: Pour la saison 1968 exclusivement un voyage régulier sept (7) jours par semaine, du port de Havre-Aubert, I.M., avec priorité d'attache à l'arrivée à ce premier quai, à Souris, I.P.E. Départ de Souris à 12.00 hrs. et de Havre-Aubert à 24.00. Service de cueillette et de livraison instauré pour desservir le territoire des Îles. Prix maximum pour automobile $10.00 et par passager $5.00 pour voyage simple.

Ces résolutions ont été passées aussi par le Conseil de Comté des Îles de la Madeleine et par le Conseil de Développement du Territoire des Îles de la Madeleine. De plus le Board of Trade de Charlottetown acceptait cette résolution le 15 janvier 1968.

M. H. J. Darling, président de la Commission Canadienne des Transports reçut toute cette documentation et nous assurait que «Le Comité des Transports par Eau est aussi intéressé que possible à l'amélioration à apporter à ce service et va accorder une attention toute particulière aux représentations de Votre Chambre de Commerce.»

Le 26 janvier une délégation de Madelinots se rend à Ottawa rencontrer le président de la Commission Canadienne des Transports ainsi que Messrs. Balfrey, Directeur des Services d'Expédition, et Blanchet, Directeur des Services Administratif et Financier en présence de l'Hon. Maurice Sauvé. Le rapport de la rencontre tel que donné à la Chambre de Commerce des Îles apparaît en annexe du présent mémoire.

Pour faire suite aux recommandations du rapport des délégués, le 7 février, le télégramme suivant fut envoyé à M. Darling avec copie à M. Sauvé. (Suite aux démarches faites

taken to improve water transportation services—Magdalen Islands—Prince Edward Island. By a resolution of a joint meeting of the Chamber of Commerce and the County Council, you are invited to visit the Magdalen Islands with the other members of your Commission and the Honourable Maurice Sauvé before you reach any decision which does not correspond exactly to the requests already submitted in writing, supported by the Board of Trade of Charlottetown and discussed with our delegates. Kindly reply immediately by telegram." The reply reached us on February 9: "Re: Telegram regarding the subject under study, shall advise of decisions in due course."

On February 25, 1968, instead of the Maritime Commission, Mr. Blanchet came to the Islands to deliver a flat NO. Mr. Blanchet admitted that the major part of our claims were well-founded but could give us nothing more than a NO. He even admitted that... 150 passengers and merchandise. The ferryboat is to be a "Roll-on Roll-off" weighing some 1600 tons, It is to be provided with reception areas and rest rooms, bar, cafeteria and some cabins. It must be able to do 20 knots an hour and therefore, when necessary, make two trips daily.

We sincerely hope that the period of study is over and that finally a solution will be found for a problem which retards the growth of an already under-developed area.

We refer you to the studies undertaken by the *Bureau d'Aménagement de l'Est du Québec* (Eastern Quebec Development Bureau) particularly No. 10 of the Development Plan.

We also refer you to the general co-operation agreement signed on May 26, 1968 between Canada and the Province of Quebec relative to the above plan. Finally, we refer you to the Regional Development Board which has an office in Montjoli.

The present lamentable state of the transportation service is beyond question. We have dared to suggest a formula for change because we believe that being CANADIAN we are also entitled to the JUST SOCIETY.

Chamber of Commerce of the
Magdalen Islands.

pour amélioration des services transports par eau—Îles de la Madeleine—Île du Prince-Édouard stop. Par résolution d'une réunion conjointe Chambre de Commerce et Conseil de Comté vous êtes prié de vous rendre aux Îles de la Madeleine avec les autres membres de votre commission et l'Hon. Maurice Sauvé avant de prendre toute décision qui ne correspondrait pas exactement aux demandes déjà transmises par écrit, appuyées par le Board of Trade de Charlottetown et discutées avec nos délégués. Prière de répondre immédiatement par télégramme.) La réponse nous parvient le 9 février: Re: Tel. au sujet en étude, aviserons décisions en temps et lieu.

Le 25 février 1968 au lieu de la Commission Maritime, M. Blanchet vient aux Îles nous dire NON. Monsieur Blanchet admit une grande partie le bien fondé de nos réclamations, mais ne put en dire plus que son mandat, NON. Il admit même que 150 passagers et de la marchandise. Ce traversier doit être un «Roll-on Roll-off» jaugeant quelques 1600 tonnes brutes. Il devra être muni de salons et salles de repos, bar, cafétéria et avoir quelques cabines de disponible. Il devra faire environ 20 nœuds à l'heure et de ce fait pourra, lorsque nécessaire, faire deux voyages journaliers.

Nous espérons sincèrement que le temps des études est révolu et qu'enfin on arrivera à une solution au problème qui retarde le développement d'une région qui est déjà sous-développée.

Nous Vous référons aux études que le Bureau d'Aménagement de l'Est du Québec a faites plus particulièrement au cahier No. 10 du Plan de Développement.

Nous vous référons aussi à l'entente générale de coopération signée le 26 mai 1968 entre le Canada et la province de Québec relativement au susdit plan. Enfin nous vous référons au Conseil Régional de Développement qui a bureau à Mont-Joli.

Il ne fait aucun doute de l'état lamentable actuel du service de transport et si nous avons osé vous suggérer une formule de rechange. C'est que nous croyons qu'en étant Canadiens nous avons droit nous aussi à la Société juste.

La Chambre de Commerce des
Îles de la Madeleine.

REPORT OF THE MEETING BETWEEN THE DELEGATES OF THE MAGDALEN ISLANDS AND THE MARITIME COMMISSION

Having to delay our departure to Thursday, January 25, we met the Honourable Maurice Sauvé, Member of Parliament for the Magdalen Islands and Minister of Forestry and Rural Development, in his office on Thursday evening. We briefly outlined the purposes of our visit and the petition we had been called upon to present. The Minister was favourable to our request and promised us his every assistance. The following day, we met Mr. H. J. Darling, Chairman of the Water Transport Commission, Mr. G. R. Blanchet, Director of the Administrative and Financial Services of the Commission and Captain C. P. Balfry, Director of Shipping Services of the above Commission. The meeting took place in the office of the Honourable Sauvé, in his presence. Mr. Turbide, as spokesman, presented our request and discussion ensued on the subject. The members of the Maritime Commission appeared somewhat surprised over our request even though the resolutions of the Chamber of Commerce of the Islands, the Islands County Council and the Magdalen Islands Development Board had been sent to them. Apparently no consideration whatever had been given to these resolutions. Mr. Balfry gave us to understand that the Maritime Commission was already prepared to sign a new contract for the year 1968, without tender, with the Magdalen Islands Transportation Ltd., and the reason for delay was that the transport company had requested an increase of $111,000.00 over the 1967 subsidy which amounted to $278,000.00 in order to make up the operating deficit for 1967 which rose to close to $90,000.00. We were somewhat surprised to learn of such a deficit. In a report prepared by a special government commission in 1965, the profit was estimated at close to $60,000.00 for the same transport company and profits from the transportation of goods and passengers increased from $120,000 in 1963 to approximately $240,000.00; in addition, loading and unloading expenses had not increased to this point. We were not there to analyze the figures cited by Mr. Blanchet, but just the same we remarked that even if the figures had been checked and verified, they were the figures from a company which operated without competition of any kind and which had six offices in various places in the Maritimes and Magdalen Islands. Some members of the Maritime Commission raised the objection that we could not stop trade with Charlottetown. Our reply was that, first of all, we were the customers and

RAPPORT DE LA RENCONTRE ENTRE LES DÉLÉGUÉS DES ILES DE LA MADELEINE ET LA COMMISSION MARITIME

Ayant dû retarder notre départ à jeudi, le 25 janvier, nous avons rencontré l'Honorable Maurice Sauvé, député des Iles de la Madeleine et ministre des Forêts et du Développement rural à son bureau jeudi soir. Nous avons exposé assez brièvement les buts de notre visite et la demande dont on était mandatés de faire. Le ministre a été favorable à notre demande et nous a promis toute l'aide qu'il pourrait y apporter. Le lendemain, nous avons rencontré M. H. J. Darling, président de la Commission Maritime, M. G. R. Blanchet, directeur du Service Administratif et Financier de la Commission ainsi que le capitaine C.P. Balfry, directeur des Services d'Expédition de ladite Commission. La rencontre eut lieu au bureau de l'Honorable Sauvé et en sa présence. M. Turbide, en tant que porte-parole, a exposé notre demande et la discussion s'est ouverte sur le sujet. Les membres de la Commission Maritime ont paru quelque peu surpris de notre demande, même si les résolutions de la Chambre de Commerce des Iles, du Conseil de Comté des Iles et du Conseil de Développement du territoire des Iles de la Madeleine leur avaient été envoyées. Il semble qu'on n'ait pas tenu compte aucunement de ces résolutions. M. Balfry nous a laissé entendre que la Commission Maritime était déjà prête à signer un nouveau contrat pour l'année 1968 sans demander de soumission avec la Magdalens Islands Transportation Ltée, et que le retard dû à signer ce contrat était que cette dernière compagnie de transport avait demandé une augmentation de $111,000.00 sur la subvention de l'année 1967 qui se chiffrait à $278,000.00, et ce, en vue de combler le déficit d'opération de l'année 1967 qui se chiffrerait à près de $90,000.00. Nous sommes restés un peu surpris d'apprendre un tel déficit vu que dans un rapport préparé par une commission spéciale du gouvernement en 1965 ce rapport montrait un profit de près de $60,000.00 pour la même compagnie de transport et que les profits réalisés à même le transport des marchandises et des passagers a passé de $120,000 en 1963 à près de $240,000.00, et que les dépenses d'embarquement et de débarquement n'ont pu augmenter à ce point. Nous n'étions pas là pour analyser les chiffres fournis par M. Blanchet, mais tout de même nous avons fait remarquer à ce dernier que même s'ils étaient contrôlés et vérifiés, ces chiffres étaient les figures d'une compagnie qui opère sans aucune concurrence, et que cette compagnie entretient tout de même six bureaux sur

therefore it was the duty of our suppliers to provide us with the desired service and that, secondly, these same suppliers had given their approval through the Board of Trade of Charlottetown. The Honourable Maurice Sauvé then put forward a counter-proposal for a daily service between Souris, Prince Edward Island and Havre-Aubert to the Magdalen Islands commencing June 15 to September 15. Neither the Maritime Commission nor the delegates present approved nor disapproved the proposal. The members of the Maritime commission present requested 15 days to study our request. Having no other choice, we had to agree.

CONCLUSIONS:

(1) It is regrettable that a Canadian Commission, appointed by Parliament and representing the Canadian people, had not taken into consideration the copies of resolutions of various public organizations of the Magdalen Islands, submitted to them;

(2) It is infinitely regrettable that the Maritime Commission had not communicated with the various public bodies of the Magdalen Islands before returning to the 1966 transportation schedule;

(3) It is regrettable that the Commission was again prepared to sign a contract with the same transportation company, with an increased subsidy, without having first invited tenders for transportation.

It is not within our jurisdiction to make recommendations, but we feel it would be desirable to invite members of the Maritime Commission to the Magdalen Islands around February 15, to be accompanied, if possible, by the Honourable Maurice Sauvé, Minister of Forestry and Rural Development and Member of Parliament of the Magdalen Islands, the Member of Parliament for Bonaventure, Mr. Béchard, and the Honourable P. T. Hellyer.

différents points des Maritimes et des Iles de la Madeleine. Certains membres de la Commission Maritime ont soulevé l'objection que nous ne pouvions pas arrêter le commerce avec Charlottetown. Notre réponse était que premièrement, nous étions les clients et donc il incombait à nos fournisseurs de nous donner le service désiré, et que deuxièmement ces mêmes fournisseurs avaient donné leur accord par l'entremise du Board of Trade de Charlottetown. L'Honorable Maurice Sauvé fit alors une contre-proposition, soit un service journalier entre Souris, Iles du Prince-Edouard et Havre-Aubert aux Iles de la Madeleine, et ce, à partir du 15 juin au 15 septembre. Ni la Commission Maritime, ni les délégués présents n'ont, soit approuvé ou désapprouvé cette proposition. Les membres de la Commission Maritime présents ont demandé 15 jours afin de pouvoir étudier notre demande. N'ayant pas le choix, nous avons dû accepter.

CONCLUSIONS: 1) Il est regretable qu'une Commission Canadienne nommée par le Parlement et représentant le peuple canadien n'ait pas pris en considération les copies de résolutions des différents corps publics des Iles de la Madeleine qui leur avaient été envoyées;

2) Il est infiniment regrettable que la Commission Maritime n'ait pas entré en communication avec les différents corps publics des Iles de la Madeleine avant de vouloir revenir à la cédule de transport 1966;

3) Il est regrettable que cette Commission s'apprêtait de nouveau à signer un contrat avec la même compagnie de transport et ce, avec une augmentation de subvention sans avoir au préalable demandé des soumissions pour ledit transport.

Il n'est pas de notre compétence de faire des recommandations, mais nous pensons qu'il serait souhaitable d'inviter les membres de la Commission Maritime aux Iles de la Madeleine vers le 15 février, et que ces membres pourraient être accompagnés de l'Honorable Maurice Sauvé, ministre des Forêts et du Développement Rural et député des Iles de la Madeleine, par le député du Comité de Bonaventure, M. Béchard, ainsi que par l'Honorable P.T. Hellyer.
